Upon retirement, Federal judges can choose to enter senior status. When

they do so they voluntarily offer to continue performing their judicial services. These services are a major contribution to the Federal judiciary, as retired judges share the ever-increasing workload of the Federal courts.

Title I of the social security amendments extends social security coverage to Federal judges. I do not disagree with that. What I do disagree with, however, is the provision that treats as wages, for purposes of the social security system, compensation paid to retired judges who continue in active duty. This creates significant financial disincentives for retired judges to continue their judicial work. First, most obviously, they will be subject to the social security payroll tax, beginning in 1984. Second, because of the earnings limit, most retired judges between the ages of 65 and 70 will not receive whatever social security benefits they are entitled to receive.

Because of these disincentives, I am concerned that we run the risk of losing the services of many retired judges. To compensate for the loss of these services, Congress may well have to add additional judgeships to cope with existing caseloads, at a considerably greater expense. In addition to these undesirable effects on the judicial system and on the budget, this provision is simply unfair as it applies to current retired judges, who had agreed to continue service on terms that did not include social security coverage.

I believe that a more appropriate treatment would view compensation of retired Federal judges in active service as retirement income, not as earned income, and would acknowledge that these judges are performing their services voluntarily. This was the position taken in the Senate version of the social security legislation.

The provision in the final version of the bill was included with little study of its potential impact on the judicial system or of the unique status of Federal judges. My legislation represents a more reasonable interpretation of the services provided by retired Federal judges.●

By Mr. MELCHER:

S. 1277. A bill to amend the joint resolution making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes; to the Committee on Energy and Natural Resources.

ENERGY CONSERVATION GRANTS TO LOCAL GOVERNMENT AND PUBLIC CARE INSTITUTIONS ACT OF 1983

Mr. MELCHER. Mr. President, in the fiscal year 1983 continuing resolution, Senator WARNER added an amendment which directed the Department of Energy to use up to $200 million in moneys obtained in settlements with oil companies for pricing violations and to distribute these funds by an allocation formula to the States. The States are permitted to apply these funds to any of the Federal energy conservation—and low-income energy assistance—programs in their State. The one exception was that in listing the eligible Federal programs the Warner amendment left out the program in the Energy Policy and Conservation Act under which buildings owned by units of local government and public care institutions may receive funds for energy audits and technical assistance. That Federal program does not permit funds to be used to purchase and install energy conservation measures—in contrast to the schools and hospitals program, which does permit the purchase and installation of energy conservation measures.

I am introducing an amendment which:

First, amends the Warner amendment to include the program for buildings of local government and public care institutions as an eligible activity; and

Second, provides that, for the purposes of the Warner amendment, States not only may apply the funds to the program for buildings of local government and public care institutions, they may also spend the funds for purchase and installation of energy conservation measures in those buildings. Again, expenditures for energy conservation measures are not normally permitted in this program.

I would expect that, as other overcharge funds accrue, the Warner amendment will be used as a model for distribution for those funds as well, so this proposed amendment, if adopted, may affect the use of more than $200 million.

I ask unanimous consent that the text of the bill be printed at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1277

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be referred to as the "Energy Conservation Grants to Local Government and Public Care Institutions Act of 1983."

SEC. 2. Amend Sec. 155(e)(2) of the Joint Resolution Making Further Continuing Appropriations and Providing for Productive Employment for FY 1983 (Public Law 97-377) to add a new subparagraph (F) as follows:

"(F) the program under Part H of Title III of the Energy Policy and Conservation Act (Public Law 94-163); except that for purposes of this Act the term "technical assistance" may include undertakings to acquire and to install one or more energy conservation measures (as defined in Sec. 400-A of the Energy Policy and Conservation Act (Public Law 94-163) in buildings owned by units of local government and public care institutions."

By Mr. MELCHER (for himself, Mr. TSONGAS, Mr. STENNIS, and Mr. COCHRAN):

S. 1278. A bill to provide for an accelerated program of research, development, and demonstration with respect to the production of electricity from magnetohydrodynamics, leading to the construction and operation of at least one major proof of concept demonstration project in connection with an existing electric powerplant, and for other purposes; to the Committee on Energy and Natural Resources.

THE MHD RESEARCH, DEVELOPMENT AND DEMONSTRATION POLICY ACT OF 1983

Mr. MELCHER. Mr. President, today I am introducing, for myself, Senator TSONGAS, Senator STENNIS, and Senator COCHRAN, the "Magnetohydrodynamics Research, Development and Demonstration Policy Act of 1983." This act establishes a cooperative program of research, development and demonstration with respect to magnetohydrodynamics (MHD) in the Department of Energy. The act also provides that, if sufficient support from the private sector can be obtained, the Secretary of Energy would undertake a proof of concept demonstration of MHD technology in connection with an existing electric powerplant.

A major proof of concept demonstration is the next logical step in MHD development. Carrying out this demonstration at an existing powerplant site will provide all the reliability and operational testing of data needed for commercial evaluation of MHD technology at a fraction of the cost of a new, full-scale demonstration plant.

Over the past several years Congress has supported a program of MHD research and development through the appropriations process. It is time that this support was translated into a definitive statutory program with specific agreed-upon objectives and milestones for the development of the technology. This will greatly facilitate congressional oversight, help insure a tightly run program, and provide for a far more rapid realization of the goal we all seek: expanded use of domestic coal to produce more electricity efficiently and in full compliance with applicable environmental laws and regulations.

MHD offers tremendous promise with respect to this goal. MHD is a technique for generating electricity that extracts double duty from the fuel it uses. Consequently, efficiencies approximately twice those achieved in ordinary electric powerplants are achievable with MHD. In addition, the environmental consequences of electric power generation—releases of carbon dioxide, sulfur dioxide, and oxides of nitrogen—are all below, and is some cases substantially below, applicable environmental limits in the

case of a powerplant that makes use of the technology of MHD.

As presently envisioned, an MHD facility would involve a conventional steam electric powerplant and an MHD "topping cycle." Both elements produce electricity from the same physical effect—the motion of charged particles that are free to move under the influence of a magnetic field. Oppositely charged particles moving in the same direction in a magnetic field tend to be forced apart. This charge separation can be exploited for the production of electric power. In a conventional powerplant the charged particles are free electrons in a conducting loop. The loop is made to spin in a magnetic field to produce the electric power. The heat from the combustion of fossil fuel is used to drive a turbine, which turns the conducting loop.

In an MHD channel the moving charged particles are ionized atoms contained in a blast of hot gases produced from the combustion of coal. The jet of ionized atoms passes through a magnetic field that separates oppositely charged particles and leads to the production of direct current electric power. Double duty use of the original fuel is accomplished because the jet of ionized gases, after passing through the MHD channel, provides the power to run a conventional turbine. In this way, the hot gases produced from the original combustion of coal are used twice to produce electricity.

Fuel-to-electricity efficiences for a typical MHD-assisted powerplant are expected to be 50 to 60 percent. This should be compared to a national average electric powerplant efficiency of approximately 32 percent and approximately 40 percent for typical new steam electric powerplants. Because much more electricity is produced from each unit of fossil fuel with MHD, the effects of all environmental pollutants from an MHD-assisted plant are automatically reduced on a per-kilowatt-hour basis. This means that the inevitable impact of waste heat, carbon dioxide loading of the atmosphere, acid rain and all other environmental effects of electricity generation and fossil fuel use are immediately reduced, and the cumulative impacts of these pollutants are pushed much farther into the future when, we hope, we will possess the know-how, the resources and, most importantly, the will to effectively and directly address these environmental issues.

Thus, the high efficiency of MHD power systems should significantly reduce thermal pollution. Only half as much cooling water is needed for MHD systems as compared to a conventional coal-fired unit of the same output, and only one quarter the amount of cooling water is needed to produce a kilowatt of electricity from MHD as compared to present nuclear power systems.

MHD power systems will have a substantial impact in reducing acid rain. Sulfur emissions are much, much lower in an MHD system than in a conventional coal-fired powerplant, because of the use of potassium as a "seed" for the MHD channel. Potassium carbonate is injected to serve as a source of the ionized atoms that act as the charge carriers in the MHD process. After serving this purpose, the potassium is available to combine with any sulfur released during coal combustion. The potassium sulfate produced is easily isolated and removed, carrying with it over 90 percent of the sulfur in the coal. This process is far more effective at sulfur removal than any flue gas sulfur removal technique now available. The capture of this much sulfur dramatically reduces acid rain from MHD powerplant emissions.

MHD has been tested in pilot-plant facilities in Massachusetts, Montana, and Tennessee. The Soviet Union has the most operating experience with MHD technology and also has the most ambitious plans for new construction of commercial facilities. According to testimony presented to the Senate Committee on Energy and Natural Resources, the Soviet Union is proceeding with the design and construction of a 500-megawatt electric power commercial utility plant that is expected to be on line in the mid-1980's.

Now is the time for the United States to undertake a proof of concept demonstration of MHD technology in connection with an existing electric powerplant. The addition of a MHD topping cycle to an existing electric powerplant will insure close cooperation with the private sector, will reduce the overall cost of the project and will maximize the practical operating experience obtained from the demonstration.

The bill I am introducing today authorizes the Secretary of Energy to enter into an agreement for such a demonstration if sufficient private sector interest in the project exists. This proof of concept facility would be capable of generating at least 50 megawatts of electric power from the MHD portion of the dual cycle arrangement that will come into existence when the MHD channel is added to the existing electric powerplant. The Secretary is also required to provide Congress with a comprehensive program management plan that integrates this proof of concept demonstration into a coordinated program for the development of MHD technology to the point of commercial acceptance.

The Federal Government could assume no more than 60 percent of the project costs of the proof of concept demonstration. Operation of the completed facility would be planned for 1992.

Mr. President, I am introducing this bill to initiate a discussion of policy for MHD research, development and demonstration. At the present time we are undergoing a reappraisal of fossil fuel RD&D priorities. Congress has, I think, conclusively demonstrated that it has no interest in the current administration's proposals to essentially eliminate fossil fuel research, development, and demonstration. I am hopeful that the administration will come to see the value of a much more ambitious program of Federal involvement in the development of alternative ways of using our vast resources of fossil fuel, particularly coal, which comprises the largest share of these reserves.

MHD deserves an important place in that program. I hope that the debate we are beginning with the introduction of this bill will lead to a wider recognition of that fact.

I ask unanimous consent that the text of the bill and a section-by-section analysis of its provisions appear in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1278

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be referred to as the "The Magnetohydrodynamics Research, Development and Demonstration Policy Act of 1983".

FINDINGS AND PURPOSES

SEC. 2. (a) FINDINGS—Congress hereby finds and declares that—

(1) the energy policy of the United States must emphasize the development, as rapidly as is feasible, of a diverse array of technologies capable of usir.g domestic coal efficiently and in an environmentally acceptable manner;

(2) technology for the production of electricity from coal making use of magnetohydrodynamics has the potential for substantially higher efficiencies than can be achieved with other technologies and also promises to meet major environmental requirements applicable to electric powerplants;

(3) commercial acceptance of magnetohydrodynamic technology for the production of electricity will significantly augment the ability of the United States to make use of domestic coal and to reduce its reliance on imported energy, thereby enhancing national security and offering benefits to the Nation as a whole;

(4) although the basic technology of magnetohydrodynamics is available, commercial acceptance of this technology is inhibited by the lack of an adequate Federal program for research, development and demonstration with respect to magnetohydrodynamics;

(5) magnetohydrodynamic technology is ready for a proof of concept demonstration on a scale sufficient to provide reliability and operational data to support commercial evaluation of the technology;

(6) the Federal Government must aggressively support research, development and demonstration of technology for the production of electricity making use of magnetohydrodynamics;

(7) the Federal Government must provide support for the early proof of concept demonstration of magnetohydrodynamic technology in connection with an existing electric powerplant so as to provide reliability and operational data for the technology in a manner that achieves the highest practicable testing and operational flexibility at a cost significantly below the cost of a full-sized demonstration powerplant; and

(8) an adequate program of research, development and demonstration of magnetohydrodynamic technology will require an increased commitment by the Federal Government.

(b) PURPOSES—The purposes of this Act are to—

(1) establish a definitive Federal program of research, development and demonstration with respect to the technology for producing electricity making use of magnetohydrodynamics;

(2) set forth specific goals for the program, including a target date of 1992 for routine operation in connection with an existing electric powerplant of a proof of concept demonstration facility incorporating magnetohydrodynamic components;

(3) authorize the Secretary of Energy to make financial commitments to, and to enter into a cooperative agreement with private firms for the financing of, a proof of concept demonstration of magnetohydrodynamic technology; and

(4) provide adequate authorization for appropriations for the program established under this Act.

DEFINITIONS

SEC. 3. As used in the Act the term—

(1) "demonstration" includes the addition of magnetohydrodynamic components to an existing electric powerplant in order to obtain operational experience with magnetohydrodynamic technology;

(2) "magnetohydrodynamics" means a system that uses a plasma composed of ionized gases at high temperatures in the presence of an external magnetic field to induce voltages sufficient for the production of electric power; and

(3) "Secretary" means the Secretary of Energy.

ACTIVITIES OF THE SECRETARY

SEC. 4. (a) DUTIES OF THE SECRETARY—

(1) The Secretary shall conduct and provide support for such research and development as he determines will most expeditiously clarify the scientific and technical issues that directly affect the development and commercial acceptance of magnetohydrodynamic technology.

(2) Research and development under paragraph (1) may include work on—

(A) magnet technology;

(B) instrumentation and diagnostics;

(C) materials properties and behaviour under conditions associated with operation of magnetohydrodynamic components;

(D) improved recovery and reprocessing of seed materials added to the magnetohydrodynamic plasma to improve conductivity;

(E) continued improvement of electrodes and channels capable of continuous operation for periods of one year or more;

(F) continued improvement of magnetohydrodynamic combustors; and

(G) such other matters as the Secretary determines will further the purposes of this Act.

(3) The Secretary shall accelerate research and development activities with respect to magnetohydrodynamics under the program in existence on the date of the enactment of this Act.

(b) COMPREHENSIVE PROGRAM MANAGEMENT PLAN—The Secretary, after consultation with representatives of the electric utility industry, design and construction firms, component suppliers, university and industrial research scientists and engineers, and other appropriate private sector organizations and firms, shall prepare a comprehensive program management plan for the conduct of research, development and demonstration activities under this Act. Such plan shall include—

(1) a presentation of the program strategy that will be used to achieve the purposes of this Act;

(2) a program implementation schedule, including identification of detailed milestone goals and associated budget and program resources requirements;

(3) a discussion of the principal alternative strategies and schedules under paragraphs (1) and (2) respectively and a statement of the reasons why these alternatives were rejected;

(4) a plan for financing the proof of concept demonstration project under section 5;

(5) identification of the supporting research and development needed to solve the scientific and engineering problems likely to arise with magnetohydrodynamic technology in meeting the 1992 target date; and

(6) an analysis of the institutional, environmental and economic considerations that affect the development and commercial acceptance of magnetohydrodynamic technology;

(c) TRANSMITTAL—The Secretary shall transmit the comprehensive program management plan under this section to the appropriate committees of the House of Representatives and the Senate not later than 180 days after the date of the enactment of this Act.

(d) INTERNATIONAL COOPERATION—The Secretary shall seek to enter into international cooperative agreements for the conduct of magnetohydrodynamic research and development of mutual benefit to the parties to any such agreement that the Secretary determines will further the purposes of this Act.

PROOF OF CONCEPT DEMONSTRATION

SEC. 5. (a) AGREEMENT—The Secretary shall offer to enter into an agreement in accordance with this section with the owner of an existing, coal-fired, electric powerplant, and with such other persons as the Secretary deems appropriate, for a proof of concept demonstration of magnetohydrodynamic technology in connection with such powerplant. Within 270 days after the date of the enactment of this Act, the Secretary shall publish notice soliciting bids for an agreement under this section.

(b) PROVISIONS.—The agreement under paragraph (a) shall provide for—

(1) the construction, operation and maintenance of a magnetohydrodynamic component of capacity of no less than 50 megawatts of electric power in connection with the existing electric powerplant referred to in paragraph (a);

(2) assumption by the Federal government of no more than sixty per centum of project costs under this section;

(3) a target date of January 1, 1992, for operation of the completed facility; and

(4) disposition of patents and other rights or privileges resulting from the project under this section in accordance with section 9 of the Federal Nonnuclear Research and Development Policy Act of 1974.

(c) COMPETITIVE BIDS.—Within one year after the date of the enactment of this Act the Secretary shall select the parties to the agreement under this section competitively, based on the bids available on the date thirty days prior to selection. In making the award of the selection under this section the Secretary shall weigh and take into account—

(1) estimated project costs to the Federal government;

(2) the prospects, as determined by the Secretary, for successful completion and operation of the project in accordance with the agreement;

(3) the extent, as determined by the Secretary, to which the project will contribute to the development and commercial acceptance of magnetohydrodynamic technology; and

(4) such other factors as the Secretary deems appropriate.

REVIEW PANEL

SEC. 6. (a) ESTABLISHMENT OF PANEL.—Within 90 days after the date of the enactment of this Act, the Secretary shall establish, and with the concurrence of the Energy Research Advisory Board shall appoint at least seven members to, a Technical Review Panel for Magnetohydrodynamics.

(b) MEMBERSHIP.—Each Member of the panel under subsection (a) shall be a person who by virtue of training and experience is especially qualified to review and comment on magnetohydrodynamic technology in relation to the electric utility industry and to review and comment on the ongoing programs and projects of the Secretary with respect to magnetohydrodynamic technology, including the proof of concept demonstration under section 5.

(c) PROCEDURES.—Activities of the panel under this section shall be in accordance with the laws and regulations, including provisions for compensation, governing activities of technical and fact-finding groups reporting to the Energy Research Advisory Board.

(d) DUTIES.—The panel under this section shall meet at least twice annually and shall review and make such recommendations as the panel deems appropriate on—

(1) the research and development programs of the Secretary with respect to magnetohydrodynamics;

(2) the comprehensive program management plan under section 4(b), the extent to which the plan is being followed and any needed amendments to the plan;

(3) the type of experiments and facilities needed to achieve the purposes of this Act;

(4) the progress in implementing section 5;

(5) the adequacy of cooperation with domestic private industry, including the electric utility industry, and the adequacy of cooperation internationally in research, development and demonstration with respect to magnetohydrodynamic technology;

(6) institutional, environmental and economic factors affecting the development and commercial acceptance of magnetohydrodynamic technology; and

(7) such other matters as the panel deems appropriate.

(e) Reports—The panel under subsection (a) shall report annually to the Energy Research Advisory Board. Such report shall include any recommendations under subsection (d). The Energy Research Advisory Board shall consider each report under this

subsection and shall promptly transmit the report along with the comments of the Board to the Secretary and to Congress.

REPORT TO CONGRESS

SEC. 7. As a separate part of the annual report submitted under section 801 of the Department of Energy Organization Act (Public Law 95-91), the Secretary shall submit to Congress an annual report on activities under this Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. (a) AUTHORIZATION—There is hereby authorized to be appropriated to the Secretary for the fiscal years ending September 30, 1984, September 30, 1985 and September 30, 1986, such sums as may be necessary to achieve the purposes of this Act.

(b) CONTRACTS—In carrying out the provisions of this Act, the Secretary may enter into contracts only to such extent or in such amounts as may be provided in advance in appropriations Acts.

SECTION-BY-SECTION ANALYSIS

THE MAGNETOHYDRODYNAMICS RESEARCH, DEVELOPMENT AND DEMONSTRATION POLICY ACT OF 1983

Section 1. This section establishes the title of the Act as "The Magnetohydrodynamics Research, Development and Demonstration Policy Act of 1983".

SEC. 2. This section sets forth Congressional findings and the purposes of the Act.

The former include a finding that magnetohydrodynamic technology is ready for a proof of concept demonstration on a scale sufficient to provide reliability and operational to support commercial evaluation of the technology.

The purposes include the provision of authority for the Secretary of Energy to make financial commitments to a proof of concept demonstration of magnetohydrodynamics under a cooperative financing agreement with the private sector.

SEC. 3. This section contains the definition of terms used in the Act, including "demonstration" and "magnetohydrodynamics".

SEC. 4. This section sets forth the duties of the Secretary under the Act. These duties include the conduct and support of a research and development program in magnetohydrodynamics and the preparation of a comprehensive program management plan for activities under the Act. The plan is to be transmitted to Congress not later than 180 days after the date of the enactment of the Act. The Secretary is directed to seek to enter into certain international cooperative agreements in magnetohydrodynamic research and development.

SEC. 5. This section describes the proof of concept demonstration authorized by the Act and requires the Secretary, within 270 days after the date of the enactment of the Act, to offer to enter into an agreement with the owner of an existing, coal-fired, electric powerplant for purposes of the demonstration.

The agreement must contain a number of provisions, including a requirement of a target date of January 1, 1992, for operation of the completed facility. The parties to the agreement are to be selected by the Secretary on a competitive basis using criteria set forth in the section.

SEC. 6. This section requires the Secretary to establish a Technical Review Panel for Magnetohydrodynamics. The membership, procedures and duties of the panel are set forth in the section. The duties include review of, and recommendations as the panel deems appropriate on, the progress in implementing the proof of concept demonstration under section 5.

SEC. 7. This section requires the Secretary to report annually to Congress on activities under the Act.

SEC. 8. This section authorizes such appropriations as may be necessary for fiscal years 1984, 1985 and 1986, and limits the Secretary's authority to enter into contracts to the aggregate amounts provided in advance in appropriations Acts.

By Mr. HELMS (for himself, Mr. MCCLURE, Mr. EAST, and Mr. NICKLES):

S. 1279. A bill to amend the Food Stamp Act of 1977 to establish a State block grant option for the food stamp program; to the Committee on Agriculture, Nutrition, and Forestry.

FOOD STAMP OPTIONAL BLOCK GRANT ACT OF 1983

Mr. HELMS. Mr. President, I send to the desk legislation to permit States to operate a low-income nutrition assistance block grant in lieu of the present food stamp program.

This is the same legislation as that included within the Senate version of the Omnibus Budget Reconciliation Act of 1982. Unfortunately, the House conferees on the bill did not agree to include this provision in the 1982 reconciliation bill.

This forthright, sensible approach to nutritional assistance merits the careful consideration and support of my colleagues, as it did last year. We need not be confined to the issues of the past in determining how best to manage food assistance in the future.

Providing the States with the discretion on how to operate their programs will enable those States which wish to strike out in a new direction the option to do so without any coercion to those States who do not want to take such initiatives. This optional block grant approach allows federalism to work at its best, with maximum State flexibility.

BACKGROUND

In 1981, the Committee on Agriculture, Nutrition, and Forestry recommended, and the Congress enacted, a mandatory block grant for Puerto Rico, which is funded at $825 million annually.

Many State and local officials have suggested to me for years that for numerous reasons they feel the need for greater flexibility in the administration of the food stamp program.

The current food stamp program is caught between two competing interests. On the one hand, administrators at all levels of government—Federal, State, and local—desire that the program be as administratively simple and efficient as possible, an objective I share.

However, the additional Federal interest is that of insuring responsibility by the States in the operation of the current program. This is needed because under the present system the Federal Government bears 100 percent of the costs of the program; that is, the actual food stamp benefits distributed to individual households. Therefore, States have often concentrated on increasing the number of food stamp recipients; to do so did not cost the State, but rather was financed by the Federal Government.

Additionally, there has been all too little concern with efficient administration because, again, costs for failures in the system largely are being borne by the Federal Government. Administrative costs associated with the program are shared, 50-50, between the Federal Government and State governments.

The present system, however, provides little to no incentive for States to operate an effective and efficient program. As a consequence, many safeguards have been added to the law and regulations to insure that States will be required to do effective administration, stress important verification procedures, detect and prosecute fraudulent participation, and so forth. In essence, the Federal Government has been forced to establish every jot and tittle of procedure in order to be certain that such measures are implemented by the States.

After hearing many suggestions from local and State officials, I have attempted to merge these two interests in a way that will benefit all interested parties—Federal, State, and local governments as well as recipients.

I believe this proposal will provide for the right mix of State responsibility—with a set amount of Federal funds each year—and State flexibility—by providing significant State discretion and independence—which should prove to be a successful approach.

FUNDING FORMULA

Under the State option block grant, each State would have the option of operating its own nutrition assistance program in lieu of the food stamp program. Federal funding would continue, based on the percentage of the national expenditures which have been going to each State. The block grant allocation to each State during any fiscal year would be based on the State's share of funding—both benefit costs and the Federal share of State administrative expenses—during the 12-month period ending March 31, 1983. No State would receive less than one-quarter of 1 percent of the total appropriation.

A State's initial allocation is based on the State's cost of operating the food stamp program between April 1, 1982, and March 31, 1983. A tentative outline of approximate percentages compiled by the Department of Agriculture follows, based on the 12 months ending December 31, 1982:

Ratio of operating costs—January 1, 1982 to December 31, 1982

[Percent of food stamp program during fiscal year 1982]

Alabama	2.92
Alaska	.29
Arizona	1.36
Arkansas	1.40

Note: Figures may not add due to rounding.

*Under the block grant funding formula, a minmum of 0.25% would be provided to each State.

Source: Food and Nutrition Service, U.S. Department of Agriculture.

The provision requires the Secretary to pay each block grant State the total allotment of funds for a fiscal year to which the block grant State is entitled immediately after the Secretary has determined the amount of such an allotment at the beginning of the fiscal year. A State would thus know its minimum level of funding at the onset of the fiscal year. Any subsequent funding during a fiscal year, such as a supplemental appropriation, also would be allocated according to the formula.

The formula has been designed in such a way that neither States opting for the block grant nor those continuing under the Federal system will be disadvantaged. The legislation also requires the Secretary of Agriculture to work with the Comptroller General of the United States to develop alternative formulas for the distribution of funds and report to Congress on such alternative formulas by June 30, 1984.

As with many of the block grants established in other programs in 1981, the provision permits the Secretary to allocate funds directly to Indian tribes from the allotment of the block grant States, if the tribes so request and if the Secretary determines that a direct allocation would better serve the members of the tribe or tribal organization.

STATE FLEXIBILITY

Maximum flexibility would be granted to each State to establish nutritional assistance programs designed to meet the needs of that State. Regulatory involvement by the Department of Agriculture would be minimal. The Department would not be permitted to override State plans of operation which meet the guidelines of the legislation.

Each block grant State would have exclusive authority to make determinations concerning standards of or requirements for eligibility to receive assistance under funds furnished through the block grant, and the Secretary may not interfere with such determinations. The State's eligibility standards may include a requirement for work—such as workfare—or a requirement for financial contribution by the recipient.

The amount and form of assistance granted to individuals within the State would be determined by the State. A State must, however, follow through and implement the type and distribution of such assistance as it describes in its annual application.

A State wishing to operate a low-income nutritional assistance block grant during any fiscal year would notify the Secretary at least 30 days before the beginning of the first fiscal year it elects to operate a grant program. A State's election to operate a subsequent year is renewable at the State's option.

USDA OVERSIGHT

Protections that were incorporated in the 1981 block grants against discrimination and prohibiting the use of funds for construction purposes are included.

A State wishing to operate a block grant must submit an application to the Secretary of Agriculture which must include assurances that the State will comply with the purposes and restrictions of the low-income nutritional assistance block grant.

A State wishing to operate a low-income nutritional assistance block grant would be required to:

Conduct public hearings at least biennially by the legislature in order to insure public and legislative involvement in the operation of the block grant;

Certify that it will assess on a regular basis the food and nutrition needs of needy persons residing in the State;

Use the funds provided to raise the level of nutrition among low-income households residing in the State;

Designate a single agency which should be responsible for the administration, or supervision of the administration, of the program for which funds are provided;

Provide that fiscal control and fund accounting procedures will be established to assure the proper disbursal of and accounting for Federal funds, including procedures for monitoring the program carried out by the State with the assistance provided;

Provide for an audit, not less than biennially, of the State expenditures of funds received under the block grant;

Describe how the block grant State will carry out the above protections, and provide a description of the assistance to be provided and the receipients who will be eligible under the program, and the administering agency.

As with block grants adopted in 1981, the General Accounting Office would evaluate expenditures to assure that they are consistent with the requirements of the block grant legislation.

The Secretary's primary role with block grant States is one of oversight. He may, at the request of a State, provide technical assistance to a State considering a block grant, including any analysis of the feasibility and potential shortcomings of specific block grant plans under consideration by the State.

The Secretary would also be responsible for assuring that States opting for a block grant use the funds for the purposes for which they certified the funds would be used. The legislation requires the Secretary to respond expenditiously to complaints of a substantial or serious nature that a block grant State has failed to use funds in accordance with the enacting legislation.

The Secretary may institute fiscal sanctions against block grant States which fail to utilize their allotments in accordance with this legislation in several ways. He may withhold funds, require a State to repay the Federal Government, or offset the amounts against future allocations to the State.

The Secretary and the Comptroller General may request, and the block grant State would be required to furnish, information about the operation of the block grant within that State. However, the Secretary and the Comptroller General may not require States to compile information not already available within the State.

Fines and imprisonment penalties are established for anyone who know-

ingly and willingly embezzles, misappropriates, steals, or obtains by fraud, false statements, or forgery, funds, assets, or property provided or financed under the legislation.

Two recent articles have drawn attention to the attractiveness of the State option block grant. I ask unanimous consent that an article on food stamp reform by Robert J. Valero that was published by the Heritage Foundation in Agenda 1983 and an article on food stamp fraud by Randy Fitzgerald that was published in the February 1983 issue of Reader's Digest be printed at his point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

FOOD STAMP REFORM

(By Robert J. Valero)

The Food Stamp program is in desperate need of reform. The Administration, deeply committed to the New Federalism, had toyed with the idea of transferring food stamps back to the states, but gave in to the opposition of state governors. Thus far, this omission has been one of the major weaknesses of the Administration. A concerted effort to return to the states the responsibility of providing nutritional assistance to those with low incomes should be the Administration's top priority for the Food Stamp program in 1983.

The Administration made a major attempt to restrain the rapid growth of the Food Stamp program is 1982, but its proposals have been resisted on Capitol Hill. The White House proposed reforms that would have resulted in a savings of $2.3 billion in FY83, but Congress reauthorized the program for three years with budget cuts totaling only $1.9 billion over the extended period. Funding has been authorized at levels of $12.87 billion in FY83, $13.15 billion in FY84, and $13.93 billion in FY85. The savings enacted by Congress, thus, amount to less than 5 percent of the total cost of the program, and only one-fifth of the Administration's requested cost savings. Moreover, great care was taken to avoid terminating eligibility of any of the 22 million recipients of the program.

Congress' actions continue to turn away from the original purpose of the Food Stamp program. Designed to provide nutritional assistance to low-income families and to supplement farm incomes, it has mushroomed beyond recognition in its two decades of operation. In 1965, only 400,000 people received food stamps at a cost of $35 million. By 1981, the program was serving 22.4 million Americans—one out of every ten—at a cost of over $11 billion. Food stamps can no longer be considered a nutritional assistance program; in fact, they have evolved into more of an income subsidy. Studies show that less than 40 cents out of every food stamp dollar is used to purchase more food, while over 60 cents is used by recipients to buy other goods and services.

Senator Jesse Helms (R-North Carolina), Chairman of the Senate Agriculture Committee, proposed a state option block grant that would be a step in the right direction. Under the Helms proposal, each state would be given the opportunity to choose either to remain in the Food Stamp program or to implement its own nutritional assistance program. Any state opting to coordinate its own programs would continue to receive the same proportion of federal dollars that it had been receiving under the Food Stamp program. Such a proposal should be considered by the Administration as a starting point for fundamental reform.

The block grant approach corrects some of the fundamental weaknesses of the Food Stamp program. The Food Stamp program is administered by the USDA and operated by state public assistance agencies through their local offices, creating a multi-tiered bureaucracy. Eligibility, benefit levels, and regulations are determined by Congress. Thus, despite differences in conditions and living standards among the states and the fact that state and local agencies must handle the day-to-day operation of the program, one set of rules applies nationwide. Additionally, the excess of federal regulations and paperwork requirements increases costs and decreases efficiency. The USDA reports that it costs the federal government an average of $14 to provide one household's monthly benefit check.

The block grant approach would give the states the needed flexibility that the Food Stamp program sorely lacks. Each state would be permitted to design its own nutritional assistance program and to determine eligibility, benefit levels, and the necessary regulations. State and local officials, because of their proximity to the people they serve, are more aware of the needs and the will of their citizens. Greater public participation in the decision-making process will result, because citizens have more direct control over state and local affairs than they have over national affairs. Additionally, removing the federal government from all but the most essential regulatory oversight would substantially reduce red tape and administrative costs, resulting in higher efficiency and the availability of more funds to those in genuine need of assistance.

State responsibility for providing nutritional assistance will also encourage greater innovation. The Food Stamp program has no major competitors; thus, despite numerous changes in the structure of the program, fundamental change has been lacking. While giving the states the opportunity to devise programs that best meet the needs of their citizens, a block grant would create a more positive environment for experimentation. Successful state innovations could then be adapted by other states and tailored to their own situations.

Another advantage of a block grant would be the increased financial responsibility imposed on the states. In 1981, the average state error rate was 10.6 percent, translating into over $1 billion wasted. States have had little incentive to reduce waste, fraud, and abuse since the federal government pays 100 percent of the benefit cost and about 50 percent of state and local administrative costs. While the states have technically been held liable for excessive errors, the Secretary of Agriculture has waived every liability incurred thus far. Turning complete responsibility of administering nutrition programs to the states would encourage states to scrutinize their programs much more closely. Again, more efficient administration would be encouraged.

One of the criticisms of the block grant approach to nutrition aid is that the states and localities will not be willing or able to provide the required services. This argument is largely outdated. States have undergone major structural changes in the past twenty years, and the powers of local jurisdictions have increased. The states already administer a number of federal social programs such as Medicaid, welfare, housing assistance, nutrition for children and the elderly, and most significantly, operation of the Food Stamp program.

The Reagan Administration insists that the states and localities can better manage social welfare programs. A reaffirmation of that commitment is of fundamental importance for food and stamp reform in 1983.

TIME TO CRACK DOWN ON FOOD-STAMP FRAUD

(By Randy Fitzgerald)

In Kentucky undercover policemen discover that federal food stamps are being traded for automobiles, drugs and automatic weapons. Among 30 suspects arrested is a 62-year-old man convicted of selling the sexual services of a 14-year-old boy for $6,000 in food stamps and $1,000 in cash.

In Chicago a 34-year-old woman is convicted of defrauding food-stamp and related welfare programs of $92,000 over eight years. A Justice Department official estimates food-stamp fraud in the Chicago area totals $36 million annually.

In New York City five members of a family are sentenced to prison for participation in a conspiracy involving the theft of between $4 million and $5 million in food stamps, and laundering them through meat markets.

The food-stamp program has been one of the fastest-growing of all federal programs—escalating from a $30.5-million budget and 367,000 recipients in 1964 to $11.3 billion and 22.5 million recipients today. It is also one of the most fraud-ridden and poorly run programs. Federal investigators calculate that up to $1.6 billion a year is wasted as a result of recipient fraud, administrative error, and organized theft and counterfeiting. In many parts of the country, food stamps have literally become a second currency, used to support a thriving black market in stolen and illicit goods. Says Sen. William L. Armstrong (R., Colo.). "Theft, abuse and error in the program are not just a rip-off of taxpayers; they are a crime against the poor."

What happened? How did an altruistic program, intended to supplement the diet of needy families, become such a morass of problems?

Under the Food Stamp Act, the U.S. Department of Agriculture sets uniform national standards for eligibility in the program and distributes the money in the form of food stamps to the states. It is left to the states to set up certification and delivey systems to ensure that qualified persons receive the assistance.

Tragically, many administrators of state agencies and of local welfare departments neglected to police the program. In 1981 more than $1 billion of federal food-stamp money was misspent as a result of poor state and local administration.

New York City, for example, found itself issuing as many as 27,000 replacement cards for stamp allotments a month to people claiming not to have received their original ones. With neither the resources nor perhaps the inclination to verify these claims, total costs to the city from replacement cards alone reached $15 million a year.

Once word got out that the food-stamp program was easy pickings, fraud losses rose dramatically. Ways in which the system is being defrauded:

Some recipients understate their income and overstate family size to increase their allotments of stamps. Much of this fraud goes undetected because most welfare offices lack facilities to verify claims. Cheats

have also concocted phony names, worn disguises, invented entire families, and collected benefits for years from more than one welfare office or county or state. Between April and September 1981, a Minneapolis man was on the foodstamp rolls of 13 counties in Iowa, Minnesota, North and South Dakotas and Wisconsin.

In Iowa, where recipients receive their food stamps through the mail, investigators discovered that from June 1979 to June 1981, thefts of the stamps from within the mail-distribution system soared 282 percent. In Cook County, Illinois, 26 welfare caseworkers were convicted for creating and servicing fictitious households. With wider acceptance of food stamps as a second currency, counterfeiting has become more common. In Chicago in late 1980, investigators charged two men with counterfeiting $1.1 million in coupons.

Even in 1980, when Congress enacted 14 anti-fraud provisions, slow-moving bureaucrats in the Food and Nutrition Service failed to respond. Nearly two years passed before FNS regulations implemented all the anti-fraud measures.

In September 1981, with the food-stamp program beset by problems, the Justice Department created a Food Stamp Fraud Task Force to undertake a nationwide crackdown. Meanwhile, in the areas of the country where computers matched lists of stamp recipients with tax and unemployment rolls, prosecutors began obtaining even more fraud indictments and convictions. There were 83 convictions as a result of computer matching in Memphis, Tenn. In Los Angeles a substantial portion of 1600 possible fraud cases referred for investigation every month are identified by computer matches. Concedes Jeffrey Rush, Jr., Midwest regional inspector general for the Department of Agriculture, "The court system can't accommodate the hundreds of cases we have under review. But indictment puts cheats on notice that we are serious about going after fraud."

A more pragmatic reason for the change in attitude among state and local officials: on January 12, 1982, Agriculture officials informed the 13 states with the highest error rates that unless they sharply reduce the mistakes, heavy fines will be levied against them.

The following changes mandated by Congress should have an equally profound effect:

Since November 1, 1982, recipients in 16 project areas with the largest numbers of participants—including Los Angeles, New York and Chicago—have been required to present plastic laminated cards bearing their photographs in order to acquire food stamps. This should drastically reduce theft and trafficking in stolen stamps.

As of January 1, 1983, all states must check wage information from tax or unemployment offices against the food-stamp rolls. This should help weed out ineligibles by revealing under-reported and unreported income.

By October 1, 1983, states must require that food-stamp households report monthly on changes in family size and income. This should enable caseworkers to monitor changes in eligibility.

Experiments are also under way to bring the entire food-stamp system into the computer age. Pilot projects in New York City and Detroit are experimenting with a magnetically encoded photo identification card that can be checked through a central computer to ensure that the holder receives the proper quota of stamps. The Detroit system already is saving Michigan an estimated $863,000 a year.

While all of these changes show signs of reducing fraud, waste and confusion, Congress should make even more far-reaching reforms. They include:

BLOCK GRANTS

On July 1, Puerto Rico became the first U.S. territory to receive a block grant to replace its participation in the food-stamp program. Congress had voted to eliminate Puerto Rico from the program in an attempt to cut costs; nearly 60 percent of the population, 1.8 million people, were receiving stamps at an annual cost of $900 million. It is hoped that the block grant of $825 million will force Puerto Rican officials to be more cost-effective.

"If the Puerto Rico experiment proves advantageous," predicts Samuel Cornelius, the Reagan Administration's appointee as administrator of the Food and Nutrition Service, "I suspect that we will move as soon as possible toward the states' receiving block grants for food stamps, depending upon the states' acceptance."

CASHING OUT

Sending recipients a check instead of stamps would remove food stamps from the black market as a second currency and virtually stop counterfeiting. Other savings would come from eliminating the $41.5-milion-a-year cost for printing, distributing and ultimately destroying stamps.

Critics contend that recipients would spend the cash on everything but food. Yet Vermont, which gives cash to low-income persons to buy heating fuel, found that fewer than one percent use the money for other purposes.

Until a system making all paper transactions obsolete can be implemented nationally, cashing out food-stamp benefits, along with block grants, is the most sensible approach if we are to combat fraud and achieve long-term savings. We can accept no less from a program whose abuses for too long have fattened the greedy, deprived the needy and robbed the taxpayer.

Mr. HELMS. Mr. President, I also ask unanimous consent that the text of the bill be printed at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1279

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Food Stamp Optional Block Grant Act of 1983".

SEC. 2. (a) The Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.) is amended by adding at the end thereof the following new section:

"STATE BLOCK GRANT OPTION

"SEC. 21. (a) As used in this section, unless the context otherwise requires, the term—

"(1) 'Attorney General' means the Attorney General of the United States.

"(2) 'Block grant State' means a State which is operating a low-income nutritional assistance program in accordance with this section.

"(3) 'Comptroller General' means the Comptroller General of the United States.

"(4) 'State' means the fifty States, the District of Columbia, Guam, and the Virgin Islands of the United States.

"(b)(1) A State may elect—

"(A) to operate a low-income nutritional assistance block grant program to finance expenditures for food assistance for needy persons within the State in accordance with this section, or

"(B) to have the Secretary operate the food stamp program within the State in accordance with sections 2 through 18 and section 20.

"(2) If a State elects to operate a low-income nutritional assistance block grant program pursuant to paragraph (1)(A), the State shall give notice to the Secretary of such election at least thirty days before the beginning of the first fiscal year it elects to operate the program.

"(3) The Secretary shall make grants to block grant States in accordance with this section.

"(4) The Secretary shall retain each fiscal year, out of funds appropriated pursuant to the authorization contained in section 18(a)(1) for such fiscal year (other than the amount apportioned pursuant to section 19(a)), an amount which bears the same ratio to the total amount appropriated pursuant to such authorization as the amounts received by and benefits distributed in block grant States for the period beginning April 1, 1982, and ending March 31, 1983, under this Act and section 8 of the Act of December 31, 1973 (Public Law 93-233; 42 U.S.C. 1382e note), bears to the total amount received by all States for such period under this Act and such section.

"(c)(1)(A) The Secretary shall allot to each block grant State in each fiscal year, out of funds retained under subsection (b)(4) for such fiscal year, an amount which bears the same ratio to the total amount of funds retained under such subsection as the amount received by and benefits distributed in such block grant State for the period beginning April 1, 1982, and ending March 31, 1983, under this Act and section 8 of the Act of December 31, 1973 (Public Law 93-233; 42 U.S.C. 1382e note), bears to the total amount received by all such block grant States for such period under this Act and such section.

"(B) Notwithstanding subparagraph (A), no block grant State may receive for any fiscal year an amount less than one-quarter of 1 per centum of the amount appropriated pursuant to the authorization contained in section 18(a)(1) for such fiscal year which remains after the apportionment required by section 19(a). If one or more block grant States receive minimum allotments by virtue of this subparagraph, the total amount of funds available to other States shall be reduced by the total amount of allotments received by virtue of this subparagraph.

"(2)(A) If, with respect to any block grant State, the Secretary—

"(i) receives a request from the governing body of an Indian tribe or tribal organization with the block grant State that assistance under this section be made directly to the tribe or organization; and

"(ii) determines that the members of the tribe or tribal organization would be better served if grants to provide benefits under this section were made directly to such tribe or organization,

the Secretary shall reserve, from amounts which would otherwise be allotted to the block grant State under this section for the fiscal year, the amount determined under subparagraph (B).

"(B) The Secretary shall reserve for the purpose of subparagraph (A) from sums

that would otherwise be allotted to the block grant State an amount which bears the same ratio to the block grant State's allotment for the fiscal year involved as the population of all eligible Indians for whom a determination has been made under this paragraph bears to the population of all individuals eligible for assistance under this section in the block grant State.

"(C) The sums reserved by the Secretary under this paragraph shall be granted to Indian tribes and tribal organizations on the basis of the relative number of individuals contained in the Indian tribes and tribal organizations for whom a determination has been made under this paragraph.

"(D) To be eligible for a grant under this paragraph in any fiscal year, an Indian tribe or tribal organization must submit to the Secretary a plan for the fiscal year which meets such criteria as the Secretary may prescribe by regulation.

"(d)(1) To be eligible for a grant under this section in any fiscal year, a block grant State must submit an application to the Secretary for the fiscal year. Each application shall be submitted at such time and in such form as the Secretary shall require.

"(2) No funds may be allotted to a block grant State for any fiscal year after the fiscal year in which such block grant State received funds under this section unless the legislature of the block grant State conducts public hearings, not less often than biennially, on the proposed use and distribution of funds to be provided under this section.

"(3) As part of the application required by paragraph (1), the chief executive officer of each block grant State shall certify in writing that the block grant State will—

"(A) assess on a regular basis the food and nutrition needs of needy persons residing in the block grant State;

"(B) use the funds made available to it under this section to raise the level of nutrition among low-income households residing in that block grant State;

"(C) designate a single agency which shall be responsible for the administration, or supervision of the administration, of the program for which funds made available under this section are used;

"(D) provide that fiscal control and fund accounting procedures will be established to ensure the proper disbursal of and accounting for Federal funds paid to the block grant State under this section, including procedures for monitoring the program carried out by the block grant State with the assistance provided under this section;

"(E) provide for an audit (pursuant to paragraph (8)), not less often than biennially, of the block grant State's expenditures of amounts received under this section;

"(F) describe how the block grant State program will operate to carry out this paragraph, including a description of the assistance to be provided under the program, the recipients who will be eligible under the program, and the administering agency; and

"(G) comply with all the requirements of this paragraph and the public hearing requirement of paragraph (2).

"(4) The Secretary may not prescribe the manner in which the block grant States comply with paragraph (3). Each block grant State may prescribe, and the Secretary may not limit, standards of or requirements for eligibility for benefits under this section. Such standards or requirements may include a requirement for work or household contributions, or both, as a condition of eligibility for benefits under this section.

"(5) A grant made under this section may not be used by the block grant State, or by any person with whom the block grant State makes arrangements to carry out this section, for the purchase or improvement of land, or the purchase, construction, or permanent improvement of a building or other facility.

"(6)(A) The chief executive officer of each block grant State shall prepare and furnish to the Secretary a plan which describes how the block grant State will implement the assurances specified in paragraph (3). The chief executive officer of each block grant State may revise a plan prepared under this subparagraph and shall furnish a copy of the revised plan to the Secretary before its implementation.

"(B) A plan, including any revision of a plan, prepared under subparagraph (A) shall be made available for public inspection within the block grant State in a manner that will facilitate the review of, and comment on, the plan.

"(C) An Indian tribe or tribal organization which receives a grant under subsection (c)(2) shall not be a part of the plan submitted under this paragraph.

"(7) The Secretary may, upon a block grant State's request, provide technical assistance with respect to programs for the provision of assistance under this section, including technical assistance for the purpose of determining the feasibility of specific block grant plans udner consideration by the block grant State.

"(8) Each block grant State shall provide for an annual audit of the funds provided to such block grant State under this section and shall have such audit conducted by an entity independent of the agency administering activities or services under this section. The audit shall be conducted in accordance with generally accepted accounting principles. Within thirty days after the completion of the audit, the chief executive officer of the block grant State shall submit a copy of the audit to the legislature of the block grant State and the Secretary.

"(9) The Comptroller General shall from time to time evaluate expenditures by block grant States of grants made under this section in order to ensure that expenditures are consistent with this section and to determine the effectiveness of the block grant State in accomplishing the purposes of this section.

"(e)(1) No person may on the ground of race, color, national origin, or sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, a program or activity funded with funds made available under this section. Any prohibition against discrimination on the basis of age under the Age Discrimination Act of 1975 (42 U.S.C. 6101 et seq.) or with respect to an otherwise qualified handicapped individual as provided in section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) shall also apply to such a program or activity.

"(2) Whenever the Secretary determines that there has been a failure to comply with paragraph (1) or any applicable regulation pertaining to paragraph (1), the Secretary shall notify the chief executive officer of the block grant State and request the chief executive officer to secure compliance. If within a reasonable period of time, not to exceed sixty days, the chief executive officer fails or refuses to secure compliance, the secretary may—

"(A) refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted;

"(B) exercise the powers and functions provided under title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.), the Age Discrimination Act of 1975 (42 U.S.C. 6101 et seq.), or section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), as may be applicable; or

"(C) take such other action as may be provided by law.

"(3) When a matter is referred to the Attorney General pursuant to paragraph (2)(A), or whenever the Attorney General has reason to believe there has occurred a pattern or practice in violation of this subsection, the Attorney General may bring a civil action in an appropriate United States district court for such relief as may be appropriate, including injunctive relief.

"(f)(1) The Secretary shall pay each block grant State the total allotment of funds for a fiscal year to which the block grant State is entitled under subsection (c) immediately after the Secretary has determined the amount of such allotment.

"(2) Payments made to block grant State under this section for any fiscal year may be expended by the block grant State only in such fiscal year or in the succeeding fiscal year.

"(3) Any funds paid to a block grant State under subsection (c) which are not expended by the block grant State in the fiscal year for which they are paid or in the succeeding fiscal year may be expended by the block grant State on other social services provided pursuant to Federal law. The block grant State shall inform the Secretary of all such funds expended on other social services. If the block grant State elects not to expend all or part of the funds on other social services, the unexpended funds shall be returned to the Secretary and added to the amount made available for allotment to all the block grant States under subsection (b)(4) for the following fiscal year.

"(g)(1)(A)(i) A block grant State shall repay to the United States any amounts not expended other than in accordance with this section.

"(ii) The Secretary shall (in the absence of repayment by the block grant State under clause (i)) offset the amounts against any other amount to which the block grant State is or may become entitled under this section.

"(B)(i) The Secretary shall respond in an expeditious and speedy manner to complaints of a substantial or serious nature that a block grant State has failed to use funds in accordance with this section or an assurance made under subsection (d)(3).

"(ii) The Secretary, after adequate notice and an opportunity for a hearing conducted within the affected block grant State, shall withhold funds from a block grant State which fails to utilize its allotment substantially in accordance with this section or fails to meet an assurance made on behalf of the block grant State under subsection (d)(3).

"(C) Any funds repaid, offset, or withheld under this paragraph in any fiscal year shall be added to the amount made available for allotment to all the block grant States under subsection (b)(4) for the following fiscal year.

"(2) The Comptroller General may conduct investigations of the use of funds received under this section by a block grant State in order to ensure compliance with this section.

"(3)(A) In connection with an investigation conducted under this subsection, a block grant State shall make appropriate books, documents, papers, and records avail-

able to the Secretary and the Comptroller General, upon a reasonable request, for examination, copying, or mechanical reproduction on or off the premises of the entity concerned.

"(B) The Secretary and the Comptroller General may not request information not readily available to a block grant State or require that information be compiled, collected, or transmitted in a form not already available.

"(h) Whoever knowingly and willfully embezzles, misapplies, steals, or obtains by fraud, false statement, or forgery, any funds, assets, or property provided or financed under this section shall be fined not more than $10,000 or imprisoned for not more than five years, or both. If the value of the funds, assets, or property involved is not over $200, the penalty shall be a fine of not more than $1,000 or imprisonment for not more than one year, or both.

"(i)(1) The Secretary, in consultation with the Comptroller General, shall evaluate possible alternate formulas for the allotment of funds to block grant States under subsection (c). The formulas shall provide for the equitable distribution of the funds to block grant States and take into account the population, number of low-income households, financial resources, levels of unemployment, and such other factors within the block grant States which the Secretary deems appropriate.

"(2) The Secretary shall report to the Congress on the evaluation conducted pursuant to paragraph (1) no later than one year after the date of enactment of the Food Stamp Optional Block Grant Act of 1983.".

(b) Section 3 of the Food Stamp Act of 1977 (7 U.S.C. 2012) is amended by striking out "As" in the matter preceding subsection (a) and inserting in lieu thereof "Except as provided in section 21(a), as".

(c) The amendments made by this section shall be effective on October 1, 1983.

By Mr. DODD (for himself and Mr. WEICKER):

S.J. Res. 99. Joint resolution designating May 1983 as "Purple Heart Month," and honoring the three original recipients of the Purple Heart; to the Committee on the Judiciary.

PURPLE HEART MONTH

● Mr. DODD. Mr. President, I am today introducing a joint resolution which would designate May 1983 as Purple Heart Month. My colleague, Mr. WEICKER, joins me in this effort. In the House of Representatives, an identical measure has been introduced by Congresswoman BARBARA KENNELLY and cosponsored by all the other members of the Connecticut delegation.

There is a very good reason why those of us who represent the State of Connecticut have a special interest in this subject. In America's early military history, the Purple Heart was awarded for conspicuous bravery. George Washington established it on August 7, 1782, and it was soon thereafter awarded to three Connecticut men, all of them sergeants, fighting in the war for American independence.

Sgt. Elijah Churchill of Enfield, Sgt. William Brown of Stamford, and Sgt. Daniel Bissell of East Windsor thus became the first of more than 1 million Americans to earn this honor.

Today, of course, the Purple Heart is awarded to members of the Armed Forces or civilians serving with them who are wounded while defending the interests of our Nation. It thus symbolizes the personal sacrifice which Americans have always made when their country has needed them.

This is a truly significant part of our heritage and it is only fitting that we should reflect upon its meaning by observing Purple Heart Month and honoring the tradition which began some two centuries ago in the heroic actions of three soldiers from Connecticut.●

● Mr. WEICKER. Mr. President, today I join my colleague from Connecticut (Mr. DODD) in introducing a joint resolution that would set aside this month, May 1983, as Purple Heart Month. Last week, Congresswoman KENNELLY introduced an identical resolution on behalf of the entire Connecticut delegation.

Connecticut is proud to have been home to the three original recipients of the Purple Heart, which was at that time called the "Badge of Military Merit." Sgts. Elijah Churchill of Enfield, William Brown of Stamford, and Daniel Bissell of East Windsor all served during the American Revolutionary War. They were awarded this honor for their conspicuous bravery.

The first Purple Heart was presented to Sergeant Churchill on May 3, 1783. Two hundred years later, the medal still stands as a symbol of both stouthearted bravery and selfless commitment by individuals to their country. Today the Purple Heart is awarded to civilians as well as military who are wounded by the action of an opposing force. More than 1 million Americans have received it since World War I—and many of these died without seeing the medal their actions earned them.

I think important for the whole Nation to pause and remember these Purple Heart recipients, the living and the dead, and their valor on behalf of the Nation.●

ADDITIONAL COSPONSORS

S. 17

At the request of Mr. DOLE, the names of the Senator from Arkansas (Mr. BUMPERS), and the Senator from South Carolina (Mr. HOLLINGS) were added as cosponsors of S. 17, a bill to expand and improve the domestic commodity distribution program.

S. 29

At the request of Mr. GRASSLEY, the name of the Senator from North Carolina (Mr. EAST), was added as a cosponsor of S. 29, a bill to strengthen law enforcement in the areas of child exploitation and pornography, and for other purposes.

S. 45

At the request of Mr. SYMMS, the names of the Senator from North Carolina (Mr. HELMS), was added as a cosponsor of S. 45, a bill to amend title 18, chapter 44, United States Code, to provide clarification of limitations on controls of the interstate movement of firearms, and to prohibit the use of Federal funds to political subdivisions which implement certain gun control ordinances.

S. 108

At the request of Mr. GRASSLEY, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 108, a bill to amend the Internal Revenue Code of 1954 to encourage contributions of equipment to postsecondary vocational education programs and to allow a credit to employers for vocational education courses taught by an employee without compensation and for temporary employment of full-time vocational educational instructors.

S. 212

At the request of Mr. PRESSLER, the name of the Senator from Washington (Mr. JACKSON) was added as a cosponor of S. 212, a bill to authorize funds for the U.S. Travel and Tourism Administration.

S. 416

At the request of Mr. HATFIELD, the name of the Senator from Oregon (Mr. PACKWOOD) was added as a cosponsor of S. 416, a bill to amend the Wild and Scenic Rivers Act by designating a segment of the Illinois River in Oregon and the Owyhee River in Oregon as components of the National Wild and Scenic River System.

S. 427

At the request of Mr. BAUCUS, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 427, a bill to amend the Internal Revenue Code of 1954 to remove certain limitations on charitable contributions of certain literary, musical, or artistic compositions.

S. 462

At the request of Mr. GRASSLEY, the name of the Senator from Virginia (Mr. WARNER) was added as a cosponsor of S. 462, a bill to amend section 1951 of title 18 of the United States Code, and for other purposes.

S. 476

At the request of Mr. LEVIN, the names of the Senator from Ohio (Mr. GLENN), the Senator from Georgia (Mr. NUNN), the Senator from Wisconsin (Mr. KASTEN), and the Senator from New York (Mr. MOYNIHAN) were added as cosponsors of S. 476, a bill to amend title II of the Social Security Act to require a finding of medical improvement when disability benefits are terminated, to provide for a review and right to personal appearance prior to termination of disability benefits, to

provide for uniform standards in determining disability, to provide continued payment of disability benefits during the appeals process, and for other purposes.

S. 578

At the request of Mr. SIMPSON, the names of the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Pennsylvania (Mr. HEINZ), the Senator from California (Mr. CRANSTON), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Arizona (Mr. DECONCINI), the Senator from Maine (Mr. MITCHELL), the Senator from Maryland (Mr. SARBANES), the Senator from Pennsylvania (Mr. SPECTER), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of S. 578, a bill to amend title 38, United States Code, to provide for adult day health care services for veterans, to authorize the Veterans' Administration to administer a community residential care program, to establish a presumption of service-connection for former prisoners of war suffering from dysthymic disorder and to revise and clarify eligibility for reimbursement of expenses of travel for Veterans' Administration health care.

S. 591

At the request of Mr. INOUYE, the names of the Senator from Rhode Island (Mr. PELL), the Senator from North Carolina (Mr. HELMS), and the Senator from New Hampshire (Mr. HUMPHREY) were added as cosponsors of S. 591, a bill to amend the Internal Revenue Code of 1954 to provide a mechanism for taxpayers to designate $1 of any overpayment of income tax, and to contribute other amounts, for use by the U.S. Olympic Committee.

S. 815

At the request of Mr. HATFIELD, the names of the Senator from Oklahoma (Mr. BOREN), the Senator from Delaware (Mr. ROTH), the Senator from Iowa (Mr. JEPSEN), and the Senator from Wisconsin (Mr. KASTEN) were added as cosponsors of S. 815, a bill to provide that it shall be unlawful to discriminate against any meetings of students in public secondary schools and to provide the district courts with jurisdiction.

S. 870

At the request of Mr. ARMSTRONG, the name of the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of S. 870, a bill entitled "The Federal Contractor Employees Flexitime Bill."

S. 880

At the request of Mr. PRESSLER, the name of the Senator from Idaho (Mr. MCCLURE) was added as a cosponsor of S. 880, a bill to amend the Communications Act of 1934 to provide equity to daytime radio broadcasters.

S. 980

At the request of Mr. WALLOP, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 980, a bill to amend the Federal Mine Safety and Health Amendments Act of 1977 to provide that the provisions of such act shall not apply to the surface mining of stone, clay, and sand work.

S. 986

At the request of Mr. PRESSLER, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 986, a bill to repeal employer reporting requirements with respect to tips.

S. 995

At the request of Mr. EXON, the names of the Senator from Nebraska (Mr. ZORINSKY), and the Senator from Virginia (Mr. WARNER) were added as cosponsors of S. 995, a bill to amend title 38, United States Code, to modify the rule for the commencement of the period of payment of certain adjustments in compensation in the case of hospitalized veterans.

S. 1000

At the request of Mr. TRIBLE, the names of the Senator from New York (Mr. D'AMATO), and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of S. 1000, a bill to promote increased ocean transportation of bulk commodities in the foreign commerce of the United States in U.S.-flag ships, to strengthen the defense industrial base, and for other purposes.

S. 1033

At the request of Mr. SIMPSON, the names of the Senator from Pennsylvania (Mr. SPECTER), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from California (Mr. CRANSTON), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Arizona (Mr. DECONCINI), and the Senator from Vermont (Mr. STAFFORD) were added as cosponsors of S. 1033, a bill to amend title 38, United States Code, to establish an emergency job training program for wartime veterans.

S. 1080

At the request of Mr. GRASSLEY, the names of the Senator from South Carolina (Mr. THURMOND), the Senator from Nevada (Mr. LAXALT), the Senator from Texas (Mr. TOWER), and the Senator from Idaho (Mr. MCCLURE) were added as cosponsors of S. 1080, a bill to amend the Administrative Procedure Act to require Federal agencies to analyze the effects of rules to improve their effectiveness and to decrease their compliance costs, to provide for a periodic review of regulations, and for other purposes.

S. 1090

At the request of Mr. WALLOP, the names of the Senator from Illinois (Mr. DIXON), and the Senator from California (Mr. WILSON) were added as cosponsors of S. 1090, a bill to establish a National Outdoor Recreation Resources Review Commission to study and recommend appropriate policies and activities for Government agencies at the Federal, State, and local levels and for the private sector, to assure the continued availability of quality outdoor recreation experiences in America to the year 2000, and for other purposes.

S. 1094

At the request of Mr. DODD, the names of the Senator from Montana (Mr. MELCHER), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 1094, a bill to amend the Vocational Education Act of 1963 to make grants to the States for high-technology vocational education programs.

S. 1145

At the request of Mr. DENTON, the names of the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Minnesota (Mr. DURENBERGER), and the Senator from North Carolina (Mr. HELMS) were added as cosponsors of S. 1145, a bill to recognize the organization known as the Catholic War Veterans of the United States of America, Incorporated.

SENATE JOINT RESOLUTION 19

At the request of Mr. INOUYE, the name of the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of Senate Joint Resolution 19, a joint resolution to authorize and request the President to designate the period August 26, 1983, through August 30, 1983, as "National Psychology Days."

SENATE JOINT RESOLUTION 74

At the request of Mr. GARN, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of Senate Joint Resolution 74, a joint resolution to express the sense of the Congress that the United States should promote the goal of strategic stability and reduce the risk of nuclear war through a balanced program of force modernization together with negotiations to achieve substantial, verifiable and militarily significant reductions to equal levels in the nuclear arsenals of both superpowers.

SENATE JOINT RESOLUTION 94

At the request of Mr. MATTINGLY, the name of the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of Senate Joint Resolution 94, a joint resolution to authorize and request the President to designate May 8, 1983 to June 19, 1983, as "Family Reunion Month."

SENATE JOINT RESOLUTION 97

At the request of Mr. BOSCHWITZ, the names of the Senator from Kansas (Mr. DOLE), the Senator from South Dakota (Mr. ABDNOR), the Senator from Alaska (Mr. MURKOWSKI), the

Senator from New Mexico (Mr. DOMENICI), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of Senate Joint Resolution 97, a joint resolution to authorize the erection of a memorial on public grounds in the District of Columbia, or its environs, in honor and commemoration of members of the Armed Forces of the United States and the allied forces who served in the Korean war.

SENATE CONCURRENT RESOLUTION 30

At the request of Mr. BAUCUS, the name of the Senator from Maryland (Mr. SARBANES) was added s a cosponsor of Senate Concurrent Resolution 30, a concurrent resolution to reject the medicare cuts contained in the President's fiscal year 1984 budget.

SENATE RESOLUTION 119

At the request of Mr. D'AMATO, the name of the Senator from Indiana (Mr. QUAYLE) was added as a cosponsor of Senate Resolution 119, a resolution expressing the sense of the Senate that the United States should proceed with the sale and delivery of F-16 aircraft to Israel.

SENATE CONCURRENT RESOLUTION 34—SUPPORTING A CALL FOR JOBS WITH PEACE

Mr. CRANSTON submitted the following concurrent resolution, which was referred to the Committee on Appropriations:

S. CON. RES. 34

Resolved by the Senate (the House of Representatives concurring),

Whereas in November 1982 over fifty cities and towns in the United States voted for cuts in military spending and greater funding of human services and civilian jobs programs, and the average "yes" vote was an extraordinarily high 66 percent, including Milwaukee, Wisconsin, registering 78 percent "yes"; Lansing, Michigan, 72 percent "yes"; and San Jose, California, a center of military industries, 62.3 percent "yes";

Whereas all Americans, including those subsisting on a fixed income or without an adequate source of income, should have the right to a decent standard of living with adequate nutrition, housing, health care, education, and other essential services;

Whereas the Nation's cities, counties, and communities are in desperate need of Federal action that generates jobs and services for their residents, and spending on weaponry is essentially nonproductive and generates fewer jobs per dollar than other Federal spending;

Whereas President Reagan has proposed military spending from fiscal year 1983 through fiscal year 1988 that would total some $2 trillion;

Whereas these proposed increases in military spending would require still deeper cuts in domestic programs in future years, fuel inflation, and further undermine our economy; and

Whereas the Reagan Administration is relentlessly increasing production of nuclear and conventional weapons far beyond the security needs of our Nation: Now, therefore, be it

Resolved, That it is the sense of the Congress that greater Federal funding should be made available for jobs and programs designed to meet the human needs of all segments of our population in an equitable fashion in the areas of education, job training and retraining, housing, health care, transportation, public health and safety, and other human services, including vocational rehabilitation, day care, nutrition and feeding programs, and child and spouse abuse prevention, by significantly reducing the amount of our tax dollars spent on weapons; and that these spending priorities will promote a healthier economy, greater national security, and more jobs with peace; and be it further

Resolved, That the Congress, in support of this call for jobs with peace, endorses the National Jobs With Peace Week of Sunday, April 15, to Saturday, April 21, 1984, and will publicize this week and explore other ways to assist in this effort, and urges the President to issue a proclamation calling upon the people of the United States, Federal, State, and local government officials, and other interested groups and organizations to set aside this week for appropriate observances, ceremonies, and other forms of recognition.

Mr. CRANSTON. Mr. President, I am today submitting Senate Concurrent Resolution 34, a concurrent resolution expressing the sense of the Congress in support of a call for jobs with peace. I believe that the text of the concurrent resolution speaks quite clearly for itself.

SENATE RESOLUTION 140—RELATING THE FIFTIETH ANNIVERSARY OF THE TENNESSEE VALLEY AUTHORITY

Mr. BAKER (for himself, Mr. RANDOLPH, Mr. HELMS, Mr. HOLLINGS, Mr. STENNIS, Mr. FORD, Mr. SASSER, Mr. HEFLIN, Mr. BURDICK, Mr. STAFFORD, Mr. HATFIELD, and Mr. HUDDLESTON) submitted the following resolution; which was referred to the Committee on Environment and Public Works:

S. RES. 140

Whereas May 18, 1983, marks the 50th anniversary of the signing, by President Franklin Delano Roosevelt, of the Act of Congress creating the Tennessee Valley Authority;

Whereas TVA soundly has demonstrated the wisdom of Congress and the President in creating a unique corporation "clothed with the power of government but possessed of the flexibility and initiative of a private enterprise;"

Whereas TVA's varied efforts are primarily carried out in a seven-state region, they also include many features that contribute to the national interest;

Whereas TVA for a half-century has helped achieve the integrated conservation and development of the Tennessee Valley's natural resources, successfully demonstrating this concept for the Nation and the world;

Whereas TVA has perfected flood control and hydropower development on the once raging Tennessee River and its tributaries, whose watershed receives an average annual rainfall of 52 inches, annually producing an average of 16 billion kilowatt hours of pollution-free, low cost electric power and annually preventing an average of $140 million in estimated flood damages on the Tennessee, Ohio, and Mississippi Rivers;

Whereas TVA has developed the transportation potential of the Tennessee River through 10 dams with navigation locks, providing direct employment of more than 45,000 persons in waterfront industries, annual transport of over 30 million tons of barge traffic and $100 million in annual transportation savings;

Whereas TVA economically and dependably, through 110 municipal electric utilities and 50 rural electric cooperatives, provides more than 100 billion kilowatt hours of electric power each year for 7 million people in 7 States, at rates 27 percent below the national average;

Whereas the TVA Power System is self-financed, at no cost to the Nation's taxpayers, and TVA has created an $18 billion Power asset owned by the taxpayers;

Whereas TVA has made repayments to the United States Treasury of $1.9 billion, $.5 billion more than the original Federal power-system investment;

Whereas TVA has led the Nation in energy conservation, surveying more than 700,000 homes and providing more than 310,000 interest-free loans for home weatherization;

Whereas TVA, one of the largest coal and nuclear power suppliers in the country, is strongly committed to clean air and nuclear safety and to research and demonstration of new methods to attain cleaner air and nuclear safety;

Whereas TVA equally is committed to demonstrating effective use of solar, biomass and other renewable energy sources;

Whereas TVA diligently has improved fertilizer technology for the Nation and the world, originating and transferring to use three-fourths of the Nation's present fertilizer technology through 661 licensed TVA innovations utilized by 389 fertilizer companies in 39 States:

Whereas TVA has improved farming productivity throughout the region, especially for the small farmer, through cooperative demonstrations;

Whereas TVA responsibly has conserved and developed the region's natural resources, reforesting 1.7 million acres of land, restoring fish and wildlife, improving the quality of air and water, and providing recreation for millions of people;

Whereas TVA has established a partnership in recreation on TVA lakes and lands, producing $70 million in annual recreation visit benefits and $630 million in government and business recreation development;

Whereas TVA's partnership with people over five decades has helped increase Valley per capita income from $168 in 1933 to $7,378 in 1980;

Whereas under the specific direction of the TVA Act to employ its personnel without regard to the civil service laws and to establish a system of organization to fix responsibility and promote efficiency, many TVA employees have become leaders in their particular fields and have contributed not only to TVA's efforts, but consistent with TVA's contribution to the national interest, have benefitted both business and governmental interests;

Whereas TVA has strenghened its partnership with its constituent States of Alabama, Georgia, Kentucky, North Carolina, Mississippi, Tennessee and Virginia, and hundreds of local communities, to enhance the region's economic future by increasing

the self-reliance of localities and the job skills of Valley residents; and

Whereas independent auditors confirm TVA's management is working to assure efficiency, accountability and openness in all activities;

Whereas TVA is indeed appropriately described as "Shaping Tomorrow Today;" and

Whereas TVA on May 18th will enter its 51st year of successful stewardship for the region, example for the United States and inspiration for developing nations throughout the world: Now therefore, be it

Resolved, That the United States Senate congratulates the directors, managers and employees—past and present—of the Tennessee Valley Authority on the occasion of its 50th Anniversary.

SEC. 2. The Secretary of the Senate is directed to transmit a copy of this resolution to the Chairman of the Board of Directors of the Tennessee Valley Authority.

Mr. BAKER. Mr. President on May 18 TVA will celebrate the 50th anniversary of signing of the act of Congress which created the Tennessee Valley Authority. To commemorate that occasion, I am submitting a resolution today which gives a thumbnail sketch of TVA's many accomplishments which are a resource for the people of this country.

I have always maintained—and rightly so—that TVA is a national resource—a national demonstration, an experiment which has worked. The benefits from TVA's many and varied activities are shared across this country and are expanding throughout the world. I, for one, want to congratulate the many people who have worked at TVA throughout the years, the present and former Board members, and the people in the Tennessee Valley who have been served by the TVA for the past 50 years.

We in Congress can be proud that some of the experiments which we work so hard to establish actually work—and work well. TVA is one of the success stories. Aptly described as "Shaping Tomorrow Today"—that is TVA.

Mr. RANDOLPH. Mr. President, I am pleased to join with my friend and colleague the able majority leader (Mr. BAKER) in submitting this resolution acknowledging the 50th anniversary of the Tennessee Valley Authority.

I was privileged a half-century ago to be involved in the development of the original TVA legislation. It was one of a wide variety of measures enacted during the troubled days of the Great Depression as a nation struggled to pull itself together and restructure its devastated economy.

One has but to visit the seven-State TVA region to know that success has flowed from what some said was a radical experiment 50 years ago. Although TVA is often seen only as a producer of electricity, its character and its operations are much more varied. TVA is indeed the Nation's largest electric utility but it is also heavily involved in such activities as economic development, recreation, conservation, and the production of fertilizer. It is, in effect, an active regional planning authority in its service area.

Today TVA is a vital force in the life and economy of the region. Its impact is widely felt and it is a responsible and often innovative neighbor. It has grown and matured in the last half century. It has charted new courses in helping to develop the region. It has encouraged scientific innovation. It has proven the validity of the original TVA concept enunciated in 1933.

Mr. President, together with the people of the valley, I look back with pride to 50 years of accomplishments by TVA. I also look forward to the future for I know that this now mature organization will continue to move forward to create a better life and a stronger economy in the Tennessee Valley.

SENATE RESOLUTION 142—LIMITING NUCLEAR WARHEAD ICBM'S

Mr. HUDDLESTON submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 142

Resolved, That the President should call on the leadership of the USSR to enter immediately into a bilateral moratorium on the testing and deployment of "new types" of ICBMs or new variants of "existing types" of ICBMs armed with more than one warhead, as a supplement to existing formal and informal limitations on strategic offensive arms.

No funds shall be expended under this or any other act for the testing or production of the MX for six months or until such time as the President certifies to the Congress that the USSR has tested or is deploying a "new type" of ICBM or a new variant of an "existing type" ICBM with more than one warhead after the date the bilateral moratorium comes into force.

The President is urged to propose to the USSR the following arms limitations: a. the two parties be allowed to test, deploy and produce one "new type of ICBM of a very small size armed with a single warhead; b. all future variants of "existing types" of ICBM be tested with single warheads; and c. a schedule be established for the phased reduction to an agreed ceiling of currently deployed MIRVed ICBMs.

The terms "new" and "existing" types of ICBMs are used herein as defined in Article IV. 9 of the SALT II Treaty. An "existing type" is an ICBM flight-tested as of May 1, 1979; a "new type" is a system tested after that date.

● Mr. HUDDLESTON. Mr. President, earlier today in the Senate Appropriations Committee, I voted "present" on Senate Concurrent Resolution 26, the MX resolution. I did so as a protest to this administration's arms control policy and its handling of the MX itself. If we are to proceed with the MX, then I believe we must have true arms control. I am encouraged by the letter which Senator NUNN received today from the White House, and I intend to study it closely. Personally, however, I hope that the Congress can look at some stronger proposals, either through a resolution or in conjunction with the defense authorization bill.

Consequently, I am submitting a resolution which proposes that the United States refrain from testing and deploying the MX if the Soviet Union will refrain from further testing of the SSX-24 or any other new MIRV'd ICBM. If the Soviet Union fails to refrain or if there is no response within 6 months, then the President could move ahead. The resolution would also urge the President to propose to the Soviet Union that we move toward single warhead missiles and set a phased reduction of currently deployed MIRVed ICBM's. If the Soviets fail to respond to a plan for reductions of existing MIRV's, the Congress could also authorize a go ahead on MX testing and production.●

AMENDMENTS SUBMITTED

IMMIGRATION AND NATIONALITY ACT REVISION

HATFIELD AMENDMENT NO. 1261

(Ordered to lie on the table.)

Mr. HATFIELD submitted an amendment intended to be proposed by him to the bill (S. 529) to revise and reform the Immigration and Nationality Act, and for other purposes; as follows:

On page 108, line 11, strike out "Within" and insert in lieu thereof "Except as provided in paragraph (3), within".

On page 110, between lines 8 and 9, insert the following:

"(3)(A) Before the President implements any change in or addition to the requirements of subsection (b) which would require an individual to present a card or other document (designed specifically for use for this purpose) at the time of hiring, recruitment, or referral, he shall prepare and transmit to the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate a report setting forth his proposal to implement such a change or addition. No such change or addition may be implemented if, within 30 calender days after receiving such report, the Congress adopts a concurrent resolution stating in substance that it objects to the implementation of such change or addition.

"(4)(A) Any such concurrent resolution shall be considered in the Senate in accordance with paragraph (5).

"(B) For the purpose of expediting the consideration and adoption of concurrent resolutions under paragraph (3), a motion to proceed to the consideration of any such concurrent resolution after it has been reported by the appropriate committee shall be treated as highly privileged in the House of Representatives.

"(5)(A) For purposes of paragraph (3), the continuity of a session of Congress is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the period indicated.

"(B) Subparagraphs (C) and (D) of this subsection are enacted—

"(i) as an exercise of the rulemaking power of the Senate and as such they are deemed a part of the rules of the Senate, but applicable only with respect to the procedure to be followed in the Senate in the case of concurrent resolutions referred to in paragraph (3), and supersede other rules of the Senate only to the extent that such paragraphs are inconsistent therewith; and

"(ii) with full recognition of the constitutional right of the Senate to change such rules at any time, in the same manner and to the case of any other rule of the Senate.

"(C)(i) If the committee of the Senate to which has been referred a resolution relating to a certification has not reported such resolution at the end of ten calendar days after its introduction, not counting any day which is excluded under subparagraph (A), it is in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution introduced with respect to the same certification which has been referred to the committee, except that no motion to discharge shall be in order after the committee has reported a resolution with respect to the same certification.

"(ii) A motion to discharge under clause (i) may be made only by a Senator favoring the resolution, is privileged, and debate thereon shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the resolution, the time to be divided equally between, and controlled by, the majority leader and the minority leader or their designees. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(D)(i) A motion in the Senate to proceed to the consideration of a resolution shall be privileged. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(ii) Debate in the Senate on a resolution, and all debatable motions and appeals in connection therewith, shall be limited to not more than 10 hours, to be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

"(iii) Debate in the Senate on any debatable motion or appeal in connection with a resolution shall be limited to not more than 1 hour, to be equally divided between, and controlled by, the mover and the manager of the resolution, except that in the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from time under their control on the passage of a resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal.

"(iv) A motion in the Senate to further limit debate on a resolution, debatable motion, or appeal is not debatable. No amendment to, or motion to recommit, a resolution is in order in the Senate.

Mr. HATFIELD. Mr. President, the United States cannot continue to absorb unregulated flows of immigrants to this country. Our economy is distressed, our social services budgets are severely strained, and our capacities for compassion are fatigued. I would be negligent if I failed to acknowledge the outstanding leadership Senator SIMPSON has exhibited by bringing to the Senate floor at this early date a major immigration reform proposal, S. 529. This bill is the end product of exhaustive research and negotiation efforts by Senators SIMPSON, KENNEDY, and their colleagues on the Judiciary Committee, and I congratulate all of these Members for presenting to the Senate a very fair and balanced approach to the pressing immigration problems which continue to confront our communities.

However, there is a provision innocently tucked away in the 120-plus pages of S. 529 that poses a serious threat to the civil liberty and personal privacy of all of us. Section 274a(c)(1) permits the President to implement changes in or additions to the identification procedures mandated in the employer sanctions section to establish a secure system to determine employment eligibility.

Indeed, the bill does not require the issuance of a national ID card. It merely leaves the door wide open for the President to unilaterally implement a nationwide ID card without any congressional oversight or input or consultation.

Mr. President, I do not believe we can wash our hands of this matter quite so easily. The amendment that I am offering to the immigration bill will require the consent of both Houses of Congress to any changes in the law pertaining to a national identifier. My amendment does not forbid such a card from being instituted—it merely requires Congress to vote up or down on such a novel break in the tradition of our democracy.

There is no consensus among our citizens, let alone among the Members of Congress, that a national ID card is desirable. There are many of us who deeply resent the extent to which the social security card has become a national identifier. The social security numbering system, instituted to provide a speedy account system for the Social Security Board, is now used for draft registration purposes, college ID's, Senate ID's, driver's licenses, and as a cross-reference for every business and governmental personnel or credit system imaginable. And much of this can be traced to November of 1943, when President Roosevelt issued an Executive order which kicked the door wide open to allow the expansion of the use of the social security number in society.

Of course, the argument follows: Since we have an identification card of such broad use, why not standardize and broaden it a little more? Why not institute a simple national ID card? Well, Mr. President, the answer is very clear to me. To the extent the social security card has become a national ID card, that broad application must be curtailed—not expanded. We must not be blind to the Orwellian evils which operate below the surface of seemingly innocuous proposals such as those which suggest secure systems of identification. The principles of expedience, convenience, and uniformity which have allowed social security numbers to become a cornerstone in this Nation's identification process must give way to more enlightened views of personal privacy and human integrity.

What I find troublesome is the blind obedience to the notion that the more centralized the identification process, the more uniform the numbering system, the more mandatory the requirement, the better. More is not always better. In the case of the liberties and individual freedoms that distinguish Americans from other members of the human family, the more identification, the more uniformity, and the more centralization of information, the greater the relinquishment of these very liberties and freedoms we hold so dear. I suggest that the same forces which have pushed the size of Government to its present proportions are operating behind beguiling initiatives like national identification proposals.

The arguments in favor of formalizing what has effectively occurred with social security numbers are seductively simple. These arguments maintain that nothing will change and that there are no other alternatives. It is asked, "How else can you tell who is a lawful resident and who is not unless you have a noncounterfeitable, universal card?" Well, the issue cannot be framed in such simplistic terms. Each time a citizen is asked to prove that he is lawfully present, each time that a human being is equated with a number, and each time society pressures good citizens to comply with identification requirements mandated or even suggested by government fiat, then America becomes less free for all of us.

This computer age has spawned a tremendous reliance upon numbers and upon identifying persons and institutions through numerical data. We give our social security number reflexively—to anyone who asks—without even a passing thought about what such practices are doing to our individual or collective freedom. We all would be well-advised to consider how far we have come in such a short time in universalizing citizen identification. There are alternatives, certainly not as convenient or expeditious, as

present identification procedures, and these alternatives must be explored so that a line can be drawn between proper and improper identification practices.

The immigration pressures that have devastated Texas, Florida, California and other regions of this country make a national ID card a very attractive, expedient solution. However, we must thoughtfully approach such proposals, regardless of their short-term appeal.

Mr. President, this is not the first time the issue of a national ID card has been discussed. In 1976, the Department of Justice's report of the Federal Advisory Committee on False Identification thoroughly examined the possibility of adopting a national identification document. After extensive deliberation and study, this committee strongly advised against such a document. The National Commission on Immigration and Refugee Policy voted 9 to 7 in favor of an identification system based on existing documents. And I assure you, the citizens in my State have made themselves very clear about whether they want the Government to implement a costly new identification system.

Mr. President, one can oppose the implementation of a national ID card and still be in support of a strong employer's sanction provision in the bill. I have been supportive of the efforts of Senator SIMPSON and the many who have consumed years of service in the Senate in search of a rational immigration policy. Further, I take issue with anyone who suggests that my amendment would cripple the enforcement of strong immigration controls against employing illegal aliens.

The amendment that I am offering only requires Congress to examine whatever changes the President would like to implement with respect to nationwide documents of identification, and to vote it up or down. I believe Congress must not abdicate its responsibility here. There are issues of concern to Americans that run far deeper than control of our borders. All of these interests must be examined and balanced, and it would be irresponsible for us as a deliberative body to hand the President a blanket consent on the issue of whether America wants a national ID card.

Proponents of this section of the bill cannot have it both ways. They cannot claim that the bill most certainly does not require or even suggest a national ID card, and then simultaneously argue that if the President decides to implement such a card, Congress must not delay him. I am also unimpressed by the arguments which cite the laundry list of restrictions which would attend any employment eligibility document that may arise.

Mr. President, once in place, a national ID card would have a momentum all of its own. Restrictions would give way to expedience and simplicity, as it has in the case of a social security card, and the threat that all of this centralized information could be abused by private interests, or governmental interests, would acquire new, sobering dimensions.

In closing, Mr. President, I want to stress that this amendment is a precautionary measure and nothing more. It does not affect current enforcement of employer sanctions. It does not prevent the President from making changes in Subsection (B), provided those changes do not entail the implementation of a national ID card. What is more, this amendment does not prevent the President from actually implementing a national ID card system.

All the amendment does is stipulate a procedure to be followed allowing an expedited review by Congress of any proposal to institute a national ID card. This procedure is similar to the many that are in place in certain arms sales arrangements, and it has been carefully drafted so as to steer clear of constitutional challenges. In effect, all the amendment does is require Congress to sign off on any plan to implement a national ID card. I do not believe that is an unreasonable requirement, and I am hopeful my colleagues will support this amendment.

FIRST CONCURRENT RESOLUTION ON THE BUDGET

WEICKER (AND OTHERS) AMENDMENT NO. 1262

Mr. WEICKER (for himself, Mr. CHAFEE, Mr. HATFIELD, Mr. MATHIAS, and Mr. STAFFORD) proposed an amendment (subsequently modified) to the concurrent resolution (S. Con. Res. 27) revising and replacing the congressional budget for the U.S. Government for the fiscal year 1983, and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986; as follows:

Strike out all after the resolving clause and insert in lieu thereof the following:

"That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1983 is hereby revised, the first concurrent resolution on the budget for fiscal year 1984 is hereby established, and the appropriate budgetary levels for fiscal years 1985 and 1986 are hereby set forth:

"(a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985:

"(1) The recommended levels of Federal revenues are as follows:

"Fiscal year 1983: $603,325,000,000.
"Fiscal year 1984: $664,300,000,000.
"Fiscal year 1985: $736,175,000,000.
"Fiscal year 1986: $829,900,000,000.

and the amounts by which the aggregate levels of Federal revenues should be changed are as follows:

"Fiscal year 1983: +$125,000,000.
"Fiscal year 1984: +$8,900,000,000.
"Fiscal year 1985: +$12,675,000,000.
"Fiscal year 1986: +$51,000,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

"Fiscal year 1983: $35,900,000,000.
"Fiscal year 1984: $39,700,000,000.
"Fiscal year 1985: $44,200,000,000.
"Fiscal year 1986: $50,900,000,000.

and the amounts for Federal Insurance Contributions Act revenues and other revenues pursuant to Public Law 98-21 for old age, survivors, and disability insurance within the recommended levels of Federal revenues are as follows:

"Fiscal year 1983: $148,500,000,000.
"Fiscal year 1984: $166,500,000,000.
"Fiscal year 1985: $187,700,000,000.
"Fiscal year 1986: $204,400,000,000.

"(2) The appropriate levels of total new budget authority are as follows:

"Fiscal year 1983: $875,925,000,000.
"Fiscal year 1984: $911,899,000,000.
"Fiscal year 1985: $986,074,000,000.
"Fiscal year 1986: $1,052,709,000,000.

"(3) The appropriate levels of total budget outlays are as follows:

"Fiscal year 1983: $807,325,000,000.
"Fiscal year 1984: $848,699,000,000.
"Fiscal year 1985: $914,574,000,000.
"Fiscal year 1986: $972,369,000,000.

"(4) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

"Fiscal year 1983: $204,000,000,000.
"Fiscal year 1984: $184,399,000,000.
"Fiscal year 1985: $178,399,000,000.
"Fiscal year 1986: $142,469,000,000.

"(5) The appropriate levels of the public debt are as follows:

"Fiscal year 1983: $1,383,900,000,000.
"Fiscal year 1984: $1,612,199,000,000.
"Fiscal year 1985: $1,841,298,000,000.
"Fiscal year 1986: $2,041,367,000,000.

and the amounts by which the temporary statutory limits on such debt should be accordingly increased are as follows:

"Fiscal year 1983: $93,700,000,000.
"Fiscal year 1984: $228,299,000,000.
"Fiscal year 1985: $229,099,000,000.
"Fiscal year 1986: $200,069,000,000.

"(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:

"Fiscal year 1983:
"(A) New direct loan obligations, $55,400,000,000.
"(B) New loan guarantee commitments, $94,500,000,000.
"Fiscal year 1984:
"(A) New direct loan obligations, $48,200,000,000.
"(B) New loan guarantee commitments, $94,500,000,000.
"Fiscal year 1985:
"(A) New direct loan obligations, $48,100,000,000.
"(B) New loan guarantee commitments, $97,400,000,000.
"Fiscal year 1986:
"(A) New direct loan obligations, $48,700,000,000.
"(B) New loan guarantee commitments, $101,000,000,000.

"(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appro-

priate levels of new direct loan obligations and new loan guarantee commitments for fiscal years 1983 through 1986 for each major functional category are:

"(1) National Defense (050):

"Fiscal year 1983:

"(A) New budget authority, $244,100,000,000.

"(B) Outlays, $214,300,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1984:

"(A) New budget authority, $270,650,000,000.

"(B) Outlays, $242,600,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1985:

"(A) New budget authority, $300,950,000,000.

"(B) Outlays, $272,550,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1986:

"(A) New budget authority, $333,060,000,000.

"(B) Outlays, $302,420,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"(2) International Affairs (150):

"Fiscal year 1983:

"(A) New budget authority, $24,900,000,000.

"(B) Outlays, $11,500,000,000.

"(C) New direct loan obligations, $11,700,000,000.

"(D) New loan guarantee commitments, $9,200,000,000.

"Fiscal year 1984:

"(A) New budget authority, $18,200,000,000.

"(B) Outlays, $12,700,000,000.

"(C) New direct loan obligations, $11,200,000,000.

"(D) New loan guarantee commitments, $10,300,000,000.

"Fiscal year 1985:

"(A) New budget authority, $16,500,000,000.

"(B) Outlays, $12,800,000,000.

"(C) New direct loan obligations, $11,500,000,000.

"(D) New loan guarantee commitments, $10,300,000,000.

"Fiscal year 1986:

"(A) New budget authority, $15,900,000,000.

"(B) Outlays, $12,800,000,000.

"(C) New direct loan obligations, $11,600,000,000.

"(D) New loan guarantee commitments, $10,300,000,000.

"(3) General Science, Space, and Technology (250):

"Fiscal year 1983:

"(A) New budget authority, $7,900,000,000.

"(B) Outlays, $7,700,000,000.

"(C) New direct loan obligations, $200,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1984:

"(A) New budget authority, $8,500,000,000.

"(B) Outlays, $8,200,000,000.

"(C) New direct loan obligations, $37,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1985:

"(A) New budget authority, $8,500,000,000.

"(B) Outlays, $8,500,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1986:

"(A) New budget authority, $8,400,000,000.

"(B) Outlays, $8,400,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"(4) Energy (270):

"Fiscal year 1983:

"(A) New budget authority, $4,000,000,000.

"(B) Outlays, $4,600,000,000.

"(C) New direct loan obligations, $13,100,000,000.

"(D) New loan guarantee commitments, $200,000,000.

"Fiscal year 1984:

"(A) New budget authority, $3,900,000,000.

"(B) Outlays, $4,100,000,000.

"(C) New direct loan obligations, $13,900,000,000.

"(D) New loan guarantee commitments, $200,000,000.

"Fiscal year 1985:

"(A) New budget authority, $3,600,000,000.

"(B) Outlays, $2,900,000,000.

"(C) New direct loan obligations, $14,300,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1986:

"(A) New budget authority, $3,200,000,000.

"(B) Outlays, $2,700,000,000.

"(C) New direct loan obligations, $14,400,000,000.

"(D) New loan guarantee commitments, $0.

"(5) Natural Resources and Environment (300):

"Fiscal year 1983:

"(A) New budget authority, $12,500,000,000.

"(B) Outlays, $12,800,000,000.

"(C) New direct loan obligations, $100,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1984:

"(A) New budget authority, $12,000,000,000.

"(B) Outlays, $12,500,000,000.

"(C) New direct loan obligations, $27,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1985:

"(A) New budget authority, $12,200,000,000.

"(B) Outlays, $12,600,000,000.

"(C) New direct loan obligations, $27,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1986:

"(A) New budget authority, $12,500,000,000.

"(B) Outlays, $12,200,000,000.

"(C) New direct loan obligations, $27,000,000.

"(D) New loan guarantee commitments, $0.

"(6) Agriculture (350):

"Fiscal year 1983:

"(A) New budget authority, $24,200,000,000.

"(B) Outlays, $24,000,000,000.

"(C) New direct loan obligations, $18,600,000,000.

"(D) New loan guarantee commitments, $5,500,000,000.

"Fiscal year 1984:

"(A) New budget authority, $11,600,000,000.

"(B) Outlays, $11,400,000,000.

"(C) New direct loan obligations, $12,100,000,000.

"(D) New loan guarantee commitments, $3,800,000,000.

"Fiscal year 1985:

"(A) New budget authority, $14,000,000,000.

"(B) Outlays, $12,300,000,000.

"(C) New direct loan obligations, $11,700,000,000.

"(D) New loan guarantee commitments, $3,800,000,000.

"Fiscal year 1986:

"(A) New budget authority, $13,200,000,000.

"(B) Outlays, $13,100,000,000.

"RECONCILIATION

"SEC. 2. (a) Not later than June 6, 1983, the Senate committees named in subsections (b) through (f) of this section shall submit their recommendations to the Senate Committee on the Budget and not later than June 6, 1983, the House committees named in subsections (g) through (l) of this section shall submit their recommendations to the House Committee on the Budget. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

"SENATE COMMITTEES

"(b) The Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within the jurisdiction of that committee, (A) to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays, or (B) which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority and outlays, or (c) any combination thereof, as follows: $1,243,000,000 in budget authority and $1,243,000,000 in outlays in fiscal year 1984; $1,332,000,000 in budget authority and $1,332,000,000 in outlays in fiscal year 1985; and $1,327,000,000 in budget authority and $1,327,000,000 in outlays in fiscal year 1986.

"(c)(1) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $856,000,000 in fiscal year 1984; to reduce outlays by $2,024,000,000 in fiscal year 1985; and to reduce outlays by $2,484,000,000 in fiscal year 1986.

"(2) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $8,900,000,000 in fiscal year 1984; $12,675,000,000 in fiscal year 1985; and $51,000,000,000 in fiscal year 1986.

"(d) The Senate Committee on Governmental Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $258,000,000 and outlays by $534,000,000 in fiscal year 1984; to reduce budget authority by $368,000,000 and outlays by $834,000,000 in fiscal year 1985; and to reduce budget authority by $636,000,000 and outlays by $1,486,000,000 in fiscal year 1986.

"(e) The Senate Committee on Small Business shall report changes in laws within the jurisdiction of that committee to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

"(f) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $202,000,000 and outlays by $201,000,000 in fiscal year 1984; to reduce budget authority by $117,000,000 and outlays by $115,000,00 in fiscal year 1985; and to reduce budget authority by $118,000,000 and outlays by $118,000,000 in fiscal year 1986.

"HOUSE COMMITTEES

"(g) The House Committee on Agriculture shall report changes in laws within the jurisdiction of that committee, (A) to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays, or (B) which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority and outlays, or (C) any combination thereof, as follows: $1,243,000,000 in budget authority and $1,243,000,000 in outlays in fiscal year 1984; $1,332,000,000 in budget authority and $1,332,000,000 in outlays in fiscal year 1985; and $1,327,000,000 in budget authority and $1,327,000,000 in outlays in fiscal year 1986.

"(h) The House Committee on Energy and Commerce shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $816,000,000 in fiscal year 1984; and to reduce outlays by $1,538,000,000 in fiscal year 1985; and to reduce outlays by $1,979,000,000 in fiscal year 1986.

"(i) The House Committee on Post Office and Civil Service shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $258,000,000 and outlays by $534,000,000 in fiscal year 1984; to reduce budget authority by $386,000,000 and outlays by $834,000,000 in fiscal year 1985; and to reduce budget authority by $636,000,000 and outlays by $1,486,000,000 in fiscal year 1986.

"(j) The House Committee on Small Business shall report changes in laws within the jurisdiction of that committee to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

"(k) The House Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $202,000,000 and outlays by $201,000,000 in fiscal year 1984; to reduce budget authority by $117,000,000 and outlays by $115,000,000 in fiscal year 1985; and to reduce budget authority by $118,000,000 and outlays by $118,000,000 in fiscal year 1986.

"(l)(1) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $849,000,000 in fiscal year 1984; to reduce outlays by $1,481,000,000 in fiscal year 1985; and to reduce outlays by $2,077,000,000 in fiscal year 1986.

"(2) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $8,900,000,000, in fiscal year 1984; $12,675,000,000 in fiscal year 1985; and $51,000,000,000 in fiscal year 1986.

"MISCELLANEOUS PROVISIONS

"SEC. 3. It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution, or amendment thereto, providing—

"(1) new budget authority for fiscal year 1984; or

"(2) new spending authority described in section 401(c)(2)(C) of the Budget Act first effective in fiscal year 1984,

within the jurisdiction of any of its committees unless and until such committee makes the allocations or subdivisions required by section 302(b) of the Budget Act, in connection with the most recently agreed to concurrent resolution on the budget.

"SEC. 4. It is the sense of the Congress that the President and the Congress, through the appropriations process, should limit the on-budget new direct loan obligations of the Federal Government to an amount not to exceed $37,600,000,000 in fiscal year 1983 and $29,300,000,000 in fiscal year 1984; off-budget new direct loan obligations to an amount not to exceed $17,800,000,000 in fiscal year 1983 and $18,900,000,000 in fiscal year 1984; and new loan guarantee commitments to an amount not to exceed $94,500,000,000 in fiscal year 1983 and $94,500,000,000 in fiscal year 1984. It is further the sense of the Congress that the President and the Congress should limit total Federal Financing Bank origination of direct loans guaranteed by other Federal agencies to $16,200,000,000 in fiscal year 1983 and $17,300,000,000 in fiscal year 1984, and Federal Financing Bank purchases of certificates of beneficial ownership from Federal agencies to $11,500,000,000 in fiscal year 1983 and $13,200,000,000 in fiscal year 1984. It is futher the sense of the Congress that direct borrowing transactions of Federal agencies should be, to the maximum extent possible, restricted to the Federal Financing Bank.

"SEC. 5. (a) The joint explanatory statement accompanying the conference report on this resolution shall include an estimated allocation, based upon the first section of this resolution as recommended in such conference report, of the appropriate levels of total new direct loan obligations and new loan guarantee commitments for fiscal year 1983 and fiscal year 1984, among each committee of the House of Representatives and the Senate which has jurisdiction over bills and resolutions providing such new obligations and commitments.

"(b) As soon as practicable after this resolution is agreed to, every committee of each House, after consulting with the committee or committees of the other House to which all or part of the allocation has been made, shall subdivide among its subcommittees the allocation of new direct loan obligations and new loan guarantee commitments for fiscal year 1983 and fiscal year 1984, allocated to it in the joint explanatory statement accompanying the conference report on this resolution.

"SEC. 6. It is the sense of the Congress that the budgets of Federal agencies initiating Federal Financing Bank purchases of certificates of beneficial ownership and originations of guaranteed loans should include the budget authority and outlays resulting from the transactions. The Congress recommends that the committees with jurisdiction over the Federal Financing Bank Act of 1973 consider expeditiously legislation to require that the budgetary impact of such Federal Financing Bank transactions be included in the budgets of the initiating agencies beginning with the fiscal year 1985 budget.".

EMERGENCY FARM CREDIT

BAUCUS AMENDMENT NO. 1263

(Ordered to lie on the table.)

Mr. BAUCUS submitted an amendment intended to be proposed by him to the bill (S. 24) to provide emergency credit to farmers, and for other purposes; as follows:

At the end of the bill, add the following new section:

FARM SUPPLY BUSINESS LOANS

SEC. 5. Effective for the period beginning with the date of the enactment of this Act and ending September 30, 1984, section 310B(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932(a)) is amended by adding at the end thereof the following new subsection:

"(f) Notwithstanding any other provision of law—

"(1) The Secretary shall make and insure loans under this subsection to small businesses which—

"(A) are located in rural areas;

"(B) are engaged in furnishing to farmers and ranchers machinery, supplies, and services directly related to the production of commodities diverted from production under payment-in-kind land diversion programs carried out by the Secretary; and

"(C) establish by substantial evidence that they are experiencing severe economic hardship directly attributable to the operation of such programs.

"(2) A loan shall be made or insured under this subsection for the purpose of assisting an eligible borrower to continue to operate the business of the borrower during the period of economic hardship described in paragraph (1)(C).

"(3) The principal amount of a loan made or insured under this subsection may not exceed $50,000.

"(4) The period of repayment of a loan made or insured under this subsection shall be twelve months.

"(5) The rate of interest on a loan made or insured under this subsection shall be the rate of interest applicable to an operating loan under section 316(a)(1), reduced by 3 per centum.

"(6) To the extent necessary to make or insure loans to eligible borrowers who have applied for assistance under this subsection, no less than 10 per centum of the funds appropriated under the heading "RURAL DEVELOPMENT INSURANCE FUND" in title II of the Act entitled "An Act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes", approved December 18, 1982 (96 Stat. 1799), for the purpose of guaranteeing industrial development loans, shall be made available to make or insure loans under this subsection.

"(7) No later than sixty days after the date of the enactment of the Emergency Agricultural Credit Act of 1983, the Secretary shall issue regulations to carry out this subsection.".

● Mr. BAUCUS. Mr. President, this amendment to the Emergency Agricultural Credit Act would allow small businesses affected by the payment-in-kind (PIK) program to apply for insured loans from the Farmers Home Administration.

The PIK program is a unique and creative approach to address the problems in the farm economy. We all hope that the program will help reduce surplus U.S. grain stocks and stimulate an increase in farm commodity prices. However, the overwhelming response by farmers to participate in the program may be bad news for the small businesses that support agriculture.

In Montana, over a third of the total wheat base acreage—2.3 million acres—have been taken out of production under the PIK program, the acreage reduction program and the paid diversion program. My concern is that this reduction in crop plantings is likely to have a negative impact on other segments of the agricultural economy—the main street businesses in rural America that supply products and services to family farmers.

The U.S. Department of Agriculture estimates seed purchases will decline 12 to 15 percent this year, fertilizer purchases will fall 12 to 14 percent and pesticide purchases will drop 12 to 15 percent.

Mr. President, my amendment would help soften the impact of these expected losses for farm supply businesses. The amendment would make businesses eligible to receive an operating loan from the Farmers Home Administration if they can show that they suffered severe financial hardship from the PIK program. The maximum amount of the loan would be $50,000 and the rate of interest would be the same as the operating loan rate under USDA's limited resource program. The Secretary of Agriculture would develop the guidelines for the loan program.

My amendment does not ask for any new money to be appropriated or authorized. It simply allows broader use of existing funds within the FmHA business and industry loan program.

I am sure those of you who have farmers participating in the PIK program have also heard from farm support businesses worried about the impact of the PIK program. I urge my colleagues to support this modest proposal.●

IMMIGRATION AND NATIONAL ACT REFORM

WILSON AMENDMENT NO. 1264

(Ordered to lie on the table.)

Mr. WILSON submitted an amendment intended to be proposed by him to the amendment No. 1220 proposed by Mr. DECONCINI to the bill S. 529, supra; as follows:

On page 1, after 14, insert the following:

(c) During the transition program described in subsection (b), and annually thereafter, the Secretary of Labor shall include in the annual reports provided under section 214(c)(4) specific findings, based upon consultations with the Secretary of Agriculture, on the impact of the certification requirements of sections 214(c)(2)(A) and 214(c)(3)(A) upon the ability of agricultural employers to produce perishable commodities, as defined by the Secretary of Agriculture. The Attorney General shall extend the transition program for the perishable commodities industry for a period not to exceed two years, if, based upon the Secretary of Labor's findings and the experience under the transition program, the Attorney General has reason to believe that the requirements for importing an alien as a section 101(a)(15)(H)(ii) nonimmigrant have had an adverse impact upon the ability of agricultural employers to produce perishable commodities, or upon the price or availability of such commodities to American consumers. The extension shall be implemented through a rulemaking procedure during the third year of the transition program, but no later than October 31 of that year, under such terms as are necessary to remedy such adverse impact.

Page 1, line 15, replace "(c)" with "(d)".

Page 1, line 18, replace "(d)" with "(e)".

Page 1, line 22, replace "(e)" with "(f)".

Page 1, line 3, replace "(f)" with "(g)".

Page 2, line 11, replace "(g)" with "(h)".

Page 2, line 16, replace "(h)" with new "(i)".

D'AMATO (AND HAWKINS) AMENDMENT NO. 1265

(Ordered to lie on the table.)

Mr. D'AMATO (for himself and Mrs. HAWKINS) submitted an amendment intended to be proposed by them to the bill, S. 529, supra, as follows:

SEC. 2. (a) The Attorney General shall reimburse a State for the costs incurred by such State for the imprisonment of any alien described in subsection (a) who is convicted of a felony by such State.

(b) An alien referred to in subsection (a) is any alien, as defined in section 101(a)(3) of the Immigration and Nationality Act, other than—

(1) an alien who was issued an immigrant visa or who otherwise acquired the status of an alien lawfully admitted for permanent residence, and who was subject to the numerical limitations contained in section 201(a) of the Immigration and Nationality Act (other than an alien accorded the status of a temporary or permanent resident under section 245A of such Act);

(2) an alien who is an immediate relative within the meaning of section 201(b) of such Act; and

(3) an alien who is a nonimmigrant within the meaning of subparagraph (A) or (G) of section 101(a)(15).

(c) There are authorized to be appropriated such sums as are necessary to carry out the purposes of this Act.

AGRICULTURAL INVESTMENT EQUITY AND MARKET EXPANSION ACT OF 1983

BOREN (AND OTHERS) AMENDMENT NO. 1266

(Ordered to lie on the table.

Mr. BOREN (for himself, Mr. BAUCUS, Mr. HUDDLESTON, Mr. EXON, Mr. JOHNSTON, Mr. MELCHER, and Mr. ZORINSKY), submitted the following amendment intended to be proposed by them to the bill (S. 822) to expand markets for United States agricultural commodities, expand authority for the use abroad of Commodity Credit Corporation stocks, require the export sale of Commodity Credit Corporation dairy products, improve programs under Public Law 480, and for other purposes; as follows:

On page 23, after line 15, insert the following new title:

"TITLE VI: EARLY ANNOUNCEMENT OF COMMODITY PROGRAMS

SEC. 601. Effective only for the 1984 and 1985 crops of wheat, feed grains, upland cotton, and rice, the Agricultural Act of 1949 is amended by inserting after section 107C (7 U.S.C. 1445b-2) the following new section:

"'EARLY ANNOUNCEMENT OF PROGRAMS

"'SEC. 107C. Notwithstanding any other provision of this Act, the Secretary shall announce the terms and conditions for each of the annual programs for the 1984 and 1985 crops of wheat, feed grains, upland cotton, and rice (including the applicable loan rate and established price, and the details of the acreage reduction program, if any) according to the following schedule:

"(1) For wheat, by June 15 of the calendar year preceding the calendar year in which the crop is harvested:

"'(2) For feed grains, by September 15 of the calendar year preceding the calendar year in which the crop is harvested;

"'(3) For upland cotton, by September 1 of the calandar year preceding the calendar year in which the crop is harvested;

"'(4) For rice, by November 30 of the calendar year in which the crop is harvested.'"

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business Committee's markup on pending legislation dealing with the Small Business Administration's programs scheduled for May 12, 1983 at 9:30 a.m. in room 428A SR has been rescheduled for May 13, at 11 a.m. in room 428A SR. For further information, please contact Mike Haynes of the committee staff at 224-8487.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations, of the Committee on Governmental Affairs, be authorized to meet during the session of the Senate on Thursday, May 12, at 3:30 p.m., to hold a hearing to consider transferring the catalog of Federal Domestic Assistance from OMB to GSA.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on Thursday, May 12, to hold a markup on S. 544, CEI; S. 836, Enterprise Zones; and the 1984 Trade Agency authorization bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on Thursday, May 12, to hold a markup of S. 856, an Indian housing bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, May 12, for the purpose of voting on the nomination of Daniel Amstutz to be Under Secretary for International Affairs and Commodity programs at USDA.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PATENTS, COPYRIGHTS, AND TRADEMARKS

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Patents, Copyrights, and Trademarks, of the Committee on the Judiciary, be authorized to meet during the session of the Senate on May 16, at 2 p.m., to hold an oversight hearing on patent term restoration.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

REGISTRATION AWARENESS MONTH

● Mr. CHILES. Mr. President, on May 3, Gov. Robert Graham of Florida signed a resolution designating May as Registration awareness Month for Floridians. Governor Graham, in the company of his cabinet, issued this proclamation to insure that men turning 18 in Florida would be aware of their legal requirement to register with the Selective Service System within 30 days of their 18th birthday. Noting that the registration program is an important signal to our allies of this country's defense commitment, and that it enhances our readiness posture in the event of a national emergency, Governor Graham affirmed his support of Selective Service registration. He urged all the young men in the State of Florida to express pride in their country and belief in its rights and freedoms by registering with the Selective Service

Present at the cabinet meeting while Governor Graham signed the resolution was Maj. Gen. Thomas K. Turnage, the Director of Selective Service, and Mr. Willie E. Jenkins, the Selective Service State Director of Florida. I ask that the resolution be printed in the RECORD.

The resolution follows:

RESOLUTION

Whereas, the continuation of the program for peacetime registration for the Selective Service System contributes to National readiness by reducing up to two months the time required for a full defense mobilization; and

Whereas, the registration program is an important signal to our allies and to our potential adversaries of the seriousness of the United States defense commitment at home and abroad; and

Whereas, over one million United States citizens have sacrificed their lives in military service to protect the rights and freedoms of all Americans and registration for Selective Service is an integral part of current preparedness to preserve these rights and freedoms in the future; and

Whereas, nearly 10 million men, representing 96 percent of potential registrants, have registered with the Selective Service System since the resumption of registration and by so registering have enhanced United States national defense preparedness; and

Whereas, the Selective Service System has been tasked with assisting in the process of improving our readiness posture by calling upon eighteen-year-old male citizens to identify themselves by simply registering their name, address, date of birth and social security number with that System by spending five minutes at the Post Office within thirty days of their eighteenth birthday; and

Whereas, there is no penalty for registering after the required time, but there is a severe penalty for failure to register,

Now, therefore, be it resolved that the Governor and Cabinet of the State of Florida do support continuation of registration with the Selective Service and hereby declare May 1983 as Registration Awareness month in Florida and urge all the young men in our State to express pride in their country and belief in its rights and freedoms by registering with the Selective Service System in accordance with the Military Selective Service Act.●

EMERGENCY PREPAREDNESS AT COMMERCIAL NUCLEAR POWERPLANTS

● Mr. SIMPSON. Mr. President, the New York Times, in an excellent editorial published on May 7, 1983, succinctly summarized many of the problems that we have been grappling with in hearings before the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works on the subject of emergency preparedness at commercial nuclear plants. Over the course of the next few days and weeks these and other issues related to emergency planning will be the subject of careful scrutiny by myself and others, in an effort to resolve the nettlesome questions related to Federal, State, and local responsibilities in this area. As I stated in hearings before the Subcommittee on Nuclear Regulation on April 15 of this year, Congress, in adopting a requirement for emergency planning at newly licensed commercial nuclear powerplants, certainly expected that State and local governments would be called upon to assist in the preparation and implementation of emergency plans, and, in most instances, that cooperation has been forthcoming.

It was certainly not this Senator's intent, however, nor do I think it was the intent of the other Senators and Congressmen involved in the drafting of Public Law 96-295, to confer upon State or local governments what amounts to a de facto authority to veto the operation of nuclear powerplants. If that is in reality where we are, with emergency planning as we know it today, then as the New York Times so forcefully states, "the devolution of power over nuclear power from the Federal to local level has gone too far."

Mr. President, I commend this editorial to my colleagues, and urge all of us to consider where we are and where we might wish to go on this issue. I ask that it be printed in the RECORD.

The editorial follows:

WHO SHOULD VETO NUCLEAR POWER?

Suddenly, there's a surprising threat to the two nuclear power plants at Indian Point, N.Y.—from the Nuclear Regulatory Commission. It says they must shut down unless a better emergency evacuation plan can be devised by June 9.

If that deadline is meant as a dramatic way to force a better plan, fine. But there's a larger problem implicit in the threat: It appears to give local authorities a veto over reactors by refusing to approve or cooperate in evacuation plans. If so, the devolution of power over nuclear power from the Federal to local level has gone too far.

In the wake of the 1979 accident at Three Mile Island, plant operators were told by the commission to draw up standby plans for emergency evacuations. What would happen if local authorities refused to cooperate? When the owners of the two plants at Indian Point twice failed to meet deadlines for producing workable plans, the commission allowed the reactors to continue operating.

Given the Administration's avowed support for the nuclear industry and its dislike of regulation, the deadlines seemed to be indefinitely elastic. But now the Nuclear Regulatory Commission has shown its teeth. It voted unanimously this week to close the plants unless improvements are made.

The decision will get attention at the 37 other nuclear plants now operating without approved plans, and particularly at the nearly completed plant at Shoreham, owned by the Long Island Lighting Company. Peter Cohalan, the Suffolk County Executive, believes that no evacuation plan is feasible and that the $3.2 billion plant must be abandoned.

Should such immense investments be forsaken because of inadequacies in a theoretical plan designed to meet an improbable threat? In New York, the commission's decision gives Governor Cuomo a leading role. Mr. Cuomo has said he would not impose an independently devised plan on Suffolk County. He is appointing a fact-finding panel on Shoreham, and has also asked for a report on the issues at Indian Point.

The commission's June 9 deadline seems designed to focus attention on the costs of a shutdown and help Mr. Cuomo off the fence. Under his leadership, if he chooses to exert it, the utilities will improve safety or planning enough to assuage local concerns and allow the plants to operate.

Neither Indian Point, 35 miles north of Times Square, nor Long Island appear today as the best places to situate nuclear reactors. But since the plants have already been built, the presumption should be that they may operate provided they can do so safely.

Emergency evacuation plans are a welcome regulatory afterthought to nuclear safety, but cannot yet be defined so precisely that they should be imposed as an abso-

lute goal. Yes, government at all levels should work to create the most practical evacuation plans possible. Yes, local authorities should have a strong voice in nuclear affairs. But no, they should not be handed a veto.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. The classified annexes referred to in several of the covering letters are available to Senators in the office of the Foreign Relations Committee, room SD 427.

The material follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., May 4, 1983.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

Re in reply refer to: I-01117/83ct.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-32 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Egypt for defense articles and services estimated to cost $27 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Lieutenant General, USAF, director.

[Transmittal No. 83-32]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Egypt.

(ii) Total estimated Value in millions:

Major defense equipment [1]	$24
Other	3
Total	27

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: A quantity of 39,492 rounds of 105mm tank ammunition consisting of 18,177 rounds of M735 APFSDS-T and 21,315 rounds of M456 HEAT-T.

(iv) Military Department: Army (UEN and UEP).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Included in report for quarter ending 31 December 1982.

(viii) Date Report Delivered to Congress: May 4, 1983.

POLICY JUSTIFICATION

EGYPT—AMMUNITION

The Government of Egypt has requested the purchase of a quantity of 39,492 rounds of 105mm tank ammunition consisting of 18,177 rounds of M735 APFSDS-T and 21,315 rounds of M456 HEAT-T at an estimated cost of $27 million.

This sale will contribute to the foreign policy objectives of the United States by helping to improve the security of a friendly country, thereby increasing the stability of the Middle East region as a whole. U.S.-Egyptian cooperation remains critically important to the pursuit of a comprehensive peace in the Middle East. Egypt has also been a key supporter of U.S. efforts to enhance the security of moderate states in the Middle East and Southwest Asia regions.

The purchase of this ammunition supports equipment already purchased by the Egyptians. They have previously purchased this type of ammunition, thus they have the ability to absorb the additional materiel.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be Martin Marietta, operators of the Milan Army Ammunition Plant, Milan, Tennessee.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Egypt.

This sale will require diversion from Army stocks and will have minimal impact on Army readiness during the period in which the stocks are being replenished.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., May 9, 1983.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

Re in reply refer to: I-00832/83ct.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-33 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Navy's proposed Letter of Offer to Pakistan for defense articles and services estimated to cost $38 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Lieutenant General, USAF, Director.

[Transmittal No. 83-33]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Pakistan.

(ii) Total estimated value in millions:

Major defense equipment [1]	$22
Other	16
Total	38

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: Four MK 15 MOD 1 single-gun VULCAN-PHALANX Close-In Weapon Systems with ammunition, spares, repair parts, and training.

(iv) Military Department: Navy (LAI, ABF, and TAW).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Included in report for quarter ending 31 December 1982.

(viii) Date Report Delivered to Congress: May 9, 1983.

POLICY JUSTIFICATION

PAKISTAN—VULCAN-PHALANX CLOSE-IN WEAPON SYSTEMS

The Government of Pakistan has requested the purchase of four MK 15 MOD 1 single-gun VULCAN-PHALANX Close-In Weapon Systems with ammunition, spares, repair parts, and training at an estimated cost of $38 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Pakistan to increase its capability to provide for its own security and defense. Pakistan plays an increasingly greater role as a stabilizing force in the Indian Ocean region. It is strategically important in the defense of sea lines of communication in the Arabian Sea and approaches to the Persian Gulf.

These VULCAN-PHALANX systems will be used as defensive weapons in the ongoing modernization of existing ships of the Pakistan Navy. The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the General Dynamics Corporation of Pomona, California.

Implementation of this sale will require the assignment of three additional U.S. Government personnel to Pakistan for 15 weeks.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

THE WHITE HOUSE CONFERENCE ON SMALL BUSINESS—A STATUS REPORT ON ITS RECOMMENDATIONS

● Mr. NUNN. Mr. President, this week is Small Business Week, 1983. It is a time that we have taken annually to recognize the contributions that small business makes to our economic and social environment, and to encourage the entrepeneur to continue to actively participate in the free enterprise system.

Since I came to the Senate in 1973, I have had the privilege of serving on the Senate Small Business Committee; and since 1981 I have been its ranking Democratic member. In my view, the Senate Small Business Committee functions best as an advocate within the Senate for the interests and concerns of the 14 million businesses in this Nation that we consider small business.

This is not an easy task, for as we look at the characteristics of the small

business community, we see a very different composition if we look at Boston's Route 128 hi-tech corridor, or Georgia's small manufacturers and farmers, or the west coast timber industry.

We know that the small business community is not a monolithic entity by any means, and at times it has been difficult to assess the impact of particular Federal policies and programs on them.

But over time, I believe that we on the Small Business Committee, far better than most, have been able to reach out to that community and, under their guidance, develop a series of policies and programs that have made the business of being a small business a little easier.

Mr. President, most of our legislative efforts in the past were the products of a consensus among legislators about the most pressing problems facing small business. While we had the background developed through the hearing process, both in Washington and in the field, there was frequently a question raised about "what did small business really want."

In 1978, under the leadership of the former chairman of the Senate Small Business Committee, the distinguished Senator from Wisconsin, Gaylord Nelson, the committee reported a resolution to the Senate, which was adopted, requesting the President to convene a national White House Conference on Small Business. To his credit, President Carter heeded Senator Nelson's recommendation, and approved the request.

That action set in motion the mechanism for over 55 State and regional meetings in 1978 and 1979. With the imprimatur of the White House as a backdrop, and with the commitment of the Congress, the White House and the Small Business Administration, over 45,000 small business men and women owners, their advocates and supporters, met in State capitols around this Nation to discuss the critical issues facing small business, to identify those Federal actions and inactions which had the most far-reaching impact on their ability to be a small business, and to propose ideas that, in their view, would improve the relationship between the Federal Government and the small business community so as to foster their continued growth and development.

Those State and regional meetings culminated in the convening of the first White House Conference on Small Business, in Washington, in January 1980. During that 4-day national assembly, over 1,600 elected delegates, representing all 50 States, the District, and Puerto Rico, refined the issues that had been developed through the State and regional forums, and developed their own agenda of issues, and solutions, to the problems they perceived as having the greatest impact on their business lives.

When the Conference concluded, the delegates had voted on a series of 60 recommendations, 5 in each of 12 major topical areas.

Following the Conference, the White House Conference Commissioners, who had the day-to-day management responsibility for the Conference under the chairmanship of Arthur Levitt, Jr., president of the American Stock Exchange, prepared the report of the delegates, and submitted the text of the 60 recommendations to the President and the Congress.

Both the House and Senate leaderships established task forces, composed of key committee and subcommittee chairmen, to take responsibility for analyzing those 60 recommendations, and moving expeditiously on putting into legislation as many as possible. There was a flurry of activity in the early months after the White House Conference, and a number of significant recommendations were signed into law. But, Mr. President, while the fanfare may have subsided, the legislative and administrative efforts to see that 1980 agenda fully implemented has not ceased. Nor has the enthusiasm waned in the small business community to have their agenda enacted.

Over the past 2 years, as I meet with small business groups from around the country, I am repeatedly asked the question of the status of the White House Conference agenda. To my surprise, and disappointment, it appeared that there was no previous comprehensive effort to bring up-to-date the scorecard of accomplishments from that milestone White House Conference on Small Business.

Mr. President, for the benefit of my colleagues in the Congress, the men and women who participated in that 1980 conference, and those who are advocates for small business both within and outside of Government, I am honored to be able to provide that report today, and will include in my statement a detailed analysis of the 60 recommendations.

This analysis was prepared, almost singlehandedly, by Alan Chvotkin, my chief counsel on the Small Business Committee. Alan has served me in that capacity since January 1981. Prior to that time, he served as majority legal counsel to the committee under Senator Nelson. He was intimately involved in the development of the White House conference and served as its senior counsel during the conference.

Additional research was provided by Miss Amy Cantor who was an intern with the Small Business Committee last year, and Mary T. Bates, the staff assistant to the minority. Terri also deserves most of the credit for the production of this report.

As with any analysis, this one is, to a degree, subjective. Judgments had to be made as to the appropriate legislative coverage of certain recommendations that had only a general statement. Where there are multiple parts to one recommendation, each is dealt with separately, to the extent possible. The analysis is, to the best of our ability, nonpartisan, and accurate through the end of the 97th Congress; that is December 1982.

If there is a bias in this analysis, it would be that, to the extent recommendations have not been enacted into law, greater attention is focused on the interim efforts of the Senate rather than the House. It is an area we are more familiar with, but should not be interpreted as a lack of action by the House. I would welcome a careful review of this analysis, and comments for improvement or corrections.

Mr. President, based on this review, 38 of the 60 recommendations adopted in 1980 have been adopted in whole or significant part. In fact, since at least five of the recommendations Nos. 6, 23, 26, 30, and 37) are virtually duplicative, it is fair to state that 38 of 56 recommendations have been put into place. Furthermore, since the delegates ranked 15 recommendations as among their top priority, 11 of those 15 have been substantially complied with.

For example, in the area of economic policy and Government programs, all five recommendations have been adopted. In the areas of energy, Government regulations and paperwork, women in business, procurement, and international trade, four of the five recommendations in each of these areas have been substantially adopted legislatively or administratively. In the critical area of capital formation, three of the five recommendations have been enacted into law.

Mr. President, I would like to insert at this point in the RECORD a brief chart which recaps the progress made in implementing the 60 White House conference recommendations.

Summary of White House conference recommendations

Conference topic area:	*Completed* [1]
(a) Capital formation	3
(b) Minority business enterprise	2
(c) Innovation and technology	3
(d) Inflation	2
(e) Veterans	1
(f) Procurement	4
(g) Energy	4
(h) Women in business	4
(i) Government regulation and paperwork	4
(j) Economic policy and Government programs	5
(k) International trade	4

(l) Education	2
Total number of recommendations implemented of 60 [2]	38

[1] Number of recommendations completed of five proposed.

[2] Five recommendations appear duplicative (6, 23, 26, 30, and 37).

At the risk of being optimistic, in my review of the unfinished agenda, I believe it is possible for another 10 recommendations to be put into place within this coming year.

Mr. President, in addition to these recommendations, it should be clear that the small business community has not stopped at these recommendations in their efforts to improve the environment for small business. Nor has the Congress. For example, the Congress initiated the so-called Prompt Payments Act which requires the Government to pay its bills within a fixed period or pay interest on the outstanding balance. We approved a two-tiered fee structure for smaller businesses who file patent applications to protect their inventions. Last year, at Congress insistence, the Securities and Exchange Commission held its first annual Forum on Small Business Capital Formation, during which an additional 37 recommendations for legislative and administrative action in this critical area of access to capital were developed.

The significant progress that has been made to date, and the growth in the small business community's participation in the development of policies and programs to aid in their development, leads me to strongly recommend that the President reconvene another White House Conference on Small Business. This should be another nonpartisan conference, with the delegates chosen through a legitimate selection process. The agenda, and issues, should be of their choosing. I remember concerns were expressed by some of the Washington "pros" that the first Conference should not pass what they thought best for small business, but what some perceived as that which could be enacted. Fortunately, the delegates chose the former course, and Congress and the executive branch paid attention and took action. The next conference should take a similar approach.

Another White House conference would serve to rejuvenate the efforts to complete the first conference agenda, assess the progress made by the small business community as a whole, and develop another plan for action.

I will be joining with many of my colleagues in a letter to the President on this suggestion.

Mr. President, I ask that the complete analysis of the 60 recommendations of the 1980 White House Conference on Small Business be printed in full at this point in the RECORD.

The analysis follows:

THE WHITE HOUSE CONFERENCE ON SMALL BUSINESS

CAPITAL FORMATION AND RETENTION

Recommendations No. 1

At the White House Conference on Small Business, the delegate's primary concern was with the problems of finding and retaining capital. This is always difficult, especially for smaller companies. Inflation and expensive credit have made it increasingly difficult both to find outside capital and to preserve capital through retained earnings. In the ideal situation, a small business would have a variety of financing alternatives readily available to meet different needs at different times in its economic life cycle. Start-up capital usually comes from the entrepreneur's savings or from friends and relatives. Later, a young company may need venture capital from investors, Small Business Investment Companies, and similar institutions. Eventually, the company can sell shares through a public offering in order to raise equity capital.

On the debt side, commercial banks and finance companies provide short-term loans to finance inventories and accounts receivable and intermediate-term loans to buy equipment. Banks and savings and loan companies provide long-term debt money mostly by taking mortgages. Life insurance companies rarely lend to small businesses. Federal tax policy is the single most important instrument for encouraging or discouraging the flow of capital to small businesses. Taxes both on business income and on capital gains influence where investors choose to place this money.

"Replace the present corporate and individual income tax schedules with more graduated rate scales specifying the graduation corporate tax scale up to $500,000."

This recommendation was substantially enacted in the Economic Recovery Tax Act of 1981 (Public Law 97-34) in the following manner.

Cumulative reductions were made in individual income tax rates of 1¼ percent in 1981, 10 percent in 1982, 19 percent in 1983 and 23 percent in 1984. The top marginal rate for individuals was reduced from 70 to 50 percent on January 1, 1982, and the maximum tax rate on long-term capital gains was reduced to 20 percent for sales or exchanges after June 9, 1981.

In addition, the Economic Recovery Tax Act reduced the rate on corporate taxes. Under the law existing prior to the enactment of Public Law 97-34, the corporate rates were:

Corporate rate reduction taxable income	Rate (percent)
Under $25,000	17
$25,000 to $50,000	20
$50,000 to $75,000	30
$75,000 to $100,000	40
Over $100,000	46

Specific provisions in ERTA reduced the corporate tax rate on taxable incomes below $50,000 to:

Taxable income	Rate (percent)
In 1982:	
less than $25,000	16
$25,000 to $50,000	19
In 1983 and later years:	
less than $25,000	15
$25,000 to $50,000	18

Furthermore, although no action was taken on it during the 97th Congress, section 111 of S. 360, the Omnibus Small Business Capital Formation Act of 1981 (introduced by Senators Weicker, Nunn and 22 others on February 3, 1981), portions of which were included in the Economic Recovery Tax Act, would have increased the number of corporate tax brackets from five to seven, and would have further reduced the pre-ERTA marginal tax rates, particularly for small businesses, as follows:

Taxable income	Tax rate
Pre-ERTA law:	
$0 to $25,000	17
$25,000 to $50,000	20
$50,000 to $75,000	30
$75,000 to $100,000	40
Over $100,000	46
S. 360:	
$0 to $25,000	15
$25,000 to $50,000	17
$50,000 to $75,000	25
$75,000 to $100,000	30
$100,000 to $150,000	35
$150,000 to $200,000	40
Over $200,000	44

The revised rate schedule would allow smaller companies to put more of their profits back into their businesses for necessary improvements and expansion.

Recommendation No. 2

"Adopt a simplified accelerated capital cost recovery system to replace the present complex Asset Depreciation Range (ADR) regulations with provisions such as (A) immediately expensing capital costs less than a specified amount (B) immediately expensing government mandated capital costs, and (C) the creation of a maximum annual annual benefit that may be derived from the system."

This recommendation was substantially enacted in the Economic Recovery Tax Act (P.L. 97-34). The Asset Depreciation Range (ADR) provisions of prior law were designed to allocate depreciation deductions from gross income over the period the asset would be used in business, the so-called "useful-life", so that deductions for the cost of an asset were matched with the income likely to be produced by that asset.

In the Economic Recovery Tax Act, ADR was replaced by the Accelerated Cost Recovery System (ACRS). Under ACRS, the cost of an asset would be recovered over a pre-determined period, generally shorter than the useful life of the asset or the period the asset is used to produce income.

The Act provides that the cost of eligible personal (and certain real) property is recovered over 3, 5, 10 of 15 years, depending on the classification of the property. In addition, under the Act taxpayers have the option to use the straight-line method of depreciation, a prescribed accelerated recovery period, or an optional recovery period. Under the Tax Equity Act (P.L. 97-248) the faster recovery percentages scheduled to become effective in 1985 and 1986 have been eliminated. In addition, if property is financed in part by an industrial development bond, ACRS deductions are slowed.

With respect to that part of the recommendation for direct expensing certain capital costs, previously a deduction was provid-

ed for "bonus" first-year depreciation up to 20 percent of up to $10,000 of eligible property. ERTA repeals the "bonus" depreciation provisions and replaces it with an election to expense the cost of new or used personal property used in a trade or business. The maximum annual amount a person can expense is $5,000 for 1982 and 1983, $7,500 for 1984 and 1985, and $10,000 for years after 1985. No investment tax credit is allowed for expensed property, however. For a further discussion of a research and development tax credit, see recommendation 11.

No action has been taken regarding parts C of this recommendation.

Recommendation No. 3

"Revise estate tax laws to ease the tax burden on family-owned businesses and encourage the continuity of family ownership."

Previously, it was difficult for heirs to maintain family ownership of businesses. In order to pay the estate taxes, families were frequently left with no choice except to liquidate the business. Some larger firms bought the more growth-oriented businesses, which resulted in greater concentration rather than greater competition. Revisions to the estate and gift tax laws that have been included in the Economic Recovery Tax Act make it easier for survivors to retain a family business.

For example, under the Economic Recovery Tax Act (Public Law 97-34):

1. Estate and gift taxes are unified under the Act so that a simple, progressive rate schedule is applied to cumulative gifts and bequests.

Estate and gift tax rates range from 18 percent for the first $10,000 in taxable transfers to 70 percent on transfers exceeding $5 million. Under the Act, for decedents who died in 1982, the unified credit is set as $47,000, so that there would be no estate or gift tax liability on estates up to $175,625. In addition, the law provides for an increase in the unified credit in steps through 1987, so that the equivalent amount of transfers on which no estate or gift tax need be paid increases to $600,000. Furthermore, the maximum estate and gift tax rate is reduced by 5 percentage points each year over a four year period beginning in 1982 from 70 to 50 percent.

2. Marital deductions.—ERTA eliminates the previous quantitative limits on both the gift and estate tax marital deductions so that it is possible for one spouse to transfer an unlimited amount of property tax-free to the other spouse. Transfers of community property and of certain terminable interests also qualify for the marital deduction. With respect to property held in joint tenancy by spouses with right of survivorship, only half of the property is included in the estate of the first to die. A transition rule continues for marital deduction clauses in wills executed before 30 days after the date of enactment and not subsequently amended to specifically indicate an intent to adopt an unlimited marital deduction.

3. Gifts made within three years of death.—Several sections of the prior law are combined into one provision which permits the deferred payment of estate taxes if interests in closely held businesses exceed 35 percent of adjusted gross estate. The new law also permits redemption of stock in a closely held business to pay estate taxes, funeral expenses and administration expenses, and provides that the remaining unpaid tax balance won't be accelerated upon the death of the decedent's heir or a subsequent transferee, provided that the interests in that closely held business are passed to a member of the heir's family.

4. Annual gift tax exclusion.—The annual gift tax exclusion is increased from the prior law level of $3,000 to $10,000 per donee. An unlimited gift tax exclusion is provided for amounts paid directly to the service provider for the benefit of the donee of medical expenses and school tuition. A transition rule allows present law to continue to apply to existing trusts which contain provisions referring to the maximum annual exclusion amount.

5. Annual filing of gift tax returns.—The filing of the gift tax return is required only on an annual basis rather than quarterly.

6. Generation-skipping transfer tax.—Trusts created by wills or revocable trusts in existence on June 11, 1976 are exempt from tax-generation trusts if (1) they were not amended after that date to create or increase the amount of a generation-skipping transfer, and (2) the testator or trust grantor died before January 1, 1983.

Recommendation No. 4

"Provide for a tax credit for initial investment in a small business, and permit deferral of taxes for roll-overs of investments affecting small businesses."

Section 101 of S. 360, the "Omnibus Small Business Capital Formation Act of 1981", provides for a 10% tax credit (up to $4,000 per person) for investment in the stock of small and medium sized corporations. Section 104 of that bill permits sellers of small business stock to sell their interest for cash and defer any capital gains tax they may owe as a result of the sale provided they reinvest the proceeds from the sale in another small business within 18 months of the date of sale. In the House, H.R. 4242 has many provisions similar to those found in S. 360.

One hearing was held in the Senate Finance Committee on this proposal.

However, no legislative action has been taken to provide a direct tax credit for initial investments in a small business. Congress did pass the "Subchapter S Revision Act of 1982" which, among other things, increased the number of permitted shareholders from 25 to 35.

For a further discussion of related issues, see other recommendations dealing with capital formation.

With respect to a deferral of taxes for "roll-overs" of investments affecting small business, several bills have been introduced in both the House and Senate. No action has been taken on these generic proposals. In October, 1982, the Senate Finance Committee reported enterprise zone legislation which would provide for the establishment of 25 enterprise zones in each of three fiscal years. Among the tax incentives included in the bill are:

The existing investment tax credit of 10 percent would be increased to 20 percent;

The capital gains tax on the sale of certain property within a zone would be eliminated; and

A jobs tax credit would be provided for employment in the zone: 10 percent for wages paid to zone residents, and 50 percent for disadvantaged workers.

Recommendation No. 5

"Provide tax incentives in the form of a new security called a Small Business Participating Debenture (SBPD) to provide a source of capital for small businesses."

Small Business Participating Debentures are seen as a way to raise capital for small business without the entrepreneurs sacrificing a substantial portion of their equity. Although proposals take several forms, they generally provide that the SBPD will have a fixed rate of interest, be redeemable at a predetermined price on a future date certain and involve no ownership interest. The share of earnings would be taxed to the investor as a long-term capital gain, but deductible by the issuing company as an expense. The SBPD is designed to combine the benefits of equity and debt financing that is acceptable to both the small business and investment community.

Section 102 of S. 360 would provide the legislative authority for such a security. In the House, two bills have been introduced (H.R. 4015, H.R. 5078) which, although somewhat different in their provisions, would also provide the needed authority.

However, no legislative action has been taken on any of these proposals.

MINORITY BUSINESS DEVELOPMENT

Recommendation No. 6

It has become increasingly difficult for minorities to start and operate small businesses.

Minority businesses are often concentrated in low-growth and low-margin industries such as retail trade, services, and non-industrial construction. These entrepreneurs are often "handicapped" by inadequate capital, limited opportunities to buy businesses, insufficient management training, disjointed and diffused government assistance programs, and difficulty in marketing outside minority communities. Federal efforts to help minority enterprise center around financial aid and procurement opportunities. The SBA does have specific programs to aid minority owned businesses. However, the delegates were concerned with obtaining additional assistance. The recommendations offered in this area focus heavily on mandating specific percentage goals for federal monies and opportunities to go to small, minority, and women-owned businesses.

Public Law 95-507 was signed by the President on October 24, 1978. Before 1978, various executive orders were the basis for the Federal government's support for minority businesses. For 1977, the Public Works Employment Act of 1977 was passed by Congress, and required that at least 10 percent of Federal funds granted for local public works projects must be used to procure supplies from minority owned businesses. The constitutionality of this provision was questioned many times, and in 1980, the Supreme Court ruled that Congress did have the constitutional power to enact the 10 percent set-aside provisions. The passage of Public Law 95-507, which amended section 8(a) of the Small Business Act, now allows the SBA to enter into contracts with other government agencies, and to subcontract to small businesses owned by socially and economically disadvantaged people for services and supplies necessary to perform the contracts.

Public Law 95-507 also amended the Small Business Act to require that in the case of contracts over $1,000,000 for the construction of any public facility, or $500,000 for any other contract, the successful offeror must negotiate a plan that provides the "maximum practicable opportunity" for small business subcontracting.

"The President, by Executive Order, and Congress, by legislation, shall establish mandatory goals for all Federal procurements and Federal funds or grants to States, localities, and public and private institutions, on a contract-by-contract or agency-wide basis for small businesses (35

percent); minority-owned (Black-Hispanic, Native American, Asian Pacific American, and other racial minorities) businesses (15 percent); and women in business (10 percent)."

For a detailed review of this item, see recommendation 37 in particular. Recommendations 23, 26, and 30 are similar.

Recommendation No. 7

"The President shall direct the Office of Management and Budget (OMB) to establish, as part of the budget process, a formal reporting and goal-setting system, requiring all departments and agencies to specify and separately make public the resources they plan to make available to small business, minority-owned (Black, Hispanic, Native American, Asian Pacific American, and other racial minorities) businesses, and women in business. The departments and agencies shall also be mandated to publicly report the levels of attainment of these goals."

No specific action has been taken on this recommendation. Although agency budget justifications will frequently identify program goals and resource allocations there is no single reporting or goal-setting system for all resources.

Public Law 95-507 does require that each agency which has procurement authority must set goals for the utilization of small business in their procurement activities. For a further discussion of this issue, see recommendation 37.

In addition Public Law 97-219, the Small Business Innovation Development Act, requires that each Federal agency that has a research and development budget in excess of $20 million in any fiscal year shall establish goals for funding agreements for R&D to small business concerns, and no goal established shall be less than the percentage of the agency's R&D budget spent with small business in the preceding fiscal year. For a further discussion of this issue, see recommendation 11.

Recommendation No. 8

"Congress and the Executive Branch shall ensure the effective implementation and enforcement of Public Law 95-507 by adopting the following changes/recommendations: (1) requiring the law or implementing regulations to provide that the prime contractor set forth a narrative description of the subcontract or subcontract item; and (2) giving the Associate Administration for Minority Business, within the SBA, the clear authority to enforce and monitor compliance with Public Law 95-507."

No action has been taken to implement part one of this recommendation. Provisions were made for part two in Public Law 96-481.

Section 104 of Public Law 96-481 states that the SBA Associate Administrator for Minority Small Business and Capital Ownership Development (AAMSB-COD) shall manage all services and activities authorized under Section 7(j) and 8(a) of the Small Business Act.

Section 105 of that law states that all determinations of eligibility for the 8(a) program made with respect to whether a group has been subjected to prejudice or bias (i.e. whether there is the qualification for "social" disadvantage as required by the Small Business Act) shall be made by the SBA Administrator after consultation with the AAMSB-COD. All other determinations required for program eligibility shall be made by the AAMSB-COD under the supervision of, and responsible to, the Administrator.

NOTE.—Under Public Law 96-481, the AAMSB-COD only has the authority to enforce the provisions of Public Law 95-507 dealing with minority business development programs. He does not have the authority over the other general procurement provisions of Public Law 95-507. Of course, the Administrator of the Small Business Administration does have the overall management responsibility for the agency's implementation of procurement programs under the agency's jurisdiction.

Recommendation No. 9

"Congress shall (1) adopt an SBIC and MESBIC Investment Tax Credit Act to provide a 50 percent tax credit for corporations and individuals who invest in any issue of equity securities of SBICs and licensed MESBICs; and (2) authorize MESBICs to borrow long-term loans from the Federal Financing Bank at subsidized interest rates."

No action has been taken on this recommendation. Part of the impetus for part two of this recommendation is to insure an adequate and cost-effective source of financing for MESBICs. The House has passed legislation (H.R. 6086) which would, among other things, increase the authorization for SBA participation in MESBICs from its current statutory ceiling of $35 million to $41 million. Similar increases have also been passed by the House of Representatives as an amendment to a Senate-approved bill (S. 1947) relating to improving the small business procurement community's use of the Commerce Business Daily. Similar legislation (S. 2408) has been favorably reported by the Senate Small Business Committee. Both bills would also increase the present ceiling on guarantees of debentures issued by SBICs. Current law authorizes $160 million. The House bill would increase that level to $250 million; the Senate bill raises the ceiling to $225 million.

Recommendation No. 10

"The President, by Executive Order, or Congress by legislation, shall establish a National Minority Economic Commission to provide a centralized focus to the Federal effort to assist minority business enterprise. This commission, a majority of which shall consist of non-government contractors, shall report directly to the President."

Public Law 95-507 statutorily established the Presidential Advisory Committee on Small and Minority Business Ownership (PAC-SMBO).

On February 1, 1980, by Executive Order 12190, President Carter created the Committee, implementing the statutory requirements. The purpose of the PAC-SMBO is to assist in monitoring and encouraging the placement of subcontracts by the private sector with eligible small business, particularly with small minority business. Also, the Committee is to study and propose the incentives and assistance needed by the private sector to help in the training, development, and upgrading of such businesses. The Committee, through its Chairman, reports annually and makes recommendations to the President and to the Congress on its activities during the previous year. Executive Order 12259 (Dec. 31, 1980) extended the life of the Committee to December 31, 1982.

By statute, the membership of the Presidential Advisory Committee is to be composed of five "high level officials" from five U.S. businesses, and five representatives of minority small businesses.

INNOVATION AND TECHNOLOGY

Recommendation No. 11

The U.S. is the world leader in science, engineering, and technology, but its leadership has been waning in recent years, especially as other nations have developed government policies to foster innovation.

Innovation is essential to improving productivity in every sector of the economy, to developing new industries, and to strengthening the U.S. balance of trade. Technology is also a key to revitalizing inner cities.

The government has embarked on a major overhaul of federal laws and practices to spur innovation. The options studied by the delegates concentrated largely on problems of finding capital, and were in many instances identical to proposals discussed in the Conference workshops on Capital Formation and Retention. The delegates were also concerned about streamlining the Patent Office, retaining rights to inventions made under federal research grants, and making the distribution of federal R&D funds more equitable and subject to fewer delays.

"Support and urge passage of S. 1860, the Small Business Innovation Act of 1979, and companion bill H.R. 5607, as presently drafted with flexibility for minor future amendments covering: small business research and development set-asides; small business innovation and research programs (as already encompassed by H.R. 5126 and S. 1074), patents (as already encompassed by S. 414 and S. 1679), capital formation and retention, amendments to the Internal Revenue Code, and regulatory flexibility."

The first two elements of this recommendation have been met through the enactment of Public Law 97-219, the Small Business Innovation Development Act of 1982. This legislation is similar to the substance of the specific legislative proposals which were pending in the Congress during January, 1980 when the Conference met.

The Small Business Innovation Development Act creates a national policy for greater utilization of federal research and development as a base for technological innovation while meeting particular agency needs.

The Act is intended to encourage participation of small science and high-technology firms in government research and also provides incentives for the conversion of research results into technological innovation and commercial applications. Follow-on private funding from venture capital and industrial firms will help pursue potential commercial applications of government R&D efforts.

Federal agencies which have a research and development budget of more than $100 million for outside work are required to establish Small Business Innovation Research (SBIR) programs. Through these programs, a percentage of the R&D budget will be set-aside for funding agreements with small business. Small businesses will compete among themselves for awards under these programs.

Funding for the SBIR programs in civilian agencies will be phased in over a four-year period, and over a five-year period for the Department of Defense.

Estimated amount of R&D funds to be set aside for fiscal year 1983-87 under SBIR programs

Fiscal year:	*Millions*
1983	$50
1984	150
1985	265
1986	405
1987	465

Patents

With respect to that portion of the recommendation dealing with patents, this element has been met through the enactment of Public Law 95-517, the "Patent and Trademark Amendments of 1980". With limited exceptions, this Act gives small businesses and non-profit organizations a first right of refusal to title in inventions they have made in the performance of Government grants and contracts. The Act takes precedence over approximately 26 different statutory and administrative provisions governing title in inventions. This law is similar in substance to the specific legislative proposals which were pending in the Congress during January, 1980 when the Conference met.

Beyond the specific recommendation of the delegates, legislation has been enacted (Public Law 97-247, the Patent and Trademark Office authorization) to statutorily establish certain fees to be charged by the Commissioner for patents and patent applications. However, this legislation also states that appropriated funds shall be used to reduce by half the fees which small businesses and certain others would otherwise be required to pay under the legislation.

Capital Formation

This recommendation is not specific on the delegate's suggestions on appropriate capital formation and retention action, or amendments to the Internal Revenue Code. For a discussion of specific delegate recommendation, see the section relating to capital formation and retention.

However, the Economic Recovery Tax Act (Public Law 97-34) does provide a 25 percent tax credit for certain research and experimental expenditures paid in carrying on a trade or business, but only to the extent that current year expenditures exceed an established "base period". This credit is scheduled to expire in 1985. There will be proposals to make the credit permanent.

Regulatory Flexibility

This recommendation is not specific on the delegates' suggestions on appropriate actions for regulatory flexibility. For a discussion of the specific regulatory recommendations, see items 41, 43 and 45.

Recommendation No. 12

"Existing Federal research and development procurement, assistance and tax laws and policies must be modified and new laws enacted to: (1) eliminate unfair advantages enjoyed by governmental agencies, nonprofit organization and educational institutions which compete with innovative small business in providing goods and services; (2) mandate statutority a national policy of reliance on small businesses; (3) prevent the Federal government from dissemination of proprietary information: (4) prevent the Federal government through the use of its own personnel, including Federal Research Centers, from competing with small business."

Part one of this recommendation is not specific on the delegate's suggestions for appropriate action to eliminate unfair advantages which may provide a competitive edge to certain institutions which compete with small business. For a number of significant actions which already have been taken to assist the innovative small business community, see the discussion under recommendation 11.

With respect to part two of this recommendation, legislation has been introduced in both the Senate (S.J. Res. 93 and S. 2278) and the House (H.J. Res. 294) to affirmatively state in law the general policy of the government of the U.S. to rely on competitive private enterprise to supply the products and services it needs whenever competitive industry prices are available. This policy shall be administered by the Director, Office of Management and Budget in coordination with the Administrator, Office of Federal Procurement Policy.

Although hearings have been held on this legislation, and the issue of contracting out generally, no legislative action has been taken on these specific proposals.

Federal departments and agencies operate under broad policy guidelines to examine their activities to determine which can be handed over to the private sector. OMB Circular A-76 outlines a method by which agencies can establish whether it is "more efficient and effective for the Government" to contract out for certain services and products or to perform the activity in-house. According to A-76, there are major cost advantages of contracting out such as cost-effectiveness, flexibility and the ability to increase technology transfers. However, despite the obvious advantages mentioned, A-76 states that purely "governmental functions" be performed in-house. The key issue, however, is determining what are "purely governmental functions". The loose wording of the present circular leaves the phrase open to interpretations which allows agencies to justify the activities performed by federal employees. The Office of Management and Budget is presently (November, 1982) revising OMB Circular A-76.

However, the fiscal year 1983 Department of Defense Authorization Act (S. 2248, Public Law 97-252) does contain several provisions prohibiting the contracting out of certain activities. Under the law, Congress imposed a six month (until April, 1983) limitation on any Defense Department cost-benefits analyses of contracting out commercial and industrial functions to the private sector, except for certain enumerated areas. In addition, the law prohibits the Department from entering into any new contract in fiscal year 1983 for performing firefighting or security guard functions:

Regarding Part 3 of this recommendation, sections 8 and 9 and S. 1730, the "Freedom of Information Reform Act", introduced by Senator HATCH, provides for the protection of "trade secrets and commercial research, or financial information, or other commercially valuable information obtained from any person and privileged or confidential where release may impair the legitimate private, competitive, financial, research, or business interests of any person or where release may impair the government's ability to obtain such information in the future".

This strong language was modified when the bill was considered by the Senate Judiciary Committee. As modified by the Committee, the legislation would limit public access to certain government files without creating an opportunity for excessive governmental secrecy. Specifically, the Judiciary Committee bill would require an agency to notify a business when anyone requests information on a business when that information is provided to the Government. Additional protections are provided to businesses to challenge, at both an agency level or in court, an agency's decision to release the information on the firm. The Senate Judiciary Committee reported this bill to the full Senate, but no action was taken on it.

Part four of this recommendation is similar in policy guidance to part two of this same recommendation.

For a more thorough discussion of the provisions on limitations on "contracting out", see recommendation No. 26.

Recommendation No. 13

"Increase the amount of Federal research and development prime contracts awarded through small business set-asides by one percent per year of each agency's research and development budget, until the dollar value of the set-asides reaches at least ten percent of that agency's total annual research and development budget."

It has been estimated that, for fiscal year 1982, total Federal research and development funds available to the agencies will total over $40 billion. A recent study by the Federal Government's Office of Federal Procurement Policy found that only 3.5 percent of the total Federal R&D funds are made available to small business. However, under prior Federal law, only the National Science Foundation has specific statutory authority to "set-aside" a portion of its budget for R&D prime contracts for small business. The Department of Defense did voluntarily establish a program similar to the NSF program in 1981.

In addition, the Small Business Innovation Development Act (Public Law 97-219) imposes an additional mandatory program on Federal agencies in an effort to increase small business participation in Federal R&D contracts. Under that law, at least nine Federal agencies (with an extramural R&D budget in excess of $100 million) are required to set-aside a fixed, pre-determined portion of their extramural R&D Budget for funding agreements with small business. The bill will phase-in the set-aside program over four years (five for the Department of Defense) to a maximum rate of 1.25 percent of the agency's budget. It is estimated that as much as $1.3 billion could be made available for small business awards over the next five years.

In addition, the Act requires Federal agencies with R&D budgets in excess of $20 million to establish goals for small business funding which shall not be less than the amount spent with small business in the preceding fiscal year.

For a further discussion, see recommendation No. 11.

Recommendation No. 14

"Clarify the 'prudent man rule' to broaden it and insure that securities of small issuers are not excluded from those securities eligible for purchase by funds subject to ERISA and exempt those securities from planned asset regulation issued by the Department of Labor."

The adoption of the Employee Retirement Income Security Act of 1974 ("ERISA") has had a significant impact upon the investment of private pension assets in small business. Employee plan asset managers, who were uncertain about their responsibilities under ERISA's prudent person rule, adopted an extremely conservative investment strategy following passage of the Act. Small business access to pension funds was reduced as plans invested more heavily in blue chip securities.

In January 1977, the Small Business Administration Task Force on Venture and Equity Capital for Small Business expressed its concern that ERISA's fiduciary standards had isolated $200 billion in pension assets from all but blue chip and fixed income securities. The Task Force suggested

an amendment to the ERISA prudent person rule to clarify its application to the total portfolio of pension fund in vestments rather than to individual investments.

The Department of Labor published, effective July 23, 1979, a final rule interpreting the investment duties of a fiduciary under the prudent person rule. The regulation adopted the total portfolio approach to evaluating investments and expressly permitted investments in small business under certain circumstances:

". . . [T]he prudence of an investment decision should not be judged without regard to the role that the proposed investment or investment course of action plays within the overall plan portfolio. Thus, although securities issued by a small or new company may be a riskier investment than securities issued by a 'blue chip' company, the investment in the former company may be entirely proper under the Act's 'prudence' rule."

Although issuance of the prudence regulation represented an important development in reopening small business access to pension funds, a number of difficulties have remained. The Department of Labor has not defined the parameters of prudence with respect to investment in small business. The Department is also in the process of drafting a definition of the term "plan assets" to repropose for comment. The design of that regulation could have a serious impact on the degree to which pension funds may be a viable source for venture pools that invest in small business.

In August 1979, approximately one month following the effective date of the revised prudence regulations, the Department of Labor proposed a definition of the term "plan assets" under ERISA. Under the Department's proposal, there would have been a "look-through" of the interest held in a venture capital pool by an employee plan so that pool assets would have been deemed to be plan assets under ERISA.

On February 27-28, 1980, the Department of Labor held hearings in Washington on the plan asset regulation. The Department of Labor, on June 6, 1980, proposed for comment a revised definition of the term "plan assets." The proposed revision provides that if certain conditions are met, an investment in a venture capital pool by a plan would not be considered to be a delegation of investment management authority and the venture pool assets would not be considered to be plan assets.

The Department has not yet adopted the revised plan assets definition as it applies to venture capital firms.

Although legislation was introduced in 1977 and 1978 to revise and clarify the prudent person rule, it was not adopted. No proposals progressed in the 97th Congress that would legislatively address this recommendation.

In 1982, however, the Department of Labor issued ERISA regulations that provided class-wide exemptions from the prohibited transaction provisions for investments in certain residential mortgage investments and mortgage pools. However, these exemptions have apparently not opened up pension plans as expected.

Legislation has been introduced in the Senate (S. 2918) and the House (H.R. 6781) that, although not identical, would both eliminate legal and regulatory barriers against pension funds investing in residential mortgages.

Recommendation No. 15

"Institute specialized capital gains treatment for generative capital invested in technology based firms starting with 25 percent in the first year, decreasing by 5 percent per year to zero after five years, further, defer taxation on such gains whenever the proceeds from sale of investments is reinvested into a small business within the next twelve months."

The special capital gains treatment has not been proposed per se. However, Senators Long, Roth, Bentsen and Wallop introduced S. 899, which would have increased the capital gains deduction from 60 to 80 percent for funds invested in a small business. Under S. 889, a minimum level of employee stock ownership would have been required, as well as a minimum level of R&D expenditures. As for the rollover of capital gains for funds invested in small business is concerned, such a proposal was contained in S. 360. Senator Bentsen also sponsored similar legislation. These measures have failed to gain approval.

INFLATION

Recommendation No. 16

The delegates in the Inflation workshops mainly concentrated on measures that would benefit the nation as a whole. These involved restricting growth in the money supply to the same rate as increases in national productivity; reforms in minimum wage standards and the Social Security System; revision in Civil Service employment practices; and as many as seven different approaches to balancing the federal budget.

Recommendation No. 16

"Balance the Federal Budget by statute in Fiscal Year 1981 by limiting total Federal spending to a percentage of the GNP, commencing with 20 percent and declining to 15 Percent."

Both Houses of Congress have frequently debated various forms of balanced budget proposals. These proposals have been offered as Constitutional amendments, regular bills, and incorporated into Congressional budget resolutions. In fact, at least three provisions in law now require a balanced budget. For example, one provision incorporated into Public Law 95-435, The International Monetary Fund supplemental financing authority (October 10, 1978) states that, beginning with fiscal year 1981, the "total budget outlays of the Federal government shall not exceed its receipts". Additional provisions have been adopted in sections of Public Law 95-523, (Oct. 27, 1978, the "Full Employment and Balanced Growth Act of 1978", the so-called Humphrey-Hawkins bill), and Public Law 96-58 (April 2, 1979) a bill to temporarily increase the Federal debt limit. However, despite the statutory provisions mandating a balanced budget, the Federal budget has been in balance only once in the past 21 years.

On August 4, 1982, the Senate approved S.J. Res. 58, a joint resolution proposing a Constitutional Amendment requiring a balanced Federal budget except during times of war, or if 3/5 of each House of Congress vote specifically to "unbalance" the budget. This proposed Constitutional amendment provides that, for purposes of determining the "receipts" to the Federal government, total estimated receipts shall generally not increase by a rate of increase "greater than the rate of increase in national income".

However, on October 1, 1982, the House of Representatives failed to secure the necessary two-thirds majority to pass a Constitutional amendment (H.R. Res. 350). Furthermore, federal spending as a percentage of GNP was 22.5 percent in 1981. In 1982, the percentage was 23.5 percent.

Recommendation No. 17

"Reform the Social Security System by including, where constitutionally possible, all public and private sector employees as contributors and more closely tie benefits to contributions to move the system toward actuarial soundness. Limit benefits to the original old-age and survivors benefits. Freeze the tax base and tax rate at the January, 1980 level. Eliminate double dipping."

At this juncture, none of these recommendations have been acted on. The Greenspan Social Security Commission made its recommendations to help improve the Social Security System at the end of 1982. It is anticipated that the Commission may recommend that the retirement age be increased, scheduled payroll tax increases be moved up, and the coverage extended to some degree to government workers. Apparently, no efforts are being made to completely overhaul the system itself.

Recommendation No. 18

"Revise minimum wage standards by freezing standards at January, 1980 levels and establishing a two-tier minimum wage by exempting teenagers, seasonal workers and part-time workers."

With respect to that portion of the recommendations to freeze the minimum wage at 1980 levels, no action has been taken.

With respect to that portion of the recommendation to establish a two-tiered minimum wage for teens and other workers, several bills have been introduced in Congress, but no further legislative action has been taken. Hearings were held in the Senate Labor and Human Resources Committee in March 1981, on a sub-minimum wage for youth.

Recommendation No. 19

Repeal the Davis-Bacon Act

The Davis-Bacon Act of 1931 requires that, on all construction contracts in excess of $2,000 paid for in whole or in part with Federal funds, wages paid to workers must be equal to, or in excess of, the "prevailing" wages in the community in which the Federal construction is to be performed.

No final legislative action has been taken on this recommendation, although several amendments have been proposed to raise the dollar threshhold, or to exclude certain types of construction activity from the application of that Act.

Recommendation No. 20

"Provide greater incentives for savings and investment by eliminating income tax on investments and interest income up to $10,000."

Under Public Law 97-34, the Economic Recovery Tax Act (ERTA), the number of permitted shareholders while still retaining eligibility to be treated as a Subchapter S corporation was increased from 15 to 25. On October 19, 1982 the President signed the Congressionally-passed "Subchapter S Revision Act", Public Law 97-354. Among other things, the law increased the number of permitted shareholders from 25 to 35.

In addition, the Tax Equity Act (Public Law 97-248) eliminates distinctions in prior law between qualified pension and profit-sharing plans of regular corporations, and those of self-employed individuals and Subchapter S corporations. In particular, the Tax Equity Act creates a new distinction between pension plans that favor owners and

key employees ("top-heavy plans") and others.

Several legislative proposals have been introduced in the 97th Congress to further increase tax exemption of interest and dividend income.

Partial Dividend and Interest Exclusion

ERTA reinstates the $100 dividend exclusion of prior law for 1982 and subsequent years; however, the $100 per taxpayer limitation for the reinstated dividend exclusion is replaced by a limitation of $100 per separate return and $200 per joint return. Effective in 1985, ERTA provides for a 15 percent net interest exclusion on up to $3,000 of net interest. For those who itemize deductions, the interest is eligible for the percentage exclusion only to the extent it exceeds the taxpayers "qualified" interest expense.

Under the Tax Equity Act (Public Law 97-248), for amounts paid or credited after June 30, 1983, withholding of a flat 10 percent will be required on payments of interest and of dividends out of earnings and profits. Withholding is not required where the payments of interest total less than $150 on an annualized basis.

Tax Exempt Savings Certificates

ERTA provides a tax exemption for an aggregate of $1,000 for interest received on a qualified savings certificate (the "all savers" certificates issued between October 1, 1981 and December 31, 1982). Interest, other than from a certificate, will not be eligible for exclusion after 1982 and the dividend exclusion will be limited to $100.

Individual Retirement Accounts

Under ERTA, benefits under a qualified individual retirement plan are taxed only when paid to the employee or a beneficiary and are not taxed if merely made available. Under ERTA, amounts invested in "collectibles" under an IRA or a self-directed account in a qualified plan will be treated as distributions for income tax purposes, however.

Under ERTA, the proceeds of a redeemed U.S. retirement bond which is distributed under a qualified bond purchase plan may be rolled over, tax free, to an IRA. Bonds purchased for an employee may be redeemed only after the employee attains age 59½, dies, or becomes disabled. ERTA provides that a divorced spouse is allowed a deduction for contributions to a spousal IRA established by the individual's former spouse at least five years before the divorce if the former spouse contributed to the IRA under the spousal IRA rules for at least 3 of the 5 years preceding the divorce.

Self-Employed Retirement Savings (Keogh Plans)

The deduction limit for employer contribution is increased from $7,500 to $15,000. The 15 percent limit on contributions remains unchanged. The compensation taken into account in determining permitted annual benefit accruals is increased from $50,000-$100,000. Under ERTA, the compensation taken into account in determining permitted annual benefit accruals for Keogh or Subchapter S corporations is similarly increased from $100,000 to $200,000. ERTA also permits early withdrawals from a terminated Keogh plan by an owner-employee without regard to the 5-year ban on Keogh plan contributions for the owner employee.

In view of the efforts to eliminate the distinction between self-employed and corporate plans with regard to contributions and benefits effective in 1984, the Tax Equity Act repeals the $15,000 and the 15 percent limitations on deductions of contributions. The $200,000 limitation on compensation that may be taken into account under a self-employment plan is also repealed.

Employee Stock Ownership Plans (ESOPs)

ERTA terminated (after 1982) the previous investment-based tax credit for ESOP contributions and replaces it with a payroll-based tax credit which is allowed for wages paid in 1983-87. For 1983-84, the credit is limited to .5 percent of compensation paid to employees under the plan and to .75 percent of such compensation for 1985, 1986, and 1987.

VETERANS IN BUSINESS

Recommendation No. 21

The Small Business Act amendments of 1975 (Public Law 93-237) requires the SBA to give "special consideration" to veterans. It was felt, however, that few attempts have been made to help veterans start and own small businesses. The delegates emphasized that disabled veterans have the greatest need for assistance, followed by Vietnam veterans in general. They were also concerned about receiving more procurement contracts and including disabled and Vietnam Veterans in all rules and legislation that pertain to "socially and economically disadvantaged" groups.

Recommendation No. 21

"The President shall issue an Executive Order providing for the full and effective implementation of the provisions of the Small Business Act providing for 'special consideration' for veterans (Part 116, Subpart A of title 87, U.S. Code, Public Law 93-237); to assist in carrying out the veterans 'special consideration' provisions. Such executive order shall establish within the SBA an internal Veterans' Business Committee, the majority of whose members shall be veterans and whose purpose shall be to advise and assist the SBA in the development and implementation of programs and the formulation of policies necessary and appropriate to carry out the veterans 'special consideration' provisions of the Small Business Act and regulations pertaining thereto.

"Such Executive Order shall require all appropriate agencies and departments of the Federal Government which engage in business assistance activities, such as procurement authority to provide 'special consideration' to veterans in order to significantly improve the quality of assistance to veterans and to provide support to veteran-owned businesses."

No Executive Order has been issued.

Public Law 93-237, effective Jan. 2, 1974 provided "special considerations" for veterans in all Small Business Administration programs.

By regulation SBA's definition of "special considerations" includes:

1. In-depth management assistance conseling on first interviews;

2. Emphasizing to SBA personnel designated as Veterans Affairs Officers the need for close cooperation with the local V.A. offices and organizations having direct interest in veterans affairs;

3. Directing SBA procurement personnel designated as Veterans Procurement Affairs Advisors to emphasize how veterans can obtain procurement contracts from the Government;

4. Local media campaigns to inform the veterans about SBA's ability and desire to help;

5. Special workshops and training;

6. Prompt processing of loan applications of any type;

7. Particular attention to giving maximum loan maturity to veterans;

8. Loans would not be declined solely because of the lack of collateral provided the Veteran, dependent, or survivor will provide any worthwhile collateral;

9. On all direct loans, placing a liberal interpretation on present deferment policy;

10. In the awarding of 8(a) contracts, veterans' status may be a contributing factor in establishing eligibility as socially and economically disadvantaged; and

11. In all district offices there shall be one or more loan specialist designated as veterans loan officers.

However, these provisions were either not fully implemented or were ineffective. The purpose of this recommendation is to implement and make effective the provisions in Public Law 93-237.

In May, 1982, SBA announced that it was taking additional action. The agency announced that SBA will establish within the Office of the Chief Counsel for Advocacy, a Veterans Business Enterprise Office to work as an advocate on behalf of veterans.

In addition, new regulations will be issued to clarify and assure that veterans are provided "special consideration" within programs. Agency officials will review their programs and activities and propose any required regulations within 60 days.

The agency will also develop programs in management assistance and business training for veterans, and insure that veterans affairs officers will be appointed in each SBA regional and district office to give assistance to veterans.

On November 3, 1981, Public Law 97-72, the "Veterans' Health Care, Training and Small Business Loan Act of 1981" was enacted. Under the law, the Administrator of the Veterans' Administration is authorized to establish a program of small business loans and loan guarantees for certain service-connected disabled, and Vietnam-era veterans to enable these veterans to acquire, start, or expand a small business. Twenty-five million dollars was authorized for this program.

In the President's statement on signing this legislation, he noted that, "because this program might duplicate a similar program in the Small Business Administration and would involve the Veterans Administration in an area in which it has no expertise, I intend to weigh carefully any efforts to fund this program."

An amendment was offered in the House to the Veterans Administration's fiscal year 1883 appropriations act to fund this program at $25 million. The amendment was withdrawn after its sponsor (Congressman Daschle) received assurances that funds would be made available for a veterans direct loan program through the Small Business Administration. A $25 million direct loan program for veterans was provided to SBA for fiscal year 1983 as part of the omnibus Continuing Resolution (Public Law 97-377).

Recommendation No. 22

"The President should establish an Interagency Committee on veterans in business. Not more than one-third of such committee shall be nonveterans."

No action has been taken on this recommendation.

Recommendation No. 23

Fifteen percent of all Federal procurement contracts and 15 percent of all SBA

Direct and Guaranteed Loan Program Funds shall be set aside for veterans applicants. The SBA shall be responsible for utilizing the Procurement Automatic Selection System (PASS) and other Federal procurement source listing to implement veteran's set-asides.

This recommendation proposed two set-asides for veterans. With respect to the recommendation that 15 percent of all Federal procurement contracts be set aside, see the discussion for recommendation 37. Recommendations 6, 26 and 30 are similar.

With respect to the recommendation that 15 percent of all SBA direct and guaranteed loans be set aside, see the discussion for recommendation 21. According to information provided by the Small Business Administration, direct loans and loan guarantees to veterans were:

[In millions of dollars]

	Direct	Guaranteed
1980	23.7	370.6
1981	24.8	501.8
1982	16.7	NA

In fiscal year 1983, Congress provided $25 million in the Continuing Resolution solely to be used by SBA for direct loans to veterans. In the first quarter of 1983, SBA indicated that $2.1 million in direct loans were made to veterans. No figures were available for guaranteed loans.

The SBA PASS system is a voluntary service offered by SBA to any small business interested in taking advantage of it. To the extent veteran-owned businesses provided the agency with the information requested, PASS can be utilized by other agencies in identifying procurement opportunities for qualified veteran-owned small businesses.

Recommendation No. 24

"All legislation or regulations affording special treatment for women, minorities, the socially and economically disadvantaged or other special groups, should be amended to also provide priority for qualified veterans, including disabled veterans. Qualified veteran status alone shall entitle the veteran to equal treatment and inclusion in any such category or class."

No legislative action has been taken on this recommendation. For a discussion of similar issues, see recommendation 21.

Recommendation No. 25

"SBA regulations shall include all disabled and/or Vietnam veterans in their definition of 'socially and economically disadvantaged.' "

No action has been taken on this recommendation.

FEDERAL PROCUREMENT

Recommendations No. 26

According to the Small Business Act of 1953, small businesses are supposed to receive a "fair proportion" of contracts from the Government. Since then, the share of federal procurements to small businesses has fluctuated. It is felt that the small businesses do not receive enough procurements. The proposals made by the delegates are aimed at improving the Federal procurement system generally and increasing the number and dollar value of contracts allotted to small businesses.

The Federal Government is one of the nation's largest purchasers of goods and services. In fiscal year 1981, its procurement budget was estimated to be $110 billion, and included items ranging from routine office supplies to massive defense weapons systems. Small business is an active participant in every phase of Federal procurement. In fiscal year 1980, small firms were awarded Federal prime contracts of $21.5 billion, approximately 24 percent of the total contracts awarded to business firms. In addition, for fiscal year 1981, it is estimated that small businesses were subcontractors to "other than small business" on $11.2 billion in Department of Defense contracts, and $2.6 billion in civilian awards.

However, the preliminary estimates of small business participation in total Federal contracting shows a decline in the percentage of dollar awards over the past several years.

Recommendation No. 26

"The Federal Government shall be required by statute to contract out to small business those supplies and services that the private sector can provide. The government should not compete with the private sector by accomplishing these efforts with its own or non-profit personnel and facilities. Small business generally—50 percent which shall include the following: minority-owned businesses 15 percent; businesses owned by women 10 percent."

Competition with private industries by government agencies has been a source of increasing concern over the past few years. According to General Accounting Office (GAO) estimates, federal employees currently perform 11,000 commercial or industrial activities that could be done by private firms. These activities cost taxpayers nearly $19 billion last year. Consequently, private firms are finding themselves increasingly competing not only with each other, but with the government as well—at taxpayers' expense.

A 1979 Small Business Administration (SBA) Task Force Report estimated that federal in-house activities in 1977 numbered 21,130, at an annual operation cost of nearly $10 billion. According to this study, the best estimate was that at least $2 billion annually might flow directly to small business if that $10 billion were contracted out in approximately the same proportion as other activities previously being contracted out. The Task Force also estimated the potential average annual savings to the taxpayer at $2.98 billion.

The current federal procurement policy on contracting out was first set forth in 1955, when the Eisenhower Administration issued a directive that the government should not provide services that put it in competition with private industry.

That policy was reaffirmed during the Johnson Administration by Circular A-76, issued by the Bureau of the Budget, predecessor of the Office of Management and Budget (OMB) (the Circular is now referred to as OMB Circular A-76).

Circular A-76 reiterated the government's general policy of reliance of the private enterprise system to supply its needs. It established the rule that goods and services were to be acquired from the private sector whenever feasible; the exception was to undertake activities "in-house" using federal employees.

Circular A-76 established new criteria for continuing or terminating in-house activity. It further provided that a government commercial or industrial activity may be authorized to provide goods or services only under certain conditions.

Legislation has been introduced in the Senate (S.J. Res. 93) and the House (H.J. 294) that would reaffirm and codify in statute the policy principles of the OMB Circular A-76. Several hearings have been held on these proposals and on the issue of "contracting out". No action has been taken on those proposals.

However, over the past few years, OMB Circular A-76's policy of reliance on the private sector effectively has been undercut administratively and legislatively. Circumvention of this policy has been achieved through loose agency constructions of what is or is not a "governmental functions". Under OMB Circular A-76, purely "governmental function" are to be performed in-house. This exception to reliance on the private sector has provided agencies with "justification" for many of the activities performed by federal employees, despite the Administration's support for A-76 and its full implementation. Recently, several legislative provisions have been adopted to restrict or inhibit the government's reliance on the private sector. For example, the Department of Defense Authorization bill fiscal year 1983 (Public Law 97-252) places a six month moratorium (until April 1, 1983) of the use of funds to undertake the cost-benefit studies to determine whether certain functions could be completed more economically in the private sector. The bill also prohibits for one year any contracting out of firefighting or security guard functions at a military installation.

On September 29, 1982 the House passed the Uniform Services Pay Act (H.R. 7166). The bill sets six criteria for barring activities from being contracted out to civilians. The Defense Department may bar contracting out for an activity which:

Must be performed by military personnel because they are in a direct combat support role, or subject to deployment;

Must be performed by military personnel because it is essential for training in skills exclusively military in nature;

Must be performed by military personnel because it is needed to provide work assignments for a rotation base for overseas or sea duty assignments;

Is necessary to ensure readiness requirements, or necessary to ensure that combat-support units are self-sufficient;

Is deemed to adversely affect national defense; or

Is essential to safety or security on installations.

The bill requires that, in the analysis of any cost comparison, the cost to the Government of undertaking the cost comparison process shall be attributable among the costs of performance by private contractors. Similar legislation was reported to the Senate by the Senate Armed Services Committee (S. 2936). No final action was taken on these bills during the 97th Congress.

Furthermore, Congress has provided other statutory exceptions to the general policy enunciated in OMB Circular A-76. For example:

The Veteran's Compensation, Education and Employment Amendments of 1982 (Public Law 97-306) prohibits the Veterans' Administration from contracting out to the private sector for patient care or activities incident to patient care. In addition, the law prohibits contracting out to the private sector unless at least 15 percent savings in the cost of performance over a five year period would be achieved, using costs to the Veterans' Administration for in-house performance, and charging all costs for undertaking the cost-comparison study of con-

tract performance as part of the contractor's cost.

The fiscal year 1983 Treasury Postal Service Appropriations Act (Public Law 97-369) prohibits the General Services Administration from contracting out custodial and other building-related custodial and security services to the private sector.

For a discussion of that portion of the recommendation concerning minimum percentages, see recommendation 37 in particular. Recommendations 6, 12, 23 and 30 are similar.

Recommendation No. 27

"Procurement agencies should break down large requirements (including those for research and development) into smaller parts where feasible to permit solicitation from, and award to, small businesses."

"Break out" can occur in two primary ways in the Federal procurement process. Under a "component" break out, a contracting agency will endeavor to procure a portion of a larger systems acquisition used in the manufacture, modification or repair of an end item directly under prime contracts (as opposed to subcontractors to a single prime contractor). "Spare parts" break out occurs when a replacement part from a concern other than the original manufacturer of that part.

In 1969, the Department of Defense established a "High Dollar Spare Parts Breakout Program" to determine the best approach to providing spare parts for its equipment from other than the original manufacturer. In addition, in late 1979 the Small Business Administration initiated a pilot program to increase small business awards by adding "breakout" procurement center representatives at three Air Force Air Logistics Centers. According to a recent GAO report (PLRD 82-104, Aug. 2, 1982), SBA's efforts are making a contribution toward breaking out parts for competition, but opportunities exist to improve the effectiveness, and the number of activities, subject to "breakout".

However, all of the DoD activities are undertaken administratively. There is legislation pending in the Senate (S. 2446) that, in part, would amend the Small Business Act to establish a government-wide policy in support of component breakout. While hearings were held on this legislation in the Senate Small Business Committee on September 16, 1982, no further action has been taken on this bill.

Recommendation No. 28

"The Federal Government should contract out supplies and services to private industry (particularly small minority business) and should not compete with the private sector either through the use of its own personnel or through non-profit organization such as the Federal Research Centers, educational institutions or other non-profit entities."

This recommendation is similar to recommendation 26. For a discussion of this issue, see recommendation 26.

Recommendation No. 29

"The Office of Federal Procurement Policy should develop a new set of procurement regulations applicable to procurements under a special amount from all businesses. This 'second-tier' regulation should eliminate clauses, procedures, reporting requirements etc., applicable to large systems procurements which are currently imposed on small businesses, as well; and to the extent possible, apply to subcontracts with small businesses."

Present law already requires that all procurements under $10,000 shall be reserved exclusively for small business unless the contracting officer is unable to obtain offers from two or more responsible small business concerns. In addition, both the Department of Defense and the civilian agency's procurement regulations provide a "small purchase" procedure for the acquisition from commercial sources of supplies, non-personal services or construction. For civilian agencies, that threshold is $10,000.

In addition, Public Law 97-86, the "Department of Defense Authorization Act of 1982" (December 1, 1981) permanently increased the Department of Defense threshold for the utilization of the small purchase procedures from $10,000 to $25,000. That Act also (a) increased from the threshhold for certain required certifications under the "Truth in Negotiations Act" from its prior limit of $100,000 to $500,000 and (b) increased $100,000 to $5 million the threshold below which the Service Secretaries have the power to authorize negotiations of contracts for experimental, development or research work, or for making or furnishing property for experiment, test, development or research.

In Section 222 of Public Law 95-507 (Oct. 24, 1978) Congress statutorily directed the Office of Federal Procurement Policy to promulgate a single, simplified Federal procurement regulation. In addition, in Public Law 96-83 (Oct. 10, 1979) Congress extended the sunset date on the Office of Federal Procurement Policy, and directed that office to develop a uniform, comprehensive Federal procurement system. On February 17, 1982, in compliance with their legislative mandate, OFPP submitted its "Proposal For a Uniform Federal Procurement System" to both the House and Senate. Although hearings have been held in both Houses, no further legislative action has been taken as of October 1982.

On March 17, 1982, President Reagan issued an Executive Order (No. 12352), titled "Federal Procurement Reforms" to direct agencies to make their procurement efforts more effective. The President directed procurement agencies to:

1. Establish programs to eliminate unnecessary regulations paperwork;
2. Strengthen their review of internal procurement programs and resources;
3. Establish criteria to improve the effectiveness of procurement systems.
4. Establish criteria to enhance competition.
5. Establish programs to simplify small purchases and minimize paperwork burdens.
6. Establish administrative procedures to ensure that contractors receive timely payment.
7. Establish clear lines of contracting authority and accountability.
8. Establish career management programs.
9. Designate a Procurement Executive with full responsibility for the procurement system.

The President also directed the Secretary of Defense, Administrator of General Services, and Administrator of NASA to continue their joint efforts to consolidate their procurement regulations into one simplified Federal Acquisition Regulation (FAR) by the end of 1982. Final action on the FAR was not completed in 1982, and work will continue into 1983.

Recommendation No. 30

"Congress should adopt legislation establishing separate mandatory goals for all federal procurements and Federal funds or grants to states, localities, and public and private institutions on a contract-by-contract basis or agency-wide basis for small business (35 percent), minority-owned (Black, Hispanic, Native American, Asian Pacific American or other racial minorities) businesses (15 percent), and women in business (10 percent)."

For a discussion of this item, see recommendation 37 in particular. Recommendations 6, 23 and 30 are similar.

Recommendation No. 31

"The Federal Government should open public lands to energy exploration and production under regulations which provide reasonable environmental protection with: (a) a 30 percent small business set-aside; (b) fixed time limits for statutory environmental analysis; and (c) a 5-year limit on lease terms to encourage rapid development."

The Reagan Administration has repeatedly stressed its commitment to opening the public lands for greater energy development. The Bureau of Land Management has concentrated efforts on processing the backlog of non-competitive onshore lease applications. In July, 1982, Interior Secretary Watt announced a new 5 year plan for leasing the entire Outer Continental Shelf—nearly 1 billon acres—by 1987. The Interior Department has also moved to approve leases in designated wilderness areas, despite the strong protests of many Members of Congress.

No set-aside programs for small businesses have been implemented. Reducing the time and resources committed to environmental impact analysis has been a goal of the Interior Department, but some shortened analyses have been challenged on the grounds that they are inadequate and do not fulfill the requirements of the National Environmental Policy Act. Rather than promoting shorter lease terms to speed development, the Administration has advocated longer lease terms for some OCS leases and weakened diligence requirements for federal coal leases, arguing that the industry needs additional incentives to explore and develop their leases. The Administration has opposed legislation (S. 60) which would place a 5 year term on onshore oil and gas leases and require all competitive bidding for these leases.

Recommendation No. 32

"Government must use any new tax income from energy production and development for the future production and development of energy in the private sector, until the U.S. is energy self-sufficient. Small business should have tax exemptions and appropriate set-asides."

In 1980, the Congress enacted the Crude Oil Windfall Profits Tax Act. That law provides that the "profit" on any barrel of crude oil cannot exceed 90 percent of the net income attributable to such barrel. However, the revenue generated by that Act, up to the maximum revenue fixed in law to be derived from that Act reverts to the general Treasury, and is not targeted towards any energy production and development. In addition, Congress has established the Synthetic Fuels Corporation, and provided loan guarantee authority to assist in the identification and development of synthetic fuels. No substantial progress has been made in identifying plausible energy products with responsible sponsors, however. No specific small business tax exemptions or set-asides have been provided.

Recommendation No. 33

"The U.S. Government shall encourage the immediate expansion of nuclear and coal-powered electric generating capacity. Research efforts directed toward power technology should be expanded."

Several bills in related areas have progressed in the legislative process. For example, during the 97th Congress, the Senate had pending legislation, the "Nuclear Property Insurance Act" (S. 1606), which would establish a supplemental insurance fund administered by the Secretary of Energy to pay the costs of necessary remedial action following damage to nuclear power plants. However, the bill did not progress in the Senate, and no companion bill had been reported in the House. The Congress has passed the "Nuclear Waste Policy Act", Public Law 97-425 which would establish a national policy on the methods for, and disposal of, nuclear waste. In addition, the Senate Environment and Public Works Committee has reported legislation (S. 1206 and S. 304) providing for an extension of the authorization for the Clean Air Act. No further significant House or Senate action has taken place on this legislation.

Recommendation No. 34

"Congress should encourage substantial direct and investment tax credits for the implementation of all forms of conservation and alternative energy. Additionally, investments of up to $150,000 per year should be expensed."

No direct or investment tax credits have been adopted. While the 1981 Economic Recovery Tax Act does provide for a gradual increase over 5 years of a $5,000 direct expense provision (see recommendation 2) it is not targeted to conservation or developing alternative energy sources.

Recommendation No. 35

"Action should be taken to immediately remove price and allocation controls on crude oil and all petroleum products."

In 1981, President Reagan removed all Federal price and allocation controls from petroleum and petroleum products.

WOMEN IN BUSINESS

Recommendation No. 36

Women business owners feel that the traditional business community is not yet ready to treat them on an equal basis, and frequently find it extremely difficult to enter markets and obtain commercial loans, government contracts, and management assistance. Attempts have been made to aid women-in-business, such as the policy established by President Carter's Executive Order 12138, which is being implemented by an Interagency Committee on Women's Business Enterprise. After much deliberation, the delegates at the Conference chose to focus on credit, procurement, training, bonding, and the performance of federal employees on behalf of women business owners.

"Private lending institutions should be required to provide equal access to commercial credit for women in business. The Federal Reserve Board should establish record keeping requirements for commercial loans to women which will permit effective monitoring of performance under the Equal Credit Opportunity Act. The Small Business Administration should make bank certification available to as many commercial banks and other lenders as possible and establish targets for increasing the dollar volume of loans made to minority-owned and women-owned businesses, as one of the criteria for recertification."

This recommendation should be analyzed from the individual accomplishments of the three separate elements. With respect to the requirement that private lending institutions should be required to provide equal access to commercial credit for women in business, the Congress has enacted the Equal Credit Opportunity Act. The Federal Reserve Board has implemented the Act through "Regulation B" (12 CFR Part 202) which prohibits discrimination in any aspect of a credit transaction, including business credit, on the basis of race, color, religion, national origin, sex, or marital status. The regulation sets forth certain actions that creditors must follow with respect to applications they receive.

With respect to that part of the recommendation that the Federal Reserve Board establish record-keeping requirements for commercial loans to women, no such reporting has been instituted. Section 340(d) of the Housing and Community Development Act of 1980 required the Federal Financial Institutions Examination Council, in consultation with the Small Business Administration, to conduct a study to assess the feasibility of requiring depository institutions which make small business loans to compile and publicly disclose information regarding such loans.

In its May 7, 1981 report, the Council concluded that legislation to require depository institutions to disclose publicly information on loans to small businesses is not justified because the possible benefits would be substantially outweighed by the costs of the affected institutions.

On October 26, 198, the Federal Reserve Board published for comment proposed amendments to its "Regulation B" implementing the Equal Credit Opportunity Act. Among the proposed amendments to that regulation was a requirement that creditors give written notice of adverse business credit action to the business applicant and retain those records for 25 months. Although this proposal would have not been as extensive as the requirement to report loans made (as opposed to denied) it would have provided factual information on access to credit. On June 1, 1982, the Board published notice of its intent to withdraw this proposed amendment and on October 15, 1982, the amendment was withdrawn.

With respect to the extension of the bank certification program, in 1982, over 500 banks were participating in this program. Under the Bank Certification program, the Small Business Administration will rely to a greater degree on the detailed credit and other analyses of loan applications made by those financial institutions which meet SBA's criteria for certification under the program. SBA will still do a credit review (as opposed to a complete credit analysis) and, theoretically, SBA should be able to affix the Federal guarantee in a shorter period of time. In February, 1981, the General Accounting Office reported (CED 81-23) that while the program was generally successful in reducing the time for loan processing, many SBA internal controls were lacking. Since that report, several of the GAO recommendations have been addressed. However, funding fluctuations by SBA for the guaranteed program have occasionally undercut the concept of SBA's rapid approval of loan application.

Although the agency has encouraged lending to minority and women-owned businesses, no specific targets for such lending has been included in the BCP guidelines for either initial certification or for recertification.

For a similar issue, see recommendation 49(b).

Recommendation No. 37

"The President should initiate by Executive Order and Congress should enact legislation establishing mandatory goals and reporting requirements for all Federal procurements and procurements resulting from Federal funds and grants to states, localities and public and private institutions for small businesses on the basis of 50 percent for small businesses. The 50 percent shall be distributed so that 15 percent of all procurements shall be targeted for businesses owned by socially and economically disadvantaged persons (i.e., those businesses owned and operated by blacks, hispanics, native Americans, Asian Pacific Americans and other racial minorities), and 10 percent of all procurements shall be targeted for women-owned businesses as defined in Executive Order 12138. And further, that Congress should amend the Small Business Act to provide incentives to Federal prime contractors for subcontracting with women-owned businesses; provided however, that such an act does not included women-owned businesses as a category or class of socially and economically disadvantaged small business."

There are two major parts to this recommendation: (1) mandatory goals, and (2) reporting requirements. Although there has been legislation directed towards reporting requirements, there have been only four statutes pertaining to mandatory Federal procurement set-asides.

With respect to that portion of the recommendation relating to reporting requirements, Congress has provided several types of reporting requirements on small business participation in Federal contracting.

Section 15(g) of the Small Business Act, as added by Public Law 95-507, requires the head of each Federal agency, after consultation with SBA, to establish mutually acceptable goals for the participation by small business, and socially and economically disadvantaged small business.

Section 15(h) of the Small Business Act, as added by Public Law 95-507, requires the Administrator of the Small Business Administration, to annually obtain reports from each of these agencies on the actual extent of agencies' activities in meeting their procurement goals, and to report this information to Congress.

Finally, the "Small Business Economic Policy Act of 1980", Public Law 96-302, requires the President to annually submit a "Report on Small Business and Competition", and to include a report, by agency, on the total dollar value of all Federal contracts, and the dollar value (including subcontracts) over $10,000 awarded to small, minority-owned, and female-owned businesses.

With respect to the mandatory goals for procurement set-asides in 1977, Congress enacted the Public Works Employment Act of 1977 (Public Law 95-28) authorizing $4 billion for public works grants. One section of that law provided, in part, that:

"Except to the extent that the Secretary (of Commerce) determines otherwise, no grant shall be made . . . unless the applicant gives satisfactory assurance to the Secretary that at least 10 percentum of the amount of each grant shall be expended for minority business enterprises. (Section 103 (f)(2); 42 USC 6705 (f)(2))."

On July 2, 1980, the Supreme Court upheld the constitutionality of the Congres-

sional action in establishing the set-aside. *Fullilove* v. *Klutznick* 448 U.S. 448, 100 S.Ct. 2758 (1980).

In 1978, Congress adopted amendments to the Small Business Act (Public Law 95-507) which provided, in part, that under certain circumstances 100 percent of the contracts for goods and services under $10,000 shall be reserved exclusively for small business.

In 1982, Congress established a phased-in small business set-aside for research and development awards in selected agencies through the Small Business Innovation Development Act of 1982 (Public Law 97-219).

On January 6, 1983, the President signed into law the Surface Transportation Assistance Act of 1982 (Public Law 97-424). Section 105 (f) of that Act provides that:

"Except to the extent that the Secretary (of Transportation) determines otherwise, not less than ten percent of the amounts authorized to be appropriated under this Act shall be expended with small business concerns owned and controlled by socially and economically disadvantaged individuals. . . ."

This provision is similar to the amendment adopted as part of the Public Works Employment Act of 1977, and would require the allocation of that ten percent primarily by recipients of funds from the Federal Highway Administration and the Urban Mass Transportation Administration within the Department of Transportation. The provision would apply to the allocation of funds made to recipients in fiscal year 1983.

While Congress statutorily established in the Small Business Administration an 8(a) minority business development program to provide an opportunity for sole-source contracts to qualified minority businesses, there is no statutory goal for awards provided for this program.

Although there were no other statutory procurement set-asides adopted, several Presidential Executive Orders and memoranda have directed agencies to meet certain minimum dollar levels of contract support for minorities and women. On August 13, 1982, President Reagan urged agencies to increase their fiscal year 1982 procurement from minority business by 10 percent, over their fiscal year 1981 levels.

On December 17, 1982, the President released a statement on minority business, announcing steps to "promote an economic environment" for minority business growth. Among the specific steps outlined by the President in that statement were:

SBA and the Commerce Department's Minority Business Development Agency will directly assist in the formation of at least 60,000 minority businesses over the next ten years;

the Federal Government will procure an estimated $15 billion in goods and services from minority business during fiscal years 1983-1985, with actual procurement objectives set annually;

approximately $1.5 billion in credit assistance, and $300 million in management and technical assistance, will be made available over that 3 year period;

departments and agencies are directed to develop incentives to encourage greater minority business subcontracting by Federal prime contractors;

the Vice President's Task Force on Regulatory Reform is to explore opportunities for reducing regulatory and other barriers to small and minority business expansion; and

directing Federal contracting agencies to increase minority business procurement objectives for 1983 by at least 10 percent over 1982 actual procurements.

With respect to that portion of the recommendation dealing with incentives, Congress amended the Small Business Act (Public Law 95-507) to provide specific authorization for an incentive award to large business Federal prime contractors. Section 8(d)(4)(E) of the Small Business Act now provides:

"Notwithstanding any other provision of law, every Federal agency, in order to encourage subcontracting opportunities for small business concerns owned and controlled by the socially and economically disadvantaged individuals as defined in paragraph (3) of this subsection, is hereby authorized to provide such incentives as such Federal agency may deem appropriate in order to encourage such subcontracting opportunities as may be commensurate with the efficient and economical performance of the contract: *Provided*, that, this subparagraph shall apply only to contracts let pursuant to the negotiated method of procurement.".

The conference delegates adopted similar recommendations in 6, 26 and 30.

Recommendation No. 38

"The Small Business Administration should identify existing public and private management training programs, evaluate their effectiveness for women entrepreneurs and increase funding to those found to be effective."

SBA has a diversified program of Management Assistance which offers business management courses, conferences, workshops, and clinics for people who are considering going into business, for new business owners, and for more experienced business owners who wish to update their skills, enlarge their operations, or enter new fields. These are frequently cosponsored with local Chambers of Commerce, banks and other lending agencies, universities, and colleges. Speakers are drawn from the business leadership of the community, the Service Corps of Retired Executives (SCORE), the Active Corps of Executives (ACE), SBA personnel, and counsellors at SBA-sponsored Small Business Development Centers. Attendance has always been open to both men and women.

In fiscal year 1982, the Office of Woman Business Enterprise had $1.3 million (of which $600,000 was for salaries and expenses). In fiscal year 1983, the budget request was for $1.1 million.

In a study, the General Accounting Office concluded that SBA had not determined whether existing Federal business assistance programs can meet the needs of women entrepreneurs. Rather GAO argued that SBA has concentrated on "conceptualizing" new programs for women. In 1982, the Office of Women Business Enterprise was moved from within the Office of Advocacy to the Office of Special Programs. The agency has been reviewing programs to determine their applicability to providing assistance to women business owners. In addition to funding directly from the Office of Women Business Enterprise, considerable resources and training are made available through SBA's regular management assistance programs.

Recommendation No. 39

"Evaluate all Federal government employees in positions which impact on women and minorities, particularly loan officers, procurement officers and management assistance officers, in part on the basis of their performance on behalf of women and minorities."

No action has taken on this recommendation.

Recommendation No. 40

"The Small Business Administration shall establish a bonding program that permits the waiver of bonding requirements for Federal contractors who are small business owners. This program shall be available to all small business owners who have been: (1) unable to obtain bonding from any other source; (2) certified as competent by the SBA."

Under current law, the Federal Government requires all construction contractors who perform work on Federal projects in excess of $25,000 to be bonded. SBA has statutory authority to assist such contractors by extending a guarantee to a surety bond company of up to 90 percent of the face value of a bond required by a small business, up to a maximum of $1 million. Guarantees may be issued on bid, performance, or payment bonds. Surety companies eligible to receive SBA's guarantees must be included in the U.S. Treasury's list of qualified sureties.

Under legislation enacted in 1978 (Public Law 95-507), the Small Business Administration was given two-year authority to waive Federal bonding requirements for start-up small business if they met four specific statutory requirements. The program was then extended for one additional year (until September 30, 1981, by Public Law 96-481). However, no bonds were waived during that time, in part because of the agency's delay in getting implementing regulations in place and in part because of the rigid statutory requirements.

In the 97th Congress, the House passed legislation (H.R. 4500) which would extend this program through fiscal year 1983. In addition, the House included a similar bond waiver program extension as part of more comprehensive amendments to a Senate-passed bill relating to the publication of procurement notices in the Commerce Business Daily. No further action was taken on the legislation in the 97th Congress.

GOVERNMENT REGULATIONS AND PAPERWORK

Recommendation No. 41

When small business people talk about wanting less government interference, the area that they emphasize most is regulations and paperwork. Rules and forms have become such a headache even to government itself that hundreds of proposals have emerged to cut back the workload. Steps have been taken by individual agencies to improve the situation, but the delegates' chief interest was making government more sensitive to the impact of regulations on small businesses. The main themes in the workshops concerned better management and oversight of regulatory agencies, thorough-going economic analysis of the effect of regulations, and ways to add flexibility to regulations, and reporting requirements for small businesses.

The Regulatory Flexibility Act is addressed to these very same concerns.

"Congress shall exercise its oversight function with the assistance of the General Accounting Office, instituting sunset review of all laws, regulations, and agencies, to ensure that none exceeds original congressional intent. Sunset reviews, in an appropriate time frame (not less than every five years) should include economic impact analysis and proposed agency budget reductions,

leading to re-enactment of each agency's enabling legislation to permit its continued existence, or to reduce its size and cost.

"(a) Establish a Regulatory Review Board composed of representatives from the Executive Branch, Congress and small business owners, with responsibility for impact statements and cost controls.

"(b) Congress shall exercise line-item veto over regulations within a specified time through congressional oversight committees, with one-house floor vote."

With respect to the periodic review of agency rules, under Public Law 96-354 the "Regulatory Flexibility Act", Congress directed that all agencies establish a plan which provides for the review of all agency existing rules within ten years of that date and for the review of such rules adopted after the effective date of this law within ten years of the publication of such rules as the final rule.

However, this requirement applies only to the termination of rules, and does not refer to laws or agencies. In the implementation of this requirement, each year, each agency publishes in the Federal Register a list of the rules which have a significant economic impact on a substantial number of smaller entities, which are to be reviewed during the succeeding twelve months. The list includes a brief description of each rule and the need for and the legal basis of such rules and invites public comment upon the rule.

Congress has periodically considered both comprehensive and specific "sunset" legislation. Sunset reviews provide for the establishment of a fixed schedule for legislative review and reauthorization of programs, under the threat of automatic termination if no reauthorization is enacted. Since 1976, roughly 32 states have passed their own version of sunset laws.

Most of the Congressional "sunset" measures call for legislative program review based on requirements of clear statements of program goals in new authorizing legislation and detailed reporting requirements to provide measures of program performance. Although legislation providing for the automatic "sunset" of certain programs and agencies is common, no comprehensive proposal applicable generally has been enacted.

In addition to legislating the sunset of an entire program or agency by a certain date, Congress retains the annual authorization and appropriations process of funding as a check of an agency's compliance with its statutory mandate.

In addition, President Reagan has issued an Executive Order (No. 12291, Feb. 17, 1981) with the stated purpose of, among other things, increasing agency accountability for regulatory actions. The Order has both substantive provisions (such as prohibiting regulations if the potential benefits exceed its potential cost, and that agencies take into account how particular industries would be affected) and procedural provisions (such as requiring agencies to forward to OMB for clearance all proposed and final rules as well as all regulatory analyses before such documents are published). This order is more detailed than similar Executive Orders issued by President Carter (E.O. 12044) or President Ford (E.O. 11821).

Sunrise Legislation

In regard to the phrase in the recommendation to ". . . ensure that none exceeds original congressional intent", sunrise legislation would require a statement of specific program objectives and planned annual accomplishments in all legislation establishing budget authority or tax expenditures. This would provide a clear standard by which to evaluate programs. This could require congressional reviews on a 5-year cycle by limiting authorizations to five years' duration. The "sunrise review" would enable policy makers to revise programs to better suit shifting needs.

Legislative Veto

With respect to the legislative veto portion of the recommendation, Congress has repeatedly considered, and adopted, a variety of legislative veto provisions for agency rules. Some legislative veto proposals authorize simple or concurrent resolutions to block an agency's authority to adopt a particular rule without the enactment of legislation which requires the President's signature. Other provisions, by contrast, require action by both Houses and approval by the President. The legislative veto is essentially a negative act because it allows one or both Houses of Congress to say that it doesn't like what an agency is doing, but it doesn't necessarily insure that Congress will provide any more clear directions of what appropriate course of action the agency should take. The constitutionality of one form of legislative veto is under consideration and review of the Supreme Court.

Beyond the individual, and scattered legislative veto provisions enacted in various laws; Congress has for several years considered comprehensive regulatory reform legislation. On March 24, 1982, the Senate passed S. 1080, the "Regulatory Reform Act". Among the provisions of that bill was the adoption of a statutory, Government-wide mechanism for Congressional review of major rules promulgated by agencies. Each agency is required to inform both Houses of Congress and their appropriate Committees of the publication of any proposed or final major rules. Thus, the Congress will have advance notice and will be able to determine whether the agency has acted within its bounds and in keeping with the intent of the statute the agency seeks to implement through these rules.

Similar regulatory reform legislation was pending in the House (H.R. 746, Sept. 1982), although the reported version of the House bill does not have as strong a legislative veto provision as the Senate-passed bill.

For a further discussion of similar recommendations, see recommendations 45 and 46.

Recommendation No. 42

"Small Business should be eligible for magistrate review of agency civil penalties and reimbursed for court costs, reasonable attorney's fees, and damages from administrative action, if successful in civil disputes with the Federal Government, including IRS.

"(a) Such costs and fees to come from the operating budget of the agency.

"(b) Magistrates will be appointed and be responsible to the judges in each Federal Judicial District.

"(c) With burden of proof on the agency to defend its action."

Congress found that many small businesses were deterred from seeking review of, or defending against unreasonable governmental action because of the expense involved. The Equal Access to Justice Act is designed to diminish this deterrent effect by providing in specified situations an award of attorney's fees, expert witness fees and other costs against the U.S.

The Equal Access to Justice Act, enacted in 1980 (Public Law 96-481), provides for the reimbursement of attorney's fees for qualified "parties in both regulatory and court proceedings."

With respect to agency administrative proceedings, the Act provides that "an agency that conducts an adversary adjudication shall award, to a prevailing party other than the U.S., fees and other expenses incurred by that party in connection with that proceeding, unless the adjudicative officer of the agency finds that the position of the agency as a party to the proceeding, was substantially justified or that special circumstances make an award unjust."

To be eligible for such fees, a party seeking an award of fees and other expenses shall, within thirty days of a final disposition in the adversary adjudication, submit to the agency an application which shows that the party is a prevailing party and is eligible to receive an award, the amount sought, including an itemized statement from any attorney, agent, or expert witness representing or appearing in behalf of the party stating the actual time expended and the rate at which fees and other expenses were computed. The party shall also allege that the position of the agency was not "substantially justified."

The adjudicative officer of the agency may reduce the amount to be awarded, or deny an award, to the extent that the party during the course of the proceedings engaged in conduct which unduly and unreasonably protracted the final resolution of the matter in controversy. (The decision of the adjudicative officer of the agency shall be made a part of the record containing the final decision of the agency and shall include written findings and conclusions and the reason for it.)

With respect to civil proceedings in Federal court, and, unless expressly prohibited by statute, a court may award reasonable fees and expenses of attorneys, in addition to the other costs which may be awarded. The U.S. is liable for such fees and expenses to the same extent that any other party is liable under the common law or under the terms of any statute which specifically provides for such an award.

Fees are to be paid by the agency out of its operating budget over which the party prevails or may be paid in the same manner as the payment of other court final judgments from Congressionally appropriated general judgments fund.

The authority to pay attorneys fees expires automatically on October 1, 1984 unless extended affirmatively by Congress.

Until recently, there was a question about the applicability of the Equal Access to Justice Act to litigation involving tax matters. While it was clear that attorney fees could be awarded if the matter of tax liability was litigated in any United States District Court, a taxpayer had to meet certain procedural steps before being able to sue in Federal district court. In addition, the Equal Access to Justice Act was not applicable to litigation in the U.S. Tax Court.

The 1982 Tax Equity and Fiscal Responsibility Act (Public Law 97-248, approved September 3, 1982) made important changes in permitting the award of attorneys fees in dealing with the IRS. Among the changes the 1982 Act made include:

Permitting fees and costs to be awarded in any Court (including the Tax Court) for any civil action or proceeding for the determination, collection or refund of any tax, penalty or interest.

Attorneys fees are not limited to any hourly fee (under the Equal Access to Justice Act there is a $75 hourly fee for attor-

neys), but there is a ceiling of $25,000 on the recovery of all fees, costs and expenses for each proceeding (whereas the Equal Access statute has no ceiling on recoveries approved by the court).

In order to prevail in any civil proceeding involving the determination, collection or refund of any tax, the "prevailing party" must show that the position of the United States was "unreasonable". Under the Equal Access to Justice Act (which until amended by this statute would govern tax matters litigated in Federal District Court) the standard that has to be met is a lesser one of "substantially justified".

With respect to the burden of proof, in tax cases under this law the burden of showing that the IRS position is "unreasonable" rests with the taxpayer. Under the Equal Access to Justice Act, the burden rests with the agency to show justification for its action.

These provisions will be effective for civil actions and proceedings commenced after February 28, 1983, and is automatically terminated with respect to any proceeding commenced after December 31, 1985.

Recommendation No. 43

"The Office of Management and Budget should be designated the lead agency for both Federal regulations and paperwork of all agencies and programs (specifically including IRS), with responsibility for forms clearance, paperwork reduction, simplification and elimination, coordinating regulations and cost controls oversight; requiring agencies to submit to OMB an economic analysis measuring administrative and compliance costs, particularly for small business, of all proposed regulations and paperwork."

In 1980, to address the growing "paperwork burden," Congress enacted Public Law 96-511 the "Paperwork Reduction Act of 1980."

Among the purposes of the Act are:

(1) To minimize the Federal paperwork burden for individuals, small businesses, state and local governments, and other persons;

(2) to minimize the cost to the Federal government of collecting, maintaining, using and disseminating information;

(3) to maximize the usefulness of information collected by the Federal government;

(4) to coordinate, integrate, and, to the extent practicable and appropriate, make uniform Federal information policies and practices;

(5) to ensure that automatic data processing and telecommunications technologies are acquired and used by the Federal government in a manner which improves service delivery and program management, increases productivity, reduces waste and fraud, and wherever practicable and appropriate, reduces the information processing burden for the Federal government and for persons who provide information to the Federal government; and

(6) to ensure that the collection, maintenance and dissemination of information by the Federal government is consistent with applicable laws relating to confidentiality, including the Privacy Act.

To carry out this law, the Office of Information and Regulatory Affairs (OIRA) has been created within the Office of Management and Budget.

OIRA, through the Director of the Office of Management and Budget, is charged with the responsiblity of providing an affirmative clearance of agencies' request for information from the public. No request for information may be valid for more than three years. In addition, OIRA is responsible for insuring that agencies conduct periodic reviews of Federal information activities. Finally, as an "enforcement" mechanism on the agencies, and as a precaution for the public, the Act contains a "public protection" section that makes clear that, unless a request for information contains an OMB-assigned control number, the form or request for information can be ignored.

The Paperwork Reduction Act became effective on April 1, 1981. The earliest priorities established by OMB were to set in place the organizational structure and processes.

During the first eleven months that the act was in effect (April 1981-March 1982) OMB reviewed 4,767 agency requests for approval of information. It denied 480 requests, including 18 that were deemed duplicative of other agency information collection efforts.

Another aspect of the Paperwork Reduction Act is the requirement that existing Federal paperwork be cut by a total of 25 percent over three years. OMB estimated that the total Federal paperwork "burden" in fiscal year 1980 was 1.5 billion "respondent hours". In the 1980-1982 period, that has been reduced by almost 250 million hours, for a 16.7 percent reduction.

While the Paperwork Reduction Act has been working reasonably well (particularly in its mandatory clearance through OMB) the IRS has unilaterally taken the position that its regulations which have already been issued are not subject to the clearance process. OMB believes it has such authority. The Administration has been seeking an internal solution to the agencies' disagreements, but as of December 1982, no agreement has been reached.

Recommendation No. 44

"All Federal agencies should have the power to implement a tiered system of regulation. This should include the power to minimize and exempt small business from various regulations and reporting requirements as well. All new regulations should be designed to take into account the size and nature of the regulated business. All present regulations should be reviewed to see if they are still required."

This recommendation has been enacted through the Regulatory Flexibility Act, Public Law 96-354. For a further discussion of this issue, see recommendations 41, 45 and 46.

Recommendation No. 45

"When developing rules, forms, and guidelines, regulatory agencies must consult with small business representatives from affected industries and advocates assigned to each agency.

"(a) Consult SBA Office of Advocacy and small business trade associations who should be given sufficient authority and time (90-180 days) prior to publication of notice of proposed rulemaking) to influence regulators if a proposed rule and/or form would have an impact on small business.

"(b) Such proposed rules should reflect less formal administrative procedures for small business.

"(c) Agencies make available timely information and assistance, within 30 days in writing."

Under Public Law 96-354, the Regulatory Flexibility Act, the agency promulgating any rule that is determined to have a significant impact on small entities must assure that small entities are given the opportunity to participate in the rule-making.

When an agency is required to published general notice of proposed rulemaking for any proposed rule, it must prepare and make available an initial regulatory flexibility analysis. This is published in the Federal Register at the time of the publication of the general notice. The agency must also transmit a copy of the initial regulatory flexibility analysis to the Chief Counsel for Advocacy of the SBA. When an agency promulgates a final rule, it shall also prepare a final regulatory flexibility analysis. Copies of this analysis are made available to the public and the Office of Advocacy and published in the Federal Register at the time that the final rule is published.

For a further discussion, see recommendations No. 41 and 46.

ECONOMIC POLICY AND GOVERNMENT PROGRAMS

Recommendation No. 46

In previous years, small business has not participated actively in policy making. Their views have not been made known in national policy making circles. The delegates at the Conference expressed that concern and made some constructive suggestions for federal action. they focused on strengthening the SBA's Office of Advocacy, elevating the SBA to higher levels within the federal hierarchy, and getting small business advocates assigned to federal agencies.

"Require that all government agencies which develop fiscal, monetary, legislative and regulatory policies/practices shall submit small business 'economic impact' statements that require the regulatory agencies to identify the anticipated benefits and to justify the costs of Federal regulatory requirements to small business. In addition, all regulatory policies shall be subject to sunset provisions to be reviewed every 5 years in order to insure that only cost effective regulations shall be maintained and retained in the future."

In enacting Public Law 96-354, the Regulatory Flexibility Act, Congress directed the agencies to take certain actions. In October and April of each year, each agency must publish in the Federal Register a regulatory flexibility agenda, including a description of the subject area of any rule which the agency expects to propose which is likely to have a significant economic impact on a substantial number of small entities.

In the preparation of any rule, an agency must undertake an initial regulatory flexibility analysis to determine the potential impact of the proposed rule on small entities. Each initial regulatory flexibility analysis shall also contain a description of any significant alternatives to the proposed rule which minimizes any significant economic impact of the proposed rule on small entities. This requirement is also included in the analysis that the agency must make before publishing a final rule.

In reviewing rules to minimize any significant economic impact of the rule on a substantial number of small entities in a manner consistent with the stated objectives of applicable statutes, the agency shall consider the following factors:

(1) The continued need for the rule;

(2) The nature of complaints or comments received concerning the rule from the public;

(3) The complexity of the rule;

(4) The extent to which the rule overlaps, duplicates or conflicts with other Federal rules, and, to the extent feasible, with state and local governmental rules;

(5) The length of time since the rule has been evaluated or the degree to which tech-

nology, economic conditions, or other factors have changed in the area affected by the rule.

Each year each agency shall publish in the Federal Register a list of rules that have a significant economic impact on small entities which are to be reviewed during the succeeding 12 months.

However, this statutory requirement is applicable to regulations only, and does not apply to fiscal monetary or legislative policies.

In addition, the Act mandates a review of all existing regulations within ten years after the enactment of the Regulatory Flexibility Act, and within ten years after the promulgation of any new rule adopted after the date of enactment. In the President's first Report to Congress on the State of Small Business (March, 1982) the President indicated that he intends to direct agencies to accelerate that review from ten years to five years. As of December 1982, however, no such directive had been issued.

For a further discussion, see recommendations 41 and 45.

Recommendation No. 47

"The Office of Advocacy must be maintained, reinforced and expanded so that activity be not less than 5% of the SBA salary and expense budget. The legislative mission of Advocacy must be considered the number one priority of SBA and the Office of Advocacy. The independence of that function of the Office of Advocacy must be protected so that it may continue to have the confidence of the small business community. SBA's Advocacy budget should be devoted to economic research and analysis, as well as small business advocacy. Small business advocates, under the direct supervision of the SBA Office of Advocacy, shall be assigned to OMB, Federal Reserve Board, Treasury, International Trade Policy Committee and other regulatory agencies."

The Office of Advocacy is responsible for the development and implementaiton of a Small Business Administration Advocacy program, including the representation of small business interests, the analysis of the effects of federal laws, regulation and activity on small business, the development and utilization of a small business data base to aid in this analysis, and liaison with small business and small business organizations, and the public.

The office, headed by a Presidentially appointed, and Senate confirmed Chief Counsel, has specific statutory authority in the legislation creating the Office to present the views of the Office directly to the Congress. In addition, several other recent statutes have given the Chief Counsel specific functional requirements, including reporting directly to Congress. There has been no legislative action that would diminish the Office's independence.

In fiscal year 1983, the budget request for the Office (including salaries and funds for all research) was $5.6 million, or approximately 2.5 percent of SBA's total non-disaster assistance salaries and expenses.

With respect to that portion of the recommendation concerning small business advocates, no other agency has advocates under the supervision of the Chief Counsel. SBA's regional offices each have a regional advocate that reports to the Chief Counsel. For a similar issue, see recommendation 49.

Recommendation No. 48

"The merger and acquisition anti-trust laws should be amended to: (1) inhibit monopoly and conglomerate growth of giant companies, provided safeguards are built in to protect the needs of small business; (2) prohibit dual distribution that adversely affects wholesalers, distributors, dealers, retailers, and franchises; and (3) prevent the termination or non-renewal of wholesalers, distributors, dealers, retailers and franchises without good legal cause."

With respect to the recommendations to amend laws to inhibit monopoly and conglomerate growth, although several bills have been introduced in both the House and Senate to prohibit mergers between and among companies which exceed a certain "size", no significant action has been taken on them.

The 1982 Tax Equity Act (Public Law 97-348) made changes in the tax laws relating to mergers and acquisitions. Under the new law, the partial liquidation provisions of prior laws are repealed with respect to distributions made to corporate shareholders. Such distributions will be treated as dividends unless one of the prior law exchange provisions is met. Distributions in redemption of stock made to noncorporate shareholders resulting from a partial liquidation (as defined under prior law) will still qualify for capital gain treatment under revised redemption rules. These changes are generally effective for distributions after August 31, 1982. The new tax law repeals most of the exceptions to the general rule that a corporation must recognize gain on a distribution of appreciated property in redemption of its stock, but does add new exceptions. The result of these changes is that a distributing corporation can no longer be assured of nonrecognition on an in-kind distribution.

Under the new provision, a corporate purchaser has 75 days, after a qualifying acquisition of 80 percent or more of the stock of an acquired corporation, to elect to treat the acquired corporation as if it had sold all of its assets in a complete liquidation generally resulting in nonrecognition on the date of the stock purchase. Once the election is made, the acquired corporation's tax attributes are terminated and the basis of its assets are adjusted, as of the stock acquisition date, to reflect the price paid for the stock.

Under the new law, where stock of one corporation is transferred to a second "controlled" corporation and, as part of the consideration for the transfer, the second corporation either assumes a liability or distributes stock (other than common stock) or property, for purposes of certain anti-bailout provisions, earnings and profits of the first corporation are attributed to the second corporation.

With respect to the prohibition on dual distribution, the Robinson-Patman Act already generally prohibits such action. In the 97th Congress, several committees in both the House and Senate, including both Small Business Committees, have held hearings on the Reagan Administration's enforcement of the antitrust laws.

With respect to the prevention of terminations, only two legislative proposals have been provided at the Federal level. In 1978, Congress enacted the Petroleum Marketing Practices Act (Public Law 95-297). Under that law, gasoline dealers are provided a statutory scheme that establishes procedures governing the termination or non-renewal of these dealer/franchisers.

In addition, in 1978, the Federal Trade Commission adopted "Disclosure Requirements and Prohibitions Concerning Franchising and Business Opportunity Ventures (16 CFR Part 436). The rule addresses the problems of nondisclosure and misrepresentation which arises when prospective franchisees purchase franchises. The rule requires disclosure of important facts about the franchise relationship, including terms relating to the termination, cancellation and renewal of the franchise agreement. The rule does not regulate the substantive terms of the franchise relationship, however.

In 1980, Congress enacted the Soft Drink Interbrand Competition Act (Public Law 96-308). Basically, this law permits soft drink bottlers to operate under clearly-defined territorial restraints against intrabrand competition without creating a violation of the antitrust laws.

During 1981 and 1982, Congress considered, but did not approve, the Retail Dealers Agreement Act (S. 1256; H.R. 7106). The bill would make it illegal for a manufacturer to fraudulently induce a dealer to enter into an agreement, to not act in good faith in terminating an agreement, and to fail to provide sixty days notice to existing dealers before appointing a new dealer in the same area. Hearings have been held on this proposal, and the Senate Commerce Committee favorably reported the proposal. No further Congressional action has been taken on the bill.

In addition, both the House and Senate considered the "Small Business Motor Fuels Marketer Preservation Act". In the Senate, this bill (S. 326) which was reported favorably by the Senate Judiciary Committee, is designed to promote the viability of small business engaged in gasoline marketing by eliminating direct competition from the major refiners.

Recommendation No. 49

"The SBA should be directed to implement the following changes:

"(a) The duties of the Administrator of the SBA shall include the additional function of chairing a new group, within the Executive Branch, to be known as the 'Economic Policy Planning Committee for Small Business' to advise the President of small business matters. The new committee shall consist of the following: high level representatives of the Department of Commerce, Treasury, and Council of Economic Advisors.

"(b) The SBA Bank Certification Program should be expanded so that the SBA can devote more of its resources in terms of personnel and funding to small business advocacy.

"(c) The Office of Advocacy must be maintained, reinforced and expanded so that activity be not less that 5 percent of the SBA salary and expense budget. The independence of the function of the Office of Advocacy must be protected so that it may continue to have the confidence of the small business community. Small Business Advocates should be assigned to OMB, the Federal Reserve Board, the Treasury Department, and regulatory agencies, under general guidelines from the Office of Advocacy of the SBA."

With respect to subsection (a) of this recommendation, no action has been taken. One resolution has been introducted in the Senate (S. Con. Res. 91) and the House (H. Con. Res. 332) that expressed the sense of the Congress that the President invite the Administrator of the Small Business Administration to participate fully in the meetings of the Cabinet Council on Economic Affairs. No action has been taken on these proposals.

With respect to subsection (b) of this recommendation see the discussion in recommendation 36.

With respect to subsection (c) of this recommendation, see the discussion in recommendation 47.

Recommendation No. 50

"Small business representation in economic and regulatory decision-making should be increased. This should include, but not be restricted to the following steps by the President:

"1. Seek the counsel of the SBA Administrator and representative small business executives in developing policy.

"2. Appoint a small business executive as a senior advisor on the White House Domestic Policy Staff.

"3. Direct that small business advocates be assigned to the OMB, FRB, Treasury Department and regulatory agencies, under general guidelines from the Office of Advocacy at the SBA.

"4. Appoint small business persons to all national boards, commissions and advisory committees whose work impacts on small business."

This recommendation provides suggestions on actions that the President should take to increase small business representation. This recommendation is similar to recommendation 49 which focuses on the Small Business Administration.

With respect to subsection (1) of the recommendation, no formal process has been established by the President. Of course, a consultation process with SBA and small business groups on an ad-hoc basis as issues warrant has occurred.

With respect to subsection (2) of this recommendation, although there is not a small business "executive" per se on the White House staff, the President has a Special Assistant for business within the Office of Public Liaison who serves as a contact for small business.

With respect to subsection (3) of this recommendation, no action has been taken. This portion of the recommendation has also been incorporated in recommendation 47.

With respect to subsection (4) of this recommendation, no specific action has been taken. However, small business representatives have been made members of advisory committees in agencies other that SBA on matters dealing with small business issues.

INTERNATIONAL TRADE

Recommendation No. 51

This issue received limited attention at the Conference because most delegates were unfamiliar with export opportunities. Increasing small business potential for contributing to exports, however, is a major source for reversing the U.S. trade balance.

At the Conference, delegates concerned about international trade discussed a wide variety of measures, from ways to focus national policy to specific tax incentives to stimulate small business trade in foreign markets. Their final recommendations focused on tax measures, better loan and educational programs, greater use of trade exhibits, and a more organized government approach to export programs.

Recommendation No. 51

"Congress should broaden the tax deferral options of the Domestic International Sales Corporation and provide for the development of an American Trading Company which would automatically qualify as a DISC. Tax deferral options should include the following additional provisions for DISCs: (1) allow for deduction of twice the monies expended for participation in any bona fide overseas trade fair by a DISC; (2) allow for deduction of twice the amount of premiums paid to Eximbank and FCIA, as legal deductions prior to payment of DISC taxes; (3) increase the $100,000 exemption clause to $500,000; (4) provide for a graduated tax on 'deemed distribution' from $500,000 for $50 million, and a standard rate of 50 percent levied on over $50 million; (5) exempt new DISCs from any 'deemed distribution' requirement for at least the first three years of operation; and (6) provide for the elimination of existing incremental provision of DISC regulations. Congress should provide within the tax structure an 'Exporter's Allowance' or tax deduction which would apply in the trade of all goods abroad by granting an allowance for 75 percent of the marketing expenditures incurred by the exporter."

A Domestic International Sales Corporation does not pay the U.S. tax, and its shareholders escape current tax on a portion of its earnings because only 50 percent of those earnings are deemed distributed to them each year. After figuring the DISC's taxable income, certain items taxed to shareholders under other provisions are subtracted from that income. Under the Code, 50 percent of the remainder is a deemed dividend distribution, which is taxable to the shareholder.

No action has been taken on the specific tax recommendations relating to DISC. In fact under the Tax Equity Act (Public Law 97-248), the "deemed distribution" is increased to 57½ percent. Furthermore, the Act characterized the tax "benefit" (either the 50 percent), or after tax year 1982 the 42½ percent) as a preference item for purpose of the corporate minimum tax.

Bills have been introduced in House (H.R. 5179) and the Senate (S. 2708) that would permit DISC benefits to be transferred to foreign corporations. No action has been taken on either of these proposals, however.

Congress has passed the Export Trading Company Act (Public Law 97-290), designed to encourage exports by facilitating the formation and operation of export trading companies. No provision in that legislation, however, confers automatic DISC status on any certified export trading company.

Recommendation No. 52

"Eximbank should establish a special small business funding program through commercial banks, and should consider discounting loans to support international sales and should develop a cooperative program with the SBA for pre-export financing."

The Export-Import Bank of the United States does have a loan program operated in conjunction with commercial banks.

The Discount Loan Program enables commercial banks to extend fixed-rate medium-term export loans by providing stand-by assurance that the banks can borrow from Eximbank against the outstanding value of medium-term export notes. Commercial banks are reluctant to provide fixed interest rates on medium-term transactions because of the substantial fluctuations in their cost of funds. In many instances, however, fixed rate financing is necessary for the U.S. exporter to obtain a foreign order.

Eximbank will issue advance commitments to make fixed-rate loans to eligible U.S. commercial banks when the applicant bank is not prepared to offer fixed-rate financing unless Eximbank provides a discount commitment.

Eximbank's loan commitment covers up to 65 percent of the contract price of an export sale financed by the U.S. bank on terms ranging from 366 days to 5 years. The U.S. bank either purchases the debt obligation from a U.S. exporter or receives it from the foreign purchaser if the U.S. bank finances the buyer directly.

Eximbank's loan commitment provides the applicant bank with the assurance that it can fund its own fixed rate loan with Eximbank should interest rates and the cost of money rise.

The Discount Loan Program is a standby mechanism. A bank will usually request disbursement from Eximbank when the cost of alternative sources of money is greater than Eximbank's committed discount loan rate. The bank can repay the loans as soon as the alternative cost of funds is less than Eximbank's lending rate. A commercial bank may draw the discount loan once for each commitment.

Special Discount Loan Guidelines for Small Manufacturers

Eximbank provides increased discount loan support to small U.S. manufacturing companies engaged in medium term exports. For small manufacturers, Eximbank will lend 85 percent of the U.S. contract value at the Direct Credit Rate in effect on the date a completed application is received at Eximbank. For small manufacturers, Eximbank's Discount Rate is currently equal to the Direct Credit Rate, 12 percent per annum.

For this Program only, small manufacturers are defined as companies which together with all affiliates, subsidiaries and parent companies had total gross annual sales of $25 million or less in the previous fiscal year. (Evidence of sales volume and company affiliations must be submitted with the applications.)

If a bank (as exporter of record) or supplier, agent, export management company, etc., is selling products of a "small manufacturer," the transaction will be eligible under this loan category if the eligibility of the manufacturer of the products is established.

In an effort to increase the level of U.S. exports and the number of U.S. exporters, Eximbank developed a Small Business Program in 1978 which offers increased coverage against the political and commercial risks of non-payment on a U.S. exporter's foreign sales. These incentives, available under Eximbank's Bank Guarantee Program and the Export Credit Insurance Program offered in cooperation with the Foreign Credit Insurance Association (FCIA), are available to firms with net worth of $2,000,000 or less who have had average annual export sales of $750,000 or less during the preceding two fiscal years and have not utilized Eximbank or FCIA program since January 1, 1975.

Little, if any lending for small businesses have been made through the Eximbank's direct loan program. Under one bill introduced in the Senate (S. 2781, the Export-Import Small Business Assistance Act of 1982) Exim would be required to set-aside 12 percent of its annual direct loan authority for loans of less than $5 million. However, no action has been taken on this proposal.

In addition, section 112 of the Small Business Export Expansion Act of 1980 (Public Law 96-481) establishes within the Small Business Administration an export revolving line of credit program to enable small business concerns to develop foreign markets and for pre-export financing this revolving line of credit may be made directly by SBA,

or through a guarantee for not to exceed eighteen months. The maximum amount of the line of credit is $500,000.

Recommendation No. 53

"The Federal Government should establish field one-stop service shops to include export service of all Federal agencies under the guidance of the Department of Commerce."

Status: Under Section 113 of Public Law 96-481, Congress established within SBA the Office of International Trade. This office is to promote sales opportunities for small business goods and services abroad. The law states that the Office is to provide:

(1) Access to current export information with the cooperation of the Department of Commerce;

(2) Current lists of financial institutions that finance export operations;

(3) A directory of current Federal, regional, state and private sector programs that provide export information and aid to small business; and

(4) Reports on market conditions, sources of financing, export promotion programs and other information pertaining to the needs of small business exporting firms.

This public law also directs that there be established an export promotion center in each of two district offices of the International Trade Administration of the Department of Commerce located in metropolitan areas where district offices of SBA and IRS exist. Each export promotion center shall serve as a one-stop information center or Federal Government export assistance, financing programs available to small business and other provisions of law governing exporting for small business. Representatives from Commerce, SBA, IRS, the Export-Import Bank and the Overseas Private Investment Corporation were all designated to provide staff for the centers

The statutory requirement for these centers expires on October 1, 1983.

The Department of Commerce established the two centers in Milwaukee, Wisconsin and Charleston, South Carolina. At Senate Small Business Committee hearings on August 19, 1982, the Department of Commerce reviewed the performance of these two centers, but recommended that the authority not be continued.

Recommendation No. 54

"The President and Congress should consolidate under an existing cabinet level department, a unified world trade administration. It would be responsible for all trade policy functions of the various agencies and departments. Its objective would be to maximize the international competitive strengths of U.S. Small Business with support and goals for minority, women-owned and disadvantaged business and specific programs developed to utilize their units of technological, educational, cultural, language and political expertise."

The trade functions of the United States Government, while having been consolidated in the past several years, still remains divided between several departments and agencies.

In January, 1980, President Carter reorganized ITA as part of a reorganization of trade functions in the Executive Branch. The trade reorganization consolidates in the Commerce Department the operation of the U.S. Government's nonagricultural trade functions. Commerce traditionally has had major responsibilities in export promotion, trade adjustment assistance and export control. The reorganization strengthens Commerce's lead role in export promotion in two ways. First, it assigns to Commerce the responsibility for commercial representatives abroad and transfers to Commerce the commercial attache positions in 65 countries abroad. Second, the reorganization assigns to Commerce responsibility for implementing the agreements resulting from the Multilateral Trade Negotiations (MTN) through education and promotion programs, technical assistance to the private sector, and development of data bases for monitoring purposes. These activities are overseen by the newly created Under Secretary for International Trade.

A key feature of the reorganization is the designation of an Assistant Secretary for Trade Development. This position creates a central management focus to ensure effective coordination of all ITA Trade Development responsibilities.

The reorganization transferred the functions of commercial officers in U.S. embassies abroad from State to Commerce. On April 1, 1980, the Department of Commerce inaugurated the new Foreign Commercial Service. The reorganization also consolidated all country marketing and international economic policy under an Assistant Secretary for International Economic Policy.

In an effort to specifically increase the flow of export information in a timely and useful form to small business, Congress legislatively established (Public Law 96-481) within the Small Business Administration an Office of International Trade. The purpose of this Office is to provide small business with access to current and complete export information, including the use of export development specialists in each SBA regional office, and encouraging greater small business participation in Commerce Department export in development programs.

Other departments and agencies which continue to play an important role in the area of export policy and trade development are the U.S. Trade Representative, the Departments of State, Justice and Agriculture, the Export-Import Bank and the Foreign Credit Insurance Association (these latter two specifically with respect to financial assistance).

Recommendation No. 55

"Congress should provide for support and expand the use of all officially recognized Trade Fairs, Exhibits, and Trade Centers abroad with small business participation; continue to encourage the Department of Commerce to increase the promotion of foreign buyer and foreign visitor travel to the United States; and develop a program utilizing the cultural, language and political expertise of all Americans, especially ethnic groups, to assist in preparing, implementing and utilizing a sales package for use in expanding International Trade in all world markets."

Considerable Congressional and Executive Branch action has been taken to increase exports generally and small business participation in particular in trade fairs and shows. For example, the Department of Commerce regularly provides three types of trade mission programs. The trade mission, with its one-on-one individual appointments arranged for each participant, provides a unique opportunity for a small business executive to meet potential agents, distributors and buyers in countries where the company has no commercial contacts.

The Specialized Trade Mission brings together a group of business executives, usually from seven to twelve, in a specific industrial sector for which market research has identified strong potential market opportunities in one or more countries. These executives normally travel to three countries with similar commercial needs in the same geographic area. The objective of a Specialized Trade Mission and the principal feature of the program is the preplanned individual business appointments reflecting the specific marketing objectives of each mission member.

The Trade Mission members identify their products/services and provide sales literature; pay their own transportation and subsistence expenses; and pay a contribution to the Department of Commerce to cover the shared operational, promotional and hospitality costs of the mission.

Seminar Missions

The seminar form of the trade mission technique is employed when the complexity of the product theme or other market-related factors indicate that the mission will be more effective as a promotional vehicle if it includes a technical orientation segment. A Seminar Mission program includes, therefore, a state-of-the-art seminar. In all other respects, the Seminar Mission is similar to the Specialized Trade Mission.

Catalog Exhibitions

Catalog Exhibitions represent the major part of the U.S. sales promotion activities in some remote small markets where major industrial equipment exhibitions are not feasible. Catalog exhibitions also serve industry as an American presence at international trade fairs and exhibitions.

The Catalog Exhibition Program is designed specifically to aid small businesses in the United States to obtain market exposure and develop contacts overseas. Requiring no expenditure of time or money by a company marketing executive, a firm that has no expertise in exporting can investigate the market for its products in one or more countries at extremely low cost.

The Small Business Administration has recently (July, 1982) signed separate interagency agreements with the International Trade Administration and the National Oceanic and Atmospheric Administration of the Department of Commerce, and the Agriculture Department's Foreign Agricultural Service.

The NOAA agreement stipulates that SBA will, in cooperation with the National Marine Fisheries Service, select 12 small U.S. fishery firms to take part in foreign trade shows designed to help small firms to sell fish and shellfish products abroad. The SBA will pay the small firms' trade show participation fees.

Under the agreement signed with FAS, SBA will fund participation and shipping fees connected with foreign trade shows of 20 small firms which produce agriculture products.

In addition, the Congress has passed the Export Trading Company Act of 1982 (Public Law 97-290). The law is designed to permit and encourage the formation of privately organized export trading companies which will assist businesses in overcoming the barriers to increasing export opportunities.

In addition, several department and agencies provide important information to small businesses on export opportunities. Primary governmental sources of information include the U.S. Commerce Service and the export promotion specialists in the Small Business Administration's regional offices.

For a further discussion of organization responsibilities, see recommendation 54.

The implementation of this recommendation requires a continuing commitment to increasing small business participation in exporting.

EDUCATION, TRAINING AND ASSISTANCE

Recommendation 56

Many small companies go out of business within five years, due primarily to a lack of managerial expertise. The delegates expressed a strong desire for management aid from the private sector instead of from government. There is a need for a systematic, national program of education to encourage entrepreneurship, one that would entail not only initial education, but also continuing management assistance and some means to update specific skills. Closely allied to education, in the delegates' view, is the need to improve public awareness of the problems and potential of small business.

"A Small Business Educational Task Force for entrepreneurial educational training shall be appointed by the President and coordinated by the Office of Advocacy. Task Force members shall come primarily from small business to initiate, promote and develop the incentives for demographically projectionable, formal, business planning and case history-type continuing education and public awareness (through all media) in small business. Mandate to the Task Force shall be to come up with self-liquidating (pay for themselves) programs for the benefit of small business. This should be achieved within 120 days."

No action has been taken on this recommendation.

Recommendation No. 57

"The Small Business Administration's management assistance program should be strengthened and expanded by allocating a greater portion of the Agency's total resources to reflect an increased emphasis on management assistance rather than the traditional emphasis on financial assistance."

The Small Business Administration, and the Congress, have given increased attention to the structure, and program delivery, of the management assistance programs of the agency. The regular management assistance programs of SBA, include direct counselling, the Small Business Institute, use of volunteers through SCORE and ACE, and a variety of pre-business workshops and cooperative management assistance with the private sector. This increased attention to the management assistance functions of the agency includes the 1980 creation of a statutory, pilot, small business development center program (lasting until 1984 under the terms of Public Law 96-302). However, in fiscal year 1983, the Small Business Administration's budget request for all management assistance programs (including SBDC's) was less than in fiscal year 1982 in both actual dollars and as a percentage of the non-disaster portion of the agency's total salaries and expenses.

As required by statute, SBA has contracted for an evaluation of the Small Business Development Center program in early 1983. It is likely that an extensive Congressional review of all of the Small Business Administration's management assistance programs will be conducted by Congress in 1983.

Recommendation No. 58

"A National Policy should be established for the support of entrepreneurial education and training, continuing education and management assistance, provided by the public and private sector, as an opportunity for every American who wishes to own his or her small business and should receive recognition as a priority from the highest levels of government."

No action has been taken on this recommendation. For a discussion of a related matter, see recommendation No. 57.

Recommendation No. 59

"Establish 'One-Stop Shops' under the coordination of SBA for small business assistance programs utilizing effective information systems and management assistance programs to serve the small business community on the local level, with primary implementation occurring through the private sector, existing agencies and existing organizations."

The Small Business Administration's various management assistance programs, particularly the pilot SBDC program, are designed to provide either one-stop, or on-site consultation for the small business. For a discussion of a related issue regarding exports, see recommendation 53.

Recommendation No. 60

"Congress should enact legislation that would provide tax credits or other tax incentives for: (a) Expenses incurred to educate small business owners and operators regarding the management of business; and (b) Expenses incurred to conduct continuing education and training and to provide on-the-job entrepreneurship experience."

While the general issue of labor training is receiving a great deal of attention, the specific measures proposed above have not been enacted. Concern over the lack of needed skills among the labor force is prompting debate over what needs to be done. As a result, new job training legislation was recently signed into law that will focus principally on the low income unemployed, and on permanently displaced workers. It is very likely that special tax incentives for private sector training of employees will receive attention in the next Congress.●

OFFICER OF THE YEAR AWARD TO GREG PARMAN AND THOMAS L. SMITH

● Mr. LUGAR. Mr. President, earlier this month, the congressional chapter of the Exchange Club honored two U.S. Capitol Police officers, Greg Parman, of Brownstown, Ind., and Thomas L. Smith.

They were honored for their courage and service to the community after a dangerous chase and capture of an armed shooting suspect in the vicinity of the Capitol.

The Officer of the Year Award was presented because of the special heroism they displayed on August 16, 1982, but their dedicated service throughout the year should not go unrecognized.

I have brought this award to the attention of the Senate for two reasons: I am proud of Greg Parman who was my constituent and because the award serves as a reminder of the courage each police officer must display daily.

We owe a debt of gratitude not only to Greg Parman and Thomas Smith, but to every police officer who has risked his life in the performance of duty.●

SCLERODERMA AWARENESS WEEK

● Mr. GOLDWATER. Mr. President, I am pleased to be a cosponsor of Senate Joint Resolution 75, introduced by my friend from Idaho (Mr. SYMMS), to designate the week of June 12 through June 18 of this year as "National Scleroderma Awareness Week." I wish to explain why we feel it is important to bring attention to this little-known disease, which is a form of arthritis.

First, I will mention the United Scleroderma Foundation, a nonprofit group, which was established in December of 1975, to educate and inform the public about scleroderma and to encourage more awareness within the medical profession itself. The foundation encourages patient contact and support through chapters from coast to coast, and through newsletters and informative workshops. Also, the foundation promotes medical research toward finding a cure for scleroderma by awarding grants to researchers who publish outstanding work on this and related diseases.

The foundation is the inspiration of Dianne Williams, who is afflicted with scleroderma. There are now 25 chapters of the foundation across the United States. Through chapter participation, patients work together to increase public awareness of the problems and needs of the scleroderma patient.

While seemingly rare, scleroderma is more prevalent than muscular dystrophy. In fact, over 300,000 people suffer the symptoms of this many-faceted disease.

In order to further promote awareness of this disease and the need for a national effort to search for an eventual cure, the Senator from Idaho and I, together with several other Members of the Senate, have introduced legislation calling for the designation of "National Scleroderma Disease Week." I urge my colleagues to join us in this cause.●

THE MOSCOW HELSINKI MONITORING GROUP: GREATER THAN THEIR NUMBERS

● Mr. DOLE. Mr. President, May 12, 1983, marks the seventh anniversary of the founding of the Moscow Helsinki Monitoring Group, a small group of courageous citizens who committed themselves to the task of monitoring soviet compliance with the human rights provisions of the Helsinki Final Act of 1975.

In a free society, such an occasion would probably rate no more than a brief notice in the major news media. But the founding of the Moscow Helsinki Group represented a milestone in the checkered history of human rights activity within the Soviet empire. Under the leadership of Dr. Yuri

Orlov, eleven persons placed their signatures on the statement declaring the group's existence and its goals. Subsequently, the group's ranks were joined by six more Soviet citizens commited to making the human rights provisions of the Helsinki accords a reality in their homeland.

In its declarative document, the Moscow Helsinki group stated that "its first goal is to inform all heads of state which signed the final act on August 1, 1975, and also to inform the public about cases in direct violation of the articles named above," that is, the humanitarian provisions of the Helsinki accords, particularly "respect for Human rights and fundamental freedoms" and "cooperation and exchanges in the area of culture." To this end, the group collected written complaints and information relating to violation of these articles, and produced a series of documents cataloging these violations. From May 12, 1976, until August 9, 1982, the Moscow Helsinki Group issued over 200 such documents covering such issues as political and religious repression, forced psychiatric confinement, emigration difficulties, the situation of prisoners of conscience in the Soviet penal system, to mention just a few of the major theme.

A short time after the founding of the Moscow Helsinki group, similar Helsinki monitoring groups were formed in other areas of the Soviet Union: Ukraine, Lithuania, Armenia, and Georgia. Other organizations subscribing to the ideals of Helsinki devoted themselves to examining specific issues such as psychiatric abuse, rights for the handicapped, religious liberty. All in all, the total membership of the Moscow Helsinki group came to 17 persons, with approximately 70 more in the associated organizations. "An insignificant minority of renegades" was how the Soviet press would characterize these human rights activists, but their influence was far beyond their numbers.

EVERY MAN'S CONSCIENCE IS A THOUSAND SWORDS

In signing the Helsinki Final Act of 1975, the Soviet Government agreed, along with the 34 other signatory nations, to respect freedom of thought, conscience, religion, and belief, among the many provisions of the document. Yet, those Soviet citizens who attempted to put these provisions into practice soon found themselves the object of persecution and harassment by Kremlin police and KGB agents. Needless to say, the same fate awaited an organization that sought to collect information on, and chronicle these violations of the Helsinki accords. Four Moscow Helsinki monitors were forced to emigrate from their homeland. Ten more are currently serving sentences that total 97 years in labor camps, prison, and internal exile. The group's founder, Dr. Yuri Orlov, is suffering officially condoned mistreatment at Perm Labor Camp No. 37. In October 1982, he was assaulted by a camp thug while camp authorities looked on. We are all familiar, I am sure, with the desperate hunger strike undertaken recently by Anatoly Shcharansky for the simple right to correspond with his family. Simply out of vindictiveness, prison authorities refused to allow Ivan Kovalev and Tatyana Osipova, a married couple belonging to the Moscow Helsinki group, meet while they were serving in the same prison camp complex. The treatment accorded the other imprisoned or internally exiled Moscow Helsinki monitors is hardly more humane. The three remaining group members who are still at liberty in the Soviet Union were forced to discontinue their public activities in August 1982. They had been, and still are, under the constant watch of the KGB, and subject to arbitrary interrogations and harassment. Nearly all of the other Helsinki groups have been suppressed into inactivity, their members either in prison or having at one time served sentences for Helsinki-related activities.

Mr. President, in Shakespeare's Richard III, one of that unfortunate sovereign's adversaries proclaims that "every man's conscience is a thousand swords." The consciences raised by the Moscow Helsinki monitoring group, and by their allies throughout the Soviet Empire, have been nonviolent swords, cutting through the lies and evasions of official propaganda on Soviet compliance with the human rights provisions of the Helsinki accords. Today we honor the efforts of the Moscow Helsinki monitoring group. Their efforts have not been in vain, nor will they be forgotten.●

CENTRAL AMERICAN POLICY

● Mr. EAST. Mr. President, the continuing debate over our policy in Central America continues to miss the point. The ultimate purpose of our support of the desperate defenders of freedom in the elected Government of El Salvador is not the conversion of that Government to our own form of government or our conceptions of what constitute human rights. The purpose is to prevent the forces of international communism from establishing another beachhead on the Central America isthmus in a country that is less distant from Texas than Texas is from New York. The struggle of the people and Government of El Salvador, Mr. President, is in every sense our struggle.

Two articles in today's Washington Times)—one an editorial criticizing both congressional "liberals" who are doing everything they can to undermine our help to El Salvador as well as certain elements in the Reagan administration that seem not to understand the stakes in Central America or what to do about the crisis there; and the other an opinion editorial by Michael McDonald analyzing the arguments of certain pundits in our media that are also seeking to undermine our defense of freedom—express the issues simply and clearly. I commend them both to my colleagues, and I ask that they be printed in full at the conclusion of these remarks in the RECORD.

The articles follow:

IT'S LATE AND GETTING LATER

Another day, another step closer to the precipice. We're losing in Central America. The latest is that the House has voted to give El Salvador a pathetic $30 million in aid—on condition that the government negotiates with the guerrillas. That means, in effect, to let the Soviet-backed opposition take over. Meanwhile, on the other side of the world, we are giving $10 million in aid to Sovietized Mozambique, with no strings and no questions asked.

It is time to give up and reconcile ourselves to Soviet entrenchment on our southern borders? Unless the president makes some radical changes in the way he handles foreign policy, it's hard to foresee anything else. Norman Podhoretz, in his penetrating analysis of what went wrong in Vietnam, talks about how successive presidents tried to deal with the problem "on the cheap." Kennedy, Johnson and Nixon all knew what needed to be done, but for fear of alienating the public, they tried to do it without spending much money and without taking the political risks of blunt talk to the people back home.

Much of the same thing is happening this time around. The president who, when he was a candidate, talked about the possibility of strong-arming Cuba as a way of forcing Soviet concessions to the Poles, hangs back from an openly stated global strategy of resistance to Soviet imperialism. Instead, he, like his predecessors, meets the well-coordinated advance of the adversary in a half-hearted and piecemeal way.

A few advisers for the Salvadoran army . . . American training for fewer Salvadoran soldiers than there are Salvadoran guerrillas regularly learning their trade in Nicaragua. And we say we're trying to prevent a Soviet-backed, Soviet-style government in San Salvador, but we have a hands-off rule when it comes to helping democratic forces that want to challenge the Soviet-backed, Soviet-style government in Managua.

It's not all the President's fault, of course. The liberal opposition in Congress has been ingenious in finding ways to stop him from implementing the strong-America principles that brought him to the White House in the first place. But, in the end, the responsibility is his. He has the power to convince the people of the United States of the true dangers confronting them in Central America and of what must be done to protect our interests and the principles we value.

The major point to be made is that damage limitation of the sort we've been aiming at ever since the Korean war won't do. We must have a strategy for winning.

The first step would be to get rid of the intellectual fuzz accumulated during the Carter administration. President Carter, in his idealism, said he was tired of supporting the wrong guys in Latin America. He failed to note that El Salvador was doing quite

well by Third World standards. Both economically and politically, things were getting better for the Salvadoran poor.

The Carter entourage had no patience with gradualism, however. Not only was American influence enlisted in ousting the comparatively mild Savadoran dictator, Romero; an American-designed land reform was, at American instigation, forced on the country by the bayonets of the Salvadoran army.

We see the results. We also see shocking continuations of Carter-style American behavior in that part of the world. The president of Costa Rica—a socialist—asks for American help to defend his borders against Sandinista incursions. He immediately becomes a fascist pariah to both the press and the State Department. We make $75 million in aid to Nicaragua contingent on the Managua government's not exporting terrorism. Even former Secretary of State Edmund Muskie says there's plenty of evidence to justify cutting off the aid. President Ronald Reagan hesitates.

And so it goes. Every evidence of faltering purpose on our part weakens the morale of democratic forces in Central America and, indeed, around the world. And convinces the totalitarian revolutionaries they don't have to compromise. When will we learn?

CENTRAL AMERICA: FOREVER RESTATING THE OBVIOUS

(By Michael McDonald)

At the outset of a favorable review of a new book by Betrand Russell, George Orwell remarked that "if there are certain pages . . . which seem rather empty, that is merely to say that we have now sunk to a depth at which the restatement of the obvious is the first duty of intelligent men."

At the time Orwell wrote—January 1939—the western democratices faced an implaceable, expanding totalitarian foe and were, to put it mildly, in serious trouble. Unhappily, the West finds itself in a similar situation today. And for similar reasons, now as then, the "restatement of the obvious" has once again become "the first duty" of western leaders and intellectuals.

In this regard, U.N. Ambassador Jeane Kirkpatrick's recent essay in The Washington Post ("This Time We Know what's Happening", April 17, 1983) was a welcome relief from the run-of-the-mill foreign policy analyses about Central America. In the space of a few thousand words she succeeded admirably in describing what communist objectives are in that part of the world, what choices lie ahead for Congress as it begins debate over whether to cut off continuing American aid to El Salvador, and what the political and moral consequences of its decision will be both for the United States and for our allies.

Unfortunately, critical response to the ambassador's remarks has been hostile and leaves one less than optimistic about the chances of achieving a domestic consensus on how best to ensure the survival and defense of freedom in this hemisphere.

Richard Cohen's reaction was typical. In an article that appeared in print two days later ("War Critics", The Washington Post,) Mr. Cohen somehow manages to achieve the next-to-impossible feat of ignoring everything Kirkpatrick had to say in the course of attempting to refute her.

According to Kirkpatrick, the Sandinistas and the guerrillas in El Salvador are committed. Marxist-Leninists. As such, their concern for instituting democracy and for ending human rights abuses is non-existent. Their interests are wholly inimical to our own, allied as they are to the Soviet Union, and they threaten an area of vital importance to us and to our allies.

Cohen disputes none of these facts. Instead he pleads for a completely amoral foreign policy, one indifferent to the attempts of foreign nations to resist external aggression. (So much for 200 years of American history and our role as leader of the Free World.) He then concludes his piece, incredibly, by arguing that for the United States the issue of whether to intervene in these types of situations should always hinge on whether there is (1) a compelling U.S. interest in the region and (2) whether the United States can make a difference.

What is incredible about this statement is not that it is incorrect but that Cohen makes it an attempt to justify *non-intervention.* Clearly there is a compelling U.S. interest in Central America and just as clearly, given our proximity to the region, we can make a difference.

Cohen, however, is not alone in his inability to relate geopolitical realities to our national interest.

Philip Geyelin also believes that we should ignore Kirkpatrick's "harrowing rationale" for thwarting communist subversion in Central America. (See "The Kirkpatrick Theory," *The Washington Post,* April 24, 1983.) Although he too refuses to argue with the distressing facts Kirkpatrick has provided, he nonetheless lends implicit support to the idea that the United States is capable of conducting a "diplomatic spectacular" in which all concerned parties, including the Soviet Union and Cuba, will negotiate an end to the conflict. The consequences of past "diplomatic spectaculars" with communist nations—most notably the Paris Peace Accords of 1973 and the 1975 Helsinki accords—apparently leave Geylin undaunted.

What is there left to say when the facts about Central America are presented in all their hard-edged concreteness and yet professional political observers willfully refuse to acknowledge them? Perhaps it is sunk to such a depth that even the restatement of the obvious is no longer sufficient to get people to begin to think clearly.●

THE RECENT MURDER OF THE TURKISH AMBASSADOR TO YUGOSLAVIA

● Mr. DENTON. Mr. President, I must express my shock and revulsion at yet another outrage perpetrated against a Turkish diplomat in the name of the so-called Armenian genocide.

On March 9, 1983, Ambassador Galip Balkar was murdered by two assassins while seated in his automobile at a traffic light in Belgrade, Yugoslavia, the country to which he was accredited.

Ambassador Balkar is the 26th victim of the terrorist campaign started in Los Angeles, Calif., in 1973 by the slayings of the Turkish Consul and the Turkish Consul General. In addition, a total of 60 bombing attacks have been directed against Turkish targets. Four of the murders and eight of the bombings took place in the United States, the remainder in Western Europe, Lebanon, Canada, and Australia.

In July 1981, the Subcommittee on Security and Terrorism, which I chair, held extensive hearings on international terrorism. During the hearings, Prof. Aydin Yalcin, from the University of Ankara, and Dr. Stefan T. Possony, of the Hoover Institution at Stanford University, testified in detail about terrorism in Turkey and about the Armenian terrorist groups operating outside of Turkey.

There are two major terrorist groups, the ASALA—Secret Army for the Liberation of Armenia—and the Justice Commandos of the Armenian Genocide. Both of those groups, one intentionally, the other perhaps unwittingly, serve the interests of the Soviet Union in the Eastern Mediterranean. ASALA, which is avowedly Marxist, regards the "reactionary, imperialist U.S." as the main enemy of Armenian nationalism and wants to attach the six eastern provinces of Turkey to Soviet Armenia, a part of the U.S.S.R.

As with other terrorist groups, its campaign is aimed as much at the media as it is at Turkish diplomats, their embassies, and missions. ASALA wants to blacken the international image of Turkey by bringing to the fore what it calls "the massacre of 1.5 million Armenians by the Ottoman Empire in 1915-16." Whatever may have been the errors of the Ottoman Empire during the intercommunal strife precipitated by the Armenian rising in 1915, the Empire did come to an end in 1920. I do not doubt that during 1915-16, many thousands of Armenians perished in battle and from hunger and exposure. Similarly, I do not doubt that thousands of Turks also died.

The Government of Turkey does not persecute Armenians. The grandchildren and great-grandchildren of the victims of a tragedy that took place more than 50 years ago cannot justify their criminal actions against Turkish diplomats and their families by the alleged misdeeds against their grandparents and great-grandparents by some tortured argument about justice or retribution.

The events of 1915-16 are not the cause but simply an excuse for the ASALA attempt to create a Marxist revolutionary mass movement among the Armenian youth of Lebanon, France, the United States, and Canada, where most of the Armenians in the free world now live. Although the ASALA only has a few hundred hardcore members, it has many misguided sympathizers, for otherwise its member could not successfully commit their heinous crimes.

As for the Justice Commandos, they are more nationalistic and radical, much like the Montoneros of Argentina and no less deadly. Just as ASALA, they have made it a practice not to

criticize the Soviet Union, which keeps in total subservience the 3.2 million Armenians now residing in Soviet Armenia, and an additional 1 million Armenians living in the Soviet Union outside of the Armenian S.S.R.

The overwhelming majority of the 500,000 Americans of Armenian heritage are law-abiding, God-fearing citizens. The terrorist often seek to exploit the legitimate desire of the Armenian people to express the their identity by infiltrating Armenian heritage groups, and so-called cultural exchanges, and by other methods. They often prey on the desire of Americans of Armenian descent who seek to preserve and encourage the nostalgia for the traditional culture of Armenia, a modicum of which is still being allowed in Soviet Armenia, allowed, that is, to the extend that it does not conflict with Soviet policies.

Mr. President, I ask that a list of the names of Turkish diplomats and members of their families assassinated by Armenian Terrorists since 1973 appear in the RECORD immediately following my remarks.

The list follows:

NAMES OF TURKISH DIPLOMATS AND MEMBERS OF THEIR FAMILIES ASSASSINATED BY ARMENIAN TERRORISTS

1. Mehmet Baydar, Consul General of Turkey, January 27, 1973, at Los Angeles, USA.
2. Bahadir Demir, Consul of Turkey, January 27, 1973, at Los Angeles, USA.
3. Danis Tunaligil, Ambassador of Turkey, October 22, 1975, at Vienna, Austria.
4. Ismail Erez, Ambassador of Turkey, October 24, 1975, at Paris, France.
5. Talip Yener, Driver of Ambassador, October 24, 1975, at Paris, France.
6. Oktar Cirit, First Secretary-Turkish Embassy, February 16, 1976, at Beirut, Lebanon.
7. Taha Carim, Ambassador of Turkey, June 9, 1977, at Holy See.
8. Necla Kuneralp, Wife of the Ambassador of Turkey, June 2, 1978, at Madrid, Spain.
9. Besir Balcioglu, Retired Ambassador of Turkey, June 2, 1978, at Madrid, Spain.
10. Ahmet Benler, Son of the Ambassador of Turkey, October 12, 1979, at The Hague, Netherlands.
11. Yilmaz Colpan, Counselor for Tourism-Turkish Embassy, December 22, 1979, at Paris, France.
12. Galip Ozmen, Attache-Turkish Embassy, July 31, 1980, at Athens, Greece.
13. Neslihan Ozmen, Daughter of Mr. Ozmen, Attache, July 31, 1980, at Athens, Greece.
14. Dr. Resat Morali, Labor Attache of the Turkish Embassy, March 4, 1981, at Paris, France.
15. Tecelli Ari, Religious Affairs Official at the Turkish Embassy, March 4, 1981, at Paris, France.
16. Mehmet Yerguz, Official at the Turkish Consulate General, June 9, 1981, at Bern, Switzerland.
17. Cemal Ozen, Security Official at the Turkish Consulate General, September 24, 1981 at Paris, France. (During a raid on the Consulate where they also held 40 people as hostages for more than 10 hours).
18. Sarik Ariyak, Consul General of Turkey, December 16, 1981, at Sydney, Australia.
19. Engin Sever, Attache at the Turkish Consulate General, December 16, 1981, at Sydney, Australia.
20. Kemal Arikan, Turkish Consul General, January 28, 1982, at Los Angeles, U.S.A.
21. Orhan Gunduz, Turkish Honorary Consul General, May 4, 1982, at Boston, Massachusetts, U.S.A.
22. Erkan Akbay, Attache-Turkish Embassy, June 7, 1982, at Lisbon, Portugal.
23. Nadide Akbay, Wife of Mr. Erkan Akbay, June 7, 1982, at Lisbon, Portugal.
24. Atilla Altikat, Military Attache-Embassy of Turkey, August 27, 1982, at Ottawa, Canada.
25. Bora Suelkan, Attache, Turkish Consulate General, September 9, 1982, at Burghaz, Bulgaria.
26. Galip Balkar, Ambassador of Turkey, March 9, 1983, Belgrade, Yugoslavia.●

COMPASSION INTERNATIONAL

● Mr. ARMSTRONG. Mr. President, I recognize Compassion International. This is a 31-year-old Christian organization functioning in 32 nations of the world, with headquarters in Colorado Springs, Colo.

Compassion is the link between two important groups of people: children in desperate need and caring people who want to help. Child sponsorship brings these two groups together in a unique, one-to-one way. More than 65,000 needy children are sponsored through Compassion. Their sponsorship makes it possible for these needy children to attend school, it provides books and clothing, and meets their spiritual needs as well as physical, emotional and mental needs.

Compassion also works with family, church, and community leaders to improve and enrich the environment for children of poverty and helps needy communities recognize their opportunities and mobilize their resources to provide for the development needs of the children.

Other areas of ministry include providing nourishing meals for childern, bringing clean, safe water to thousands of needy people, providing crisis relief to those victimized by major disasters, and distributing medicines, vaccines, blankets and health products to many depressed areas of poor countries.

To increase awareness of the problems of the world and appeal to the private sector of America to get involved physically and financially, Compassion is sponsoring Project Compassion. This fall, two men from Colorado will be walking from Colorado to southern Florida and then proceed on to Haiti, to document the feelings and impressions of grassroots America about national and international suffering and help to alleviate some of the problems.

It is almost impossible to imagine a more worthwhile undertaking than the enormous task to which Compassion International has dedicated itself. I congratulate those who are providing leadership in this significant effort.●

BOSTON GLOBE ON NUCLEAR WEAPONS FREEZE

● Mr. KENNEDY, Mr. President, on May 7 the Boston Globe editorialized in support of the nuclear weapons freeze and reductions initiative, which the House of Representatives approved on May 4 and which is now before the Senate for consideration and action.

As the Globe points out, "each Senator will have to take a stand" on this proposal to negotiate a comprehensive and verifiable halt to the nuclear arms race. I commend the editorial to my colleagues, and I request that it be printed at this point in the RECORD.

The editorial follows:

FREEZE: SENATE AND THE FUTURE

Those who have worked so diligently, first to create a national arms-control constituency and then to force an evasive Congress to take a stand on the nuclear freeze resolution, can take great satisfaction both in the debate they stimulated and the result it produced.

With House approval, it's time now for the freeze movement to take a hard look ahead. Sens. Kennedy and Hatfield are about to lead the battle in the Senate; last year they had 17 cosponsors and this year they have 34. Some assume they can't win Senate approval this year, but the freeze movement is still growing, and sooner or later they will. Meanwhile, with an election year in the offing, each senator will have to take a stand.

It's true, of course, that even if the Senate passed a freeze, this Administration would ignore it. The main focus of the movement, therefore, should be to further elaborate its program of public education on national security, enabling more and more hitherto uninvolved citizens to draw their own confident conclusions. This way the movement will continue to gather force.

A critical choice is close at hand. In the immediate future Congress will be facing dozens of votes on a variety of nuclear weapons systems. Among the first of these will be a committee vote on flight testing of the MX missile, perhaps as early as the end of this month.

It is utterly unrealistic to think that every legislator who favored the freeze will oppose every nuclear weapons system. Freeze proponents therefore must begin to sharpen their aim, concentrating on some weapons and relegating others to a lower priority.

Many freeze organizers think they owe their success to date to the simplicity of the original proposition. They fear that if they delve into complexities and pick and choose among weapons they will lose their popular support. They overestimate the difficulty of choosing and underestimate the public.

The freeze movement need not stumble and split or lose its following, if it moves decisively to establish some convincing organizing principle beyond "enough is enough." The systems to attack are the ones which are most destabilizing, either in a crisis because they might invite or trigger a first-strike attack; or chronically because, over the long haul, they will defy efforts at

counting and make treaty verification impossible. The MX is one of these. So is the surface-launched cruise missile. So is the fast-attack Pershing 2. So is the SS20 and the SS18. So is counterforce doctrine. And so, when carried to absurd extremes designed to manage, survive and endure protracted nuclear wars, are command systems.

If the freeze heightens its focus on the stability of the nuclear balance, and not merely on numbers or newness of weapons, there's no reason the movement will lose its momentum or dull its cutting edge.●

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT

● Mr. LEAHY. Mr. President, yesterday, two of our Nation's leading newspapers carried articles on the severe problems with pesticide registration data at the Environmental Protection Agency (EPA).

These articles clearly show that the Office of Pesticide Programs has not been diligent in its effort to insure that the public health and safety is protected. Nor has it allowed full and open public participation in the pesticide registration process.

Mr. President, a report released by the Agency itself yesterday found that 15 percent of all pesticides now registered were allowed on the market on the basis of faulty data.

This is an intolerable situation.

Millions of tons of pesticides and herbicides are applied in this Nation each year. These chemicals are in our food, our water, and in our ground.

The American people have a right to know whether these chemicals pose a danger. The Federal Insecticide, Fungicide, and Rodenticide Act, which controls the use of these chemicals, will be up for reauthorization this year.

I urge my colleagues to read these articles carefully and consider the need to reform FIFRA. We must make every effort to insure that the public is protected from chemicals that pose a threat to their health and safety and that their right of access to this information is preserved.

I ask that these articles from the New York Times and the Wall Street Journal be printed in the RECORD.

[From the New York Times, May 12, 1983]

EPA FAULTS TESTS ON 200 PESTICIDES

(By Philip Sharecoff)

WORK BY A LABORATORY INVOLVES CHEMICALS NOW ON MARKET

WASHINGTON, MAY 11.—A study by the Environmental Protection Agency has found that two-thirds of all tests conducted by a big private research laboratory to establish the safety of pesticides and herbicides now on the market are scientifically invalid.

The report, which took five years to prepare, finds that virtually all 212 pesticides and herbicides cleared by Industrial Bio-Test Laboratories of Northbrook, Ill., were subjected to at least one invalid test. Many of the pesticides and herbicides are in wide use, including Captan, Paraquat, Lasso, Machete, Orthene and Carbofuran.

Agency officials said the report raised what one on them called "big questions" about the chemicals tested by the company that are still on the market.

But the officials, who asked not to be identified, said the fact that the tests were invalid did not necessarily mean the chemicals posed a threat to human health or safety. It did mean, they said, that new information had to be obtained about the health effects.

The data produced by the laboratory were used by manufacturers to gain Government approval for marketing the chemicals.

The 212 chemcials represent 15 percent of all chemicals registered by the E.P.A., so the invalid tests of the Chicago laboratory could pose a significant problem. There are 44 chemical manufacturing companies involved, many of them major ones such as DuPont, Dow, Monsanto, Ciba Geigy, Olin, Velsicol, and Hercules.

The tests were conducted to see if the chemicals posed threats of cancer, birth defects, genetic damage or other health problems.

The environmental agency officials said the agency did not have authority under the Federal Insecticide, Fungicide and Rodenticide Act to order those chemicals that were not adequately tested off the market. That cannot be done until the agency has made a finding that use of the chemicals poses a risk of "unreasonably adverse effects."

ALL WE HAVE ARE QUESTION MARKS

"All we have now are question marks," an official said.

The officials remarked, however, that the flawed testing at least raised the possibility that some of the chemicals could present unknown hazards to public health.

The officials said they had not finished evaluating their findings about the Industrial Bio-Test data and did not know how much more information they would need. They said that where the invalid tests were crucial to the information needed to validate the safety of the substances, the chemcial manufacturers would be asked to submit new data in support of keeping them on the market.

Four former directors of Industrial Bio-Test are now on trial in Federal District Court in Chicago on charges of misrepresenting data used by the chemical manufacturers to obtain Government approval for the chemicals.

The 212 chemicals tested by the Chicago laboratory are being examined by the environmental agency in cooperation with the Government of Canada, where many of the pesticides and herbicides are also used. The Ottawa Government has refused to permit the use of 16 of the chemicals until questions raised by the Industrial Bio-Test problems are resolved.

The World Health Organization is also examining the implications of the invalid tests.

But the E.P.A. officials said that the fact that the chemicals were subjected to one or more invalid tests by Industrial Bio-Test did not necessarily present a serious problem. In many cases, there was a wide base of data from other sources that provided sufficient assurances of their safety.

On the other hand, even if past tests on chemicals were scientifically valid, it does not mean they were adequate, they said, explaining that new standards often required different tests.

A number of companies voluntarily submitted new data to the agency after the allegations about the laboratory were made public, the officials said.

FAULTY PROCEDURES CHARGED

The report says only that the tests were invalid because they failed to adhere to accepted scienfitic procedures. It does not address allegations brought at the Chicago trial that test results presented by the laboratory were fraudulent.

Government lawyers have charged that the company falsified such things as the number of deaths among test animals that were subjected to the chemicals.

The E.P.A. officials said they would have reviewed most of the chemicals tested by Industrial Bio-Test in their normal routine of administering the pesticide law. But their five-year concentration on the laboratory's tests was out of the ordinary, they said.

One official said the pattern of invalid tests found at the Chicago laboratory was "unprecedented" and had "shocked" toxicologists around the country.

The existence of the E.P.A. report was mentioned at the Chicago trial. A copy of it was given to a reporter who requested it.

[From the Wall Street Journal, May 12, 1983]

EPA TURNS UP SAFETY QUESTIONS IN PESTICIDE PROBE

(By Bill Richards)

MOST TESTING OF NALCO'S IBT IS THROWN OUT, AFFECTING NEARLY 15 PERCENT OF MARKET

WASHINGTON.—The Environmental Protection Agency is completing a study that raises questions about the safety of nearly 15 percent of all the pesticide chemicals approved for use on the U.S. market.

According to EPA documents, the agency has invalidated 737 of the basic laboratory safety studies involving more than 200 pesticide chemicals tested by Industrial Bio-Test Laboratories Inc., a unit of Nalco Chemical Co., Oak Brook, Ill. Most of the tests were done during the 1970s for 44 chemical companies and concerned a variety of possible health problems that the chemicals could cause, including cancer, birth defects and reproductive hazards.

Industrial Bio-Test halted its commercial testing in 1978 after federal investigators questioned the validity of some of the laboratory's results. Four former IBT officials, including its founder and former president, Joseph C. Calandra, are currently on trial in federal court in Chicago on several criminal charges arising from the federal investigation. No charges have been filed against Nalco, although the chemical company, which bought IBT in 1966, said last week that it had set aside a $23 million reserve to cover the discontinuance of IBT's operations, including the settlement of several civil lawsuits against the lab. The reserve was set aside in 1978, and at the end of 1982, $12 million was added to the remaining reserve.

In the trial, Phillip Smith, a former IBT technician, has testified that officials of the laboratory falsified data in studies on TCC, an anti-bacterial agent widely used in deodorant soaps. Federal officials said later tests showed the material to be safe at levels used in soap products.

The EPA study, which is scheduled to be released late next month, is the first broad effort to determine the extent of the problems associated with the flawed IBT tests. In the study, investigators found invalid data used to support a number of widely used products such as Monsanto Co.'s herbi-

cides Roundup and Lasso, Chevron Chemical Co.'s Captan and FMC Corp.'s Furadan. Chevron is a subsidiary of Standard Oil Co. of California.

"The fallout from this single testing laboratory is quite broad," said Edwin L. Johnson, the EPA's director of pesticide programs. "We found ourselves in a position where we had a large hole in our judgment base because of the suspicious data."

In addition to testing for the EPA, a number of tests run by IBT were also submitted by drug manufacturers to the Food and Drug Administration. An FDA spokesman said yesterday that while nearly 200 major IBT tests were rejected by the agency, there were studies from other labs so that the agency didn't have to pull any drugs off the market.

The EPA study says IBT performed 1,205 major animal studies that chemical company clients submitted to the environmental agency in support of putting their pesticides on the market. About 66% of the studies have been thrown out as invalid by the EPA, with another 170 studies still being reviewed. The EPA study says only 19% of the IBT studies were judged acceptable.

Mr. Johnson and other EPA officials cautioned, however, that not all the pesticides may be lacking a valid scientific base, because the EPA may also have validation studies performed by other laboratories. The supplementary data hasn't been compiled yet, said Mr. Johnson, but it is expected to be included in the EPA's final report next month. Mr. Johnson declined to estimate how many pesticides on the market rest on tainted IBT data alone, but he said, "It's enough to make me uncomfortable."

None of the pesticides with invalid IBT tests has been withdrawn from the market, Mr. Johnson said. Under federal rules he said the pesticides can stay on the market until their makers retest them. If they are found to be harmful, proceedings can be started to remove them. Mr. Johnson said only a handful of retests have been completed, although a number of others are either under way or are being evaluated by the EPA.

Canada, which is jointly testing some IBT pesticides with the EPA, has taken two products, allidochlor and chlorbromuron, off the shelf. Canadian health officials also have recommended warning labels on 24 other pesticides until follow-up studies are done to replace the IBT tests. Information from the Canadian tests was incorporated into the EPA's report, agency officials said.

According to the Canadian reports, one widely used pesticide—Captan—was found to cause cancers in mice during follow-up tests. The health protection branch of Canada's agriculture agency, which has jurisdiction over the retesting of IBT studies in Canada, reported that studies by the U.S. National Cancer Institute and Chevron Chemical, a major manufacturer of Captan, "clearly demonstrated the induction of tumors in the small intestine of mice at high doses of Captan" and that the studies couldn't determine a "no-effects' minimum level at which the chemical didn't produce tumors.

Spokesmen for Chevron and several other chemical companies involved in IBT tests defended their products yesterday and said many were either already retested or being retested. A Chevron spokesman said his company had spent "in the millions" redoing many of the 156 major chemical tests Chevron commissioned from IBT since the early 1960s.

"Based on our retesting programs," the spokesman said, "we feel confident that Chevron products in question do not pose an unreasonably adverse affect to man or the environment when used according to the label instructions."

Monsanto said it had completed tests on both Roundup and Lasso, two of the 11 pesticides the company tested with IBT. "We see no data gaps, and we feel confident the data are adequate to support registration by the EPA," a spokesman said. he added that the other pesticides are also being retested in studies that could take two or more years to complete.●

ARKANSAS' SMALL BUSINESS MAN OF THE YEAR

● Mr. PRYOR. Mr. President, Arkansas' Small Business Man of the Year, Dr. Steven K. Wilson, of Fort Smith, had the wind taken out of his sails by his own son after the announcement of his selection for the honor. For when son Henry was told about his dad's sudden celebrity status as Small Business Man of the Year, son replied, "That's nice, dad, how tall are the rest of the them?"

But I can assure you that Dr. Wilson is not small in the eyes of the business community in Arkansas. A full-time urologist, Dr. Wilson also finds time to manufacture rolled glass, operate two restaurants, and participate in area restoration projects.

Founded in 1974 as a single retail store, Merry-Go-Round Glass in Fort Smith, began manufacturing rolled glass in 1978. The firm entered international markets that year and competed successfully in a stained glass market long dominated by its European originators. Sales have increased almost sevenfold to $3.38 million in 4 years, making it the fourth largest manufacturer of its kind. More than 30 franchises across the country offer stained glass supplies and classes.

His restoration of six buildings in the historic Belle Grove area of Fort Smith led him into the restaurant business. Wilson took over the operation of a restaurant, named it Tomfoolery, and quadrupled its previous sales in the first year. Wilson opened another restaurant, the Packet House, a graciously restored mansion, in Little Rock late last year.

Mr. President, Dr. Steven Wilson, typifies the aggressive spirit that exists among Arkansas businessmen and I want to join in the observance of Small Business Week by paying tribute to this native son.●

ESTATE TAX RELIEF

● Mr. JEPSEN. Mr. President, I express my strong support for the estate and gift tax provisions of the Economic Recovery Tax Act of 1981. These provisions have benefited farmers and small businessmen and women. They are of special importance to farm wives who have long worked as partners on the family farm. The change in estate tax provisions was one of the most important features of the 1981 act.

Excessive estate taxation had become discriminatory and extremely counterproductive. Because the very wealthy can often minimize the impact of estate taxation by sophisticated tax planning, the incidence of the tax was largely regressive, falling heaviest on relatively small estates, especially small businesses and farms.

The tax also encouraged older farmers and businessmen to sell out to large corporations and use the money to buy liquid investments. Excessive estate taxation had imposed a heavy burden on dynamic and successful business judgment and investment by closely held businesses.

The tax rates imposed by law were bad enough, but inflation caused bracket creep pushed by the tax take to almost confiscatory levels. As a result, many of the best and most productive farms and businesses were liquidated or dismembered.

Moreover, by undermining or even destroying farms and small businesses, the previous tax promoted economic concentration. It hindered accumulation of capital by farms and small businesses and thus insulated, to some extent, larger corporations from competition.

In addition, the tax discouraged savings and capital formation needed for a strong economy. Overall, the tax created many problems, and few, if any, benefits. Consequently, the Economic Recovery Tax Act of 1981 included sections which provide estate tax relief for many Americans. The tax rates are cut and the unified credit is increased over several years.

These changes in the estate tax will greatly benefit farmers and small businessmen, along with their wives and families. Fewer farms and businesses will be broken up or sold to meet estate tax liabilities. Wives and other family members will not have their grief compounded by tax problems.

Now, I understand that there are some here in Congress—supporters of the tax-and-spend school of Government—who are determined to prevent full implementation of estate tax relief. They want to renege on our commitment to make estate taxation less destructive.

I will oppose any effort to dilute enacted estate tax relief, whatever form it takes. For this reason, I am supportive of the resolution expressing the sense of the Senate that the ERTA tax changes not be tampered with.●

WHY WE MUST REMEMBER THE ARMENIAN GENOCIDE

● Mr. DODD. Mr. President, April 24 marked the 68th anniversary of the

start of what was to become the first genocide of the 20th century. On April 24, 1915, the Ottoman Empire began the process of eliminating the Armenian people from Turkey by arresting and killing the leaders of the Armenian community.

From May until October 1915, the government of the Ottoman Empire exterminated well over 1 million Armenian men, women, and children, through forced marches, starvation, and outright slaughter. The purpose of this policy was stated plainly enough at the time by the young Turkish Government: To expel or to kill everyone and everything non-Turkish from the provinces that are now called eastern Turkey, but which had been Armenia for thousands of years. A member of the Ottoman government said at the time: "The best way to finish with the Armenian question is to finish the Armenians."

The goal of the Turkish Government was to insure that Turkish-held Armenia would never be separated from the Ottoman Empire. The Armenians resisted when they could. In 1917, after the Russian armies left the Caucasian front, what was left of the Armenians fielded a volunteer force which kept the oilfields of Baku from Turkish occupation, an achievement which clearly had an effect on the German war effort. After the defeat of the Central Powers in World War I, a republic of Armenia was established; but it was destroyed by a joint Turkish-Soviet attack in 1920. The facts are plain: The Armenian people were systematically uprooted and ruthlessly eliminated from their homeland. As Winston Churchill put it, this horrible crime "was about as complete as such an act, on a scale so great, could well be."

Why revive the memory of such terrible events? For one thing, the U.S. State Department has been less than careful to keep the facts straight about this thoroughly documented atrocity. In August 1982, the State Department published a footnote to a paper on terrorism which referred to the historic record of the events in Asia Minor in 1915 as "ambiguous." If this is an example of the State Department's scholarship, we are in deep trouble.

There have indeed been incidents of terrorism by Armenians against Turkish diplomats in recent years. These incidents must be deplored. They must be resisted, and the perpetrators apprehended and prosecuted. But to recall the fact of the Armenian genocide is not to condone terrorism of any sort. Indeed, it is only by remaining mindful of the crimes and mistakes of the past that we can effectively avoid repeating them in the future. Of all people, it was Adolf Hitler who most clearly reminded of this fact. When Hitler told his cronies that he intended to exterminate the Jews, Gypsies, and the other non-Aryan peoples he despised, someone dared to suggest the world would not tolerate such a vast crime. Hitler then sneered perhaps the most chilling question of the 20th century: "Who still talks nowadays of the extermination of the Armenians?" The United States should respond to this and all similar questions, with a resounding condemnation of the crimes of the past, and with determination that genocide must be eliminated forever as something which a government could even consider as a means of extending its power.

In the Washington Post on Sunday, April 24, a survivor of Auschwitz made the point. It is fitting to close my remarks on this theme with the words of Allen Kiron "Look and ponder; learn and pray/Above all, remember well/ that silence and indifference/fuel the fires of living hell."●

SOIL STEWARDSHIP WEEK

● Mr. JEPSEN. Mr. President, this week, May 8 through May 15, has been celebrated across the country as Soil Stewardship Week. In churches and other places of worship, in civic centers, in educational settings, and in conservation districts, many are giving thanks and observing the 27th year of special appreciation for the soil and water resources of this Nation.

Every year since 1955, the National Association of Conservation Districts, in cooperation with the 3,000 local conservation districts throughout the Nation, has sponsored Soil Stewardship Week. This year's theme, "Living Waters," was chosen to emphasize concern over the quality and quantity of our water resources.

This comes appropriately at a time when the state of our soil and water resources has deteriorated significantly and when many are predicting that the future availability of those resources is in doubt.

Nonetheless, in my home State of Iowa and in other States, the public is participating in programs that will contribute to our overall respect for natural resources. I commend the National Association of Conservation Districts and all conservation districts for sponsoring and promoting these efforts. Additionally, I take particular pride in noting Iowa's Natural Heritage Foundation's soil stewardship program.

The soil stewardship program is a major coordinated effort to involve the private sector in soil conservation. It is the first project of its kind in the Nation, begun primarily because Iowans have such an appreciation for the land. Unfortunately, Iowa also has the highest soil erosion rate of any State in the Nation. Although Federal efforts have helped considerably, Iowans feel that involving the individual farmer, private organizations, and agribusiness is the only way a concerted and effective soil erosion control program can work.

As noted by the sponsors of the program, "Our soil erosion problem is so great that it must be viewed as everyone's responsibility. We must all share the stewardship of our land and water, and not simply wait for Government to act. Government programs will continue to be important, and deserve support from everyone's tax dollars. But it is also important that those who benefit from Iowa's intensive grain production be enlisted to assume special responsibilities."

It is in Congress with this spirit that I would like to close with a thought from Aldo Leopold, noted naturalist from Burlington, Iowa, and author of "a Sand County Almanac," among other works:

> We shall never achieve harmony with land any more than we shall achieve justice or liberty for people. In these higher aspirations the important thing, is not to achieve, but to strive. It is only in mechanical enterprises that we can expect that early or complete fruition of effort which we call "success." (Aldo Leopold, Conservation, from "Round River: The Journal of Aldo Leopold," 1953.)●

SOVIET ESPIONAGE ACTIVITIES

● Mr. D'AMATO. Mr. President, I rise this afternoon to voice my concern over Soviet espionage activities. During recent weeks, we have witnessed the expulsion of Soviet diplomats from a score of nations. These individuals, hiding under the cloak of diplomatic immunity, have been engaged in an extensive espionage campaign stimulated by a desire to acquire high techology. The Soviets have become increasingly dependent upon these covert acquisitions. While the Soviets have displayed a desire for a wide variety of technology, they have placed particular emphasis on any high-technology secrets which have possible military application.

Judge William Webster, Director of the Federal Bureau of Investigation, recently revealed that nearly 40 percent of the 3,000 East European diplomats in this Nation are involved in operations designed to transfer our military and industrial secrets to Moscow and the capitals of other Communist states. The theft of these secrets poses a clear threat to our national security. It is imperative that the governments of the West develop a comprehensive strategy to combat Soviet espionage.

I encourage my colleagues to read the article by Nicholas Daniloff which recently appeared in U.S. News & World Report. I ask that it be printed in the RECORD.

The article follows:

[From U.S. News & World Report, May 9, 1983]

WHY RUSSIANS WILL GO RIGHT ON SPYING

(By Nicholas Daniloff)

Moscow—The recent mass expulsion of Soviet spies by Western nations may have put a temporary dent in Moscow's espionage network, but the Kremlin has no intention of abandoning its effort to steal secrets from other countries.

Reason: Russia badly needs advanced military and industrial technology. And under Soviet leader Yuri Andropov, who headed the KGB intelligence service for 15 years before rising to this nation's No. 1 position in November, 1982, the Kremlin has the manpower and determination to take from the West the knowledge that its own scientists cannot provide.

After the U.S. expelled three Russians for spying in late April, Director William Webster of the Federal Bureau of Investigation estimated that up to 40 percent of 3,000 Soviet-bloc diplomats in America are trying to ferret out military and industrial secrets.

A LENGTHENING LIST

The U.S. expulsions were the latest in a series of incidents this year, mostly in Western Europe, that resulted in the eviction or arrest of more than 60 Soviet diplomats, officials and other Russians on charges of espionage.

France kicked out 47 Soviets in early April, the largest expulsion since 1971 when Britain ordered out 105 Russians. Other Soviet agents have been caught by Britain, West Germany, Denmark, Spain, Australia, Belgium, Switzerland, the Netherlands and Italy.

Sweden recalled its ambassador to Moscow when a government commission accused the Soviets on April 26 of operating six submarines in Swedish waters last October—a year after indignant Swedes discovered a Soviet submarine stranded in a snooping mission near a restricted Swedish naval base.

Western officials deny that the crackdown is a coordinated effort. But they concede that they keep each other informed of moves against Soviet agents and that the purge signals a tougher reaction to Soviet efforts to close an information gap through thievery.

Espionage gives the Soviet Union a relatively cheap, low-risk means to catch up in high-stakes competition.

Soviet science does well in theoretical mathematics, physics, seismology, astrophysics and oceanography and has made big gains in metallurgy, space exploration and nuclear-power generation.

But the Soviets trail in development of such military-related items as advanced computers and lasers. They also lag in cybernetics, microbiology, psychiatry and in some areas of medicine. They need modern oil-extraction equipment and agricultural aids.

The U.S. warned its European trading partners only last month that Western security was being eroded by Moscow's underhanded drive to obtain sensitive technology. A report by the Central Intelligence Agency says that illegal technology transfers are saving the Kremlin billions of research dollars and shortening the time needed to develop new military systems.

High-technology secrets taken from the West by spies and through illicit trade channels have helped Moscow improve its nuclear missiles, develop new aircraft and perfect stronger, lighter materials for its weapons.

For the past decade, Soviet planners also have counted on stolen scientific knowledge to help boost output from Soviet factories and farms in an effort to revive a seriously ailing economy.

Soviet agriculture, a virtual basket case, provides one illustration of how a technology gap has spurred Moscow to seek information by illicit means.

After years of mismanagement, Russia is chronically dependent on imports to feed its people and livestock. Such purchases, many from the U.S., take a quarter of the economy's hard currency.

Moscow, therefore, needs early and accurate forecasts of crop yields as it juggles limited resources. But crop predictions lag because secretive military operators of Soviet reconnaissance satellites are slow to free their pictures for nonmilitary purposes. As a result, the KGB orders its agents in Washington, many operating as diplomats, to seek data gathered by U.S. satellites that give speedy reports on Soviet crop prospects.

Why is Russia behind in technology? A major reason is that bureaucratic inertia hampers the growth of a Soviet project from conception to reality.

One Soviet scientist explains: "To get an idea into production, you must get the support of your boss. But he may withhold it because he did not think of the idea. If you go over his head, you may harm your career."

FRESH TWIST

According to another scientist, the Kremlin now is trying to encourage innovation through rewards and prizes. Yet difficulties abound. "Not least of these," he says, "is that a factory may be told to produce a new product, but not be relieved of its duty to fulfill its previously assigned plan."

Some Russians trace such attitudes back to the Stalin regime, which pooh-poohed the importance of significant branches of modern science.

But under Andropov, a demand for more potent military forces to counter the U.S. has spurred the emphasis on technology. Another critical need is to overhaul the staggering economy.

Western nations are under no illusion that kicking out a few spies will have a lasting effect on Soviet behavior. The Kremlin has too much technological ground to make up and limited means for doing so. Red-faced though Soviet leaders may be for a time over expulsion of their spies, Moscow still is certain to persist in its illegal hunt for Western discoveries and innovations.●

SOIL STEWARDSHIP WEEK

● Mr. HELMS. Mr. President, the National Association of Conservation Districts, in cooperation with the Nation's nearly 3,000 conservation districts, is sponsoring Soil Stewardship Week May 8–15, 1983. This has been an annual observance since 1955, and focuses national attention on the stewardship of our natural resources. The theme of this year's observance is "Living Waters."

The National Association of Conservation Districts (NACD) represents the Nation's nearly 3,000 conservation districts. Each conservation district is a local unit of government established for the special purpose of developing and directing soil and water conservation programs aimed at helping owners and users of non-Federal lands. Conservation districts assess conservation problems on the local level, set priorities for conservation work to be done and coordinate Federal, State, and local resources to carry out the programs.

NACD provides information and support services to aid its member conservation districts in the conservation, orderly development, and wise use of the Nation's natural resources. USCD represents the conservation districts at the national level.

Soil Stewardship Week, as sponsored by NACD, is carried out through church, civic, and educational groups to encourage good stewardship of our land and water resources. The theme of this year's observance, "Living Water," brings attention to the essential role of water in sustaining life and the responsibilities we all share in preserving this vital resource. Though we cannot destroy water, we can abuse, pollute, and misuse it, making it a curse rather than a blessing. It is ours to use, to enjoy, to keep clean, and to appropriate wisely so that is will give life to all it touches.

I would like to take this opportunity to applaud the efforts of the NACD, and each local conservation district, not only for this 1 week of special observance, but for their services and commitment to the Nation's resources throughout the year.●

SMALL BUSINESS WEEK

● Mr. GLENN. Mr. President, I am pleased today to cosponsor this resolution designating May 8–14 as Small Business Week. It is only fitting that we set aside 1 week annually to recognize the achievements of people who, for 52 weeks each year, immeasurably enhance the quality of life in this country by providing jobs, paying taxes, creating innovative products, supporting charities and building communities.

Unfortunately, this is an extremely difficult time for many small business owners who remember 1982 as the worst year since the Depression. According to Dun & Bradstreet, annual business failures increased 49 percent last year over 1981, and that statistic tells only part of the bleak story. For each of the 25,346 failures that involved losses to creditors, it is estimated that an additional 6 to 10 small businesses simply paid their bills and closed.

Recession and high interest rates, the twin killers of economic prosperity, have combined to push small businesses to the wall. Many of these entrepreneurs have been pushed not just to the wall, but off the ledge to bankruptcy. The situation is desperate—not just for the small business operators

struggling to pay their employees and their bankers, but also for the millions of Americans who depend on small businesses for reasonably priced, high-quality products in their everyday lives.

We cannot allow the deteriorating position of small business to continue. We need a well-coordinated Federal policy to control the disturbing number of small business bankruptcies and unleash the awesome potential economic power of America's estimated 14 million small businesses. We need to do this to make the best possible use of the brainpower, training, experience and desire represented by small business people who ask nothing more than a fair opportunity to test their ideas in the marketplace.

Just as small business cannot succeed without free enterprise, so free enterprise cannot succeed without small business. Statistics tell much of the story: Small and independent businesses account for 97 percent of all businesses; 40 percent of gross national product; and 50 percent of all major innovations and new technologies.

At a time of heavy unemployment, we must be particularly impressed by some estimates that small businesses account for more than 80 percent of all new jobs created in this country. From jet engines to zippers, from insulin to air conditioning, from penicillin to ballpoint pens, small businesses have demonstrated the creativity to develop new products that make life healthier, more prosperous and more comfortable.

Without being inclusive, I want to discuss some of the areas in which thoughtful congressional action could help small business.

These firms need ready access to available capital and they need it quickly. Capital needs vary from firm to firm. Some need short-term working capital and others require long-term funds to build plants or purchase equipment. Small business owners seeking financing are understandably concerned, as I am, by reports that Federal budget deficits under this administration will run dangerously close to $200 billion.

Deficits that high will force the Federal Government to borrow huge sums, driving up interest rates and making it impossible for small businesses to acquire the needed capital. Congress must act prudently to reduce the size of the projected deficit. I do not mean the meat-ax approach pursued by this adminstration that hurts those in genuine need, but rather a carefully tailored program of responsible cuts. This strategy, combined with responsible action by the Federal Reserve System, can help force down interest rates. At the same time, we must take the necessary, but politically painful, steps of eliminating both the third year of the tax cut and the schedule Federal income tax indexing in order to generate more revenues and reduce the size of the deficit.

My commitment to help small businesses obtain the capital they need is not new. In the past few years, for example, I have cosponsored the Capital Cost Recovery Act to liberalize depreciation schedules; and the Pollution Control Financing Act to increase the amount of low-interest money available to smaller firms to design, install and finance pollution control equipment.

One of the most creative capital formation proposals before the Congress this year would launch the Small Business Participating Debenture for firms hoping to expand. By using the SBPD, a cross between a stock and a bond, small business owners could retain total control of their operations while receiving much needed low cost, external capital.

I strongly support this concept as a means to create new jobs and thus increase the flow of tax revenues to the U.S. Treasury.

The Small Business Participating Debenture is a fine example of Government listening to the informed voice of small business and then acting responsibly. Congress can do more to restore the tarnished image of the Federal Government in the eyes of many business owners. With that goal in mind, I cosponsored the Delinquent Payments Act of 1981 to require the Federal Government to pay its bills on time. Many Federal agencies were dragging their feet, forcing businesses to absorb the cost associated with the Government's slow-pay practices. I also cosponsored the Small Business Innovation Act of 1981 to require Federal agencies to earmark 1 percent of their total research and development budgets for small business.

This year, I have cosponsored S. 44 to establish national uniform product liability rules. Currently, no two States have the same product liability laws. The inevitable result is confusion. Because this problem is national in scope, I support this effort to develop a national solution.

Individual pieces of legislation, however, cannot solve all the problems. The voice of small business will remain forever muffled in the highest reaches of national policymaking until its spokemen and spokewomen are included as members of the many advisory committees formed in the Nation's Capitol.

Too often, it seems, membership in Fortune's 500 is the required license to serve on these advisory bodies. Small businesses, for example, are labor-intensive and therefore contribute a disproportionately high share of payroll taxes to finance social security. Yet all the business members on the National Commission on Social Security represented giant financial and industrial interests. This kind of imbalance should never occur again. We must also maintain and strengthen the Small Business Administration as an independent agency with an increased role for the Office of Advocacy. To guarantee that the voice of small business is heard in the White House, I recommend the appointment of a special adviser to the President on small business matters.

We must also take positive steps to promote small business sales in international markets, a largely untapped source of new revenues and new jobs. Small businesses need help from the Federal Government to understand the intracacies of exporting. Specifically, they need timely marketing information at reasonable cost.

I cosponsored the Export Trading Company Act to make financing available to small business for export purposes because now less than 1 percent of this country's manufacturing firms account for 80 percent of all exports. Our small businesses can sell overseas, if given some assistance, but much more needs to be done in this field. The Export-Import Bank should make greater efforts to finance small business sales and our Special Trade Representative should act to insure greater participation of small businesses in foreign trade discussions.

These recommendations do not constitute a comprehensive program but they do reflect a fundamental principle of my economic policy: We must promote small business as a national priority not just because it is a matter of economic justice, but because it is a matter of economic survival for our free enterprise system. By fashioning a coordinated policy for small business, we demonstrate our faith in the managerial skills, innovativeness and commonsense of millions of men and women, who, together, represent the engine of American economic growth. It is time we recognize that small is not inferior and that bigger is not necessarily better. By designating May 8-14 as "Small Business Week," we recognize the excellence of the contributions that small businesses make to the lives of our communities and the prosperity of our Nation.●

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have a series of unanimous-consent requests that appear to be cleared on both sides, and I would like to state them now for the consideration of the minority leader and other Senators.

ORDER FOR ADJOURNMENT UNTIL MONDAY, MAY 16, 1983

Mr. BAKER. Mr. President, as I indicated earlier, it is not my intention to ask the Senate to be in tomorrow.

Therefore, I ask unanimous consent that when the Senate completes its business today it stand in adjournment until the hour of 12 noon on Monday, May 16.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

ORDERS FOR MONDAY, MAY 16, 1983

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate convenes on Monday, May 16, 1983, the reading of the Journal be dispensed with, no resolutions come over under the rule, the call of the calendar be dispensed with, and following the recognition of the two leaders under the standing order, there be a special order in favor of the Senator from South Carolina (Mr. THURMOND) and the Senator from Connecticut (Mr. WEICKER), for not to exceed 15 minutes each, to be followed by a period for the transaction of routine morning business not to exceed 30 minutes in length, with Senators permitted to speak therein for not more than 5 minutes each; and provided further that the morning hour be deemed to have expired.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO PROCEED TO THE CONSIDERATION OF NOMINATION OF WILLIAM D. RUCKELSHAUS TO BE ADMINISTRATOR OF THE ENVIRONMENTAL PROTECTION AGENCY ON MONDAY NEXT

Mr. BAKER. Mr. President, also as I indicated earlier, it is my hope that we can go to the Ruckelshaus nomination which has been reported from the Environment and Public Works Committee, which is on the calendar, and I will put now a request as in executive session:

Mr. President, I ask unanimous consent that on Monday, May 16, at 1 p.m., the Senate go into executive session to consider the nomination of William D. Ruckelshaus, of Washington, to be Administrator of the Environmental Protection Agency and it be considered under the following time agreement: Two hours on the nomination to be equally divided between the chairman of the Environment and Public Works Committee and the ranking minority member, or their designees.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO PROCEED TO NOMINATION OF ALFRED S. REGNERY TO BE ADMINISTRATOR OF OFFICE OF JUVENILE JUSTICE AND DELINQUENCY PREVENTION

Mr. BAKER. Also as in executive session, Mr. President, a matter that I believe is cleared on both sides.

I ask unanimous consent that, at 10 a.m. on Tuesday, May 17, the Senate go into executive session to consider the nomination of Alfred S. Regnery, of Virginia, to be Administrator of the Office of Juvenile Justice and Delinquency Prevention and it be considered under the following time agreement: 1 hour on the nomination to be equally divided between the chairman of the Judiciary Committee and the ranking minority member or their designees.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOTING PROCEDURE NEXT WEEK

Mr. BAKER. Mr. President, I have another request. I indicated earlier that it would be my intention to ask the Senate to stack votes on Monday.

I now ask unanimous consent that any rollcall votes ordered on Monday, May 16 and Tuesday, May 17, prior to the hour of 2 p.m. on executive nominations as in executive session, amendments, and relative motions regarding S. 529, the immigration bill, be postponed to begin at 2 p.m. on Tuesday, May 17, to occur in sequence.

Mr. BYRD. Mr. President, reserving the right to object, would the majority leader provide a little time between each vote for an explanation of the amendment?

Mr. BAKER. Yes, Mr. President, I think that is a good idea. I modify the request so that there would be 5 minutes, equally divided, for discussion of the measure prior to the stacked votes.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE IMMIGRATION BILL

Mr. BAKER. Mr. President, there is one other unanimous-consent request that I would like to propound which is going through the clearing process in respect to time for final passage on Tuesday of the immigration bill. As soon as that is cleared, I believe that will complete our requests at this time.

I am now told by the minority leader that has been cleared. Let me say before I put the request that I believe ample time has been provided for final disposition of the immigration bill, which I fully support. But I can assure the minority leader and the managers of the bill on both sides that if there are difficulties with it, I will join in an effort to make sure nobody gets cut out or there is not a compression of time that would prevent us from having a further debate on the issues.

Mr. President, I ask unanimous consent that, after the close of the time for the transaction of routine morning business today, the Senate proceed to the consideration of Calendar Order No. 98, S. 529, the immigration bill.

Mr. President, I further ask unanimous consent that the Senate resume consideration of the immigration bill following its return from executive session on Monday as previously ordered.

I further ask unanimous consent, Mr. President, that final passage on the immigration bill, S. 529, occur not later than 10 p.m. on Tuesday, May 17, and that paragraph 4 of rule XII be waived.

Before the Chair puts the request, since this was done in bits and pieces, may I inquire of the Chair, is there an order, as I believe I recall, that the Senate would go into executive session on Monday for not more than 2 hours of debate on the Ruckelshaus nomination?

The PRESIDING OFFICER. There is.

Mr. BAKER. And the request I have just put is that when the Senate returns to legislative session after consideration of the Ruckelshaus nomination on Monday the Senate would resume consideration of the immigration bill?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I put the request.

The PRESIDING OFFICER. Is there objection? Hearing no objection, it is so ordered.

Mr. BYRD. Mr. President, does the majority leader include in the carrying over of votes for Monday to Tuesday a rollcall vote on the Ruckelshaus nomination?

Mr. BAKER. Yes, Mr. President, I believe that was included. I do not have the papers in front of me, but I believe that was included. I inquire of the Chair if his understanding is the same as mine.

The PRESIDING OFFICER. That was included.

Mr. BAKER. It was included?

The PRESIDING OFFICER. It was included.

Mr. BAKER. That votes ordered on Monday would include the Ruckelshaus nomination, if a vote is ordered on it, to occur on Tuesday?

The PRESIDING OFFICER. The Senator is correct.

Mr. BYRD. Mr. President, I ask the majority leader, the only exception is with reference to a possible rollcall vote to have the Sergeant at Arms arrest Members or compel their attendance?

Mr. BAKER. Mr. President, I modify my request so that votes ordered on Monday, with the exception of votes to require the attendance of absent Senators or other procedural motions, will be stacked to occur on Tuesday, as previously ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I believe that completes the list of requests that I have to make.

Mr. BYRD. The majority leader does not mean, "by other procedural motions," a motion to table.

Mr. BAKER. Only in respect to attendance of the absent Senators.

Mr. President, I have no further need for time in morning business. I know the Senator from Arizona is anxious to get to the immigration bill, as

is the Senator from Massachusetts and the Senator from Wyoming.

If anybody seeks time for the transaction of routine morning business, this is the time, or if we finish the immigration bill and there is further demand for morning business, I will be glad to provide for it.

I ask the Chair to inquire if there is further morning business.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

IMMIGRATION REFORM AND CONTROL ACT OF 1983

The PRESIDING OFFICER. The clerk will report S. 529.

The assistant legislative clerk read as follows:

A bill (S. 529) to revise and reform the Immigration and Nationality Act, and for other purposes.

The Senate resumed consideration of the bill.

Mr. SIMPSON. Mr. President, I do very much appreciate the efforts of the majority leader and the minority leader in the very excellent resolving of the situation so that we might proceed with the immigration reform legislation.

I express my deep personal appreciation to Senator BYRD and other Senators for their continuing accommodation with this Senator with regard to this very complex legislation we are resuming from last Tuesday. I also thank Senator KENNEDY's willingness and want to proceed. He has been more than accommodating not only this year but last year also. Indeed, we are very appreciative of that.

As we proceed with this legislation, Senator KENNEDY and I will be present to deal with the bill. The votes ordered will be stacked for later voting, but we will be here for a full day of debate. If Senators will, please bring their amendments to the Chamber.

I believe Senator DECONCINI wants to lay down his amendment.

The PRESIDING OFFICER. The DeConcini amendment is pending.

Mr. DECONCINI. Mr. President, I am shortly going to ask unanimous consent that that amendment be modified. Let me explain what the modification is.

In the course of the last week or so as we have been struggling on the budget, there have been negotiations with the office of the Senator from Massachusetts, the office of the Senator from California, and the office of the chairman and his staff, and we have come to a slight modification. It still provides for a 3-year transition, plus an additional 6-month period for the H-2 workers provision to be implemented for a partial certification.

AMENDMENT NO. 1220, AS MODIFIED

Mr. DECONCINI. Mr. President, at this time I send a modification to the desk and ask that my amendment be so modified.

The PRESIDING OFFICER. The amendment will be so modified.

The amendment, as modified, is as follows:

On page 184 of Committee Print No. 1, add the following new section:

"SEC. 214. (a) The Attorney General, in consultation with the Secretary of Labor and the Secretary of Agriculture, shall promulgate rules and regulations for the implementation of an agricultural labor transition program. The program shall be effective on the first day of the sixth month beginning after the date of enactment of this Act and shall last three years from the effective date.

(b) During the first year of the transition program, an agricultural employer, except as provided in subsection (c), (d), and (e) below, may, as provided by regulation, employ up to 100 percent of his seasonal agricultural worker need with transitional workers. During the second and third years of the program, the employer may employ up to 67 percent and 33 percent respectively, of his seasonal agricultural worker needs with transitional workers.

(c) Nothing in this section shall permit transitional workers to replace available U.S. workers or legal foreign workers admitted under the Immigration and Nationality Act.

(d) All workers employed under the provisions of this section shall be fully protected by all federal and state laws and regulations governing the employment of U.S. migrant and seasonal agricultural workers.

(e)(1) An undocumented alien in the United States shall be eligible to be a transitional worker under the provisions of this section if the person is employed or has been employed as a seasonal agricultural worker in the United States for at least 90 days during a period of time after January 1, 1980.

(2) An undocumented worker shall not be eligible to be a transitional worker and may not be registered under this section if the person is deportable for any reason other than those described in section 241 (a)(2) and (9), or on the basis, under section 241 (a)(1), of being excludable at the time of entry under paragraph (19) (20), or (26) of section 212(a). Only persons employed as transitional workers and registered as such by the Attorney General during the first year of the program shall be eligible during the second and third years.

(f) To employ transitional workers under the provisions of this section, an agricultural employer must—

(1) notify the Attorney General of said, employer's intention to participate in the transition program within 12 months from the effective date of this Act section, and

(2) provide to the satisfaction of the Attorney General a numerical count of the numbers of seasonal agricultural workers employed during the immediately preceding 12 month period by said employer.

(g) After an employer begins participation in the agricultural labor transition program the employer shall provide, upon request, to the Attorney General a numerical count of the number of transitional workers employed and the total number of seasonal agricultural workers employed by said employer.

(h) Any eligible employer under the transition program who employs nonimmigrant alien agricultural workers under the provisions of section 101(a)(15)(H)(ii)(a) shall provide wages and working conditions as required by section 214(c)(2)(A)(ii) to all similarly employed workers of that employer.

(i) Agreement by an alien to be a transitional worker would not preclude that alien from eligibility under the legislation provisions of title III.

(j) The Attorney General may require by regulation, as a condition of participation by an employer in the transition program, the payment of a fee to recover the reasonable costs of processing registrations under the transition program.

Mr. DECONCINI. Mr. President, it is my understanding that next week when this is resumed, the Senator from California intends to offer an amendment to that which will be debated in accord with the time agreement, and that there will be a vote, if necessary, on my amendment. Is that the chairman's understanding?

Mr. SIMPSON. That is my understanding of the situation.

Mr. DECONCINI. I thank the Senator for accommodating this Senator, as well as the Senator from Massachusetts accommodating me. I also appreciate the efforts of the Senator from California. I know he has some reservations on my amendment but he will have an opportunity to clarify that.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. I thank the Chair.

Mr. President, I will be taking up the amendment of Senator DECONCINI on Tuesday. I do have a perfecting amendment to the DeConcini-Wilson amendment which I will put across the desk at this time. It is not my intention to lay it down today. Rather, in order to accommodate the Senator from Wyoming, I would simply lay the amendment down and we will then reserve debate on it until the appropriate time when we will be taking up the DeConcini amendment on Tuesday. Is that agreeable to the managers of the legislation?

The PRESIDING OFFICER. That would take a unanimous-consent request, or after yielding back all time on the DeConcini amendment or after the time has expired.

Mr. WILSON. Then I make a request by unanimous consent.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from California?

Mr. SIMPSON. Mr. President, if I may say, the Senator from Arizona has a modified amendment which he has laid down and which will be the first order of business. That will be managed by Senator WILSON since Senator DECONCINI will not be present. Senator WILSON has a per-

fecting amendment. It would be all right to have a rollcall vote on the Wilson amendment to the DeConcini amendment, as modified, and then come back to the DeConcini amendment on a rollcall vote.

Mr. DECONCINI. If the Senator will yield, after the Wilson amendment is disposed of, if unanimous consent is granted, and I have no objection to it, if there is a necessity for a rollcall vote on the DeConcini-Wilson amendment I will leave up to the managers of the bill.

Mr. SIMPSON. That will be perfectly appropriate.

Mr. DECONCINI. It is in order now.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from California? If not, without objection it is so ordered.

The Senator from Massachusetts.

Mr. KENNEDY. First of all, Mr. President, I want to express my appreciation to the Senator from Arizona for the work he has done in this area. He has taken a very keen interest on the issue of immigration reform and he has been very mindful of the needs of the people that he represents. I think those of us who follow this issue closely know of the very conflicting interests which are present not only in the State of Arizona but in many of the areas of this country where there are large agricultural communities.

I want to express both my appreciation and admiration of the Senator from Arizona for the way he has addressed this issue, and to again thank the Senator from Wyoming and the other interested groups that represented both the growers as well as the workers on this important issue.

It is my intention at the appropriate time to support the DECONCINI compromise. I must say I will do so, and I do not have any hesitation in doing so, although I am mindful that in this legislation there have been some rather important changes in the H-2 provisions which were included in the pending bill and which I do feel may very well threaten the protection for American workers in this area.

However, this amendment has been worked out over many weeks of discussion and compromise—which I have been pleased in joining with my colleagues from Arizona and Wyoming in promoting. I have done so because I am aware of the legitimate concerns of the agricultural growers of this country—especially those in the West who will be most affected by the new provisions contained in this legislation. I have also done so because I share the concerns of the American labor movement that we must not weaken the labor standards or protections of our law toward agricultural workers, either those here under temporary H-2 visas or for those Americans who are seasonal agricultural workers.

I believe the DeConcini amendment, as modified, will provide a transition period that is necessary to allow growers a reasonable opportunity to adjust to the new requirements of this legislation—both the employer sanctions provisions as well as the new H-2 temporary worker program.

There has been an understandable concern on the part of many agricultural employers that it will take them some period of time to adjust to these provisions—since under existing law they have tacitly been encouraged to hire undocumented aliens.

This amendment will allow a 3-year transition period, with important labor protections, for agricultural employers to implement the new law. It will serve as an encouragement for them to abide by the law, and make it easier for them to do so.

It provides for an orderly phasedown over 3 years of all undocumented aliens currently on the payroll of agricultural employers, requiring that these numbers be reduced by one-third each year, over the 3-year period—with the program ending at the end of 3 years. During this period the transitional workers would receive the same benefits and protections of H-2 temporary workers.

This will allow employers a period to both hire American workers as well as to apply for temporary workers if they cannot find American workers. It will do so without violating and compromising American labor laws or standards.

Mr. President, although I have supported the effort to reach this compromise over the amendment offered by Senator DECONCINI, I have, as I said at the outset, deep reservations over the other H-2 provisions contained in this legislation.

As last year, I believe these changes represent a serious erosion of existing labor protections and standards. Taken together, these changes will:

Delete the existing reference to nationwide recruitment before H-2 workers can be hired;

Prohibit U.S. workers from seeking terms above the minimum Department of Labor minimum wages;

Authorizes multicrop associations to be the sole employer, relieving important responsibilities from individual growers; and

Transfer final rulemaking authority on the H-2 program from the Secretary of Labor to the Attorney General, with statutory involvement of the Secretary of Agriculture for the first time.

Again, Mr. President, taken together, these and other changes in the existing H-2 program represent a step backward in our Nation's attempt to establish greater wage and labor standards for both American and foreign temporary workers.

Mr. President, I have had a preliminary discussion with the Senator from California (Mr. WILSON) who has taken a great interest in this issue as well, and who I know has given a good deal of time and attention to it. I must say I also have some serious reservations about his proposal, but I will look forward to the opportunity of debating that matter more completely on Monday, perhaps, with the final disposition on Tuesday.

Again, I think the time that we have had since this legislation was initially laid down has been used well. We have been able to address, I think in a very responsible way, some key matters which were then unresolved. I would hope that that spirit would continue through the rest of the debate.

Again, I look forward to joining with my colleague, the Senator from Wyoming, in addressing the rest of the amendments on Monday and hope and expect that we will get final disposition of the legislation on Tuesday.

I welcome the agreement of the Senator from Wyoming for a thorough and complete debate on one of the very important remaining items, and that is the issue of asylum judicial review. I believe we have been given assurances that we will have a 2-hour debate on that issue, 1 hour on each side. I know a number of my colleagues are very interested in that question. I would intend to offer that amendment after the disposition of the stacked rollcall votes. I would urge that those Members of the Senate who want to participate in that debate be prepared to do so on Tuesday afternoon.

Mr. SIMPSON. Mr. President, I thank my colleague from Massachusetts.

I pay particular tribute to Senator DECONCINI for what he has done, working doggedly to provide the agricultural growers of America with a transitional labor force which I have the same feelings about as Senator KENNEDY, that it is something that must not impinge upon legal workers in the United States. But after decades of tacitly permitting agricultural employers to use alien agricultural labor they have quite lawfully become dependent upon them, and lawfully so.

So, we are trying to wean them off, so to speak, from the illegal work force. I think this will do it and will actually assist in the enforcement of the employer sanction provisions of the bill by accommodating the growers as they become familiar with the H-2 program.

I look forward to the Monday activity and look forward, as always, to working with Senator KENNEDY. I commend Senator DECONCINI on a thoughtful approach to what has been one of the toughest issues we have had

on the question of immigration reform.

I thank the Chair.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered

THE CALENDAR

Mr. BAKER. Mr. President, I have four items on my calendar that appear to be cleared for action by unanimous consent.

May I inquire of the minority leader if he is in a position to similarly consider S. 884, Senate Resolution 133, Senate Resolution 90, and Senate Concurrent Resolution 24.

Mr. BYRD. Mr. President, this side of the aisle is ready to proceed.

Mr. BAKER. I thank the Senator.

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the items just enumerated.

The PRESIDING OFFICER. Without objection, it is so ordered.

USE AND DISTRIBUTION OF CERTAIN INDIAN JUDGMENT FUNDS

The Senate proceeded to consider the bill (S. 884) to provide for the use and distribution of funds awarded the Red Lake Band of Chippewa Indians in docket No. 15-72 of the U.S. Court of Claims; which had been reported from the Select Committee on Indian Affairs with amendments, as follows:

On page 3, line 1, strike "3.", and insert "2.";

On page 3, line 14, strike "4.", and insert "3.";

So as to make the bill read:

S. 884

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any provision of the Act of October 19, 1973 (87 Stat. 466; 25 U.S.C. 1401, et seq.), or any other law, regulation, or plan promulgated pursuant thereto, the funds appropriated with respect to the judgment awarded the Red Lake Band of Chippewa Indians in docket numbered 15-72 of the United States Court of Claims (less attorney fees and litigation expenses), including all interest and investment income accrued thereon, shall be distributed and used as follows:

(1) Eighty per centum of such funds shall be distributed by the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Red Lake Band of Chippewa Indians who are living on the date of enactment of this Act.

(2) Twenty per centum of such funds, including any interest or income accrued thereon, shall be—

(A) held in trust and invested by the Secretary for the benefit of the members of the Red Lake Band of Chippewa Indians, and

(B) distributed from such trust, subject to the approval of the Secretary, to the governing body of such tribe for the purpose of making expenditures to meet common tribal needs or educational requirements.

SEC. 2. (a) Any payment of a per capita share of funds to which a living, competent adult is entitled under this Act shall be paid directly to such adult.

(b) Any per capita share of funds to which a deceased individual is entitled under this Act shall be paid, and the benificiaries thereof determined, under regulations prescribed by the Secretary.

(c) Any per capita share of funds to which a legally incompetent individual under eighteen years of age is entitled under this Act shall be paid in accordance with such procedures (including the establishment of trusts) as the Secretary determines to be necessary to protect the interests of such individuals.

SEC. 3. None of the funds distributed under this Act shall be—

(1) subject to Federal, State, or local income taxes, or

(2) considered income or resources in determining either eligibility for, or the amount of assistance under, Federal State, or local programs.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SOLIDARITY SUNDAY

The Senate proceeded to consider the resolution (S. Res. 133) to express the sense of the Senate on support of "Solidarity Sunday."

The resolution was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 133

Whereas on May 22, 1983, the eighty-five constituent agencies of the Greater New York Conference on Soviet Jewry will sponsor the twelfth annual "Solidarity Sunday for Soviet Jewry" to reaffirm their resolve to secure freedom for Soviet Jews and beleaguered people everywhere; and

Whereas Americans of all faiths will join with the Conference in myriad activities on that day in expression of their solidarity with the almost three million Jews in the Soviet Union; and

Whereas the right to emigrate freely and to be reunited with their families abroad is being denied Jews and others in the Soviet Union; and

Whereas the Universal Declaration of Human Rights adopted by the General Assembly of the United Nations and the Helsinki Final Act clearly recognize those rights; and

Whereas the Government of the Soviet Union has implemented restrictive measures sharply reducing the number of people permitted to emigrate, bringing Jewish emigration from the Soviet Union to a virtual halt; and

Whereas the Government of the Soviet Union is persecuting its Jewish citizens and denying them even those rights and privileges accorded other recognized religions in the Soviet Union; and

Whereas the Government of the Soviet Union discriminates against Jewish cultural activities by banning and suspending Hebrew and Jewish cultural classes, by threatening Hebrew teachers, and by intimidating all Soviet Jews who seek only to practice their religion; and

Whereas leading Soviet Jewish activist and cultural figure, Mr. Anatoly Shcharansky, who was arrested in March of 1977 and falsely charged with espionage and "anti-Soviet agitation", continues to suffer exceptionally harsh treatment in Chistopol Prison; and

Whereas a virtulent anti-Semitic campaign continues unabated in the Soviet press and Soviet Jews are increasingly deprived of occupational and educational opportunities; and

Whereas thousands of innocent Jews and other persons, after applying to leave the Soviet Union, have been subjected to illegal induction into the armed forces, incarceration in mental institutions, expulsion from school and constant surveillance and harassment; and

Whereas the Government of the Soviet Union will not succeed in isolating Soviet Jews from their friends in the free world so long as those who cherish liberty continue to speak on behalf of beleaguered people everywhere; and

Whereas "Solidarity Sunday for Soviet Jewry" will serve as a vigorous expression of American determination to secure freedom for Soviet Jewish Prisoners of Conscience incarcerated solely because of their desire to emigrate, and veteran refuseniks who have awaited exit visas for as many as fourteen years; and

Whereas the Government of the Soviet Union refuses to permit the free exercise of religious beliefs and cultural expression and also refuses to remove all obstacles to the free emigration of its Jewish citizens and others who wish to leave and live in other countries: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Congress supports "Solidarity Sunday for Soviet Jewry" in an effort to achieve these goals and encourages Americans to participate.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RELEASE OF ANATOLY SHCHARANSKY

The resolution (S. Res. 90) expressing the sense of the Senate that the Soviet Government should immediately release Anatoly Shcharansky and allow him to emigrate, was considered, and agreed to.

The amendments to the preamble were agreed to.

The preamble, as amended, was agreed to.

The resolution, and the preamble, as amended, are as follows:

S. RES. 90

Whereas Anatoly Shcharansky, an eminent Soviet computer scientist, has been a leader of the Moscow Jewish community since 1973 when he first applied for and was denied permission to emigrate to Israel;

Whereas the Government of the Soviet Union has engaged in a systematic campaign of harassment and intimidation against Anatoly Shcharansky, culminating in his arrest in March 1977 on trumped-up charges of treason;

Whereas in July 1978, after sixteen months of being detained incommunicado, Anatoly Shcharansky was tried and sentenced to thirteen years of imprisonment;

Whereas since his conviction Anatoly Shcharansky has been subject to extremely harsh prison treatment, including isolation, severe cold, and inadequate food, sleep, and health care, resulting in a deterioration of his health;

Whereas from September 26, 1982, to January 14, 1983, Anatoly Shcharansky undertook a hunger strike to protest the severe prison conditions which have further harmed his health;

Whereas Anatoly Shcharansky symbolizes the plight of Soviet Jewry whose level of emigration is at its lowest point in a decade and who is increasingly harassed by Soviet authorities; and

Whereas by its treatment of Anatoly Shcharansky and others, the Soviet Union is violating its international obligations, including its obligations under the Universal Declaration of Human Rights, the International Covenant of Civil and Political Rights, and the Helsinki Final Act of the Conference on Security and Cooperation in Europe: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the Government of the Union of Soviet Socialist Republics should immediately release Anatoly Shcharansky from prison and allow him to emigrate; and

(2) the President and the Secretary of State should, at every suitable opportunity and in the strongest terms, express to the Government of the Union of Soviet Socialist Republics the opposition of the United States to the imprisonment of Anatoly Shcharansky.

SEC. 2. The Secretary of the Senate shall trasmit a copy of this resolution to the President with the request that the President transmit such copy to the Ambassador of the Soviet Union to the United States.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

OLDER AMERICANS MONTH

The Senate proceeded to consider the concurrent resolution (S. Con. Res. 24) expressing the sense of the Congress that the people of the United States should observe the month of May 1983 as Older Americans Month.

Mrs. HAWKINS. Mr. President, I rise to support a Senate concurrent resolution to designate the month of May as Older Americans Month.

To recognize the valuable contributions of the elderly to our country, it has become a tradition in Congress to designate May as "Older Americans Month," a time to pay tribute to our Nation's senior citizens.

It is not enough simply to recognize their accomplishments, however; we must reaffirm our commitment to protecting the rights of the elderly and to enhancing their opportunities for purposeful participation in our society—which is what truly gives meaning to life.

The elderly are the fastest growing segment of America's population. Today, one in nine Americans is a senior citizen. By the turn of the century, that figure will be one in six. In Florida, which has the highest number of elderly residents in the Nation, 17 percent of the population is already over age 65, and that percentage is growing rapidly.

These figures add up to a powerful impact on our society. Often, we concentrate only on the problems of the elderly, such as the increasing need for housing or long-term medical care. Certainly, these issues must be addressed. But the happy fact is that only a small percentage of America's elderly are bedridden or confined to institutions.

Most senior citizens lead active and productive lives, most are self-reliant, and most own and maintain their own homes. Older Americans today are better educated, healthier, and more financially secure than ever before. They are more independent, more active in the workforce and in volunteer service, and more politically influential than in the past.

Our President is a senior citizen. Many Congressmen are senior citizens. Some of our most beloved stage and screen stars—people like George Burns, Helen Hayes, and Bob Hope—are senior citizens. James Beard—as familiar a name as Betty Crocker—turned 80 this month. But we must also recognize the contributions and accomplishments of all our elderly, not just the well known. Senior citizens from all walks of life make valuable contributions to such important programs as ACTION, VISTA, SCORE, the Foster Grandparents program, and many other volunteer programs. Programs for senior citizens in this country could not survive without the thousands of senior volunteers who contribute to their success.

The ability and willingness of the elderly to continue to work and contribute to the quality of American life is very encouraging. Nevertheless, we must insure that our retirement, health, employment, and housing programs are flexible enough to adapt to this changing population. We should not see it as a problem or a burden. Instead, our Nation's elderly should be regarded as the vast natural resources of experience and expertise that they are. During Older Americans Month, we should reflect on the fact that the wisdom of age is a gift money cannot buy and one that we as a nation must be careful not to squander.

So this May, as we meet to honor older americans, we should honor and pay tribute to them not just for their past achievements, but for the ongoing contributions that they are making to improve the quality of American life.

Mr. DOMENICI. Mr. President, I am pleased to be sponsoring this concurrent resolution. The observance of the month of May as Older Americans Month serves several important purposes.

First, it gives us an opportunity to express appreciation for the achievements of senior citizens. We must not forget that this group has been responsible for the growth and the success of the United States in the 20th century. Older Americans continue to make important contributions to our Nation and to the communities in which they live. I know few people, for example, who can equal the energy and efficiency which Ann Beckman of Albuquerque brings to her job. Mrs. Beckman usually places over 100 senior citizens in positions each month. She is but one illustration of the many senior citizens in New Mexico who are involved in the development of our State.

It is critical that older Americans maintain a highly active role in our daily life. I am convinced that we need their insights and their experiences to solve the problems that we face today.

In turn, our society must provide opportunities for growth and increasing independence among the elderly. Various surveys show that income security and affordable health care are now among the chief concerns of senior citizens. Congress should use the month of May to review its agenda with respect to these critical issues. We have gone a long way in assuring the financial stability of retirees by passing in Social Security Amendments of 1983. We must also take responsible action to retain the solvency of our health insurance trust fund and to contain rising health care costs. In short, I think there is more work which must be done.

Finally, I hope we will take time during this next month to reflect upon the fact that America today is an aging society. The older population is growing more rapidly than the rest of the population. While 11 percent of all Americans were age 65 or older in

1982, this number will increase to 19 percent by 2025. By 1990,. the ratio of people over age 65 to those under 65 will probably be 1 to 8; by 2025, it will be 1 to 5. We must prepare for all of these developments. I believe that only by planning wisely now can our public policy successfully accomodate these events. Older Americans Month should be marked by serious attention to these trends.

The concurrent resolution was agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, reads as follows:

S. CON. RES. 24

Whereas older Americans have contributed many years of service to their families, their communities, and the Nation;

Whereas the population of the United States is comprised of a large percentage of older Americans representing a wealth of knowledge and experience;

Whereas acknowledgement should be given to older Americans for the contributions they continue to make to their communities and the Nation; and

Whereas many States and communities provide such acknowledgement of older Americans during the month of May: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That in recognition of—

(1) the traditional designation of the month of May as "Older Americans Month" by the President of the United States, and

(2) the repeated expression by the Congress of its appreciation and respect for the achievement of older Americans and its desire that these Americans continue to play an active role in the life of the Nation, it is the sense of the Congress that the people of the United States should observe Older Americans Month with appropriate programs, ceremonies, and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING TESTIMONY OF VINCE THOMAS

Mr. BAKER. Mr. President, on behalf of myself and the distinguished minority leader, I send to the desk a resolution to authorize testimony of Vince Thomas in a matter pending in the U.S. District Court for the Eastern District of Michigan. I ask unanimous consent that the Senate proceed to the consideration of the resolution.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 141) to authorize the testimony of Vince Thomas.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 141

Whereas, in the case of *Quintus L. Greene v. The Wayne County Economic Development Corporation, et al.,* No. 81-74813, pending in the United States District Court for the Eastern District of Michigan, the testimony of Vince Thomas, a staff employee of Senator Carl Levin, has been requested concerning the Metropolitan Growth and Development Corporation and the Metropolitan Growth and Development Fund;

Whereas, by the privileges of the Senate of the United States no evidence under the control or in the possession of the Senate can be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that testimony of a staff employee of the Senate is needful for use in any case for the promotion of justice, the Senate will take such action thereon as will promote the ends of justice consistently with the privileges and rights of the Senate; Now, therefore be it

Resolved, That Vince Thomas is authorized to appear and testify in this case concerning the Metropolitan Growth and Development Corporation and the Metropolitan Growth and Development Fund.

S. 529—IMMIGRATION BILL

AUTHORIZATION FOR D'AMATO AMENDMENT

Mr. BAKER. Mr. President, I ask unanimous consent that in connection with the consideration of S. 529, the immigration bill, an amendment to be offered by the distinguished Senator from New York (Mr. D'AMATO) dealing with imprisoning aliens be added to the list of qualified amendments appearing in the order previously entered; that the time for debate on that measure be limited to 30 minutes, equally divided, and that the provisions of paragraph 4 of rule XII be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

FOUNDATION FOR THE ADVANCEMENT OF MILITARY MEDICINE

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 653.

The PRESIDING OFFICER laid before the Senate the following mesage from the House of Representatives:

Resolved, That the bill from the Senate (S. 653) entitled "An Act to amend title 10, United States Code, to establish a Foundation for the Advancement of Military Medicine, and for other purposes", do pass with the following amendments:

(1) Page 2, line 22, after "Representatives", insert: *(or their designees from the membership of such committees)*

(2) Page 5, line 18, strike out [(1)].

(3) Page 5, strike out lines 21 and 22.

Mr. JACKSON. Mr. President, I am very pleased to support S. 653, a bill establishing the Foundation for the Advancement of Military Medicine, as amended by the House. This bill was originally introduced in the Senate on March 2, 1983, by Senator TOWER and myself, and was passed by the full Senate on March 23.

The House of Representatives passed S. 653 on May 9, 1983. In passing this bill, the House made two amendments to the Senate bill which I support and which I want to describe briefly for my colleagues.

The version of S. 653 passed by the Senate named the chairman and ranking minority member of the House and Senate Armed Services Committees to serve on the Council of Directors of the Foundation. The first amendment made by the House allows the chairman and ranking minority member of the House and Senate Armed Services Committees to designate another member of their respective committees to serve in their place on the Council of the Foundation. Any such designation is intended to be completely at the discretion of the chairman or ranking minority member.

The second amendment by the House to the original Senate bill deleted proposed subsection (h)(2) of section 178 of title 10, United States Code. This provision of the Senate-passed bill stated that:

No part of the compensation paid to an employee of the Foundation may be paid from Federal funds.

The House deleted this provision from S. 653 on the grounds that it was superfluous, since subsection (h)(1) of new section 178 of title 10, United States Code clearly states that:

A person who is a full-time or part-time employee of the Federal government may not be an employee (full-time or part-time) of the Federal government.

Thus, even with the House amendment, it is clear that the Foundation will be completely independent of the Federal Government and will not be supported by direct Federal expenditures.

Deleting this provision also clarifies a question raised after the Senate-passed S. 653. The Senate Armed Services Committee fully intended that employees of the Foundation would be able to compete for grants and contracts from the Federal Government as well as from private foundations. The House deletion of subsection (h)(2) of section 178 will avoid any interpretation of the law that might impede the Foundation or its employees from competing for and receiving grants from the Federal Government to support their work.

After the Senate approved S. 653, there were some discussions in the House about expanding the membership of the Foundation's Council of Directors from the nine members stipulated in the Senate-passed bill. I am pleased that the House decided to retain the nine-member Council of Directors recommended by the Senate.

The composition of the Council of Directors insures that the Congress, through the Armed Services Committees of both Houses, will be involved in the purposes, direction, and supervision of the Foundation. If necessary, there is nothing in S. 653 to preclude the Council from establishing an advisory group or honorary board to advise or assist the Council in addressing particular needs of the Foundation.

Mr. President, I believe that the Foundation for the Advancement of Military Medicine established by S. 653 will make an important contribution to the unique role of the Uniformed Services University of the Health Sciences. The Foundation will allow interested members of the public, without Government expenditures, to become involved in medical advances for the uniformed services through donations and legacies which will support important research, teaching, and services in military medicine. The Foundation will also make a useful contribution toward enhancing cooperation and communication between the military and civilian medical communities.

I want to thank Senator TOWER, who joined me in originally introducing S. 653, and Senator JEPSEN, Senator THURMOND, Senator EXON, Senator LEVIN, and Senator KENNEDY for joining as cosponsors. I also want to thank my colleagues in the House—Chairman PRICE, Congressman STRATTON, Congressman ASPIN, Congressman MONTGOMERY, and Congressman HILLIS—for their efforts in addressing S. 653 at a very busy time in the legislative year.

I urge my colleagues to join me in supporting this bill as amended by the House.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

INCREASE IN MEMBERSHIP OF THE CONGRESSIONAL AWARD BOARD

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 957.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 957) entitled "An Act to provide for an increase in the number of members of the Congressional Award Board, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That (a) subsection (a) of section 4 of the Congressional Award Act (Public Law 96-114; 2 U.S.C. 803(a)) is amended—

(1) by striking our "seventeen" in the matter preceding the colon in paragraph (1) and inserting in lieu thereof "thirty-three";

(2) by striking out "Four" in clauses (A), (B), (C), and (D) of paragraph (1) and inserting in lieu thereof "Eight"; and

(3) by striking out "or the Committee for the Establishment and Promotion of the Congressional Award" in paragraph (2).

(b) Subsection (b) of section 4 of such Act (2 U.S.C. 803(b)) is amended—

(1) by striking out "Appointed" at the beginning of such subsection and inserting in lieu thereof "Except as provided in paragraph (2), appointed";

(2) by inserting at the end thereof the following new paragraph:

"(2) Individuals appointed to the Board after March 31, 1983, shall serve for terms of two years."; and

(3) by inserting "(1)" after "(b)", and by redesignating paragraphs (1), (2), and (3) as subparagraphs (A), (B), and (C), respectively.

SEC. 2. Notwithstanding the provisions of section 4 of the Congressional Award Act (2 U.S.C. 803), relating to the terms of individuals appointed to the Congressional Award Board, the sixteen additional members to be appointed to the Board pursuant to the amendments made by the first section of this Act shall be appointed for terms as follows:

(1) Six members shall be appointed for terms of two years.

(2) Five members shall be appointed for terms of four years.

(3) Five members shall be appointed for terms of six years.

Thereafter such members shall be appointed for terms of two years.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. Without objection it is so ordered.

COMMITTEE TO BE DISCHARGED FROM FURTHER CONSIDERATION OF SENATE RESOLUTION 95

Mr. BAKER. Mr. President, I ask unanimous consent that once the Finance Committee has reported Senate Resolution 95, a resolution to express the sense of the Senate that the President initiate negotiations on a new long-term agreement on agricultural trade with the Soviet Union, the Committee on Agriculture, Nutrition, and Forestry be discharged from further consideration of that measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

CHANGE IN REFERRAL OF S. 338

Mr. BAKER. Mr. President, I ask unanimous consent that the agreement of February 2, 1983, the sequential referral of S. 338 to the Committee on Armed Services be modified by deleting the date June 15, 1983, in the agreement and inserting in lieu thereof the date June 30, 1983.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMOVAL OF INJUNCTION OF SECRECY—EASTERN PACIFIC OCEAN TUNA FISHING AGREEMENT

Mr. BAKER. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from the Eastern Pacific Ocean Tuna Fishing Agreement (Treaty Document 98-3), transmitted to the Senate on May 11, 1983, by the President of the United States; and ask that the treaty be considered as having been read the first time; that it be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

I transmit herewith, for the advice and consent of the Senate to ratification, the Eastern Pacific Ocean Tuna Fishing Agreement which has been signed by the United States, Costa Rica, and Panama. It will enter into force following ratification by five coastal States of the region. Also transmitted for the information of the Senate is the report of the Department of State with respect to the Treaty.

The United States has been involved in a fisheries dispute with several Latin American countries as a result of conflicting laws regarding jurisdiction over highly migratory tuna and has, in the past, prohibited imports of tuna from several countries as a result of seizures of U.S. tuna boats. These countries claim jurisdiction over all fish, including tuna, within 200 nautical miles. The United States does not recognize, or claim, jurisdiction over tuna beyond 12 nautical miles. United States policy, pursuant to the Magnuson Fishery Conservation and Management Act, has been to negotiate international agreements to ensure the effective conservation and management of tuna and to secure access for U.S. fishermen to the stocks wherever they migrate beyond a narrow belt of coastal waters.

This Agreement, which is interim in nature pending the negotiation of a comprehensive tuna conservation and management regime, provides for the issuance of international licenses for fishing tuna in a broad area of the eastern Pacific Ocean. Provision is also made for conservation under specified circumstances. It thus furthers U.S. fisheries policy goals while reducing tensions that have arisen as a result of conflicting juridical claims.

I recommend that the Senate give early consideration to the Treaty and

give its advice and consent to ratification.

RONALD REAGAN.

THE WHITE HOUSE, *May 11, 1983.*

ORDER FOR THE SENATE TO CONVENE AT 11:30 A.M. ON MONDAY

Mr. BAKER. Mr. President, it has been brought to my attention that we have two special orders on Monday as well as the time allocated to the two leaders under the standing order and 30 minutes of morning business. Also, an order has been entered by the Senate to proceed to the consideration of the Ruckelshaus nomination in executive session at 1 p.m.

I am afraid that, in the parlance of the Budget Committee, that is not mathematically consistent, meaning that we do not have enough time to do all those things.

Therefore, I ask unanimous consent that the convening hour on Monday next be changed from 12 noon to 11:45 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, will the distinguished majority leader get me an extra 10 minutes on Monday?

Mr. BAKER. I will be pleased to do that.

Mr. President, I ask unanimous consent that on Monday next, the Senate convene at 11:30 a.m.

I further ask unanimous consent that on Monday, the time of the distinguished minority leader under the standing order be extended from 10 to 20 minutes.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. Any time remaining after the execution of the two standing orders will be devoted to the provision of additional time for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT UNITL 11:30 A.M. MONDAY, MAY 16, 1983

Mr. BAKER. Mr. President, I believe that clears the deck. I do not see any other Senator seeking recognition. I have a sneaking hunch the minority leader and I are the only two Senators left.

Therefore, I move in accordance with the order previously entered the Senate stand in adjournment until 11:30 a.m. on Monday next.

The motion was agreed to; and at 5:29 p.m., the Senate adjourned until Monday, May 16, 1983, at 11:30 a.m.

NOMINATIONS

Executive nominations received by the Senate May 12, 1983:

IN THE AIR FORCE

The following Air National Guard of the United States officers for promotion in the Reserve of the Air Force under the provisions of section 593(a) title 10 of the United States Code, as amended:

LINE OF THE AIR FORCE

To be lieutenant colonel

Maj. Jacob C. Armstrong Jr., xxx-xx-xxxx
Maj. James W. Byram, xxx-xx-xxxx
Maj. Theodore M. Demars, xxx-xx-xxxx
Maj. Richard G. Farmer, xxx-xx-xxxx
Maj. Thomas C. Garell, xxx-xx-xxxx
Maj. Steven V. Harper, xxx-xx-xxxx
Maj. Jon C. Heaton, xxx-xx-xxxx
Maj. Gary K. Holt, xxx-xx-xxxx
Maj. Jack T. Knight, xxx-xx-xxxx
Maj. Harold D. May, xxx-xx-xxxx
Maj. Rudolph W. Morgan, xxx-xx-xxxx
Maj. Robert J. Opela, xxx-xx-xxxx
Maj. Edward S. Shaw, xxx-xx-xxxx
Maj. Herbert D. Wright, xxx-xx-xxxx
Maj. John G. Zenan Jr., xxx-xx-xxxx

CHAPLAIN

Maj. Joseph H. Penkaul, xxx-xx-xxxx

LEGAL

Maj. Stephen L. Gallagher Jr. xxx-xx-xxxx

MEDICAL CORPS

Maj. Robert D. Wendel, xxx-xx-xxxx

IN THE ARMY

The following-named officers for appointment in the Regular Army of the United States, in their active duty grades, under the provisions of title 10, United States Code, sections 531, 532, 533:

JUDGE ADVOCATE GENERAL'S CORPS

To be majors

Baxley, George C., xxx-xx-xxxx
Mac Argel, Donald T., xxx-xx-xxxx
Zijlstra, Eduard T., xxx-xx-xxxx

To be captains

Borch, Frederic L., III, xxx-xx-xxxx
Boudreau, Debra L., xxx-xx-xxxx
Buchholz, Ronald J., xxx-xx-xxxx
Butler, Robert M., xxx-xx-xxxx
Contento, Denise P., xxx-xx-xxxx
Cunningham, Patrick J., xxx-xx-xxxx
Defranco, Rosemary, xxx-xx-xxxx
Dickey, Gene A., xxx-xx-xxxx
Donawick, Peter M., xxx-xx-xxxx
Dubia, Donald H., xxx-xx-xxxx
Elliott, James W., xxx-xx-xxxx
Farenish, John M., xxx-xx-xxxx
Feller, Robert C., xxx-xx-xxxx
Fitzpatrick, John M., xxx-xx-xxxx
Glazier, Nancy D., xxx-xx-xxxx
Graham, Michael D., xxx-xx-xxxx
Hancock, George L., Jr., xxx-xx-xxxx
Harvey, Mark W., xxx-xx-xxxx
Heuer, Ronald K., xxx-xx-xxxx
Kelleher, Michael J., xxx-xx-xxxx
Lloyd, Robert B., Jr., xxx-xx-xxxx
Long, John L., xxx-xx-xxxx
Mac Kay, Scott W., xxx-xx-xxxx
McFetridge, Robert C., xxx-xx-xxxx
McMahan, Linda M., xxx-xx-xxxx
Milhizer, Eugene R., xxx-xx-xxxx
Morris, John R., xxx-xx-xxxx
Motz, Patricia A., xxx-xx-xxxx
Pelletier, Richard A., xxx-xx-xxxx
Phillips, Dennis L., xxx-xx-xxxx
Rheinheimer, Edward G., xxx-xx-xxxx
Richmond, Henry R., xxx-xx-xxxx
Rob, Samuel J., xxx-xx-xxxx
Romano, Michael J., xxx-xx-xxxx
Santerre, Elyce K., xxx-xx-xxxx
Saufley, Jeffrey O., xxx-xx-xxxx
Saunders. Raymond M., xxx-xx-xxxx
Schmidli, James D., xxx-xx-xxxx
Smith, Robert M., Jr., xxx-xx-xxxx
Taylor, Gregory, xxx-xx-xxxx
Thebaud, Charles C., Jr., xxx-xx-xxxx
Trimble, Dan, xxx-xx-xxxx
Venema, William H., xxx-xx-xxxx
Vowell, Denise K., xxx-xx-xxxx
Waldrop, Michael D., xxx-xx-xxxx
Wiesner, Vivian B., xxx-xx-xxxx
Wilbanks, James C., xxx-xx-xxxx
Williams, Harry L., Jr., xxx-xx-xxxx
Wilson, William T., xxx-xx-xxxx
Wittman, Craig P., xxx-xx-xxxx
Woodruff, Joseph A., xxx-xx-xxxx
Wright, Douglas R., xxx-xx-xxxx

HOUSE OF REPRESENTATIVES—*Thursday, May 12, 1983*

The House met at 11 a.m.

The Reverend Edward L. R. Elson, S.T.D., Chaplain of the U.S. Senate, retired, offered the following prayer:

God of our fathers and our God, who has watched over this Nation from generation to generation, bestow Thy boundless grace and Thy higher wisdom upon all who serve in this place.

Open our eyes to the simple beauty of the world about us. Open our minds to the truth that sets men free. Open our hearts to the goodness and nobility people hide from us because we do not try to understand them. Keep us at tasks so hard we are driven to Thee for strength. May our work be our worship. And may goodness and mercy follow us all the days of our lives that we may abide with Thee forever.

In Thy holy name we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. HUNTER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. HUNTER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 362, nays 20, answered "present" 4, not voting 46, as follows:

Mr. BOLAND, Mr. BATES, and Mrs. VUCANOVICH changed their votes from "present" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

REPRESENTATIVE MICHEL DOING WELL

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, I know my colleagues will be pleased to learn that our distinguished Republican leader, BOB MICHEL, is recovering well from surgery for appendicitis at Bethesda Naval Hospital. I understand that he is in good spirits and that he expects to be back to work very shortly.

I accused him of having teenage surgery.

But although I know he misses being here, and we miss him, I understand that he is watching the House floor proceedings from his room at Bethesda. So, BOB if you are watching, I know my colleagues join me in wishing you a speedy recovery and our best wishes for a quick return.

CLINCH RIVER BREEDER REACTOR

(Mr. BOUCHER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOUCHER. Mr. Speaker, today the House will consider the question of further funding for the Clinch River breeder reactor. As a member of the Science and Technology Committee, I urge my colleagues to join me in opposing additional funding for Clinch River until the electric utility industry indicates a willingness to bear its fair share of the project's costs.

Projections for electricity demand are down; no new nuclear reactors have been ordered since 1978; abundant supplies of uranium are available to fuel the needs of the plants presently on line during the rest of their useful lives.

While the cost of the project has risen from a 1971 estimate of $669 million to $8.8 billion, the private industry contribution remains constant at only $257 million. The Federal taxpayer will be billed for the balance.

I urge my colleagues to support the Brown-Schneider amendment halting any further Federal expenditures until the Congress enacts a plan to share the costs with the private sector.

FUNDING OF THE MX

(Mr. SABO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SABO. Mr. Speaker, I noticed with interest two stories in the morning paper. One that a House subcommittee had given the President the goahead on the MX missile. Second, that the President said that no budget was better than a budget that contained tax increases.

I would suggest, Mr. Speaker, that if the President is serious about proceeding with this very dangerous, ill-advised, $17 billion bargaining chip, at a minimum he should be willing to tell the American people that they have to pay for it and that we are not going to spend borrowed dollars to pay for the cost of this little, "eenie-bitsie" $17 billion bargaining chip.

AIDS

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, I wish to make an urgent plea that adequate and specific funding be provided to combat the growing health menace known as acquired immunodeficiency syndrome or AIDS. As of March 24 of this year a total of 1,300 definite cases of AIDS had been reported to the Center for Disease Control in Atlanta. These came from 35 States and the District of Columbia—but as a Representative from New York—I must note that tragically 50 percent of the cases came from New York City.

Over 80 percent of the AIDS patients diagnosed in 1980 are now dead. AIDS has killed more people in this Nation than toxic shock syndrome and Legionnaires disease combined. The number of reported AIDS cases is now averaging between three and four a day.

AIDS is striking down victims from diverse areas. While it has been associated with a limited segment of the population, it is now affecting people who may acquire it from blood transfusions. It is affecting men and women.

I urge the subcommittee to continue to recognize the severity of this problem and support sufficient funding not only for research into the causes and hopefully the cure of this dreaded disease—but also to assist the Center for Disease Control in establishing appropriate and accessible procedures by which AIDS cases can be reported.

In last year's continuing resolution, we provided an additional $2 million for AIDS research. I would hope that the subcommittee could approve as at least a base—the administration's budget request of $11.5 million for AIDS research and might target further funds based on the increases afforded to NIH in the first concurrent resolution on the budget.

UNFAIR ATTACK ON THE RIGHT OF AMERICANS TO BUY GOLD COINS

(Mr. PAUL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAUL. Mr. Speaker, last week the House Foreign Affairs Committee approved a measure that would prohibit any person from bringing South African gold coins into the United States. This was included in title 7 of the State Department authorization bill. Among other provisions, there is a stiff financial penalty for trading in these gold coins.

I think this action of the Foreign Affairs Committee is an outrageous violation of the rights of American citizens. I certainly deplore the domestic policies of South Africa that deny full civil rights to black Africans. But I also strongly deplore the domestic and foreign policies of Russia and Communist China that deprive their citizens—and the people of Poland, Afghanistan, and Southeast Asia—of human rights and liberty.

Yet I do not propose that we enact laws and criminal penalties for Americans who buy things from Russia or China. Two wrongs do not make a right.

Communist China has just recently begun to sell gold coins in the United States. These are attractive gold coins with the image of a panda, and they are designed to compete against the gold coins of South Africa. Has any member of the House Foreign Affairs Committee suggested legislation to prohibit these Chinese coins? No—the gold coins of South Africa are singled out for prohibition, and any American who wants to buy one will be punished. Mr. Speaker, this is the wrong approach. I intend to fight to protect the rights of American citizens to buy coins and other products from anywhere they freely choose.

The fairest way in which to stem the sale of Krugerrands in the United States is to pass the Gold Eagle Coin bill and let Americans buy American gold coins. This would be more in the American spirit of justice and competition.

□ 1130

JUST IN TIME

(Mr. SHUMWAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SHUMWAY. Mr. Speaker, this morning's Washington Post carried a succinct if rueful letter to the editor entitled "Just in Time." The author has seen through the congressional cloak of "responsibility," and has realized that in many instances the legislative branch has not acted—it has only reacted. Worst of all, that reaction has come so late that it does more harm than good.

As Mr. Forman points out, we have contributed to the deficit in the name of easing recessionary unemployment when an end to the recession was generally acknowledged. We attempted to hamstring disarmament negotiators with a pointless nuclear freeze measure just when a realistic negotiating effort was being born.

Mr. Forman might well have predicted our latest effort to save the day—the $760 million "emergency" homeowners bill which passed last night. As he has concluded with justifiable sarcasm, "when you're hot, you're hot!"

JUST IN TIME

Just as soon as it was clear the recession was over, Congress passed the multi-billion-dollar anti-recession jobs bill.

Just as the Soviet Union finally offered potentially meaningful nuclear arms reduc-

tion in Europe, the House passed the nuclear freeze resolution. Under this bill, we would be required to reject the Soviet offer in favor of freezing the current imbalance first.

Next the House considers whether to repeal the final installment of the federal income tax reductions, in spite of all evidence that they are the tonic the economy needs. Judging by its performance so far this year, Congress will probably act just in time to pull the rug out from under the recovery.

Why not? When you're hot, you're hot.

FRED L. FORMAN.

OAKTON.

EXCEPTION TO THE EXCLUSIONARY RULE

(Mr. DEWINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEWINE. Mr. Speaker, I rise in support of the President's proposal to enact a good faith exception to the exclusionary rule. The law governing warrantless searches is unclear, often conflicting, and subject to constant change, and so gives the police limited guidance in determining whether their actions will ultimately be upheld in court. Consider, for example, the virtually identical facts in two drug cases both decided with differing results by the Supreme Court on the same day in 1981. In both *Robbins* v. *California*, U.S. , 101 S. Ct. 2842 and *New York* v. *Belton*, U.S. , 101 S. Ct. 2860, police officers lawfully stopped a car, smelled burnt marihuana, discovered marihuana in the passenger compartment of the car, and lawfully arrested the occupants. Thereafter, in Robbins the officer found two wrapped packages in the recessed rear compartment of the car, opened them without a warrant, and found 30 pounds of marihuana. In Belton, the officer found a jacket in the passenger compartment, unzipped the jacket without a warrant, and found a quantity of cocaine.

In decisions based largely on cases that had not even been decided at the time of the two searches, the court split as follows: Three justices opined that both were illegal; the remaining three justices, reaching differing conclusions in the two cases, controlled the ultimate decision that Robbins was illegal and Belton was legal. Moreover, in these decisions the court did not give the police any real guidance to understand the law of warrantless searches of automobiles, and less than a year later the issue was again before the court in *Ross* v. *United States* U.S., 102 S. Ct. 2157 (1982) in which the holding in Robbins was repudiated. It was probably small consolation for the police involved in the search in Robbins to know that their view of the law in this area was ultimately upheld by the Supreme Court in another case, since the defendant in Robbins went free because the evidence was excluded. Mr. Speaker, to say that the suppression of reliable, trustworthy evidence in this type of case helps to deter police "misconduct" is totally unfounded and the acquital of the defendant is nothing less than outrageous. Congress can and must act to bring this outrage to an end.

BRACKET CREEP: THE STEALTH TAX

(Mr. MCCANDLESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MCCANDLESS. Mr. Speaker, this is the time of year when most Americans become preoccupied with crabgrass and ragweed. We spend a lot of time fussing over those weeds, and they cause us much grief in the form of sore backs and stuffed sinuses.

But there are two other weeds, far more dangerous, that we should be concerned about right now and it does not matter where you live. These weeds attack city dwellers and country folk alike. They choke off the growth of opportunity and advancement at every turn. These weeds are everywhere, and only the Congress can kill them.

The weeds are bracket creep, that deadly vine that pushes wage earners ever higher into debt to Uncle Sam—and its loathsome companion, inflation ivy. Entwined, they steadily surround and squeeze the paycheck of every American worker—although they seem to prefer the poor and middle class.

These weeds need no water or nutrients. All they need to flourish is for this Congress to repeal that enlightened measure known as tax indexing.

This is what the young American worker who began his job in 1970 faces today: His income has risen over the years to partially offset the effects of inflation. However, he now finds himself in a higher tax bracket based on these artificially high earnings. But his real income, based on 1970 dollars, is less than he received in 1970.

He, and every other American worker, is the victim of a deception that the Congress has allowed to happen. But we have mitigated that problem with tax indexing. Let us stick with it.

NEW SPENDING OBSTACLE TO CREATION OF JOBS

(Mr. MACK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MACK. Mr. Speaker, since this House convened in January, we have heard a constant chorus of concern about the huge deficits we face. Yet all during this time what has the Congress been doing to reduce those deficits?

Nothing—in fact, this Congress has acted to make them worse—since January, the House has voted appropriations totaling $4.6 billion in new spending for the current fiscal year. In addition, this House has approved—new spending authorization—increased authorizations above the current level, increased off budget program or disapproved spending deferrals totaling $6.6 billion.

The point I want to make, Mr. Speaker, is that every dollar of new spending that this House has voted since January is a dollar that is going to be denied to those in our country who want to borrow for a new car, to buy a new home, to expand their business or start a new one; in other words, Mr. Speaker, every dollar of new spending is another obstacle to the creation of badly needed jobs in the private sector of this country, and those who yell the most about deficits and unemployment ought to be aware of that fact as they constantly vote for more and more new spending.

SUPPORT PRESIDENT REAGAN'S EXCLUSIONARY RULE IN CRIME CONTROL ACT

(Mr. LIVINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIVINGSTON. Mr. Speaker, the time has come for Congress to hear the cry of the many victims who fall prey to criminal activity.

Citizens of our great Nation live in constant fear because criminals dictate their daily behavior.

At this very moment any member of our families could become a victim of a senseless crime only to allow the culprit to walk free because of a mere technicality in our search and seizure law. What can we do? Support the President in his efforts in regard to the exclusionary rule limitation provisions of the Comprehensive Crime Control Act of 1983. The act allows evidence to be used in court that was obtained by police in a reasonable, good faith belief that it was in conformity with the fourth amendment of the Constitution of the United States. If a warrant was issued under intentional and material misrepresentation then the evidence would be excluded in a court of the United States.

Why should illegal contraband be excluded from evidence because of a technicality when the contraband was obtained by law enforcement officials who had reasonable, good faith belief that their efforts were in conformity with the fourth amendment of the United States? There is no good reason, Mr. Speaker. The exclusionary rule is not part of the Constitution; it

has been created by judges and can be changed by judges, as it already has been in the fifth circuit which has adopted this good faith exception. Congress also has the power to change it, and we should accept President Reagan's invitation to impose the good faith exception on a nationwide basis.

SUPPORT BAIL REFORM MEASURES IN H.R. 2151

(Mr. DREIER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER of California. Mr. Speaker, too often, violent criminals are allowed to return to the streets because of flaws in our current bail system.

The bail process is sadly nothing but a revolving door. The Justice Department has documented thousands of cases in which violent criminals are apprehended and hard evidence is obtained against them.

But despite the clear threat these violent criminals pose to society, because of the weakness of our present bail laws, these criminals are soon set free on bail, often committing the same crime for which they were first arrested.

The fact of the matter is that under current law, judges cannot consider the defendant's potential for repeating violent criminal acts when setting that defendant's bail.

By preventing the denial of bail to violent criminals, our system encourages repeat offenses and threatens the safety and security of our cities.

The citizens of this Nation and our law enforcement officials deserve better protection from violent criminals. We must stop the revolving door that current bail laws have created, and therefore, I urge my colleagues to join me in supporting President Reagan's proposed bail reform measures in H.R. 2151.

PRESIDENT'S CRIME PACKAGE

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, I am pleased to be able to join with my colleagues to commend the Reagan administration for its efforts to address the violence that inflicts the cities, towns, and neighborhoods of America through the Comprehensive Crime Control Act of 1983.

This 44-point crime package already introduced by a number of Members is a major step toward stemming the tide of criminal activity which currently threatens the citizens of our Nation. Some of its most important features include:

A reform of our bail laws in order to make it more difficult for a defendant that is likely to be a threat to the community to be released on bail;

A provision that would establish determinate sentencing without possibility of parole;

The establishment of a "good faith" exception to the exclusionary rule; and

A criminal forfeiture provision that would strike at the economic base of criminal enterprises and deny those engaged in racketeering and drug trafficking the fruits of their ill gotten gain.

These and other important provisions of the bill warrant the prompt action of this Congress. In this regard, I am heartened by the fact that the other body has already had two hearings on the Comprehensive Crime Control Act, with three additional days scheduled throughout the remainder of this month. It is my feeling that it is imperative that this House should likewise not delay any further the consideration of this much needed reform of our criminal laws.

CLINCH RIVER BREEDER REACTOR

(Mr. GREGG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GREGG. Mr. Speaker, I rise today to address the House relative to the issue of Clinch River which we will be taking up later today.

Twice before committees of this House have defeated this project and once before the whole House has defeated this project. It is a totally inexcusable boondoggle whose costs have expanded from $700,000,000 when it originated to over $8 billion today. It is a project which assumes, in order to be commercially viable, that the cost of nuclear fuel will exceed $100 per pound and yet today that cost of nuclear fuel is around $20 per pound.

The issue here is not nuclear power and whether or not you support nuclear power; the issue is whether or not there is any economic justification for the program called the Clinch River breeder reactor and there is none.

This project survives not because of its economic viability but because it has a few strong political friends and it is time that we killed it permanently.

VA REIMBURSEMENT FOR CHIROPRACTIC SERVICES

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, I am introducing legislation today that would authorize eligible veterans to receive reimbursement for chiropractic services received in certain circumstances through the Veterans' Administration health care program.

Under current law, the VA has the authority to provide chiropractic services to veterans, and any VA physician may on a case-by-case basis refer an eligible veteran to a chiropractor for treatment. Despite this authority, only a few veterans have ever been referred by VA physicians to a chiropractor at VA expense.

My legislation would establish a pilot program to encourage the use of chiropractors within the VA. It limits the number of veterans who are eligible for its benefits and also limits total expenditures for chiropractic services under the pilot program to $2 million per year.

To facilitate the proper utilization of chiropractic services through the VA, chiropractors would be included in the VA utilization review procedure under my legislation. Unless extended, this pilot program would expire on September 30, 1986.

Mr. Speaker, I believe our Nation's veterans deserve the same access to health care as do recipients of other Federal health care programs. Currently, reimbursement for chiropractic treatment is provided under medicare, medicaid, Federal Employee Health Benefit programs, Federal Employee Workmen's Compensation, and other programs.

I believe it is time that the VA's policy and practice be brought in line with these Federal programs. In addition, over three-fifths of the States, representing some 70 percent of the Nation's population, require inclusion of chiropractic services under all commercial health and accident policies written in those States.

Chiropractic care is a benefit that veterans are requesting. My legislation is supported by many national veterans organizations including the Veterans of Foreign Wars, the Disabled American Veterans, the Paralyzed Veterans of America, and Military Order of the Purple Heart, and the National Association for Uniformed Services. Many other groups now have this legislation on their agenda to be approved.

Mr. Speaker, this legislation is very similar to bills introduced by Senator STROM THURMOND during the 96th, 97th, and 98th Congresses. These bills were passed in the Senate during the two previous Congresses. This year, the Senator's bill has already been approved by the Senate Veterans' Affairs Committee and is awaiting consideration by the entire Senate.

Mr. Speaker, I am certain that my colleagues would agree that our veterans should be free to choose the type of health care that will help alleviate

the pain and suffering inflicted on them while serving our Nation.

LET US MODERNIZE WITH THE MX

(Mr. COURTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, some Members of Congress voted against the deployment of MX because there was no decision on a basing mode. That decision has now been made. There are some Members in this body who did not vote in favor of the procurement of the MX because they thought the President's negotiating position in Geneva was too inflexible. He indicated yesterday great flexibility.

In my mind, if we do not modernize, the Soviet Union will be convinced of the rightness of their position.

In the early 1970's we said we would modernize by the late 1970's. In the mid-1970's we said we would modernize by the early 1980's. In the late 1970's we said we would modernize by the mid-1980's and now in the early 1980's there are those who say we should shove off the decision to the late or early 1990's.

If what we said then did not turn out the truth, why in the world would the Soviet Union believe us now?

□ 1145

THE INSANITY ISSUE

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, one of the most extraordinary bizarre results in criminal justice happened when the Hinkley case showed the weakness of our insanity defense in our court system.

The omnibus crime package, presented by the administration, deals with that subject and deserves the attention of this House of Representatives. I believe that there will be a unanimity of thought among most of us or all of us with regard to shifting the burden of proof of insanity from the prosecution to the defense.

If that were in place perhaps at the time the Hinkley case arose, we would not have had that bizarre result.

The crime package which we will be considering I hope in its entirety or piece by piece will give us the opportunity to strike a solid blow in favor of stabilizing our criminal court procedures so that the prosecution will not have the undue burden of having to prove that in fact the defendant was free of any kind of insanity.

I am hopeful that the Subcommittee on Criminal Justice, of which I am a member, and the Committee on the Judiciary as a whole, will report to us promptly on that venture.

FINANCIAL DISCIPLINE—TOUGH TO ACHIEVE

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROEMER. Mr. Speaker, the Federal Government has accumulated programs over the years to feed the hungry, care for the sick, provide for adequate retirement, lift up the poor, house the homeless, assist the unemployed, educate the ignorant, train the unskilled and now to guarantee homeownership.

This has been at great cost to the taxpayer, but the actions are not evil, in fact, can be positive for the quality of life in America.

And if financial discipline is found, can be afforded by our Nation.

Discipline in defense spending, which is too high.

Discipline in water project spending, which is often uncontrolled. Discipline in new programs, which are not adequately analyzed. Discipline in entitlement spending. Financial discipline with compassion and equity can yield lower interest rates and move this economy forward again. Financial discipline, tough to achieve. Financial discipline, absolutely essential to preserve the thing that we most love about America, its freedoms.

IS THIS ADMINISTRATION SERIOUS ABOUT ARMS CONTROL?

(Mr. DOWNEY of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY of New York. Mr. Speaker, yesterday some of our colleagues who are strong supporters of the freeze resolution and wondering what their position should be on MX received a letter from the President offering some concessions.

Mr. Speaker, I think anyone who takes the time to read the letter will find that our colleagues have gotten humidity in August from the President. There is nothing new about the President's approach to arms control. Only when thousands, hundreds of thousands of people in Europe demonstrated did he decide to come forward with a START proposal. Only when he lusted after the MX was he prepared to deal for a new change in the START proposal.

Mr. Speaker, until Mr. Pearl, Mr. Jones, Mr. Clarke, and Mr. Weinberger find other employment, I doubt very seriously that this administration is serious about arms control.

IT IS TIME TO TAKE CHRYSLER CORP. OFF WELFARE

(Mr. GRAMM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRAMM. Mr. Speaker, 3 years ago when we debated the Chrysler loan bailout a provision was put into that bill to reward the American taxpayer for the risk incurred in guaranteeing $1.2 billion of loans to Chrysler Corp.

That risk premium was the option to buy Chrysler stock at $13 per share through the issuing of 14.4 million warrants.

Mr. Speaker, Chrysler Corp. is on the road back. Its stock sold yesterday for $26. The chairman of the board of Chrysler has suggested that we now give back those warrants.

I suggest, Mr. Speaker, that as the principal stewards of the public's purse we owe it to the American taxpayer to sell those warrants, to take the $220 million that we have earned by taking that risk, and apply it to the deficit.

I think it is important, Mr. Speaker, that we continue to reduce the welfare rolls. I think we can take a big step in that direction by selling these warrants, by claiming our $220 million, and taking Chrysler Corp. off welfare.

PERMISSION FOR SUBCOMMITTEE ON ADMINISTRATIVE LAW AND GOVERNMENTAL RELATIONS OF THE COMMITTEE ON THE JUDICIARY TO SIT TODAY DURING 5-MINUTE RULE

Mr. SAM B. HALL, JR. Mr. Speaker, I ask unanimous consent that the Subcommittee on Administrative Law and Governmental Relations of the Committee on the Judiciary be permitted to sit on Thursday, May 12, 1983, while the House is considering amendments under the 5-minute rule.

The purpose of the subcommittee meeting is to markup H.R. 597, a bill to increase the maximum amount for military claims, to hear and markup H.R. 2479, a bill for the Acacia Mutual Life Insurance Co., and to mark up private bills.

The minority has been consulted and has agreed to this request.

The SPEAKER pro tempore (Mr. LOWRY of Washington). Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO HAVE UNTIL 5 P.M., FRIDAY, MAY 13, 1983, TO FILE REPORTS ON H.R. 2973, H.R. 2990 AND H.R. 500

Mr. FLIPPO. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means have until 5 p.m., Friday, May 13, 1983, to file reports on the following bills: H.R. 2973, H.R. 2990 and H.R. 500.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

REQUEST FOR PERMISSION FOR COMMITTEE ON THE JUDICIARY TO HAVE UNTIL 5 P.M., FRIDAY, MAY 13, 1983, TO FILE REPORT ON H.R. 1510

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary have until 5 p.m., tomorrow, Friday, May 13, 1983, to file a report on H.R. 1510, the Immigration Reform and Control Act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. WALKER. Reserving the right to object, Mr. Speaker, can the gentleman tell me whether this has been cleared with the minority?

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

I am not aware that it has been cleared with the minority. I just got word from the staff because of the apparently fairly short session today. It is just simply a filing of the report, but if there is any objection, I would be happy to check back.

Mr. WALKER. Further reserving the right to object, I might say to the gentleman I probably would have no objection to it, but if the gentleman will check with the minority and withdraw the request until we have some indication as to whether or not this has been cleared with our side, I would appreciate it. Then I do not think there would be any problem.

Mr. MAZZOLI. Mr. Speaker, I withdraw my unanimous-consent request.

The SPEAKER pro tempore. The gentleman from Kentucky (Mr. MAZZOLI) withdraws his unanimous-consent request.

NATIONAL CHILDREN'S LIVER DISEASE AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 234), designating the week beginning May 1, 1983, as "National Children's Liver Disease Awareness Week," and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. COURTER. Reserving the right to object, Mr. Speaker, and I do not object, I just wanted to mention a couple of things.

Mr. Speaker, this I believe is an extremely important initiative by the gentleman from New York (Mr. GARCIA) and the gentleman from New York (Mr. MOLINARI), as well as myself.

Very few Americans recognize the number of deaths that occur because of children's liver diseases. The transplantation of livers is something that is becoming acceptable. It is now a procedure that saves up to 75 percent of children who undergo the operation.

I think this type of initiative bringing the Congress and the American people more aware of the tremendous number of lives that can be saved is a valid and important initiative.

We have read and listened to the news recently, Mr. Speaker, of very young children who have lost their lives in an attempt to live. But we often do not read about all the many other children who are living very normal lives because they have had the liver transplantation.

So therefore, I rise in support of House Joint Resolution 234, designating the week of June 19 as National Children's Liver Disease Awareness Week.

In the last several months the citizens of our country have followed the progress of a young child in Tennessee, Brandon Hall, as he struggled to survive after having received a liver transplant. Although it is sad to note that Brandon Hall died this morning, it is because of this brave child's trials and tribulations that so many individuals have been made aware of the urgent need for further research and support. I myself was unaware of the severity of the problem until I became involved in the successful attempts of two children in my district to obtain liver transplants. Fortunately, both these children have had liver transplant operations and are doing very well.

It is a little known fact that there are over 100 types of children's liver diseases and that youngsters afflicted with liver disease die at a higher rate than children with leukemia or muscular dystrophy combined. At this time, the only hope for terminally ill children with liver disease lies in liver transplantation. Yet, this has always been one of the most difficult and complicated medical operations to perform. The process of finding an adequate donor is also very complicated.

Recent advances in liver transplantation have allowed a large majority of patients to survive the surgical procedure and experience significant prolongation of life. Latest developments with the new drug cyclosporing have greatly enhanced the success of these operations by aiding the body in resisting the rejection of the transplanted liver. This drug, which has led to a success rate of approximately 75 percent, will soon receive approval from the FDA.

A consensus development conference on the subject of liver transplantation will be held in June at the National Institutes of Health. This conference will discuss transplantation and, because of the tremendous improvements in the survival rates of these operations, may determine that liver transplantation can be reclassified from experimental to therapeutic.

However, medical research still has a long way to go toward eradicating these childhood disorders. At present, only four facilities exist in the United States capable of performing a liver transplant operation. Continued progress in the area of pediatric liver research is essential. Accelerated education and training to increase the understanding of the liver among both the medical and public sector would contribute significantly to that progress.

It is for these reasons that I strongly support passage of House Joint Resolution 234. It is time to develop an active partnership of public-private efforts to combat this major disease.

Mr. Speaker, at this time I yield to the gentleman from New York (Mr. MOLINARI).

Mr. MOLINARI. Mr. Speaker, when I was securing the necessary cosponsorships for this resolution, many of my colleagues expressed reluctance to sign any resolution. I can understand their concerns. Some of the resolutions which have been introduced before this body over the past do not necessarily make substantial contributions to our society. This resolution, I would like to think, has a great deal of significance. Literally thousands of children are dying throughout this country from fatal liver disease. These are lives that in many cases can be saved. Liver disease kills more children in this country than does muscular dystrophy, cystic fibrosis, or leukemia.

My own introduction to the problem came when a lovely young woman, Denise Attilio, was dying of a liver disease called biliary atresia which kills 400 youngsters each year. I was asked to help in a fundraising endeavor to raise between $50,000 and $100,000 for surgery and hospital care. It was extremely difficult to raise that kind of money in time to save her life.

Feeling deeply frustrated and sensing that a life might be lost, I contacted the New York State Department of Health. I asked them to consider funding liver transplants through the State medicaid program. My request was denied. It was the contention of the department of health that the surgical procedure was experimental, not therapeutic, and that the success rate was low. This did not seem to correspond with the information that I had received elsewhere. I thereupon called the Presbyterian University Hospital in Pittsburgh and spoke to Dr. Starzl and subsequently with other members of his surgical team.

I learned that they performed many of these liver transplant operations at a success rate of approximately 75 percent. Armed with this knowledge, I went back to the department of health and told them that the information they had was inaccurate. I went further and asked them to call the University of Pittsburgh and to get the statistics from Dr. Thomas Starzl and the hospital. After a period of several days, much to my delight, the State of New York, through its Department of Health, announced that their findings indicated that transplant operations could now be considered therapeutic and that the success rate indeed was quite high.

Based upon this information, New York made a decision to change its policy and to provide medicaid coverage for needy persons requiring liver transplants. So Denise's application was approved.

In recent years, the Presbyterian Hospital has developed a liver transplant operation that is hailed by many medical authorities as a stunning breakthrough in the fight against diseases of the liver. The discovery of the immunosuppressant cyclosporin A has been responsible for more than doubling the success rate of liver transplants.

The medicaid funding in New York State does include the stipulation that transplant procedures be performed at the University of Pittsburgh with the surgical team headed by Dr. Starzl. The New York State Health Department did indicate that they would agree to evaluate on a case by case basis other hospitals and other surgical teams as they are developed and would expand the coverage in the future.

I then wrote to the Governors of each State calling to their attention what happened in New York State and asking them to check with the commissioner of health of the State of New York and follow their example by funding liver transplants through medicaid. Aside from many courtesy responses, I have not received an overwhelming response from States that did, in fact, approve the surgical procedures.

Approximately a week and a half ago, a group of parents came to Washington for a press conference which was attended by myself, Congressman JIM COURTER, and Congressman AL GORE.

In that room, there were five youngsters who underwent successful liver transplants. There was one young man whose parents told me that the doctors told him he had only 5 days to live when Dr. Starzl performed the surgical transplant. That operation, my colleagues, took place 9 years ago. Now the young man is about 16, obviously in a good state of health and obviously very happy.

There was another young lady who had a liver transplant when she was 8 months old. That was over 6 years ago and her parents asked me to take a picture of her. I had to lift her up—she was a chubby, happy little child.

Then there were the other ones in the room—the sad ones. The ones that were too ill to be able to stand up. Children whose parents were living in hope but facing despair. Children whose skin was severely jaundiced, whose abdomens were bloated. Their parents were seeking a chance to save their lives.

The purpose of this resolution is to attempt to educate, not just the Members of this body, but the community at large. A number of Members informed me when I asked them to sign on as a cosponsor that they were involved back home, trying to raise money on a vouluntary basis to fund surgery to save a child's life with a similar disease. It should not be necessary for them to go through that arduous procedure. Indeed, lives can be lost, and will be lost, while they are attempting to raise the money. One purpose of this resolution is to let the world know that lives can be saved, that there is a procedure available and that the success rate is high. I would hope that my colleagues in the other States would bring home to their respective commissioners of health and their Governors the story of what occurred in New York State.

It would probably be accurate for me to say that every single Member of Congress has a child residing in their congressional district who will be a candidate for a liver transplant in the future. So my colleagues, this is not a frivolous resolution. This is a resolution that has a very serious goal which is to try to foster greater understanding throughout the country. The faster that we can educate ourselves, and our respective States, as to the great promise that there is out there, the more lives that we can save. Time is an enemy of those who are afflicted with one of the fatal diseases. Securing donors is sometimes as difficult as raising the $100,000 to cover the extensive surgery and the extensive hospital costs as well as the postoperative costs involved in these procedures.

I wish I could say that the story of Denise Attilio had a happy ending, but I cannot. Denise passed away about 6 months ago. She was a beautiful woman who spent her last year trying to help others who were desperately in need of donors and, in fact, secured, a number of donors throughout the country for others who were afflicted with fatal liver diseases like herself.

Let me read to you some of Denise Attilio's thoughts.

I was always on the sidelines, just watching. I couldn't concentrate in school. I never really was healthy in my whole life. When I was ten, I was told I would die.

She was born without a bile duct, which meant the bile produced by her liver could not get out of the liver and into the intestinal tract. So the bile backed up, invading her tissues and ravaging her body and her life. When she thought her condition may have stabilized, she went for a checkup only to learn that she had a year to live. This is how she felt:

I was shocked. They said that after that, everything inside would be no good. They told me that the only way I could get well was through a transplant. The scariest part is waiting. It's a form of slow poisoning. I don't know when something is going to happen. It's like cancer.

Here is what Denise had to say following her transplant operation:

I feel like I'm reborn, for the first time in my life, I'm healthy! I feel like a million dollars! Since I had my transplant two weeks ago, they did eight others who also are doing great! Doctor Tom Starzl and his team of surgeons do great work and the transplants really shouldn't be considered experimental anymore. The results are marvelous. I hope that no one else has to fight with medicaid to get this kind of operation, it is a life and death situation.

She once said of the family who donated their deceased child's liver for her transplantation:

They are so wonderful. Maybe more will think to donate to give someone else a chance. These people and their caring gave me a chance.

In their fight for life Denise Attilio and Brandon Hall left with all of us a powerful legacy—now it is up to us to respond.

□ 1200

Mr. COURTER. Mr. Speaker, I thank the gentleman for his contribution.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 234

Whereas there are more than one hundred different kinds of liver disease identified in children;

Whereas certain children's liver diseases result in cirrhosis causing the deaths of infants and young children;

Whereas there are a million cases of hepatitis in the United States annually, half of which occur in children;

Whereas there have been tremendous strides in the liver transplant program as a result of new therapeutic drugs and improved surgical techniques;

Whereas newborn screening programs, with early recognititon and intervention, are now preventing the onset of insidious liver ailments in infants and young children;

Whereas it is essential that childhood liver disorders be eradicated because the future of the United States lies in the hands of our children;

Whereas the key to eradicating all childhood liver disorders is through extensive pediatric liver research; and

Whereas the week beginning May 1, 1983, marks the establishment of the National Children's Liver Disease Awareness Program, a combined effort to bring to the attention of the American people the overwhelming need for pediatric liver disease research, newborn screening programs, and the dismissal of the tremendous financial burden placed on families whose children require long term care and/or liver transplantation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning May 1, 1983, is designated "National Children's Liver Disease Awareness Week". The President is requested to issue a proclamation calling upon all Government agencies and people of the United States to observe the week with appropriate programs and activities.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: On page 2, line 3, strike the date "May 1, 1983" and insert in lieu thereof "June 19, 1983".

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New York (Mr. GARCIA).

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment of the joint resolution.

The joint resolution was ordered to be engrossed.

The SPEAKER pro tempore. The Clerk will report the amendment to the preamble.

The Clerk read as follows:

On page 2, in the preamble, strike the date "May 1, 1983" and insert in lieu thereof, "June 19, 1983".

The SPEAKER pro tempore. The question is on the amendment to the preamble.

The amendment to the preamble was agreed to.

The joint resolution was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "Joint resolution designating the week beginning June 19, 1983 as "National Children's Liver Disease Awareness Week."

A motion to reconsider was laid on the table.

OLDER AMERICANS MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the concurrent resolution (H. Con. Res. 101) expressing the sense of the Congress that the people of the United States should observe the month of May 1983 as Older Americans Month, and ask for its immediate consideration in the House.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. COURTER. Mr. Speaker, I reserve the right to object and, under my reservation, I rise in support of House Concurrent Resolution 101 expressing the sense of the Congress that the people of the United States should observe the month of May 1983 as "Older Americans Month."

I feel it is fitting that we designate a month in which all Americans recognize the contributions of older Americans. Today, many of our older Americans are continuing to work, and many are volunteering their time and energies to assist others in their communities. They possess a wealth of knowledge and experience that should not be allowed to idle. Our older Americans are a very diverse group of individuals and by designating the month of May as "Older Americans Month" we are telling our older Americans that they continue to be a valuable and integral part of our society.

Our older Americans built our society and in many ways they are also building our future. This special month gives us an opportunity to recognize and honor older persons for their determination to save our democracy, their strong work ethic to revive the world economy and their continued contributions to our well-being. We can all learn from the accomplishments of our older Americans—not only from the past but their present efforts as well.

I urge my colleagues to join me in honoring our older citizens by supporting this resolution.

Mr. McCOLLUM. Mr. Speaker, will the gentleman yield?

Mr. COURTER. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Florida.

Mr. McCOLLUM. I thank the gentleman for yielding.

Mr. Speaker, with passage of the Older Americans Month resolution, Congress joins with the President and the country in celebrating May as Older Americans Month and recognizing the contributions our senior Americans have made, and continue to make, to this Nation.

In the district I represent, the Fifth District of Florida, our area agency on aging has coordinated activities and programs throughout May in celebration of this special month. These activities will focus attention on the vital role older Americans play in our communities and will point out the special concerns of older Americans in today's society. I am sure that many of my colleagues have similar activities taking place in their districts during this month, and those groups and individuals involved in planning and participating in these events are to be commended for their efforts.

I am proud to be the sponsor of this resolution and thank the 225 of my colleagues who cosponsored this measure in order that Congress can publicly join with the country and the President who on May 6 officially declared May as "Older Americans Month."

Mr. COURTER. Mr. Speaker, further reserving the right to object, I would like to indicate one further thing, and I said so during a markup in our Committee on Post Office and Civil Service. The gentleman from New York (Mr. GARCIA) and I have worked very closely during the past 4 years in Congress, he as the chairman of the Subcommittee on Census and Population of the Committee on Post Office and Civil Service, and I as the ranking minority member. I would like to say in the RECORD and publicly that there is no finer gentleman in the Congress. I do not think there is any Member or any chairman who works more closely and gives more respect to minority views, and I would like to thank my chairman very much. I know the gentleman is moving to a different subcommittee, and that is the reason I want to state this in the RECORD.

● Mr. HUNTER. Mr. Speaker, I am here today to join the rest of the Congress and the country in honoring this Nation's senior citizens as part of Older Americans Month. The millions of older Americans who have served their country and their community so long and faithfully deserve all the recognition we can give them. In this year, the 20th anniversary of designating May to honor older Americans, it is especially appropriate to call attention to the contributions that older Americans have made. The older Americans of today fought in both world wars to preserve freedom. Today's senior citizens brought this country from growing pains to adulthood. Older Americans helped bring this Nation to its position of world leadership.

Moreover, their efforts were based on values that Americans of all ages

should emulate. Dedication to God and country, family and community were the guiding principles that today's senior citizens lived by in forging this great country. I am proud of this Nation and I strive to live by these values that our senior citizens have espoused.

And so, Mr. Speaker, I pay tribute to older Americans. The millions of senior citizens around the country and the more than 265,000 people over the age of 60 in San Diego have helped make this country what it is today—the country with the best quality of life in the world.●

Mr. COURTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 101

Whereas older Americans have contributed many years of service to their families, their communities, and the Nation;

Whereas the population of the United States is comprised of a large percentage of older Americans representing a wealth of knowledge and experience;

Whereas acknowledgement should be given to older Americans for the contributions they continue to make to their communities and the Nation; and

Whereas many States and communities provide such acknowledgement of older Americans during the month of May: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That in recognition of—

(1) the traditional designation of the month of May as "Older Americans Month" by the President of the United States, and

(2) the repeated expression by the Congress of its appreciation and respect for the achievements of older Americans and its desire that these Americans continue to play an active role in the life of the Nation,

it is the sense of the Congress that the people of the United States should observe Older Americans Month with appropriate programs, ceremonies, and activities.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

NATIONAL ORGAN DONATION AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 229) to authorize and request the President to issue a proclamation designating April 24 through April 30, 1983, as "National Organ Donation Awareness Week," and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. COURTER. Mr. Speaker, I reserve the right to object.

Mr. Speaker, I rise in support House Joint Resolution 229 to designate "National Organ Donation Awareness Week." A similar bill (S.J. Res. 78) passed the Senate on April 21.

Mr. Speaker, in recent years, we have all become aware of the great importance of being an organ donor and the tremendous medical strides that have been made in organ transplants.

More and more Americans are making donor designations but a great many more are needed. This legislation brings to the public attention that a concerted effort is needed to obtain more donors for those thousands of people who desparately need an organ transplant. Through such donations a person gives continued life to those in need while bringing satisfaction to themselves in knowing they helped a person to live.

Every State has made an endeavor to make its citizens aware of the contribution they can make to humanity by being an organ donor. Many States have programs where by donations can be designated on a driver's license or by carrying a donor's card. Therefore, I feel that by calling attention to a specific week we will be able to make all citizens aware of the significance of this program and the contribution they will be making to society. Many lives can be saved or prolonged if donations or organs are made promptly.

This legislation invites all our citizens to be aware of what they can do to help their fellow man or woman.

I urge prompt consideration of this bill.

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. COURTER. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from New York.

Mr. GARCIA. Mr. Speaker, I would just like to take this opportunity to say that in the 4 years I have chaired this subcommittee my colleague, the gentleman from New Jersey (Mr. COURTER) has worked closely with me. I am deeply appreciative of the remarks made by the gentleman from New Jersey (Mr. COURTER) and I hope that, while still a Member of the full committee, my new subcommittee title will be such that we will continue to work together in the manner that we have over these years that we have been here together.

Mr. COURTER. Mr. Speaker, I appreciate those words and I thank the gentleman.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. COURTER. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, it sounds as though the resolution is for a very worthwhile purpose.

Do I understand that there is going to be an amendment offered to assure ourselves that the week is going to be changed? As I heard the resolution read, the week which was described is a week which is already past, and I would hate to see this particular event passed by because we acted too late. Are we going to have an amendment to that effect?

Mr. COURTER. That is correct. The gentleman from New York (Mr. GARCIA) and I both know that we could not have gotten this thing through the watchful eye of the gentleman from Pennsylvania. We knew the gentleman would catch that and, therefore, we are fully prepared to amend the resolution at this juncture.

Mr. WALKER. I thank the gentleman.

Mr. COURTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 229

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating April 24 through April 30, 1983, as "National Organ Donation Awareness Week".

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: On page 1, line 4, after the word "designating" strike the dates "April 24 through April 30, 1983" and insert in lieu thereof, "April 22 through April 28, 1984.".

The amendment was agreed to.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "Joint resolution to authorize and request the President to issue a proclamation designating April 22 through April 28, 1984, as 'National Organ Donation Awareness Week'."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolutions just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION FOR THE COMMITTEE ON THE JUDICIARY TO HAVE UNTIL 5 P.M. TOMORROW TO FILE REPORT ON H.R. 1510

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary have until 5 p.m. on tomorrow, May 13, 1983, to file a report on H.R. 1510, the Immigration Reform and Control Act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. WALKER. Reserving the right to object, Mr. Speaker, I do so to ask the gentleman whether this has been cleared with the minority.

Mr. MAZZOLI. Mr. Speaker, if the gentleman will yield, it has been checked with the minority, the ranking minority member of the committee, the gentleman from New York (Mr. FISH), and he has no objection to this unanimous-consent request.

Mr. WALKER. I thank the gentleman, Mr. Speaker, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

NATIONAL SCIENCE FOUNDATION AUTHORIZATION ACT FOR FISCAL YEAR 1984

The SPEAKER pro tempore. Pursuant to House Resolution 183 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for consideration of the bill, H.R. 2066.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H.R. 2066) to authorize appropriations to the National Science Foundation for fiscal years 1984 and 1985, with Mr. TRAXLER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Florida (Mr. FUQUA) will be recognized for 30 minutes, and the gentleman from Kansas (Mr. WINN) will be recognized for 30 minutes.

The Chair recognized the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, H.R. 2066 provides authorization of appropriations for the National Science Foundation for fiscal year 1984. The bill provides $1,342.7 million for the research and educational activities of the Foundation. This amount provides for an increase of $50.4 million above that recommended by the administration. Of this increase, $50 million will be used to support new research initiatives, development of new university research laboratories, and to enable universities to take advantage of the technological revolution occurring in the delivery of instructional materials. The moneys we have added will enable our Nation's universities to become competitive in the rapidly expanding high-technology fields of the future.

We have also added $0.4 million of special foreign currency funds to the administration's request to support NSF's newly assigned role as lead agency in the new United States-India joint research program.

Within the Research Directorates, we have restored funding to the behavioral, social, and information sciences to approximately their 1980 levels. The increases for these programs were balanced by slight decreases in the amounts authorized for other research programs. I wish to stress, however, that these other research programs will still receive increases of between 19 and 20 percent above last year's appropriations.

We have included language that restores $23.2 million to the Directorate for Scientific, Technological, and International Activities (STIA). The administration's proposal to shift these moneys out of STIA into the other directorates raised concern that the international, women and minorities, small business innovation research, and other programs would lose their special focus and be absorbed indiscriminately in the other directorates. While we support efforts to emphasize these areas in other research programs, we felt their management should be continued through STIA.

Science and engineering education has, of course, been a special concern of the Committee on Science and Technology and the Committee on Education and Labor chaired by my esteemed colleague, Hon. CARL PERKINS. Because of the gravity of the problems facing our entire educational system in providing for science, math, and engineering, and their importance to our Nation's well-being, our two committees took early action to report H.R. 1310—a bill designed to begin to address those problems. The bill was passed on the House floor on March 2, 1983, by a strong bipartisan vote and the Senate is now considering various counterparts to that bill. As my colleagues will recall, H.R. 1310 provides for a balanced education program to be administered independently, but collaboratively, by the Department of Education and the NSF. The NSF component provides for $130.0 million for summer institutes and workshops, post-secondary faculty development, educational research, and a special cost-sharing engineering and science personnel fund.

In the bill we are considering today, the administration has requested $39.0 million for graduate fellowships and precollege teaching activities. We believe these programs will nicely complement the responsibilities assigned to NSF in H.R. 1310. And, because of the earlier House action on H.R. 1310, we did not believe it was necessary to enlarge further the authorization of funding for NSF's education activities in H.R. 2066.

I wish to call particular attention to the importance of the $50 million which we have added for new initiatives in research instrumentation. Current estimates are that it will take between $2 and $4 billion to renew the research facilities of our universities. We all recognize that a problem of this magnitude will take time to solve. The First Budget Resolution for fiscal year 1984 passed by this House recognized the need for additional instrumentation support by the Foundation. The Science and Technology Committee has chosen to authorize an additional $50 million for the coming fiscal year for this new initiative. We intend these funds to be used for the development of facilities for advance research where the capital cost of equipment is high and for the exploration of new technologies in universities' research and educational roles. As it will take time for the Foundation to develop the programs necessary to accomplish these aims, we chose to be prudent in the authorization of funds the first year.

In summary, our recommendations for the Foundation provide for a significant increase in support for all areas of basic research within the Foundation with major emphasis on the revitalization, renewal, and expansion of the modern scientific and engineering research instrumentation and facilities so badly needed to maintain the competitiveness of U.S. science and engineering. This 22-percent increase from last year in the amount we are recommending to be authorized for NSF represents a commitment by this committee to insure the continued vitality and health of American university science and engineering research, and education.

For the use of all Members, I have included in my statement the summary from committee Report 98-73, including a summary table:

I. SUMMARY

BUDGET ACTIONS

Budget total

The President's budget included a request for $1,292,300,000 for the National Science Foundation in fiscal year 1984.

H.R. 2066 includes new obligational authority totalling $1,342,700,000. This amount is a $50,400,000 increase over the Administration's request.

Increases

1. A new program to provide high technology instrumentation for new research initiatives, new laboratory development and technology for delivering instruction is authorized at $50 million.

2. Biological, Behavioral, and Social Sciences is increased by $12.8 million, to provide $15 million in additional funding for the social, behavioral and information sciences.

3. Funds for the Special Foreign Currencies account are increased by $400 thousand to provide monies to coordinate the new U.S./India cooperative program.

Decreases

1. The request for Mathematical and Physical Sciences is decreased by $5.7 million to $358.6 million, providing an increase over fiscal year 1983 of $58.9 million.

2. The request for Engineering is reduced by $2.0 million to $121 million, providing an increase over fiscal year 1983 of $20.2 million.

3. The request for Astronomical, Atmospheric, Earth and Ocean Sciences is decreased by $5.1 million to $329.8 million, providing an increase of $53.6 million over fiscal year 1983.

Other

1. The bill requires that of the amount authorized for Biological, Behavioral and Social Sciences, not less than $8 million shall be available for the Information Science and Technology Subactivity.

2. The bill requires that not less than 15 percent of the sum of the amounts authorized for Mathematical and Physical Sciences, Engineering, and Astronomical, Atmospheric, Earth and Ocean Sciences shall be used for research instrumentation.

3. The bill requires that of the amount authorized for Research and Related Activities exclusive of the amounts for Antarctic Research Programs, Scientific, Technological and International Affairs and High Technology Research Instrumentation, $23,200,000 be made available through reallocation for programs in the Directorate of Scientific, Technological, and International Affairs.

OTHER ACTIONS

A. The bill amends the National Science Foundation Act of 1950 to provide greater flexibility in establishing special commissions by the National Science Board and in providing membership for such commissions. The bill also repeals section 6 of Public Law 95-99 regarding National Resource Centers, the codification being considered as redundant and unnecessary.

B. Two additional amendments were made: (1) to repeal a disclosure provision contained in an earlier amendment to the National Science Foundation Organic Act which has been superseded by broader provisions and requirements of the Ethics in Government Act; (2) to repeal the National Science Foundation Act for fiscal year 1978 provisions banning NSF employees from owning patents on inventions resulting from NSF work. NSF does no in-house research and the provisions have never been needed.

C. Additional concerns and views of the Committee are reflected in the sections of this report on views and programs.

PURPOSE OF THE BILL

The purpose of the bill is to authorize appropriations to the National Science Foundation for fiscal year 1984 in the amount of $1,339,700,000 out of money in the Treasury not otherwise appropriated and $3,000,000 for fiscal year 1984 in foreign currency which the Treasury Department determines to be excess to normal requirements of the United States as follows:

Budget activities

	Authorization fiscal year 1984
Research and related activities:	
Mathematical and physical sciences	$358,600,000
Engineering	121,000,000
Biological, behavioral and social sciences	236,400,000
Astronomical, atmospheric, Earth and ocean sciences	329,800,000
U.S. Antarctic program	102,100,000
Scientific, technological and international affairs	36,800,000
Program development and management	66,000,000
High technology research instrumentation	50,000,000
Special foreign currency	3,000,000
Science and engineering education	39,000,000
Total	1,342,700,000

NATIONAL SCIENCE FOUNDATION BUDGET COMPARISONS—ACTIONS BY THE COMMITTEE ON SCIENCE AND TECHNOLOGY

[Authorizations in millions of dollars]

Activities	Current fiscal year 1983	Administration request fiscal year 1984	Committee recommendation (H.R. 2066)	Changes from administration proposal
Mathematical and physical sciences	$299.7	$364.3	$358.6	−$5.7
Engineering	100.8	123.0	121.0	−2.0
Biological behavioral, and social sciences	190.2	223.6	236.4	+12.8
Astronomical, atmospheric, Earth, and ocean sciences	276.2	334.9	329.8	−5.1
U.S. Antarcitic program	83.2	102.1	102.1	0
Scientific, technological, and international affairs	44.2	36.8	36.8	0
Research instrumentation initiative	0	0	50.0	+50.0
Program development and management	65.3	66.0	66.0	0
Undistributed	4.5	.0	0	0
Subtotal, research and related activities	1,064.1	1,250.7	1,300.7	+50.0
Science and engineering education	30.0	39.0	39.0	0
Special foreign currency	3.1	2.6	3.0	+0.4
Total	1,097.2	1,292.3	1,342.7	+50.4

□ 1215

Mr. Chairman, I wish to pay tribute to the chairman of the subcommittee, the distinguished gentleman from Pennsylvania (Mr. WALGREN) and also to the ranking minority member on the subcommittee, the distinguished gentleman from New Hampshire (Mr. GREGG) for the fine work and cooperation that they have given in bringing this matter through the hearings and to the floor, and I urge the adoption of the committee's bill as reported by the committee without amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. WINN. Mr. Chairman, I yield myself such time as I may consume, and I rise in support of an authorization for the National Science Foundation as proposed by the President.

Mr. Chairman, H.R. 2066 which we have before us today is basically a very good piece of authorizing legislation. I do not think that there is any question that the work of the National Science Foundation is more important now to our Nation than at any other time in the Foundation's 35-year history. The Presidential request for the Foundation for fiscal year 1984 recognizes the importance of the Foundation's work. The request proposed an 18-percent increase in overall funding for NSF compared to fiscal year 1983. That request is for $1.3 billion. Unfortunately, at full committee markup of H.R. 2066, $50 million additional was added to the bill. This money was added to support new instrumentation initiatives and cloaked in those magic words of 1983 "high technology." I cannot support such an unwarranted increase and will, at the appropriate time, offer an amendment to strike that $50 million from the bill. I should point out to my colleagues that this bill already contains $180 million for instrumentation, double the level of just 2 year ago.

Mr. Chairman, I would like to take a few moments to describe some of the noteworthy and scientific accomplishments that have recently been achieved through National Science Foundation-supported projects. The Members will hear more about the instrumentation issue when my amendment is offered, but I thought it would prove useful to mention some other accomplishments that do not fit easily into the "high technology" category. As most of my colleagues may recall, several years ago the National Science Foundation was under consistent attack when the annual authorizations were brought up because of some very unfortunate research grant titles given to some of their projects. I am happy to report that those are a thing of the past now, and that the sample of projects that I am about to describe are true examples of the fine work that the Foundation supports.

Mr. Chairman, NSF has supported a study to investigate very intense, short-lived downdrafts that may prove very hazardous to aircraft on takeoff and landing. This study shows that some of these downdrafts occur very close to the ground and lead to an outward burst of air when the downward rushing air spreads horizontally. This phenomenon has been called a microburst. An aircraft crossing a microburst will encounter first, a strong headwind, and then a strong tailwind after it passes the burst center—an extremely hazardous situation. The extensive data collected by the study will be further analyzed over the next several years in order to improve our un-

derstanding and detection of microbursts.

Research by scientists from the University of Alaska, supported by the National Science Foundation, has shown that there are extensive areas of permafrost in the sediments of the Continental Shelf off the North Slope of Alaska. The identification of the distribution, depth, and instability of this permafrost will help the petroleum industry to adapt well placement and drilling practices to the permafrost areas.

Termites annually cause U.S. property owners an estimated $705 million. Research supported by the National Science Foundation has developed a new pesticide which uses methods that the insects themselves employ to kill their enemies. Once the termites have consumed this new lethal chemical they return to their colonies to live about 3 more days. During this time they transfer the poison to their fellow nest-mates killing as many as 60,000 at a time. The new pesticide has many advantages over previously used poisons in getting rid of termites. It affects only termites and leaves no harmful residue so it does not pollute the environment.

Mr. Chairman, I have mentioned some of the highlights of NSF-supported research to give the Members some idea of the broad scope of work that the National Science Foundation is engaged in. I have always been a strong advocate of a healthy budget for the National Science Foundation. My objections to this bill in its current form center around what I have described as excessive levels of spending, authorized in areas where the Foundation cannot possibly productively spend the money in fiscal year 1984. It certainly appears that we have a strong national economic recovery underway, and this body and this Congress do not aid that recovery when we support a budget busting bill such as this one. The Foundation has received an 18-percent increase over last year in the President's request. They continue to do good work—and I hope that this House will continue to support that work. At the same time, we can continue our national economic recovery by authorizing a prudent level of spending. I hope that the Members will support my amendment when it is offered.

Mr. WALGREN. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, it is my privilege to serve as the chairman of the subcommittee of the Committee on Science and Technology out of which the National Science Foundation authorization comes. I would just like to make several general points.

One is that I think we have to commend the administration for the increased emphasis that it is putting in its recommendations to the Congress on research and development, particularly basic research. It is true that they are recommending an increase in the National Science Foundation budget and that is certainly to be commended. I hope we are passing the time when we in this Congress made knee-jerk reactions to the validity of increases in these kinds of areas, being for or against them simply because it was spending or not spending money. I think we are finally realizing that there is great value to be found in this kind of true investment.

I think also that we have to take into account the importance of the Federal research dollar in our university system. We often underestimate the degree that Federal dollars play in the strength of our universities. The President of one west coast university recently underscored in its alumni communication that relatively few private dollars involved in supporting research compared to the level of Federal funds. On a comparitive basis for this university, private support would have to be increased $25 for every $1 of Federal funds lost if a level research effort were to be maintained. Similarly, if they were to try to accomplish the same amount of research out of the flow of money from a private endowment, the size of that endowment would have to be $3.75 billion alone for that one university.

So we really do have a very large Federal role in maintaining the strength of our universities in this area.

I would like to point out one of the things that I think is very valuable that the committee has done in this bill. It has added some strength to the social and the behavioral sciences. That is particularly important when we realize that we must keep a strong university research base in this area as well. There is much to be contributed by the social and the behavioral sciences. They had suffered inordinately in the reductions associated with the 1980-84 timeframe. In fact, while the Math and Physical Science Directorate of the National Science Foundation was increasing its funding by some 60 percent, the behavioral and social sciences were losing 40 percent of their funding during that time after considering inflation.

The fact of it is that, if we are to have a strong university-based effort in this area which has such potential to contribute to our society, we have to maintain, not cut, the funding. This is the only way those with good talent will stay in research in the behavioral and social sciences. It is the only way younger students will maintain an interest in these sciences rather than go elsewhere and undermine our future ability in that area.

I would also like to note that we are increasing the science education effort in the National Science Foundation, although only slightly, in this authorization. That is largely because this House did approve a major role for the National Science Foundation in H.R. 1310 which addressed the educational function in science and math, and engineering in general. We do have a slight increase in this bill in the science education area, but it is really only slight because it complements the role that we gave to NSF in the math and science education bill under H.R. 1310. If we had not done that, we clearly would be, I think, on a bipartisan basis doing much more in science education in the authorization for NSF than is in this bill.

I can only stress how much basic research, and particularly the education area, has to contribute to our long-run economic and social well-being in this country and urge my colleagues to support the bill in its strength as it comes out of the subcommittee.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALGREN) has expired.

(By unanimous consent, Mr. WALGREN was allowed to proceed for 2 additional minutes.)

Mr. GEKAS. Mr. Chairman, will the gentleman yield?

Mr. WALGREN. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. I thank the gentleman for yielding.

Mr. Chairman, I am a little concerned about the language in the bill that would allow so-called committee veto over reprograming authorizations.

Would the gentleman tell me, first of all, is it correct that that still obtains in the bill? Is that subject to amendments yet today? Does anyone know whether that is going to be amended out, or is that program still in the bill?

Mr. WALGREN. To my knowledge, those provisions are still in the bill and I do not know whether there are amendments to be offered today that would address that.

Mr. GEKAS. Does the gentleman feel that that is a workable concept, aside from its questionable constitutionality, which I feel is a serious question? I am thinking about the practical effect of such veto power.

Suppose that Congress is in recess or has adjourned, or the committee in question has not seen fit to meet for the purpose of reviewing a particular reprograming? Does that not mean that we have a loose kind of structure embedded in the bill? Suppose something comes up and then within 2 days the House recesses for the summer, or adjourns? What are we going to do about that?

It seems to me we are leaving a lot of things in limbo by virtue of the structure.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. WALGREN. I yield to the gentleman from Florida.

Mr. FUQUA. I appreciate the gentleman yielding to me.

Mr. Chairman, maybe I can add some light. This is rather routine language that is contained in most of the authorization bills to permit certain reprograming authority, but it is not a veto. We ask only that the committees be properly notified of where the money is being transferred from and what the intended purpose is.

Mr. GEKAS. Does it not mean that it would automatically go into effect if the committees do not act?

Mr. FUQUA. That is correct.

Mr. GEKAS. Then it is a kind of committee veto.

Mr. FUQUA. No.

Mr. GEKAS. Well, it is not a committee veto, but the lack of action on the part of the committee would result in approval.

□ 1230

Mr. FUQUA. That is correct. We can ask them to come up in hearings and review their plans or we could even take some other action.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALGREN) has expired.

Mr. FUQUA. Mr. Chairman, I yield myself 3 additional minutes so I may continue my response to the gentleman.

We do this in the National Aeronautics and Space Administration, and we do it in the Department of Energy. It is a routine thing to give flexibility to the agency to reprogram. Otherwise we would say they could not reprogram anything.

Mr. GEKAS. Mr. Chairman, if the gentleman will yield, I guess what I am saying is that no one should do it, in my judgment, because I do believe it is constitutionally flawed.

Mr. FUQUA. Mr. Chairman, we try to give management flexibility to the agency, but we want to know what they are doing. We require them to notify us in a timely fashion exceeding 10 percent, as outlined in the bill, so that we are aware of what reprograming action they would take. We do it in most all of the agencies, and we exercise our oversight responsibilities to make sure that there is good reason to do what they are proposing to do. In most cases we agree with them.

Mr. GEKAS. Mr. Chairman, if the gentleman will yield, the committee would not be hampered, if this language were not here, from preventing them from doing exactly that thing, calling for meetings and oversight for a particular purpose; is that correct?

Mr. FUQUA. If we did not have the language, we could prohibit any reprograming, period, but we realize they should have this flexibility. Many times when budgets are going through the budget cycle, it may be 2 or it may be 3 years after figures were proposed before they are actually ready to be spent. So we feel that it gives some management flexibility to the agency, yet the Congress still retains control.

We can call the agency in and we can object, and we work it out very cordially with the agencies. In matters where we have objected, we have made them come forth with more explicit information, information in more detail. We may object, and then they generally try to adhere to the wishes of the congressional committees that oversee their budgets.

Mr. GEKAS. Mr. Chairman, if the gentleman will yield, I have no doubt that it has worked as the gentleman said it works. I am asking whether or not the same result could obtain if we had flat authorizations without this 30-day lapse and still have a subcommittee that wanted to have oversight, exercise its oversight.

For my own edification, I would simply like to know, if this language did not appear at all in this bill, would there be anything to prevent an appropriate committee or subcommittee from calling for oversight hearings or review hearings when they were needed?

Mr. FUQUA. Yes we have that authority without this language.

Mr. GEKAS. That is what I am asking.

Mr. FUQUA. However, this language permits the agency the flexibility to manage. The circumstances may change. There may be other programs where they feel they would like to spend more money than they originally intended, or there may be some other programs where they cannot spend this money, and they want to know how they can best utilize their funding.

We give them these tools, and we tell them we want them to notify us and keep us currently and accurately informed about any provision when they request a change to modify their funding, as outlined in the authorization bill as well as the appropriation bill.

Mr. GEKAS. Mr. Chairman, I thank the gentleman from Florida (Mr. FUQUA).

As an unknowing freshman, at the moment I prefer my method. Maybe I can learn the gentleman's method as we go along. For now I reserve my objections to it.

Mr. WINN. Mr. Chairman, I yield 5 minutes to the gentleman from New Hampshire (Mr. GREGG).

Mr. GREGG. Mr. Chairman, as the ranking member of the subcommittee which deals with the National Science Foundation, first I would like to congratulate the chairman of the subcommittee, the gentleman from Pennsylvania (Mr. WALGREN) for running a superb series of hearings on the status of the National Science Foundation and the different functions of the National Science Foundation, and for being most cooperative and open with the minority in determining how this authorization should be arrived at.

The authorization that passed out of the subcommittee was one that passed out unanimously. It was within the confines of the original dollar amount sent up by the White House in its proposed budget, and it was for a figure of $1,292,300,000. However, upon getting to the full committee, there was an additional $50 million added to the authorization for the purposes of the instrumentation issue which has already been alluded to. Much of the discussion today on this bill will revolve around that $50 million in additional funds authorized for the purposes of instrumentation.

I think the Members should be aware that, on top of that $50 million, we understand there will be another amendment possibly offered which will add an additional $50 million, thus raising the overage to $100 million in the area of instrumentation. This becomes a figure which is very hard for many of us to accept in light of the fact that the budget which we passed out of the subcommittee and also the budget that was sent up by the administration included a 60-percent increase in instrumentation, a very critical field, acknowledged as such, obviously, by that level of increase from 1983 and a 100-percent increase from 1982 in the area of instrumentation.

So we are not talking here at all about reducing spending, we are talking rather about a rate of increase, and when we are looking at a 60-percent increase, which would add to it $50 million or possibly $100 million as an additional increase, we are looking at dramatic increases in instrumentation funding—possibly so dramatic that the field cannot absorb it in the space of time that they would be applied, although that is certainly arguable since there is clearly a shortage of instrumentation in many areas of the science fields.

However, there is also a shortage of funds here at the Federal level. We are facing a $200 billion deficit, and we do have to show some sort of fiscal restraint when we are addressing these critical areas, whatever they may be.

I think it should be noted that prior to passing this bill, we have passed a bill on science and math education, H.R. 1310, which represented a new money allocation to NSF of $130 million, and when we combine that money with the moneys in this budget, we end up with an increase of 14 percent over last year's allocations in NSF's funding. This is on top of the 18 percent increase which the administration has already asked for and

which has been accounted for in this bill.

Coming up as amendments to this bill will be a number of amendments offered by the minority, one of which would require that if we are going to go forward with instrumentation funds, we do it on a matching grant basis, and another of which would require that we take a look at elementary and secondary school instrumentation if we are going to go into the instrumentation business in this sort of massive funding manner, because both those issues, I think, are critical to the instrumentation issue as a whole.

Mr. Chairman, again I wish to thank the chairman of the subcommittee and the chairman of the full committee for their courtesy during the marking up and presentation of this authorizing bill, and we look forward to the amendment process.

Mr. FUQUA. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from California (Mr. BROWN).

Mr. BROWN of California. Mr. Chairman, at this point I merely wish to add my own commendation to the committee chairman and the ranking minority member for the work they have done in bringing this excellent bill to the floor, and I can wholeheartedly urge its support by all the Members of the House.

This bill, which is basically in accordance with the recommendations of the administration, with the minor changes that have been referred to, represents almost a meeting of the minds between the committee and the administration over the importance of basic research to the future economic health and national security of this country. This is in somewhat of a contrast to the situation that we faced 2 years ago when we faced sharp cuts from the administration in its commitment to the NSF budget.

As the distinguished gentleman from Kansas (Mr. WINN) has pointed out, the President's budget this time represents a healthy overall increase of 18 percent over the current year's spending for basic research. In the subcommittee the only change that was made was a very slight shifting of funds—in the order of $15 million—between the various research programs in order to give what the committee felt was a better balance.

□ 1240

So I think that we are on the same wavelength here. We have come to a common recognition that this country's future world competitiveness or postion of leadership in global trade, as well as in the new technologies that are developing so rapidly around the world, depends upon our continued support of a healthy scientific community in this country. This is what the legislation seeks to accomplish.

The area of disagreement which will be explored more fully under the 5-minute rule when I offer a bipartisan amendment to increase the funding for research instrumentation in universities, that area of disagreement is one on which I do not claim any divine guidance or wisdom. The full committee acted to increase the amount in the President's budget by $50 million.

I, with Congressman BOEHLERT of New York, will propose an amendment to add another $49 million to that.

This is the point that our distinguished ranking minority member, the gentleman from Kansas (Mr. WINN), spoke to in pointing out that this was going further than he thought was justified, that it broke the President's budget and might hamper recovery. I think each of us will have to make his own judgment on this.

My purpose in offering the amendment is to give each Member of the House an opportunity to record his own sense of priority about the urgency of enhancing our research base in the great research universities of this country. Over half of the basic research funded by the Federal Government is done in these universities. I will make the argument that they are badly in need of additional assistance in order to continue to do that job in the way that they should.

I would point out that while we are exceeding the President's budget, that we are within, and carefully within, the budget that the House has already passed.

I would point out that rather than hampering recovery, the budget which the House has already passed contains lower deficits than the budget which the President submitted to us. If one is concerned about the effect of deficits on economic recovery, one should at least give some weight to the argument that the House-passed budget containing the $100 million aimed at enhancing the health of our basic research community may be a better way to stimulate recovery than the budget submitted to us by the President, with the higher level of deficit contained therein.

Now, I know that one can get into partisan arguments over that. I hope we do not do too much of that.

I merely am making the point that a reasonable case can be made that this amendment will stimulate recovery, rather than not stimulating the recovery.

Mr. WINN. Mr. Chairman, I yield 5 minutes to the gentleman from Virginia (Mr. BATEMAN), a member of the committee.

Mr. BATEMAN. Mr. Chairman, I certainly have no notion that I, as a freshman Member of this body, have an expertise that is in any way commensurate with that of my more senior colleagues, but being a freshman, perhaps I do have some fresher perspective as to the part of the process we are going through, which I think is very germane to what we do with the level of authorization that is contained by this bill as it comes to us from the full committee.

I, like most Members, sit on more than one committee. We tend to have a greater ardor for those subject matters that are attended to by the committees on which we serve. Sometimes I fear that that ardor leads us to excesses for particular programs, projects, and concerns of our subject matter jurisdiction in our committees than is really consonant with the wisest fiscal course for our National Government as a whole.

Certainly no one, whether on the committee or off, can successfully debate the negative of the proposition that our colleges, our universities, are in need of enhancement in their laboratory facilities and in their scientific instrumentation. There is a clear and demonstrable need for it.

It is for that reason that the administration's proposed budget for the National Science Foundation contemplated an increase, not a decrease, but an increase in spending authority by some 18 percent, and for scientific instrumentation of some 60 percent. That is a very substantial increase in spending authority. I commend it. Without any dissenting voice in the subcommittee or full committee, it is commended as a step in the right direction.

The problem that arises to my mind is not whether or not we need advancement and enhancement and university instrumentation and laboratory facilities. The question is really one of when is enough enough, given the fiscal constraints under which we operate. If there were not a finite amount of public funds available for this and other worthy activities, then certainly the addition of the $50 million which was added for instrumentation at the full committee level, and the proposal that will emerge on the floor today to add yet another $50 million for related purposes would be entirely beneficial, and were we to have gone into this session and through this process with some time within which to structure a program for the sound expenditure of that level of money, it clearly ought to be done; but to do it in the face of a dramatic and unmanageable deficit, I suggest exceeds any proper reasonable basis of when we have provided enough.

I think it is encumbent upon this Congress to exercise some self-discipline and some restraint. As a member of the committee and having many of the concerns about the scientific and technological capability of the United States, and not losing our superiority and dominance in it, we have got to be contructive. We have got to be positi-

tive. We have got to expend additional funds; but again, how do we go on spending or acting as if we had funds to spend when in fact our coffers are empty.

This is the constraint that I feel compelled to speak to and to implore the House on a nonpartisan basis, on a bipartisan basis, not to exceed the limits of that which is fiscally prudent.

Let me suggest that what we are doing here brings to mind another example of where we are throwing money at a problem. There is no question in my mind that colleges and universities will come forward and apply for an additional $50 million in expenditure, indeed, for another $100 million in expenditure; but are they going to be applied to some program where we set the priorities as to where the additional funding is most needed and where we ought to use it, what to buy first.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. WINN. Mr. Chairman, I yield 2 additional minutes to the gentleman.

Mr. BATEMAN. What we are really faced with in terms of the crisis in expenditures for instrumentation is not that the 18 percent—indeed, 60 percent—in that category proposed by the administration is not a dramatic leap forward, is not a sound proposition. What we are dealing with—a problem which has become acute because of long neglect.

□ 1250

If I thought that we were not going to get a constant programmatic increase to remedy this neglect by the 60-percent increase originally proposed by the subcommittee if we were going to get it by this proposed 105-percent increment of $50 million, if we were going to get it by adding another $50 million and making it a 150-percent increase there might be some justification for it. But I do not think this quantum leap in 1 year, assures any continuity for future years, and I think it violates the rule of when enough is indeed enough.

I would hope that we would restrain ourselves, that we would exercise some self-discipline and do our part at least in this modest way of holding this increase for scientific instrumentation down to what amounts to a 60-percent spending increase rather than an exaggerated, and I think inflated, proposal to make this a 105-percent increase.

Certainly we should not, given our fiscal constraints, make it as much as 150-percent increase in spending for these programs.

Mr. WINN. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. BOEHLERT), a member of the committee.

Mr. BOEHLERT. Mr. Chairman, for openers I would like to commend the administration and the President for requesting an 18-percent increase in the authorization for the National Science Foundation. That is a plus.

But it does not go far enough. It does not go far enough for some very basic reasons.

I am a freshman in this body. Four months ago I did not know anything about computers except the experience gained as my 11-year-old daughter consistently beat me in our Ms. Pacman game at home.

But during the past few months I have participated in hearings in our committee and I have listened to the debate and I have developed a special concern. So when our colleagues talk about what the committee did to add $50 million to the NSF authorization for instrumentation I say I proudly identify with that addition, just as I proudly indentify with the amendment that will be offered during our deliberations to add another $50 million for instrumentation.

In a "Dear Colleague" letter joined in with myself, my distinguished colleague from California (Mr. BROWN) and my distinguished colleague from Colorado (Mr. WIRTH) we said:

> Today our place at the cutting edge of scientific research has been jeopardized by a decade of neglect of our research facilities, by consistent underinvestment in scientific instrumentation.

This is not just the opinion of BROWN, WIRTH, and BOEHLERT. This is an opinion that is shared by people who have a day-to-day involvement and concern.

I would bring to my colleagues' attention a statement by Robert Rosenweig, who is president of the Association of American Universities. He said:

> In the Nation's major universities the source of most basic research facilities built in the 1960's are now inadequate, and much of the instrumentation for research is scandalously out of date.

Referring back to the "Dear Colleague" letter, it was our conclusion, as we wrote to our fellow Members, that—

> Long-term economic growth will require sustained reinvestment in one of our most important national resources, the scientific and technological enhancement of our universities.

Mr. Chairman, during our proceedings we had testimony from Prof. Kenneth Wilson of Cornell University. Professor Wolson is a Nobel Prize winner, a young man, a national asset. During those hearings he pointed out to us that today in Germany the average graduate student has access to supercomputers. Yet this national resource, this young Nobel Prize winner who has so much to offer our Nation, does not have similar access.

It disturbs me to see in the United Kingdom, in France, Japan, and Germany a determined effort to outstrip us, to outdo us, to do us one better. We are No. 1 right now in computer technology. I wonder: will we retain that position? We are challenged.

Ten years ago we used to be able to say we were No. 1 in the auto industry and we were challenged. We were not up to that challenge.

So when we say, as we are saying, that we think it essential, and clearly in the national interest that we add more money to the National Science Foundation budget for instrumentation, particularly for our university research centers, we are saying that we are clearly acting in the national interest. We are saying that we want to maintain our dominant position, we want to be No. 1 not just today or tomorrow but for 10, 20, or 30 years into the future.

The challenge is this. I think we are up to it.

Mr. BROWN of California. Will the gentleman yield?

Mr. BOEHLERT. I will be glad to yield to my distinguished colleague from California.

Mr. BROWN of California. I want to commend the gentleman on his extremely eloquent and forceful statement. I think that is one of the best arguments that I have heard for the importance of enhancing our basic capabilities in research, particularly through the development of advanced computers, that I have heard. I want to pay tribute to the gentleman for his statement and for the contribution that he has made during the work of developing this bill within the Committee on Science and Technology.

Mr. BOEHLERT. I thank my colleague and yield back the balance of my time.

Mr. WINN. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, today we are considering an important bill, the National Science Foundation authorization bill, H.R. 2066.

The various science, math, and high-tech programs that make up the National Science Foundation are vital to our Nation—both on the international and domestic front—especially, as we enter into the high-tech era. Furthermore, I feel that NSF is an agency that both houses programs of such vital importance and, at the same time, manages them very well. I support maintained Federal funding and support for NSF. I wish for once I could vote for the NSF authorization bill.

However, some Members of this body are under the impression that the only way to improve our Nation's capacity in this area and other areas is to pour some more money on the problem. This bill's fiscal year 1984 authorization level for NSF represents a 22.4-

percent increase over the fiscal year 1983 appropriation level and a 3.9-percent increase over the President's fiscal year 1984 budget request for NSF. That is too much.

This bill, with its irresponsible funding recommendations, is not the simple answer to our Nation's math and science woes. Instead, it is another example of Congress unwillingness to control spending. Without control we cannot keep the Nation on the road to economic recovery.

Mr. Chairman, I have been listening to this debate with keen interest via the television machine in my office. I believe that the committee has done a splendid job on this bill, as it always does.

I further wish that I could be in the position that the committee members are in, for certainly it is a good thing to be in favor of research, that most blessed of all Government activities which we hope is going to rain benefits on our citizens and their progeny for many years to come.

Yet, Mr. Chairman, as I look at the amounts of money we are talking about, at a time when we are wrestling with deficits which have pinned us not two out of three times, but every time, it seems to me that the committee, however highly motivated it may be, is setting a terrible example for this House and setting a terrible example for our country, and for the world.

Again, there is nothing I like to support more than this kind of program. Not only is it a good program, but I think it is rather well managed by the NSF, which I think is one of our better agencies.

But, Mr. Chairman, at a time when we are trying to keep costs down, not only does our Chief Executive come in asking for 18 percent more, but the committee escalates that to 22 percent, and soon we will have an amendment on the floor that will take it up even further.

Those Members who have always complained that we cannot spend our defense increase money fast enough are pouring more money into a single function than probably can be spent responsibly over the next years.

Mr. GREGG. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from New Hampshire.

Mr. GREGG. The gentleman raises an excellent point on defense spending. I suspect the gentleman realizes that this budget is rising at a rate that is three times what is proposed in the defense budget by the administration's figures and would be four times what is proposed in the defense budget if the committee figures were to pass, and would be five times what is proposed in the defense budget if the amendment offered by the gentleman from California (Mr. BROWN) were to pass.

Mr. FRENZEL. I thank the gentleman for that clarification.

Mr. WALGREN. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the distinguished subcommittee chairman from Pennsylvania (Mr. WALGREN).

□ 1300

Mr. WALGREN. Just to observe that the rate of increase really only depends on where you start from and if this is in fact a critical national need, and if we are not doing anything near what we should do, we should be embracing these kinds of rates of increase.

Mr. GREGG. If the gentleman will yield on that point.

Mr. FRENZEL. I am delighted to yield to the gentleman from New Hampshire.

Mr. GREGG. There is no question you have to start at a point to discuss rate of increase and I start from the point when this administration came into office. You could also start at a point to discuss rate of increase of defense spending. I think if you start in the seventies on defense spending you would see that that had decreased at a rate that was faster than the National Science Foundation funding decreased during that period if at all.

So, I do not think there is any question what we are talking about here is a program accelerating at a much faster pace and by the administration's agreement than the Defense Department is accelerating.

Mr. FRENZEL. I thank the gentleman for that comment. If I may proceed, Mr. Chairman?

Spending in this bill is going forward at a rate which I consider excessive. Unfortunately around here, many Members rely on the budget process to apply discipline, and that does not work very well. Then when that fails, we look to the Appropriations Committee. And we say why did they not apply discipline?

But discipline begins with the authorizing committees. And when we have budgets presented by authorizing committees that are 22 percent, and maybe some more, over what we spent last year, it is quite clear that there is no discipline around here. It is also clear how we got to the $200 billion deficit.

No program, however wonderful, needs to be accelerated at this pace. As a matter of fact, Mr. Chairman, I would vote against this bill even if it were reduced to the President's request. That is too high, too. Despite my great respect for the work of the committee and for NSF, in the name of fiscal sanity, I ask for a no vote on H.R. 2066.

Mr. McCURDY. Mr. Chairman, I rise in strong support of H.R. 2066, the fiscal year 1984 National Science Foundation authorization. I want to commend my chairmen, DON FUQUA and DOUG WALGREN, for their expert leadership on this bill.

Our investment in basic research is an investment in our Nation's future. To a large extent, our economic vitality and military strength depend on our scientific knowledge and the quality of our Nation's engineers, scientists, and technicians. NSF has the responsibility for the health of science across all disciplines. I am pleased that this bill gives NSF an 18-percent increase to help fund research in all fields of science and engineering. I am especially pleased that the base level for the behavioral, social, economic, and information sciences has been restored to fiscal year 1981 levels and that a special $50 million research instrumentation initiative has been authorized. NSF has estimated that it could cost as much as $4 billion to update and replace obsolete equipment at our Nation's universities and colleges. Quality research requires quality equipment; obsolete equipment is a chronic and serious problem that must be addressed.

This is a well-balanced, fiscally sound NSF budget. During a time when we are concerned about losing our economic, military, and technological leadership, we must pursue a vigorous program of basic scientific research and training. I urge my colleagues on both sides of the aisle to support this legislation.

● Mr. FAUNTROY. Mr. Chairman, I rise in support of H.R. 2066, which authorizes appropriations for the National Science Foundation for fiscal years 1984 and 1985. I congratulate the members of the Committee on Science and Technology and the leadership of Mr. FUQUA. The additional authorization of $50,400,000 over the administration's request will enable the Foundation to enhance its leadership in science and technology.

In particular, I wish to emphasize the need for increased support for black and other minority postsecondary educational institutions by the Foundation. These institutions continue to graduate a significant portion of this Nation's black baccalaureate recipients. The additional funds provided for replacement and renewal of research instrumentation should enable the Foundation to increase support in this category for these institutions.

I also wish to applaud the committee's strong statement in support of increased funding for programs designed to increase the participation of women and minorities in science and education. In particular, I support the committee's direction that $2 million be utilized for the national research opportunity grants (NROG) program.

Finally, I support the authorization for the research improvement in minority institutions (RIMI). This pro-

gram assists minority postsecondary institutions in improving their research capabilities in graduate science and engineering programs.●

● Mr. GEJDENSON. Mr. Chairman, I want to commend the distinguished chairman and the members of the Science and Technology Committee for their fine work on H.R. 2066. This bill, authorizing the National Science Foundation, represents and excellent effort to consolidate America's leading role in supporting basic scientific research.

In addition to authorizing increased support for the mathematical and physical sciences as well as $50 million for the costs of instrumentation, H.R. 2066 specifies that $15 million be set aside for support of research in the social and behavioral, and information sciences. Research in the social and behavioral sciences addresses problems such as economic productivity, capital formation, savings behavior, learning, and cognitive development—all areas of great concern as American struggles to regain its economic preeminence. Much of our productivity problem has behavioral rather technological roots, as the Japanese have taught us only too well.

Mr. Chairman, the provisions of H.R. 2066 effectively address the current needs of basic science research in the United States. I wholeheartedly support the committee's bill.●

● Mr. FORD of Michigan. Mr. Chairman, I am pleased to support passage of H.R. 2066, the reauthorization of the National Science Foundation. The provision of this bill that earmarks $15 million for support of research in the social, behavioral, and information sciences goes a long way toward remedying past imbalances in the NSF scientific programs, which have arisen over the years.

Although it is almost universally recognized that this Nation must commit itself to wholehearted support of basic science research if we are to maintain our role as economic world leader, the important contributions made by social and behavioral science research in this area is less well understood. The example of Japan's extraordinary successes, however, makes plain the important contributions made by human factors to a nation's innovation and productivity.

It should be pointed out that the lessons Japan learned so well were taught them by American social and behavioral scientists whose work, although it was overlooked here, convincingly demonstrated how productivity and innovation in the workplace could be enhanced by applying straightforward behavioral principles. The scientific disciplines that produced this work, nevertheless, have benefited from an increasingly small percentage of the NSF budget over the years falling from 5.9 percent of the NSF budget in fiscal year 1980 to 3.3 percent in proposed fiscal year 1984.

There is much to be learned from the social science disciplines of psychology, economics, sociology, anthropology, and political science, among others, about how our society functions and how we might be able to improve upon our past performance. I am pleased to see that Mr. FUQUA's committee has seen fit to restore funding for research in these important scientific disciplines. The Nation will be healthier for it in the long run.●

● Mr. MITCHELL. Mr. Chairman, as we consider the National Science Foundation Authorization bill (H.R. 2066) today, I feel compelled to express what is certainly a valid concern. The National Science Foundation is among those agencies/departments most involved in research and development activities; yet, it also remains among those such entities which continuously award the fewest dollars in their budgets to historically black colleges and universities. In fact, in 1980, only 1 percent of all Federal sponsored research was conducted at these institutions.

These sad facts continue, despite the knowledge that our historically black education institutions produce the largest percentage of blacks in the professions. We do our country a disservice when we allow this to happen.

My concern goes one step further. In statistics compiled by the National Advisory Committee on Black Higher Education and Black Colleges and Universities for 1978, the National Science Foundation fellowship and traineeships for black doctoral recipients lagged significantly behind both white and foreign students. In particular, the highest percentage of these fellowships were awarded to blacks in the life science and education, versus the physical sciences and engineering.

I do not need to remind my colleagues of the necessity of insuring that more attention be given to technological skills at the undergraduate, graduate, and post graduate levels. We must insure that our students are prepared not only for the job market, but, to assume leadership in addressing the technological needs of our growing society through innovative research, development, and discoveries.

Our black colleges and universities continue to feel the detrimental impact as financial aid programs are slashed for a significant portion of their populations. We certainly should not ignore the need for these institutions to receive Federal research dollars.

Mr. Chairman, I am reluctant to vote in favor of the legislation before us today because I cannot accept any excuses for the apparent neglect on the part of the National Science Foundation with respect to historically black institutions. Ironically, it is often that, when we are able to secure Federal initiatives for minority businesses, many agencies find ingenuous excuses for not fulfilling their obligations. One of the more popular excuses is that the agencies just cannot find these type businesses to perform a particular job. For years, we have disproven these contentions, and I do hope that the National Science Foundation does not resort to the use of similar empty excuses for the low percentage of its awards to historically black institutions.

I would urge my colleagues to think seriously about this, and let us work together to improve the record of the National Science Foundation and other agencies involved in research and development.●

Mr. WINN. Mr. Chairman, I have no further requests for time.

Mr. FUQUA. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. All time has expired. Pursuant to the rule, the Clerk will now read the committee amendment in the nature of a substitute recommended by the Committee on Science and Technology now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 2066

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 2. (a) There is authorized to be appropriated to the National Science Foundation for the fiscal year 1984, the indicated sums in the following categories:

(1) Mathematical and Physical Sciences, $358,600,000.

(2) Engineering, $121,000,000.

(3) Biological, Behavorial, and Social Sciences, $236,400,000.

(4) Astronomical, Atmospheric, Earth, and Ocean Sciences, $329,800,000.

(5) Antarctic Research Programs, $102,100,000.

(6) Scientific, Technological, and International Affairs, $36,800,000.

(7) Program Development and Management, $66,000,000.

(8) Science and Engineering Education, $39,000,000.

(b) Of the sum of the amounts authorized under subsections (a)(1), (a)(2), and (a)(4), not less than 15 per centum shall be available for research instrumentation.

(c) In addition to the amount authorized under paragraph (6) of subsection (a), an additional $23,200,000 shall be made available from the amount authorized under paragraphs (1), (2), (3), (4), and (7) of subsection (a) to the Directorate of Scientific, Technological, and International Affairs to be obligated under such paragraph (6).

(d) Of the amount authorized under subsection (a)(3), not less than $8,000,000 shall be available to the Information Science Division.

(e) In addition to the amount authorized under subsection (a), there is authorized to be appropriated to the National Science Foundation the sum of $50,000,000 for high technology instrumentation to be used for new research initiatives, new laboratory development, and technology for delivering instruction (including software cost and royalties when an integral part of such instruments). The Foundation is authorized to provide such arrangements as will facilitate user charges for private, public, or consortia-owned devices.

SEC. 3. Appropriations made under authority provided in sections 2 and 5 shall remain available for obligation or for obligation and expenditure for periods specified in the Acts making the appropriations.

SEC. 4. From appropriations made under authorizations provided in this Act, not more than $2,500 for fiscal year 1984 may be used for official consultation, representation, or other extraordinary expenses at the discretion of the Director of the National Science Foundation. His determination shall be final and conclusive upon the accounting officers of the Government.

SEC. 5. In addition to the sums authorized by section 2, not more than $3,000,000 for fiscal year 1984 is authorized to be appropriated for expenses of the National Science Foundation incurred outside the United States, to be drawn from foreign currencies that the Treasury Department determines to be excess to the normal requirements of the United States.

SEC. 6. If the total amount of appropriations made by any Act for fiscal year 1984 for program activities included in sections 2 and 5 is less than the total amount authorized to be appropriated for those activities by sections 2 and 5, the amount available from such appropriations for any particular program activity shall bear the same ratio to the amount authorized to be appropriated for that activity by sections 2 and 5 as the total amount of the appropriations made by such appropriation Act for all included program activities bears to the total amount authorized to be appropriated for those activities by sections 2 and 5 (with the minimum amount required by section 2(b) being reduced in the same ratio), except to the extent specifically otherwise provided in the text of the Act making the appropriations for the program activities involved.

SEC. 7. Funds may be tansferred among the categories listed in section 2(a) so long as the net funds transferred to or from any category do not exceed 10 percentum of the amount authorized for that category in section 2. The Director of the Foundation may propose transfers to or from any category exceeding 10 percentum of the amounts authorized for that category in section 2. An explanation of any such proposed transfer shall be transmitted in writing to the Speaker of the House, the President of the Senate, the House Committee on Science and Technology, and the Senate Committee on Labor and Human Resources. The proposed transfer may be made only when thirty calendar days have passed, after the transmission of such explanation, without the chairman of either such committee having notified the Director to the effect that the committee objects to the proposed transfer.

SEC. 8(a) Section 9 of the National Science Foundation Act of 1950, as amended, is amended to reads as follows:

"SEC. 9(a) Each special commission established under section 4(h) shall be appointed by the Board and shall consist of such members as the Board considers appropriate.

"(b) Special commissions may be established to study and make recommendations to the Foundation on issues relating to research and education in science and engineering.".

(b) Section 6 of the National Science Foundation Authorization Act, Fiscal Year 1978 (Public Law 95-99), is repealed.

(c) Section 10 of the National Science Foundation Authorization Act, Fiscal Year 1978 (Public Law 95-99), is repealed.

(d) Section 12 of the National Science Foundation Act of 1950 is amended by striking out subsection (b) and by striking out "(a)".

Mr. FUQUA (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. FUQUA

Mr. FUQUA. Mr. Chairman, I offer an amendment, technical in nature.

The Clerk read as follows:

Amendment offered by Mr. FUQUA: Before section 2 add the following: "That this Act may be cited as the 'National Science Foundation Authorization Act for fiscal year 1984'."

Mr. FUQUA. Mr. Chairman, this is a technical amendment to correct an error when the bill was filed. I know of no objection to the amendment and urge agreement.

Mr. WINN. Mr. Chairman, we have no objections to the amendment and would agree with it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. FUQUA).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WINN

Mr. WINN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WINN: On page 3 of the bill, strike lines 4 through 12.

Mr. WINN. Mr. Chairman, I rise in support of my amendment.

Mr. Chairman, this amendment which I am offering with the gentleman from New Hampshire (Mr. GREGG), simply deletes $50 million of the authorization that was added to this bill in our full committee markup. This $50 million would go toward a new program to provide high-technology instrumentation for new research initiatives, new laboratory development, and technology for delivering instruction. On the face of it, of course, this sounds like an excellent idea. None of my colleagues should be surprised to know that various associations of colleges, universities, and graduate schools are all behind this proposal. They would benefit directly from this $50 million add-on. So why should they not be eagerly elbowing their way into the line for this free lunch. However, our responsibilities as Members of this House go beyond looking out for parochial interests. We must look at a broader picture and it is here that I believe the case for adding this $50 million fails.

If I were to tell you that an agency received an 18 percent increase in fiscal year 1984 funding over the previous year, most of you would assume that I was talking about the Department of Defense. In fact, I would be talking about the National Science Foundation. That is correct, the President's budget request for NSF recommended an increase of 18 percent over the appropriated level for fiscal year 1983. To my knowledge this is the largest percentage increase requested for any single agency in the Federal Government this year. For the first time in 7 years, our Science, Research, and Technology subcommittee reported the NSF authorization out at the administration's requested level. I agree with them that this is a completely adequate budget request.

Now, I am certain that we will hear statements in opposition to this amendment that say $50 million, or even more, is desperately needed for high-technology instrumentation. Unfortunately this is just not justified. The budget request of $1.3 billion for NSF contains $180 million for just such instrumentation initiatives. This represents a 60-percent increase over fiscal year 1983 appropriation levels, and a 100-percent increase over fiscal year 1982 levels. It is obvious to me that the National Science Foundation is peddling as fast as it can in this area. They could not productively spend an additional $50 million or $100 million in these areas in fiscal year 1984.

Simply put, there is a need for Federal dollars to support instrumentation initiatives. But, the requested budget adequately handles these needs. I am certain that we will see additional funding requested by the administration for these areas in fiscal year 1985, when the Foundation will be able to responsibly absorb and use additional funding. I think it does a great injustice to the many other Federal agencies which are under severe fiscal constraints to add an unnecessary $50 million to a National Science Foundation budget that has already received such significant increases.

I urge the adoption of my amendment and yield back the balance of my time.

PERFECTING AMENDMENT OFFERED BY MR. BROWN OF CALIFORNIA

Mr. BROWN of California. Mr. Chairman, I offer a perfecting amendment to the section.

The Clerk read as follows:

Perfecting amendment offered by Mr. BROWN of California: Page 3, line 6, strike out "$50,000,000" and insert in lieu thereof "$99,000,000".

Mr. BROWN of California. Mr. Chairman, my amendment would add $49 million to funding provided through NSF to upgrade scientific instrumentation. This amendment simply raises the authorization to the level agreed to in the fiscal year 1984 first budget resolution.

Some of you are probably wondering why we are making such a big fuss over scientific instrumentation. To put it simply: Without a significant improvement in our university research instrumentation and facilities, the economic health of our Nation is in danger. A bold statement like that deserves some background, so let me outline the connection between laboratory equipment and the health of our economy.

The media, along with the CONGRESSIONAL RECORD, have been filled recently with references to high technology. Many people now recognize that the nature of our economy is changing and that we are experiencing greater international economic competition. While we cannot stake our entire economy on high technology, new technologies will continue to provide economic growth, greater productivity, and new jobs. A recent survey indicated that in the race to develop new technologies, the United States is leading Japan in 56 key technologies while Japan leads us in 51. If we hope to maintain and improve our international economic position, we cannot afford to let that slim lead erode any further.

Many of you probably followed the series in the Washington Post last week about international competition in high technology. That series pointed out that we have not always done as good a job as we should have in turning our scientific knowledge into marketable goods and services. We in Congress will be spending many hours in the coming months debating the best ways to capitalize on our leadership position in science and technology. I will be joining in that debate with some ideas of my own, but I want to focus today on the more fundamental question: How do we maintain our scientific and technological leadership? Those upcoming debates about export controls, technology transfer, antitrust provisions, and a new Department of Trade will all be moot if we do not act soon to rebuild the very foundations of our scientific community.

An editorial in Monday's Washington Post asked the following simple question: "How are Americans to maintain their technological strength?" The answer given by the Post was a good one. It said, in part:

> The first thing is to keep putting money into the sources of it [America's technological strength]—basic science, engineering and every kind of education. Keep it in mind that this country's basic economic resource is its highly educated labor force.

This advice from the Post is not news to us. We learned a great deal about the link between science, education, and our economy when we debated and passed H.R. 1310, the Emergency Math and Science Education Act. Now that we have recognized the importance of math and science education, it is time to consider a related subject, the importance of up-to-date scientific instrumentation.

In order to compete at the cutting edge of scientific research, our scientists need sophisticated, state-of-the-art equipment. Many scientific discoveries occur when a scientist uses a new, previously unavailable instrument to explore nature in greater detail than anyone has before. Imagine, for example, the new worlds that open up when a more powerful telescope or particle accelerator is first put to use. Depriving our scientists of up-to-date instrumentation means that scientists in other countries will be the first to explore new scientific frontiers. Asking our scientists to keep us in the forefront of science and technology without modern instrumentation is like asking a race-car driver to win the Indianapolis 500 with a Model T Ford.

In addition to keeping us in the forefront of scientific research, there is another need for up-to-date scientific equipment and facilities—to train scientists and engineers for high-technology industries. In testimony before the Science, Research, and Technology Subcommittee, a spokesman for the chemical industires complained that:

> The majority of students are trained or do research on technologically obsolete instruments. This is especially significant since universities are expected to provide students with the advanced training and research skills necessary to help industries remain competitive.

The spokesman continued: "The net result is a decrease of the innovative capacity of industry." These comments are typical of those from all the high-technology industries.

You might be wondering if the situation is really as bad as I suggest it is. Before spending any money, should not we first request some studies to assess the situation? Fortunately, a number of good studies have recently been completed. One study, conducted by the Association of American Universities for the National Science Foundation, found that the median age of instrumentation in universities is twice that in industry. As one university researcher said: "The ivory towers are now in industry." Don't you think we should bring our universities into the 1980's? With the rapid changes transforming technology and the international marketplace, can we really afford to let our universities lag 3 or 4 years behind everybody else?

It is not only American industry which has superior laboratories, it is also foreign universities. When asked to contrast their laboratories with foreign laboratories, a number of university researchers stated that the superior equipment is found in other countries, especially in Japan and West Germany.

A number of other studies also document the very real problem we are facing. To put the problem in terms we Members of Congress can understand, I can quote recent testimony from Dr. Knapp, the Director of the National Science Foundation. Dr. Knapp said:

> As much as $4.4 billion would be required over a 3-5 year period to fully upgrade instrumentation at the 100 leading academic research institutions.

To solve a problem of this magnitude, we will need a sustained effort over a number of years from a number of Federal agencies. And we need to start now. The additional funds provided by this amendment will help initiate this multiyear effort. I realize that some problems the Nation faces cannot be solved by allocating Federal dollars. However, the university instrumentation problem cannot be solved without Federal dollars.

It is important that we stretch and manage well those Federal dollars. The Science and Technology Committee has asked NSF to be creative in its use of funds—through matching provisions, through sharing of equipment and facilities, and through the encouragement of innovative financing methods. With these types of programs, the $100 million instrumentation initiative can reverse a deade of decline.

The Federal funds we invest today in improved instrumentation will be returned many times over in the coming decades through economic growth. If we choose instead to save some funds now by spending less on instrumentation, we may find ourselves having to spend it many times over in coming decades when forced to buy advanced technology from our economic competitors. When looked at from this perspective, the budgetary question becomes: How can we afford not to upgrade our scientific instrumentation?

□ 1310

This is not a budget-busting amendment. This is a carefully calculated amendment to keep within the budget and as I pointed out earlier, that budget is one which contains a lesser deficit than the one submitted by the President and in my opinion would have a healthier economic effect if it is adhered to than the budget offered by the President.

Now essentially the question we have to decide is, as the gentleman from Kansas (Mr. WINN) indicated, how much is enough. What is a reasonable figure to meet a problem which we all agree is a problem. There has been no question about that. We know that we need to support basic research in this country, that the univerisites are the site and locale of the bulk of that basic research, that their instrumentation and computational facilities have lagged for the last 10 years, and that we need to do something about it.

Is $186 million adequate? Is $186 million plus $50 million? Is $186 million plus $100 million? Basically, that is the question we are asked to look at.

Now, I have not lightly taken this decision. I have referred to studies which the National Science Foundation commissions almost every year as to the extent of the problem. I could

cite two of those studies, one made in 1980, called the Emerging Issues in Science and Technology in 1981, which points to the obsolescence of scientific instrumentation in research universities. More recently we have a report called the Lax Report, a panel appointed by the National Science Foundation, which studied the computational problem. But even more recently in testimony before the subcommittee, and I ask the Members to pay careful attention to this, the Director of the Foundation, Dr. Knapp, said:

> As much as $4.4 billion would be required over a three to five year period to fully upgrade instrumentation at just the 100 leading academic research institutions.

Now, divide $4.4 billion by 3 to 5 years, divide it by 5 it is easier, and you get, $880 million per year. And we are talking about $50 million per year.

Now I do not expect the National Science Foundation to meet this whole need. If my colleagues will carefully read the report of the committee and, in fact, if the Members will go back and read the committee report each year for the past 5 years, you will see the same thing, that we urge that this problem be addressed, that we recognize it will not be solved by Federal money, that we urge on the universities to seek other sources of funding, we ask other agencies to provide money for this purpose, and the sum total all of these will not reach the amount which the Director of the Foundation says is necessary, $4.4 billion in the next 3 to 5 years for just the top 100 universities.

The CHAIRMAN. The time of the gentleman from California (Mr. BROWN) has expired.

(By unanimous consent, Mr. BROWN of California was allowed to proceed for 5 additional minutes.)

Mr. GREGG. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from New Hampshire.

Mr. GREGG. I thank the gentleman for yielding.

On that point, the gentleman makes the point that $800 million was needed in instrumentation. The gentleman will acknowledge that the administration budget has $400 million in it for instrumentation, correct?

Mr. BROWN of California. Not in the National Science Foundation, it does not. If the gentleman has information about other sources, I would be glad to have them.

Mr. GREGG. Well, that is a total instrumentation figure throughout the framework of the various budgets which we deal with. The gentleman would not expect the National Science Foundation to pick up all the responsibility for instrumentation. There are other areas where instrumentation dollars are being spent.

Mr. BROWN of California. The gentleman is correct. And if he is making the point that the total of all the agencies of the Federal Government is still only about half of what the Director says is needed, I would agree with him.

Mr. GREGG. Than I would assume that the gentleman would agree to some sort of proposal whereby the Federal effort in instrumentation would be matched by the private sector and we could pick up that additional $400 million.

Mr. BROWN of California. I am glad the gentleman makes that point. That is precisely what the committee report recommends and it suggests in great detail how the Foundation should explore mechanisms for doing that. I think if they do it very well we will begin to make up this gap that I have referred to here.

Mr. GREGG. If the gentleman will yield further, if we take the $100 million add-on, which would make it a $500 million expenditure throughout the Government that would occur as a result of the gentleman's amendment and the committee grossing up the figures already in NSF and we were to match that at a 50-percent level, we would obviously be moving at a rate that would be faster than even the $800 million which the gentleman projects we need.

Mr. BROWN of California. The figures that I am using are the figures from the Director of the National Science Foundation. I have not used any figures that I have created myself here.

Mr. GREGG. The figures I am using were presented before our committee by Mr. Keyworth, the President's Science Advisor, in February of this year, when he stated to us that $400 million of the Federal fiscal year 1984 budget proposal for basic research will go to purchase replacement of instrumentation. That is a phenomenally large commitment for the public sector to undertake. I suspect that the private sector should be asked to take up at least 50 percent of the instrumentation needs of the private and public sector educational facilities.

Mr. BROWN of California. I appreciate the contribution of the gentleman and I would not argue with anything that he has said. I would merely point out that the private sector has not done that well. We should expect them to. We try to encourage them in the report of the committee. I hope that they will. And I will join with the gentleman in every way possible. But I would like to point out, just to indicate another measure of the scope of this gap, that recently when the Department of Defense announced $30 million for instrumentation and invited applications, they got over $700 million in applications for that $30 million in instrumentation money.

Now this is for defense purposes. And I cannot stress too much that what we are talking about here is vital to the defense and security of this country.

Mr. GREGG. If the gentleman will continue to yield, I think it should be made clear that in the language of the bill which we are dealing with here—I am not talking about committee reports—I am talking about the language of the bill, there is no match under the section which we are talking about, under section 2E.

Mr. BROWN of California. Has the gentleman read the committee report on page 12?

Mr. GREGG. The report may talk in terms of match. I am talking about the language of the bill. There is no requirement that for this $100 million which the gentleman is now going to be requesting that we add on to the $400 million national expense on this item, for that additional $100 million there is no request that there be by law a match of those dollars.

Mr. BROWN of California. The gentleman is correct. The direction we give the Foundation is for them to stretch this money in every way possible and we suggest ways in which they should stretch it, including the matching by private enterprise.

Mr. WALGREN. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I am happy to yield to the distinguished chairman of the subcommittee.

Mr. WALGREN. I thank the gentleman for yielding.

On the point of the overall Federal expenditure on instrumentation being $400 million or whatever number million, one of the problems that strikes me is that it is only in the National Science Foundation that we charge an agency with balancing the instrumentation to take into account the overall health of science.

I imagine that this country could dump a tremendous number of million of dollars into instrumentation that might be focused on defense or focused on very high energy physics or the like and leave the balanced approach to the health of science woefully inadequate. And I would hope that for that reason alone that we focus on the National Science Foundation as a source for the balance in instrumentation that we need.

The CHAIRMAN. The time of the gentleman from California (Mr. BROWN) has expired.

(At the request of Mr. GREGG and by unanimous consent, Mr. BROWN of California was allowed to proceed for 3 additional minutes.)

Mr. GREGG. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from New Hampshire.

Mr. GREGG. I thank the gentleman for yielding.

Mr. Chairman, in response to the gentleman from Pennsylvania I would make two notes. First, the $400 million figure is overcited by the Science Adviser to the President and that he is the individual who does coordinate the distribution of instrumentation funds throughout the whole Government and his recommendation of $800 million, which is the figure that we are talking about here as being what is needed on a gross figure as versus just the public sector, is a figure which was arrived at, one assumes, by looking at his perspective, not at simply the National Science Foundation's perspective.

Therefore, I think it is a correct reflection of an adequate expenditure in instrumentation by the public sector.

And second, our bill is clearly perverse the way it is treating instrumentation because if we are really going to talk instrumentation, if we are really going to talk about the future of American science, we have got to talk about elementary and secondary schools where we have the grossest lapse of instrumentation, where you have an incredible dropoff in the amount of science which can be delivered because you do not have the tools to deliver it, where only 4 percent of all elementary schools in this country have any laboratories at all for science.

□ 1320

Only 13 percent of our high schools have math laboratories. Less than 36 percent of our high schools have computer facilities.

So there is no question but that the instrumentation issue is being addressed at the Federal level across the board, and to say that this language is going to correct or remedy the extent to which there may be perversions in that system is not accurate, because this language does not take into consideration, first, the math issue, which is the private sector contribution and, second, it does not take into consideration the elementary and secondary school issue.

Mr. BROWN of California. Again, I appreciate the gentleman's contribution. I think he knows that we are in a process of modifying our thinking on this overall problem. The President is modifying his thinking. The gentleman notes the importance of improving the teaching capability in the elementary and secondary schools. The President last year would not have agreed with him on that. This year the President agrees with him on that. The President asked for $50 million. There is a good parallel here between the instrumentation budget request. The President asked for $50 million to address the problem the gentleman refers to in education. The House passed a bill with $425 million in it to address the same problem.

We are coming to recognize the need to address these problems. We have not yet reached agreement on the adequacy of the level. And, frankly, I value this debate and discussion very much because I think it will give us an opportunity to explore in our own minds what it is that we think needs to be done.

The CHAIRMAN. The time of the gentleman from California (Mr. BROWN) has expired.

(By unanimous consent, Mr. BROWN of California was allowed to proceed for 2 additional minutes.)

Mr. BROWN of California. Mr. Chairman, I would point out that this funding that we are talking about here is addressed rather narrowly to university instrumentation. We have deliberately broadened it to make sure that it included computers and computational capability.

We are also in the language of the bill encouraging the use of computers in instruction, which would apply to elementary and secondary education, and the networking of computers, so that universities throughout the country can have access to some of the super computers which now they do not have access to.

If we had focused this just on computers and tried to keep our lead, which we have rather tenuously over the Japanese, it would have required more money than is in my amendment. I think the Members of the House all are aware of this fact. What we have here is an initiative which addresses the problem in a way which we think will produce the maximum national benefit both in the computer field and in other fields of research instrumentation.

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from New York.

Mr. BOEHLERT. Mr. Chairman, I am very glad that the gentleman made reference to our hope and our desire and our commitment on the committee to have set up a system for networking for our university research centers to have access to super computers. Today, in this year of 1983, in the United States of America, our major university research centers do not have access to the latest computer technology. That is a national disgrace, and we have to do something to correct it.

Mr. BROWN of California. Mr. Chairman, while the distinguished gentleman from Minnesota (Mr. FRENZEL) is on the floor, if I may have his attention while we are discussing the super computer situation, we are engaged at this moment in a giant struggle to see who will first develop the next generation of super computers. The only two manufacturers in this country happen to come from Minnesota.

The CHAIRMAN. The time of the gentleman from California (Mr. BROWN) has again expired.

(By unanimous consent, Mr. BROWN of California was allowed to proceed for 1 additional minute.)

Mr. BROWN of California. This is Cray Co. and Control Data. They are outstanding. But they are threatened with the loss of their world markets, as well as their U.S. markets, unless we are able to survive and win this competition with the Japanese over who will first develop the next generation of computers. And this is not a matter of minor importance. This is a matter essential to our defense, to our economic survival and competitiveness around the world, and to many other aspects of our society today, and I thought I should call the gentleman's attention to that.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Chairman, I am delighted with the gentleman's interest, particularly in the companies in my region which are engaged in this kind of work. Nevertheless, it is still my contention that simply pouring money on a problem which has lately been highlighted is not the way to attack it.

Adding $50 million to a program that was increased 60 percent in the President's budget and then adding another $49 million on top of that I think is simply an example of an hysterical urge to look like we are doing something about a problem which takes a little more thought and a little more work, I think, than we have seen displayed on the floor today.

In addition, while companies in my area may be advantaged today by Federal largess, tomorrow Government will favor someone else. The Government cannot, and should not, closely target its policies. We have already tried that with synfuels, Amtrak, and Clinch River. Our lack of success was splendid.

We can do basic research, and we should. But we need to stifle the urge to shovel money at whatever is hot this year.

Mr. BROWN of California. I thank the gentleman for his contribution. We are both concerned about abiding by budgets. It just happens that we are looking at different budgets. The amendment that I have is well within the budget that this House approved, and I would think that the gentleman would want to take cognizance of that.

The CHAIRMAN. The time of the gentleman from California (Mr. BROWN) has again expired.

(On request of Mr. FRENZEL and by unanimous consent, Mr. BROWN of California was allowed to proceed for 2 additional minutes.)

Mr. FRENZEL. Mr. Chairman, if the gentleman will yield further, I thank the gentleman for his statement on the budget. I think it is important that we focus on it. I think the gentleman should also know, however, that, in addition to the 22-percent increase which is in this bill, that particular budget had an overall increase in spending all functions of 12 percent. That is, of course, well beyond any conceivable cost-of-living increase for the coming fiscal year. And if we continue to spend at that rate, there is no way we are ever going to lick our deficit problem.

Now, to be sure, the Democratic budget which passed this House, the creature of the majority on the Budget Committee, tried to mask that problem by adding $30 billion onto the taxpayer. If the gentleman is going to proceed in that way over the next couple of years, I can positively guarantee him that he can stifle the recovery and that he can bring back higher interest rates.

Mr. BROWN of California. Since the gentleman is on the Budget Committee, I thought he would appreciate the fact that we tried to keep up with the $100 million addition which they made in this particular item in the Budget Committee. That was my purpose in picking the figure that we have here. This is the figure added in the Budget Committee.

Mr. FRENZEL. If the gentleman will yield, I never knew that the Budget Committee's figures were floors. I thought they were ceilings. And I thought occasionally committees could exercise some creative thinking and come in a little bit under the budget ceiling. But I see that nowadays in the gentleman's committee, and in others, there is a feeling that budget ceilings must be reached, whether we need the spending or not.

Mr. BROWN of California. The gentleman's argument is so persuasive that instead of the $50 million which would have brought it up to the budget, I cut it to $49 million so that it would not quite be up to the budget figure.

Mr. FRENZEL. I thank the gentleman. My thimble runneth over.

Mr. GREGG. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to address a couple of points raised by the gentleman from California whose commitment to the science community cannot be questioned by anyone and who has clearly been a leader in this Congress on the issue of science and making the people of this country and of this Congress aware of science and the significant role it has to play. But we do have this whole question of how much money is available in this Government for these activities. And what we are talking about here is adding an additional $100 million to instrumentation. I think we have got to understand—and I would like to reiterate—that this is not an attempt to increase or to bring up to a level funding which has been reduced. This is an add on. In fact, when NSF went to OMB, they presented four different levels at which they would be interested in seeing their instrumentation categories funded.

□ 1330

Those levels varied from $118 million up to $174 million. When their budget came back from OMB, much to their surprise, I suspect, they had received a funding level higher than their highest projected need in instrumentation, $180 million.

Furthermore, we have already mentioned that the National Science Foundation is committed to a program of expanding research in the area of the type of instrumentation that is needed. This is a two-phase project, the first of which involves gathering information on the engineering, computer, science, and physical science areas, and the second phase of which will collect additional information about the biological and agricultural and environmental sciences as to their instrumentation needs.

So they do not even know yet what they need in the area of instrumentation.

Another point which I think should be made is that under the Economic Recovery Act which this Congress passed, one of the intelligent things we did was to include in it a tremendous tax incentive in the area of instrumentation and to allow various organizations to participate in funding, through tax incentives, the instrumentation of different universities and colleges throughout the country. The purpose of that was to draw into the whole instrumentation issue the private sector, and what this proposal does, what the amendment which we are dealing with today essentially does, is to say, "Well, the private sector may want to come along, but we do not really care whether it comes along. Essentially what we want is to throw money at this problem from the public sector without reference to putting some pressure on the private sector to be responsive."

There is no match here. This $100 million grossing up of the entire $400 million which is already in the instrumentation area throughout the Government means that the Government will be contributing more than half of the projected instrumentation needs for both the public and private colleges throughout our Nation, and it seems to me that we are essentially usurping the private sector and saying that the public sector will have total responsibility in this area and that we expect the private sector to be impotent and to be nonresponsive in the area of instrumentation, clearly something that is inconsistent with what we did when we passed the Economic Recovery Act, and undermines the function of the Economic Recovery Act, which was to draw into the instrumentation process the private sector.

For these reasons, it seems to me that this 14-percent increase on top of an 18-percent increase which we have already passed, which 18-percent increase included in it a 60-percent increase in instrumentation, is clearly a throwing-money-at-the-problem solution which cannot be supported by the facts of the matter.

Mr. WIRTH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment.

I just have some very quick points on this issue, and I will not prolong this.

First, on the subject of the budget ceiling, an amount precisely for this is in the budget ceiling as voted on in the budget resolution as passed by the House of Representatives.

Second, the discussion of should this not be left to the private sector, let me, if I might, quote from the National Science Board:

> Although precise figures are extremely difficult to collect, the current proportion of university research funded by industry is estimated at 5 percent or less. The most liberal estimates of future industrial funding of universities place that proportion at under 10 percent. Furthermore, most corporations tend to contribute mainly to research in areas of direct immediate interest to themselves. Therefore, research funding, including support for instrumentation, available from corporate sources has skewed toward engineering schools and those scientific subdisciplines likely to have the most immediate impact on product development.

The purpose of this is to renew our historic commitment which we have had ever since World War II and before, actually going back to the moral that that basic university research structure has got to be renewed and that is the purpose of the amendment offered by the gentleman from California.

I would urge my colleagues, if they are concerned about basic research and maintaining our lead in the world as the idea capital of the world that this should be supported.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I would be happy to yield to the gentleman from New York.

Mr. LUNDINE. I thank the gentleman for yielding.

Mr. Chairman, today, I rise in strong support of the amendment to H.R. 2066, the National Science Foundation authorization for fiscal year 1984, offered by my colleagues, Congressman BROWN and Congressman WIRTH, which would authorize an additional $50 million to upgrade our Nation's college and university research and training capabilities. I certainly agree with my colleagues that increased investment in the scientific excellence of our universities and a greater commitment to research and development activities are essential ingredients to our long-term economic growth.

I want to commend the gentleman from California and my colleague from Colorado for this amendment. I think when we refuse to finance research and instrumentation that supports that research at adequate levels, we are killing the goose that lays the golden egg. I really commend them for their efforts in this regard.

While we recognize the important contributions made by our university research laboratories to the development of innovative and new technologies, we are exceedingly slow to recognize the fact that state of the art, modern research facilities of the sixties and seventies are increasingly out of date and obsolete for the research of the eighties and nineties. We must strengthen our commitment to research and development by addressing the great need to upgrade scientific instrumentation at our Nation's research institutions. Such a commitment is essential to the country's industrial competitiveness.

In addition, this amendment is consistent with actions taken by the House of Representatives earlier this session with the passage of H.R. 1310, the Emergency Mathematics and Science Education Act and the first budget resolution for fiscal year 1984.

Our efforts to improve science and math education at all levels will be enhanced by the passage of this amendment which stems from the recognition that in order to train young scientists and address the shortage of high-quality engineers, we must continue to support institutions that integrate education and the conduct of valuable research and development activities. Finally, the amendment is totally consistent with the priorities established in the first budget resolution for fiscal year 1984. I urge that we not abandon the priorities established in this budget and urge the adoption of the Brown-Wirth amendment.

Mr. GREGG. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I would be happy to yield to the gentleman from New Hampshire.

Mr. GREGG. I thank the gentleman for yielding.

Mr. Chairman, I would ask the gentleman from New York (Mr. LUNDINE), when he defines the goose that lays the golden egg, does he include in that our children in the elementary and secondary schools who are denied instrumentation at this time as being the natural resource for our technological future?

Mr. LUNDINE. If the gentleman will yield, I certainly do. I think that is one important point about this amendment: That it is entirely consistent with action the House has already taken on the emergency math and science bill, and I think it is impossible to assume that we are going to have educated young people without the adequacy of instrumentation to support their education.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I yield to the gentleman from California.

Mr. BROWN of California. I thank the gentleman for yielding.

Mr. Chairman, this discussion about the importance of instrumentation to our basic science reminds me of the story of how we made one of the greatest breakthroughs in biology, the discovery of the double Helix structure of DNA. It was largely due to improved instrumentation. It was the result of the development of an improved capability electron microscope which allowed us to make this breakthrough about 25 years ago. This in turn has led to the revolution in cellular biology that has occurred during these past 25 years.

I wanted to share with the Members this concrete illustration of what we are talking about here in terms of the significance of properly developing the next generation of scientific instrumentation. It is absolutely essential to our continued progress.

● Mr. MINETA. Mr. Chairman, I rise in support of the amendment offered by the gentleman from California. It is critical to the economic security and to the well-being of our citizens that American scientists keep pace with the rapid advancements occurring today in the scientific and medical fields around the world. In order to continue to make strides in these areas our laboratories must be equipped with modern instrumentation.

Just as much of the machinery in our older industries is now obsolete, so, too, are the instruments in our universities outdated and inadequate. Scientific instrumentation is the infrastructure of research and development. And just as we cannot ignore the deterioration of our roads and factories, neither can we ignore the deterioration of our Nation's labs. For almost 20 years now, our universities have voiced the concern that instrumentation available to academic researchers was inadequate. We can no longer ignore their pleas. A strong R&D program is mandatory if we want to maintain our leadership in the areas of science, medicine, and technology. This issue has national implications and the Federal Government must do its part to support our scientists.

The cost of updating our university labs has been estimated to be at least $1 billion and as high as $4 billion. Obviously the Federal Government cannot fully meet this need. Updating our labs must be a joint effort of all levels of government and of the private sector. However, the Federal Government must provide a steady funding source to help meet the need.

Indeed we cannot afford not to provide this money. The losses in revenue and jobs resulting from the growth of our trade deficit are dramatic examples of the result of neglect of our basic R&D needs. On the other hand, the strides being made in cancer research is an excellent example of the benefits of a strong R&D program.

The House Budget Committee recognized the need for adequate instrumentation by assuming $100 million in funding for this initiative in the fiscal year 1984 budget resolution. This body adopted that resolution. I urge my colleagues to adopt this amendment. The health and welfare of our country depends in large part on our scientific and medical advancements. We cannot afford to vote no on this amendment.●

● Mr. BOUCHER. Mr. Chairman, I rise today to support an important amendment to the National Science Foundation's 1984 Authorization Act. That amendment, offered by the gentleman from California, will save our Nation's colleges and universities from a crisis of scientific equipment obsolescence.

Academic research laboratories serve not only as the source of tomorrow's technical and scientific leaders but also as a generator of creative new technologies and innovative thinking. These institutions have played a crucial role in bringing this country to the forefront of scientific excellence. The health of these institutions, and thereby the future health of our Nation, is in jeopardy, however.

Today, students in colleges and universities throughout the country are severely handicapped in their educational pursuits, because research equipment is obsolete, in disrepair, or simply unavailable. The extent of the problem is so great that the Director of the National Science Foundation recently testified that "as much as $4.4 billion would be required over a 3- to 5-year period to fully upgrade instrumentation at the 100 leading academic research institutions."

In many academic laboratories, students now use machinery and technology that is far inferior to the equipment they will actually encounter in the private sector. A recent NSF survey, in fact, has found that instru-

mentation in academia is twice as old as that in industry.

In the field of engineering alone, researchers report that outdated equipment is a prime factor in the loss of educators to the private sector. Since 1970, laboratory equipment costs have inflated 20 percent annually. Maintenance alone often runs 7 to 8 percent of the original purchase price. A leading engineering school in my own district, the College of Engineering at Virginia Polytechnic Institute and State University, reports that its instructional laboratories are not equipped to provide students with experience on state-of-the-art instrumentation and technologies such as robotics or computer-aided design and manufacturing.

The problem goes well beyond Blacksburg and this single institution. Last year Virginia's higher education planning agency surveyed all the States to determine the extent to which research equipment in colleges and universities is outdated or unavailable. The results of that survey indicate that many of our major institutions no longer have the instrumentation necessary for exposing our future scientists to the cutting edge of scientific knowledge.

I am pleased to have the opportunity to address this critical instrumentation problem with an addition of $50 million to the National Science Foundation, earmarked specifically for upgrading of scientific instrumentation for education. This funding represents a solid investment in our Nation's future: Dollars spent today to improve the scientific and technological excellence of our universities will yield important benefits far into the future, keeping America at the forefront of the international marketplace of technology.

I urge my colleagues to join me in supporting the Brown amendment.●

Mr. FUQUA. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to both amendments.

Mr. Chairman, it is with great reluctance that I rise in opposition, particularly to the amendment offered by my good friends the gentleman from California, and the gentleman from Colorado that seeks to add some $49 million to the $50 million that was added by the Committee on Science and Technology.

I also with great reluctance must resist the amendment by my very good friend, the gentleman from Kansas (Mr. WINN), and the gentleman from New Hampshire (Mr. GREGG). I certainly know their motives are well intended and I appreciate the fact that they certainly have the right to offer their amendment.

But I think what the committee did in adding $50 million, which is well within, as has been pointed out, the budget resolution that passed this House, and will be augmenting the bill H.R. 1310 that passed this body in March of this year, but addressing specifically a very important subject that has been mentioned on this floor today. Mr. BROWN discussed it very well when the Department of Defense offered $30 million and received a request in for over $750 million from over 2,500 bona fide researchers around this country.

Instrumentation is probably one of the most important issues that we have facing the advancement of science and research in this country today in the fields of robotics, biotechnology, advance materials, super computers, and image enhancement. All of these things are very important, and what we are trying to do with the $50 million that was authorized by the Committee on Science and Technology is to give access by charges and fees, to researchers who can have access into our more advanced computers that they do not have now and have not been able to fund adequately in the pursuit of their research.

It provides, as the gentleman from New York (Mr. BOEHLERT) mentioned, the fact that we can begin networking, that we can pay royalty fees for software materials, all of these things.

I think within the budget constraints that we have facing us today, and the ability of the National Science Foundation to prudently spend these funds, that both of these amendments should be rejected, the add-on amendment and the one to reduce all of the money. Certainly we need to add the $50 million. I wish we could add more, but I am afraid under the circumstances that that would not be wise at this particular time.

So I plead with my colleagues to reject both of these amendments and let us move forward with the very good and balanced bill that we have.

□ 1340

The CHAIRMAN. There being no further discussion on the amendment, the Chair will state that the question will occur now on the perfecting amendment offered by the gentleman from California (Mr. BROWN) and the question then will occur on the striking amendment offered by the gentleman from Kansas (Mr. WINN).

The question is on the perfecting amendment offered by the gentleman from California (Mr. BROWN).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 6, noes 11.

RECORDED VOTE

Mr. BROWN of California. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 150, noes 255, not voting 27, as follows:

[Roll No. 108]

□ 1350

The Clerk announced the following pairs:

On this vote:

Mr. Dixon for, with Mr. Derrick against.

Messrs. GEKAS, MRAZEK, and RALPH M. HALL changed their votes from "aye" to "no."

Messrs. LONG of Louisiana, SAVAGE, VOLKMER, RAHALL, McNULTY, and LONG of Maryland, changed their votes from "no" to "aye."

So the perfecting amendment was rejected.

The result of the vote was announced as above recorded.

□ 1400

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would hope that the last vote would indicate that a substantial amount of support will also accrue to the Winn amendment when that is voted on in a few minutes.

The Winn amendment would permit a 60-percent increase in the amount of money going for instrumentation.

What the committee has done is taken that 60-percent increase and increased it even more, by another $50 million. With the Winn amendment we will preserve the budget but, at the same time, we will assure ourselves that the national commitment to upgrading our scientific instrumentation is kept.

I think it is important to recognize that this debate on NSF has been a very responsible debate. I would hope it would stay that way.

What concerns me, as I sit here and listen to it, is the fact that only a few years ago the committee used to come to the floor on National Science Foundation matters and used to be fearful of bringing any kind of authorization out here because they knew that what we were going to have was a debate over many of the kinds of projects that NSF was funding. Some of those, in all honesty, could not be justified, the sex life of a tsetse fly and a lot of those kinds of things.

We have in recent years attempted to make certain that this debate stayed on a high plane, that indeed we did not raise some of those more superflous issues and that we tried to make it a debate on the merits of the science being done.

What we are tending to find now as we have made the debate more responsible the spending levels have become more irresponsible and that we tend then to say that the whole debate can be aimed at the research and development needs and so, therefore, any amount of spending can be justified.

It seems to me that if we are going to continue to see this kind of fiscal irresponsibility with regard to these bills that what you are going to do is you are going to bring us back to the days when an awful lot of debate is going to then be made on things of the nature that often were raised that I think were superfluous to the real issue and mission of the NSF.

So I would hope the membership would look at what the administration has proposed, an 18-percent increase in the National Science Foundation with a 60-percent increase in instrumentation, will look at those figures and decide that is indeed a recognition of national commitment and will allow this budget to go forward in a responsible way rather than the kind of irresponsible funding that is embodied in the committee resolution.

The Winn amendment gets us back to a responsible level of funding. I would urge the membership to support the Winn substitute.

I yield back the balance of my time.

Mr. FUQUA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do not intend to take 5 minutes. I know the Members are ready to vote.

I just would like to encourage my colleagues to support the committee. We have increased by $50 million money in this bill for instrumentation to give accessibility of university researchers to computers, to pay access charges for these in the field of robotics, and biotechnology, advanced material, supercomputers, and image enhancement.

This augments the bill that passed this House earlier this year relating to science and math education.

I would urge my colleagues to vote "no" on the amendment offered by the gentleman from Kansas (Mr. WINN).

Mr. NELSON of Florida. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I will be happy to yield to my colleague, the gentleman from Florida.

Mr. NELSON of Florida. Mr. Chairman, I oppose the Winn amendment and support the Science and Technology Committee's proposed budget for the National Science Foundation.

The National Science Foundation was first founded in 1950 and has lead the way for the past 30 years in the areas of research and education programs, promoting science and engineering.

Its major emphasis is on high quality, science-driven research, with the goals of better understanding the fundamental laws of nature

The educational programs are directed at increasing the understanding of science at all educational levels; assuring that America has an adequate supply of scientists and engineers for the future needs of our country.

Through grants and contracts to our Nation's educational institutions, NSF initiates fundamental, long-term disciplines in basic, and highly advanced research.

NSF encourages cooperative efforts by universities, industries, and the Government, promoting the application of research and development for service that improves the quality of life; creating new employment opportunities and stimulating economic growth.

The NSF has supported major national and international programs such as the U.S. Antarctic program, ocean drilling programs, and others.

Other major research programs include—astronomical, atmospheric, Earth and ocean sciences, advancing the physical knowledge of the universe and knowledge of the planet Earth. Included are: study of the life cycle of stars; the nature of Earth and its geological history; open ocean and coastal dynamics and resources, and the influence of the Arctic Basin on the Earth's climate.

Most importantly, however, is the emphasis that the NSF places on science education. With the current

problems the United States has in properly funding of elementary and graduate education programs, the NSF has taken the leading role in assuring quality education opportunities for all.

I urge a no vote on the amendment.

Mr. FUQUA. I appreciate the gentleman's comments and yield back the balance of my time.

Mr. SKEEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to commend the National Science Foundation and this administration for the budget proposal submitted for fiscal year 1984. This NSF budget, up 18 percent from 1983 appropriation levels, provides extremely healthy increases to our scientific endeavors to the continued excellence our Nation holds in the scientific and technological arena.

The fiscal year 1984 administration request would allow research in engineering, mathematical and physical sciences to increase 22 percent; biological, behavioral and social sciences would see a total increase of 18 percent; and astronomical, atmospheric, Earth, and ocean sciences have a 21 percent proposed increase.

While I understand there will always be those who scream that this is not enough, all of us can be proud that this administration has put its money where its mouth is. The President made a commitment in the state of the Union message to keep the United States No. 1 in the field of technology and development. The NSF budget clearly demonstrates this commitment.

Much talk has gone on in these halls about the need for university instrumentation. Again, I believe this administration is both sensitive and committed to addressing this need. Fourteen percent of the NSF budget will go directly for instrumentation and equipment alone. This is above and beyond the moneys that a research receives through the NSF grant.

Elsewhere in the Federal budgets are new initiatives for research instrumentation. The DOE budget has a new initiative of $6 million exclusively for this purpose; NASA has at least that same amount in a variety of programs such as planetary exploration, physics and astronomy, materials processing, and space research and technology. There are $400 million in the total Federal budget that will go to universities for upgrading and acquisition of instruments. In lieu of the economic times, this effort exemplifies the commitment to deal with some necessary and serious priorities.

Therefore, Mr. Chairman, I join my colleagues on this side of the aisle in supporting the President's budget. I realize the Science and Technology committee has made some adjustments to that budget. I find fault particularly with the addition of $50 million for "new initiatives" for instrumentation purposes. And at the appropriate time, I will support an amendment to delete this unnecessary add on.

Mr. CHANDLER. Mr. Chairman, will the gentleman yield?

Mr. SKEEN. I yield to the gentleman from Washington.

Mr. CHANDLER. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Kansas (Mr. WINN). I would like to thank the chairman of our committee and the other members of the Science and Technology Committee for work that has gone into the Department of Energy authorization bill for civilian programs for fiscal year 1984. As a new Member of both the Congress and this committee, I feel that the members of the committee have worked diligently and given careful consideration to crafting a bill which would provide a balanced program for conservation, solar, nuclear, fossil, geothermal, and basic research. We do, however, have differing points of view on the level of funding for these important programs. I believe that we as a Congress must demonstrate a fiscal sensitivity to our economic situation. All of the economic indicators seem to show that we are in the initial stages of recovery, but the financial markets and investment community are watching warily to see if we are going to continue past policies of excessive Federal spending which will, in turn, reduce the amount of capital available for the private sector.

The substitute which is being offered today is a judicious one which would maintain the fiscal year 1983 appropriation total of $3 billion, $310 million less than H.R. 2587, while still meeting the country's long-range energy needs and emphasizing the Federal Government's appropriate role of supporting those high-risk areas of energy research and development. I urge my colleagues to support this amendment which combines fiscal discipline and foresight in meeting our energy needs.

Mr. RITTER. Mr. Chairman, will the gentleman yield?

Mr. SKEEN. I yield to the gentleman from Pennsylvania.

Mr. RITTER. Mr. Chairman, it is a misconception to think that the high technology revolution in this country is driven by the Federal Government. There is a contribution, and it is major but it goes only so far. The administration has recognized the contribution necessary from basic research. It has recognized the contribution necessary from the National Science Foundation.

The NSF instrumentation budget is up 100 percent over fiscal year 1982. It is up 60 percent over fiscal year 1983.

Simply adding another $50 million is not the answer to the technological revolution.

I urge my colleagues on the Democratic side of the aisle to take a close look at some of the deeper reasons for this technological revolution in this country, to understand there is only so much that the Government can do, by expanded budgets, that the budget numbers projected this year by this administration are already fair, reasonable, and in fact quite generous.

I urge my colleagues to support the amendment offered by the gentleman from Kansas (Mr. WINN).

Mr. SKEEN. Mr. Chairman, I just want to make one remark. We passed in February the National Engineering and Science Personnel Act which gives NSF the discretion to spend $130 million in instrumentation alone.

So in support of the proposal offered by the gentleman from Kansas (Mr. WINN) I would point out that we have a very large increase and the possibility of even more to be put into the category of instrumentation at educational institutions.

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. SKEEN. I yield to the gentleman from New York.

Mr. BOEHLERT. I briefly would ask my colleagues to consider that there is some support for retaining this funding on this side of the aisle. I ask them also to consider the very basic fact that in the United States of America today, in this country of ours, our major university research centers do not have access to supercomputers. I think that is a deficiency that must be overcome and in our committee deliberations and in our committee report we pointed out that we want the National Science Foundation to work in collaboration with the DOE to set up a network so that our university research centers can have access to supercomputer technology.

□ 1410

Mr. SKEEN. I thank the Chair and I yield back the balance of my time.

The CHAIRMAN. There being no further discussion on the amendment, the question is on the amendment offered by the gentleman from Kansas (Mr. WINN).

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WINN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 150, noes 257, not voting 25, as follows:

□ 1420

Messrs. TORRES, OTTINGER, and GINGRICH and Mrs. JOHNSON changed their votes from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. GREGG

Mr. GREGG. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GREGG:

On page 3, Section 2(e), insert after line 12 the following: "Of the funds authorized under this section, not less than 50% shall be spent for instrumentation at the primary and secondary education level."

Mr. GREGG. Mr. Chairman, we have just passed a $50 million add-on to a budget which has a 60-percent increase in it in instrumentation funds. And that $50 million is allocated to postsecondary, in other words, college and university level activities for instrumentation.

Nowhere in this bill, the NSF bill, are there funds allocated to, in any substance, elementary and secondary schools. And as has been heard on this floor before, the seed corn of our entire scientific community and our ability to stay ahead of the rest of the world in the area of science involves our ability to raise and produce math and science students.

The statistics in the area of elementary and secondary education are dramatic. We know for a fact that 33 percent of all elementary classrooms have no science facilities. We also know that only 4 percent of all elementary classes are conducted in laboratories or special science rooms. And you have to remember that there is a conclusion that has been reached by the education community in this country that unless you capture a child's mind at the elementary school level and capture that mind in an interest in science, you lose that mind probably forever.

Further we know that of the 23,900 schools in this country, of which 18,400 are public, that they spend an average of $2,000 per child, but of that $2,000 spent per child, only $5.46 is spent on capital equipment for students of science.

□ 1430

That assumes, to begin with, of course, that they even have a science budget.

Only 44 percent of the 18,400 public schools even have a science budget.

We know, for example, that in our high schools, only 15 percent of our high schools have a math laboratory. Only 19 percent of the grades between 4 and 6 have math laboratories. Only 31 percent of the grades between 7 and 9 have math laboratories. We know that there are only 13 percent of our kindergartens that have any form of science or math laboratories.

Another example of our tremendous lack of facilities in our elementary and secondary schools is the fact that only 36 percent of our high schools have access to the computers. And if you take the poorer high schools, you find that the percentage drops down to below 5 percent.

We are producing, unfortunately, as has been acknowledged by study after study, an intellectual void in the area of math and science, and it is impossible for us to claim improvement in math-science education or math-science instrumentation at the college level will occur if we have not given the children who develop into those adults taking those courses on the college level the facilities to understand and to get involved with science.

One-sixth of all high school students have taken junior high math courses. Two-thirds of all U.S. high school students require only 1 year of math and science. We know that in the science area of teachers, we have an incredible shortage; that in a survey taken by the National Governors Association, 43 out of 45 States reported a critical shortage of math teachers, of science teachers; and that is, to a great extent,

due to the fact that we do not have math-science facilities and instrumentation on which those people can teach.

For example, 69 percent of our science and math teachers in our high schools have never even attended a computer workshop. That may result from the fact that we do not have any instrumentation.

Mr. WEBER. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from Minnesota.

Mr. WEBER. I thank the gentleman for yielding.

Mr. Chairman, I think that the gentleman's amendment has considerable merit. I would just like to ask if the gentleman could clarify a little bit precisely what the intent of the amendment is, because I am not sure that all Members understand exactly where we are.

As I understand it, there has been a substantial increase in funding of instrumentation in the National Science Foundation budget as a result of the actions taken by the House Science and Technology Committee and as a result of the vote we just took; is that correct?

Mr. GREGG. That is correct. The original budget for science instrumentation was $150 million, of which almost none of that went to elementary and secondary schools. We have now added to that an additional $50 million.

Mr. WEBER. If the gentleman will yield further, that was going to be my second point. Almost none of this money goes to elementary and secondary education?

Mr. GREGG. That is absolutely right. Almost none.

The CHAIRMAN. The time of the gentleman from New Hampshire (Mr. GREGG) has expired.

(On request of Mr. WEBER and by unanimous consent, Mr. GREGG was allowed to proceed for 2 additional minutes.)

Mr. WEBER. If the gentleman will yield further, it seems to me that the critical point is that we lose our science edge in elementary and secondary schools, so that once we put the money in at the postsecondary level, if we have not built the foundation, if we have not attracted students to science and science teaching in high school, if we have not got their attention and their interest at that level, really there is considerable less value to the money we might invest in it at the higher education level because we will not have the students to take advantage of those instrumentation moneys in the first place; is that correct?

Mr. GREGG. Absolutely right. If a child does not know what a scientific instrument is, whether it be a computer or a titrating machine, in the elementary and secondary schools, by the time they reach graduate school level, clearly they are not going to have any interest in that facility.

Mr. WEBER. And if I understand the gentleman further, did the gentleman say that one-third of our high schools are without adequate science labs?

Mr. GREGG. That is correct. In fact, if you look at our elementary schools, 33 percent have science laboratories. Sixty-six percent do not have science laboratories.

Mr. WEBER. Two-thirds do not have science labs?

Mr. GREGG. That is correct.

Mr. WEBER. It seems to me obvious that the gentleman has an amendment here which really gets to the heart of our science and engineering education problem. I am certainly going to support it. Beyond that, I think there is a political imperative. Who would possibly want to vote against an amendment that would direct funds to every elementary and secondary school in the country in favor of a few higher educational facilities? I think there is a political imperative as well as an economic and scientific and educational imperative in the gentleman's amendment, and I certainly intend to support him.

Mr. GREGG. I thank the gentleman from Minnesota.

Mr. Chairman, clearly, a vote against this amendment is a vote against elementary and secondary schoolchildren.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, I think another point that needs to be made is that if we are going to upgrade the amount of scientific equipment and the caliber of the scientific equipment available to us at the university level, it seems to me that we ought to begin training people on the equipment or at least on some equipment in the elementary and secondary schools.

The CHAIRMAN. The time of the gentleman from New Hampshire (Mr. GREGG) has again expired.

(On request of Mr. WALKER and by unanimous consent, Mr. GREGG was allowed to proceed for 2 additional minutes.)

Mr. WALKER. If the gentleman will yield further, it seems to me that the gentleman offers us an opportunity to see to it that we build that kind of a process and that we assure ourselves that those people operating sophisticated equipment at the university level have been trained on proper equipment at the elementary and secondary level.

I, too, think the gentleman has a very good amendment, and I intend to support him on his amendment.

Mr. GREGG. I thank the gentleman.

Mr. Chairman, a good analogy would be that if you took a child out of high school and told him he could drive a car immediately and then put him in the car without any education at all and told to drive in the Indianapolis Speedway Race, that is about what happens when you take a child and try to throw them into a college environment without ever having had that child deal with any of the instrumentation that college environment is going to give him a feel for.

Mr. WEBER. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from Minnesota.

Mr. WEBER. I thank the gentleman for yielding to me once again, and I just want to clarify one additional point that may have been lost on some of the Members during the course of the debate.

The gentleman's amendment does not eliminate one penny of funding; is that correct?

Mr. GREGG. That is correct. This amendment has no effect on the level of funding, simply on the application of the funding.

Mr. WEBER. So there is no way that this vote can be interpreted in any manner as reflecting on a Member's commitment to the National Science Foundation; rather, it is simply a question of a Member's priorities with regard to higher educational facilities or all of those elementary and secondary schools in his district?

Mr. GREGG. This amendment is a commitment to children and youth and our future in technology.

Mr. WEBER. I thank the gentleman.

Mr. SKEEN. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from New Mexico.

Mr. SKEEN. I thank the gentleman for yielding.

Mr. Chairman, I would like to make just one more salient point in regard to this question. I think that the gentleman's amendment is right on the mark.

The Subcommittee on Investigations and Oversight of the Committee on Science and Technology has had several hearings, with witnesses in education, who stated time and time again that you cannot begin too early if you are going to enhance the technological education of the American youngster, and you should start in the elementary and secondary areas, or give it as much importance as you possible can, and start those youngsters with the instrumentation, even in elementary schools.

Mr. Chairman, I heartily support the gentleman's amendment.

The CHAIRMAN. The time of the gentleman from New Hampshire (Mr. GREGG) has again expired.

(By unanimous consent, Mr. GREGG was allowed to proceed for 3 additional minutes.)

Mr. WALGREN. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I yield to the chairman of the subcommittee.

Mr. WALGREN. Mr. Chairman, I would just like to kick in here that clearly the gentleman has put his finger on a very important subject and one we certainly should respond to. The difficulty is that it seems to me that this is a hard place to strike these balances between the postsecondary and the secondary. My quick figuring is that if you have $25 million and you allocate it to those 16,000 school districts around the country, you are talking about $1,500 per school district.

Now, I do not really know how you would divide that among the schools within the school district. It may be we come up with an amount of money that is without any real help. And it strikes me that this may be the best argument for the Brown amendment, that there is this much that has to be done in instrumentation, that the amount of the money we have is just not approaching the problem.

So I would question whether this is the place where we can make this kind of a distinction between allocating money on the secondary and the postsecondary levels.

Mr. GREGG. If I could just quickly respond to that, before yielding to the gentlewoman from California, first, do not forget that this amendment will be followed by one for matching grants, and I assume that that will pick up a significant portion of the funding; and, clearly, we do not put a formula in our amendment. It is up to the NSF to determine how to best allocate that. I do not assume they are going to parcel it out in bits and drabs. I assume they are going to take this $25 million, as they have taken the $25 million that would go to the universities, which I suspect there are a significant number of, and try to apply it where they can get the most for the buck.

□ 1440

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I yield to the gentlewoman from California.

Ms. FIEDLER. I thank the gentleman for yielding.

Mr. Chairman, in response to the comments made by the gentleman a moment ago, I was a former member of the Los Angeles School Board and I can tell my colleagues this: that both elementary and secondary school districts would jump for joy at the opportunity to buy $1,500 worth of equipment or have a supplement to the income of individual teachers who might have special expertise in science. They would be able to buy microscopes and a whole host of other special pieces of equipment that would be very useful for teaching science.

So do not underrate the value of $1,500. It is not enough, but it would certainly be a good beginning.

Mr. WALGREN. If the gentlewoman would yield, I do not underestimate the value of $1,500 per school. The problem is that if we have $1,500 for a district, and all of Los Angeles is in a unified district, we would have $1,500 for all of Los Angeles, which really would not go very far.

Ms. FIEDLER. It might not be enough, but it certainly would permit them to buy a few more microscopes. It might permit them to buy some special services. It is certainly a place to begin and it is better than not having the money at all.

Mr. FUQUA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, we see the people who oppose the addition to $50 million now wanting to take half of it away from our colleges and universities, and this Committee voted, the House, overwhelmingly a few minutes ago to support the addition of the $50 million.

The gentleman from Minnesota explained a while ago that we are not taking anything away. Well, it is pretty difficult for me to understand if you direct 50 percent of it to go in another direction that you are not taking it away from our colleges and universities or our postsecondary schools.

The problem that the gentleman from New Hampshire was addressed, and it is a very valid one, was addressed in the bill H.R. 1310 that passed this House in March. The gentleman worked very hard and successfully in getting money for secondary and elementary education. That was addressed in that bill. It provides some $15 million specifically to go into those areas of science and math, institutional and health.

Now, what are we involved in here? Mr. Chairman, we are supporting basic research primarily in our colleges and unviersities. In high schools and elementary schools, they do not conduct research. These are learning institutions. But in our colleges and universities where our basic research is carried on is where they need the expensive equipment.

Mr. Chairman, $1,500 will not even buy a microscope. It will not even buy the stand that it sits on. Most microscopes that you need in college research cost over $50,000. So what we are trying to do in this bill and in the instrumentation, and what the gentleman's amendment is trying to do, is to further gut the money that we have for the instrumentation in our colleges and universities. I think the House spoke its will a few moments ago, and as I say, in the bill H.R. 1310 that has already passed this House, the Senate is getting favorable action in the other body. That addresses the problem and that is where it should be addressed, not that it is not a problem, it is one. I will be the first to admit and be the first to support efforts, as I did on the gentleman's amendment in our committee.

Mr. GREGG. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from New Hampshire.

Mr. GREGG. I thank the gentleman for yielding.

Mr. Chairman, specifically on the point of H.R. 1310, I recognize that instrumentation was addressed at the post-secondary level in H.R. 1310, but quoting from the language of H.R. 1310, the section which we were able to get in through the chairman's generosity:

> Those funds are prioritized for pre-college science and math education training, including programs to promote cooperation, exchange of resources and personnel with industry and other elements of the private sector.

It is possible that instrumentation could be drawn into that, but that is not the main thrust of that language.

Also, let us not forget that if $25 million is not enough, according to the chairman of our subcommittee, who I respect, then clearly the $50 million that will be chopped up into other activities——

Mr. FUQUA. Mr. Chairman, if I can reclaim my time, in title I of H.R. 1310, we provided $250 million for elementary and secondary education improvement, and in title II of that bill there is $15 million that the gentleman referred to just a moment ago.

So we are addressing those issues in that bill, and I again want to give the gentleman credit, because it was his idea and his effort that brought that to the attention of our committee and we responded for the gentleman. For that I commend him.

But in this bill, the National Science Foundation, it is really directed at basic research and not at elementary and secondary education other than in trying to improve the skills of the teachers and the methodology which they may teach, which is a very small item. But they do not conduct research. That is conducted in our colleges and universities.

Mr. GREGG. If the chairman will yield further, I would submit to the chairman that basic research is one of the objectives of the NSF, but if the NSF does not have people who are capable of producing basic research,

clearly they are not going to get basic research.

I would just note that my district was lucky enough to have the two winners of the national inventors' award this year. Their ages—9 and 14. That was a national contest between people, not high schools, but between any inventor at any level. So I would say to the chairman that inventive minds and imagination is not confined to postsecondary activities.

Mr. FUQUA. I could not agree with the gentleman any more, but I am saying that we have addressed that issue rather well in H.R. 1310, and this bill, relating to the National Science Foundation, is a different subject matter and aimed at providing the teachers who can go back to the high schools and teach, and also those who go into research not only for the Government but also for industry and in our colleges and universities, and that is where we are aiming the $50 million.

The CHAIRMAN. The time of the gentleman from Florida (Mr. FUQUA) has expired.

(On request of Mr. GREGG and by unanimous consent, Mr. FUQUA was allowed to proceed for 3 additional minutes.)

Mr. GREGG. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I will be happy to yield to the gentleman from New Hampshire.

Mr. GREGG. I thank the gentleman for yielding.

Mr. Chairman, H.R. 1310 is not a bill structured around instrumentation. This is language structured around instrumentation. When we get into junior high schools and high schools and elementary schools where we only have 4 percent of all the elementary schools conducting their laboratories in a laboratory room, or 33 percent of an elementary school having any laboratory facilities at all, you have to assume that whatever further we can do we had better do because this is where our seed corn is created. This is where we are planting our seed corn. We have added $50 million on top of a $400 million instrumentation budget for the rest of the Government. It seems to me that of that additional $50 million, we can certainly take $25 million and put it into the seed corn which is going to produce the research that is going to be used to move this country and to keep this country up with the Japans and the West Germanys of this world.

Mr. FUQUA. Mr. Chairman, I say to the gentleman that I agree that we need to improve that in our high schools and our elementary schools. Nothing is more important than having laboratory equipment. But we are addressing that in another bill. This bill is aimed at higher education in our colleges and universities, and I plead with my colleagues to reject the amendment offered by the gentleman and let us hope that we have a conference with the other body and come out with a very favorable bill that will give some meaningful assistance to our elementary and secondary schools.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Hampshire (Mr. GREGG).

The question was taken; and on a division (demanded by Mr. GREGG) there were—ayes 15, noes 28.

Mr. GREGG. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Forty-three Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1500

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from New Hampshire (Mr. GREGG) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 150, noes 251, not voting 31, as follows:

[Roll No. 110]

□ 1520

Mrs. COLLINS changed her vote from "aye" to "no."

Mr. YOUNG of Alaska, Ms. OAKAR, and Mr. NIELSON of Utah changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. GREGG

Mr. GREGG. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Gregg: On page 3, section 2(e), line 10, insert after "instruments)." the following: "Any grant made in excess of $175,000 shall have the excess matched by outside funds on a one to one (including matching, in-kind services) basis.".

Mr. GREGG (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Hampshire?

There was no objection.

Mr. GREGG. Mr. Chairman, this amendment follows up on the discussion which we had earlier. I believe the majority is in agreement with it. It deals with the need to try to involve in this whole instrumentation process the private sector through matching grants. It essentially requires that any grant made under the prior authorization, the $50 million authorization, should it be in excess of $175,000, would require a match either in kind or services or by dollars, obviously, in order to be adopted.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I yield to the chairman of the committee.

Mr. FUQUA. Mr. Chairman, I appreciate the gentleman yielding.

Mr. Chairman, it is my understanding that the amendment is for only those funds in excess of $175,000, that the excess over $175,000 will be matched on a 1-on-1 basis and it only applies to those funds within the $50 million added by the committee to the existing funds in the bill. Is that the gentleman's understanding?

Mr. GREGG. That is correct.

Mr. FUQUA. With that assurance, we accept the amendment and I thank the gentleman for his cooperative attitude in trying to resolve this issue.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Hampshire (Mr. GREGG).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to the bill? If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. TRAXLER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2066) to authorize appropriations to the National Science Foundation for fiscal years 1984 and 1985, pursuant to House Resolution 183, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 297, nays 111, not voting 24, as follows:

[Roll No. 111]

NOT VOTING—24

Alexander	Hefner	McDade
Cooper	Heftel	Michel
Daschle	Huckaby	Owens
Dixon	Leath	Pashayan
Erdreich	Lehman (FL)	Pepper
Ford (TN)	MacKay	Smith, Robert
Hance	Marlenee	Spratt
Hansen (ID)	Martinez	Wirth

□ 1540

The Clerk announced the following pairs:

On this vote:

Mr. Pepper for, with Mr. Michel against.

Mr. Spratt for, with Mr. Robert F. Smith against.

Mr. Hance for, with Mr. Hansen of Idaho against.

Mr. McCOLLUM and Mr. FRANKLIN changed their votes from "yea" to "nay."

Mr. TORRES changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

TITLE AMENDMENT OFFERED BY MR. FUQUA

Mr. FUQUA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. FUQUA: Amend the title so as to read: "To authorize appropriations to the National Science Foundation for fiscal year 1984."

The title amendment was agreed to.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO HAVE UNTIL MIDNIGHT, FRIDAY, MAY 13, 1983, TO FILE REPORT ON H.R. 2797

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services have until midnight, Friday, May 13, 1983, to file a report on H.R. 2797, the DOE defense programs authorization bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

PERMISSION FOR COMMITTEE ON FOREIGN AFFAIRS TO HAVE UNTIL 5 P.M. SATURDAY, MAY 14, 1983, TO FILE REPORT ON H.R. 2915

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs may have until 5 p.m. Saturday, May 14, 1983, to file a report on the bill, H.R. 2915, State Department authorization.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. WALKER. Mr. Speaker, reserving the right to object, I do so for the purpose of asking the gentleman whether this has been cleared with the minority.

Mr. FASCELL. If the gentleman will yield, yes; it has been.

Mr. WALKER. And they have no objection?

Mr. FASCELL. No objection.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

PERMISSION FOR PERMANENT SELECT COMMITTEE ON INTELLIGENCE TO HAVE UNTIL MIDNIGHT, MAY 13, 1983, TO FILE REPORT ON H.R. 2760

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that the Permanent Select Committee on Intelligence may have until midnight tomorrow, May 13, 1983, to file a report on the bill, H.R. 2760, to amend the Intelligence Authorization Act for fiscal year 1983.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

REQUEST FOR PERMISSION FOR COMMITTEE ON AGRICULTURE TO FILE REPORT ON H.R. 2733

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may have until midnight tonight to file a report on the bill, H.R. 2733, the Critical Agriculture Materials Act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Reserving the right to object, Mr. Speaker, I will just ask the gentleman whether or not this has been cleared by the minority.

Mr. DE LA GARZA. If the gentleman will yield, I cannot personally vouch that it has. I assume, since it came from the counsel on the committee. The ranking minority member, the gentleman from Illinois (Mr. MADIGAN), is here.

Mr. WALKER. Further reserving the right to object, Mr. Speaker, I would appreciate it if the gentleman would withhold his request until we know whether or not the minority has cleared it. At this point we do not have any information on this side that there has been a clearance given. I do not want to stand in the way of the request, but without that kind of clearance, I would appreciate it if the gentleman would withhold his request.

Mr. DE LA GARZA. This is just to file a report, but I will be happy to accommodate the gentleman because I cannot personally vouch for that.

Mr. WALKER. I would appreciate it if the gentleman would withdraw his request.

The SPEAKER pro tempore. Does the gentleman withdraw his request at this time?

Mr. DE LA GARZA. Yes, Mr. Speaker.

DEPARTMENT OF ENERGY CIVILIAN RESEARCH AND DEVELOPMENT AUTHORIZATION ACT FOR FISCAL YEAR 1984

The SPEAKER pro tempore. Pursuant to House Resolution 185 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for consideration of the bill, H.R. 2587.

□ 1550

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 2587, with Mr. BONIOR of Michigan in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Florida (Mr. FUQUA) will be recognized for 1 hour, and the gentleman from Kansas (Mr. WINN) will be recognized for 1 hour.

The Chair recognizes the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, I rise in support of H.R. 2587, which would authorize fiscal year 1984 funds for the Department of Energy civilian research and development programs.

I want to congratulate the gentleman from New York (Mr. SCHEUER), chairman of the Subcommittee on Natural Resources, Agriculture Research and Environment; the gentlewoman from Tennessee (Mrs. LLOYD), chairman of the Subcommittee on Energy Research and Production; and the gentleman from Kansas (Mr. GLICKMAN), chairman of the Subcommittee on Transportation, Aviation and Materials, for their leadership in bringing this legislation to the floor. They have done an outstanding job in perfecting this legislation. I would also like to acknowledge the considerable efforts of my colleagues on the other side of the aisle, the gentleman from Kansas (Mr. WINN), ranking minority member; the gentleman from Pennsylvania (Mr. WALKER), the gentleman from New York (Mr. CARNEY), the gentleman from Wisconsin (Mr. SENSENBRENNER), and the gentleman from New York (Mr. MCGRATH).

Mr. Chairman, H.R. 2587, the Department of Energy Civilian Research and Development Authorization Act for Fiscal Year 1984, encompasses civilian energy R&D programs under the sole jurisdiction of the Committee on Science and Technology. We feel that we are recommending a strong, responsible and balanced energy research and development program which provides the basis for our Nation's critical energy production and conservation efforts.

The bill contains an authorization for Department of Energy research and development programs of nearly $3.29 billion, which is an increase of $557.8 million above the administration's authorization request for fiscal year 1984. This is also an increase of $318.8 million above the fiscal year 1983 appropriated levels due mainly to the committee's endorsement of the administration's requested increases in magnetic fusion, uranium enrichment research and development, supporting research, and also general science programs. These recommendations are fully consistent with the views and estimates which we sent to the House Budget Committee, and they are also within the budget guidelines for energy programs provided in the House-passed first concurrent resolution on the budget.

Mr. Chairman, I feel the Nation is currently in a precarious transitional period in our ultimate drive toward energy independence. Recent worldwide declines in crude oil prices, brought about by the temporary oil glut and disarray in OPEC, may have led some to believe the energy crisis is over.

But these attitudes are premature and inconsistent with both immediate and long-term national priorities. While significantly reduced from the dangerous levels of the past decade, our reliance on oil imports is still high. In addition, there remains a disproportionate use of petroleum in our energy consumption patterns. We know we have enormous quantities of coal deposits, and there is also very convincing evidence that our domestic reserves of natural gas are much greater than was believed a few years ago. We must continue to expand our utilization of these resources. Furthermore, renewable energy sources, such as solar, geothermal, and biomass, along with nuclear energy and energy conservation, clearly are important components in any strategy for national energy security. I believe that with this bill we will maintain a balanced energy R&D program; one that will support our ultimate goal of energy independence, and one that is fiscally responsible in these times of severe budget constraints and high deficits.

Mr. Chairman, I want to describe briefly the various component programs and funding levels contained in H.R. 2587. First, I should point out that in several program areas the committee agreed with the administration's budget request and these are fully supported in the bill. In other programs, however, the committee felt the administration's requests were not adequate to maintain viable R&D efforts.

This legislation before the House today, H.R. 2587, when enacted, will supersede the authorization levels for R&D programs contained in title X of the Omnibus Budget Reconciliation Act of 1981, Public Law 97-35.

As pointed out by the Congressional Budget Office cost estimate, the authorization level is $366 million below the present authorization level for fiscal year 1984.

The level authorized by this legislation for fossil R&D for fiscal year 1984 is $310.43 million. Funds were added for a number of important fossil R&D activities in coal combustion, including environmental control technology, synthetic fuels from coal and oil shale, advanced research and technology development, fuel cells, magnetohydrodynamics, and program direction to cover the indirect costs of program management properly. While this authorization does represent an increase of $172,430,000 over the President's request, it is a reduction of $920,000 from the fiscal year 1983 appropriated level.

For conservation programs, the committee added $75 million to the DOE request of $68 million to bring total funding to $143 million. This authorization essentially retains on-going activities at their fiscal year 1983 levels. It does not provide for any expansion, nor does it account for inflation. No new starts are included, with the exception of the high temperatures materials laboratory initiative proposed by the administration.

In the area of renewable energy R&D, this legislation will maintain the overall solar program at last year's appropriated level. It maintains development activities for several technologies which are not yet ready for commercialization by industry. These include parabolic dish solar thermal systems, crystalline silicon photovoltaic modules and biomass thermochemical conversion systems. It would bring to near completion two major large scale solar development projects: The Mod 5 wind machine and the solar thermal central receiver. It will continue and enhance basic and applied research on solar buildings and biomass production and conversion, and it would initiate a new program in open-cycle ocean thermal energy conversion. These activities would require a total solar budget of $198.85 million, which is $115.291 million above the President's request and $9.915 million above the fiscal year 1983 level.

With this bill we have authorized an increase of $16.4 million for the geothermal energy programs, for a total of $29.953 million. This funding level includes $8 million for the geopressured resource activity, an additional $2.5 million for the hot-dry rock activity, and an additional $5.9 million for a promising new drilling project within the hydrothermal research activity.

In the field of nuclear fission R&D this legislation authorizes total funding level of $542.482 million. Funds were added for the high temperature gas-cooled reactor (HTGR) program which the administration did not request and for reorienting the light water reactor (LWR) safety program.

H.R. 2587 authorizes a total of $500 million for the magnetic fusion program, which is an increase of $33 million over the President's request. Within this amount, additional funds were provided for enhanced applied plasma physics work at the Los Alamos National Laboratory, and for acceleration of the ion cyclotron resonance heating activity.

Mr. Chairman, in conclusion, H.R. 2587 will provide the necessary balance, continuity and stability that is required for this Nation's energy R&D program. Additionally it authorizes funding that preserves prior Federal investments in facilities, technical expertise, and vital data, and it will help insure DOE supported basic research remains preeminent and at the scientific frontier. I urge all my colleagues to join me in supporting its passage.

Mr. WINN. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I rise in support of a fiscal 1984 DOE authorization and the

process through which the Committee on Science and Technology has progressed to our proposed legislation, H.R. 2587.

Mr. Chairman, many people have been somewhat amazed that our committee would consider authorization legislation this year. We are all aware that existing public law provides authorization for energy research and development into fiscal year 1984. However, present conditions verify my strong concerns expressed in 1982 when the Congress passed a multiyear authorization bill. That bill used the numbers that forecasted conditions which do not exist and that greatly exaggerated authority for appropriating funds.

The investigations and evaluations necessary to create proper energy research and development authorization legislation should occur continually. This Nation has spent vast sums for such activities and, in some cases, we have gotten very little in return. Our recent history is long on legislative initiative and short on oversight. Therefore, the process through which we have gone this year is not only helpful, but also necessary in the fulfillment of our responsibilities. On the one hand, we can see that attention to the rate of spending has created a climate to encourage economic recovery. On the other hand, such legislation as H.R. 2587, which exceeds the administration's request by a half billion dollars, must be tempered to minimize budget impact.

Mr. Chairman, once again I welcome the opportunity to commend our chairman, Mr. FUQUA, for a comprehensive approach to a very complex problem, the Nation's energy program. His chairmanship of our committee has been exemplary and it has been a pleasure to work with him. We do have some differences in extent of funding and I may propose a substitute to his recommendations at the appropriate time. However, I think we both realize that our separate efforts have been sincere, intensive, and extensive.

Mr. Chairman, I yield 2 minutes to the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in support of this legislation. I do think the figures in the bill before us today are too high. They are about $452 million above the request from the administration, and the substitute that might be offered today is still higher than what the administration has proposed. However, it is less than what is in the bill today.

The bill today calls for a 20-percent increase, over and above the request of the Department of Energy, and I think we should be very careful about increasing any budget that amount. The substitute which the gentleman from Kansas (Mr. WINN) might offer today still maintains a 10-percent increase in the authorization.

So while I support the entire legislation, I still believe that it is too high and I would hope that we could reduce those figures somewhat today.

Mr. FUQUA. Mr. Chairman, I yield 4 minutes to the gentlewoman from Tennessee (Mrs. LLOYD), chairman of the Subcommittee on Energy Research and Production.

Mrs. LLOYD. I thank the gentleman for yielding this time to me.

Mr. Chairman, I want to congratulate our chairman on bringing this bill to the floor today.

Mr. Chairman, this bill as I pointed out in a "Dear Colleague" letter this week, is a true high technology bill. The committee was forced to make significant add-ons for R&D in fossil, solar, and conservation programs, in order to fill the applied research and technology development breach between the basic research and demonstration extremes of the R&D spectrum. The committee crafted these add-ons carefully and Chairman FUQUA, Mr. SCHEUER, Mr. GLICKMAN, and I felt that we preserved the best programs recognizing that in the present budget climate we could only fund the higher priority items which the administration had deleted. On the Energy Research and Production Subcommittee which I chair, we adapted this approach to restoration of funding for the high temperature gas-cooled reactor (HTGR), redirection for a genuine light water reactor (LWR) safety R&D program, acceleration of advanced centrifuge development for uranium enrichment, and key nuclear fuel cycle activities. The total of add-ons in nuclear fission comes to just 12 percent of the DOE request and the critically needed enhancements which we recommended in the magnetic fusion energy program total just 7 percent, which amounts to barely discernible real growth for this high risk enterprise. In the electric energy systems and energy storage programs the request totaled only $26.9 million, which was roughly 30 percent under the fiscal year 1983 appropriations level. These programs offer considerable "bang for the buck," and we felt it was necessary to provide for fiscal year 1983 levels with some accommodation for inflation.

In nuclear fission, the committee once again strongly went on record as supporting the HTGR program and related thorium fuel cycle activity. The $40 million for the HTGR development comes to almost 70 percent of the committee's recommended boost in nuclear fission R&D. The committee has outlined specifically what it expects to see achieved in the HTGR program in fiscal year 1984 in the accompanying report. The committee has redirected funds for a more aggressive LWR safety program because the Department proposed no substantive research. The committee proposed a redirection of another $6 million with an additional $3.5 million for the light water reactor fuel burnup program so that maximum benefits can be received from the program investment which is nearly 70 percent complete. Under this recommendation, the program would continue with all five reactor fuel vendors participating. The committee sustained nuclear waste management R&D at the DOE request and added $2 million for a demonstration of advanced techniques for thorium removal. The committee recommended an enhancement in fuel reprocessing R&D of $13.5 million to sustain reprocessing technology for breeders and HTGR's, while encouraging exploration of advanced techniques for LWR's. Although the committee made no change in the request for space reactor technology development, the committee took a very specific position on the interagency SP-100 program which is to be carried out under the memorandum of agreement among DOE, DARPA, and NASA. The committee recognizes that this program had a strong technology base in the work of the late fifties through the early seventies, and civilian mission requirements should be delineated in the framework of this broad capability which exists in both the Government labs of DOE and NASA as well as industry.

Although the committee adopted language pertaining to the Clinch River breeder reactor project, the committee did not specifically terminate or deauthorize the project, but took a position to encourage the funding of the project under an alternative financing plan in subsequent legislation.

In magnetic fusion the committee has been concerned about sustaining industry involvement in the program as well as encouraging a stronger relationship between the national laboratories and university research teams. The administration's funding of this program over the past several years has represented a decrease in real dollars and the committee recommendation was to add just 7 percent onto the request. This $33 million would support mainline projects with related university work, accelerate technology development for plasma heating, and encourage planning and design for the next Tokamak device, TFCD, both at the Oak Ridge Fusion Engineering Design Center and the Princeton Plasma Physics Laboratory. Tokamaks are doughnut-shaped devices, for example, TFTR at Princeton, which represent the most promising fusion reactor concept at present. The committee also added $5 million for the fusion

material irradiation test (FMIT) at Hanford, to encourage cooperative efforts with the Japanese on cost-sharing proposals for a comprehensive fusion materials program and provided $3.5 million for research on compact, high-density systems. We also recommended $5.5 million for MFTF-B the mainline mirror machine at Lawrence Livermore Laboratory with supporting research at MIT.

In electric energy systems and energy storage systems the committee added a total of $20 million to restore these programs to roughly fiscal year 1983 appropriations levels. The committee is concerned about the small DOE staff in electric energy systems. Because the administration continues to present going-out-of-business budgets, the committee has been forced to outline funding very specifically for each element of these programs.

In the nuclear fission R&D which supports the uranium enrichment program, the committee supports funding for both advanced gas centrifuge and atomic vapor laser isotope separation (AVLIS). The committee believes that these technologies should be brought along rapidly to assure that U.S. prices will be competitive. To this end, our subcommittee added $11 million to accelerate development of set V centrifuge machines to increase the power efficiency for the GCEP at Portsmouth, Ohio.

Mr. Chairman, this is a genuine high technology bill where the administration's admirable request for significant real growth in basic research programs is complemented by judicious committee add-ons in applied research and technology development. This bill, I believe, represents as close as one can come to a broad congressional concensus on implementation of energy R&D policy. The funding allows for a strong national research effort by the government, industry, and universities all the way from the laboratory bench to the threshold of product commercialization. This bill says that the Federal Government still has a role in technology development and yet relies on the private sector to fulfill its proper lower risk and marketing function.

I urge all my colleagues to support H.R. 2587 as a vital element in the congressional high-tech strategy.

□ 1600

Mr. WINN. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. SENSENBRENNER. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the action taken by my colleagues on the Science and Technology Committee concerning the Clinch River breeder reactor. Before addressing the merits of the committee amendment, which we will be shortly considering, and its effect upon the continuation of the project, I would like to acknowledge the work of the authors of the amendment, the gentleman from California and the gentlelady from Rhode Island. Through their efforts, we are presented with the opportunity to implement the intention of this body last December and end the taxpayers' subsidy of one of the costliest projects in our country's history.

In December 1982, although this body, in considering the continuing resolution for fiscal year 1983, voted to eliminate all funding for Clinch River for fiscal year 1983, the other body, by a 1-vote margin, decided to continue its funding. The conference committee approved limited funding for the project and required the Department of Energy to:

Vigorously explore proposals including a reconsideration of the orginial cost-sharing arrangement, that would reduce Federal budget requirements for the Clinch River project or project alternative and secure greater participation from the private sector.

The committee amendment does not displace but rather strengthens the conference committee's request.

While it is self-evident that the amendment ends all Federal funding of Clinch River in fiscal year 1984, based on the present cost-sharing arrangement, the amendment does not foreclose or prejudice the adoption of alternative financing for Clinch River. Instead, it encourages the securing of alternative financing by terminating continued Federal financing, as provided under the Omnibus Reconciliation Act of 1981, until alternative financing is approved by this body. If we were to reject this amendment, the incentive to obtain alternative financing would be removed.

As a member of the authorizing committeee for this project, I look forward to the submission of alternative financing legislation. I am confident that this legislation will be carefully considered by the committee without prejudice. Therefore, until this process is completed, further appropriations of taxpayers' dollars are inappropriate and wasteful.

Mr. WALKER. Mr. Chairman, as the ranking minority member on the Subcommittee on Energy Research and Production, I would like to make several comments concerning the portion of the bill over which our subcommittee has jurisdiction.

Our subcommittee held comprehensive hearings covering the administration budget request and carefully examined all of the programs which were included in the request, and also looked at several which were not proposed for funding in the coming year.

As a result of those hearings we felt that there were a number of adjustments which should be made to the Department's request to reflect appropriate national energy priorities.

There were some programs which the Department felt were ready to move forward into full commercialization which we feel should have the benefit of additional research and development activity. One major example of this is the high temperature gas-cooled reactor, known as the HTGR program. This technology may well become the next generation of commercial reactors based on the inherent safety in the design. As an example of the tremendous safety margins in the HTGR over present generation light water reactors let me point out that at Three Mile Island the operators had less than 2 minutes—less than 120 seconds—in which to recognize the emergency, to identify the problem, select the correct emergency procedures, and to act. Had that reactor at TMI been an HTGR design the operators would have had 120 hours to which to act.

Our decision to continue the HTGR project at level funding is merely one example of the care which our subcommittee took in our budget review this year. We held 11 days of subcommittee hearings, 1 day of subcommittee markup, and 3 days of full committee consideration before we brought this bill to the floor.

Overall, our subcommittee brought forward a budget recommendation which totaled $3.671 billion as compared to a budget request of $3.589 billion. That is an increase of $77.8 million, or 2.1 percent.

I was hopeful that we would have been able to have kept within the budget request in our area of the bill, and could have maintained overall level funding. I supported a minority substitute in the full committee which would have accomplished just that aim, and I intend to support a similar substitute today when it is offered.

Finally, Mr. Chairman, I would like to commend the gentlelady from Tennessee who chairs the subcommittee, and the gentleman from Florida who chairs the full committee for their many courtesies during the hearing and markup schedule. I would also like to commend the gentleman from Kansas, the ranking minority member on the full committee, for his help, assistance, and support through the legislative process. And finally, I would like to thank the staff for their invaluable help.

Mr. FUQUA. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Virginia (Mr. BOUCHER), a member of the committee.

Mr. BOUCHER. Mr. Chairman, I rise in support of H.R. 2587, authorizing appropriations for the Department

of Energy for fiscal year 1984. I would like to commend our chairman, the gentleman from Florida, for his leadership in bringing this legislation to the floor. I believe this bill exemplifies our commitment to maintain a viable and balanced energy research and development program as we strive toward energy independence, while simultaneously adhering to the call for fiscal stringency.

I am particularly pleased and congratulate my colleagues for their cooperation on the DOE fossil energy programs for fiscal year 1984. Fossil fuels, including coal, natural gas, and oil, are expected to supply the majority of the Nation's energy needs well into the next century, and yet the administration's request in fossil energy R&D represented a 56-percent reduction from the fiscal year 1983 appropriated level. Our Nation will look increasingly to coal as a primary source of energy as other conventional supplies of domestic oil and gas are depleted, and yet coal research suffered the biggest reduction in the administration's request. H.R. 2587 provides authorization to maintain an adequate fossil energy research and development program.

Mr. Chairman, I represent a district which has enormous quantities of coal reserves which are underutilized. The ultimate and expanded use of this vast and vital energy resource is strongly dependent on technologies dealing with coal quality, environmental emission, and waste disposal. This bill provides authorization to fund R&D programs essential to upgrade the quality of U.S. coal and to develop critical cleanup and control technologies to the point where industry can take over. The programs suggested by this bill will help us to improve our economy as well as to meet our energy independence goals.

Again, Mr. Chairman, I would like to assure the Members that H.R. 2587 provides support for research and development in areas that are vital to our energy program as well as the Nation's economy without ignoring our very real concerns for fiscal restraint.

I reiterate my full support of H.R. 2587 and urge my colleagues to approve it.

Mr. WINN. Mr. Chairman, I have no further requests for time.

Mr. FUQUA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Chairman, I thank the distinguished chairman of the committee for yielding this time to me.

Mr. Chairman, in its committee report, the Science Committee has recommended that the Department of Energy review its schedule for development of the new gas centrifuge technology for uranium enrichment services. The committee also recommends that funding for development of the most advanced of the centrifuge machines be increased by $11 million.

The legislation now before the House addresses only a small part of the Federal uranium enrichment services program. The great majority of the program will not be affected by the Science Committee bill, because it is not research and development activity. It is my understanding that the $11 million increase being recommended by the Science Committee for accelerated work on advanced research is not intended to be found in the budget through reprograming or other shifting of funds from non-R&D activities. If that is so, the increase should not interfere with the Department's current schedule for procurement of Set III centrifuge machines. Could the Chairman of the Science Committee confirm whether my understanding is correct?

□ 1610

Mr. FUQUA. Mr. Chairman, if the gentleman will yield, the understanding of the gentleman from Ohio is the understanding that I also share.

Mr. SEIBERLING. Mr. Chairman, I believe the information being requested by the Science Committee in its report on H.R. 2587 regarding the schedule for development of centrifuge capacity is relevant to the continuing concern of the Department and the Congress that the uranium enrichment services remain at the forefront of technical and economic effectiveness in the world enrichment market. Most information developed to date indicates that the Department's current plan to develop and implement set III enrichment machines while accelerating set IV and set V machine development is the wisest course to follow. We must continue assessing our progress as new technology developments occur, however. I support such a study and I look forward to its conclusions.

● Mr. STARK. Mr. Chairman, today we are considering a very important piece of legislation. The decisions we make today will determine our energy options for the future. Will we continue to depend upon foreign oil imports for our energy needs in the next century? Will oil even be available if we needed it? Can we attain energy independence as a nation? And will we even have the alternative resource options available for that independence? All these are questions we are directly addressing by our vote on this bill.

I want to commend Chairman FUQUA, Chairwoman LLOYD, and the other members of the House Science and Technology Committee for their long, hard work on this bill. More than any of us, they understand the important decisions we face today. Their dedication to the future energy needs of our Nation is farsighted and enlightened.

I was pleased that the committee endorsed higher funding for our Nation's magnetic fusion program. Adding a total of $33 million, the committee has reaffirmed the goals of the U.S. magnetic fusion effort; 1983 was a year of milestones in magnetic fusion research. With the support of the committee and this body, 1984 can be just as important.

We have completed construction on the Tokamak facility in Princeton, N.J., and that machine reached plasma late last year. The mirror fusion facility in Livermore, Calif., is beginning its major construction phase, and the scientists successfully tested the giant ying-yang magnets to be used in that facility. We have gone much further in our pursuit of magnetic fusion in the last year, than in perhaps any year previously. We must continue to press toward higher goals. The only way to do this is to support the committee bill. Earlier this year, I testified before Chairman LLOYD's subcommittee on the issue of magnetic fusion. I include my testimony below.

We need this program. We need extensive energy research in all areas. We must vote for H.R. 2387. The testimony follows:

TESTIMONY OF HON. FORTNEY H. STARK, JR. BEFORE THE HOUSE SCIENCE AND TECHNOLOGY SUBCOMMITTEE ON ENERGY RESEARCH AND PRODUCTION, MARCH 17, 1983

Madam Chairman, it is indeed a pleasure to once again appear before your Committee and address the important issue of magnetic fusion energy research. I want to commend you and the other Members of this Committee on the fine work that you have done in this area. Your additions to last year's budget helped preserve our nation's magnetic fusion effort.

With a few exceptions, 1982 can be termed an overwhelming success in realizing our goals in magnetic fusion. The Tokamak Fusion Test Reactor at Princeton completed construction, and most importantly, was successful in reaching plasma just before Christmas. In addition, the Magnetic Fusion Test Facility in Livermore has proceeded into its construction phase, and last February had a successful test of their large "ying-yang" magnet, one of two that will become a part of METF-B.

Unfortunately, however, all has not been bright on the fusion front. Funding, even with this Committee's increases last year, has not been what we envisioned in 1980 with the passage of the Magnetic Fusion Engineering Act, and all of the fusion programs are suffering as a result. Because of these program cutback, and project delays, our ability to evaluate comparable alternatives in fusion research has been greatly reduced, and consequently, the next phase reactor has been postponed indefinitely. Most importantly, however, we have still not received a program plan from the Department of Energy. And this, I believe, hinders us the most.

The budget proposal submitted by the President this year is an increase from the continuing resolution, but even with this increase, some dramatic cutbacks have to be

made. The greatest loss under the President's proposal is the total elimination of funding for the Elmo Bumpy Torus-P project. Although this project is well behind our two lead concepts, tokamaks and mirrors, it has shown a great deal of promise. In addition, it was one of the few projects being developed with full participation and partial funding from private industry. The loss of this project means more than the loss of a promising magnetic fusion alternative concept; it cuts short an attempt to actively and effectively involve private industry in the development of magnetic fusion energy. If our ultimate goal is to be commercialization of fusion, and I believe it should be, we should be encouraging, not discouraging, private industry involvement.

As the Congressman who represents the Lawrence Livermore National Laboratory, and its employees, I am happy to say that the Laboratory is moving ahead in bringing private industry into the development of the MFTF-B project at Livermore. They are scheduled to enter into a contract for the design and development of specific parts for MFTF-B very soon. This is a giant step ahead, and we should do all we can to further these goals. We are not encouraging industry participation by showing our willingness to cancel important projects like EBT-P.

By eliminating EBT-P we are basically limiting ourselves to the two lead concepts, that is, tokamaks and mirrors, in the decision about the next level reactor we are going to build. And we must keep in mind that even the mirror concept is approximately three years behind the tokamak concept. To adequately assess our alternative options, we should be pursuing them at a much accelerated pace. Therefore, limiting our options at this point would be unwise and self-defeating. As I am sure you know, Madame Chairman, the General Accounting Office has recently completed a draft report for you and me, and this very issue was addressed. GAO states, ". . ., experts including the National Academy of Science's Research Council, are . . . questioning whether DOE is adequately pursuing alternative concepts so that options are available when the decision is made to construct the next level reactor." And the report further states:

"Both the National Academy of Science and DOE's Magnetic Fusion Advisory Committee have recommended that the mirror concept be pursued vigorously so that it can provide a development option as the (Magnetic Fusion Engineering Act of 1980) intended. Unless this occurs DOE may be prematurely commiting itself to the tokamak concept for commercial development before it has had the opportunity to adequately assess the advantages and other concepts."

So although the MFTF-B funding is adequate this year, past funding levels have placed it well behind tokamaks. By also cutting, and then eliminating EBT-P, we may have put ourselves into a straightjacket with regard to our options. I don't think that that helps anyone. If commercialization is to be our goal, we must examine all the alternatives, and move ahead with the best and most promising.

Finally, I believe we have waited long enough for the program plan from DOE for magnetic fusion. This is the third year that the Administration has submitted budgets in magnetic fusion well below those envisioned by the Magnetic Fusion Engineering Act. Obviously program changes have been made, but Congress has yet to receive an updated program plan. The GAO further states in the recent report:

"Because DOE plans to deviate significantly from the fusion energy development strategy set forth in the act, it is particularly important that a comprehensive program management plan be submitted to the Congress. The plan is needed to explain and justify DOE's evolving fusion development program. The plan should also meet the requirements of the act, and should have the flexibility to respond to changing budgetary conditions."

In closing, I want to again thank you, Madam Chairman, and the Members of your Committee for their continued interest and involvement in the research and development of magnetic fusion. Each time I make an appearance here before your Committee we are one step closer to realizing our goal of commercialization of fusion energy, and with that, our own national energy independence. Let us not lose sight of those goals after coming so far. Now is not the time to cut back, but the time to actively move ahead. I look to this Committee to guide us to our goals in fusion energy.●

● Mr. HARKIN. Mr. Chairman, I rise to support H.R. 2587. Once again, I wish to congratulate our committee chairman, the gentleman from Florida (Mr. FUQUA), on putting together an excellent and thoughtful nonnuclear R&D program in the face of continuing refusal by the administration to take these technologies seriously.

I am especially pleased to see the Stirling engine and the second automotive gas turbine restored to the vehicle energy research program. These are technologies that the American automobile manufacturers are not willing to pursue on their own, but which offer a high potential reward to the Nation in terms of energy efficiency, fuel diversity, and environmental protection. The Stirling engine contractor, in particular, has met or exceeded all program goals, has shown excellent progress in overcoming technical problems such as weight and seal leaks, and has been consistently commended by DOE for excellent performance.

In the buildings area we have the potential to cut our use of primary energy by nearly 40 percent by the year 2000, and to have more than 20 percent of what is left supplied by renewable energy sources. But we can not do it all with today's technology. We need new materials such as selective coatings and phase change storage and new building techniques such as passive cooling and daylighting designs. We also need better tools to predict building energy use and better measurements of actual energy consumption in real, occupied buildings. I am pleased that the committee's budgets for building systems and solar building energy research provide for substantial increases in these program areas.

I am also pleased to see that our renewable energy technology projects, such as the MOD-5 wind machines, the parabolic dish solar electric systems, the near term photovoltaic arrays and the biomass gasification and liquefaction test facilities have all been restored in the budget. These technologies will not only improve our energy self-sufficiency; they will also increase the competitiveness of American industry in world energy markets.

In sum, Mr. Chairman, this is a good budget, one that we can be proud of. It is not perfect—in fact it contains too much nuclear and too little solar and conservation for my taste—but it is a sound program which restores some elements of balance and sanity to our Nation's energy research agenda. I recommend my colleagues' support for this bill.●

Mr. YOUNG of Missouri. Mr. Chairman, this bill represents a strong committee position on research and technology development. It is a renewed commitment to a balanced energy R&D program which our committee has sought as a middle ground position since the beginning of the last Congress.

The committee recommendations in the nonnuclear energy programs are carefully thought out and defensible. I think that our chairman, Mr. FUQUA, who chairs the Energy Development and Applications Subcommittee, has done a solid job of providing funds for programs which support the development of strong technology bases in the fossil, solar, and conservation programs. Strong incentives for the private sector to provide investment to carry out these risky R&D programs simply do not exist. The recommended add-ons in these areas are for priority items.

The highest priority increases from my point of view were made in magnetic fusion by the Energy Research and Production Subcommittee chaired by Mrs. LLOYD. She recommended tailored add-ons which our subcommittee adopted and which were sustained at full committee. These recommendations added $33 million to the $467 million DOE request for magnetic fusion energy. This $33 million is high-leverage funding intended to address a strong thrust which I have pursued and encouraged since I came to Congress. My chief interest here is to catalyze the growing industrial involvement in the program such that the reactor engineering development can go forward even though fusion proof-of-principle has not yet been demonstrated. We cannot allow the fusion program to slip into low gear with solely a scientific emphasis through a policy of flat funding. Such an approach simply holds back our best industrial and laboratory people rather than unleashing them to pursue reactor systems studies and related technology such as new plasma heating concepts. The breeder reactor program and fusion have reached different phases, but they both promise limitless supplies of electricity and must be supported in a way

that retains and augments the outstanding industrial and laboratory infrastructures which have been erected to date.

In nuclear fission R&D, the committee made just several funding increases, notably for the high temperature gas-cooled reactor and advanced centrifuge development. The administration has insisted on zeroing the HTGR while the committee strongly supports it as the only nuclear reactor concept which can produced high-grade heat as well as electricity.

The funding for the breeder technology and fuel cycle programs is aimed at providing a development base for the prototype plant which the private sector will construct beyond the Clinch River breeder reactor project (CRBRP). The CRBRP funding and merits will be considered in separate legislation and I am looking forward to a solid alternative financing plan which is to be proposed in the near future.

Mr. Chairman, I strongly support H.R. 2587 because it is an investment in progress aimed at improving our citizens' quality of life decades from now. I urge its adoption.

● Mr. FISH. Mr. Chairman, during the years I was ranking minority member of the Energy Development and Applications Subcommittee, I was extremely impressed with the advances made in many alternative energy sources and technologies. Following the energy crisis of the seventies and foreign oil supply interruptions, we made a concerted effort to help make the United States less dependent on foreign oil.

Among the most promising of the new technologies is the Stirling engine. The use of alternative fuels to run the Stirling engine is one of the most important developments in the evolution of the automobile. To run a car on something other than petroleum, which we will eventually run out of, is an absolute necessity.

When the Stirling engine was first started, there was doubt it could run on a variety of liquid fuels. Today, Stirling engine test vehicles are operating interchangeably without difficulty on several different liquid fuels.

There is also evidence that manufacturers of automotive and truck engines are showing interest in the Stirling engine. General Motors, Cummins Engine Co., and John Deere Corp. have all requested engines to test.

At this time, when the United States is the leader in developing new technology, we should continue our support of the Stirling engine. It is a very promising alternative for the future.●

● Mr. NELSON of Florida. Mr. Chairman, I support the DOE authorization as reported out of committee.

With the current problems this country is experiencing in the development of alternative fuels—solar, geothermal, and so forth—it is imperative that this legislation be passed with the proposed funding intact.

A cut would simply throw a monkey wrench in the gears that are now slowly beginning to roll, providing the needed alternatives to our dependence on foreign oil.

Programs that should be continued and will be continued in the funding as reported out of the Science and Technology Committee include solar energy studies, R&D, wind energy systems, biomass energy technology, and ocean energy systems, fuel cells technology advancements, and a large recommended increase—approximately $150 million—in fossil energy advancements.

The Department of Energy has played a most important role in the leading of advancements of alternative fuel supplies. Ever since the Arab oil embargo in the early seventies, Americans have seen and felt firsthand the stranglehold that can threaten our economic security.

We cannot allow this to happen again.

With the support of this legislation the United States can again proceed to lead in energy development.●

● Mr. MINETA. Mr. Chairman, I rise in strong support of H.R. 2587, authorizing appropriations for DOE civilian research and development activities for fiscal year 1984. I want to commend the gentleman from Florida, chairman of the Science and Technology Committee, for bringing this bill to the floor. I feel it is a balanced approach toward our national energy research priorities, and will maintain an effective, ongoing program to enhance our energy security at this particularly crucial time when budget constraints and other factors may be undermining these efforts.

Mr. Chairman, I hope most Members would agree that the recent drop in world oil prices is a temporary aberration and should not deter the desire to reduce dependence on foreign petroleum sources. I would also hope that those in the administration would share this view. Yet, in several key areas, including funding to promote utilization of the Nation's abundant coal resources, the administration's budget requests are inadequate. This legislation corrects this and provides for an ongoing fossil energy R&D program consistent with fiscal year 1983 appropriations. There are many viable innovative fossil energy technologies that clearly offer great promise, including, for example, fuel cells, which may yield up to 85 percent capture of the available energy in the fuel sources. Continued fossil energy R&D efforts will insure increased and environmentally acceptable use of coal, and also expand the availability of domestic gas and petroleum resources.

On the other hand, I believe the administration has correctly proposed aggressive programs in the supporting research and technical analysis, and general science and research areas, and this legislation supports its proposals fully. These include frontier scientific work in the fields of nuclear physics, high energy physics, and basic energy sciences. I find the funding for the National Center for Advanced Materials within the basic energy sciences program to be particularly relevant. But, in general, I feel the major contribution of these programs is in widening the scope of our knowledge, which contributes to our technological strength and to the intellectual capital our society possesses.

Mr. Chairman, I enthusiastically support this legislation, and urge my colleagues to vote for it.●

● Mr. RAHALL. Mr. Chairman, I rise in support of H.R. 2587, the authorization of the Department of Energy. I am particularly pleased with the bill's fiscal year 1984 fossil energy research and development authorization of $310.4 million.

I find the administration's coal R&D request—which accounts for the lion's share of the fossil energy budget—for the Department of Energy of $97 million for fiscal year 1984 unacceptable. I just cannot believe we will let the fossil energy budget at DOE decline from 22 percent of the technology budget in fiscal year 1981 to 7 percent as the administration proposes in its fiscal year 1984 request. Today, we are striking a blow for America's energy independence by providing an adequate authorization for coal R&D.

The benefits of the research and development activities funded under this program cannot be understated. For those who are concerned over acid rain, I say to them, support funding for coal R&D. For those who wish to provide consumers with low-cost electricity, I say support coal R&D. For those who wish to protect the health and safety of our coal labor force and to increase mine productivity, I say support coal R&D. For those who want to secure America's energy security, I again say, fund coal R&D.

This legislation will send a strong message to the administration that we will not forsake the promise America's vast coal reserves hold for our present and future energy security. With continued research into new technologies, coal will be burned even cleaner and more economically than it is today. As coal combustion technologies advance, we will insure an even greater demand for this energy source—something I am sure the 32 percent of the coal labor force currently unemployed can appreciate.

I would like to commend the chairman of the Committee on Science and Technology, DON FUQUA, for bringing

this measure to the floor. In addition, I applaud the efforts of MARILYN LLOYD and my colleague from a neighboring district, RICK BOUCHER, for their efforts in emphasizing the importance of the coal R&D budget at DOE.●

Mr. FUQUA. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. WINN. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. All time has expired.

The Clerk will read.

The Clerk read as follows:

H.R. 2587

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Energy Civilian Research and Development Authorization Act for Fiscal Year 1984".

OPERATING EXPENSES

SEC. 2. Funds are hereby authorized to be appropriated for fiscal year 1984 in accordance with section 660 of the Department of Energy Organization Act for operating expenses for the following research and development programs:

(1) Fossil energy, $303,890,000;

(2) Energy conservation, $132,380,000;

(3) Energy supply research and development:

(A) Solar energy, $197,350,000;

(B) Geothermal energy, $29,953,000;

(C) Nuclear fission, $491,822,000;

(D) Magnetic fusion, $425,700,000;

(E) Electric energy systems, $20,702,000;

(F) Energy storage systems, $25,200,000;

(G) Basic energy sciences and supporting research, including energy science advanced computation, energy research analysis, university research support, university research instrumentation, and advisory and oversight program direction, $318,569,000;

(H) Environmental research and development, $253,225,000; and

(I) Policy and management, energy research, $515,000;

(4) Geothermal resources development fund, $2,100,000;

(5) General science and research, $479,750,000; and

(6) Uranium enrichment:

(A) Advanced isotope separation technology, $59,900,000; and

(B) Gas centrifuge process development and demonstration, $117,400,000.

PLANT AND CAPITAL EQUIPMENT

SEC. 3. Funds are hereby authorized to be appropriated for fiscal year 1984 in accordance with section 660 of the Department of Energy Organization Act for the acquisition and fabrication of capital equipment not related to construction for the following research and development programs:

(1) Fossil energy, $1,500,000;

(2) Energy conservation, $750,000;

(3) Energy supply research and development:

(A) Basic energy sciences and supporting research, $24,280,000;

(B) Nuclear fission, $31,160,000;

(C) Magnetic fusion, $37,800,000;

(D) Electric energy systems, $500,000;

(E) Energy storage systems, $500,000; and

(F) Environmental research and development, $13,125,000.

(4) General science and research, $62,800,000; and

(5) Uranium enrichment:

(A) Advanced isotope separation technology, $9,500,000; and

(B) Gas centrifuge process development and demonstration, $3,400,000.

PRIOR YEAR CONSTRUCTION

SEC. 4. Funds are hereby authorized to be appropriated for fiscal year 1984 in accordance with section 660 of the Department of Energy Organization Act for plant and capital equipment (including planning, construction, acquisition, and modification of facilities, including land acquisition) for the following prior year research and development projects:

(1) Fossil energy:

(A) Project numbered 82-F-506, Surface Water Containment and Wastewater Treatment Facility, Pittsburgh Energy Technology Center, Bruceton, Pennsylvania, $1,040,000, for a total authorization of $3,000,000; and

(B) Project numbered 83-F-501, Wastewater Treatment Facility, Morgantown, West Virginia, $2,000,000, for a total authorization of $5,300,000;

(2) General science:

(A) Project numbered 81-E-218, Tevatron I, Fermi National Accelerator Laboratory, Batavia, Illinois, $20,000,000, for a total authorization of $58,000,000; and

(B) Project numbered 82-E-206, Tevatron II, Fermi National Accelerator Laboratory, Batavia, Illinois, $13,000,000, for a total authorization of $37,000,000;

(3) Nuclear fission:

(A) Project numbered 83-N-334, Safeguards and security assessment improvements, Argonne National Laboratory-West, INEL, Idaho, $1,000,000, for a total authorization of $1,400,000;

(B) Project numbered 78-6-E, Energy Technology Engineering Center, facility modifications, Santa Susana, California, $5,000,000, for a total authorization of $32,800,000; and

(C) Project numbered 78-6-C, Safety Research Experiment Facilities, Argonne National Laboratory-West, INEL, Idaho, $1,100,000, for a total authorization of $44,300,000;

(4) Magnetic fusion:

(A) Project numbered 78-3-A, Mirror Fusion Test Facility-B, Lawrence Livermore National Laboratory, California, $30,000,000, for a total authorization of $229,058,000; and

(5) Supporting research:

(A) Project numbered 80-ES-11, Idaho Laboratory Facility, Idaho National Engineering Laboratory, Idaho, $1,062,000, for a total authorization of $18,000,000;

(B) Project numbered 81-E-325, Energy Technology Laboratory, Sandia National Laboratories, Albuquerque, New Mexico, $1,600,000, for a total authorization of $13,600,000;

(C) Project numbered 82-E-301, 300 area critical utilities upgrading, Richland, Washington, $4,400,000, for a total authorization of $11,600,000;

(D) Project numbered 82-E-302, Security Facility, Argonne National Laboratory, Argonne, Illinois, $2,300,000, for a total authorization of $7,000,000;

(E) Project numbered 82-E-305, Traffic safety improvements, Richland, Washington, $800,000, for a total authorization of $6,200,000;

(F) Project numbered 83-E-308, Rehabilitate power systems, various locations, $7,988,000, for a total authorization of $12,988,000;

(G) Project numbered 83-E-309, Electronics Facility, Argonne National Laboratory, Argonne, Illinois, $4,150,000, for a total authorization of $6,350,000;

(H) Project numbered 83-E-310, Utility replacements and upgrade, Brookhaven National Laboratory, Upton, New York, $7,500,000, for a total authorization of $8,800,000; and

(I) Project numbered 83-E-311, Laboratory Emergency Response Center, Oak Ridge National Laboratory, Oak Ridge, Tennessee, $2,200,000, for a total authorization of $4,200,000.

NEW CONSTRUCTION

SEC. 5. Funds are hereby authorized to be appropriated for fiscal year 1984 in accordance with section 660 of the Department of Energy Organization Act for plant and capital equipment (including planning, construction, acquisition, and modification of facilities, including land acquisition) for the following new research and development projects:

(1) Fossil energy:

(A) Project numbered 84-FE-101, General plant projects for energy technology centers, various locations, $2,000,000;

(2) Solar energy:

(A) Project numbered 84-CS-102, Five Megawatt Photovoltaics Plant, Phase II, Sacramento Municipal Utility District, Herald, California, $1,500,000;

(3) Energy conservation:

(A) Project numbered 84-CS-101, High Temperature Materials Laboratory, Oak Ridge National Laboratory, Oak Ridge, Tennessee, $9,000,000;

(4) Environment:

(A) Project numbered 84-ER-134, General plant projects, biological and environmental research, various locations, $1,000,000;

(5) General science:

(A) Project numbered 84-ER-133, Stanford linear collider, Stanford Linear Accelerator Center, Stanford, California, $40,000,000;

(B) Project numbered 84-ER-131, Accelerator improvement projects, high energy physics, various locations, $9,000,000;

(C) Project numbered 84-ER-132, General plant projects, high energy physics, various locations, $7,000,000;

(D) Project numbered 84-ER-121, Accelerator improvement projects, nuclear physics, various locations, $3,500,000;

(E) Project numbered 84-ER-122, General plant projects, nuclear physics, various locations, $2,200,000; and

(F) Project numbered 84-ER-110, University accelerator upgrade project at the University of Washington and Yale University, Seattle, Washington, and New Haven, Connecticut, $8,000,000;

(6) Supporting research:

(A) Project numbered 84-ER-111, Beam lines and support area construction, National Synchrotron Light Source, Brookhaven National Laboratory, Upton, New York, $2,500,000;

(B) Project numbered 84-ER-112, National Center for Advanced Materials, Lawrence Berkeley Laboratory, Berkeley, California, and Stanford Linear Accelerator Center, Stanford, California, $20,900,000;

(C) Project numbered 84-ER-141, Accelerator improvements and modifications, basic energy sciences, various locations, $1,260,000;

(D) Project numbered 84-ER-142, General plant projects, basic energy sciences, various locations, $400,000;

(E) Project numbered 84-ER-101, Rehabilitate old town area utilities, Lawrence Berkeley Laboratory, Berkeley, California, $1,000,000;

(F) Project numbered 84-ER-102, Cooling water facilities restoration, Oak Ridge National Laboratory, Oak Ridge, Tennessee, $600,000;

(G) Project numbered 84-ER-103, Road repair, various locations, $3,000,000; and

(H) Project numbered 84-ER-104, Facilities support project, various locations, $4,000,000;

(7) Nuclear fission:

(A) Project numbered 84-N-102, Modifications to reactors, various locations, $1,000,000;

(B) Project numbered 84-N-101, General plant projects, nuclear energy, various locations, $4,000,000; and

(C) Project numbered 84-N-105, General plant projects, commercial nuclear waste management, Richland, Washington, $1,400,000;

(8) Magnetic fusion:

(A) Project numbered 84-ER-109, General plant projects, magnetic fusion, various locations, $6,500,000;

(9) Uranium enrichment activities:

(A) Project numbered 84-N-406, General plant projects, advanced isotope separation technology, various locations, $1,200,000; and

(B) Project numbered 84-N-407, Development/demonstration module (design only), Oak Ridge, Tennessee, $2,400,000.

GENERAL PROVISIONS RELATING TO AUTHORIZATIONS FOR FISCAL YEAR 1984

SEC. 6. (a) No funds are authorized under this Act for any purpose other than research, development, and demonstration.

(b) With respect to the programs for which funds are authorized under this Act, the provisions of this Act shall supersede the provisions of chapter 1 of subtitle A of title X of the Omnibus Budget Reconciliation Act of 1981 relating to the authorization of Department of Energy civilian research and development programs for fiscal year 1984.

(c) None of the amounts authorized by this Act are provided for the continuation or termination of the Clinch River Breeder reactor project.

Mr. FUQUA (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: on page 2, line 11, strike "$491,822,000" and insert in lieu thereof "$495,822,000, including $2,000,000 for research, development program to decontaminate the W. R. Grace site and vicinity properties in the Wayne/Pequannock, New Jersey area";

Mr. FUQUA (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: on page 74, line 1, strike "$31,160,000" and insert in lieu thereof "$33,160,000";

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendments.

The Clerk read as follows:

Committee amendments: on page 6, line 17, strike "$1,600,000" and insert in lieu thereof "$3,600,000"; on line 19, strike "$13,600,000" and insert in lieu thereof "$15,600,000"; on line 22, strike "$4,400,000" and insert in lieu thereof "$3,200,000"; on line 23, strike "$11,600,000" and insert in lieu thereof "$10,400,000"; strike all of lines 3 through 5 on page 7, and reletter the succeeding paragraphs accordingly;

Mr. FUQUA (during the reading). Mr. Chairman, I ask unanimous consent that the remaining committee amendments, except the last amendment, be considered as read, printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FUQUA. Mr. Chairman, these reflect actions of the committee.

I might point out to my colleagues, this does not involve the Clinch River breeder reactor in this series of amendments, but it reflects committee action as it affects the numbers in the bill.

The CHAIRMAN. The question is on the committee amendments.

The committee amendments were agreed to.

The CHAIRMAN. The Clerk will report the last committee amendment.

The Clerk read as follows:

Committee amendment: On page 11, strike all of lines 4 through 6, and insert in lieu thereof the following:

(c) No funds are authorized to be appropriated pursuant to this Act, or pursuant to the provisions of chapter 1 of subtitle A of title X of the Omnibus Budget Reconciliation Act of 1981 which relate to fiscal year 1984, for the continuation or termination of the Clinch River Breeder Reactor Project, except to such extent as may be specifically provided by legislation enacted after the date of the enactment of this Act.

Mr. FUQUA (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FUQUA. Mr. Chairman, this amendment reflects the action of the committee and I urge adoption of the amendment.

Mrs. LLOYD. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentlewoman.

Mrs. LLOYD. Mr. Chairman, as I understand the chairman in offering this amendment does not intend to prejudice a further vote in the committee or in the House on alternative financing for the Clinch River breeder reactor project; but in the spirit of compromise, it simply provides that further authorization be contingent upon the approval of a satisfactory cost-sharing agreement with the utility industry.

So I would appreciate it if the chairman would reemphasize the spirit of fairness in which he understands the amendment was originally offered in committee and assure me that it was not intended to be prejudicial.

Mr. FUQUA. That is my understanding.

Mrs. LLOYD. I thank the chairman.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I am happy to yield to the gentleman from California and the author of the amendment.

Mr. BROWN of California. Mr. Chairman, this amendment was adopted in the committee by a vote of 24 to 16, as I recall. It was intended to reflect a compromise within the committee with regard to the continuation of the Clinch River reactor, expressing the views that the House has supported in the past that if the project is to continue, it should be subject to a new funding arrangement in which there was a cost-sharing agreement with private industry.

The language of the amendment is intended to reflect the fact that if a suitable cost-sharing agreement is approved by the Congress, the project could go forward; but that in the absence of a cost-sharing agreement approved by the Congress, that the project would not go forward in the next fiscal year.

I recognize that this is not completely satisfactory either to the supporters of Clinch River or to the more adamant opponents of Clinch River in the sense that those who support Clinch River would prefer to go ahead without any change in the cost sharing. Those who oppose Clinch River would like to have it killed regardless of whether there is a new cost-sharing agreement.

This is one form of a compromise. It is not the form that some Members, including the chairman, would have preferred, but it seemed to represent

the views of a majority of the committee.

Now, in view of the considerable history of Clinch River and the desire of many Members to feel that they have had a hand in either putting the nail in the coffin of the project or giving it a new lease on life, as the case may be, I have been asked to consider requesting a rollcall on this particular amendment. I am inclined to do so, although I am not adamant about it; but I express these views so that the chairman will be aware of my position. I will object to a voice vote on the grounds that a quorum is not present.

Mr. FUQUA. Mr. Chairman, I urge an aye vote on the amendment.

Mr. Chairman, I yield back the remainder of my time.

□ 1620

Mrs. SCHNEIDER. Mr. Chairman, I move to strike the requisite number of words.

I would like to ask the chairman of the committee a couple of questions.

I would like to thank the chairman for the very fair hearings that we have had on this particular amendment and on this entire bill in the Committee on Science and Technology. But I do have a question or two that I would like to ask.

I wondered if we are expected to have some hearings on the cost-sharing plan to be presented by the Department of Energy. Are we going to be having these hearings in the Committee on Science and Technology?

Mr. FUQUA. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHNEIDER. I yield to the gentleman.

Mr. FUQUA. It is our intention, as soon as the Department of Energy presents us with a proposal that we feel merits a hearing. We have discussed this informally with the Department. Thus far they have not come forth with a finalized plan.

We had hoped to have already had hearings on this. They have not come forth with a plan. I hope they will in the next few weeks and then we will have an opportunity to have hearings.

Mrs. SCHNEIDER. Was that the reasoning for the postponement of the hearings and also the markup that was scheduled this past week, because the DOE was not prepared and did not come forward with a cost-sharing plan?

Mr. FUQUA. That is correct. We did not have a plan. As soon as we have something we will certainly consider it.

Mrs. SCHNEDIER. It has come to my attention that the Subcommittee on Energy and Water of the Appropriations Committee is going to be bringing to the floor a cost-sharing plan. Is it your intention to have hearings before the Committee on Science and Technology prior to any vote on the floor of the Appropriations Subcommittee?

Mr. FUQUA. What comes out of the Appropriations Subcommittee and what they propose would not necessarily come before our committee. However, if we have something from the Department of Energy it is certainly our intention to have hearings and have Members given adequate notice so that they can be there and be heard on the issue.

Mrs. SCHNEIDER. If the Appropriations Subcommittee on Energy and Water were to come forward with a cost-sharing plan and we in the Committee on Science and Technology had not held hearings on it, would the gentleman be inclined to raise a point of order against the bill since that would amount to legislation on an appropriation bill?

Mr. FUQUA. Certainly anyone could raise a point of order against anything that had not been authorized or where waivers of points of order had not occurred. But that right would apply to any Member of this body.

Mrs. SCHNEIDER. I realize that, but you being the chairman I think it would certainly fall to the gentleman.

Mr. FUQUA. That is a prospective question and would have to be answered when the time came, if and when that happened.

It has generally been our practice to object to items that had not been authorized.

Mrs. SCHNEIDER. I thank the gentleman and I yield back the balance of my time.

Mr. HARKIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Brown-Schneider amendment. What it says is that this is the last year that we will fund this boondoggle unless the Congress passes a cost-sharing bill. It does not require that the arrangements be all worked out by October 1, it only requires that a plan pass the Congress.

The members of the Science and Technology Committee were told that we would be marking up such bill by mid-May. However, the hearings where canceled and no bill has even been introduced.

If the Brown amendment is not passed, we will see another year go by and 200 million more dollars spent on this project which is to test a technology that will not be economically viable for at least 50 years.

Secretary Hodel came to the Hill with a draft bill which was meaningless. It had no details on the contract except to say that the Secretary was impowered to give away anything and to make all kinds of guarantees. It also said, that if no private money was forthcoming, the Government would build it anyway. To the credit of those who favor this project, it was rejected.

But what are the details of the plan going to look like? If you read the Breeder Reactor Corp. report of March 12, you will quickly understand. Private funding would be provided in such a way that 60 cents on every dollar would come out of the U.S. Treasury through tax expenditures. The taxpayer would continue to pay, only the Congress could avoid the trouble of an appropriation for most of the money.

In a 39-page document, tax benefits were raised 70 times. In the "sanitized" DOE report, the point was mentioned almost as an aside on two occasions.

I am not willing to guarantee someone a profit on the Treasury's money. And, that is what I expect the plan will ask us to do.

I ask that you vote for the Brown amendment. If it fails, there will be no cost-sharing plan for you to look at to see if I am right. There will only be another $200 million rolled into some continuing resolution or conference report.

Mr. OTTINGER. Mr. Chairman, I move to strike the requisite number of words and I rise in strong support of the Brown-Schneider amendment. That amendment was adopted by the committee.

I also rise in support of the bill as a whole.

I would like to congratulate the chairman for doing a fine job in proceeding toward restoring balance to the energy budget. Very substantial sums are restored to the conservation and renewable energy research and development as well as to the fossil fuel energy development.

Earlier this year we had 150-Member bipartisan support in support of restoring balance to the energy budget. I think the job done under the leadership of the chairman has gone a significant way toward achieving that objective.

The Clinch River breeder reactor vote was decisive in the committee. We have already voted to eliminate that authorization before on the floor of the House. If the House sustains us on this vote I dearly hope that the Appropriations Committee will heed the action of the House and of the authorizing committee.

If, indeed, the Appropriations Committee seeks to write legislation on the appropriation bill and to appropriate money for this project despite the action of the House and the committee on this authorization bill, I serve notice on behalf of myself and Chairman DINGELL of the Energy and Commerce Committee that we will do everything possible to excise that extraordinary and improper action at the appropriate time.

But I do hope that the Appropriations Committee, and I am sorry the

chairman is not here, or at least I do not see him, because I think we ought to get a commitment from him that once the House has spoken on an authorization and we vote to deauthorize this, assuming that satisfactory agreement is not approved by the House, that he will abide by it.

With respect to the agreement put forward by the Breeder Reactor Corp. and endorsed by the Department of Energy, we had a GAO study done on this and it was released today. The GAO study indicates that the proposal by the Breeder Reactor Corp. and the Department of Energy is just another sham and that the private, so-called private capital to be put up for this is completely illusory. The Government would take all the risks of not completing the plant, of cost overruns, of even lack of profits with respect to the plan.

It is on that basis that I understand the chairman and the gentlewoman from Tennessee said that they had to go back to the drawing boards. But any program which alleges to be cost sharing and involves no real contribution by the private sector I think certainly would be rejected by this body.

So I strongly urge adoption of this amendment and adoption of the committee bill and yield back the balance of my time.

Mr. Chairman, I rise to support the Science and Technology Committee's DOE fiscal year 1984 authorization, H.R. 2587. While the bill continues a totally unwarranted and unjustified emphasis on nuclear research and development, I believe our chairman has done a fine job of preserving the most essential elements of our Nation's conservation and solar R&D programs within difficult budget constraints.

I also want to express my appreciation to the gentlelady from Tennessee (Mrs. LLOYD) for her cooperation with respect to the extended surveys, independent study, and Barnwell provisions described below.

The committee bill increases spending for solar energy by 138 percent, for conservation R&D by 110 percent, and for geothermal by 121 percent above the DOE budget proposal. These are important additions which restore a sense of vitality and purpose to the conservation and renewable energy programs, and move the Nation at least a bit toward a more balanced overall energy program especially when compared to the Reagan proposals for total imbalance. At this time, I would like to specifically address a few of the bill's provisions.

CRBR

I strongly support the committee amendment to the DOE authorization bill offered by my esteemed colleagues, GEORGE BROWN of California and CLAUDINE SCHNEIDER of Rhode Island. This amendment would require the Department of Energy to discontinue funds for Clinch River at the end of fiscal year 1983 if DOE has not by then developed an acceptable cost-sharing plan.

Congress mandated last year that DOE develop a public/private cost-sharing plan for CRBR in response to skyrocketing construction costs. On March 15, 1983, the DOE and the Breeder Reactor Corp. put forward what they claimed to be such a plan. Quite frankly, the DOE proposal is a sham. The GAO concurs with this assessment. In an analysis of the DOE plan, released only yesterday, the GAO concludes:

> The Federal Government still appears to retain most risks if the project fails or if cost overruns occur. Second, while the additional private sector financing discussed in DOE's and the Corporation's reports would produce budgetary savings during the CRBR's construction, such savings would be a tradeoff against either future reductions in federal revenues or additional budget outlays. Specifically, the revenues expected to be produced from the sale of CRBR-generated electricity will be used to pay back private investors. If, however, the revenue is inadequate, private investors would have to be repaid from DOE appropriations.

Originally estimated to cost $400 million, GAO now estimates CRBR to cost as much as $8.5 billion to complete. We have already spent $1.4 billion on the project.

Not only is Clinch River expensive, it is useless and dangerous. This project was first developed in the early sixties, when we expected a huge expansion of nuclear power that would create a severe shortage of uranium. At that time, according to the GAO, we expected to see 800 to 1,500 reactors in place by the end of the century. The current estimate is 145 to 185. There have also been significant discoveries of high-grade uranium since then. We are not facing a shortage of uranium for the foreseeable future.

Clinch River is an example of classic pork barrel politics. It has no place in the future of American energy needs. Senator HUMPHREY recently held hearings in the Regional and Community Development Subcommittee of the Senate on whether the Tennessee Valley Authority and other utilities are interested in buying power from the Clinch River breeder reactor project. The witnesses, William Willis, TVA's General Manager, William Voight Jr., from the Department of Energy, and William Chandler of the Environmental Policy Center—formerly a consultant to the GAO's office on TVA power programs—each testified that there is no need for the power that could be produced at Clinch River. This directly undermines what DOE indicated in its report of alternative financing submitted March 15, 1983.

Not only is Clinch River expensive and useless technologically, but it is a threat to world peace. Breeder reactors like Clinch River require weapons-grade fuel and, thus, could contribute to the spread of nuclear weapons. We should not be generating our electricity from a fuel that can be made into nuclear bombs. The shipment around the country of plutonium for breeders creates great threats of theft by terrorists groups. Moreover, the breeder itself is a sitting bomb, unlike fission reactors; the breeder is cooled by sodium which, if it comes into contact with water, will explode.

Having weapons grade plutonium or other bomb-grade fuel being reprocessed and stored for use creates a monumental security problem. The fuel will have to be handled under military safeguards and the burden that would be placed on both the nuclear industry, the utilities and their customers would be impossible to bear.

The Reagan administration, for all its talk about getting Government off the backs of the people and having a balanced budget, is attempting to fully fund the CRBR despite its unsound technology and economics. Congress has instructed the Department of Energy to develop a cost-sharing plan for Clinch River. The Brown/Schneider amendment will place a deadline on any further funding for Clinch River until the plan is approved by Congress. I urge my colleagues to support the committee and its amendments.

LWR EXTENDED BURNUP

I am certain that my colleagues on both sides of the aisle will find a program which yields a cost-benefit ratio of 1 to 385 an unusual but certainly worthwhile opportunity. The Science and Technology Committee's proposal of $9.5 million for the extended burnup program, a program which the administration has entirely eliminated in their budget request, promises those huge benefits. The program is designed to develop and demonstrate increased fuel efficiency in existing nuclear power reactors in the United States. With this authorization, the committee expects, as stated in the report to accompany H.R. 2587, that the Department will enter into a limited number of new contracts to achieve the full $12 billion in program benefits.

The Department of Energy and the General Accounting Office have projected that the extended burnup program can save approximately $13 billion if the program is vigorously pursued. Last year $5 million was provided under the continuing resolution in fiscal year 1983. An $8 million authorization would fully fund existing fuel contracts and reestablish the original schedule which was identified by the DOE and GAO. The additional $1.5 million included in this bill, bringing the total authorization to $9.5 million,

will allow the pursuit of competing fuel vendor contracts. Without this $1.5 million, $7 billion of economic benefits would be lost, according to DOE and GAO.

In addition to conserving up to 15 percent of fuel currently used in LWR's, the extended burnup program will reduce by 40 percent the amounts of high level waste which are produced by existing fission reactors. In light of present difficulties associated with establishing a permanent waste disposal site, having to dispose of 40 percent less waste would be a substantial benefit.

The GAO has also identified the following additional benefits:

Lower total radiation exposure to nuclear powerplant workers;

Safer, more reliable nuclear powerplant operations; and

A reduction of the Department's enrichment plant capacity requirements.

It is important to note that there is little likelihood industry would pursue the extended burnup program without this Federal assistance. Before the House Energy Research and Production Subcommittee, Charles Pryor, of Babcock & Wilcox, testified:

The Federal Government should continue to fund the extended fuel burnup program because sufficient incentives do not exist in the private sector. For fuel vendors, increasing fuel burnup lowers the number of fuel assemblies required to fuel a reactor. Thus, it reduces our manufacturing output, raises the unit cost, and reduces our revenues. This, coupled with the fact that there is already excess capacity in the fuel supply business, is a disincentive for the fuel vendors. I do not believe the utility/vendor teams that are now in place today would complete their program as presently planned if the government withdraws its support.

BARNWELL NUCLEAR FUEL PLANT

I also endorse the committee's decision to decline acceptance of a gift of the Barnwell nuclear fuel plant as a research facility. The committee reversed the action of the subcommittee by deleting all funds related to Barnwell.

I believe the committee's action was a prudent one in light of communications received from Secretary of Energy Hodel, warning of the adverse economic consequences of taking title to Barnwell.

In an April 8, 1983, letter to Chairman FUQUA, Secretary Hodel stated:

To convert such a production facility to a research and development facility would require major costly renovations.

And further,

It seems that any expectation of Government acquisition at this time would be counterproductive and would relieve time pressures for near-term commitments by the industry to operate the plant.

By removing all funding relating to Barnwell, we have made it legally impossible for DOE to accept Barnwell. Former DOE General Counsel Tenney Johnson, in an April 20, 1983, letter addressed to myself, stated:

The Comptroller General has held that donations of real property may not be accepted without funds adequate for the care and custody of the property. Accepting title to Barnwell would depend not only upon justifying programmatically the need for the facility but also upon being able to provide funds for activities related to the facility.

Since the committee has wisely provided no funds for the care and custody of Barnwell, it is clear that DOE may not accept the property.

THE SECRETARY OF ENERGY,
Washington, D.C., April 8, 1983.

Hon. DON FUQUA,
Chairman, Committee on Science and Technology, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Thank you for your letter of March 23, 1983, on potential alternative uses for the Barnwell Nuclear Fuel Plant as a facility for research and development.

We found your letter interesting and felt it may be useful to convey the Department's initial reaction to your plan and, in a broader sense, our expectations for the Barnwell plant. Two things are clear. First, if reprocessing of commercial fuel is initiated during the Reagan Administration, it will occur as a private initiative; and, second, if the Barnwell plant is dismantled, further efforts toward commercial reprocessing in the United States during the twentieth century are unlikely to occur due to the long lead-time and costs associated with new facilities. For these reasons we have encouraged commercial interests to make the necessary commitments to keep the reprocessing option open by maintaining the Barnwell plant.

It appears you have reached the same conclusions on the importance of preserving this potential resource, and we endorse your efforts in this regard. However, some facts are inescapable. The Barnwell plant is a production facility, not a research and development facility. The equipment layout is fixed; the piping is fixed; and the plutonium uranium extraction flowsheet is the heart of the plant design. To convert such a production facility to a research and development facility would require major costly renovation.

As you may know, we still hope to receive an industry proposal soon on operation of the Barnwell plant on a commercial basis. It is not clear what Departmental commitments would be required by that proposal, nor have we formulated a policy on the extent of the commitments the Department would be willing to make. However, it seems that any expectation of Government acquisition at this time would be counterproductive and would relieve time pressures for near-term commitments by the industry to operate the plant.

We look forward to working with you and your committee in devising a successful approach to keeping the commercial reprocessing option alive at the Barnwell plant.

Sincerely,

DONALD PAUL HODEL.

DEPARTMENT OF ENERGY,
Washington, D.C., April 20, 1983.

Hon. RICHARD OTTINGER,
House of Representatives, Washington, D.C.

DEAR MR. OTTINGER: This responds to your request for information concerning the authority of the Department of Energy (DOE) to accept title to and lease the Barnwell facility in South Carolina and prohibiting DOE from accepting any liabilities at Barnwell.

AUTHORITY TO ACCEPT TITLE

DOE could accept title to Barnwell under the Department of Energy Organization Act. For example, section 652 (42 U.S.C. 7262) of that Act provides, inter alia, that: "The Secretary is authorized to accept, hold, administer, and utilize gifts, bequests, and devises of property, both real and personal, for the purpose of aiding or facilitating the work of the Department."

DOE could accept title also under the Atomic Energy Act of 1954. For example, section 161g. of that Act (42 U.S.C. 2201(g)) provides, inter alia, that: "In the performance of its functions the Commission is authorized to . . . acquire, purchase, lease, and hold real and personal property . . . as agent of and on behalf of the United States, subject to the provisions of section 174, and to sell, lease, grant, and dispose of such real and personal property as provided in the Act."

The Comptroller General has held that donations of real property may not be accepted without funds adequate for the care and custody of the property. Accordingly, accepting title to Barnwell would depend not only upon justifying programmatically the need for the facility but also upon being able to provide funds for activities related to the facility.

AUTHORITY TO LEASE CONTRACT

DOE could enter into a contract or lease to conduct activities at Barnwell under the Department of Energy Organization Act. For example, section 646(a) of that Act (42 U.S.C. 7256(a)), provides that: "The Secretary is authorized to enter into and perform such contracts, leases, cooperative agreements, or other similar transactions with public agencies and private organizations and persons . . . as he may deem to be necessary to carry out functions now or hereafter vested in the Secretary." In addition, section 649(b) (42 U.S.C. 7259(b)) provides, inter alia, that: "In carrying out his functions, the Secretary, under such terms at such rates, and for such periods not exceeding five years, as he may deem to be in the public interest, is authorized to permit the use by public and private agencies, corporations, associations, or other organizations or by individuals of any real property, or any facility, structure, or other improvement thereon, under the custody of the Secretary for Department purposes. The Secretary may require permittees under this section to recondition and maintain, at their own expense, the real property, facilities, structures and improvements involved to a satisfactory standard."

DOE could enter into a lease also under section 161g. of the Atomic Energy Act of 1954, cited above.

PROHIBITING DOE FROM ACCEPTING ANY LIABILITIES

It is unclear precisely what the scope of prohibiting DOE acceptance of liabilities should be. With respect to liabilities resulting from activities before DOE takes title,

any restriction against liabilities probably should include protection against any past liabilities to, or resulting from the activities of, the present owners of Barnwell. That is, the Government should be immune from suits arising from past activities brought by the present owners or third parties. DOE acceptance of Barnwell as a gift at this time could be conditioned upon the present owners retaining all liability from their activities.

With respect to liabilities arising after DOE takes title to Barnwell, we cannot discern now what DOE's future activities at Barnwell might be (DOE requested no fiscal year 1984 funds for activities at Barnwell). Were DOE to lease or otherwise give control of the facility to a third party, who would operate the facility essentially for its own benefit, then a restriction to protect DOE from liability to, or resuling from the activities of, the operator of the facility would be reasonable. It would be most unusual, however, to restrict DOE liability if DOE itself were the operator.

If a contractor operated the facility under the general control or for the benefit of DOE, almost certainly there would be contractual liabilities to the operator (e.g., an operation fee, and possibly an indemnity against liability to third parties) and, absent clear statutory protection, possible direct liability to injured third parties.

If I may be of any additional help on this matter, please call me.

Sincerely,

R. TENNEY JOHNSON,
General Counsel.

URANIUM ENRICHMENT STUDY

I also support the committee's proposal that DOE undertake an extensive study and comparison of uranium enrichment technologies. There is a considerable controversy today over whether we ought to be wasting money for uneconomic investments. I believe the results of this study will add significantly to our ability to make well-informed and reasoned decisions regarding a uranium enrichment program strategy.

Listed in the Science and Technology Committee report to accompany H.R. 2587, on page 98, are the criteria which the committee suggests the DOE use in conducting the study.

A letter from me to Subcommittee Chairwoman LLOYD regarding the study and the LWR extended burnup program is included here for the record:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., April 18, 1983.

Hon. MARILYN LLOYD,
Chairwoman, Subcommittee on Energy Research and Production, U.S. House of Representatives, Washington, D.C.

DEAR MARILYN: I would like to express my sincere appreciation for your cooperation in resolving several issues which arose during the markup of the Department of Energy fiscal year 1984 authorization bill for nuclear energy research and development by the Subcommittee on Energy Research and Production.

I am very pleased we have agreed on a recommendation of $9.5 million in fiscal year 1984 for the Light Water Reactor Extended Burnup program, an increase of $1.5 million over the subcommittee's initial recommendation. This additional amount would continue funding of the existing contracts which currently involve the five U.S. nuclear fuel vendors. In addition, it authorizes the Department to let a limited number of new contracts which are essential for keeping all five vendors involved in the full extended burnup program. With this additional funding we will be well on our way towards realizing the nearly $13 billion in economic benefits to consumers of nuclear generated electricity which were identified by the Department of Energy and confirmed by a General Accounting Office review.

As we both support this worthwhile and cost-effective program, I hope the report on the authorization bill will make clear the Committee's intent that the Department is to let new contracts essential for the completion of the full program.

I am also pleased we have agreed to direct the Department to conduct a thorough study of uranium enrichment technologies and programs. I believe the results of this study will add significantly to our ability to make well informed and reasoned decisions regarding a uranium enrichment program strategy.

I commend the staff for their responsiveness to my concerns. They have developed balanced and workable proposals in these two areas and I have high expectations for their success in full committee.

Sincerely,

RICHARD L. OTTINGER,
Member of Congress.

In conclusion, Mr. Chairman, I believe it is vital that we send a clear message to the administration. Congress has been forced to completely overhaul the Department of Energy's ludicrous energy research proposals. Although I remain concerned that even in this bill we are spending too much of our research money on nuclear energy and too little on conservation and solar, I nonetheless support it strongly because it preserves research and development programs that are so vital to our Nation's energy future. Again, I urge the adoption of H.R. 2587 as amended.

Mr. COUGHLIN. Mr. Chairman, I move to strike the requisite number of words.

I just want to congratulate the gentleman from California (Mr. BROWN) and the gentlewoman from Rhode Island (Mrs. SCHNEIDER) for bringing this amendment to us today.

I also congratulate the chairman for his willingness to accept the amendment and the ranking minority member. Certainly this project has been discussed over the years for many, many hours on the floor of this House, and I am not going to belabor it further.

I do hope that the funding for this project and the authorization for this program will indeed be terminated.

Mr. Chairman, I rise in support of the Brown-Schneider amendment to prohibit funds from being authorized for the controversial Clinch River breeder reactor in fiscal year 1984.

I am opposed to any further funding of the Clinch River project because of its escalating costs, its inadequate benefit-to-cost ratio and the fact that its technology will not be needed until at least the middle of the next century. I believe the Brown-Schneider amendment is a reasonable approach to the Clinch River financing issue. Before 1 cent is spent on the actual construction of the Clinch River breeder reactor, the Brown-Schneider amendment provides the private sector with the opportunity to tell the American people how willing they are to finance this multibillion-dollar project.

The Clinch River breeder reactor has devoured more than its fair share of the overall energy research and development budget to the detriment of pursuing other energy options. A balanced, effective national energy research program cannot be achieved in this manner. Can we really afford to spend billions more dollars on the demonstration of a specific technology without convincing evidence that this investment is in our national interest or that the private sector is willing to fulfill its commitment to share equally in the cost of Clinch River?

I ask you to carefully consider the arguments presented by my colleagues against funding the Clinch River breeder reactor next fiscal year. I urge you to lend your support to their efforts.

Mrs. SCHNEIDER. Mr. Chairman, I ask unanimous consent to strike the requisite number of words.

The CHAIRMAN. Without objection, the gentlewoman is recognized for 5 minutes.

There was no objection.

Mrs. SCHNEIDER. Mr. Chairman, I rise as a supporter and coauthor of the Brown-Schneider amendment.

The amendment, just to clarify, is extremely simple. It bars Federal funding for Clinch River after October 1983 until the Congress has had the opportunity to accept or reject a proposal to increase the private sector's share of the cost.

The so-called cost-sharing proposals we have seen so far have been little more than a sham and, in fact, the General Accounting Office has just issued a report finding that the DOE draft cost-sharing bill, with all its Federal guarantees and contractual commitments, will actually cost the taxpayers more than a straight appropriation.

Some of us have just about concluded that the Clinch River breeder reactor is the worst idea that Congress has ever had and that we ought to kill it outright and save ourselves the agony of dragging it through the budget process.

□ 1630

However we have tried to offer a simple compromise throughout the amendment that says to the private sector: "If you support this project,

make us an offer, because the era of writing blank checks for Clinch River is over. We will bring your proposal in front of the authorizing committees, have open hearings with the opportunity for witnesses on both sides to comment, and then bring the bill to the floor for open debate and consideration."

If the Congress feels the project should continue under a proposed cost-sharing plan, then fine. But if not, they can say goodby to a very bad bargain.

Mr. WOLPE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as a member of the Science and Technology Committee who is currently on leave to serve on the Budget Committee, I rise in strong support of the Brown-Schneider amendment.

The pros and cons of the Clinch River project have been debated on the floor of this House on numerous occasions; 5 minutes is not enough to repeat the numerous convincing arguments in opposition to this project. I would, however, like to make three brief points.

First. A number of factors indicate that breeder technology will be economically infeasible for the foreseeable future. Declining projections of electricity demand and increased reserves of relatively inexpensive uranium for use in existing nuclear reactors mean that breeders will be unable to compete in the commercial marketplace for over 50 years, if ever. I see no reason to prematurely demonstrate a technology if it will be totally obsolete long before it could begin to enter the commercial marketplace.

Second. In an era of $200 billion budget deficits, we simply cannot justify building a totally unnecessary project with a cost that is about to soar off the financial charts. The Clinch River project was originally estimated to cost $699 million when it was authorized in 1971. The Department of Energy now estimates that it will cost $3.6 billion, and construction has not even begun. Last December, the General Accounting Office found that the cost of the project could go as high as $8.5 billion.

Third. If the private sector believes that the American taxpayer should continue to build this project, they should demonstrate their confidence by accepting a significant share of the financial risk involved. In 1971, the utility industry committed $257 million—36 percent of the project's cost. As the total project cost has soared to $3.6 billion, the utility contribution has remained flat at $257 million. The industry has asked the American taxpayer to pick up the cost for all of the cost overruns, and is now only willing to contribute 7 percent of the project's cost.

In conclusion, I would like to quote one of our former colleagues, and my friend from Michigan, David Stockman. In September 1977 Congressman Stockman said, and I quote:

> The unwillingness of the electric utilities to absorb a larger share of the cost of commercializing the breeder is the most telling evidence of its lack of economic feasibility under present conditions.

Mr. Chairman, the Brown-Schneider amendment gives the utility industry the opportunity to demonstrate that they, in fact, do believe that breeder technology will be economically feasible in the foreseeable future. They can do so by putting a significant sum of their own money at risk—just as they are asking the American taxpayer to do.

Mr. Chariman, I urge the adoption of the Brown-Schneider amendment.

Mr. FISH. Mr. Chairman, I hope this is the end of the road for the Clinch River breeder, I have stood in this well and supported for the last 9 years amendments to halt this wasteful, unnecessary project.

Unfortunately, I understand that following the much-hoped-for passage of this amendment, the Appropriations Committee has plans to develop a cost-sharing plan and bring it to the floor without due consideration by the Science and Technology Committee. I cannot believe that with all of the controversy this program has engendered that the possibility exists for some legislative sleight-of-hand bypassing of our committee process preventing a complete and expert analysis of any cost-sharing plan that may be presented. I certainly hope that this will not be the case.

The proliferation of risks, enormous costs, environmental concerns, and safety problems with this project have been discussed on this floor many times over the years. Much time has been spent on discussing the menace of huge stockpiles of plutonium created by the development of a breeder reactor, and the dangers are well known. In 1977, the NRC halted the licensing process for Clinch River with over 100 unresolved safety issues which still remain. Before we build a breeder, substantially more research is needed to comprehend, evaluate, and control the safety risks that will accompany the use of this technology.

Another key problem with this project is its cost. It will be well into the 21st century before the breeder reactor even begins to look commercially attractive. By that time, oil-fired central power stations will long since have been replaced by coal and conventional nuclear powerplants. We hope to have other forms of inexhaustible energy supplies, such as fusion and solar, on line by then.

I urge my fellow colleagues to recognize the economic realities of our present situation. There is no doubt that we will have to devote a great deal more money to Clinch River in future years if we go ahead with this project. Funding problems in these years will certainly be even more serious, as we try to reduce our budget deficits in the years to come.

The estimated costs of the Clinch River project have increased more than sevenfold, from an original estimate in 1969 of over $400 million to todays estimate of over $3.5 billion. Unfortunately, there is no guarantee that these exorbitant costs will not continue to escalate. In fact, I understand that the General Accounting Office, in December of last year, estimated the total cost for Clinch River at $8.9 billion, possibly going as high as $11 billion.

Of course, it is unreasonable for the Federal Government to be responsible for all of these increasing costs. Our taxpayers liability in this project has grown from about $100 million to now over $3 billion—more than 30 times the original estimate. According to recent estimates, the utility and industry share of today's costs for Clinch River had dwindled from 50 percent to under 10 percent of total costs. This is certainly not a wise course to follow.

Mr. Chairman, many of my colleagues are concerned that we will severely restrict our Nation's ability to develop the breeder option if we do not build Clinch River. This is surely not the case. Even without Clinch River, we will still have an aggressive breeder program. The base breeder program that the administration has proposed, and which has been authorized by the Science Committee, will provide for a strong breeder program that will, in fact, enhance the program by calling for a more rational design.

In my opinion it would be better to go forward with research and development activities, including the development of all of the breeder technologies at this time.

Mr. Chairman, I can only repeat what I said last year on this subject: It is time for us to put aside projects that have only symbolic meaning. We cannot afford to devote our limited taxpayers' money to the demonstrations of technologies that have limited merit if any.

The CHAIRMAN. The question is on the committee amendment.

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. BROWN of California. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device and there were—ayes 388, noes 1, not voting 43, as follows:

Mr. LEWIS of California changed his vote from "aye" to "no."

Mr. SMITH of Florida, Mr. LEWIS of California, Mrs. VUCANOVICH, Ms. OAKAR, and Mr. DANNEMEYER changed their votes from "no" to "aye."

So the committee amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. GLICKMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the Subcommittee on Transportation, Aviation and Materials held extensive hearings and field inspections on the transportation portion of the fiscal year 1984 Department of Energy authorization. Testimony was taken from a variety of witnesses, both inside and outside of the DOE.

The transportation program was created by two pieces of hard-won legislation, both of which were born in the Science Committee. At that time, our objective was to begin to do something about the No. 1 consumer of petroleum—the automobile. But, to my mind, those bills achieved something even more significant. They gave the Federal Government a role in advanced automotive technology, similar to the one it has in other areas where we dominate the world market such as in agriculture and aeronautics. Although the program is a small one—only $67.6 million recommended by the committee this year—the payoff can be very large. This is true because DOE emphasizes the high-risk, long-term research and technology that our auto industry is financially unable or unwilling to undertake. Such efforts can provide the basis for leapfrogging the competition and possibly even for recovering some of our market share in this troubled industry. I believe this is especially significant as we search for new ways to restructure our national economy by emphasizing high technology.

Unfortunately, the Reagan administration, despite its high-minded rhetoric about the importance of technology, has sought repeatedly to end the DOE engine program. Initially its thrust was to scrap entirely the proof-of-concept approach that had been envisioned in the enabling legislation. That, however, would have meant withdrawal from projects that address the single most important consumer of foreign petroleum—the automobile. It would have meant the termination of three major technology development contracts—with GM, a team of Garrett and Ford, and Mechanical Technology, Inc. of New York. And it would have meant abandoning technologies that could be very important in the future—unless you believe that energy supply shortages will never again appear.

Fortunately, the Congress has taken a longer view and has provided funds each year to keep these projects moving forward, toward their completion dates in 1986 and 1987. Because of this and also because of the recent, very strong interest by the auto industry in the gas turbine program, DOE is no longer trying to kill the whole heat engine effort. This year it proposed to converge to only one turbine contractor and to terminate the work of MTI on the Stirling engine.

To further substantiate the committee's judgment, especially with regard to continuing the Stirling proof-of-concept project, I would like to note, for the record, the existence of three letters from various automobile and engine companies. These letters are from the GM Research Laboratories, Deere & Co., and the Cummins Engine Co. In each case they are addressed to NASA, as the project manager. They each express interest in a DOE program under which Stirling engines will be made available for the purpose of

performing dynamometer testing. Mr. Chairman, I believe these letters may reveal the awakening of real interest by industry in Stirling technology.

The committee felt, as it has in the past, that the need for alternative engine technology in the future is still valid and that we should complete these projects. We were particularly concerned this year—with the end in sight and with the early results all showing great promise—that budget-cutting zeal might deprive us of an important future technology.

Accordingly, the committee added $27.1 million to the administration's request, bringing the total authorization for fiscal year 1984 to $67.6 million. The additional funds will permit continued development of the Stirling engine toward final proof of concept, as originally planned, continuation of both gas turbine contracts and augmentation of the DOE staff to manage this additional effort.

The other areas traditionally within the transportation program—electric and hybrid vehicle R&D alternative fuels and advanced materials—were all judged to have received adequate funding in the administration's request.

Finally, DOE proposed $9 million to start construction of a high-temperature materials lab at Oak Ridge. Since work in this area is key to advances in the fuel efficiency of a variety of engine types, including the diesel, the committee strongly endorsed this request.

Mr. Chairman, I urge adoption of the fiscal year 1984 DOE authorization bill.

AMENDMENT OFFERED BY MR. MINETA

Mr. MINETA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MINETA: On page 10, line 5, strike "$20,900,000;" and inset in lieu thereof the following: "$15,900,000; (C) Project numbered 84-ER-113, Vitreous State Laboratory, The Catholic University of America, Washington, D.C. (Total Estimated Cost, $13,900,000), $5,000,000;" and redesignate existing projects (C) through (H) in paragraph (6) as (D) through (I), respectively.

Mr. MINETA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. MINETA. Mr. Chairman, this amendment redirects $5 million of construction funding from project numbered 84-ER-112, the National Center for Advanced Materials at Lawrence Berkeley Laboratory and the Stanford Linear Accelerator Center, to provide for the initiation of construction of the Vitreous State Laboratory at the Catholic University of America.

The competitive posture, and, indeed the very survival, of American industry in the coming decades will depend upon bold R&D ventures, and few areas are riper for scientific exploitation than the area of materials science. Advanced research on glassy-state or vitreous materials, in particular, offers significant payoffs for applications to energy development and industrial productivity. In this exciting field of technological innovation, the Vitreous State Laboratory (VSL) at the Catholic University of America is not only the acknowledged leader, but also the focal point of a broadly based research and educational program aimed at the development of these exciting new materials.

The VSL is currently investigating a number of areas with potentially far-reaching energy-related applications such as the use of glass surface catalysts and solar energy to produce molecular hydrogen from water, which offers the potential to substantially reduce our reliance on imported oil with savings of the order of tens of billions of dollars annually. Potential industrial applications of VSL technologies are legion. They include new techniques for inexpensively producing lenses for copiers and telecommunications devices, high-speed optical switches for ultrafast computers, and for reducing costs of genetically engineered pharmaceuticals.

Mr. Chairman, the Vitreous State Laboratory at the Catholic University of America was created in 1968 following the award of a Department of Defense project THEMIS contract from the Office of Naval Research as a center of excellence for the scientific investigation and technological development of glassy materials. From its initial work directed exclusively for military purposes, VSL has undertaken a wide variety of projects involving the development of new glass materials with specialized properties for scientific applications, both civilian and military. It has also diversified its funding base so that now some two-thirds of its approximately $1.2 million annual budget comes from private sources; with the remaining one-third coming from both military and civilian government agencies.

Over its 15 years of existence, the laboratory has had an enviable track record as evidenced by the following:

First, laboratory personnel have authored more than 400 scientific papers, several books, and numerous patents.

Second, many graduates and post-doctoral students trained at the VSL occupy key research and administrative positions in major government, industry, and university laboratories.

Third, the VSL has been remarkably successful in translating the results of laboratory scale research on specialized glassy materials into innovative industrial technologies with important energy-related applications. These include the development of a novel type of glass in which high-level radioactive nuclear waste is most effectively immobilized for long-term repository storage, a new type of inexpensive foam-glass for thermal insulation, and a fiber optic sensor that functions as a sensitive geophone for oil exploration.

Mr. Chairman, if the laboratory is to continue to grow and to capitalize most effectively on its past successes, it must expand its current space. The VSL now utilizes 14,000 square feet of space that is scattered around six different floors of three different buildings; and the university has exhausted its ability to provide any additional new space. There is no doubt that the VSL's capabilities could be significantly improved if a properly designed and appropriately equipped building—with adequate laboratory, shop, office, and meeting room space—could be constructed to house it all under one roof. Such a laboratory can be constructed for the modest investment of only $13.9 million. My amendment will provide $5 million in fiscal year 1984 to initiate this important project.

I want to point out, Mr. Chairman, that this funding is the result of a redirection of funds already requested by the administration and approved by the committee—we will not be adding additional funds. I also want to point out that these funds are being redirected from the National Center for Advanced Materials at the Lawrence Berkeley Laboratory and the Stanford linear accelerator—a project I strongly support. However, due to the ongoing review and continuing refinement of the center's construction plan by the Department of Energy, I anticipate that this modest reduction in first year funding can be accommodated within the succeeding 5-year construction schedule.

I would ask that my colleagues join with me in support of the new Vitreous Materials Laboratory as we strive to reestablish the United States as the unchallenged technological leader in the world.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. MINETA. I yield to the distinguished majority leader, the gentleman from Texas.

Mr. WRIGHT. I thank the gentleman for yielding, and I want to commend him on the initiative he has shown in fostering this project. It is, I think, thoroughly worthwhile, and is the kind of thing that nobody disagrees with. At least I cannot imagine any knowledgeable person disagreeing with it. This will finance a highly necessary and extremely important bit of research that is being carried out in a

very exemplary way at Catholic University. I think the entire Nation will benefit from it. It does not increase the total cost of the bill, the way the gentleman's amendment is drafted. So I just want to commend my friend, the gentleman from California, and associate myself with his remarks.

Mr. MINETA. I thank the distinguished majority leader.

□ 1700

Mr. SENSENBRENNER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I rise in strong opposition to the gentleman's amendment.

Although I have great respect for the gentleman, who is also a member of the Science and Technology Committee, the facility proposed to be constructed under his amendment is premature and, if adopted, would emasculate the authorization process we have adopted in this body.

Authorization committees are a creature of necessity. The subjects presented to this body are so diverse and complex that we cannot, as 435 Members sitting together, effectively and adequately consider the merits of any proposal. Therefore, we have established authorization committees, so that subjects of enormous complexity and understanding can be carefully and thoughtfully studied and evaluated. Moreover, proposals for the expenditure of our limited financial resources will be forced to prove their value against other competing proposals. In this manner, only those proposals deemed to be meritorious, by the committee with established expertise in the subject area, are recommended to this body to be funded.

The gentleman's amendment would bypass this review process.

The gentleman's amendment would redirect $5 million from the construction of the proposed National Center for Advanced Materials, at Berkeley, Calif., which was supported by the chairman and a majority of the members of the Science and Technology Committee at the unreduced level, to finance the construction of a new $13.9 million Vitreous State Laboratory which would replace the existing facility at Catholic University.

The gentleman's proposal was not submitted to the Science and Technology Committee, prior to its consideration of this legislation and I did not learn of the request until yesterday. I requested my staff to contact Catholic University concerning the gentleman's proposal.

I am informed that:

First. Catholic University has not submitted a written proposal detailing the time schedule, the size of the proposed facility, or justification for a new facility.

Second. There are no architectural design or construction plans in existence for the facility.

Third. The university is unsure of its location on the campus.

Fourth. The facility will not be a user facility; that is, it will not be designed so that outside scientists will be encouraged and invited to use the facility, but instead will be for the benefit of those scientists attached to the laboratory.

In light of these disclosures, I can understand why this proposal was never submitted to the committee. This project can no longer hide behind the veil of scientific research, but must instead be seen for what it really is, political pork.

Unless my colleagues wish to emasculate the authorization process and politicize scientific research and the construction of scientific research facilities, by encouraging every college and university in the country to contact their Representative to obtain a facility, regardless of duplication or its value to the Nation, I urge rejection of this amendment.

Mr. CARNEY. Mr. Chairman, will the gentleman yield?

Mr. SENSENBRENNER. I yield to the gentleman from New York.

Mr. CARNEY. I thank the gentleman for yielding.

Mr. Chairman, based on what the gentleman is saying, perhaps the facility is going to be used for a DOD project or a defense project, something of that nature, and maybe they cannot tell us what it is. They might be doing work on chemical weapons or something of that nature and they might not be telling us.

Mr. SENSENBRENNER. I have no information on what the facility will be used for. The initial Vitreous State Laboratory was financed in 1968 out of Department of Defense funds, however.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. SENSENBRENNER. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, do I understand correctly that this is a matter which was never brought before the committee? I do not remember it ever being there. Is that correct, that the committee never heard anything about this project in all the time we were considering this authorization?

Mr. SENSENBRENNER. No, it was not, and there was no request to hear anything about this project before either the committee or the subcommittee.

Mr. WALKER. And furthermore, there are no architectural plans, there is no site, there is really nothing in existence about this project?

Mr. SENSENBRENNER. There is about a 20-page memorandum that basically describes the work that has been going on at the Vitreous State Laboratory since its founding and saying that there is overcrowding of the present facility. I do not quarrel with that report at all, but in terms of actual, specific plans on how many square feet, exactly where the building is to be located, architectural plans, and the like, there is nothing that has been submitted.

Mr. WALKER. And we are being asked to put up $5 million, is that correct, and that is only the first installment of what I understand is going to be more than $15 million? Is that correct?

Mr. SENSENBRENNER. That is $5 million out of $13.9 million, but furthermore, it takes the money away from a project authorized by the majority of the Committee on Science and Technology.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. SENSENBRENNER) has expired.

(On request of Mr. WALKER and by unanimous consent, Mr. SENSENBRENNER was allowed to proceed for 2 additional minutes.)

Mr. SENSENBRENNER. So in effect, the adoption of this amendment would be robbing Peter to pay Paul.

Mr. WALKER. If I understand the gentleman correctly, what we are doing is, we are saying that all of the things that the authorizing committee went through and decided were meritorious, we are now going to decide on this floor that something that no one ever heard of before yesterday is going to come out here and take away money from the projects that we regarded as the most vital for the national interest. Is that what is happening here?

Mr. SENSENBRENNER. The gentleman from Pennsylvania is absolutely correct. The universities in California that submitted their plans, that went through the committee authorizing process, won their vote in the committee and submitted all the voluminous documentation to do that, they are the losers.

□ 1710

The university that came in at the last minute without having submitted this kind of documentation would be the winner of a new building should this amendment be adopted. That destroys the authorization process. That means the siting of these buildings is decided on political considerations rather than on scientific considerations, and that is why the amendment offered by the gentleman from California (Mr. MINETA) ought to be rejected.

Mr. WALKER. Mr. Chairman, if the gentleman will yield further, I would have to agree with the gentleman that

that kind of process is no more than pork barrel politics, and I thank the gentleman for his opposition.

Mrs. BOGGS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Over the next decade, the competitive posture of certain high technology American industries in domestic and international markets will depend upon bold research and development ventures. Over the years, the Vitreous State Laboratory has established a solid record of translating its laboratory developments into practical technologies. In the process, however, it has been forced to overcome the obstacles posed for it, as the gentleman from California (Mr. MINETA) has indicated, by scattered and outmoded research facilities it has long outgrown.

It is for this reason that the laboratory, seeking to improve upon its admirable record of technological applications, has requested Federal support for the construction of a fully modern facility for glassy-state materials research, and I support that request.

Mr. Chairman, Catholic University did not intend to circumvent the committee system, and it does not believe that it did so. Its proposal for Federal support has been under consideration for some time. If it had been aware that the administration had proposed an enormous new initiative for materials research, and if it had been consulted in the preparation of that initiative, it certainly would have participated actively in the hearings process.

Mr. Chairman, there is a very fine site already designated on the campus of Catholic University. The Schools of Architecture and Engineering and the vice president in charge of facilities have all been able to participate in the planning for this splendid new laboratory, and I think there is no reason to believe that it was a haphazard situation thrown together at the last moment.

There are two principal reasons why it is advisable to accept this amendment now and not to delay until some later date this year and then proceed to fund it next year. The first reason involves the economics of the nuclear power industry where millions and millions of dollars are lost as reactors sit idle for lack of an adequate solution to the nuclear waste problem. The Vitreous State Laboratory has developed and is perfecting the development of techniques for dealing with nuclear waste.

The second major reason for proceeding immediately to the funding of the vitreous state facility is foreign economic competition. The Vitreous State Laboratory has made important contributions and will continue to make them to the next generation of computers, which will include both crystalline and glassy-state materials, to the development of telecommunications using fiber optics, and to the development of facsimile machines for the delivery of electrical mail.

In all three areas, delay increases the risk that this country will fall behind, or in some cases fall further behind, foreign competition, especially from Japan, in the development of these new technologies. In the facsimile machine area, for example, the graded index lenses developed at the Vitreous State Laboratory represent the only alternative to the lenses currently being produced in Japan.

It is for these reasons, Mr. Chairman, that I urge the support of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. MINETA).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 261, noes 113, not voting 58, as follows:

□ 1730

The Clerk announced the following pairs:

On this vote:

Mr. Addabbo for, with Mr. Spratt against.

Messrs. SAM B. HALL, JR., PATTERSON, and DICKINSON changed their votes from "aye" to "no."

Mr. SIKORSKI changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WINN

Mr. WINN. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. WINN: Strike all after the enacting clause and insert:

That this Act may be cited as the "Department of Energy Civilan Research and Development Authorization Act for Fiscal Year 1984".

OPERATING EXPENSES

SEC. 2. Funds are hereby authorized to be appropriated for fiscal year 1984 in accordance with section 660 of the Department of Energy Organization Act for operating expenses for the following research and development programs:

(1) Fossil energy, $229,847,000;

(2) Energy conservation, $96,087,000;

(3) Energy supply research and development;

(A) Solar energy, $170,900,000;

(B) Geothermal energy, $20,000,000;

(C) Nuclear fission, $461,522,000;

(D) Magnetic fusion, $382,700,000;

(E) Electric energy systems, $17,702,000;

(F) Energy storage systems, $19,100,000;

(G) Basic energy sciences and supporting research, including energy science advanced computation, energy research analysis, university research support, university research instrumentation, and advisory and oversight program direction, $312,569,000;

(H) Environmental research and development, $217,875,000; and

(I) Policy and management, energy research, $515,000;

(4) Geothermal resources development fund, $2,100,000;

(5) General science and research, $479,750,000; and

(6) Uranium enrichment:

(A) Advanced isotope separation technology, $59,900,000; and

(B) Gas centrifuge process development and demonstration, $106,400,000.

PLANT AND CAPITAL EQUIPMENT

SEC. 3. Funds are hereby authorized to be appropriated for fiscal year 1984 in accordance with section 660 of the Department of Energy Organization Act for the acquisition and fabrication of capital equipment not related to construction for the following research and development programs:

(1) Fossil energy, $3,000,000;

(2) Energy conservation, $750,000;

(3) Energy supply research and development:

(A) Basic energy sciences and supporting research, $24,280,000;

(B) Nuclear fission, $31,160,000,

(C) Magnetic fusion, $37,800,000;

(D) Energy storage systems, $100,000; and

(E) Environmental research and development, $11,700,000.

(4) General science and research, $62,800,000; and

(5) Uranium enrichment:

(A) Advanced isotope separation technology, $9,500,000; and

(B) Gas centrifuge process development and demonstration, $3,400,000.

PRIOR YEAR CONSTRUCTION

SEC. 4. Funds are hereby authorized to be appropriated for fiscal year 1984 in accordance with section 660 of the Department of Energy Organization Act for plant and capital equipment (including planning, construction, acquisition, and modification of facilities, including land acquisition) for the following prior year research and development projects:

(1) Fossil energy:

(A) Project numbered 82-F-506, Surface Water Containment and Wastewater Treatment Facility, Pittsburgh Energy Technology Center, Bruceton, Pennsylvania, $1,040,000, for a total authorization of $3,000,000; and

(B) Project numbered 83-F-501, Wastewater Treatment Facility, Morgantown, West Virginia, $3,000,000, for a total authorization of $3,800,000;

(2) General science:

(A) Project numbered 81-E-218, Tevatron I, Fermi National Accelerator Laboratory, Batavia, Illinois, $20,000,000, for a total authorization of $58,000,000; and

(B) Project numbered 82-E-206, Tevatron II, Fermi National Accelerator Laboratory, Batavia, Illinois, $13,000,000, for a total authorization of $37,000,000;

(3) Nuclear fission:

(A) Project numbered 83-N-334, Safeguards and security assessment improvements, Argonne National Laboratory-West, INEL, Idaho, $1,000,000, for a total authorization of $1,400,000;

(B) Project numbered 78-6-E, Energy Technology Engineering Center, facility modifications, Santa Susana, California, $5,000,000, for a total authorization of $32,800,000; and

(C) Project numbered 78-6-C, Safety Research Experiment Facilities, Argonne National Laboratory-West, INEL, Idaho, $1,100,000, for a total authorization of $44,300,000;

(4) Magnetic fusion:

(A) Project numbered 78-3-A, Mirror Fusion Test Facility-B, Lawrence Livermore National Laboratory, California, $30,000,000, for a total authorization of $229,058,000; and

(5) Supporting research:

(A) Project numbered 80-ES-11, Idaho Laboratory Facility, Idaho National Engineering Laboratory, Idaho, $562,000, for a total authorization of $17,500,000;

(B) Project numbered 81-E-325, Energy Technology Laboratory, Sandia National Laboratories, Albuquerque, New Mexico, $3,600,000, for a total authorization of $15,600,000;

(C) Project numbered 82-E-301, 300 area critical utilities upgrading, Richland, Washington, $2,200,000, for a total authorization of $9,400,000;

(D) Project numbered 82-E-302, Security Facility, Argonne National Laboratory, Argonne, Illinois, $1,800,000, for a total authorization of $6,500,000;

(E) Project numbered 83-E-308, Rehabilitate power systems, various locations, $5,988,000, for a total authorization of $11,988,000;

(F) Project numbered 83-E-309, Electronics Facility, Argonne National Laboratory, Argonne, Illinois, $3,150,000, for a total authorization of $5,350,000;

(G) Project numbered 83-E-310, Utility replacements and upgrade, Brookhaven National Laboratory, Upton, New York, $7,500,000, for a total authorization of $8,800,000; and

(H) Project numbered 83-E-311, Laboratory Emergency Response Center, Oak Ridge National Laboratory, Oak Ridge, Tennessee, $1,200,000; for a total authorization of $3,200,000;

NEW CONSTRUCTION

SEC. 5. Funds are hereby authorized to be appropriated for fiscal year 1984 in accordance with section 660 of the Department of Energy Organization Act for plant and capital equipment (including planning, construction, acquisition, and modification of facilities, including land acquisition) for the following new research and development projects:

(1) Fossil energy:

(A) Project numbered 84-FE-101, General plant projects for energy technology centers, various locations, $4,000,000;

(2) Energy conservation:

(A) Project numbered 84-CS-101, High Temperature Materials Laboratory, Oak Ridge National Laboratory, Oak Ridge, Tennessee, $9,000,000;

(3) Environment:

(A) Project numbered 84-ER-134, General plant projects, biological and environmental research, various locations, $1,000,000;

(4) General science:

(A) Project numbered 84-ER-133, Stanford linear collider, Stanford Linear Accelerator Center, Stanford, California, $35,000,000;

(B) Project numbered 84-ER-131, Accelerator improvement projects, high energy physics, various locations, $9,000,000;

(C) Project numbered 84-ER-132, General plant projects, high energy physics, various locations, $7,000,000;

(D) Project numbered 84-ER-121, Accelerator improvement projects, nuclear physics, various locations, $3,500,000;

(E) Project numbered 84-ER-122, General plant projects, nuclear physics, various locations, $2,200,000; and

(F) Project numbered 84-ER-110, University accelerator upgrade project at the University of Washington and Yale University, Seattle, Washington, and New Haven, Connecticut, $8,000,000;

(5) Supporting research:

(A) Project numbered 84-ER-111, Beam lines and support area construction, National Synchrotron Light Source, Brookhaven National Laboratory, Upton, New York, $2,500,000;

(B) Project numbered 84-ER-112, National Center for Advanced Materials, Lawrence Berkeley Laboratory, Berkeley, California, and Stanford Linear Accelerator Center, Stanford, California, $5,000,000;

(C) Project numbered 84-ER-141, Accelerator improvements and modifications, basic energy sciences, various locations, $1,260,000;

(D) Project numbered 84-ER-142, General plant projects, basic energy sciences, various locations, $400,000;

(E) Project numbered 84-ER-101, Rehabilitate old town area utilities, Lawrence Berkeley Laboratory, Berkeley, California, $500,000;

(F) Project numbered 84-ER-102, Cooling water facilities restoration, Oak Ridge Na-

tional Laboratory, Oak Ridge, Tennessee, $600,000;

(G) Project numbered 84-ER-103, Road repair, various locations, $2,000,000; and

(H) Project numbered 84-ER-104, Facilities support project, various locations, $2,500,000;

(6) Nuclear fission:

(A) Project numbered 84-N-102, Modifications to reactors, various locations, $1,000,000;

(B) Project numbered 84-N-101, General plant projects, nuclear energy, various locations, $4,000,000; and

(C) Project numbered 84-N-105, General plant projects, commerical nuclear waste management, Richland, Washington, $1,400,000;

(7) Magnetic fusion:

(A) Project numbered 84-ER-109, General plant projects, magnetic fusion, various locations, $6,500,000;

(8) Uranium enrichment activities:

(A) Project numbered 84-N-406, General plant projects, advanced isotope separation technology, various locations, $1,200,000; and

(B) Project numbered 84-N-407, Development/demonstration module (design only), Oak Ridge, Tennessee, $2,400,000.

GENERAL PROVISIONS RELATING TO AUTHORIZATIONS FOR FISCAL YEAR 1984

SEC. 6. (a) No funds are authorized under this Act for any purpose other than research, development, and demonstration.

(b) With respect to the programs for which funds are authorized under this Act, the provisions of this Act shall supersede the provisions of chapter 1 of subtitle A of title X of the Omnibus Budget Reconciliation Act of 1981 relating to the authorization of Department of Energy civilian research and development programs for fiscal year 1984.

(c) No funds are authorized to be appropriated pursuant to this Act, or pursuant to the provisions of chapter 1 of subtitle A of title X of the Omnibus Budget Reconciliation Act of 1981 which relate to fiscal year 1984, for the continuation or termination of the Clinch River Breeder Reactor project, except to such extent as may be specifically provided by legislation enacted after the date of the enactment of this Act.

Mr. WINN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. WINN. Mr. Chairman, my substitute proposes a comprehensive budget for the Department of Energy's research and development programs for fiscal year 1984. The members of our committee are faced with many difficult budgetary decisions this year, including the Nation's energy program. Despite the cost of crude oil today, or on any other specific date, our petroleum supplies are finite and we must look to the day when our Nation will be operating on other energy fuels. The Committee on Science and Technology supports energy programs which are moving forward to the development of those new technologies needed in the future.

However, with these long-range needs in mind we must also be aware of our present economic realities. We have demonstrated repeatedly that escalated spending takes its toll and produces expanding deficits. It is, therefore, fiscally prudent to consider an energy research and development authorization level which is adequate and compatible with our other pressing budgetary needs. Economic recovery, which is now escalating, is dependent on thoughtful spending for encouragement. This authorization bill exceeds the administration's request by $500 million and must be curtailed. One method is the judicious allocation of limited funds, depending on the apparently forgotten private sector for assistance and guidance.

The substitute legislation which I am offering today is consistent with those goals. This substitute carefully balances our energy needs against our budget limitations. We continue to support all of DOE's promising energy programs at responsible program levels.

My substitute calls for an increase of 9 percent in the administration's energy request for fiscal year 1984. This funding support is equal to the amount which was appropriated by Congress for fiscal year 1983.

There are several noteworthy features in my substitute which I wish to call to your attention. Specifically, my amendment calls for a solar program of $170 million for fiscal year 1984, more than double the administration's request. Also, I am recommending a $241 million fossil energy program. This is higher than DOE originally recommended in its request to the Office of Management and Budget. With this funding we will continue to support all of our promising fossil activities including coal liquefaction and gasification, fuel cells, MHD, direct combustion work, heat engines and heat recovery, environmental controls, and advanced gas and oil technology programs.

In the nuclear area we continue support for the high temperature gas reactor program, other fission and magnetic fusion programs as proposed by DOE, and uranium enrichment continuation and redirection.

In conservation, my proposal calls for a strong building and industrial conservation program. We also continue to support other activities such as the Energy Extension Service.

I think that this substitute represents a fair compromise in striving to meet our energy needs and fiscal responsibilities. In my opinion, this substitute to H.R. 2587 represents a prudent fiscal approach to energy research and development funding. Join me in this effort to curtail unjustified spending. I strongly solicit your support of my substitute.

Mr. FUQUA. Mr. Chairman, I rise in opposition to the substitute.

Mr. Chairman, I will not take the 5 minutes, but I want to point out that what we have here in this substitute really leaves a lot of unanswered questions. It takes almost $26 million out of basic research that the administration requested. It reduces the administration request for magnetic fusion by $10 million. It reduces the nuclear fusion request by some $30 million. The MHD program is decimated. The laboratory at Berkeley is reduced considerably. The Stanford linear collator is reduced, the high temperature gas cooling reactor is reduced by some $38 million.

The committee has worked its will and has agreed to these figures that we present to you, which is a prudent and a balanced approach to trying to solve our energy problems.

Mr. Chairman, I would urge my colleagues to vote against the substitute amendment.

Mr. CARNEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of the Winn substitute amendment to the Department of Energy authorization bill for fiscal year 1984. This amendment will allow our Nation to press forward with an aggressive energy research and development program consistent with our economic goals.

As my colleagues are fully aware, our Nation is currently experiencing a welcomed oil glut on the market. This has had many significant benefits, including the importation of much less oil than we did during the high point of the late 1970's.

It would be foolish, however, to be lulled into a false sense of complacency by our current energy conditions. After all, we should recognize that petroleum is a limited resource. We must move ahead and prepare for the day when our Nation and the world runs out of our precious oil supplies.

The Winn proposal will help us prepare for our energy future. This amendment would authorize a total of $2.97 billion for energy R&D activities for fiscal year 1984. This represents a balanced proposal, emphasizing the promise of both our nuclear and nonnuclear activities, such as the fossil, solar, geothermal, and energy conservation programs.

Of significant importance is the emphasis which the gentleman's amendment places on restoring funding for high priority energy programs. In fossil energy, this amendment would continue work in many attractive areas such as fuel cells, MHD, synthetic fuels, and environmental controls.

The solar energy program would include support for the all-promising solar options, including the MOD-5 large wind program—a program that shows great promise in developing a viable solar electric system for the near future. In addition, this amendment would also fund a strong solar photovoltaic and solar thermal effort, and a well-balanced biomass program. The same applies as well for our nuclear fission and fusion programs and our electric energy systems and energy storage programs.

I could go on and on, but the point I would like to make clear is that the Winn amendment would give our Nation a strong energy program. It would continue to support all high-priority programs underway during the last fiscal year. This amendment will help us insure that we will get the biggest energy bang for our Federal dollars.

Moreover, this amendment would do this in a responsible manner. It would not fund wasteful programs such as the appropriate technology activity, where we had funded such ill-warranted projects in the past as the solar doghouse or solar beeswax melter or the solar ice melter. These projects, as all my colleagues would most wholeheartedly agree, would not help us at all in solving the serious problems that we will face someday in the future. This amendment cuts out the wasteful projects, such as the AT (appropriate technology) program, and emphasizes those programs that will provide meaningful energy contributions.

Our Nation cannot live in the past. We must move forward with a responsible energy program. I believe that the Winn amendment will allow us to do this. I urge adoption of the substitute amendment.

Mr. Chairman, in addition to my previous comments in support of the Winn amendment, I would like to bring another issue to the attention of my colleagues: the Stirling engine development program.

As the ranking minority member for the Science and Technology Committee's Subcommittee on Transportation, Aviation, and Materials, I was extremely displeased when my colleagues added $26 million to the DOE budget to support a second gas turbine engine contractor of $12 million and for continuing the Stirling engine program toward MOD-II engine development and testing with $14 million.

I oppose the Stirling engine program because it is not supported by the "Big Three" automakers. Ford, GM, and Chrysler have stated to me in correspondence and telephone conversations that:

Compared to a gasoline engine, and in summary form, we [at Chrysler] believe that the Stirling Engine, while it has potential for lower fuel consumption in some applications would be larger than a gasoline engine; would be heavier than a gasoline engine; would be more expensive than a gasoline engine; and works best when running at a nearly constant speed.

For these reasons we believe the Stirling Engine has little application in passenger cars or light trucks (Chrysler, March 15, 1983).

During the GM Stirling program, it was recognized that the external combustion Stirling engine was inherently poorly suited for land vehicle propulsion and no substantial effort was directed toward developing the engine as a replacement for conventional passenger car engines. Currently, General Motors has no active research or development programs on Stirling engines, and the only efforts are those to maintain an awareness of the work which is being done by others (GM, March 22, 1983).

Ford received an invitation from Mechanical Technology, Inc.—the company performing the Stirling engine work—in May of 1982, to test the MOD-I engine. However, Ford stated:

While we would be interested in seeing any of the results that might be generated by such an evaluation, [the company] find[s] the current pressure for skilled personnel to be too great to engage in presenting such a program at this time. I trust that you will understand and appreciate our position.

Mr. Chairman, I must remind my colleagues that we have already spent $86 million on developing the MOD-I Stirling engine, and at least $40 million more is required to complete the program.

I do not wish to belabor this issue anymore; however, I hope that my colleagues recognize that if they support funding for Stirling engine development, they are throwing money at an automotive engine program that the automakers have no intention of using. If we do authorize the moneys for this program, I argue that this Government will have spent $126 million on building two new engines whose only function will be to serve in a future Smithsonian exhibit.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment of the gentleman from Kansas, the ranking member of the committee.

As the ranking minority member of the Subcommittee on Energy Research and Production which has a major share of the jurisdiction contained in this legislation. I am acutely aware that our subcommittee came in at 2.1 percent above the administration budget request and I found myself less than comfortable at that lack of fiscal restraint.

Unfortunately other subcommittees having parts of the bill came in at 20 and 27 percent over the budget request. The result is a bill which must be recognized as a budget buster.

There are several areas in which there was general agreement within the committee that there was a need to continue ongoing research in valuable technologies which the administration had proposed for deletion in the coming year. However, what we could not find, was agreement on areas to cut or reduce to make up for those additions.

Both the committee and the House are faced with difficult decisions in developing an effective national energy program. The administration request reflected their philosophy of emphasizing long-term, high-risk programs which offer high payoff if they are successful. In addition, the administration requested significant increases for basic and fundamental research programs in nuclear physics, and high energy physics. However, there was an attendant reduction in support for solar, conservation, and fossil programs to hold total funding below the level of effort in fiscal year 1983.

It is obvious that energy research and development is highly valuable to our Nation. But, we cannot ignore the fact that our energy problems and our economic problems are interconnected and cannot be separated from one another. We must not continue to approach every problem with the attitude that if we spend unlimited amounts we will eventually solve the problem. Not only are there many problems which have already proven themselves to be beyond solution regardless of the amounts spent, we have produced near economic disaster in the process.

Just to illustrate how large our national debt is already let me point out that if we balanced the budget today and immediately started to pay off the national debt at the rate of $1 million per day we would finally make the last payment in 4792.

So you see why we feel that a balance must be maintained between the public interest, on the one hand, in an effective energy research and development program, and on the other hand, in an intelligent and supportable funding level for that program in the light of current economic reality.

Mr. Chairman, the Winn amendment represents a clear and carefully drafted alternative to the committee bill. It continues essential programs, protects needed research, and continues funding at the fiscal year 1983 levels. While the Winn substitute is above the budget request, it represents a safe, sane, and supportable approach to our energy research and development requirements and I urge its adoption.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Kansas (Mr. WINN).

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WINN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 140, noes 228, not voting 64, as follows:

[Roll No. 114]

□ 1750

Mr. BONER of Tennessee and Mr. LEVITAS changed their votes from "aye" to "no."

Mrs. BYRON changed her vote from "no" to "aye."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. RANGEL

Mr. RANGEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RANGEL:

On page 2, line 16, strike "$425,700,000" and insert "$424,700,000".

On page 2, line 24, strike "$318,569,000" and insert "$316,569,000".

On page 3, line 7, strike "$479,750,000" and insert "$478,750,000".

On page 9, line 20, strike "$8,000,000" and insert "$7,000,000".

On page 10, after line 5, insert the following:

"(C) Project numbered 84-ER-115. National Center for Chemical Research, Columbia University, New York, New York "$5,000,000";

and redesignate the following projects (C)-(H) with the letters (D)-(I).

Mr. Chairman, I have discussed this redirection of $5 million from the authorization with the chairman and other members of the committee. What it would do is to create a construction of a National Center for Chemical Research to be built at Columbia University.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. RANGEL. I yield to the gentleman from Florida, the chairman of the committee.

Mr. FUQUA. Mr. Chairman, I thank the gentleman for yielding.

The gentleman has discussed that with me and I have no objection to the redirection in the moneys for the laboratory at Columbia University.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. RANGEL. I yield to the gentleman from New York.

Mr. GREEN. I thank the gentleman for yielding.

I commend the gentleman for offering this amendment. The Columbia laboratory is doing some important work in the energy field, in lasers, and conservation. It needs this modern facility and this is a very important amendment and I hope it is adopted unanimously.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

□ 1800

Mr. Chairman, we just a few minutes ago approved a $5 million raid on the Treasury. This is another $5 million raid on the Treasury. It was subjected to no hearings before the committee. We had no information to work with before the bill came to the floor, and I would certainly hope that the membership would not compound what we did a few minutes ago by voting for this amendment, which just doubles the amount that is being raided.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. RANGEL).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman. I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 215, noes 150, not voting 67, as follows:

[Roll No. 115]

□ 1810

Mr. WHITTEN changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BONIOR of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2587) to authorize appropriations to the Department of Energy for civilian research and development programs for the fiscal year 1984, pursuant to House Resolution 185, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. WALKER. I am, in its present form, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. WALKER moves to recommit the bill, H.R. 2587, to the Committee on Science and Technology with instructions not to report the same back until the committee has held hearings on the impact on the Department of Energy basic research programs of establishing new research laboratories as called for in this bill as amended at Columbia University and the Catholic University of America.

The SPEAKER. The gentleman from Pennsylvania (Mr. WALKER) is recognized for 5 minutes in support of the motion to recommit.

Mr. WALKER. Mr. Speaker, I will not use the entire 5 minutes. I will simply say that as to the money we have now appropriated for Columbia University and the Catholic University of America, the motion to recommit simply says that the committee shall hold hearings before that money goes forth.

Mr. Speaker, I urge a vote of aye on the motion to recommit so that the committee can at least work its will on these matters which the House has decided are meritorious funding.

□ 1820

The SPEAKER. The gentleman from California (Mr. BROWN) is recognized for 5 minutes in opposition to the motion to recommit.

Mr. BROWN of California. Mr. Speaker, I rise in opposition to the motion to recommit.

As usual, the gentleman from Pennsylvania has presented a very interesting and unusual twist to this motion; but basically it is merely another effort to reverse the action taken earlier today.

I urge a "no" vote.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 230, nays 132, not voting 70, as follows:

[Roll No. 116]

□ 1830

The Clerk announced the following pairs:

On this vote:

Mr. Addabbo for, with Mr. Hance against.

Mr. Dwyer of New Jersey for, with Mr. Robert F. Smith against.

Mr. Berman for, with Mr. Cheney against.

Mr. Levine of California for, with Mr. Corcoran against.

Mr. Durbin for, with Mr. Thomas of California against.

Mr. Jones of Oklahoma for, with Mr. Whitehurst against.

Mr. Downey of New York for, with Mr. Badham against.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. LUNDINE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENGROSSMENT H.R. 2587, DEPARTMENT OF ENERGY CIVILIAN RESEARCH AND DEVELOPMENT AUTHORIZATION ACT FOR FISCAL YEAR 1984

Mr. LUNDINE. Mr. Speaker, I ask unanimous consent that in the engrossment of the bill, H.R. 2587, Department of Energy Civilian Research and Development Authorization Act for Fiscal Year 1984, the Clerk be given the authority to make the necessary technical and conforming corrections.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION FOR COMMITTEE ON VETERANS' AFFAIRS TO HAVE UNTIL 3 P.M. ON FRIDAY MAY 13, 1983, TO FILE SUNDRY REPORTS

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the Committee on Veterans' Affairs have until 3 p.m. on Friday, May 13, 1983, to file reports on the following bills: H.R. 2355, Emergency Vietnam Veterans' Jobs Training Act of 1983; H.R. 2948, Veterans' Housing Benefit Amendments of 1983; H.R. 2920, Veterans' Administration Health Program Amendments of 1983; and H.R. 2936, Expansion of the Board of Veterans' Appeals.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

PERMISSION FOR COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS TO HAVE UNTIL MIDNIGHT TOMORROW TO FILE REPORT ON H.R. 1

Mr. GONZALEZ. Mr. Speaker, I ask unanimous consent that the Committee on Banking, Finance and Urban Affairs may have until midnight tomorrow, May 13, 1983, to file a report to accompany H.R. 1.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. MARTIN of North Carolina. Mr. Speaker, reserving the right to object,

I take this reservation for the purpose of inquiring whether this request has been cleared with the minority leadership of that same committee.

Mr. GONZALEZ. Will the gentleman yield?

Mr. MARTIN of North Carolina. I yield to the gentleman from Texas.

Mr. GONZALEZ. I would answer the gentleman yes. I apologize for not mentioning that this has been cleared with the minority.

Mr. MARTIN of North Carolina. And they are in agreement with the request for filing the report?

Mr. GONZALEZ. Yes; they accede.

Mr. MARTIN of North Carolina. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON AGRICULTURE TO HAVE UNTIL MIDNIGHT SATURDAY, MAY 14, 1983, TO FILE REPORT ON H.R. 1590, EMERGENCY FOOD ASSISTANCE AND COMMODITY DISTRIBUTION ACT OF 1983

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may have until midnight Saturday, May 14, 1983, to file a report on the bill, H.R. 1590, the Emergency Food Assistance and Commodity Distribution Act of 1983.

This has been cleared with the minority and there is no objection.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. MARTIN of North Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. Speaker, I request permission to address the House for the purpose of inquiring about the legislative program for the following week.

Mr. FOLEY. Mr. Chairman, will the distinguished acting Republican leader yield to me?

Mr. MARTIN of North Carolina. I will certainly be delighted to yield to the distinguished majority whip.

Mr. FOLEY. Mr. Speaker, we have concluded the business for this week as well as for the day.

When I have an opportunity, I shall ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

We do not plan any legislative business on Monday, but there is an opportunity on Monday for a pro forma session which will also include opportunities for committees to file reports prior to the 15th of May.

On Tuesday the House will meet at noon and consider bills on the private and consent calendars.

There will be eight bills considered under suspension of the rules. Recorded votes on these suspensions will be postponed until after all such suspensions.

The bills are:

H.R. 2785, FIFRA (Federal Insecticide, Fungicide and Rodenticide) authorization;

H.R. 2733, Critical Agricultural Materials Act;

H.J. Res. 265, to extend certain housing programs;

H.R. 1416, SEC authorizations;

H.R. 2681, Securities and Exchange Act amendments;

H.R. 2936, increase number of members on Board of Veterans' Appeals;

H.R. 2602, authorizations for Customs Service, International Trade Commission, and U.S. Trade Representative; and

H.R. 2973, to repeal income tax withholding on dividends and interest.

The House will meet on Wednesday and the balance of the week at 10 a.m. to consider H.R. 2990, the debt limit extension, subject to a rule being granted; and H.R. 2969, the Defense Department authorizations for fiscal year 1984.

□ 1840

The House is not expected to have business of an important nature next Friday, when Members can probably be assured that there will either be a pro forma session on Friday or no session on that day.

Mr. MARTIN of North Carolina. I appreciate the explanation of the gentleman from Washington. I would put to him a couple of additional questions so that Members might be advised.

First of all, am I correct in understanding that beginning next week we will go on a schedule that will run through the balance of this first session, whereby Monday and Tuesday sessions will begin at noon and sessions of remaining days in the week, Wednesday, Thursday, Friday, beginning at 10 a.m.?

Mr. FOLEY. The gentleman is correct. Under the provisions of existing House rules after the 15th of May, the House will meet at noon on Monday and Tuesday and at 10 a.m. on Wednesday, Thursday, and Friday and that will begin next week.

Mr. MARTIN of North Carolina. I thank the gentleman for that clarification so the Members can be advised. Also with respect to the Defense Department authorization would it be correct to interpret from what the gentleman said a moment ago that if we do not complete that on Wednesday that we would continue that on Thursday or has that been resolved?

Mr. FOLEY. If we do not complete the Defense Department authorization bill on Wednesday, it will be scheduled to the following week.

Mr. MARTIN of North Carolina. Scheduled to the following week?

Mr. FOLEY. The following week.

Mr. MARTIN of North Carolina. I appreciate the clarification from the gentleman. I have no further questions and withdraw my reservation of objection.

ADJOURNMENT TO MONDAY, MAY 16, 1983

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. (Mr. HOYER). Is there objection to the request of the gentleman from Washington?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent to dispense with the business in order under the Calendar Wednesday rule on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

TRANSFERRING CALL OF CONSENT CALENDAR ON MONDAY NEXT TO TUESDAY, MAY 17, 1983

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the call of the Consent Calendar on Monday next be transferred to Tuesday, May 17, 1983.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 100

Mr. McGRATH. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 100.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

THE MX MISSILE

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. Speaker, this is the week that President Reagan is mounting an all-out press for deployment of the MX

missile. I wonder if he read James J. Kilpatrick's recent column on the subject. Correctly, Kilpatrick points out that the Scowcroft Commission report does not depend principally upon military reasons as justification for deploying the MX missile. Rather, the MX is said to be needed chiefly to convince the Soviet Union of our toughness and willingness to fight.

At a cost of $17 billion, the new plan for MX deployment becomes a very expensive smoke signal to the Kremlin.

The article follows:

DOUBTS NEED FOR MISSILES

(By James J. Kilpatrick)

WASHINGTON.—This month's report from the President's Commission on Strategic Forces, headed by Gen. Brent Scowcroft, provides a model for other commissions and task forces to aspire to. The report is brief; it is well-written; it argues cogently for the recommendations put forward.

But in the end, the report persuades but does not convince. The principal recommendation is that 100 of the giant (100-ton) MX missiles be deployed in hardened Minuteman silos, and that we then proceed methodically with a new concept based upon small (30-ton) missiles with single warheads.

The commission advances various arguments that reflect the thinking of military professionals—for example, that a shelter containing only a single warhead "would present a far less attractive target than would be the case with a silo containing a large missile with many warheads." The proposed small missiles could be deployed flexibly, perhaps on mobile launchers at existing Army reservations. Other arguments, less impressive, have to do with projected costs. The commission believes that over the next five years its program might cost $8 billion less than the alternative missile deployment the administration has proposed.

The principal justification for the recommendations, however, rests on neither military nor fiscal considerations. The justification is in large part psychological: The commission believes that without such a program, Soviet leaders will perceive the United States as a weak and timid nation that would be unwilling, in the crunch, to fight back.

Perception is everything. At bottom, our policy is a policy of deterrence. Our strategic forces, the commission reasonably contends, must be kept at a level that will convince the Soviets "that the West has the military strength and political will to resist aggression; and that, if they should have no doubt that we can and would respond until we have so damaged the power of the Soviet state that they will unmistakably be far worse off than if they had never begun.

"In order for deterrence to be effective we must not merely have weapons, we must be perceived to be able, and prepared, if necessary, to use them effectively against the key elements of Soviet power. Deterrence is not an abstract notion amenable to simple quantification. Still less is it a mirror image of what would deter ourselves. Deterrence is a set of beliefs in the minds of the Soviet leaders, given their own values and attitudes, about our capabilities and our will."

This is the heart of the argument: How much is enough? The United States now has deployed 1,047 missile launchers with about 2,150 warheads. We have 34 submarines carrying 568 missiles with about 5,000 warheads. We have 270 bombers capable of delivering hundreds of additional missiles and warheads.

The combined destructive capacity of this strategic triad is beyond the imagination of man. The puny little atomic bomb we dropped upon Hiroshima in 1945 obliterated much of a city and killed nearly 100,000 persons in an instant. Today's warheads are marvelously more efficient. As the commission gravely observes, today's weapons have changed the nature of warfare. They have imbued the rivalries of nations "with peril unprecedented in human history."

How is this peril to be contained? The answer is unknowable, precisely for the reasons the commission itself advances. We cannot know, we can only surmise, how the American character is perceived in the Kremlin. My own thought is that our existing strategic forces, subject to modest efforts at modernization, are enough. If the Soviets ever should launch a massive nuclear attack, these forces are quite sufficient to wreak incredible devastation in return.

The one plausible way in which the peril might be contained is by steadfast pursuit of a multilateral, verifiable agreement on arms reduction. To its credit, the Skowcroft commission repeatedly urges such an effort. But it seems to me "illusory," to borrow a word from the report, to suppose that our development of one more missile system will do much to alter the Soviet perception of American will.

INTERNATIONAL CURRENCY EXCHANGE RATES

(Mr. TRAXLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. Speaker, I, too, want to extend my sincere best wishes for the speedy recovery of our good friend and colleague, the minority leader, Mr. MICHEL. We sincerely miss him.

Mr. Speaker, today the gentleman from Indiana (Mr. HILLIS) and I are introducing a resolution urging the President to provide for greater consideration of international currency exchange rates at the Williamsburg Summit.

There can be no question that one major problem that we are having in international trade are unrealistic exchange rates which disrupt the fair sale price of products between countries. If we are to provide a solid economic program, we must address this international problem, and there could be no better place to start than at Williamsburg.

I request that the text of our resolution be printed in the RECORD at this point.

H. RES. 194

Resolution urging the President to provide for greater consideration of international currency exchange rates at the Williamsburg Summit

Whereas the continuing misalinement of major currencies with the United States dollar is a principal factor in undermining United States trade competitiveness and in depressing the United States economy over the past two years; and

Whereas the consequence has been the loss of many hundreds of thousands of jobs, and the severe dislocation in many areas of the United States economy; and

Whereas persisting disparities in interest rate levels between the United States and other key currency countries have contributed heavily to these ongoing exchange rate misalinements; and

Whereas both these maladjustments result in major part from the inadequate coordination and harmonization of general economic policies among the United States and other key currency countries; and

Whereas European and Japanese officials have indicated a desire to discuss remedies for these problems; and

Whereas the forthcoming Williamsburg Summit conference at the end of May will bring together the leaders of key currency countries; Now, therefore, be it

Resolved, That is is the sense of the House of Representatives that: First, the President should arrange to have included among the highest priority themes of the Williamsburg Summit, efforts to seek a consensus among the participants on the need to improve the coordination of economic policies among Summit countries, aimed at reducing disparities in economic policies, interest rates, and exchange rates between the major industrial nations; and at hastening a healthy and sustained recovery of industrial economies and of international trade;

Second, such consensus should include announcement of a mechanism or procedure for such consultation on a close and continuing basis;

Third, such consensus should also include provision for an early meeting of Summit country Ministers of Finance and the United States Secretary of the Treasury to consider steps to achieve better alinement between the interest rates and major currencies and to make public the objective of such steps; and

Fourth, the President should arrange, in conjunction with the Williamsburg Summit, bilateral discussions with the Prime Minister of Japan to initiate special efforts to bring about consensus and joint action to achieve the earliest possible further realinement of the yen and dollar exchange rates.

NATIONAL HOME CARE WEEK

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. Speaker, I am very pleased today to be joined by Representatives CLAUDE PEPPER and BARBER CONABLE in introducing a resolution to designate the week beginning November 27, 1983, as "National Home Care Week." Last year, Congress approved a similar resolution which we sponsored, and I look forward to the adoption of this measure by the House. Senator ORRIN HATCH has introduced a similar measure in the Senate.

The operations and services provided by the thousands of home care agencies are an integral part of our Nation's health care delivery system. The concept of care made available through these operations recognize the individual needs of each patient

and provides a valuable and respected alternative to institutionalization. For many patients in need of health care treatment, an institutional environment may be warranted. However, for that segment of the patient population which can be properly cared for outside the hospital or nursing home setting, effective alternatives must be offered. In this light, home care agencies have addressed this need.

Since the passage of Federal programs which allowed for patients to receive health care in-home, home care agencies have increased from less than 500 to more than 3,000. The services provided by these groups effectively prevent the unnecessary institutionalization of many older Americans.

In developing a response to the health care problems of our Nation's health care system, the expected growth in our Nation's elderly population must be fully recognized. It is projected that by the year 2000 there will be almost 32 million persons over the age of 65. Certainly, the growth in the elderly population will place greater financial pressures on Federal health care programs such as medicare and medicaid. Therefore, we must encourage the development of health care alternatives to meet the needs of the expanding elderly population and provide needed cost savings in the health care budget.

The expansion of home heath care benefits by Congress is an expression of support for the home health care approach. The resolution I am introducing today is a very appropriate way of recognizing the tremendous benefits of home care. The assistance home care groups have provided to older people in our society deserves the national attention which can be provided through the adoption of this resolution. I urge my colleagues to support this resolution.

Following is the text of this resolution, and a copy of a letter I received from the National Association of Home Care expressing its support for this measure.

H.J. RES. 268

Joint resolution to designate the week beginning November 27, 1983, as "National Home Health Care Week"

Whereas organized home health care services to the elderly and disabled have existed in this country since the last quarter of the eighteenth century;

Whereas home health care is recognized as an effective and economical alternative to unnecessary institutionalization;

Whereas caring for the ill and disabled in their homes places emphasis on the dignity and independence of the individual receiving these services;

Whereas since the enactment of the medicare program including skilled nursing services, physical therapy, speech therapy, social services, occupational therapy, and home health aide services, the number of home health agencies providing these services has increased from less than five hundred to more than three thousand; and

Whereas many private and charitable organizations provide these and similar services to millions of patients each year preventing, postponing, and limiting the need for institutionalization: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning November 27, 1983, hereby is designated "National Home Health Care Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

ORDER OF BUSINESS

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that my special order precede all others today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

ANTHONY ALVARADO—NEW YORK CITY PUBLIC SCHOOLS CHANCELLOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GARCIA) is recognized for 60 minutes.

Mr. GARCIA. Mr. Speaker, it is my privilege to call this special order on behalf of the New York City public school system's newly appointed chancellor, Anthony Alvarado.

Mr. Alvarado has the distinction of being the first minority member ever to serve as chancellor of the country's largest school system. Born in the South Bronx, with a bachelor of arts and masters degree from Fordham University, he began teaching in New York's public schools in 1965 and has remained in the system for virtually his entire career. He brings to his newest role a decade of experience as superintendent of East Harlem's Community School District No. 4.

The challenges Mr. Alvarado faces during this period of nationwide concern for the tide of mediocrity in education—as reported by the National Commission on Excellence in Education—are many. There is, for example, a 45-percent dropout rate in New York public schools today. If Tony's tenure as superintendent of his East Harlem district is any indication, however, we can expect creative, innovative approaches to enhancing public school education in New York.

Community school district No. 4, with 14,000 predominately black and Hispanic students, is one of the poorest in New York City. Prior to Tony's appointment as superintendent in 1973, the district ranked last among the city's 32 public school districts. Today it ranks 15th. Between 1978 and 1982 the students able to read at or above grade level increased from 25 to 48 percent. For this achievement Tony was awarded $5,000 from the fund for the city of New York, which honors outstanding city officials. Further, while only 17 students matriculated at high schools for gifted students in 1973, in 1982 300 students enrolled at these schools.

Mr. Alvarado believes his primary objective as an educator is to focus resources on people in the schools—the teachers and students. He feels that they must be held to higher standards of performance. As superintendent he has shown a determination to commit funds for programs that reward success and enhance the expectations of students and faculty alike.

Such innovative programs include "minischools," or "schools within schools" that offer alternative curriculums to match students' special needs and talents; and "open city programs" where students take field trips to museums and cultural events throughout the New York area. He has also allowed students to choose to attend the junior high schools they prefer, instilling needed competition among schools to enroll talented students. Creative methods such as these have attracted 400 students from other neighborhoods to community school district No. 4.

Tony's achievements as superintendent have not passed unnoticed in the New York area. David Rogers, professor at New York University's Graduate School of Business Administration, says of district No. 4:

What has happened there is extraordinary . . . There are some other districts doing good things, but his imaginativeness in the curriculum cannot be topped. His district has to be one of the shining lights of the City. It's an example of what is possible in educating poor, very poor children.

I congratulate the board of education for its selection of New York City's public school chancellor. I offer Mr. Alvarado my support as he implements policies to improve the quality of education throughout the city. In this era of changing technologies and increasing foreign challenge to America's economic viability, the education our students receive is critical. As chancellor of the Nation's largest school system, Mr. Alvarado has an opportunity to effect reform and meet these challenges. I hope educators throughout the country will look to his administration for ideas and guidance. The resurgence of the public schools in East Harlem is proof that quality education can be provided through creative policies and strong leadership.

● Mr. ACKERMAN. Mr. Speaker, I rise today to congratulate an outstanding educator, Mr. Anthony Alvarado, the recently appointed chancellor of the Board of Education of the City of New York.

Recently, in this body, our attention has been riveted on the instruction of-

fered our Nation's children and the great need to revitalize the educational system in this country. With this perspective, we can all recognize that the task before Mr. Alvarado, as the chancellor of a large and diversified school system, is monumental.

But, if there is anyone who can turn young minds around, even within the eclectic milieu of New York City, Mr. Alvarado can.

Over the years, Mr. Alvarado has forged a reputation as an educational innovator who can get things done. His broad-ranging experience covers every level of the educational process, from administering the East Harlem Preparatory School's experimental early childhood program, to helping students in the areas of guidance and financial aid at New York University and the City University of New York.

In particular, I would like to cite his outstanding achievements as the district superintendent for community school board 4 in East Harlem.

When Mr. Alvarado began his tenure in 1973, East Harlem schools suffered from the lowest reading level in the New York City system, with only 18 percent of the students reading at or above grade level. To combat this crippling deficiency—a deficiency which may frustrate a child's chances of ever attaining higher educational goals—Mr. Alvarado instituted a new instructional plan to involve the entire district in improving the children's reading comprehension. Last year, the results of his efforts were resounding: Over 45 percent of this East Harlem school district's students were reading at or above grade level, putting them in 15th place in the city's 32 districts.

On top of this, he was able to successfully compete for national and local funds, winning more for his district than any other educator on the east coast. With these funds he initiated programs which battled the problems of poor attendance and disinterest in school. To retain students' interest and attendance, Mr. Alvarado established specialized alternative schools: The Academy of Environmental Science, the Isaac Newton School of Math and Science, and the East Harlem School of Performing Arts.

Offering quality education to all students, he initiated a national model program for bilingual education, expanded programs for the talented and gifted, and organized a program to allow special education students to continue learning with their peers in a regular classroom setting.

It would be possible to go on and on—describing the innovations Mr. Alvarado implemented would fill many pages. Although I cannot list all of the accomplishments, there is one other program he initiated in East Harlem which I would like to mention.

Mr. Alvarado was a trendsetter when it came to computer, math, and science literacy. As the district superintendent, he was one of the first administrators to set computer literacy standards for teachers. Plus, he obtained funding from corporations to bolster science and math programs.

Mr. Alvarado's goals and methods set an example from which all educators can learn. He has proven himself capable of tackling some of the hardest problems facing a large city school system—reading comprehension, English as a second language, school attendance, and math and science literacy.

Although only 40, Mr. Alvarado's accomplishments belie his years. I wish him good fortune in his job, as he seeks to enhance the learning opportunities in the New York City school system.●

● Mr. TOWNS. Mr. Speaker, an event of major significance for the future of education in the city of New York, and for the Nation as well, has taken place with the appointment of Anthony Alvarado as the new chancellor of the city school system.

Mr. Alvarado is the city's first Hispanic chancellor and will be charged with managing the unique problems of a school system with a budget of $3.4 billion and a student population of almost 1 million. He is fully qualified for such a task. A native New Yorker, Mr. Alvarado, joined the city schools as a teacher in 1965 and with the exception of a brief stint at the city university, has remained in the system. Ten years ago, when Mr. Alvarado became the superintendent of community school district 4, it had the lowest reading scores in the city. Today, the district ranks 15 out of 32. The number of gifted students sent to the city's high schools has risen from 17 to 300, and the number of pupils reading at or above grade level rose from 25 percent in 1979 to 48 percent in 1982. These are significant accomplishments for a superintendent in a school system with a 45-percent high school dropout rate.

Statistics and figures only tell part of the story of Mr. Alvarado's success. First and foremost he has been an innovator creating "mini-schools" specializing studies in a particular area, and dropping the administrative mindset that treats teachers and children as objects to be managed rather than inspired. He carries these ideas to the chancellorship. His philosophy: "The chancellor has to have sympathy for the people who are locked into school buildings, two generations who don't always understand each other—kids and adults, pupils and teachers. The real test of any school system, after all, is what happens to its charges after they enter the amazing, unfamiliar world of kindergarten. With luck, they will emerge 13 years later, their knowledge increased, their wonder at the world unharmed."

Mr. Speaker, New York has often been at the forefront of social change, creating the programs and ideas that have made this a stronger, more just, society. I am confident that under Mr. Alvarado's stewardship New York City will be a pathfinder for national education excellence at a time when report after report is raising grave questions about the flawed system of education in this country. I am particularly pleased that he brings his strong cultural background to a school where blacks and Hispanics account for 70 percent of the student population. I am sure we can all join in wishing Mr. Alvarado the best of luck in meeting his new responsibilities.●

● Mr. GREEN. Mr. Speaker, I rise to extend best wishes to Anthony J. Alvarado, the new school chancellor of New York City, and to express my interest in the future of the city's public education system. As the new chancellor, Mr. Alvarado faces many challenges in improving the quality of public education. I know that under his leadership, the city's schools will offer quality education to enhance the academic standards and general education of New York City public school students.●

● Mr. ADDABBO. Mr. Speaker, I would like to share my enthusiasm about the appointment of Anthony Alvarado as chancellor of the New York City public schools with my colleagues.

Chancellor Alvarado, a veteran of the New York City school system, has proven to be a competent educator and a creative and dedicated administrator. He is coming to this position at a time when our Nation's educational systems are under scrutiny and criticism, and the very future of our country is considered to be at stake.

New York City poses unique challenges to Mr. Alvarado. Its students speak over a hundred different languages, have varied social and cultural backgrounds, and sometimes face poverty. The sheer size of the school system would daunt most administrators.

Yet, Anthony Alvarado has proved that he is tenacious and that he believes in the students he serves. His efforts as a district superintendent in East Harlem have shown us that he can make schools work and can reverse a trend of discouragement and hopelessness. Everyone believed that his schools were deterioriating. They are now "magnet" schools for the area and many of their graduates go on to high schools for gifted students.

Anthony Alvarado's appointment is especially appropriate for these times. He is a "can-do" administrator who is coming to office at a time when everyone believes that our city's schools are "no can do." I offer Mr. Alvarado my

good wishes, my assistance, and my heartiest congratulations.●

● Mr. RANGEL. Mr. Speaker, I rise today in support of the special order introduced by my colleague, ROBERT GARCIA for Tony Alvarado.

Tony Alvarado is a man dedicated to the improvement of public education in a city that is responsible for more than 1 million students—more than any education system in the country. His accomplishments reflect this dedication more than any remarks I might extend here today.

As school superintendent of district 4 in New York City, Tony Alvarado established minischools within neighborhood schools. These schools—which focus on a single area such as art, dance, and music—became so popular that children were attracted from outside district 4. Mr. Alvarado carried this concept of drawing children back to school one step further. Incoming seventh graders were permitted to choose the junior high school they would like to attend. The positive results were twofold: First, the junior high schools competed among themselves to attract children. Second, the children's interest in the schools they attended was increased. Education is slowly but surely becoming popular again among the youth of New York.

Most significantly, basic education skills were improved in district 4. In 1979, only 25 percent of the district's students could read at or above grade level. By 1982, Mr. Alvarado's leadership caused that figure to rise to 48 percent. Furthermore, 300 students from the district attended city schools for gifted children in 1982. The number was a dismal 17 in 1973.

Mr. Speaker, these accomplishments are a model for all systems of public education. I have full confidence that Tony Alvarado's savvy innovations will raise the quality of education for all children in New York. For this reason, I fully support this order in his honor.●

● Mr. BIAGGI. Mr. Speaker, as both a member of the New York congressional delegation and the ranking New York member of the House Education and Labor Committee, I am honored to join in this special order paying tribute to the distinguished new chancellor of the New York City school system—Anthony Alvarado.

There are few more challenging jobs in public life than the one which Mr. Alvarado has assumed. Anthony Alvarado was, prior to the position he now holds, a most successful district superintendent in the East Harlem section of New York. He impressed parents and students alike with his innovative approach to education and his proudest achievement had to be the significant increases in reading scores registered by the students in his district.

Anthony Alvarado assumes his job as head of a school system with more than 1 million students at a time when our education system has been under special scrutiny. It appears that years of abandoning more traditional educational priorities in our elementary and secondary schools has produced not only a deficient education system—but inferior quality students. Our Nation, once the leader in providing education in basic courses such as math and science, has fallen conspicuously behind other nations forcing this Congress to pass as its very first bill a new proposal providing millions of new dollars to train and retrain teachers for math and science instruction.

The recent report of a national education commission delivered a scathing indictment on the quality of American education. Their recommendations need to be heeded by all responsible officials in American education.

There are many impressive things one could say about Anthony Alvarado but perhaps the most relevant is the man has a passion for the education system—and a commitment to improving its quality. He was the overwhelming choice of the New York City Board of Education, and his appointment has received strong support from the people of New York City.

I know that Anthony's considerable talents and boundless energy will be most effectively utilized in his new position as chancellor. He has been associated with the New York City school system since 1965 when he began as an English teacher. He, therefore, is very familiar with the system and this should make for a smooth transition. Anthony Alvarado, as a leading member of New York's growing Hispanic community, is keenly aware of the special sensitivity affecting minority students in this school system. Yet Anthony Alvarado is committed to two universal principles—performance and success for all students—and this should make for a better New York City school system.●

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

NATIONAL INDUSTRIAL STRATEGY ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LUNDINE) is recognized for 60 minutes.

Mr. LUNDINE. I thank the Speaker.

Mr. Speaker, today with my colleagues, the gentleman from Michigan (Mr. BONIOR), the gentleman from Missouri (Mr. GEPHARDT), the gentleman from Colorado (Mr. WIRTH), and the distinguished chairman of the Rules Committee, the gentleman from Florida, Senator PEPPER, I have introduced the National Industrial Strategy Act.

America is at a crossroads. Either we go on as we are with disinvestment in industry and dislocation of workers or we take a different path. This new route would be characterized by more stable macroeconomic policy and the adoption of an industrial strategy supported by a series of policies on trade, investment, research and development, and human resources.

Today, we are introducing the National Industrial Strategy Act, which is the most advanced legislative concept yet devised for the revitalization of American industry. This bill establishes an Economic Cooperation Council to develop a revitalization strategy and a National Industrial Development Bank to provide capital to make the strategy work.

At the outset, I would like to thank my partner in this venture, Congressman DAVE BONIOR of Michigan, for his commitment and cooperation. This legislation has directly evolved from the National Industrial Development Board bill DAVE and I introduced in the last Congress and have reintroduced in the current session and which is supported by more than 20 of our colleagues. DAVE's patience and positive approach have contributed enormously to this effort, which I believe is the most advanced industrial policy concept yet put forth in the form of legislation.

I would also like to express my sincere thanks to Congressman TIM WIRTH of Colorado and DICK GEPHARDT of Missouri for their leadership in producing "Rebuilding the Road to Opportunity: A Democratic Direction for the 80's" which set an overall framework for this legislation. Their analysis of this bill through its several drafts has improved its provisions substantially. I am proud to have them both as sponsors of this bill and benefit greatly from their counsel and cooperation. I also want to sincerely thank GILLIS LONG for encouraging the kind of coalition building that has produced this National Industrial Strategy Act.

Many other Members of this House have helped the current effort: LEE HAMILTON and JOHN SEIBERLING, who believe in labor-management cooperation; JOE MINISH and CLAUDE PEPPER, who took the leadership on development banks; JOHN LAFALCE, FREDDIE ST GERMAIN, and Speaker O'NEILL, who have encouraged us to go forward with this project.

Finally, I would like to express my thanks to many advisers outside of the Congress who contributed ideas and

analysis to this legislation. Ira Magaziner, Michael Maccoby, Ron Muller, and Harvey Brooks particularly have been of enormous assistance. We have also benefited from the confidential criticism by both business and labor leaders.

What is meant by an industrial strategy and why is it needed? This bill is based on the belief that we need healthy industry in this country; that we must develop a consensus between business, labor, Government and others in the public as to an overall strategy for industrial revitalization; and that some Government funding will be necessary to leverage the private capital available to rebuild American industry.

In the last 3½ years, the United States has lost over 3 million jobs in manufacturing alone. Old factories sit like tombstones in the graveyard of industrial America. Some of this loss is cyclical, and as the longed-for economic recovery actually occurs, some people will go back to work, some plants will reopen, some machines will again be turning out American goods. But we must face the facts. Some of our problems are structural and long lasting. Some of these people will never return to their old jobs, some of those factories will never reopen. This is true not only of the steel industry, but also of the semiconductor, machine tool, and airplane industries which are all facing severe structural readjustments.

We hear a great deal these days about the information industry and how the solution to our industrial problems is in high-tech. The whole idea behind an industrial strategy, in fact, is founded on the idea that we need to apply more technology to our industries and to develop complete new industries. However, as important as the information and other high-tech industries are, they are not a total solution to all of our problems. There is simply no way that this sector can employ all of the people who were previously involved in steel and auto making and the other basic industries that have made America great.

Others say that as a postindustrial society, we will survive on services. I like the comment by Mark Twain that "we cannot get along just doing one another's wash." Without a strong industrial base, we will not have a strong service sector. As with the United Kingdom, we will not prosper unless we account for some fundamental realities. Will our architects and construction companies be able to sell their services abroad if we are not building anything here at home? Will our manufacturing consultants be able to sell their services if America is the epitome of decadence in manufacturing? Unless we deal with these questions capably, we may also follow the United Kingdom in its pattern of labor-business animosity. If this continues to happen here, it is utterly predictable that not only will our industries be threatened, but our entire economy will drift into long-term decay.

We can go along essentially as we have been, ignoring our basic problems—talking about free trade but resorting to protectionist give-aways when the heat gets too high, giving tax breaks and ignoring the fact that little of our wealth is going into productive investment, doing good research and watching others developing it into new products which they sell to us, shipping our raw materials overseas to see them come back as finished goods, and generously distributing blame for all that goes wrong.

Or, we can roll up our sleeves, get together, and do something about these problems. The sooner we realize that we are not simply going to waltz into a high-tech heaven, the better off we will be. But a new direction will take consensus among the major actors, and concerted action based upon that consensus. We should first get the facts—we do not even know our competitive position on an industry-by-industry basis. We do not even have credible information on which to base our decisions.

After we arrive at a consensus on the facts, we must negotiate deals. If the Government gives trade protection, we should know that we are going to get investment and jobs as a result. If an industry takes high risks and invests in productive capacity, it should get better terms—so-called patient capital—or a better break than those who do not make those investments. If workers give up some benefits, they should get real employment security as a result. We can innovate, we can use our natural resources, we can develop labor-management collaboration.

What do we mean by industrial strategy? It is really a concept for the revitalization of American industry. We do not mean that some wise people are going to choose winners and losers, nor that individual companies will be singled out as America's future industrial giants. We do mean that in four basic areas, some fundamental policies will be reexamined to determine whether they contribute to industrial revitalization or they are barriers to progress. We need capital investment in restructuring our basic industries and accelerating the development of new technologies. We need the kind of regulation which will make sense for industry. We need to change some antitrust laws so that our companies are able to innovate and compete equally with their foreign rivals without unnecessary legal restrictions. Most important, in the area of regulation, we need a trade policy which is founded on economics, not international politics, and which accounts for our fundamental need for industrial revitalization. We need to emphasize research and development and to remove the barriers to innovation. And, our industrial strategy must take account of the need for human resource development.

Among the specific issues which should be considered in terms of capital investment are whether changes should be made to the policies and regulations of the Securities and Exchange Commission which would be beneficial to long-term industrial development, examining the role that enterprise zones and other investment incentives can play in the industrial development of distressed areas, and what tax policy changes, if any, would stimulate private investment in competitive industries.

In terms of regulation, the Council would consider whether antitrust immunity should be given to distressed and linkage industries and the extent to which the trend toward conglomeration has provided a disincentive to the efficient use of capital in the United States. The Council and the Bank could make great strides toward turning around our embarrassing trade imbalance. The Council would consider ways to promote our exporting industries, and the effect of restrictive trade policies on national industrial development. Although the benefits of having such a coordinated and careful look at possible solutions to our trade problems cannot be stressed too much, our trade problems are so involved and so serious that specific legislation in this area may be needed to supplement the National Industrial Strategy Act.

In the area of research and development, the Council could consider ways of encouraging more cooperative research efforts among private sector firms which are involved in international trade and ways of eliminating potential antitrust problems that might arise from such cooperation. The Council could also examine the appropriate level of Federal spending for research and development and the role that Federal procurement plays in stimulating private sector research, development, and innovation.

The Council would examine issues of human resource development to assure the technical competence of the work force. These issues would include basic educational policies and apprenticeship programs. along with ways of enhancing labor-management cooperation and dealing with the economic dislocation of workers.

Why will it take a new institution to achieve this kind of positive cooperation? Under our system, it is absolutely inappropriate and ineffective for Government to try to impose its poli-

cies on private enterprise. At the same time, the private sector does need Government policies conducive to growth. It is also clear that the executive branch alone cannot bridge the gap without the full cooperation of Congress. As a great leader of this House once said, "the President proposes but Congress disposes."

This is not to imply that a constructive industrial response can never occur under the present system. The Chrysler loan guarantees provide an outstanding example of a specific response to a problem and how Government can play a useful catalytic role in cooperation with the private sector. But much of the Chrysler deal was worked out on Capitol Hill and it was an awkward process. It was necessary to wait for a crisis to happen, to have great corporate leadership, and for months and months of negotiations both with the administration and with the Congress to further erode Chrysler's competitive position before any action could be taken.

A new institution, on the other hand, could develop an anticipatory industrial policy, rather than relying on a reactive response. We waited until Chrysler was insolvent and we reacted to an infusion of specialty steel from all over the world to a point where our domestic industry is almost destroyed before taking action. We do not want our actions to be simply reactive to situations which have gotten out of hand. A new institution is critically needed in order to anticipate trends and to get the United States out front in the global competitive marketplace.

I think the Economic Cooperation Council is particularly well structured with the involvement of a fourth party of representatives of the public interest. Big business, big labor, and big government alone cannot set American industrial policies. We need public interest representatives, such as consumers, small business people, financial experts, academics, and others involved in the development of a consensus. With all four parties participating, I am convinced that even though the Economic Cooperation Council is only advisory, its recommendations will carry such weight that it will be ignored only at the political or economic peril of those who do so.

So, how is an Economic Cooperation Council structured and why?

There will be 20 members on the Council who were recommended for appointment by the Congress and appointed by the President. The Council will include, in equal numbers, representatives of government, business, labor, and the public interest. The members will serve 6-year terms and be limited to serving two terms each.

Such a quadripartite arrangement will insure that all relevant aspects of national industrial strategy questions will be represented and that all Council recommendations are backed by a consensus of interests.

The Council will be strictly advisory and will function as a coordinated, encompassing authority on information and policy suggestions pertaining to revitalizing American industries. The Council will provide credible, census-backed information on the domestic and international economic situation, as well as monitoring the changing nature of the U.S. industrial economy and its capacity to respond to international competition. In addition, the Council will prepare and publish reports containing the recommendations of the Council with respect to industrial development priorities. These priorities will include macroeconomic policy, the needs of basic industrial sectors such as the automotive, steel, and semiconductor industries, the needs of supportive sectors such as financial and communication industries, and the needs of emerging industries.

It is important to understand what the Economic Cooperation Council will do and will not do. It will develop consensus on data, provide some recommendations on specific problems, foster the development of sector-by-sector committees to deal with the specific problems of industries, bring parties together and make recommendations as to the sacrifices necessary to make a specific strategy work or to cut the deals, and make policy recommendations such as the effect of certain macroeconomic policies on industrial revitalization. The Council will not pick winners and losers. It will not impose solutions on those who do not want to participate. In other words, if an overall strategy for the revitalization of the steel industry is developed with the participation of business, labor, government, and others, those firms who want to be a part of the program may choose to do so and those who want to take other actions will be allowed to compete without the Government assistance or advice. Finally, the Council will not set macroeconomic policy, but rather will be solely dedicated to the important work of the structural revitalization of American industry.

We think that it will take an independent Council structured as along the lines we have devised to succeed in this task. In my view, without consensus, you just have another voice in the multiplicity of noises sounded here in Washington and elsewhere throughout this land. It is also obvious to me that a commission on American competitiveness will not amount to very much. We do not need just another blue-ribbon commission to make yet another report which is promptly put on all of our shelves to gather dust. We need a strategy and we need an active program. The Economic Cooperation Council is the centerpiece of the development of such a strategy and the recommendations as to its implementation.

As many of you know, I have been advocating—some would say preaching—the need for labor-management cooperation to improve productivity ever since I arrived in these Halls. From my experience as the mayor of Jamestown, N.Y., I became convinced that labor and management working together can find their mutual interests, develop a strategy which allows them to achieve their shared goals, and revitalize the entire productive process so as to involve workers at every level and improve the quality of working life and productivity.

In my hometown, little over a decade ago, we had 10-percent unemployment before almost anyone in America faced that kind of economic and human tragedy. Factories were closing and going out of business. Labor and management were at each other's throats. Attempts to provide for urban renewal were thwarted by our reputation as a town with a bad labor climate and an atmosphere of mutual distrust and suspicion.

We organized the Jamestown Area Labor-Management Committee and, within 3 years, our unemployment rate had declined from 10 to 4 percent. We had quality-of-work-life programs in individual Jamestown factories which were allowing for the creativity of workers and managers to produce more and enjoy their work much more. This effort has continued and grown in scope throughout the ensuing decade. I would again commend to my colleagues the 10-year report of the Jamestown Area Labor-Management Committee and the chapter I have written for the book entitled "Managing Innovation: The Social Dimensions of Creativity, Invention and Technology," edited by Sven Lundstedt and E. William Colglazier, Jr., if you are interested in a deeper understanding of this dynamic community experience.

I believe today's problems in America are very similar to those that Jamestown faced in the early seventies. Our industries are closing, our people are out of work, we are bickering over who is at fault, and there is an atmosphere of distrust and suspicion. I wish that you could come to Jamestown today. I would like to take you to the Cummins Engine new enterprise in a large factory of about 1 million square feet where they are building truck engines with teams of workers and robots have been designed by factory workers to replace dangerous and dirty jobs. I would like to take you to some of the old factories which were about to be abandoned where new enterprises and reorganized older

firms are successfully competing in worldwide markets.

To be sure, Jamestown is not perfect. The cooperation breaks down from time to time and there is still a lot left to be done. But you would see there furniture workers who are learning new skills through a combination of public and private commitment. You would see firms with a new future even in the wood furniture business.

Just as Jamestown needed labor-management cooperation a decade ago, the United States needs an Economic Cooperation Council now. During much of my advocacy here in the Congress, I have emphasized labor-management cooperation at the workplace. I continue to do so. But it also occurs to me that just as we developed a strategy for economic revitalization in our little community, so do we need to do so in this country today. The driving force behind that concept will not be interventionist and will not destroy but enhance the free enterprise system just as the labor-management committee in my hometown has remained purely voluntary in character. But this new Council will show America a new spirit of cooperation and the dynamic results which can be achieved once that consensus is reached.

Why do we need a bank? Unfortunately, in our present circumstances, even an Economic Cooperation Council could turn out to be only advisory unless there is a source of financing to attract the commitments from the private sector. In today's context, we are simply not able to generate the kind of "patient capital" necessary to foster innovative, new and emerging enterprises. We are not able to finance the huge reinvestments that are necessary to restore a world class competitive steel industry.

In the Chrysler example, we have seen exactly how helpful a timely government loan guarantee can be. We need a bank so that we can have more Chryslers and so that we can enable new industries to get the kind of financing they need. We need a bank so that our very capable private financing mechanisms can be effectively leveraged to produce the kind of high-value-added products which clearly will be America's future industrial mainstay. We need a bank to get away from our shortsighted fixation on quarterly profits by industry, the next political election, or the latest labor contract negotiation.

In short, we need a bank to implement a national industrial strategy and to develop investment strategies that survive recessions. We need such a facility to rationalize production despite competing and often more profitable short-term alternatives.

Would such a bank become too interventionist? Again, I am tempted to quote Mark Twain who spent much of his life in Elmira, N.Y., in my district. He said, "I don't mind getting older when I consider the alternative." Consider the alternative, America. We are attracting capital from all over the world right now. Very little of it is going into building new steel plants, or to build the automobiles of the future, or to take a long-range program to restore our dominance in computers, aircraft, fine ceramics and many other of our predominant industries.

While there is some venture capital available here in this country that may not be available in some of our competitor countries, the only way that an entrepreneur can really make out in most cases is by selling out. This is unfortunate and we need the kind of patient capital which will allow our new technologies to bloom into emerging enterprises which can survive conglomeration in their second stage of growth.

Once this bank is capitalized during the first 4 years of its existence, it should not require additional Federal funding. My view of its future is something for industry similar to the function the Federal National Mortgage Association performs for home mortgage financing. It can be operated on a pay-as-you-go basis complementing purely private financial institutions. While the amount of initial capitalization is large, so are the stakes. America's industrial destiny probably hangs in the balance.

How is the National Industrial Development Bank structured and how will it work? The Bank will be administered by a Board of Directors consisting of 16 members, 4 of whom will be chosen from the Economic Cooperation Council. Each member will serve no more than two 4-year terms.

The Bank's financial decisions will be guided by the consensus industrial strategy of the Council, as the Bank serves as a last-resort source of financing for the separate troubled areas of America's older, linkage industries and new emerging industries. Any financial assistance that the Bank gives in terms of loans, loan guarantees, and other debt instruments must support positive industrial goals, such as long-term job creation, employment stability, the creation of high value added jobs, and the location of new facilities within economically distressed regions.

In terms of mature and linkage industries, the Bank can provide financial assistance to those industries which the Bank determined can be restructured to be competitively successful in the long term without additional financial assistance from the Federal Government. Under this section, the Bank can assist industries which manufacture goods competing in international trade, support the implementation of new technology in mature and linkage industries, and support projects that will lead to significant increases in productivity in these industries. The Bank will provide only partial funding of the total financial needs only if no other funding is available to the industry and, in these cases, the Bank will actively seek other public and private financing sources for the revitalization projects.

The Bank is also authorized to provide financial assistance to the technologies and the development of emerging industries. In order for the Bank to aid in these projects, it must be shown that private funds have been committed to the project, but that those funds are insufficient to the total financial need. Here, too, the Bank will take the lead in assembling a combination of private and public financing for the project.

The most essential elements of the Bank are that it is directed by a consensus industrial strategy and that it provides only partial patient capital for viable basic and emerging industries. It is also very important that one of the Bank's major responsibilities is to stimulate private capital investment in domestic industrial revitalization projects. These elements will insure that the national industrial strategy as suggested by the Economic Cooperation Council will be translated into positive, well-thought-out action in which the private sector is heavily involved. The Federal Government, in this way, is acting as a catalyst, not the sole supporter, for bringing about the most essential change in emphasis in our economy—away from clinging to old, unproductive, and inefficient ways and toward bringing industry back to life and making it competitive again.

Mr. Speaker, America is in transition. We are experiencing our second industrial revolution which is coming upon us faster and with even more impact than the first. The proposal we are advancing today will not stop that change, it will complement it. An industrial strategy for America which takes into account human beings and which allows for rapid adjustments is vitally needed. American industry and the American economy will become more competitive through consensus, cooperation, and collaboration. We recognize that while our legislation is state of the art, it is not perfect. We think that this, the people's house, has an opportunity for leadership in the development of an industrial strategy.

We must not fail. We must take the path less traveled. We must not just respond to crises. We must not just imitate our competitors. We must develop a truly American positive response to the needs of our industrial future.

Mr. Speaker, I yield to the gentleman from New York (Mr. LAFALCE).

Mr. LAFALCE. Mr. Speaker, I am extremely pleased to see this bill introduced today, for it clearly reflects the growing realization that there are serious problems with the overall health of our economy. I also want to give special recognition to the hard work and dedication of the sponsors of this legislation in developing a cooperative approach and mechanism to address perhaps the central economic issue facing the Nation today—the decline of American industrial competitiveness in the world marketplace.

Many of us recognize that whatever "recovery" is now underway, there remain significant structural problems which will not disappear with a modest rebound from our current depression. We need to look far more deeply at our economy and its long-term problems, and the bill introduced today is an excellent example of the kind of thinking which is so urgently needed.

In early June, the Economic Stabilization Subcommittee, which I chair, will begin to hold an extensive set of hearings on the state of the American economy, the international competitiveness of American industry, and the need for more effective Government policies to promote economic growth and development. These hearings will address the widespread concern that the American economy is both not performing up to its capacity and not effectively meeting the challenge of international competition. We know that the American standard of living relative to other countries has slipped significantly in recent years, and we know that hundreds of thousands of Amercian workers have seen their jobs permanently destroyed as intense foreign competition drives domestic firms to close, retrench, or relocate.

It is clear that our Government can and must do something about this situation. However, the response of the current administration has been to sit back and let the "magic of the marketplace" work its wonders. The problem is that the international marketplace is full of distortions and interventions prompted by various industrial strategies of our economic competitors.

The governments of our major trading competitors have been far more active than we have in supporting and assisting their industries, and this has paid off in increased competitiveness of foreign firms. Some observers say that that is unfair competition; others say that it is effective government policy. But clearly, it is silly—and even dangerous—for our Government to ignore reality.

The simple truth is that virtually all of our competitors have explicit, integrated industrial policies which aim to strengthen and promote key industries or sectors. We have hundreds of isolated incentives and subsidies, but no comprehensive strategy or policy, and no body or mechanism with responsibility to shape such a policy. It is time to consider seriously whether we should take steps to join the other major industrialized countries in developing a targeted program of industrial rationalization and promotion.

The Subcommittee on Economic Stabilization has been charged by the House to develop legislation dealing with financial aid to firms and sectors of the economy, and to deal with matters affecting the stability and growth of the economy. It is our responsibility, therefore, to examine the present state of the economy, to discover the underlying causes of our poor economic performance, and to propose effective policies to deal with the issue.

The exploratory hearings which are to start in June are a necessary first step forward on this complex issue, but we cannot be content with first steps alone on so vital a concern. Consequently, we expect to follow the general hearings with specific legislative hearings later in the year. In the legislative hearings, we will consider the bill introduced here today, along with the bills introduced by Mr. PEPPER, Mr. WHITTEN, and Mr. GUARINI related to establishing a Reconstruction Finance Corporation (H.R. 134, 1480, 1827), a bill introduced by Mr. MINISH (H.R. 638) to establish a National Development Bank, as well as several other pieces of pending and anticipated legislation.

It is then our expectation that we will bring a legislative package on industrial cooperation and industrial policy to the floor of the House. When that happens, I believe that the House will respond by approving an economic policy to help our industries better compete internationally, and thereby promote economic growth and stability.

□ 1850

Mr. LUNDINE. Mr. Speaker, I thank the gentleman for his comments and his support of the concept and for his commitment to hold hearings and to seriously consider legislation this year.

At this time, Mr. Speaker, I yield to the gentleman from Michigan (Mr. BONIOR).

Mr. BONIOR of Michigan. Mr. Speaker, I am honored to join the gentleman from New York (Mr. LUNDINE) in introducing today The National Industrial Strategy Act.

I am particularly proud that we are also joined in the introduction of this bill by the gentleman from Florida, the distinguished chairman of the House Committee on Rules, Senator PEPPER, who has been such a leader on the issues of a development bank, and the gentleman from Colorado, Mr. WIRTH, and the gentleman from Missouri, Mr. GEPHARDT.

Mr. Speaker, with unemployment still above 10 percent, America faces the repercussions of the deepest and longest recession since the Great Depression. Prompting a forceful recovery remains the highest priority of this Congress.

Yet, as we face the problems of the present, we cannot avoid questions about our past and our future, about the forces that helped create our present crisis and remain at work in our economy.

America is no longer the land of rapidly expanding opportunity. After increasing by more than 30 percent during the fifties and sixties, the growth in the real medium income of Americans slowed to a crawl during the decade of the seventies, increasing by under 7 percent.

Our economy is at a near standstill. During the period from 1960 to 1973, the United States ranked last in productivity improvements among the world's major industrialized powers. From 1973 to 1979, we ranked next to last.

During the period 1973 to 1979, productivity in West Germany, Belgium, and France grew at more than five times the rate in the United States. In the Netherlands, Denmark, and Japan, it grew at more than four times our rate.

The American people cannot be asked to hope that the next recovery, or the recovery after that, will automatically bring renewed prosperity, for history seems to be moving against us. As two leading industrial strategists, Ira C. Magaziner and Robert B. Reich, noted in their book, "Minding America's Business," we have seen a downward spiral in which "the boom periods became less bouyant and the downturns became deeper and more severe."

The unemployed auto workers in my State know that recovery alone is not the answer. They know that their jobs have been lost not merely to a temporary auto slump, but to permanent changes in the structure of the world auto industry.

Their homes in foreclosure (the foreclosure rate for the Michigan/Indiana HUD district is the highest in the Nation), they wait for their children, no longer covered by health insurance, to break an arm or worse. Tired of false hopes after years of looking for a job, most of all they look for an honest policy on which to stake their lives.

Our Nation desperately needs proper monetary and fiscal policies, but macroeconomic policy alone is not the answer. Our crisis was not born in a failure to adjust fiscal policy. It was born in a failure to adapt to fundamental changes in the structure of the world economy.

The steel industry knew that basic oxygen furnaces were more efficient than the older open hearth furnaces.

They knew that new methods of continuous casting were superior, yet change was costly and in the short term, profits could be maintained. Today, the long-term has caught up with short-term decisions.

At this late date in the history of America's industrial decline, the Nation has a right to expect that industrial revitalization will not be reduced to the distant implication of vague and changing fiscal and monetary policies. The Nation has a right to expect that revitalization will be directly sought in a clear and tangible fashion.

"Supply side economics" was not merely wrong in degree, marred by the wrong budget cuts and the wrong tax cuts, it was fundamentally wrong in kind. Defined as the central solution to industrial decline, it was the wrong answer to the wrong question.

The problems of an ailing industrial base cannot be met by the old adversarial system of interest advocacy that pit labor, management, public interests, and Government against each other.

That is the right problem. The National Industrial Strategy Act poses a solution.

When Congress or the Executive seek advice on fiscal or monetary problems, specialized institutions like the Council of Economic Advisers are at hand to provide a range of alternatives; yet a Congress or a President that seeks coherent industrial strategies is not so well served.

That is the right problem. The National Industrial Strategy Act poses a solution.

America can play a dominant role in the new services and technologies that will help shape the economy of the 1990's, but only if emerging industries can find patient capital, a hard task at best.

That is the right problem. The National Industrial Strategy Act poses a solution.

America's basic industries have a vital role to play in the new world marketplace, but only if new investment brings a jump in productivity and restructures American manufacturing toward high-value added products, yet at any given moment, more attractive short-term alternatives may exist for private investors.

That is the right problem. The National Industrial Strategy Act poses a solution.

Over the last several decades, small yearly declines in economic performance have slowly eroded America's industrial strength. In increments almost too small to notice, we have lost our competitive edge in the world marketplace.

That is the crisis at hand. The National Industrial Strategy Act poses a solution.

Mr. Speaker, the dominance of the United States in the post World War II world allowed us to avoid, for a while, the need for an explicit industrial strategy. As two leading industrial strategists, Barry Bluestone and Bennett Harrison, explained in their book, "The Deindustrialization of America": The U.S. emerged from the Second World War with the only major functioning army, with more than half of all the usable productive capacity in the world, and as the banker and creditor to both allies and former enemies.

Today, the disturbing legacy of this past monopoly is the confusion it creates in economic policy. Able to presume on growth for so long, our present crisis catches us by surprise and the task of planning for recovery seems strange, if not unnecessary.

The phenomenal expansion of the American economy during the 1950's and 1960's was not built on the magic of all wise market forces. The choice we face now is not between the continued reliance on a magic that never existed and pure Government interventionism. The choice we face is to continue on the course of decline or to draft our Government to assist in the task that lies ahead.

In his recent articles in "The Atlantic," Robert B. Reich wrote: The biggest barrier to active adjustment is not technical but ideological. For 50 years Americans have been embroiled in an endless debate over the relative merits of two highly artificial concepts: The "free market" and "national planning." The real choice facing America is rather between evading the new global context and engaging it.

What we seek in the National Industrial Strategy Act is not unprecedented. It has worked for our international competitors. In Japan's Ministry of International Trade and Industry (MITI), in Germany's German Development Bank, to name just two, we have the models at hand.

Mr. Speaker, at its best, American politics is fueled by hope, by the hope in new leaders and new ideas, by the hope that allows us to reach for uncertain dreams. Yet our willingness to hope can also be used to give momentum to easy promises that are soon broken.

Hope thrice abused, however, is a hope gone sour. It is a hope pushed to the point where so many dreams have vanished that the belief in change itself becomes suspect.

Real recovery cannot be generated by the free play of market forces alone. It requires the willing actions of a society convinced that prosperity can be regained, a society convinced that its hopes are real. That is the task of political leadership.

It is the Government's greatest role to somehow capture the real substance of its people's dreams and return it to them in a way that allows for the sacrifice and uncertainty that procede growth and discovery. Our Government has a long way to go in order to reclaim that role.

Today's bill, the National Industrial Strategy Act, is not itself the answer, but it is a first step in the right direction. It is an honest beginning.

□ 1900

Mr. LUNDINE. I thank the gentleman for his comments here, and I thank him even more for his commitment, his cooperation, his patience with me, and his positive approach have contributed enormously to this effort.

I would also like to express my thanks to my valued colleague, the gentleman from Missouri, DICK GEPHARDT, who together with the gentleman from Colorado, TIM WIRTH, produced or took the leadership in producing or rebuilding the road to opportunity in a democratic direction for the 1980's which sets an overall framework for this legislation.

Mr. Chairman, I would now like to yield to my colleague, the gentleman from Missouri (Mr. GEPHARDT).

Mr. GEPHARDT. Mr. Speaker, I would like to thank the gentleman from New York (Mr. LUNDINE) and the gentleman from Michigan (Mr. BONIOR) for their leadership today in bringing to the attention of this House and the country what I believe to be the most important set of ideas involved with trying to get the economic pie in this country to grow again rather than being stagnant or even declining.

I might add that the gentleman from New York's background in this subject is deep from his days as being a mayor in the State of New York and in really fostering one of the first-rate experiments that the country has seen at the local level in trying to bring together government, labor, and business in an attempt to try to address the difficult, complicated economic problems that were faced in that community.

So on the base and background of experience, he and the gentleman from Michigan (Mr. BONIOR) have put together this very important piece of legislation that I am very happy today to be cosponsoring with them. Along with a similar measure that my colleague, Mr. WIRTH, will be offering soon, this bill will, for the first time, permit us to develop a competitive economic strategy.

The greatest strength of our economy has always been its basis on free enterprise, which must remain our first and best hope for long-term growth and employment. We are not now maximizing our potential, however, because we lack a means of bringing the many and varied interests in

our economy together in the kind of cooperative effort necessary to achieve sustained prosperity.

We are presently trying to address our economic ills—both short and long term—in a vacuum. Not enough information is available about where the U.S. economy is headed, where we stand in relation to our competitors, and what we need to do to meet the economic challenges in the future. At the same time, funds are being committed in both the public and private sectors in a fragmented manner. The Government alone has countless programs designed to lay the foundation for economic growth through physical improvements, education, job training, and so on. Sometimes they conflict, often they overlap, but rarely are they focused toward a coordinated goal.

The proposed Economic Cooperation Council will fill this information and coordination void. It will help us bring together the disparate resources necessary for the United States to compete in an international economy.

This proposed Council would not be a monolithic national planning agency that would decide winners and losers among industries or issue directives to the private sector on the allocation of resources. It would not be a new Reconstruction Finance Corporation which runs the risk of becoming too intrusive into our economy.

Rather, this Council will be a distinguished, representative, influential group that would be sensitive to the legitimate powers of the President and the Congress but would provide them with the information and act as the barometer they need to make coherent decisions to revitalize our economy and sustain our competitive position in the world.

As envisioned by this legislation, the Council would gather and analyze data to identify problems and trends in existing and emerging sectors of our economy. It would develop consensus among all interested groups to meet the challenges presented by its findings.

If this bill and the one that will soon be introduced by the gentleman from Colorado are enacted, the Council will be given three basic tools to achieve its goals:

First. Bureaus of Economic Information and Economic Analysis, that would gather and analyze data, identify trends and market opportunities, generate proposals for facilitating growth and communicate the developed information to American industry;

Second. Authority to establish sectoral subcouncils of representatives of all interested groups to develop long-term strategies for solving problems of specific industries; and

Third. A National Industrial Development Bank which would advise the Council and its sectoral subcommittees on the availability of financial resources to help address the needs of problem industries and which could provide investment if none is available elsewhere in the public sector or in the private sector.

As we work to rebuild our economy, we need the capacity to look ahead, to focus attention on emerging as well as present problems. We need the capability to develop a long-term economic strategy for attaining sustained economic growth—a strategy that anticipates economic trends and identifies potential problems and opportunities.

This legislation is designed to do that. I commend the gentleman from New York for proposing it and look forward to introduction of the supplementary and complementary measure by my colleague, Mr. WIRTH. Early enactment of these innovative proposals will represent a major step forward in our effort to restore long-term health and vitality to the Nation's economy and maintain our competitive position in the world.

□ 1910

Mr. Speaker, let me conclude by saying that whenever we have a discussion about economics, everybody wants to talk about the budget, or about monetary policy, or about the macroeconomic issues that seem to be so important in fostering economic growth. What is not often discussed but what is represented by this legislation is what I think is the other leg to the stool that is just as important as macroeconomic policy. It is called industrial policy, or microeconomic policy, or cooperative economic policy; it has a lot of names. But it really is an essential thing to do. It is not discussed often enough. Certainly no meaningful legislation has been passed.

This is the first time in my memory that serious, long-thought-out proposals are being made. This proposal is clearly one of those. I am honored to be a cosponsor of it today and to engage in this special order today to try to bring the attention of the Congress and the country to what I think and what I hope will be a most important debate and perhaps the most important piece of legislation for economic growth that we have seen in the last 20 or 30 years.

Mr. LUNDINE. Mr. Speaker, I thank the gentleman form Missouri (Mr. GEPHARDT), and I am proud to have him as a cosponsor of this bill. I have benefited greatly from his counsel and his cooperation.

What do we mean by an industrial strategy, and why is it needed? This bill is based on the belief that we need healthy industry in this country. We can and must develop a consensus among business, labor, Government, and others in the public as to an overall strategy for industrial revitalization, and we believe that some Government funding will be necessary to leverage the private capital available to rebuild American industry.

We can essentially go along as we have been, ignoring our basic problems, taking about free trade but resorting to protectionist giveaways when the heat gets too high, giving away tax breaks and ignoring the fact that very little of that wealth is going into productive investment, doing good research, and development, and watching our competitors all over the world innovate and turn it into products and sell it back to the United States, or we can roll up our sleeves, get together, and do something about these problems.

The first thing we have to do is develop a consensus. We have to develop a consensus, Mr. Speaker, on the facts. We all know as Congressmen that people are constantly coming to us and emphasizing the issues with different sets of facts. Now this situation is so serious, with American industry deteriorating, that we need to have an independent council that can gather credible information and at least have business, labor, Government, and general public representatives come together and agree and report back to us and to the administration on what the facts are.

We mean by an industrial strategy not picking winners and losers; what we do mean is that there are four basic areas where some fundamental policies are going to have to be reexamined to see whether they fit with an overall strategy for industrial revitalization.

First, capital investment; second, research and development; third, regulations, including our trade policy; and, finally, the better development and deployment of our human resources.

Why will it take a new institution to achieve this kind of positive cooperation? Well, under our system it is inappropriate and ineffective for Government to impose its policies on private enterprise, and at the same time the private sector needs Government policies which are conducive to growth. This new institution can develop anticipatory policy rather than just waiting and reacting, as we did with Chrysler and as we have with so many, until there is a crisis.

I think the Economic Cooperation Council is particularly well structured because we add that fourth party. It is not just big labor, big business, and big government getting together and deciding on an industrial policy for America; we have public-interest representatives, consumers, small-business people, financial experts, people from the academic community, and others who can be involved as a fourth party in the development of this consensus. While the Council will be

strictly advisory, I think it is very important to point out that this consensus development will be of such a nature and carry such prestige that we in the Congress and the executive branch will ignore it at our peril.

Finally, Mr. Speaker, why do we need a bank? Well, unfortunately, in our present circumstances, even an Economic Cooperation Council could turn out to be only advisory unless there is a source of financing to attract the commitments from the private sector. In today's context, we are simply not able to generate the kind of patient capital necessary to foster innovative, new, and emerging enterprises. We are not able to finance the huge reinvestments that are necessary, for example, to restore a world-class, competitive steel industry.

In short, we need a bank to implement a national industrial strategy and to develop investment strategies that survive recessions.

We are attracting capital from all over the world here to this country, but very little of it is going to build steel plants, or to build the automobiles of the future, or to undertake a long-range program to restore our dominance in computers, aircraft, fine ceramics, and many other of our predominant industries.

There is some venture capital available, but the only way some of these new firms can make out is to sell out.

I propose that this Industrial Development Bank will be a solution to that problem by providing the capital on a longer term basis so that these emerging enterprises can bloom and survive conglomeration into their second stage of growth. The Bank's financial decisions will be guided by that consensus strategy of the Council. They will be linked. I think that we have come up with a creative way to insure that we have the essential elements here of an industrial strategy.

Mr. Speaker, America is in transition. We are experiencing a second industrial revolution, and it is coming upon us faster and with even more impact than the first. The proposal we are advancing today will not stop that change; it will complement it. An industrial strategy for America which takes into account human beings and which allows for rapid adjustments is vitally needed. American industry and the American economy will only be competitive through consensus, cooperation, and collaboration. We recognize that while our legislation is not perfect, it is state of the art. We think that this, the people's House, has an opportunity for leadership in the development of an American industrial strategy.

We must not fail. We must take the path less traveled. We must not respond just to crises. We must not imitate our competitors. We must develop a truly American positive response to the needs of our industrial future.

● Mr. PEPPER. Mr. Speaker, I am pleased to join as a cosponsor of this legislation creating a National Development Bank and an Economic Cooperation Council—The National Industrial Strategy Act.

My colleagues have eloquently stated the problems that we face as a nation: declining productivity, accelerated cycles of recession and recovery, the structural transformation of our economy and increased international competitiveness. We must find a mechanism that will help develop a coherent strategy and give direction to the Nation in these troubled times. We must also be willing to commit the resources that are needed to realize the potential that is recognized to exist in our basic as well as emerging industries. This legislation accomplishes these purposes. By first establishing an Economic Cooperation Council, we are bringing together the major participants in the economy—business, labor, government, and public interest groups. As has been stated, this Council will not be charged with picking winners or losers. Instead, it will perform the healthy function of creating a consesus amongst these important groups on a coherent, comprehensive industrial strategy.

Second, this legislation establishes a National Development Bank. This Bank is similar to the successful Reconstruction Finance Corporation of the New Deal. During the Great Depression, the economy was in a downward spiral. Unemployment was high and demand for goods was slack. Businesses would not expand production because of this slack demand. Consequently, people remained out of work. Fortunately, President Roosevelt had the insight to see that Government stimulus was needed to break this viscous cycle—to spur production and get people working again. To this end the RFC was put to use. It provided the necessary capital infusions that kept countless businesses, including the banking, railroad, and housing industries afloat until more prosperous times.

Today we find ourselves facing a similar situation in this country. Our economy is one of idled capacity. Unemployment is at record levels. Real interest rates are extremely high and the industrial sector is producing at only 60 to 70 percent of capacity. This legislation that we are introducing today is designed to put this idled capacity back to work. However, the National Development Bank contained in this legislation does more than provide liquity for businesses—it provides capital for structural changes in industries. The Bank is authorized to provide financial assistance to mature and linkage industries as well as emerging industries.

Mr. Speaker, my colleagues have described the purpose and the provisions of this legislation. I would like to say that this legislation is something that I am hopeful that Members from both sides of the aisle can support. I would like to say what this bill does.

The legislation responsibly addresses the economic difficulties facing this Nation. It brings together the major participants in our economy and establishes an Economic Cooperation Council that will result in cooperation not confrontation. It creates a National Development Bank that will help provide capital for mature, linkage and emerging technologies that have shown an ability to attract some private capital. Most importantly it provides a workable mechanism for looking at and responding to the changes that are occurring in our economy.

I would hope that Members would study this legislation and that it would receive prompt and favorable consideration by this Congress.●

AMERICAN INDIAN DAY

The SPEAKER pro tempore (Mr. LUNDINE). Under a previous order of the House, the gentleman from New Mexico (Mr. RICHARDSON) is recognized for 60 minutes.

Mr. RICHARDSON. Mr. Speaker, it is entirely fitting and appropriate that this body and our Nation take the time to focus on a part of our society which, more than any other segment of our country's population, is most deserving of national recognition, yet is often most forgotten.

So, Mr. Speaker, I rise not only to recognize tomorrow as American Indian Day and to pay tribute to the Native American, but also to say to my colleagues and to this Nation that we, the Congress and the Federal Government, as representatives of all the people of the Nation, need to make a firm commitment to the Native American to see to it that he justly receives from this Nation, and this Government in some proportion to what over the last 400 years he has given to us.

□ 1920

Mr. Speaker, I would like to yield to the gentleman from Montana who has provided leadership over the years on the issue of Native Americans in the House of Representatives. Recently he took the initiative of helping organize a group of Members that have a large proportion of Native Americans in their district and form and try to start the procedure for forming an Indian task force.

I yield to the gentleman from Montana (Mr. WILLIAMS).

Mr. WILLIAMS of Montana. Mr. Speaker, I thank the gentleman for yielding. I appreciate the time and I especially appreciate joining the gen-

tleman in recognition of National Indian Day.

Mr. Speaker, significant progress has been made during the past decade and our Nation has finally begun the task of addressing the education, economic, social, health, religious and cultural needs of the American Indians and Alaskan Natives. Indian student dropout rates are decreasing now. The numbers of Indian youth attending college and secondary educational facilities are increasing. The number of Indian teachers and lawyers has grown significantly. Schools are at last beginning to meet the needs of Indian children. The success of Indian education can be traced to important legislative initiatives, such as the Tribally Controlled Community College Assistance Act and the Education Amendments of 1972, which established the Indian Education Act, title IV.

Although the health needs of American Indians are still great, the efforts of the Indian Health Service have made a difference. Maternal death rates in childbirth have decreased by 91 percent in the last 30 years, and the tuberculosis death rate has decreased 89 percent. Without the expansion of hospitals and clinics on reservations and in urban areas, these achievements would not have happened. It is well known that Indians suffer from a high rate of alcoholism. In fact, the leading causes of death are from alcoholism, suicide, accidents and homicide.

The efforts of the Indian Health Service need to be increased so that we can report success statistics for the debilitating disease of alcoholism, and we can do it.

After years of religious persecution and destruction of religious sites, in 1978 Congress enacted the American Indian Religious Freedom Act. There is now a framework in place so that the expression of the religion of the American Indians can begin to be respected.

On April 22 of this year, 64 of the Members of this body of Congress sent a letter to President Reagan requesting a meeting to discuss ways in which these successful efforts can be continued and expanded. I admit, and I think past Congresses will admit, that our past Federal efforts with regard to Indians have not entirely worked. There have been wasted Federal moneys and unsuccessful programs. We need to look and find better ways to bring about true self determination. We need to admit past mistakes and move ahead. No one Member of this House or of Congress or within this administration has the answer. Together, with direction from the Indian people, we will move toward the worthy goal of self-determination and self-government. The advances made by Indian people during the past decade need to continue. A comprehensive and realistic plan can, I believe, and must be developed.

I ask that we join together in celebrating National Indian Day; celebrating the successes and joining in a commitment to move the first inhabitants of this land into the bright sunlight of the freedom of self determination and self worth.

Again, I commend my friend, who is also a leader here in the Congress and for the Indian people of this Nation. I am most pleased that the gentleman has asked for this special order to recognize our Indian brothers and sisters and join them in celebrating National Indian Day.

Mr. RICHARDSON. Mr. Speaker, there are approximately 105,000 Native Americans living in my home State of New Mexico, the fourth largest population of Indians in any State in the country, 96,000 Native Americans reside in the Third Congressional District. In New Mexico Indian tradition is literally, "as old as the hills." Spear points and bones uncovered in the Sandia Mountains in Albuquerque have established the 25,000 year old Sandia culture as the earliest in North America. Most of New Mexico's 19 Pueblo Tribes were settled more than 400 years ago, many before Spanish occupation. An Indian emblem—the ancient Zia Sun symbol—appears on the New Mexico State flag.

New Mexico's Pueblo Indians were discovered in the 16th century by Spanish explorers. It was not until the 1848 Treaty of Guadalupe Hildalgo, which ended the war between the United States and Mexico, that an area which included New Mexico was ceded to the United States. A treaty article provided for recognition and protection by the United States of the territory's inhabitants. In 1849, the Bureau of Indian Affairs was established within the newly formed Department of the Interior.

Long before the Spanish arrived in the Southwest, related Navajo and Apache tribes, are said to have made their way to New Mexico. The Navajos are believed to have journeyed to the Southwest across the Bering Strait. It was in 1864 that Col. Christopher Carson was ordered to round up all Navajos and confine them in what is now Fort Sumner, N. Mex. When the Indians resisted, Carson's regiment destroyed Navajo livestock and food supplies and gathered up 8,000 Navajos and took them to Fort Sumner, as prisoners of war. In 1868, the Navajos signed a treaty with the United States which allowed them to return to their old homeland and to what is now the vast 25,000 square-mile Navajo Reservation spanning parts of New Mexico, Arizona, and Utah. The Navajo Reservation is home to more than one of every five indians living on reservations in the United States.

Yet, it was not until 1924 that all Indians of New Mexico were declared citizens of the United States. That same year, Congress passed the Pueblo Lands Act, determining the status of Indian land claims. Today Indians comply with about 5,000 laws and regulations with the Federal Government—regulations that many times act as roadblocks to getting things accomplished.

This administration's policy statement in support of Indian economic independence and self-determination are empty words of promise that do not reflect this administration's record of performance. Let me cite some statistics to support my claim. It is shocking for me to learn that unemployment on the Navajo Reservation has doubled from a year ago, jumping from 37 to 75 percent. Less than 20 percent of the Navajo labor force will work this year. Poverty on the reservation has reached staggering proportions. In 1981 the average yearly income among the Navajos living on the reservation was a mere $1,700. Alcoholism is a chronic problem, as is evidenced in the fact that 19 percent of all reservation Navajos die in auto wrecks compared with the national average of 3 percent. Thirty percent of all reservation Navajos die between the ages of 20 and 44 years of age. Most homes on the reservation do not have running water or electricity; all of this is occurring now, today, in 1983.

Last year the Navajos experienced budget cuts totaling $152 million, including money for 10,000 jobs through the CETA program.

This year is no different. There are cuts proposed in almost every area of Federal funding for Native American programs. There is no better example than what is happening in my home State. The Bureau of Indian Affairs is obsessed with cutting the operating budget for the Southwestern Indian Polytechnic Institute in New Mexico in half. SIPI, as the school is more popularly known, has the unique distinction of being the only technical vocational training ground for Indian students in the country. It does not make sense to cut funding for a school that placed 70 percent of its graduates into jobs last year—especially in light of the astronomical unemployment rates for Native Americans.

What does make sense is to invest. Like the rest of my colleagues, I do not believe in giving for giving's sake, but investing in the future. An investment into helping the Native American live a dignified existence and to live and work within their culture and customs so that their people and communities can share in the vast wealth this country possesses and which at one time they alone possessed.

□ 1930

A part of this investment should be a commitment of Federal dollars which are directed toward improving the educational programs which seek to improve the skills of the Native American. Whether it be Federal programs which help fund public schools educating Indian students—whether it be Bureau of Indian Affairs schools—schools like SIPI, adult or higher education programs. The investment of Federal dollars into these kinds of programs, is an investment which will help give the Native American the skills to live with dignity—the skills to become productive, imaginative citizens—citizens of their tribe, their community and their country.

Equally the private sector through public sector funded programs should get together and participate in the training of Native Americans. Native Americans cannot only depend on Federal funds but also on commitments by the private sector to train and to invest in Indian reservations.

One of the already existing programs which I would like to call to my colleagues attention today, is title IV of the Indian Education Act. Since the birth of this program in 1974, it has provided assistance to an array of educational programs delivering education assistance to the Native American student and assisted in efforts to provide research dollars to colleges and universities across this country to develop an education curriculum in Native American studies. This program provides assistance to public schools educating Indian students in 43 States. Approximately 20 percent of all of the congressional districts in this country have public school districts which receive title IV funds. In New Mexico, the State receives more than $5 million. Title IV has helped tribes develop their own tribal educational projects with recent emphasis being directed toward assisting tribes in their efforts to develop educational plans.

Mr. Speaker, this program carries with it many success stories. Projects of all kinds have been developed and carried out meeting current educational needs and raising the awareness of educators toward needs that are still unmet. It has helped foster more Indian parent involvement and it has made commuities more aware of Native American cultures.

Mr. Speaker, the administration's fiscal year 1984 budget calls for the elimination of the title IV program. To close down the title IV program would be another slap in the face in this Government's long history of dealing unfairly with Native Americans. How many times over the past 200 years has this Government made agreements with Indian Nations, raising expectations, only to shut the door?

Mr. Speaker, as we recognize American Indian Day, I hope each of us will pledge to ourselves and to our constituents that we not only recognize the contributions of the Native American to our Nation's culture, but that we also pledge ourselves to provide them with programs like title IV, like SIPI, which will assist them in becoming more productive citizens—not only to this Nation, but to their tribe and to their spirit.

Mr. Speaker, it is also my hope that officials of this administration listen to some of the remarks made on the floor on this special order.

Although he could not be here this evening I know the distinguished chairman of the House Interior Committee, the Honorable MORRIS UDALL of Arizona, had something special to say. The gist of his message was that although the Indians are the first Americans, they are first nonetheless in poverty and lack of housing, in lack of jobs, and in misery.

Through his leadership of the House Committee on Interior and Insular Affairs, Native Americans have gotten a fair break. But it is not until it hits the floor of the House or the other body or it hits other areas of the bureaucracy that progress is stifled and the commitment ceases.

Mr. Speaker, we are also fortunate to have on the House Appropriations Committee a man who consistently stands behind Indian programs, the honorable gentleman from Illinois, SIDNEY YATES, who time and time again stands back and helps the programs that are being decimated by this administration, whether they be in health care or in education, whether they be in funding for training or for SIPI. Time and time again this man goes to bat for those forgotten Americans that seldom if ever have any lobby.

Mr. Speaker, in the next few days a group of us here in the House of Representatives will form a task force to have in the Congress of the United States a group of Representatives that will stand behind the Native American, that will address their issues and that will speak for them.

There are no Native Americans in this Congress. Although I have in my district the most number of Native Americans, I recommend that they give me a chance to show that I can be a Representative.

Mr. Speaker, today is an important day for those officials in this administration to recognize that the Native American wants to contribute to this society, wants to work, wants to help, wants to be a part of the American dream. But when the distinguished Secretary of the Interior says that the best he can think of is a reservation that is close to socialism, one wonders where this advice is coming from.

Some have suggested, including myself, that perhaps Secretary Watt and General Custer have discussed how to deal with Indians.

Mr. Speaker, I hope that this administration does more than just proclaim, with the Congress of the United States, American Indian Day as it has for tomorrow. We need more than symbols and more than rhetoric. We need programs that are going to work, that give a break, that promote self-reliance and self-improvement.

Mr. Speaker, today in preparation for tomorrow's American Indian Day, I am deeply honored to participate in this special order.

● Mr. UDALL. Mr. Speaker, first let me commend the gentleman from New Mexico (Mr. RICHARDSON) for taking this special order on the American Indian and the establishment of May 13 as American Indian Day.

I also want to commend the Congress for setting aside a day to honor the American Indian and President Reagan for proclaiming May 13 as American Indian Day.

When we talk about the Indian people of this country, we sometimes tend to call them the "First American."

As chairman of the Interior Committee which has primary jurisdiction over Indian affairs, I know that this is true. They are first in unemployment; first in poor housing; first in ill health; and first in poverty.

As chairman of the Interior Committee, it has been my commitment to bring to the House legislation which attempts to deal with the desperate conditions among the Indian people. Over the years, we have enacted into law several reform bills in the field of Indian affairs dealing with such diverse issues as financing of economic development; improving Indian health; strengthening, stabilizing, and maintaining Indian families; improving Indian education programs; and putting the tools of self-determination in the hands of the tribes.

But much remains to be done to assist Indian tribes and people in achieving a higher level of self-sufficiency while protecting their right to retain the cultural identity and their right to govern their own affairs.

Mr. Speaker, it may not be too trite to say that we owe this great country to the Indian tribe who once owned it. While we cannot be overly proud of our treatment of the native people of this land, I think history will show that this Nation has made great efforts to right the wrongs which occurred. And we cannot be, forever, guilty of past history.

But, in the course of that history, this Nation made solemn commitments to the Indian people to take them into our protection and to act as trustee for their lives, their property and their futures.

To carry out that commitment will take an awareness of the American people of the desperate conditions of the Indian people among them; an awareness of the Congress and its members of their responsibility to the Indian people; and an awareness of the executive branch of their high fiduciary obligation in dealing with the Indian people.

Perhaps the designation of May 13 as "American Indian Day" and the comments under this special order will heighten the awareness among the people, the Congress and the Executive of the promise and problems of the American Indian.●

● Mr. KILDEE. Mr. Speaker, on Friday, May 13, we honor our First Americans by observing American Indian Day. I would like to commend my colleague from New Mexico (Mr. RICHARDSON) for his initiative in seeking a special order.

From my membership and work on both the Committee on Education and Labor and the Committee on Interior and Insular Affairs, I have had many opportunities to work with American Indians. With each opportunity and experience, I am increasingly impressed with their resolve and resilience, as well as their kindness and insight.

The Federal Government has moral, legal and treaty obligations to the native Americans. It is our responsibility in Congress to see that these obligations to the Indian nations are completely honored.

Several years ago I went down to the National Archives to the treaty rooms to view the hundreds of treaties made with Indian nations. Seeing the actual documents was a very moving experience. It certainly impressed on me the importance and uniqueness of the relationship that the U.S. Government has with the Indian nations.

On American Indian Day, we should recognize our special relationship with American Indians and our responsibilities. We should also consider with pride and gratitude the many valuable contributions that have been made by our Indian citizens.●

● Mr. VALENTINE. Mr. Speaker, this is a day to pause and reflect on the proud history and traditions of Native Americans.

Our Nation is frequently referred to as a great melting pot—a blending of many different peoples and different cultures. I sincerely hope that those of us whose family roots lie overseas will never forget the role of American Indians in our collective past, nor lose sight of the substantial contributions they make to the vitality of current American life.

Throughout their long, rich and varied history, native Americans have consistently demonstrated those qualities of courage, creativity and abiding spirit so highly valued by all Americans. It is highly appropriate that the President and we in the Congress have taken this occasion to pay tribute to this great and enduring people.●

● Mr. DELLUMS. Mr. Speaker, I appreciate the time that my colleagues have set aside to honor the contributions of the Native Americans. I would like to take this opportunity to bring to the attention of my colleagues a document which was delivered to the House in 1978, after a group of Native Americans marched across the country in a historical event known as the longest walk in an effort to focus attention on their plight.

I believe that the document, entitled "The Affirmation of Sovereignty of the Indigenous People of the Western Hemisphere," remains an important statement, and I would like to share a small part of it, the "Declaration of Principles of the Defense of the Indigenous Nations and Peoples of the Western Hemisphere." That declaration and a small introduction follow:

The United States of America has continually violated the independent Native people of this continent by Executive Action, Legislative fiat and Judicial decision. By its actions, the U.S. has denied all Native people their International Treaty rights, Treaty lands and basic human rights of freedom and sovereignty. This same U.S. government which fought to throw off the yoke of oppression and gain its own independence, has now reversed its role and become the oppressor of sovereign Native people.

Might does not make right. Sovereign people of varying cultures have the absolute right to live in harmony with Mother Earth so long as they do not infringe upon this same right of other people. The denial of this right must be challenged by truth and action. World concern must focus on all colonial governments to the end that sovereign people everywhere shall live as they choose, in peace with dignity and freedom.

The International Indian Treaty Conference hereby adopts this Declaration of Continuing Independence of the Sovereign Native American Indian Nations. In the course of these human events, we call upon the people of the world to support this struggle for our sovereign rights and our treaty rights. We pledge our assistance to all other sovereign people who seek their own independence.

Preamble to: Declaration of Continuing Independence by the First International Indian Treaty Council at Standing Rock Sioux Indian Country, (June 8, 1974).

DECLARATION OF PRINCIPLES FOR THE DEFENSE OF THE INDIGENOUS NATIONS AND PEOPLES OF THE WESTERN HEMISPHERE

PREAMBLE

Having considered the problems relating to the activities of the United Nations for the promotion and encouragement of respect for human rights and fundamental freedoms,

Noting that the Universal declaration of Human Rights and related international covenants have the individual as their primary concern, and

Recognizing that individuals are the foundation of cultures, societies, and nations, and

Whereas, it is a fundamental right of any individual to practice and perpetuate the cultures, societies and nations into which they are born, and

Recognizing that conditions are imposed upon peoples that suppress, deny or destroy the culture, societies or nations in which they believe or of which they are members,

Be it affirmed that,

1. RECOGNITION OF INDIGENOUS NATIONS

Indigenous peoples shall be accorded recognition as nations, and proper subjects of international law, provided the people concerned desire to be recognized as a nation and meet the fundamental requirements of nationhood, namely:

(a) Having a permanent population
(b) Having a defined territory
(c) Having a government
(d) Having the ability to enter into relations with other states

2. SUBJECTS OF INTERNATIONAL LAW

Indigenous groups not meeting the requirements of nationhood are hereby declared to be subjects of international law and are entitled to the protection of this Declaration, provided they are identifiable groups having bonds of language, heritage, tradition, or other common identity.

3. GUARANTEE OF RIGHTS

No indigenous nation or group shall be deemed to have fewer rights, or lesser status for the sole reason that the nation or group has not entered into recorded treaties or agreements with any state.

4. ACCORDANCE OF INDEPENDENCE

Indigenous nations or groups shall be accorded such degree of independence as they may desire in accordance with international law.

5. TREATIES AND AGREEMENTS

Treaties and other agreements entered into by indigenous nations or groups with other states, whether denominated as treaties or otherwise, shall be recognized and applied in the same manner and according to the same international laws and principles as the treaties and agreements entered into by other states.

6. ABROGATION OF TREATIES AND OTHER RIGHTS

Treaties and agreements made with indigenous nations or groups shall not be subject to unilateral abrogation. In no event may the municipal laws of any state serve as a defense to the failure to adhere to and perform the terms of treaties and agreements made with indigenous nations or groups. Nor shall any state refuse to recognize and adhere to treaties or other agreements due to changed circumstances where the change in circumstances has been substantially caused by the state asserting that such change has occurred.

7. JURISDICTION

No state shall assert or claim to exercise any right of jurisdiction over an indigenous nation or group or the territory of such indigenous nation or group unless pursuant to a valid treaty or other agreement freely made with the lawful representatives of the indigenous nation or group concerned. All actions on the part of any state which derogate from the indigenous nations' or groups' right to exercise self-determination shall be the proper concern of existing international bodies.

8. CLAIMS TO TERRITORY

No state shall claim or retain, by right of discovery or otherwise, the territories of an indigenous nation or group, except such

lands as may have been lawfully acquired by valid treaty or other cessation freely made.

9. SETTLEMENT OF DISPUTES

All states in the Western Hemisphere shall establish through negotiations or other appropriate means a procedure for the binding settlement of disputes, claims or other matters relating to indigenous nations or groups. Such procedures shall be mutually acceptable to the parties, fundamentally fair, and consistent with international law. All procedures presently in existence which do not have the endorsement of the indigenous nations or groups concerned, shall be ended, and new procedures shall be instituted consistent with this Declaration.

10. NATIONAL AND CULTURAL INTEGRITY

It shall be unlawful for any state to take or permit any action or course of conduct with respect to an indigenous nation or group which will directly or indirectly result in the destruction or disintegration of such indigenous nation or group or otherwise threaten the national or cultural integrity of such nation or group, including, but not limited to, the imposition and support of illegitimate governments and the introduction of non-indigenous religions to indigenous peoples by non-indigenous missionaries.

11. ENVIRONMENTAL PROTECTION

It shall be unlawful for any state to make or permit any action or course of conduct with respect to the territories of an indigenous nation or group which will directly or indirectly result in the destruction or deterioration of an indigenous nation or group through the effects of pollution of earth, air, water, or which in any way depletes, displaces or destroys any natural resource or other resources under the dominion of, or vital to the livelihood of an indigenous nation or group.

12. INDIGENOUS MEMBERSHIP

No state, through legislation, regulation, or other means, shall take actions that interfere with the sovereign power of an indigenous nation or group to determine its own membership.

13. CONCLUSION

All of the rights and obligations declared herein shall be in addition to all rights and obligations existing under international law.●

● Mr. RICHARDSON. Mr. Speaker, I am concerned that the administration's budget request for Indian health service will have an adverse impact on the 96,000 Native Americans living in my district who depend on this agency for the bulk of their health care needs.

Many of those people are senior citizens who live in remote areas of the reservation. It is important that these older Americans are not isolated from health care facilities and that they continue to get preventive health care. I think it is particularly insensitive that this administration is recommending that preventive health care funds be slashed nearly in half. This is a classic example of being pennywise but pound foolish. Every medical professional can testify that good preventive health care saves money on medical bills in the long run. Far more seniors are institutionalized in nursing homes in rural areas than in urban areas. One already has less preventive care and therefore is subject to acute care needs. What is even more distressing is that institutional care is far more expensive than ambulatory or home-based care. Therefore, the rural elderly are forced to spend an even higher percentage of their income on health care.

Last year the administration requested over $50 million for facilities construction—for hospitals, out patient care, and sanitation. This year, not a penny. Despite the documented fact that sanitation has improved the quality of health for Indian people. I know that there is concern about the 43-year-old Crownpoint Hospital. Former Secretary Schweiker promised an administration request for $14.5 million for phase 1 construction and now the Office of Management and Budget has recommended near total elimination of new construction project.

Elimination of funds for the community health representative program would severely impact on Indian elders. I understand that on the Navajo Reservation it would mean a loss of services in the emergency medical area, the community health representative-home health program, tuberculosis control, cancer screening education.

The administration claims that $70 million of the IHS budget will come from reimbursement from medicare/medicaid or private third party insurers. This could strike another blow to our older American population on the reservation, because the administration knows full well that these estimates are totally unrealistic and the use of medicare/medicaid collections for normal IHS-operations is not even authorized by law. This sleight of hand budgeting can only result in certain and immediate reductions in services for our older Native American users.

Many of our older Native Americans live in remote areas of the reservation. Transportation services to and from area hospitals must be looked at in greater detail to insure that this group of seniors can get to and from health care providers.

What is particularly worrisome about the IHS budget is that the Reagan administration may be underestimating the true cost of medical services. The administration allows for a 6-percent rise while medical costs, as we know, are actually soaring at an annual rate of 19 percent or higher. Last year, costs at the Santa Fe Indian Hospital skyrocketed at an alarming rate of 25 percent.

I also am aware that at the Santa Fe Indian Hospital 45 professional positions are vacant—16 beds are empty due to budget constraints. Some of these beds were planned to be used for a geriatrics ward.

I believe the Federal Government has an ethical obligation and the ultimate responsibility of seeing that an adequate level of health care is available to all Americans—including our elder Native Americans. I think the IHS-budget falls short of meeting that adequate level of health care and needs to be further examined and revised.●

● Mr. SABO. Mr. Speaker, in recognition of American Indian Day I would like to personally pay tribute to the 1.4 million American Indians and Alaskan Natives of this country.

The saga of the Native Americans in the last two centuries is not an easy story to tell. The original Americans suffered carnage and savagery, followed by deceit and falsehearted promises. For many years, reservation or tribal governments were denied, Indian religion and language suppressed, and sacred land desecrated, all while racism and disinterest abounded. Today, Indians suffer the worst housing and health conditions in the country. Education funds are being cut and unemployment is soaring far beyond the average national figures, as high as 75 percent on some reservations.

All this holds true for the one people, the only citizens in this country, for whom the Federal Government has a special obligation and trust responsibility. Let us resolve today that we will not neglect our responsibilities. Let our policies reflect that our obligations have not ceased, and we are rededicated to improving the quality of life for all Native Americans, both on the reservation and off.

As a Congressman, I feel deeply committed to do what I can to improve housing, to insure adequate health care, to further educational opportunities, and to support economic development and jobs for Indians. I feel the administration's budget proposals speak louder than its Indian policy statements, and I hope that Congress can prevent some of the deep cuts that have been scheduled.

As a man, I have the highest regard for the perseverance of the first Americans, and I praise their tenacious struggle to preserve their cultures and traditions with honor and integrity. I am grateful for their many contributions to the heritage of our country and applaud their enduring spirituality. I salute the American Indian not only on American Indian Day, but every day of the year.●

● Mrs. HOLT. Mr. Speaker, the President and Congress have chosen May 13 as American Indian Day. At this time I want to call attention to the Maryland Indian Heritage Society which represents the majority of the estimated 7,000 or more Piscataway Indians as well as the cultural interests of other American Indians in

Maryland. The society is a well-organized, nonprofit organization which very successfully promotes Maryland's Native American Indian culture and history while providing a source of cultural and social interaction among American Indians of many tribes and groups across the Nation. I am very proud of the work that the society and its president, J. Hugh Proctor, are doing.●

GENERAL LEAVE

Mr. RICHARDSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

A WEST POINT SYNAGOGUE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. FISH) is recognized for 10 minutes.

● Mr. FISH. Mr. Speaker, a synagogue is under construction at the U.S. Military Academy at West Point, N.Y. Joseph C. Zengerle, a West Point graduate and former Assistant Secretary of the Air Force, has written what a synagogue at the Military Academy means to him, to our values as a people, and to our Nation. Representing West Point in Congress and serving on its Board of Visitors, I am inserting Mr. Zengerle's article in the CONGRESSIONAL RECORD for its insights into the significance of a synagogue in West Point.

A WEST POINT SYNAGOGUE

The Washington, D.C., area has recently been subjected to a series of anti-Semitic incidents in nearby Maryland and Virginia, with the painting of swastikas on Jewish synagogues and schools a dominant manifestation. It diminishes us all that ugly prejudice like this persists, particularly so near the capital. At such times, we look for evidence that contemptible behavior of this sort is deeply at odds with the fundamental character of our people. In this case, comforting evidence has just arisen from an unusually reliable source.

Ever since George Washington thought of establishing the United States' first military academy (and first engineering school) at West Point, it has helped to define, as well as preserve, what we are as a nation. Its alumni include two President's (Grant and Eisenhower), its cadets have produced unparalleled football (Blanchard and Davis), its motto (Duty, Honor, Country) represents a pre-eminent standard for public service, and its contributions to our armed forces in peace and war have been incalculable.

The rigor of West Point discipline and the strength of its traditions are well known. Incorporation of new ideas into this uniquely American institution requires a process of evolution not unlike that which shaped the rock-bound highland setting in which the academy rests. But befitting the force of an idea powerful enough to imbed itself in this environment, such an idea, once seated, acquires a permanence no less enduring than the long gray line itself. And because West Point is a national monument attracting nearly 3 million visitors yearly, the academy's adoption of an idea in its physical form has enormous symbolic significance as well. As Justice Oliver Wendell Holmes said, we live by symbols.

In January, 1983, ground was broken for the construction of the first Jewish chapel at West Point, at a time when the number of Jewish cadets is at its highest level in five years. The project, begun 17 years ago, is supported by private donations amounting to $5.5 million and by a Congressional appropriation of $500,000 to make necessary utility connections on the federal property. Of course, Jews have regularly held sabbath and other services at West Point, but always in a borrowed facility, not one they could call their own. Now, the planned 250-seat, 50-foot tall chapel, expected to be the most visited Jewish building in the United States, if not the world, will take its place among the Protestant and Catholic chapels as a memorable example to residents and visitors alike of the value our government places upon protecting these different religious commitments without violating the Constitution. (Mandatory chapel at West Point was disallowed by the Supreme Court over a decade ago.)

What, specifically, does it mean to have a West Point synagogue? Three interrelated answers seem to stand out. First, it has significance for Jews. The Israeli armed forces have shown that Judaism and effective military performance are far from incompatible. But military service in this country has not been an obvious choice for many Jews, perhaps in part due to an uncertainty about the opportunity for advancement of minority groups. The creation of a temple at the heart of the Army officer corps to take advantage of the spirit of public service that pervades the Jewish community must surely operate to dispel this notion. The opportunity, not to say demonstration, of full Jewish participation in American society is made evident by this undertaking.

Second, it has significance for our defense establishment. The encouragement of Jewish attendance at West Point reveals an emphasis on the pluralism of our military and its leadership of which the public may not be fully aware. For example, two Jewish graduates of the academy are serving as three-star generals today, one as Director of the National Security Agency and another as a deputy assistant secretary of defense. This emphasis may be more important during the absence of a draft when, as now, our uniformed ranks are filled exclusively by volunteers, leading some to worry about how representative of the population the military services are. Review of inconsistent service policies might also be stimulated, such as the Air Force uniform regulation—recently held unconstitutional and now on appeal—that is interpreted to forbid the wearing of yarmulkes with military dress.

Finally, a synagogue at West Point has a special significance for Americans generally. Whatever the force of law, voluntary action by vital institutions is the most meaningful showing of a genuine tolerance for diversity in our social order. The new chapel project not only institutionalizes that tolerance, but will also foster it by exposing more citizens to the Jewish place of worship than any other like structure in the country. In commenting on the project, the academy Superintendent said that domestic enemies, against whom all cadets take an oath to defend the United States, include those who would persecute individuals on the basis of race, religion or ancestry. When considering the recent anti-Semitic desecrations, it should be of some comfort to know that the spiritual heirs of Grant, Pershing, MacArthur, Patton, Bradley and Eisenhower are taking an oath of office to oppose precisely such bigotry, and that they have put their money where their mouth is.

JANUARY 28, 1983.●

THE LATE DAVID J. BROADHEAD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. MCKINNEY) is recognized for 5 minutes.

● Mr. McKINNEY. Mr. Speaker, on Wednesday, May 4, 1983, a very special friend passed away. David J. Broadhead was one of the most remarkable human beings it has ever been my good fortune and privilege to know. When David was a junior at Colgate University, he was involved in an automobile accident which left him a quadriplegic.

A tragedy such as this would have been enough for most people to just give up all hope. Not David. When I ran for Congress in 1970, David volunteered his services to the campaign. Arrangements were made with the telephone company for special equipment to be installed which would permit David to answer telephones in the campaign headquarters. This involved his actually coming to the headquarters every day, for 6 to 8 hours. In the 6 months he worked with us, David became an integral part of the staff. When things were at their worst and most hectic, and some of us were ready to tear out our hair, David stayed "cool" but also always seemed to have a "bon mot" which immediately cut through all the tension and put a smile on all our faces.

I often wish that David could have been a part of my staff here in Washington * * * there are countless occasions when I desperately needed his sharp wit to ease stressful situations.

As another example of his diligence and determination, David decided to finish his college education which has been interrupted so tragically by the automobile accident. Working with tapes and books, David received a bachelor of arts degree from Central Connecticut College. He consistently made every effort possible to better himself rather than to feel sorry for himself.

When David moved into New Horizons, a rehabilitation center/home in New Britain, Conn., everyone there immediately felt his presence. He got involved and got everyone else involved. As a result, he was elected to the board of directors at New Hori-

zons. In addition, he also served on the board of the Spinal Cord Injury Foundation, and was selected as a delegate to the President's Conference on the Handicapped here in Washington in 1982.

In early 1982, David was offered a job which involved his commuting from New Horizons to Hartford every day. Some in David's situation would have hesitated undertaking such a task. David had no qualms whatsoever. He loved his work.

In short, David was a unique person. His presence will be missed by many but our memories of his remarkable wit, sense of humor, and outlook on life will live on. I consider myself fortunate to have known him.●

PUBLIC UTILITY HOLDING COMPANY ACT AMENDMENTS OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 10 minutes.

● Mr. CORCORAN. Mr. Speaker, with my distinguished colleagues, Mr. TAUZIN and Mr. BLILEY, I am today introducing the Public Utility Holding Company Act Amendments of 1983. This legislation reforms the Public Utility Holding Company Act of 1935 while continuing the very necessary protections that the act offers to investors and consumers.

In the last Congress, on December 15, 1981, I introduced legislation (H.R. 5220) to amend one section of the Holding Company Act while other Members, including Mr. TAUZIN, introduced legislation to repeal the Holding Company Act in its entirety, a position advocated by the Securities and Exchange Commission. During the last Congress, hearings were held on this legislation by the Energy and Commerce Committee's Energy Conservation and Power Subcommittee, of which I was a member. As a result of these hearings, at which industry representatives, the SEC, State regulators and various other groups testified, I became convinced that, at the very least, meaningful reform of the Holding Company Act was required in the best interests of investors and consumers, the people whom the Holding Company Act was designed to protect.

Prior to the hearings by the Senate and House last Congress, I initiated a major survey of the 50 public utility commissions and over 100 utility holding companies and independent operating companies with respect to the Holding Company Act. After that October 1981 survey, I introduced H.R. 5220, the Public Utility Financial Reform Act on December 15. The bill being introduced today takes into full consideration the results of my 1981 survey and the testimony from the June 9, 1982, hearing by Chairman OTTINGER's subcommittee. My survey, including all of the responses, was included in the subcommittee hearing record (serial No. 97-165).

The Public Utility Holding Company Act Amendments of 1983 were crafted so as to reform a very technical statute in a manner that addresses in a satisfactory fashion the concerns that were raised by those groups that testified at Chairman OTTINGER's hearings in opposition to repeal of the Holding Company Act. Naturally, it is impossible to satisfy everyone. However, and I must stress the point that, in my judgment, the legislation we are introducing today, which is the product of roughly 6 months of deliberation, specifically addresses in all material respects the substantive concerns that were raised at last year's hearings. As such, I think in many respects it represents something of a consensus that should be supported not only by those who favor repeal of the Holding Company Act, but also by those who oppose such repeal.

The Holding Company Act was passed in 1935 to correct a series of abuses by electric and gas utility holding companies, notably excessive pyramiding of corporate structures and stock watering. At that time, a handful of holding companies controlled virtually the entire utility business in the Nation. These holding companies operated in disparate parts of the country and were not subject to effective State regulation.

In the view of the Congress, the power and interstate character of these holding companies rendered State control over such abuses ineffective and required that authority over them be conferred upon the SEC. The principal purpose of the Holding Company Act, as noted in the legislative history, was to insure effective State regulation by reorganizing these holding companies into geographically contiguous units. Virtually all of the questionable practices the Holding Company Act was designed to correct were securities and accounting ones, not unique to the utility industry. As such, they probably would have been eliminated over time by the then-new Securities Act of 1933 and the Securities Exchange Act of 1934, both of which turned out to be far more effective than anticipated. Accounting standards and practices have improved dramatically since the mid-1930's. Moreover, the regulation of public utilities on the State level is considerably more effective today than when the Holding company Act was passed, since State utility laws have now evolved into strong, comprehensive regulatory systems. Thus, present Federal and State regulation is drastically different from that of the early 1930's, and there is little likelihood those problems would recur if the Holding Company Act were reformed.

Identical legislation (S. 1174) was introduced on April 28 in the Senate by Senators D'AMATO and JOHNSTON. It is my understanding that Senator D'AMATO's Securities Subcommittee intends to hold hearings on such legislation on May 25 and 26. I hope that this legislation will also be the subject of early hearings in the House. It may well be appropriate to consider other relevant Federal laws, such as Federal Power Act, in this connection. I was particularly pleased to hear of the interest in this issue expressed by Energy and Commerce Committee subcommittee Chairmen OTTINGER and WIRTH at last week's full committee mark-up of the SEC authorization legislation. I look forward to working with my fellow Energy and Commerce Committee members as we pursue this issue.

Before concluding, at the hearings that were held in the last Congress on repeal of the Holding Company Act, testimony was offered by the Nassau County Association of Plumbing-Heating-Cooling Contractors to the effect that repeal of the Holding Company Act would hurt their membership. At those hearings, it was pointed out rather clearly that their concerns stemmed not from repeal of the Holding Company Act which now permits diversification by utilities into energy conservation, but rather from the Residential Conservation Service and the Commercial and Apartment Conservation Service programs. In my judgment such programs should be repealed, and I am an original cosponsor of H.R. 2283 which, among other things, does just that. I joined Mr. MOORHEAD and others on March 23 of this year in introducing H.R. 2283, the Energy Consumer Regulatory Reform Act of 1983.

Naturally, I share concerns about anticompetitive behavior in all segments of American industry. That, of course, is the issue that our antitrust laws properly address.

Mr. Speaker, I consider the Public Utility Holding Company Act Amendments of 1983 to be a reasonable, responsible regulatory reform package that has been specifically tailored to protect investors and consumers while reducing undue regulatory burdens. Particularly as a member of the Energy and Commerce Committee, I look forward to addressing this matter in the ensuing months.●

ISRAELI INDEPENDENCE DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, it is an honor and a pleasure for me to salute the people of Israel on the occasion of the 35th anniversary of the

founding of their nation. At midnight, May 14-15, 1948, the fifth and sixth days of Iyar, 5708, under the Jewish calendar, the Israeli people proclaimed their independence under the most adverse of conditions and founded the Republic of Israel.

An excerpt from the book entitled, "Facts about Israel," follows regarding Israel's war for independence, a sad time in the nation's history when 6,000 Israelis were killed, which amounted to about 1 percent of the entire population at that time:

Israel's War of Independence began with a series of Arab attacks on the Jewish community, in open defiance of the United Nations resolution of November 29, 1947, which partitioned Palestine into a Jewish and an Arab state. Although the Jews were awarded the smallest territory possible, they accepted the resolution, hoping this compromise would lead to a peaceful solution of the dispute. The Arabs, however, rejected the UN plan and attacked the Jews. On May 15, 1948, the regular armies of Egypt, Transjordan, Iraq, Syria and Lebanon invaded. Azzan Pasha, Secretary-General of the Arab League, proclaimed in Cairo: "This will be a war of extermination and a momentous massacre . . ."

He was wrong. The fighting was long and bloody (6,000 Israelis were killed), but Israel triumphed. The invaders were driven back, and during 1949, separate armistice agreements were signed between Israel and Egypt, Jordan, Lebanon and Syria. The stated purpose of these agreements was ". . . to facilitate the transition from the present truce to permanent peace." Arab intransigence soon rendered this wishful thinking.

Founded in difficult circumstances by a people who had suffered some of the most severe persecution in the history of mankind, Israel's Government is based on the noble ideals of freedom and Israel's people have worked hard and fought valiantly to make theirs a strong and prosperous nation.

Mr. Speaker, the "Hatikvah," Israel's national anthem follows as well as an overview of the nation's governmental organization as excerpted from the book "Facts about Israel."

HATIKVAH—THE NATIONAL ANTHEM

So long as still within our breasts
The Jewish heart beats true,
So long as still towards the East,
To Zion, looks the Jew.

So long our hopes are not yet lost—
Two thousand years we cherished them—
To live in freedom in the Land
Of Zion and Jerusalem.

Israel is a secular, parliamentary, democratic republic. Elections to the Knesset are universal, countrywide, secret and proportional. Every citizen, man or woman, is eligible to vote from the age of 18 and to be elected to office from the age of 21. The voter casts his ballot for the party list of his choice, the country forming a single 120-member parliamentary constituency. Freedom of speech and assembly, of the press and political affiliation, of strike and demonstration and the individual's right to vote as he sees fit are enshrined in law and tradition.

THE PRESIDENT

The Head of State, resident in Jerusalem, bears the ancient Hebrew title of *Nasi*. He is elected by the Knesset and may hold office for no more than two consecutive five-year terms. He accepts the resignation of the Government, and sets in motion the process of forming a new Cabinet by conculting representatives of the parliamentary parties before entr"sting a given Member with a Cabinet l ,st. The President is empowered to pardon offenders and reduce sentences. He signs all laws (except those concerning his own powers), appoints diplomatic representatives of the State and accepts the credentials of foreign envoys. He appoints all judges, the State Comptroller and the Governor of the Bank of Israel.

In 1978, Yitzhak Navon, a member of the Labor opposition and a man of letters, became the fifth President of the State of Israel. Previous Presidents were: Dr. Chaim Weizmann, Yitzhak Ban-Zvi, Zalman Shazar and Professor Ephraim Katzir.

THE GOVERNMENT

A Cabinet headed by a Prime Minister is the main policy-making body of the State.

The Government as a body is responsible to the Knesset, which must approve its composition and policies. The Prime Minister must be a member of the Knesset, but other Ministers need not (although most usually are). There is no limit to the number of Ministers the Prime Minister may appoint.

Once the Cabinet gains the confidence of the Knesset and majority support, it may decide foreign, defense, internal and economic policies, bringing each before the House for its acceptance. It holds its regular sessions every Sunday in Jerusalem. The Cabinet initiates the bulk of the legislation, but there is provision for Private Members' Bills; these Bills are usually drafted by the Ministry of Justice and presented by the Minister responsible.

The Cabinet takes office for a four-year term after a vote of confidence, but the term may be shortened if the Prime Minister resigns (or dies) or a majority of the Knesset refuses to support a government proposal. If a Minister resigns, the Prime Minister may select a replacement, who is subject to Knesset confirmation.

The first Prime Minister of Israel was David Ben-Gurion (1948-54); the second, Moshe Sharett (1954-55); the third, Ben-Gurion for a second term (1955-62); the fourth, Levi Eshkol (1962-68); the fifth, Golda Meir (1968-74); the sixth, Yitzhak Rabin (1974-77) and the seventh and present Prime Minister, Menachem Begin (1977-).

In December 1976, Rabin (and his Cabinet) resigned, after he had forced the three Ministers of the National Religious Party out of the Government. The NRP's abstention on a Knesset vote of confidence forced Rabin's resignation under provisions of the law. He remained Prime Minister in an interim government until national Knesset elections were held in May 1977.

In these elections, for the first time in the 29-year history of the State, a party other than the Israel Labor Party won a plurality in the Knesset. The party was the Likud, which obtained 45 seats in the Ninth Knesset, compared to 32 for the Labor Alignment.

On June 20, 1977, Menachem Begin, head of the Likud Party presented the new Government to the Knesset and became Prime Minister of Israel. Initially, the new Government was composed of a four-party coalition (Likud, National Religious Party, Agudat Israel and Poalei Agudat Yisrael) which—together with Mr. Moshe Dayan, a former member of the Labor Party who agreed to serve as Foreign Minister in the New Government—commanded 63 votes in the 120-member Knesset. Four months later, the Democratic Movement for Change (DASH) won some seats, and the Government broadened its base to 78, nearly two-thirds of the total number of seats in Israel's legislative body. On September 14, 1978, DASH split into CHAI, SHAI and YA'AD.

THE KNESSET

The supreme legislative body of the State of Israel is the Knesset, a single-chambered house of 120 Members, who are elected every four years in a general election; the Knesset may dissolve itself and call new elections before the four-year term is up. Members are elected from party lists; in the event of death or resignation, a successor is drawn from these same lists.

The Knesset is charged with approving the State Budget, but its main tasks are to legislate and to inquire into the workings of the Executive, which it does in public session, and watch over the closed proceedings of its 10 committees.

Members may put questions to any Minister, who must reply within 21 days; submit motions for the agenda, calling for a general debate on any subject not included in the regular schedule set up by the Cabinet, and introduce Private Bills. Any Party may call for a vote of no-confidence, and it takes precedence over all other items on the agenda. The Knesset makes its own working rules, but in drawing up the agenda, the Speaker is usually swayed by the Government's priorities.

All Members are protected by an Act of Immunity from prosecution or arrest for anything they say or do in the course of their parliamentary duties. Arab and Druze Members may address the House in Arabic; simultaneous Hebrew-Arabic and Arabic-Hebrew translations of speeches are provided.

The Speaker of the Knesset presides over the public sessions; each term, the Knesset either elects a new Speaker or re-elects the incumbent.

Mr. Speaker, I am delighted to join my colleagues in congratulating the people of Israel on the occasion of this 35th anniversary of the birth of their nation. I wish peace and prosperity to the people of Israel, and I extend my greetings to all people of Jewish descent, in my own city of Chicago and throughout the world, who are joining in this celebration.●

INTRODUCTION OF THE NATIONAL HOSTEL SYSTEM PLAN ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, today, I join my colleague from Nebraska, Mr. BEREUTER, in introducing legislation which would take an important first step toward placing America on equal footing with its European neighbors in two important respects: First, providing pleasant, low-cost accomoda-

tions to foreign travelers; and second, enhancing the travel and recreational opportunities available to our own country's youth. Today, we introduce the National Hostel System Plan Act of 1983.

Mr. Speaker, Americans and visitors of other nationalities in European countries enjoy a choice of over 5,000 hostels in which they may arrange an overnight stay. However, travelers in the United States—a country which itself is considerably larger than the entire European Continent—may choose from no more than 280 hostels scattered across the country. Ours is the only nation in the world with hostels which receive neither governmental assistance nor recognition. The limits to our Government's interest in hostels are rather pointedly evidenced by the relative paucity of hostels in this country.

The National Hostel System Plan Act would direct the Secretary of the Interior—in consultation with other Federal agencies and a private, nonprofit hostel organization—to draft a national plan for guiding the development and management of an American hostel system within two complete fiscal years after the act becomes effective. The plan would include a current inventory of hostels, an assessment of the potential for establishing a viable national hostel system, a description of operating standards, and an inventory of bicycle routes and trails which could serve to facilitate access to hostels. Upon completion, the plan would be submitted to Congress for consideration.

An American hostel system would provide a number of significant benefits to the country as a whole, as well as those travelers it served. Such a hostel system would enable people of all ages to enjoy our Nation's monuments, National parks, its National forest system, and its historic cities by providing inexpensive, wholesome overnight housing accessible to travelers.

Currently, travelers in this country may stay in hostels established along the scenic Pacific coast, in historic Philadelphia, in old New England, under Georgia pines, and the towering Rocky Mountains. Despite the unforgettable recreational and travel opportunities such hostels may offer, our country still lacks a comprehensive hostel system. More important, the Nation still lacks a comprehensive view of its facilities, its resources, the viability, and the need, for a national hostel system. The basis upon which to make an informed decision regarding a hostel system simply does not exist. A hostel system plan such as proposed by this legislation is an indispensable preliminary step toward providing low-cost, easily accessible accomodations in this country for young and old alike.

The National Hostel System Plan Act would not authorize the expenditure of any additional funds, outside of administrative costs for preparing the system plan. The act would provide much-needed guidance for Federal agencies in the formulation of a national hostel plan, and would provide for a comprehensive assessment of the resources which could be devoted to a national hostel system.

"Travel" Francis Bacon wrote, "in the younger sort, is a part of education; in the elder, a part of experience." The benefits and joys of travel are known to us all. Especially in these difficult economic times, the need for low-cost travel opportunities making travel accessible to young and old alike is particularly compelling. During the 96th Congress, this body recognized the need for a national hostel system plan in approving legislation closely resembling the bill we are introducing today. I am hopeful that this Congress can exercise similar good judgment in insuring the passage of this important bill. I commend this much-needed and sensible legislation to my colleagues, and urge their prompt consideration of it.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. MAZZOLI) is recognized for 5 minutes.

● Mr. MAZZOLI. Mr. Speaker, I was unavoidably absent on Monday, May 9, 1983. Had I been present, I would have voted:

"Yea" on rollcall No. 90, passage of H.R. 2357, to provide for an increase in the number of members of the Congressional Award Board;

"Yea" on rollcall No. 91, passage of H.R. 2173, the Contract Services for Drug Dependent Federal Offenders Act amendments;

"Yea" on rollcall No. 92, passage of H.R. 2174, Federal product antitampering legislation;

"Yea" on rollcall No. 93, passage of S. 653, to establish a Foundation for the Advancement of Military Medicine; and

"Yea" on rollcall No. 94, adoption of the rule for the consideration of H.R. 2175, the Justice Assistance Act amendments.●

JUSTICE ASSISTANCE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. STARK) is recognized for 5 minutes.

● Mr. STARK. Mr. Speaker, I was glad to join my colleagues in the overwhelming approval of H.R. 2175, the Justice Assistance Act. It is my hope that the new Office of Justice Assistance will effectively administer the new block grant funds under the act.

Eighty percent of the funds allocated under the Justice Assistance Act will be set aside for block grants. States will have the opportunity to channel funds into programs at both the statewide and local level that have proven to be effective efforts in our fight against crime. Community and police anticrime program, those small-scale efforts that can start as neighborhood block watches and flourish into valuable neighborhood and even citywide crime prevention efforts are included in the block grant's eligible uses. My own Ninth District in California has shown that the small scale efforts are often the most effective.

The block grant provisions also call for funds to be spent in the areas of arson, white collar and organized crime, public corruption, juvenile crime, and alternatives to detention, jail and prison for nondangerous offenders. All these are areas of need in any united effort against crime. Project Intercept, a pretrial diversion program in Hayward, Calif., which has faced deep funding cuts over the years may now have the chance to survive.

One of the areas of law enforcement legislation that I have actively participated in is the effort to see that the problem of prison overcrowding is eased. H.R. 2289, which I introduced in March, would add correctional facilities to the list of eligible uses of surplus Federal lands. As pointed out in the Attorney General's report of the Task Force on Violent Crime, this concept is a high Government priority. More than 30 States are under court order to alleviate prison overcrowding. We cannot expect that those we detain in our jails and prisons will want to take responsible roles in our communities, if the conditions under which they are detained are unsanitary, unsafe, and even inhumane. In addition, conditions of overcrowding foster riots, escapes, and danger to the surrounding communities. Programs such as those designed to alleviate prison and jail overcrowding are also included in the block grant programs and I hope my colleagues on both sides of the aisle will join in these efforts.

The Justice Assistance Act is an effort to streamline some of the complicated administrative problems encountered within the Law Enforcement Assistance Administration while recognizing the need to pay attention to ever-looming budget deficits. It is most valuable aspect is its emphasis on local programs, community participation, and innovative efforts. Congress should indeed provide help to those on the front lines in the war against crime—and the Justice Assistance Act provides the first step.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. MICHEL (at the request of Mr. LOTT), for today, on account of illness.

By unanimous consent, leave of absence was granted to Mr. LEVINE of California (at the request of Mr. WRIGHT), for today (after 3:40 p.m.), on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MCGRATH) to revise and extend their remarks and include extraneous material:)

Mr. FISH, for 10 minutes, today.
Mr. MCKINNEY, for 5 minutes, today.
Mr. GILMAN, for 60 minutes, on May 18.
Mr. CORCORAN, for 10 minutes, today.

(The following Members (at the request of Mr. GARCIA) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 30 minutes, today.
Mr. PANETTA, for 5 minutes, today.
Mr. MAZZOLI, for 5 minutes, today.
Mr. CROCKETT, for 5 minutes, today.
Mr. STARK, for 5 minutes, today.
Mr. ADDABBO, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. FISH, to revise and extend his remarks in the body of the RECORD immediately preceding vote on Clinch River breeder reactor.

(The following Members (at the request of Mr. GARCIA) and to include extraneous matter:)

Mr. HOYER in two instances.
Mr. GUARINI.
Mr. MAZZOLI in two instances.
Mr. MINETA.
Mr. LIPINSKI.
Mr. FAUNTROY.
Mr. KASTENMEIER.
Mr. CHAPPELL in two instances.
Mr. DORGAN.
Mr. GAYDOS in two instances.
Mr. GEJDENSON.
Mr. RICHARDSON.
Mr. PEASE.
Mr. JENKINS in two instances.
Mr. OBEY.
Mr. HUBBARD.
Mr. YOUNG of Missouri.
Mr. DINGELL.
Mr. WAXMAN in two instances.
Mr. PEPPER.
Mr. ZABLOCKI in two instances.
Mr. AUCOIN in two instances.
Mr. JONES of Tennessee.
Mr. BERMAN.
Mr. CONYERS in two instances.
Mr. BONIOR of Michigan.
Mr. LANTOS in two instances.
Mr. TORRES in two instances.
Ms. MIKULSKI in two instances.
Mr. FASCELL in four instances.
Mr. OTTINGER.
Mr. SHANNON.
Mr. BENNETT.
Ms. KAPTUR.
Ms. OAKAR.
Mr. DELLUMS.
Mr. MCDONALD in 10 instances.
Mr. ACKERMAN.
Mr. ASPIN.
Mr. EVANS of Illinois.
Mr. HARKIN.

(The following Members (at the request of Mr. MCGRATH) and to include extraneous matter:)

Mr. GREEN.
Mr. BOEHLERT.
Mr. YOUNG of Alaska.
Mr. RINALDO.
Mr. LENT.
Mr. WEBER in two instances.
Mr. HORTON.
Mr. FORSYTHE.
Mr. MOORE.
Mr. GUNDERSON.
Mr. MADIGAN in three instances.
Mr. CORCORAN.
Mr. SAWYER.
Mr. ERLENBORN.
Mr. MACK.
Mr. CONTE.
Mr. HUNTER.
Mr. COURTER.
Ms. SNOWE.

ADJOURNMENT

Mr. RICHARDSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 38 minutes p.m.), under its previous order, the House adjourned until Monday, May 16, 1983, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1124. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to provide for changes in the dates for announcing national marketing quotas and related determinations for Fluecured, Burley, and minor kinds of tobacco; to the Committee on Agriculture.

1125. A letter from the Congressional Liaison, Commodity Futures Trading Commission, transmitting the Commission's 1982 annual report, pursuant to section 8(f) of the act of September 21, 1922, as amended; to the Committee on Agriculture.

1126. A letter from the Assistant Secretary of Defense (Comptroller), transmitting the first quarterly report of the value of property, supplies, and commodities provided by the Berlin Magistrate and under the German Offset Agreement, pursuant to section 719, Public Law 97-377; to the Committee on Appropriations.

1127. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting a report on real and personal property of the Department of Defense as of September 30, 1982, pursuant to 10 U.S.C. 2701; to the Committee on Armed Services.

1128. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend title 10, United States, Code to exempt certain physicians from the requirement for Senate confirmation prior to initial appointment as medical officers in the Armed Forces; to the Committee on Armed Services.

1129. A letter from the Military Executive, Reserve Forces Policy Board, Office of the Secretary of Defense, transmitting the annual report of the Reserve Forces Policy Board, pursuant to 10 U.S.C. 113(c)(2), together with a report on the readiness assessment of the Reserve components for fiscal year 1982; to the Committee on Armed Services.

1130. A letter from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

1131. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend title I of the Reclamation Project Authorization Act of 1972 as amended by Public Law 96-375; to the Committee on Interior and Insular Affairs.

1132. A letter from the Assistant Secretary of the Interior, transmitting a proposed plan for the use and distribution of the judgment funds awarded to the Salt River Pima-Maricopa Indian Community of Arizona by the U.S. Court of Claims in Docket No. 291, pursuant to section 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

1133. A letter from the Administrator, National Aeronautics and Space Administration, transmitting notice that the planned funding level for its physics and astronomy program is more than the amount authorized in NASA's fiscal year 1983 authorization act, pursuant to section 104(a) of Public Law 97-324; to the Committee on Science and Technology.

1134. A letter from the Chairman, Nuclear Regulatory Commission, transmitting the quarterly report on nondisclosure of safeguards information, pursuant to section 147e of the Atomic Energy Act of 1954, as amended; to the Committee on Interior and Insular Affairs and Energy and Commerce.

1135. A letter from the Assistant Secretary of the Army (Civil Works), transmitting the final environmental impact statement on the State Road Coulee project, Wisconsin, pursuant to section 404(r) of Federal Water Pollution Control Act; jointly to the Committees on Public Works and Transportation and Appropriations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DINGELL: Committee on Energy and Commerce. H.R. 2615. A bill to amend the Energy Conservation in Existing Buildings Act of 1976 to provide for the weatherization of the remaining eligible low-income dwelling units throughout the United States, to create additional employment in weatherization-related industries, and for other purposes; with an amendment (Rept. No. 98-108). Referred to the Committee of the Whole House on the State of the Union.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 2733. A bill to extend and improve the existing program of research, development, and demonstration in the production and manufacture of guayule rubber, and to broaden such program to include other critical agricultural materials; with an amendment (Rept. No. 98-109, Pt. I). Ordered to be printed.

Mr. ST GERMAIN: Committee on Banking, Finance and Urban Affairs. H.R. 2782. A bill to amend the Defense Production Act of 1950 to revitalize the defense industrial base of the United States; with an amendment (Rept. No. 98-110, Pt. I). Ordered to be printed.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 2936. A bill to amend title 38, United States Code, to increase the authorized number of members of the Board of Veterans' Appeals in the Veterans' Administration, and for other purposes (Rept. No. 98-111). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. H.R. 2592. A bill to transfer from the Director of the Office of Management and Budget to the Administrator of General Services the responsibility for publication of the catalog of Federal domestic assistance programs, and for other purposes (Rept. No. 98-112). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on the Department of Agriculture's payment-in-kind program (Rept. No. 98-113). Referred to the Committee of the Whole House on the State of the Union.

H. Res. 135: Mr. LONG of Louisiana and Mr. HAWKINS.

H. Res. 172: Mr. ACKERMAN, Mr. ADDABBO, Mr. ANNUNZIO, Mr. APPLEGATE, Mr. BEVILL, Mr. BIAGGI, Mr. BOLAND, Mr. BORSKI, Mr. BOUCHER, Mr. BROWN of California, Mr. CARR, Mr. CONYERS, Mr. CORRADA, Mr. DANIEL, Mr. DERRICK, Mr. DIXON, Mr. DONNELLY, Mr. DOWNEY of New York, Mr. DUNCAN, Mr. DURBIN, Mr. DWYER of New Jersey, Mr. DYSON, Mr. ECKART, Mr. EDGAR, Mr. FAUNTROY, Ms. FERRARO, Mr. FISH, Mr. FLORIO, Mr. FOGLIETTA, Mr. FORD of Tennessee, Mr. FORD of Michigan, Mr. FOWLER, Mr. FRANK, Mr. GARCIA, Mr. GAYDOS, Mr. GILMAN, Mr. GRAY, Mr. GUARINI, Mr. HARRISON, Mr. HAWKINS, Mr. HORTON, Mr. HOWARD, Mr. HUBBARD, Mr. HUGHES, Mr. KILDEE, Mr. KINDNESS, Mr. KOLTER, Mr. LANTOS, Mr. LEVIN of Michigan, Mr. MCCLOSKEY, Mr. MCDADE, Mr. MARTINEZ, Mr. MINISH, Mr. MOAKLEY, Mr. MOLLOHAN, Mr. MORRISON of Connecticut, Mr. MRAZEK, Mr. MURPHY, Mr. MURTHA, Mr. NATCHER, Ms. OAKAR, Mr. OLIN, Mr. OTTINGER, Mr. OWENS, Mr. PEPPER, Mr. PRICE, Mr. QUILLEN, Mr. RAHALL, Mr. RATCHFORD, Mr. RINALDO, Mr. RODINO, Mr. ROE, Mr. ST GERMAIN, Mr. SCHEUER, Mr. SHANNON, Mr. SKELTON, Mr. SMITH of New Jersey, Mr. SPRATT, Mr. STOKES, Mr. STRATTON, Mr. STUDDS, Mr. TORRES, Mr. TORRICELLI, Mr. TOWNS, Mr. TRAXLER, Mr. VOLKMER, Mr. WHEAT, Mr. YATRON, and Mr. YOUNG of Missouri.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 100: Mr. MCGRATH.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

89. By the SPEAKER: Petition of the Military Chaplains Association of the USA, Bethesda, Md., relative to the POW's and MIA's; to the Committee on Armed Services.

90. Also, petition of the City Council, New York, N.Y., relative to the release of Boris Ginis; to the Committee on Foreign Affairs.

91. Also, petition of the City Council, New York, N.Y., relative to Aleksandr Khait; to the Committee on Foreign Affairs.

92. Also, petition of the City Council, New York, N.Y., relative to the release of Mark Ocheretyansky; to the Committee on Foreign Affairs.

EXTENSIONS OF REMARKS

A LETTER TO THE PRESIDENT ON ARMS CONTROL AND STRATEGIC MODERNIZATION

HON. NORMAN D. DICKS
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. DICKS. Mr. Speaker, several of my colleagues and I have been working with the administration in an effort to forge a bipartisan consensus on the issues of arms control and strategic modernization. Our efforts to date have been promising and I am hopeful that continued efforts can produce real progress in lessening the possibility of nuclear confrontation. In order to clarify the specific concerns we have expressed and the President's response to them, I include in the RECORD the text of our letter to the President, and his response.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., May 2, 1983.

The PRESIDENT,
The White House,
Washington, D.C.

MR. PRESIDENT: Your endorsement of the Scowcroft Commission report gives us reason for hope that it may be possible to move American policy on nuclear weapons and arms control forward, based on a durable bipartisan consensus.

We believe that the policy which the Report recommended, and which you have made your own, is correct—in its long-term dimensions. Arms control and force posture decisions should be integrated, and organized around the pursuit of stability. Stability, in turn, requires that neither the United States nor the Soviet Union possess the means to conduct a theoretically advantageous first strike. To achieve this condition requires that both sides reverse the trend toward more highly MIRVed ICBMs, and move toward a less threatening force based on single-warhead missiles, ideally in a program orchestrated through arms control.

The problem is that the Commission report asks us to accept not only its attractive long-term concept, but its immediate recommendation for the deployment of 100 MX. That missile has been mired in controversy for so long, and opposition to it is so entrenched, that its presence in the Commission report seriously endangers the entire enterprise. Some of us have voted against the MX on more than one occasion, but we are prepared to consider new arguments for it on the merits, and we are asking our colleagues to be similarly open-minded. But we must tell you in all candor, that of all the arguments presented in the Scowcroft report, on behalf of MX, only one is both new and of interest: that deploying the MX is a step which is consistent with, and necessary in order to begin, the long-term process towards stable forces.

In our view, the future of the MX turns precisely on whether this asserted connection between it and the process of long-run stabilization can be demonstrated. To do so requires at a minimum, assurances from you on certain key points:

That the United States' negotiating position in START will be speedily updated, in order to bring it into line with both the technical recommendations and the long-term objectives of the Scowcroft Commission report;

That in doing so, the United States will be able to show *how* the deployment of a given number of MX fits in with these objectives, in terms of its impact on the force posture of both countries;

That, in principle, plans for the deployment of MX, including both numbers and timing, can be influenced by the results of arms control; and

That, a major effort will be promptly undertaken to bring sharper focus to the proposed single-warhead ICBM, and to allay concerns that it cannot be realized in a reasonable period of time, at acceptable cost, in deployment modes that are both technically and politically realistic.

With the submission of your recommendations on MX basing, the legislative clock has begun to tick; moving toward a decision on flight testing and an acceptable basing mode which must be taken one way or the other, in the next month and a half. In isolation, the proposal to base MX silos is one which has already been rejected for good reason. What changes the prospects for MX flight testing is the context for MX created by the Scowcroft Commission report. That context, however, is not strong enough as it presently stands to be decisively persuasive. We believe that affirmation and assurances from you on the points we have raised would greatly help, and that we need such assurances before deciding whether or not to support congressional approval of flight testing.

We wish, moreover, to make clear that in our view, a decision to flight test the MX is both legislatively and logically distinct from a decision to procure the missile in any number for actual deployment. The question of deploying the MX should be dealt with only when and if it becomes possible to see: (1) that START has been brought into line with the recommendations and long-term goals of the Commission report; (2) that a case can be made showing in explicit terms how MX would fit into a stable US-Soviet nuclear relationship; and (3) that the Department of defense is finding sensible answers to engineering and cost questions related to the single-warhead ICBM. A follow-on to the Scowcroft Commission, of bipartisan nature, charged with advising you in the conversion of the Scowcroft panel's recommendations into arms control proposals, would also be highly desirable.

You may feel, with some justice, that the report and your endorsement speak for themselves. Unfortunately, neither the report nor your endorsement clearly answer the questions we think are critical. Meanwhile, statements in the press—attributed to "high ranking officials" in the Department of Defense and others, have already raised a suspicion that there are some in the Administration who embrace the Scowcroft Report not in its entirety, but only as a means to the end of securing Congress' approval for the deployment of the MX.

Mr. President, the effect that MX is likely to have on the Soviet Union will be determined by the effect it has on opinion in this country. We can agree with you that the Soviets are not altruists, and will have little incentive to bargain seriously if we voluntarily solve their problems for them. But if we pursue a decision on MX in a way which destroys, rather than consolidates a national consensus, then the Soviets are best advised to play a waiting game.

We believe achieving a bipartisan consensus is critically important to a successful arms control effort. All our past progress in arms control has been predicated on such a bipartisan approach. A debate limited to MX alone, without explicit clarification of its role in the long-term course recommended by your Commission on Strategic Forces cannot lead to such a bipartisan consensus, and will result in no real winners. We are prepared to make a good faith effort, in which we urge you to take the lead.

Sincerely,

Albert Gore, Jr.; Norman Dicks; Les Aspin; Vic Fazio; Thomas Foley; Richard Gephardt; Dan Glickman; Joel Pritchard; Lee Hamilton; and George O'Brien.

THE WHITE HOUSE,
Washington, May 11, 1983.

Hon. NORMAN D. DICKS,
House of Representatives,
Washington, D.C.

DEAR NORM: Thank you for your recent letter on our strategic modernization program and its relationship to our arms control proposals. Your letter represents the bipartisan spirit which I believe will help achieve our common goals of ensuring effective deterrent forces and equitable and verifiable arms reductions.

The fundamental U.S. goal in negotiations concerning arms reduction, and especially in our approach to the START negotiations, is to seek agreements that would enhance security and stability by reducing overall force levels while permitting modernization of U.S. forces necessary for a credible deterrent. As you know, the Scowcroft Commission noted that elements of our START proposal are consistent with and supportive of the Commission's findings. I agree wholeheartedly with the essential theme of the Scowcroft Commission's approach to arms control: the attainment of stability at the lowest possible level of forces.

The Scowcroft Commission's recommendations on modernization and arms control are integrally related. Our action with respect to these recommendations must be equally comprehensive. That is why I am now conducting a review of our START proposal with the intention of developing such modifications as are necessary to reflect the Commission's approach, which I share. To cite just one example, the Commission

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

report recommended that the proposed limit on deployed ballistic missiles currently contained in the U.S. START position be reassessed since it is not compatible with a desirable evolution toward small, single-warhead ICBMs. There are a number of alternative approaches available to integrate this and the other Commission recommendations into our approach to arms reductions. As modifications are made to our START proposal, I will continue to seek stability at the lowest possible level of forces.

The planned deployment of the Peacekeeper missile as proposed by my Administration is compatible with the long-term objective of the Scowcroft Commission Report. The Peacekeeper missile, deployed in a mix with small single-warhead ICBMs, would permit us to maintain the effectiveness of our deterrent and enhance stability while serving as a hedge against Soviet temptation to exploit their present advantage.

At the same time, let me emphasize that we do not seek a first strike capability. To this end, we have constrained the number of Peacekeeper missiles that we plan to deploy to the minimum number needed to assure the effectiveness of our deterrent and no more. Our task, of course, would be much easier if the Soviets would agree to work with us to reduce the ratio of accurate warheads to missile silos. Clearly, consistent with our national security requirements, the overall level of Peacekeeper deployment will be influenced by Soviet strategic programs and arms reductions agreements.

In addition, I fully recognize the central role that the small, single-warhead ICBM plays in the overall modernization program recommended by the Scowcroft Commission Report. We will promptly undertake a major effort to bring the proposal of a small, single-warhead ICBM to fruition on a high priority basis.

In considering the implementation of the essential ICBM modernization program, the Scowcroft Commission also recognized that a series of decisions involving both the Executive Branch and the Congress would be necessary in the months ahead in order to determine the future shape of our ICBM force. Further, it noted that not all of these decisions can or should be made in 1983. The deliberate approach to decision making proposed by a number of members of Congress is fully in keeping with the intent of the Scowcroft Commission Report. I fully recognize that a lasting consensus on such an important issue must be built up carefully and I intend to take the time necessary to forge that lasting consensus.

I urge all concerned, however, to keep in mind that if we draw out critical elements of the decision-making process unnecessarily, we encourage the Soviets to delay in negotiations while continuing apace in their own weapons modernization programs. To avoid this, I am seeking a clear show of support from Congress to signal U.S. resolve. A case in point is the clear necessity of approving funds promptly to procure Peacekeeper missiles. Working together, this should be achievable while simultaneously meeting our mutual desire to deal with deployment issues, whenever possible, in a careful, deliberate manner.

Finally, I want to stress the extraordinary contribution made by the Scowcroft Commission. It provided an opportunity for nonpartisan analysis of an exceptionally difficult issue as a prelude to obtaining necessary bipartisan support for critically needed modernization of our strategic forces. While not prescribing the details or the timing, the Commission report suggested certain directions that the continued evolution of our complementary strategy for arms reduction could take. Over the short term, follow-on arrangements involving members of the Commission, as well as close coordination with the Congress, will be extremely helpful both technically and politically in thinking through this evolution. However, we are giving careful consideration to determining which follow-on arrangements best meet our common objectives.

In this regard, I do see merit in a panel with bipartisan composition and with staggered terms of membership to provide advice and continuity in this area. I will work with the Congress, building upon the experience of the Scowcroft Commission, to strengthen and supplement our consultative and advisory processes to assure a lasting, national, bipartisan consensus concerning arms control initiatives—a consensus which will deserve to be sustained from one Administration to the next.

Sincerely,

RONALD REAGAN.●

DELAND CHURCH CELEBRATES 100 YEARS

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. CHAPPELL. Mr. Speaker, it pleases me greatly to recognize St. Peter's Church in DeLand, Fla., on the occasion of its 100th anniversary.

This church has grown out of the need for four Catholic families whose only contact with their church was through a priest who would travel the 70 miles separating these families from their nearest Catholic Church in order to say mass for these Christians.

Perhaps the attached article from the Little Sentinel, a fine newspaper in my Fourth Congressional District of Florida, can assist in telling this marvelous story of American churchlore; certainly a message filled with spiritual warmth. I am very proud to serve a constituency in which such a church serves the spiritual needs of the people.

The article follows:

[From the Little Sentinal, Apr. 12, 1983]

DELAND CHURCH CELEBRATES 100 YEARS

(By Rick Tonyan)

DELAND—One hundred years ago, four Roman Catholic families lived in or near a small railhead community on the St. Johns River.

The Rev. William Kenny, learning of their isolation from a church, hitched a horse to a buggy and drove about 70 miles from St. Augustine to serve them.

Since there was no church, the priest gathered the four families at Fairview Plantation, the home of one of the worshippers, and celebrated the first Mass in DeLand on June 7, 1883.

Over the last 100 years, Catholic families in the DeLand area have grown to 1,500. The traveling priest has been succeeded by a staff of resident clergy. Area Catholics now may go to Mass any day in the 1,000-seat St. Peter's Church.

During the years of growth, St. Peter's parishioners sent their sons off to five wars, withstood the anti-Catholicism that was rampant in the nation during the 1920s and adapted to worldwide changes in the structure of the Mass and the Roman Catholic church.

Still, many things remain unchanged since Kenny celebrated that first Mass, the parishioners say.

The church itself, at the corner of New York and Delaware avenues, is a few blocks from where Fairview Plantation stood.

Members of those first four families were business leaders in early DeLand, helping to build the commercial life of west Volusia County while trying to tend to a variety of community spiritual needs.

St. Peter's parishioners spent their money, time and effort to build the church, but it was the work they put into building the community that has kept the congregation growing for the past 100 years, said the Rev. Joseph Nolin, pastor for the last 11 years.

"It's not just a matter of construction," Nolin said. "The parish goes out to the community. There's so much community activity, that nobody knows what all is going on."

St. Peter's has ministries in west Volusia nursing homes, hospitals, the county jail and the state prison. The Rev. Jose Navarez travels from the church to celebrate Masses for Hispanic farm workers at the Trinity United Methodist Church in Seville.

Nolin said he believes St. Peter's will continue to grow with the west Volusia community.

"People are moving in continually," he said. "The influx is heavier this year than last."

DeLand area Catholics were able to stop celebrating Masses in their homes in 1884, when a chapel that seated 60 people was built near the spot where St. Peter's now stands.

Parishioners kept enlarging and remodeling the church until it became the present, Spanish style building, parish historian Irene Nardandrea said.

The church observed its centennial Sunday, when Bishop Thomas J. Grady, of the Diocese of Orlando, assisted by former priests of the parish, celebrated Mass.●

NATIONAL HISTORICAL PUBLICATIONS AND RECORDS COMMISSION

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. HORTON. Mr. Speaker, I wish to share with my colleagues a letter which I sent to my colleague from California, ED ROYBAL, chairman of the Subcommittee on Treasury—Postal Service—General Government appropriations. This letter describes the importance of the National Historical Publications and Records Commission in making available documents of special significance to our understanding of American history.

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 26, 1983.

Hon. EDWARD R. ROYBAL,
Chairman, Subcommittee on Treasury—Postal Service—General Government, Capitol, Washington, D.C.

DEAR ED: I wish to express to you and the Subcommittee my support for the National Historical Publications and Records Commission and the important function which it fulfills in the compilation and dissemination of important historical documents.

As elected Representatives, we are well aware of the importance of maintaining accurate and complete historical documents. It is from recorded history that we learn from the experiences of our predecessors and strive to avoid the mistakes of the past. The National Historical Publications and Records Commission (NHPRC) is providing all Americans with access to previously unavailable historical materials. Projects currently being supported by the NHPRC include the Founding Fathers Papers, INC (Adams, Jefferson, Franklin, Madison, Washington), the Consortium for Documentary Projects in Women's History (Addams, Goldman, Stanton-Anthony), the Afro-American Editing Consortium (Black Abolitionists, Douglass, Garvey and Freedom History), the Civil War Presidential Papers (Davis, Grant, Johnson), Soldier Statesman of Modern America (Eisenhower, Marshall) and Foundations of the American Constitutional System.

In light of these important contributions to our knowledge of American history, I am strongly in support of the appropriation of $3,000,000 to continue the work of the NHPRC. The Commission has maintained an outstanding track record for gathering private sector support. This is only possible, however, as long as they have the ability to leverage these private moneys with Federal funds. It is my sincere hope that through this nominal Federal contribution we will continue to recognize the outstanding contribution which the Commission makes to our understanding of American History.

Thank you very much for the opportunity to express my support for the National Historic Publications and Records Commission.

With best wishes,

Sincerely,

FRANK HORTON.●

RETURN TO GOLD?

HON. VIN WEBER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1982.

● Mr. WEBER. Mr. Speaker, the Cato Institute held a conference in January of this year to consider the search for stable money. Invited to attend this conference were some of the Nation's leading experts on monetary policy.

The institute has recently published in its monthly Policy Report excerpts from the conference. All are quite noteworthy and I would suggest my colleagues contact the institute for a copy of the conference report.

One excerpt which caught my attention was from remarks made by Alan Reynolds, vice president and chief economist at Polyconomics, Inc., on the historical stability of money under a gold standard.

I would commend Mr. Reynolds' comments to my colleagues.

RETURNING TO GOLD

(By Alan Reynolds)

The current period is by no means the first time that a major nation has attempted to maintain the value of the unit of account by regulating the volume of some media of exchange. The United States was on such a system from 1776 to 1792, for example, and again from 1860 to 1878. Britain used managed money from 1797 until 1821. France tried it before Napoleon and again after World War I.

During the U.S. Greenback era, William Graham Sumner wrote:

"Nearly every nation which has ever used paper money has fixed its amount, and set limits which it has solemnly promised again and again not to pass, but such promises are in vain. A man might as well jump off a precipice intending to stop half way down. . . . In its more general effects, the paper currency with a fixed limit produces a steady advance in the rate of interest, and also a reduction in prices. . . . If we had a currency of specie value, we should get just as much as we need, and then we should know how much that is, but then, too, we should no longer care."

I have elsewhere prepared a detailed history of five past periods of chronic monetary instability, and the forces that very gradually led back to restoration of a metallic standard. Periods of fiat money—those that stopped short of runaway hyperinflation—had several features in common:

A return to gold was always initiated during the deflationary aftermath of a relatively modern inflation

Government budgets were an acute concern, usually with a combination of deficits, growing interest expense, and tax resistance.

There had already been many years of experience in trying to regulate or limit the quantity of money.

Interest rates were always historically high, particularly in real terms.

The immediate results of returning to gold were also similar:

Real output always expanded very rapidly for at least four years, thus solving the budgetary programs.

The money supply grew even more rapidly, usually at annual rates exceeding 10%.

There was no sustained inflation or deflation.

Interest rates were always reduced, stock markets always rallied, and long-term rates never exceeded 5-6%.

The practical answer to the question "why gold?" is that it always works, while nothing else ever has. The burden of proof is not on gold.

The more abstract case for gold rests on the need to link the word "dollar" to something real, something of reasonably predictable value. Doing so reduces information costs, lengthens time horizons, and strengthens property rights.

The case for gold is not simply a way of depressing some price index—an ordinary credit crunch can do that, for awhile. Instead, the purpose of a firm monetary standard is to utilize money's potential for facilitating economic progress. The case for gold is the case for growth.●

ILLINOIS AND MICHIGAN CANAL NATIONAL HERITAGE CORRIDOR BILL

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. LIPINSKI. Mr. Speaker, I would like to urge all Members of the House to work for the speedy passage of H.R. 2014, the Illinois and Michigan Canal National Heritage Corridor bill, currently pending in the Committee on Interior and Insular Affairs.

The Heritage Corridor bill, introduced by my esteemed colleague from Illinois, TOM CORCORAN, and of which I am an original cosponsor, is an important piece of legislation for Illinois and a new and daring piece of legislation for the country. The focus of the bill is twofold: To provide the framework for enhancing the cultural and natural resources of this historic corridor while at the same time making it more attractive for further economic development. The bill creates a unique national designation, called a Heritage Corridor, which requires no Federal role in land acquisition or in operation and maintenance, and no new environmental or access restrictions. Rather, a Federal commission is created to coordinate public and private involvement in the implementation of the legislation.

H.R. 2014 will give communities along this corridor the opportunity to attract new business and industry, as well as the benefit of national exposure as a historical landmark. The Fifth District has a particular interest in this legislation since the part of the corridor that passes through Chicago and its suburbs, and the fifth, is heavily industrialized.

The bill requires only a modest outlay by the Federal Government ($250,000 a year for the 10-year life of the commission) and its involvement is restricted to a nominal amount of administration.

What makes this bill unique is the Heritage Corridor designation. The responsibility falls on State, local, and private concerns—primarily the businesses and communities in the corridor—to carefully balance developmental, environmental, and recreational concerns. H.R. 2014 sets an example of direct local cooperation that can be followed across the Nation.

The State of Illinois General Assembly deems this issue to be so important that it passed Senate Joint Resolution No. 23, introduced by Hon. State Senator Leroy Walter Lemke, which today I proudly insert into the RECORD, urging the passage of H.R. 2014 and the concurrent Senate bill, S. 746. I hope that my colleagues will heed the advice of the Illinois General Assem-

bly and pass the Illinois and Michigan Canal National Heritage Corridor bill.

[State of Illinois, Eighty-Third General Assembly]

SENATE JOINT RESOLUTION No. 23

Whereas, The Congress of the United States is currently considering legislation which would protect and greatly enhance the beautiful and historic Illinois and Michigan Canal; and

Whereas, This legislation would establish the Illinois and Michigan Canal National Heritage Corridor, thereby creating the first nationally designated recreation area in Illinois; and

Whereas, The bill creates a new designation in the National Park System called the Heritage Corridor, and creates a Federal commission to coordinate and implement National Park Service goals in areas so designated; and

Whereas, This concept, which the Secretary of the Interior has termed daring and precedent-setting, has received enthusiastic support from many individuals and many Federal, State and local organizations; therefore, be it

Resolved, by the Senate of the Eighty-Third General Assembly of the State of Illinois, the House of Representatives concurring herein, that we strongly urge members of Congress to give their support to S-746 and H.R. 2014, a bill which would establish the Illinois and Michigan Canal National Heritage Corridor; and be it further

Resolved, That we pledge to give our full cooperation in the administration of this legislation if it is enacted; and be it further

Resolved, That copies of this preamble and resolution be sent to the President of the United States Senate, to the Speaker of the United States House of Representatives, and to the Illinois Congressional delegation.●

NATIONAL NURSING HOME WEEK—THE CHALLENGE IN LONG-TERM CARE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. BIAGGI. As an original member of the House Select Committee on Aging, I am proud to join with a number of my colleagues in noting National Nursing Home Week. As a cosponsor of the legislation which provided for this special celebration, I feel that it both appropriate and timely that we take time out to recognize the special people who reside in long-term care facilities in this Nation.

A look at the demographic changes which confront this Nation today and in the coming decades amply demonstrate that we must consider fundamental changes in our health care systems if we are to protect these vital services for all elderly Americans. The over 65 population is growing at a phenomenal rate and will comprise 14 percent of our total population by the year 2000. By 2080, there will be more than 18 million Americans over 85, representing 24 percent of the over 65 population. The combined age groups of 75–84 and over 85, which are now 40 percent of our older population, will represent more than half of this same age group by the year 2040. In all, the numbers bespeak the need.

The cost of health care, at the same time, has grown at a dramatic yet disturbing rate. Today, only 5 percent of all older Americans reside in nursing homes—1.5 million. Their percentage rises with age—with one-quarter of the total nursing home population over 85. The costs of such care now run $35,000 per bed, which does not even account for either inflation over time nor the actual costs associated with providing the health care. Thus, we have a growing population that is likely to contribute to the demand for nursing home care which is sure to generate increased costs.

The main Federal program which pays for nursing home care, medicaid, is also being pressured to provide greater numbers of services to expand the range of options of care for the elderly. Medicaid now spends approximately $16 billion annually on nursing home care which represents 45 percent of the total bill while medicare provide about 2 percent of the bill. We must work to insure that in the coming decades, we work to provide a range of long-term care options for the elderly so that nursing homes are not the only choice available to them for health care.

Not all elderly require—or desire nursing home care. Toward that end, I have introduced legislation, H.R. 76, which would provide for alternative to such care by giving families who care for their elderly relatives in the home a tax break of up to $500 per year. Most studies point to the family and the home as the preferred method of health care and we should continue to expand community-based health care options so that the elderly who wish to remain in the community should be allowed—and encouraged to do so. Tax credits is one method of providing for this.

Nursing homes serve a vital role in the health care needs of the elderly and we should remain an option—an affordable one—for all these services. This week is the appropriate time to recognize the special needs of some of the most frail and dependent in our society who reside in these homes.

In addition to protecting this need, we should continue to demand the highest possible safety standards for our nursing home residents. Toward that end, the Subcommittee on Human Services, last October, conducted heaings on the problem toxicity in nursing home fires. Simply stated, may of the interior components and furnishings of are not subject to regulation yet when such furnishings are exposed to heat, due to their composition, they emit deadly toxic fumes which are especially dangerous to the frail and dependent elderly in nursing homes. As a result of those hearings, I have introduced legislation, H.R. 2806, to require the Secretary of Health and Human Services to set standards in this area for nursing homes that are medicaid and medicare certified. The most dramatic demonstration of this problem was the recent jail fire in Biloxi, Miss., where a number of inmates died from such toxic smoke inhalation. The jail cells, lined with a synthetic padding, became veritable toxic infernos when the fire swept through the facility. The materials in the padding are quite common in nursing homes, such as mattresses and mattress covers. A safety standard such as this is a small, but significant step toward insuring that our Nation's 1.5 million nursing home residents can live free from fear or such tragedies.

Related to this point is my continued opposition to any and all efforts to weaken existing inspection standards in those nursing homes reimbursed by medicare or medicaid. There were efforts in the previous year to relax certain of these requirements but wisely Congress chose not to accept this. While there are a vast majority of nursing homes which operate in a safe and efficient manner in this Nation it is naive to assume that all do or all would maintain this standard were it not for regular inspections.

I hope that in the coming year we will focus on the value of nursing homes and how to make them better values for our Nation's health care dollar.●

MAY 15, THE OFFICIAL COMMEMORATION DAY OF THE GREAT FAMINE IN UKRAINE FOR THE STATE OF NEW JERSEY

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. GUARINI. Mr. Speaker, I am proud to inform you that Thomas H. Kean, Governor of my home State of New Jersey, has proclaimed Sunday, May 15, the official commemoration day of the Great Famine in Ukraine for the State of New Jersey. I am pleased to join with Governor Kean and members of the Ukrainian-American community in remembering the heroes and martyrs of the Ukrainian nation during this, the 50th anniversary of the man-made famine in the Ukraine.

As we well know, on January 22, 1918, the Ukrainian Central Rada in Kiev proclaimed the sovereign and independent state of the Ukrainian people. The independence of this nation was emboldened in November

of 1918 by the addition of western Ukraine to the new United Ukrainian Republic. However it was not long before the armies of Communist Russia invaded the newly independent states. The Ukrainians fought 3 years against tremendous odds before losing their freedom to the Russians.

Because of the fiercely independent nature of the Ukrainians, the rule of Moscow was oppressive from the very beginning. In 1932-33, Moscow decided on genocide as the way to end the continuing Ukrainian dream of freedom. Because the people of the Ukraine were opposed to the Communist method of enforced collectivization of farmland, the rulers of the Soviet Union created a famine through the policies of the state which led to the death of over 7 million Ukrainians. These people were forced to suffer the terrifying death of slow starvation. During this same period, thousands of Ukrainian leaders were executed by direct order of Moscow. Other Ukrainians did their best to dramatize the plight of their fellow citizens to the Western World.

We must not forget the valiant struggle of millions of Ukrainian citizens to overcome devastation of this genocide. The 50th anniversary of the famine of 1932-33 is a time for reflecting on both the spirit of man that allows him to weather the worst adversity and that part of man that allows such cruelty toward his fellow man.

It is important that we keep these memories alive. In this regard I would like to commend the work of The Ukrainian Weekly. This newspaper of the Ukrainian-American community is located in my district in Jersey City, N.J. Its editor, Roma Sochan Hadzewycz, associate editor, George Bohdan Zarycky, and assistant editor, Marta Kolomayets, do an excellent job of keeping the flame of freedom for the Ukraine alive. They make all Americans aware of the importance of the freedom we have. They have been very important to the community in the commemoration of this anniversary.●

A TRIBUTE TO SMALL BUSINESS

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. FORSYTHE. Madam Speaker, today I rise to pay tribute to a vital sector of our Nation's economy: small business. As a small businessman myself for many years, I would like to take this opportunity to remind my colleagues that throughout our country's history, small business has been at the heart of American enterprise. In colonial days, nearly all businesses fell into this category, from the Yankee traders to the agricultural interests of the South.

From these roots sprang an expanding, vibrant economy. Small business became synonymous with the American dream. Intelligent, ambitious people succeeded in business because of our expanding domestic and foreign markets. Horatio Alger stories, though based on myth, were popular because there actually were those who went "from rags to riches" using small business as a vehicle for prosperity.

Small business also fosters another American ideal: independence. As in the past, small businessmen of today are self-reliant, basing their decisions on direct contact with their customers and suppliers.

From successful small businesses sprang the large companies of the industrial revolution. Since that time, small business has been a source for large industries. Today, it plays a significant role in the explosion of high technology. Flexibility, focus, and an innovative spirit, among other virtues, have ideally suited small business to participate in our current shift in industrial policy. It is from small companies that new corporate leaders such as Xerox, Polaroid, Texas Instruments, and Fairchild Semiconductor have emerged.

As small business continues to adapt to the changing ecomomic climate of the 1980's, it has special needs that Congress should keep in mind. First of all, we need a stable economy. The recession has hit small businesses particularly hard because they have fewer resources upon which to draw. Availability of capital at reasonable interest rates is another key factor for prosperity in the small business sector of the economy. Without ready sources of capital, it is impossible for businesses to invest in plant expansion and new equipment or research and development. Curtailing reinvestment leads to inefficiency and loss of a competitive edge. Inflation is the factor that exacerbated instabilities in the economy and drives up interest rates. Congress has made positive efforts to combat these economic ills; however, there is still much to be accomplished.

More directly, the Congress and the administration should continue to foster policies that encourage small business. For example, Government regulations should be constantly reviewed, updated, and minimized to enhance the flow of commerce, not restrict it. Tax incentives, such as those included in the Economic Recovery Tax Act, and incentives in research and development funding should also be incorporated into future tax legislation.

In these ways, Government can provide an invaluable service to small business so that this vital sector of the economy can continue to serve us as individuals and add to the prosperity of the Nation as a whole.●

BANKRUPTCY REFORM NEEDED TO PROTECT FISHERMAN

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. YOUNG of Alaska. Mr. Speaker, I am reintroducing legislation today which would correct an inequity in the Federal Bankruptcy Code which has unfairly penalized U.S. fishermen. This legislation would simply provide fishermen with a degree of protection in bankruptcy cases filed by fish processing firms and would close a loophole in the law which has allowed a few processing firms to avoid paying millions of dollars owed to fishermen.

Of course, it must be emphasized that in Alaska, as elsewhere, the vast majority of processing firms are ethical and follow good business practices. Such firms realize that the long run survival of both fishermen and processors depends to a large degree on both parties being treated fairly. This is particularly true during difficult economic times and fluctuating markets. Passage of this legislation will not hinder these businesses acting in good faith. It is designed merely to close a loophole in the law and provide fishermen with some protection against firms which would seek short term gain at their expense by taking advantage of their status as unsecured creditors.

Under current law, fishermen are treated as ordinary creditors of fish processors and are not entitled to proecutions given secured creditors or employees of the bankrupt firms. Although secured creditors and employees are not guaranteed repayment under the bankruptcy law, they are entitled to priority in payment of debts to be discharged in bankruptcy proceedings. Priority is given to these parties in recognition of their special relationship to the debtor and their justified reliance debts will be repaid.

This legislation would amend title 11 of the Bankruptcy Code to provide that priority shall be given to unsecured claims of fishermen. The change in the law would bring it into compliance with many State laws which treat fishermen as labor for purposes of filing materialman liens. Also, the code amendment would help emphasize to new and reorganizing firms that commitments made to fishermen are just as important as those made to other creditors.

The change in Federal law is necessary because a few firms have taken advantage of Federal law by inducing fishermen to rely on payments being honored and then obtaining protection

from the Bankruptcy Code to discharge those debts which were lawfully owed. Secured creditors, assured priority under the code, are protected, at least to the extent of being entitled to priority as the assets of the bankrupt firm are liquidated. However, fishermen, with no priority, are often left without any payment on the dollar and without any recourse or legal method of receiving payment.

The continuing recession in the fishing industry dramatizes how vulnerable fishermen are under current bankruptcy law. Witness, for example, the tuna industry which is experiencing its worst economic crisis in 20 years. Canneries are being closed or are operating on reduced schedules. Vessels are sitting at their moorings holding their fish aboard until the canneries unload them. Fishermen are facing both serious losses and considerable financial uncertainty, as are several tuna processors. Furthermore, several of the processing plants have shifted from paying the fishermen upon delivery of the fish to paying when the tuna is actually canned. This means that after delivery and until actual canning a fisherman is vulnerable to a bankruptcy petition. Since current law makes them ordinary creditors, fishermens' claims are not given any priority whatsoever in a bankruptcy preceeding.

In my State of Alaska, there have been instances in which fishermen have been left unpaid for a year's work when a processor went bankrupt. One bankruptcy in 1981 left over 200 fishermen with unpaid debts totaling nearly $2 million. Another bankruptcy in 1979 left 300 fishermen with unpaid debts totaling $2.5 million. There is little chance that these fishermen will ever receive any payments on the debts owed.

This legislation is designed to prevent a recurrent theme of some of the bankruptcies in the industry. There have been cases in which some firms have taken advantage of the unsecured position of fishermen. Typically, fishermen have been induced to rely on payments when proper initial payments have been made early in the fishing season. Later, revenues from product sales or loans are diverted to disproportionately pay loans and debts to secured creditors since these creditors are more important to the operator, especially if the firm plans to seek additional financing. While these revenues are being diverted to other creditors, the fishermen are typically told not to worry, that the firm is experiencing only temporary cash flow problems. By the end of the season, secured creditors will have received the largest portion of sales revenues, while fishermen will have the highest levels of unpaid debt. If a bankruptcy petition is filed, the secured creditors have priority and some assurance of payment while fishermen, without priority and without legal recourse, may never be paid.

I believe that fishermen should be entitled to more equitable treatment under the law. Because of the nature of the fishing industry, fishermen have traditionally relied on informal business dealings in selling fish for processing. Most fishermen rely on payments from processors as the sole source of income and may sell their entire yearly catch to one processor. Trust and reliance on payment are essential elements of this industry. I believe the special relationship between a fisherman and a fish processor qualifies the fisherman for priority creditor status in any bankruptcy proceedings involving a fish processor. I urge my colleagues to give this legislation their prompt and favorable consideration.●

SMALL BUSINESSES ARE VITAL TO OUR NATION'S ECONOMIC FUTURE

HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. ROGERS. Madam Speaker, the President has designated the week of May 9 to May 13 as "National Small Business Week," and I am thankful that we are finally giving our small businessmen and women the recognition they deserve.

Few people realize just how important small businesses are to our Nation's economy. A quick look at some numbers clearly shows that small businesses form the backbone of our Nation's economy: 95 percent of all businesses in the United States are small businesses; over 80 percent of all new jobs created in the private sector are created by small businesses; the 14 million small and independent businesses in America employ almost 60 percent of all private-sector jobs and support more than 100 million people across the country; and small businesses are responsible for more than half of all the innovations and new technologies in this country.

Small businesses are even more vital to the economy of the rural Kentucky district that I am privileged to represent, because in Kentucky's Fifth District, practically all of our businesses are small businesses.

But small businessmen are more than just key sources of jobs and innovation; they embody that hardworking, entrepreneurial spirit that made our Nation's economy the strongest in the world over the past 200 years. Small businessmen took the risks inherent in starting out on their own, knowing that in our free-market economy, they would also enjoy the fruits of their labors if their venture turned out to be successful.

We need a healthy, sound small business community in this country. And the durability of the economic recovery that is now beginning to raise its head will depend to a large extent on the economic health of our small businesses. Congress must continue to help small businessmen everywhere—by reducing the deficit and lowering interest rates, eliminating burdensome Government regulations and redtape, and cutting unfair taxes—if we desire to see our country pull out of this recession and get back on its feet for good.

I am committed to doing all I can to help small businessmen in Kentucky's Fifth District and all across America prosper. And during this "National Small Business Week," I invite my fellow Members of Congress to join with me in working to create a climate in which small businesses can continue to play such a key role in the economic life of this Nation.●

CHARITABLE ORGANIZATION INCOME

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. DORGAN. Mr. Speaker, I am introducing legislation to clarify congressional intent regarding the tax status of income received by charitable organizations through games of chance. This legislation would exempt income derived by charitable organizations through games of chance from the tax imposed on unrelated business income; this exemption would apply only to income derived from those games of chance which are not ordinarily carried out on a commercial basis and which do not violate any State or local law.

The background for this legislation is straightforward.

Under a 1981 State law, North Dakota permits charitable organizations to conduct games of chance and to use the revenue from those games for charitable purposes. In June 1982, the District Director of the Internal Revenue Service in St. Paul, Minn., issued a letter indicating that the revenue generated from the gaming activity is subject to Federal tax under the unrelated business taxable income provision of the Internal Revenue Code. As we know, in 1950, Congress enacted the unrelated business income provision to prevent tax-exempt organizations from competing unfairly with taxpaying, for-profit businesses. Then, last December, the Senate adopted, and the House conferees agreed to, an amendment to the fiscal year 1983 continuing resolution that prohibits the IRS from taxing the proceeds re-

ceived by charitable organizations in North Dakota from games of chance.

The key issue in this legislation is whether tax-exempt, charitable organizations in North Dakota are competing with taxable, for-profit businesses in conducting games of chance. If they are, then chances are they should be subject to the unrelated business income tax provisions. But, they are not. North Dakota does not permit for-profit gambling operations. Consequently, the rationale for the unrelated business income provision—to prevent unfair competition—does not apply to this situation in North Dakota.

When Congress enacted the unrelated business income provision in 1950 it was looking at fairness. The purpose of the provision was to prevent tax-exempt organizations from competing unfairly with taxpaying businesses. Congress wanted to put tax-exempt organizations on the same footing as private businesses when they are engaged in the same revenue-producing activities. Congress was not trying to deprive tax-exempt organizations of funds, or to foreclose to them a source of funds.

Thus, when there is no competition, the policy and purpose of the outside income provisions are irrelevant. This is the case in North Dakota, for North Dakota law explicitly reserves the operation of games of chance to tax-exempt organizations.

Mr. Speaker, the exemption envisioned in this legislation is very limited. It is designed to enhance the worthwhile goals of charitable organizations that operate under laws such as those in North Dakota. It is intended to clarify for the IRS the intent of the Congress as spelled out in the fiscal year 1983 continuing resolution. Finally, it is consistent with the purposes of the unrelated business income statute enacted by the Congress in 1950.●

SMALL BUSINESS WEEK

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Ms. FIEDLER. Madam Speaker, the economic health of the small business sector has been sorely tested this year. The recession has demanded a new spirit of management that is increasingly concerned about productivity, quality and efficiency. We have seen companies pare down and provide a wide range of employee incentives and rewards that show management's commitment to excellence, consumer confidence and employee satisfaction. The learning experience has been expensive but lasting and long-term results will provide an attractive payoff. Optimism and confidence is spilling over into the college campuses as hundreds of young entrepreneurs are forming innovative and lucrative business.

I am encouraged by Congress attentiveness and recognition of the needs of our small businesses. With small business accounting for 38 percent of the Nation's gross national product, producing twice as many innovations per employee as larger firms, and contributing two out of three new jobs, our action to preserve opportunities for small business is required.

Great strides have already been taken through recent legislation. The Small Business Innovation Development Act went into effect on October 1, 1982. The new program, directing a fixed percentage of research and development awards to small business will stimulate technological innovation, encourage small science and high technology firms to participate in Government funded research and provide incentives for the conversion of research results into commercial applications. The Small Business Administration estimates that up to $45 million will be awarded to small business innovation research in fiscal year 1983 and that this figure will increase tenfold in 1987.

Federal procurement of goods and services is a $110 billion-a-year business involving one-fifth of the Federal budget. While small business accounts for 38 percent of our gross national product, they receive only about 25 percent of these procurement contracts. Although Federal contract opportunities are required to be published in the Commerce Business Daily, adherence to the rule has not been constant and small business have experienced difficulty in monitoring the publication process and preparing a bid in such arbitrary circumstances. Hopefully, our action to increase this notice to a 45-day period will rectify the situation.

Passage of the export trading companies legislation was a big step in opening up foreign markets to small and medium sized businesses. Export trading companies are expected to increase U.S. GNP by $27 to $55 billion, create 320,000 to 640,000 new jobs, and reduce the Federal deficit by $11 to $22 billion by 1985. Small business produces only 16 percent of all export sales. Lack of information, finances or resources and complex laws and regulations have discouraged many small and medium-sized firms from expanding their enterprises through foreign trade. Export trading companies will reduce many of the risks involved in entering foreign markets.

The Presidential Task Force on Regulatory Relief has lightened the regulatory load on small businesses, which imposes an enormous burden on small business. A 1978 SBA study revealed that paperwork burdens alone cost small business $12.7 billion per year.

Much has been done and much remains to be done to provide the incentives and opportunities for small business to reach its full potential in the economic growth of our country.

Dun & Bradstreet has estimated a 2.7-percent gain in total U.S. employment this year. That is about 2.5 million jobs, coming mainly from small business. I have introduced legislation providing a tax credit for a portion of a salary paid to a new, long-term unemployed individual. This would create even more jobs while at the same time directly reducing the number of unemployed.

Clearly, small business is a vital factor in our future economic growth. Congress is now faced with the challenge of continuing to facilitate that growth. That is why I am pleased to voice my admiration for American small business, and promise my support for efforts in their behalf.●

THE PASSING OF ALICE ALLISON DUNNIGAN

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. MAZZOLI. Mr. Speaker, the State of Kentucky—and this country—lost one of its truly great pioneers with the recent passing of Alice Allison Dunnigan.

Mrs. Dunnigan was a fascinating woman whose achievements and accomplishments during her life were the stuff of which legends are made.

The daughter of a poor southern farmer, she began her professional career as a teacher in a one-room rural schoolhouse in Kentucky. She taught school for 18 years before moving to Washington where she later became one of the leading journalists in the Nation and the first Negro woman journalist to receive White House accreditation.

Mrs. Dunnigan worked under the administration of several Presidents and was the recipient of more than 50 awards in her lifetime for her work in journalism, civil rights, equal employment, and youth activities.

In her later years, she wrote her memoirs, "A Black Woman's Experience From School House to White House" which was first published in 1974. She later wrote "A Fascinating Story of Black Kentuckians: Their Heritage and Tradition."

Alice A. Dunnigan was a great American and a great Kentuckian and she will be remembered by all who knew her for her contributions to society and her zeal for life.●

PREJUDICE NO REGIONAL MATTER

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. HUBBARD. Mr. Speaker, the following feature article appeared on April 19, 1983, in the Paducah Sun, Paducah, Ky., written by one of my constituents, Berry Craig, an outstanding Sun staff writer. I believe my colleagues will be interested in Craig's excellent comments about the recent mayor's election in Chicago.

His article follows:

[From the Paducah (Ky.) Sun, Apr. 19, 1983]

PREJUDICE NO REGIONAL MATTER

(By Berry Craig)

The Chicago mayor's election, in which race was an ugly issue, reminded me of a self-styled Chicago liberal I met on an airplane trip.

She talked at length about racial prejudice as if it were exclusively Southern.

Her hometown has just finished one of the dirtiest political campaigns in its history.

Harold Washington, a black man, won in a cliffhanger—after being targeted with a barrage of racial slurs, including anti-black campaign buttons and bumperstickers.

The election was called the most overtly racist since George Wallace's presidential campaign of 1968.

The meanness of it proves that despite protestations of some holier-than-thou Northerners, prejudice is found above the Mason Dixon Line, too.

Indeed, the late Martin Luther King Jr. said he had never seen such racial hatred and hostility as that which he encountered in Chicago in 1966.

This is not to miminize Southern prejudice: slavery, Jim Crow, lynchings and beatings of blacks.

However, the Chicago election again explodes a notion long-cherished by some Northerners: that bigots live only in the South.

I am sure Washington would agree that it is unfair and wrong to say everybody who voted for his Republican opponent, Bernard Epton, did so out of racism.

However, much of Epton's support came from white Democrats whose past voting behavior has made other Democrats shoo-ins in Chicago, long a Democratic stronghold.

Too, while Epton claimed he wasn't after the racist vote, one of his campaign slogans was widely interpreted as having anti-black undertones.

And throughout the campaign, there was a flood of media reports of Chicago whites saying openly they were against Washington because he is black and for Epton because he is white.

It's sad that so many Americans still can't judge a political candidate on the basis of what he thinks, says and does instead of on the color of his skin.

That's not to minimize the major strides that have been made toward lessening racial discrimination, strides made possible by federal legislation and changing attitudes.

Now there are 223 black mayors, many in the South.

Still, the virulent racism directed against Washington—it included an angry white crowd jeering him away from a church—shows that we've got a long way to go in eradicating the civil wrong of bigotry.

The Chicago bigots could take a lesson from something I witnessed in western Kentucky a while back.

I mean to include the white "liberal" who also bemoaned the breakdown of "ethnic integrity" in her neighborhood. She meant blacks moving in.

What I saw was at Carlisle County High School during the welcome home celebration for the now famous boys' basketball team.

Senior standout Phillip Hall was an impromptu emcee who introduced his teammates.

Hall—blinking back tears—said fellow senior star Keith York was like a brother to him.

They embraced each other. All the cheerleaders hugged Hall.

Phillip Hall is black. York and the cheerleaders are white.

It's too bad some adults on both sides of the Mason-Dixon Line can't get past skin color like those young Carlisle countians did.●

PRODUCTIVITY INCENTIVE ACT

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. SEIBERLING. Mr. Speaker, I am introducing legislation today to encourage better labor-management relations in our country and greater productivity improvement.

Under the prevailing wage system in this country, employees often feel that they have little stake in the company's performance. Wages usually bear no direct relationship to productivity or company earnings, and companies usually adjust to downturns in the business cycle by laying employees off. As a result, workers perceive their pay increases as being independent of the company's profitability. This wage structure gives them little incentive to use their ingenuity to help their company become more profitable by cutting costs and increasing productivity.

This kind of wage structure also emphasizes the divergence rather than the community of interest between employer and employe and thereby contributes greatly to the deep antagonism that is characteristic of labor-management relations in the United States. Our country can no longer afford such antagonism if it is to remain competitive in the new economic order.

My bill would encourage employers and employees to adopt a base wage and a bonus determined by reference to company profits or cost savings, with the bonus comprising up to a third of the employee's annual compensation. To offset any additional cost associated with establishing and running this new wage system, employers would receive a tax credit equal to 10 percent of the bonus in the first year of operation, 5 percent the second year, and 3 percent the third.

The bill would give workers an incentive to be more cost and productivity conscious, since their pay would depend to a degree on the earnings of the company or increases in productivity. To the extent that profit sharing is adopted, the system would afford the company a means of adjusting its labor costs to meet adverse changes in the business cycle without cutting the workers' weekly pay or resorting to layoffs. The resulting job security cannot help but produce greater feelings of loyalty on the part of the employees and better employer-employee relations.

This bill is not a cure-all for our country's economic problems, but it should help improve job security as well as productivity. Many other changes must accompany the type of wage restructuring which I am advocating if we are to reverse our poor productivity growth in recent years. Productivity is a root cause of our country's economic problems. If we concentrate simply on dividing up a diminishing pie, we will all be losers. Instead, we must concentrate on enlarging the pie by examining policies and practices which hinder productivity improvement.●

CAROL CLOER TAKES LOTS OF ENERGY TO POLICE BOARD

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. RICHARDSON. Mr. Speaker, I want to draw my colleagues attention to an article entitled "San Juan's Carol Cloer Takes Lots of Energy to Police Board," which recently appeared in the Albuquerque Journal, a daily newspaper in my district.

Carol Cloer is a woman of many outstanding achievements. Just recently she was the first woman to be appointed to the New Mexico State Police Board.

She is the mother of three daughters and is politically active. In the near future she will start work on her doctorate in education administration at the University of New Mexico. She and her husband also operate a 96-acre ranch. In addition to these activities, Mrs. Cloer holds a full time job as curriculum director for secondary and special education programs with the Bloomfield School District.

Mrs. Cloer is truly an inspiration to women throughout New Mexico. Her energies and talents serve as a shining example for others to follow and her many achievements are properly noted in this wonderful article. I hope my

colleagues will take the time to read this thoughtful piece:

SAN JUAN'S CAROL CLOER TAKES LOTS OF ENERGY TO POLICE BOARD

(By Val Cooper)

FARMINGTON.—The statuesque redhead jumped upon a chair, cupped her hands to her well-shaped mouth and shouted, "All the Toney Anaya supporters over here . . . Anaya backers right here."

Once her flock had gathered in a corner of Farmington's Civic Center hall, Carol Cloer wasted no time in making sure from her lofty perch that everyone understood how to cast their ballots at the 1982 San Juan County Democratic Convention. She rattled off the procedure with knowledge, authority and machine-gun rapidity.

"I didn't have much time and I had to be certain that everyone was familiar with what is called the proportional voting procedure," Mrs. Cloer explained. "I had to be sure they voted for the right people."

The 43-year-old Bloomfield educator had done her homework well. Of the 80 San Juan County delegates who went to the state pre-primary conclave, more than 50 of their votes went to Anaya. He subsequently carried the county in the primary election. In the general election, Anaya lost by only 1,867 votes to Republican John Irick in a county which has been traditionally Republican.

The fast-tracking of this highly energized mother of three daughters so impressed Anaya that he named her to the State Police Board. She's believed to be the first woman in the history of New Mexico to receive such an appointment, and the second San Juan County resident to serve on the board. The late former Farmington Mayor Oscar Thomas was a member of the board in the late 1950s.

Mrs. Cloer said the governor asked if she'd be interested in a full-time position in his administration, which she took as an implication that he wanted her in his cabinet. But, she says she "just wasn't ready for that." She did tell him she'd be interested in a board or commission appointment.

"I was thinking of something along educational lines," said Mrs. Cloer, who is director of secondary instruction and special education for the Bloomfield School District. Nonetheless, she took the State Police Board job because she thrives on challenge and likes to "broaden my horizons and learn new areas."

She's quick to point out that her support of Anaya wasn't prompted by any political ambitions.

"I watched him as attorney general and I like the way he takes a kind of hard line stand on issues even though sometimes it's not popular," she said. "I believed in what he was trying to do and I thought he would be a good governor. I had no aspriations beyond that. So when he asked me if I would help him, I said yes."

The positive-thinking Mrs. Cloer utilized a method she called pyramiding in her position as Anaya's San Juan County coordinator, which she still retains.

"I started with a small group and identified those people," she said. "Then they brought in a few more and identified them, and they brought in more," until there was an Anaya grid system throughout the county. From an initial group of 35, Mrs. Cloer built a pyramid of more than 100 Anaya workers.

During the campaign, she said, "Toney came up here (to San Juan County) a lot more than I think he initially intended because the momentum was turning in his favor."

On behalf of herself and others, Mrs. Cloer said she has written Anaya expressing concern that his focus might be too concentrated on his commitment to Hispanics. He replied that he feels there is a large percentage of Hispanics in the United States who are not actively involved in the processes of government and he would like to take a part in motivating them to get involved.

"I can now see what he is trying to do on a broader scale," Mrs. Cloer said, "and I don't believe it's wrong when you can get anyone involved in the processes of government."

Her appointment to the police tribunal isn't as inopportune as it may appear. Mrs. Cloer's late father was an El Paso policeman, detective and former Texas Highway patrolman.

He often took her with him on his beats. "I saw many different kinds of lifestyles and had many exciting adventures," she recalled recently during an interview in her Spanish-styled home. Built by her husband, Harold, the home is located on a rocky slope of their 96-acre farm which looks out over their alfalfa fields and has a sweeping view of the San Juan River valley between Farmington and Bloomfield.

"My father had a great influence on me," she mused.

Mrs. Cloer stands 5'10" with hazel-colored eyes and is a virtual human dynmo in her pursuit of life, education—and politics.

"Politics is our social life," she says of herself and her husband.

She's been a ward and precinct chairman. She's a former Democratic county vice chairwoman and presently serves on the state central committee. She's been to two national Democratic conventions, in New York and Philadelphia, and served on their platform committees. "I always take my daughters to the conventions," she said because she wants them to be thoroughly attuned to the processes of government.

Does she have higher political ambitions? The answer is emphatic: "Yes, but I'm going to move slowly."

She had planned to seek the state Democratic chairwoman's position this year, but the State Police Board appointment negated that. "You've got to get your priorities straight," she said. "If you're running for office you have to have time to do it. You can't work and campaign well." Several years ago, the teacher lost a primary election bid for state representative to Polk Brown.

The new state police commissioner is motivated by a high level of curiosity about everything and admits that sometimes "my curiosity consumes my energy level." She said some of her staff members who she has asked to evaluate her have reminded her that not everybody has her drive, and "I try to remember that."

Her consuming curiosity has molded Mrs. Cloer into an indefatigable person, who graduated from high school in El Paso at 16, married at 18 and earned bachelor, master's and special education degrees by sheer tenacity while having babies and taking them to college with her during summers.

The Cloers were both working for El Paso Natural Gas Co. when they were married in El Paso in October 1957. They were transferred to Farmington "the first time," two years later.

She started her college work in Gallup, where Harold was transferred in 1961, going to the night school branch of the University of New Mexico. When her husband was transferred to Corona, near El Paso, she enrolled at the University of Texas at El Paso (UTEP) full time and completed work on her bachelor of education degree. She started work on her master's degree in history at UTEP but that was interrupted when Harold was transferred to Aneth, Utah, where she taught four elementary grades for a year.

Television and radio reception at Aneth was unsatisfactory, so Mrs. Cloer turned to fulfilling her hunger for reading, which she said had been instilled in her by her mother. "She made me like to learn through reading," she said. "Now it's like food—I have to have it." She borrowed books—"tons of them,"—from a bookmobile out of Salt Lake City.

After her husband was transferred back to Farmington in 1969, Mrs. Cloer spent the next three summers continuing pursuit of her master's degree at UNM. She took her three daughters with her and juggled classes between day school and mothering.

Her thesis was entitled, "Navajo Education: The Long Walk To Acculturation," which fulfilled a curiosity she developed while living in Aneth as to why the American Indians had "not moved along educationally."

When the Cloers bought their farm in 1969, "We didn't even have a tractor," she said. They'd been cattle ranchers at Corona and didn't have an inkling as to how to go about farming. But they got a big assist from a neighbor, Republican State Sen. Christine Donisthorpe, who planted their alfalfa seed in exchange for Cloer doing some carpentry work for her. "She taught us about farming," admitted Mrs. Cloer.

Before long, Carol and her three daughters, then ages 5, 7, and 9, found themselves arising around 4 a.m.—"as soon as you could see to trip over the pipe"—making their way to the alfalfa fields and moving some 200 feet of irrigation pipe. They kept up this back-breaking work for 10 years, before and after school, until the farm became successful enough for the Cloers to convert to automation. Most of these times Harold was away working shifts for El Paso Natural Gas Company or busy contracting for cutting and baling hay. "We became his foreman," said his wife. The mother and three girls now drive balers and swampers like pros.

Recalling those 16- and 17-hour days, Mrs. Cloer confided, "I got to where I really wanted to come in the house and make cookies. But that hay money built this house."

When Carol decided to attain her education specialist degree in administration, she made up her mind to do it in one year, a practically unheard of accomplishment. She did it by taking a load of five graduate hour courses at UNM one summer, driving to Albuquerque for classes on Saturdays during the fall, taking special courses at Farmington's San Juan College and finishing up the last few months of the year by returning to UNM's early summer classes. During this time, she continued to teach.

Since joining the Bloomfield system 13 years ago, she's been principal of the Blanco school and successfully coordinated evaluations of secondary schools statewide. She was serving as principal when she was named director of secondary instruction for the system. But the two jobs didn't go well together because "one was stationary and the other a mobile" position. So she talked her superior into letting her relinquish the

principal job in favor of becoming director of secondary education and special education.

Prior to being named principal, Mrs. Cloer headed the social studies department, and taught history and government. These served as stepping stones to her becoming vitally interested in the functions of government, although she says she's been issue-oriented all her life as the result of being around parents and other relatives who maintained lively interests in current events.

She encourages her students to keep up with political issues and tries to instill in them the proper procedures for making changes they don't like—which is through the ballot box.

Nor is she through with her educational goals. Next summer Mrs. Cloer plans to start work on her doctorate in Education Administration at UNM, where she's already been accepted.

In her efforts to motivate women toward new adventures, Mrs. Cloer likens them to rosebushes in bloom. "If the blossoms are picked too quickly (meaning if one loses interest in life and learning) you never see the full beauty of that flower," she said.

Is there anything Carol Cloer doesn't like to do?

Yep. Move irrigation pipe.●

MEMORIAL DAY 1983 PAYS HOMAGE TO MEMBERS OF U.S. MILITARY ESTABLISHMENT

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. CHAPPELL. Mr. Speaker, in just a few days we will celebrate Memorial Day, 1983. Oftentimes I am touched by the supreme sacrifice made by so many civilian and military men and women around the world. These people serve. They ask no more than to do their duty. They do so, and, in some tragic instances, they give their lives in order that their country might be a safer place in which other Americans may go on living.

Earlier this month, 14 brave and dedicated military personnel died in the crash of their military aircraft in Jacksonville, Fla. In another incident, a young Navy pilot was killed in a crash which occurred while landing aboard a Navy frigate in the Red Sea.

All military active and Reserve personnel in all branches of the service are deserving of the respect, the thanks, but, most of all, the prayers of all of their countrymen and women—for being there, for serving, for unflinching devotion to duty, and for giving America a great reason to be proud and humbled by their example.

May we pause on Memorial Day, 1983, and offer up our prayers for the loved ones who have suffered loss. May God grant them strength to endure and may we in the Congress of the United States recognize what an honor it is for us to serve with such distinguished members of our active, Reserve, and civilian Military Establishment.

EXCEPT IN TIME OF TRAGEDY, NAVY IS TAKEN FOR GRANTED

It is easy for most of us to take the United States armed forces for granted.

They are there. They are doing a job. And the rest of us sleep soundly as a result.

Not only do we sleep soundly but we walk and talk freely, unlike most of the world's population.

As a nation, we are uneasy with the world leadership role that was thrust upon us as a result of World War II. We have not always discharged it perfectly but we have given more, not only to the maintenance of other nations but to maintenance of freedom in the world, than will ever be credited to the United States by historians.

This role has meant a substantial cost in human life as well as national treasure.

Jacksonville, as one of the U.S. Navy's main stations, is more cognizant than most communities of that cost. Those who do give their lives in the effort to maintain peace and freedom are often friends and neighbors.

There were friends and neighbors of many in the Jacksonville area among the 14 who died Saturday in the crash of a Navy plane into the St. Johns River just short of the runway at the Jacksonville Naval Air Station. They were aboard a Navy passenger plane on a flight to the U.S. Naval Station at Guantanamo Bay, Cuba, and the casualties included Chief Edward Beach of Orange Park. The only survivor, Petty Officer Melissa Kelly, of Jacksonville, was hospitalized and was listed in stable condition.

Lt. Dwight Greer, of Neptune Beach, who died in a helicopter accident Sunday aboard the destroyer Trippe in the Red Sea, and Lt. Cmdr. Chuck Taylor, of Jacksonville who received "major injuries in the accident," according to a Navy spokesman, were also among the victims on this tragic weekend.

The Navy's mission will continue, mostly out of sight and out of mind for the average civilian in the workaday world.

It is a role that should command the gratitude of the rest of us, as well as our prayers for those whose lives were lost and who were injured in carrying out their routine—a "routine" whose successful discharge is a matter of freedom or slavery, life or death, for us and many, many millions on this planet.

LETTER TO THE EDITOR—CIVILIAN RESPONSE IN NAVY PLANE TRAGEDY PRAISED

Last Saturday certainly began as a beautiful day, and I am sure most of us were enjoying the sun and outdoors. Unfortunately, for those of us at Jacksonville Naval Air Station our remembrance of Saturday will be considerably different from that pleasant beginning.

The aircraft crash that occurred here shortly after noon has saddened our nation with the terrible loss of 14 young Americans who were in the service of their country. They, as so many who have gone before them, gave their lives to insure the continuance of our nation's freedom and way of life.

Even a cursory glance at the list of names would tell you that this was a true cross section of America and truly represenatative of the fabric from which our great nation is woven. They came from across the breadth of our country, probably from every social strata and are representative of the many cultural heritages that have combined to make us special among nations.

We, in the Navy, were never conscious of these differences for we were shipmates, shipmates in an honored and demanding profession. Only those who have shared the rigors, hardships and rewards of going to sea can fully understand the special kinship described by this term, shipmate.

The very special relationship that has existed between the citizens of Jacksonville and the Navy was never more obvious than it has been during this difficult time.

The Jacksonville Sheriff's Office immediately provided scuba divers to assist the Navy divers, escort vehicles and helicopter assistance. The police and the Coast Guard auxiliaries volunteered their services as did many recreational boaters.

Completely overwhelming, however, were the hundreds of calls from citizens in the Jacksonville area offering diving assistance, boats or asking what they might do to help. In a time of real need, the community offered their help, support and prayers.

[All of those involved], civilian and military, more than lived up to their responsibilities as learned from disaster or casualty drills. There were certainly heroic acts in the first few moments following the crash when one life was saved and there was still hope for others.

As hope turned to despair, everyone remained professional in their assistance of divers and medical personnel in their unenviable task.

Jacksonville has again demonstrated that its appreciate of service to one's country, goes far beyond the words and even beyond the deeds one could expect. It is obvious that the destinies of Jacksonville and the Navy are forever entwined and how lucky we in the Navy are. For, if a city could be classified as a shipmate, Jacksonville would head the list. Thank you, Jacksonville.

Capt. ROGER RICH,
Commanding Officer,
Jacksonville Naval Air Station.

NEPTUNE BEACH PILOT KILLED

A local Navy pilot was killed and his co-pilot was injured when their helicopter crashed Sunday while landing on a frigate in the Red Sea, Navy officials said yesterday.

Lt. Dwight Greer, 26, of Neptune Beach, pilot of the SH-2F antisubmarine-warfare helicopter, was killed in the accident, and Lt. Cmdr. Chuck Taylor, 36, of Jacksonville, was badly injured, the Navy said.

Aviation Electrician's Mate Second Class Robert Rains, 25, also of Jacksonville, received minor injuries on the flight deck of the USS Trippe during the accident.

GREEN HONORS COMMUNITY SERVICE AWARD RECIPIENTS

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. GREEN. Mr. Speaker, I rise to call to my colleagues' attention an award ceremony that will honor several outstanding individuals for their generous contributions to the New York City community. This afternoon, the East River Men's Club and the Abraham Kazan Health Services Foundation will present a community

service award to the Office of Deputy Commissioner, Community Affairs of the New York City Police Department.

These outstanding individuals are: Deputy Commissioner William E. Perry, Jr.; deputy inspector and head of auxiliary police, Nickolas D. Drakos; commanding officers, Capt. Louis Sbrocchi and Lt. Richard Lebron; and director of civilian police participation and staff, Richard Shapiro.

These gentlemen have dedicated a great deal of time and effort to improving neighborhoods in all boroughs of New York City. In addition to managing the auxiliary police and Guardian Angels, they coordinate civilian patrol groups like block and crime watchers and organize various youth and community activities. I would like to express my sincere appreciation of these gentlemen's efforts to make our community a safer and more friendly place in which to live.●

THE INTRODUCTION OF LEGISLATION TO CHANGE CERTAIN ACCOUNTING RULES RELATED TO INVENTORY

HON. ED JENKINS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. JENKINS. Mr. Speaker, I am introducing today along with my colleagues, Mr. HEFTEL and Mr. BEILENSON, legislation to amend the Internal Revenue Code to change certain accounting rules relating to inventory.

The bill has two provisions. The first would permit any taxpayer that can establish that a portion of his inventory will be sold or otherwise disposed of below cost to write-down that portion of his inventory to its net realizable value for tax purposes.

The second provision would permit taxpayers who change from the "first-in, first-out" (FIFO) method of identifying inventory items to the "last-in, first-out" (LIFO) method to spread any resulting increase in income in the year of change over a 10-year period.

The thrust of the bill is section 1. It addresses a problem that taxpayers in all industries may face, the problem of excess inventory with little or no market value, and provides a straightforward method of determining the proper tax deduction for such excess inventory in an otherwise complex area of the tax law.

The excess inventory problem arises when a taxpayer who uses the FIFO method of identifying inventory items must value his inventory at the close of the tax year. The applicable Treasury regulations provide that a FIFO taxpayer may value his inventory at its cost or at cost or market value, whichever is lower. The regulations further provide that the second method must be applied to each item in inventory separately. Under present law, then, if, at yearend, a taxpayer has in inventory items that have a market value less than it cost him to produce them, he can write-down this excess inventory and claim a deduction for the difference. The dilemma faced by a taxpayer in this situation, however, is how he can prove that his inventory is worth less than it cost him to produce it. The Internal Revenue Service has traditionally accepted two methods of establishing that a taxpayer's inventory should be valued at lower than cost. The first is where the taxpayer has actually offered the items for sale at a price below cost. The second is where a taxpayer sells his inventory at less than cost within 30 days after the close of the taxable year. Absent these two situations, there is no clear method for a taxpayer to establish what his business sense tells him—that the market value of items in his inventory is not equal to the current sales price of the items.

My bill offers a workable alternative to the methods of proof presently sanctioned by the Internal Revenue Service. That is, a taxpayer would be permitted to write-down his inventory on the basis of his experience in the business. If, for example, a company can establish from its experience with inventories that if 20 percent of the widgits it manufactures are not sold within 2 years of manufacture, they are eventually discarded or sold for scrap value, then 20 percent of its 2-year-old widgits could be written down to their scrap value. In the same manner, if the company's records show that, on average, 10 percent of any widgits that have not been sold within a year of manufacture are sold for scrap, the manufacturer should be able to write-down 10 percent of its widgits to their scrap value each year. The use of this method would be available to all industries and would be restricted only by the requirement that a company segregate its inventory items by age and support any write-down with objective evidence from its most recent 5-year experience with inventories.

There is ample precedent in the tax law for the use of a formula based on a taxpayer's recent business history to determine the reasonableness of a current deduction. For example, since 1940 and the decision of the Tax Court in *Black Motor Co.* v. *Commissioner,* 41 B.T.A. 300 (1940), aff'd on other grounds, 125 F.2d 977 (6th Cir. 1942), the Internal Revenue Service has used a 6-year moving average formula in light of a taxpayer's recent chargeoff history to ascertain a reasonable addition to a bad-debt reserve.

The method of proof provided for in my bill seeks to ascertain a reasonable deduction for losses realized from the change in value of inventory items based on a taxpayer's recent inventory history. A taxpayer would still have to provide some evidence to establish that the inventory at issue is worth what he says it is, but this evidence would come from his experience in business rather than requiring actual sales at prices lower than the market price.

Section 1 of the bill would generally be effective for taxable years ending on or after December 31, 1979. This retroactive provision would permit taxpayers adversely affected by the Internal Revenue Service's aggressive enforcement of the present law with respect to excess inventories to file amended returns using this new method of accounting.

The excess inventory problem only affects taxpayers who use the FIFO method of indentifying inventory items as the LIFO method does not provide a taxpayer the option of valuing his inventory at cost or the lower of cost or market. Thus, the excess inventory problem could be further alleviated by a taxpayer changing his method of accounting from FIFO to LIFO. A taxpayer who shifts from FIFO to LIFO, however, may realize a substantial increase in income in the year of change from the resulting inventory adjustments. This discourages many taxpayers from switching to LIFO, even though the LIFO method of accounting overall is more favorable to taxpayers.

Section 2 of my bill would allow taxpayers to spread any increase in income resulting from a change from FIFO to LIFO over a 10-year period without obtaining the prior consent of the Internal Revenue Service. Under present law, a taxpayer must obtain the consent of the Internal Revenue Service within the first 180 days of his tax year if he wishes to spread out an income adjustment resulting from a switch from FIFO to LIFO. Section 2 would be effective for taxable years beginning after the date of enactment.●

TO HONOR DAVE LIGHT: DEDICATED PUBLIC SERVANT

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. BROWN of California. Mr. Speaker, as the tempo of life increases, we tend to take for granted and sometimes forget those who put in long years of public service and provide the cohesion that keeps our institutions of government together. Today, I would like to call attention to an individual who has distinguished himself through a life of dedicated civic involvement, culminated by almost one and one-half decades of exemplary

community service to the city of San Bernardino. Mr. Dave Light is retiring after 13 years as a public relations officer for the San Bernardino mayor's office.

Dave Light's contribution to his community is an inspiration to all of us. He has been a part of numerous special projects such as: Tournament of Roses Parade Committee; Dr. Martin Luther King, Jr., Statue Committee; Black History Parade Committee; 9 years membership on San Bernardino-Riverside Counties Blood Bank; 2 years on the School of Hope Board of Directors; and current member of the Goodwill Industires Board. These are just a few of the many outstanding achievements this distinguished public servant has accomplished. In 1981, he was selected as a citizen of achievement by the League of Women Voters. He is also a current honorary member of the Native Sons of the Golden West.

Along with his notable civic record, he has also served in the armed services. He was a chief master sergeant in the U.S. Air Force from 1942 to 1945. With our country's subsequent involvement in Korea and Vietnam, the Air Force recalled him to active duty on both occasions.

Dave came to San Bernardino after the war and learned a lot about the city during his 3 years as a reporter for the Sun Telegram. That hard work earned him a Colton City Council Commendation for reporting. His interest in journalism is reflected by his current 12-year membership in the National Society of Professional Journalists.

During this last decade as a public servant, Dave has made substantial and valuable contributions to the San Bernardino mayor's office. His work in public relations encompasses a multitude of different areas, ranging from the Mayor's Annual Prayer Breakfast to master of ceremonies at innumerable dedicatory events within the city.

Dave's hard work for the community has not gone unnoticed. He is known in San Bernardino as "Mr. P.R." the city's unofficial "Ambassador of Good Will." And it is for these years of service and good will that I would like to recognize and thank my friend Dave Light, and wish him well as he leaves the mayor's office. He will be sorely missed.●

COMPENSATION FOR LOSS OF ELECTRIC POWER

HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. DERRICK. Mr. Speaker, I am today introducing legislation which would authorize the U.S. Army Corps of Engineers to provide the city of Abbeville, S.C., with "in kind" compensation for the loss of electrical generating capacity at the city-owned hydroelectric power facility which will be occasioned by the inundation of the Richard B. Russell Lake.

Mr. Speaker, the city of Abbeville owns and operates a hydroelectric plant on Lake Secession, and the electric power generated at this facility is provided to people in Abbeville and surrounding communities. When the Richard B. Russell Lake is filled, the generating capacity of this hydroelectric facility will be significantly and adversely impacted.

Under the legislation I propose today, the U.S. Army Corps of Engineers would be given authority to supply the city of Abbeville with electricity from the Richard B. Russell Dam and Lake project, to replace the power lost at the city-owned hydroelectric facility.

This "in kind" compensation, based on a kilowatt-per-kilowatt reimbursement plan is the most advantageous solution for both the city of Abbeville and the Federal Government. Under existing law, the Chief of Engineers is empowered to provide compensation to a non-Federal Government impacted by the exercise of the Federal Government's navigational servitude on its facility. This authority, however, has been interpreted narrowly to permit only a cash reimbursement.

Mr. Speaker, the Corps of Engineers has already made clear its intention to provide compensation to the city of Abbeville, but currently plan to do so in a one-time payment. The "in kind" reimbursement that my bill would allow, however, would involve no expenditure of Federal funds, and would insure a reliable and equitable replacement of electrical power that the city will lose as a result of the inundation of the Richard B. Russell Lake.

Identical legislation has been introduced in the Senate by the Honorable ROBERT T. STAFFORD and STROM THURMOND, by request. The Office of Management and Budget has no objection to the consideration of that legislation by the Congress, and the administration does support its enactment. I am in hopes that the House of Representatives will move expeditiously in consideration of this proposal which is of critical importance to my constituents in the city of Abbeville, S.C.●

TRIBUTE TO MISS MARCIA E. HANDLER

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. LENT. Mr. Speaker, I would like to direct the attention of my colleagues to a well-deserved tribute being paid to an outstanding member of the staff of Merrick Union Free School District, located in the Fourth Congressional District of New York, which I have the honor to represent.

I refer to Miss Marcia E. Handler, director of public information for the Merrick School District for the past 10 years. Unfortunately, Miss Handler is being forced to resign her position because of ill health. In tribute to her outstanding achievements, a reception in honor of Miss Handler is being held on Sunday, May 22, 1983.

Mr. Speaker, I said earlier that this tribute to Miss Handler is well deserved. That is really an understatement. Let me outline for the benefit of my colleagues some of the achievements Miss Handler has compiled over the nearly 13 years of her work for the Merrick School District. For the past 10 years Miss Handler has been director of public information for the district's schools. In performance of her professional duties, she has made outstanding contributions to the school system and to the Merrick community. Her high professionalism and leadership in this demanding post have helped immeasurably in disseminating knowledge of the school district's programs, policies, and achievements, and have contributed significantly to strengthened relationships between the school system and the Merrick community.

Miss Handler's excellent performance has brought the school district many honors, including awards of distinction from the Long Island School Community Relations Association (LISCRA) for distinguished achievement in school community relations.

In addition to her duties in supervising the Merrick School District's public information program, Miss Handler devoted considerable time and effort to working with the parent teachers associations and the district's school staffs to improve communications between the Merrick schools and the Merrick community. Some of these activities included participation in the planning, preparation, and operation of the district's curriculum fairs, faculty and community surveys, and the gifted/talented task force. She contributed significantly to the booklet "Guideline for Parents" and introduced the student photo-journal squads which still operate in the school district.

Always an innovator, Miss Handler's eye-catching and graphic publications were of great help in clarifying and making more understandable a variety of matters involving the school district, and aided considerably in conveying to the Merrick community important information on many aspects of the school district's activities.

Mr. Speaker, our great Nation is fortunate indeed to count among its blessings public servants as talented and as dedicated as Miss Handler. Her career epitomizes the highest standards of true citizenship. Her selfless service to school and community had benefited not only the Merrick School District and the Merrick community, but in a very real sense had benefited our Nation as well. Miss Handler deserves our highest commendation.

It is with this thought in mind, Mr. Speaker, that I call upon my colleagues to join me in offering our congratulations and our warmest best wishes to Miss Handler. Her life and career are an inspiration to all of us.●

RESCIND TAX ON ROADRAILER AND PIGGYBACK TRAILERS

HON. ED JENKINS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. JENKINS. Mr. Speaker, I am today introducing legislation which would correct an inequity in the Surface Transportation Assistance Act of 1982. Under this act, RoadRailer trailers are exempt from the full 12-percent Federal excise tax. A piggyback trailer, which is made and used for the same purpose, is not exempt. My bill would exempt these piggyback trailers and semitrailers for this tax.

RoadRailers and piggyback trailers are designed to travel from the loading dock to the rail yard to be transferred for the long haul by rail. The only difference between a RoadRailer and a piggyback trailer is that the RoadRailer has a set of train wheels and travels on the rail. The piggyback trailer is designed and manufactured to serve this same purpose but are now put at a competitive disadvantage by being taxed as an over-the-road trailer. Both the RoadRailer and the piggyback trailer travel on the highway approximately 3,000 miles per year, as compared to the average road trailer which travels on the highway more than 60,000 miles per year.

I believe that it will be clear to my colleagues that these two rail vehicles, which are essentially identical in function, should be allowed identical treatment under our Tax Code.●

REGULATORY NEGOTIATION CUTS REDTAPE

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. PEASE. Mr. Speaker, this is U.S. Small Business Week throughout America. It is an especially opportune time to reflect on what this Congress might do to improve the small business climate.

There recently appeared in the Washington Post of April 21, 1983, an account of another successful agreement reached between the Chemical Manufacturers Association, the Environmental Defense Fund, and the Natural Resources Defense Council to regulate low-level concentrations of polychlorinated biphenyls (PCB's). Nine months of regulatory negotiations between these common adversaries produced an unusual joint proposal for regulatory policy to be considered by the U.S. Environmental Protection Agency.

I insert the article in its entirety and commend it to my colleagues for reading. It is a fresh reminder of the promise that regulatory negotiation commissions—such as those authorized by my bill H.R. 996—hold for encouraging the public sector to work cooperatively with the private sector.

CHEMICAL INDUSTRY, ENVIRONMENTALISTS REACH ACCORD ON REGULATION OF PCB'S

(By Cass Peterson)

After more than nine months of negotiations, the chemical industry and two leading environmental groups have agreed on a way to regulate low-level concentrations of polychlorinated biphenyls (PCBs).

Their remaining task is to get the Environmental Protection Agency to agree to go along.

The unusual joint proposal was submitted to the EPA last week by the Chemical Manufacturers Association, the Environmental Defense Fund and the Natural Resources Defense Council, traditional adversaries whose legal representatives meet more frequently in the courtroom than across a negotiating table.

At issue are small quantities of cancer-causing PCBs that sometimes are byproducts when other chemicals are manufactured. Last October, the EPA proposed to study and regulate each of more than 100 manufacturing processes that might produce PCBs.

The prospect horrified the chemical industry, which envisioned years of uncertainty while the agency plodded through its studies, proposed rules and sorted out court challenges. The environmentalists were no less aghast, envisioning a battalion of EPA regulators tied up with low-level PCBs, to the exclusion of other, potentially more hazardous materials.

"We realized we seemed to have a joint interest in resolving this in such a way that wasn't resource-intensive," said Chemical Manufacturers Association official Bob Fensterheim.

Jacqueline M. Warren, counsel for the environmental groups, said the joint proposal was a "reasonable way to deal with what is actually a small problem. It's a positive step, but then it was not a problem of the magnitude of the use of PCBs in electrical equipment."

PCBs that are generated accidentally amount to no more than 100,000 pounds a year, according to Warren, compared with the 700 million pounds of highly concentrated PCBs that are still in use, primarily as a conducting agent in electrical equipment.

In addition, some of the PCBs created during chemical processes break down faster when released into the environment and thus pose less of a long-term health hazard. The more chlorine atoms that are attached to the compound, the more hazardous it is; many of the byproduct PCBs have only one or two chlorine atoms.

Under the joint proposal, chemical manufacturers would be required to assure that PCB concentrations in their products average less than 25 parts per million and never go higher than 50 parts per million.

Concentrations released into the air would be restricted to no more than 10 parts per million, and those released into water would be restricted to a tenth of a part per million or less.

The joint proposal took into account the lesser hazards posed by the mono- or dichlorinated biphenyls, allowing the manufacturer to "discount" them when calculating concentrations of PCBs. For example, 50 parts of monochlorinated biphenyls would be considered the equivalent of one part, when determining the concentration of PCBs.

An EPA spokesman this week called the proposal a "welcome" step and said that, while it might not be accepted, it will get "high priority" treatment.

Last month, the EPA was able to settle a long and nettlesome quarrel between environmentalists and the steel industry with the help of a negotiated agreement on water pollution standards.

Weeks earlier, the Chemical Manufacturers Association had joined forces with the Environmental Defense Fund in a lawsuit against the government, both seeking the establishment of a congressionally mandated agency that would study the health effects of hazardous substances.

While such alliances are far from common, Fensterheim suggested that the PCBs proposal demonstrates that at least they are not impossible.

"There aren't too many like this," he said. "But hopefully there will be a greater sense of cooperation between industry and such groups as EDF. Everybody has an interest in avoiding litigation."●

CATHOLICISM IN CRISIS WORTH READING

HON. VIN WEBER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. WEBER. Mr. Speaker, today, I want to recommend to my colleagues an emerging scholarly journal entitled, "Catholicism in Crisis: A Journal of Lay Catholic Opinion."

Founded in November 1982 by a group of lay Catholic intellectuals, this monthly journal is designed to provide Catholics with alternative viewpoints on issues directly affecting the church.

The following statement issued by the editorial board of Catholicism in Crisis best describes its objectives:

Catholicism in Crisis, a journal of lay Catholic opinion, has come into existence:

1. Because of the shared sense of its founders that, despite Vatican II's Declaration on the Laity, which envisaged an enlarged role for lay people in applying Christian principles to practical problems, there

has been more rather than less clerical domination

2. Because the diversity of opinion among intelligent Catholics is overridden by precipitous press releases in the name of the bishops

3. Because there are simply too many such swift releases with the hasty identification of one opinion as the Catholic opinion

4. Because the bishops through their advisors are tugged in the direction of foreign policy when the domestic situation in the American church calls out for their moral and spiritual leadership

5. Because the established Catholic journals too often reflect the leftward drift of the bishops' advisors.

As post-Conciliar Catholics, the founders of Catholicism in Crisis are loyal sons and daughters of the church, responsive to the lead of the hierarchy, concerned lest the bishops be captured by those who foster a new clericalism, a systematic anti-Americanism and obedience to the winds of fashion.

In another generation, the Spanish War posed a crisis for the Catholic laity because of the tendency of some bishops to see Franco as the champion of the church. Jacques Maritain spoke out against this. Commonweal was founded in large part because of this crisis. Today it is likewise important that the Catholic church not be identified with causes which are actually inimical to her well-being and indeed survival.

Finally, Mr. Speaker, the first article appearing in the first journal further details the need for its existence. The article, entitled, "The Present Crisis," reveals much of the sensitivities of the journal editorial board to challenges to the Catholic faith.

THE PRESENT CRISIS

Those of us who planned this new journal did so under the working title Catholicism in Crisis. We did so with the example of Reinhold Niebuhr vividly in mind, who on February 10, 1941, under analogous circumstances, finding existing periodicals inhospitable, launched Christianity and Crisis. There were many crises in 1941, Niebuhr wrote, but only one the crisis: the intention of Hitler's armies to extinguish Christian civilization in Europe. "Our civilization was built by faith and prayers and hard work," Niebuhr wrote "—and it was also built by fighting."

Is there a Christian minister who believes that the rights which he daily enjoys and which he takes for granted, like the air he breathes, would be his to enjoy unless these rights has been fought for by Cromwell, by William of Orange and by Washington? Are Protestants in the United States to live off the liberties which others are maintaining for them and then express complete indifference to the fate of those whose sacrifice makes the tranquil and serene life of American Christians possible? Should this become the American Protestant attitude toward the world, it would inscribe one of the darkest pages of the annals of the Church.

In 1941, the Christian Church was threatened with extinction in the North Atlantic. Today the crisis which threatens Catholicism is worldwide and far more formidable in military and police power than the juggernaut built by Adolph Hitler. While that crisis can never be far from our thoughts, it is not the crisis we have most in mind in launching this journal in 1982.

In a lesser sense, our crisis is literary. We are dissatisfied with existing Catholic journals and with—as we see it—the deteriorating quality of Catholic intellectual life. As Alasdair MacIntyre describes it in another context, too much moral "debate" has been reduced to shouting slogans at one another across partisan lines.

The Editors believe that what used to be called "the liberal Catholic tradition" has virtually disappeared in the United States. Moreover, the intellectual division of twenty years ago between "progressives" and "conservatives" are now out of date. Many who used to be liberal have moved decisively to the left, both in substance and in style of argument. Many, formerly conservatives, have become inventive, socially conscious and politically concerned. A new Catholic spirit is being born. It calls for a new voice.

Moreover, the crisis in which we find ourselves is one of faith and theology, especially concerning questions of the temporal order and the role of the laity.

Stated precisely, the crisis is that clerical power—not only in the bishops and in their administrative staffs—has become overweening. This is a direct consequence of so-called "Vatican II theology." This "new theology" has four parts. Each of them weakens laymen and laywomen in their proper vocation.

First is the misuse of the "collegiality" of bishops. In itself, linked to the pre-eminent authority of the Pope, such collegiality is good. But certain institutional developments seem to us quite errant. National conferences of bishops are bringing political divisions into the church.

Second is the diminishment of the clergy. Many younger clergymen stress "the priesthood of the laity" in a false way, so as to diminish the distinctiveness of their own priestly role and, in effect, merely to patronize the laity. We who are laymen and laywomen are not, and do not aspire to be, priests. We do not want priests usurping lay roles. We need, and desire, a sharper theology of differentiation.

Third is the aggrandizement of the clergy. Even as the distinction between vocations (manifested even in dress) is being fudged, clergymen are everywhere preempting lay roles. There is a manifest and tangible clericalization of the Catholic church, worse now than before the Council. More and more often, priests and bishops make political, economic and social pronouncements about the temporal order, to which the laity is expected solely to react. This is an inversion of vocations and roles. It thwarts the normal workings of grace and personal vocation. It compounds mutual weaknesses. It invites hubris.

Fourth is the diminishment of words of faith and holiness of life. Words like "prophecy," "witness," and "charism" are more and more used for strictly partisan political opinions, less and less used of authentic faith and practice. This is a species of theological imperialism, the coercion of false labeling.

The crisis in the Catholic church of 1982 is that the church seems in danger of losing its true, original, and profound identity, in order to become what it is not, an instrument of temporal power. Nearly always today, this temporal assertion of the church is leftward in its force, as in former times it was often rightward. Yet whether tilting to the left or to the right, the fundamental theological error is the same.

We do not wish merely to mourn the passing of the liberal Catholic tradition; we wish to breathe life back into it. Many battles must be fought, both to our left and to our right. We are, first of all, Catholic—our faith is dear to us. To be "Catholic" means to have a sense of community, of tradition, of faith and prayer and contemplation, and perhaps of tragedy (as in the crucifixion and death) not common to those who are "liberal" in other ways.

But we are also "liberal" in the sense that not all Catholics are. We are neither socialists nor traditionals. Our vision of the temporal order is rather like that of Jacques Maritain, from whose Center we publish. We believe that history has a narrative form; that social progress, though difficult and reversible, lies within human possibility; and that the liberal society is an authentic, although imperfect, expression of the Gospels in political economy, made possible by the long leavening of human cultures with the faith of Judaism and Christianity.

We dread the "great, climactic battle" which Solzhenitsyn predicts on the horizon. We resist the flirtation of so many in the Church with ideas of political economy certain to diminish both liberty and productivity. We look for a return of American laymen and laywomen to their full responsibilities in the Church. We expect a "new spring," after the present critical years.

I would ask my colleagues to keep their eye on this fine publication.

Thank you, Mr. Speaker.●

MINIMUM WAGES

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. McDONALD. Mr. Speaker, during this period of high unemployment, I believe it is especially important that we continue to scrutinize the Government-mandated minimum wage laws.

A Government-mandated minimum wage does not raise real wages, but it does raise prices and cause unemployment. Wage rates are determined by supply and demand, and a given wage reflects the productivity of the work being performed. If the Government arbitrarily raises wages above the market level, some or all of the jobs in a given category will be eliminated.

A minimum wage is not in the best interest of the American worker—particularly the least educated and least skilled. It does, however, provide politicians with one more excuse to establish additional Federal welfare programs in the name of helping the unemployed. The result, of course, is greater Government control at the expense of the American people.

The following article by the noted economist Dr. Hans F. Sennholz discusses this issue in greater detail. I commend the article which appeared in the May 1983 issue of the Freeman, to the attention of my colleagues.

MINIMUM WAGES

(By Hans F. Sennholz)

In simple language, a minimum wage law is nothing more than a government order that workers must not work unless they find

jobs paying at least the stated minimum. It is an order to employers that they must pay workers the minimum, or not employ them at all. It is a direct order that is enforced by the coercive powers of the state.

The minimum wage movement came into existence, in concert with the union movement, as a consequence of severe criticism of "sweat shops" in the home-work system, which permitted employees to perform manufacturing services at home rather than in a factory. The system, which enabled women and children to participate in simple production, constituted a major threat to the union movement. To eradicate this threat and all other competition from low-cost labor, labor unions, since their very beginning, have called for government intervention.

Minimum wage legislation originated in New Zealand in 1894 and came to England in 1909, when Parliament established trade boards with the power to fix minimum rates. In the United States, the movement at first was confined to state legislation applicable to women and children only. The federal government entered the field during the 1930s when it passed labor laws with limited application, such as the Bacon-Davis Act of 1931, the Walsh-Healey Public Contracts Act of 1936, certain provisions of the U.S Housing Act of 1937, the Sugar Act of 1937, and the Civil Aeronautics Act of 1938. In the same year, the Fair Labor Standards Act provided much broader coverage and established a minimum wage level of 25 cents per hour, covering employees of all businesses engaged in interstate commerce or in the production of goods for such commerce. Later amendments to the F.L.S.A. raised the minimum wage to the present level.

There is an infinity of political errors which, once adopted and enacted, become principles of statesmanship. Labor legislation summarily disposed of the homework system and then set out to raise wage rates and improve working conditions by political force. To most political parties this is supreme statemanship that takes precedence over all other considerations. But unfortunately, it is also the root cause of mass unemployment that is inflicting immeasurable harm on millions of innocent victims.

An unhampered labor market offers opportunities to anyone seeking employment. The pressures of competition by both workers and employers establish a wage rate at which everyone eager to work can find a job, and every employer eager to hire more help can find more workers. But when government sets out forcibly to lift wage rates above those set by competition, chronic unemployment emerges. It causes countless economic distortions, reduces economic output, lowers personal incomes, and aggravates the plight of the poor.

A wage rate set above a person's own productive contribution causes his unemployment, pricing him right out of the labor market. Surely, minimum wage legislation does not directly affect a worker whose training and skills earn him a wage in excess of the minimum. But it seriously jeopardizes the employment of all those unskilled workers who produce and consequently earn less than the minimum. In the United States, minimum wage legislation does grievous harm to millions of unskilled laborers, especially among the racial and ethnic minorities—Blacks, Puerto Ricans, Chicanos, Mexicans, and American Indians.

THE VICTIMS

Most critics of minimum wage legislation do not concern themselves with the propriety and morality of political intervention with the production process. They accept the rationale of political supremacy and government power, but lament the evil effects of unemployment on some highly visible groups of victims, such as young people, especially black teenagers. Therefore, they are designing special programs for teenagers and other groups, calling for massive government expenditures on their behalf. Unfortunately they are overlooking most of the affected population.

Recent research confirms that only about one-third of low-wage earners are teenagers, almost one-half are twenty-five to sixty-four years of age. Two-thirds of the low-wage population are believed to be female, and some ten percent are individuals sixty-five years old or older. Altogether they comprise some ten percent of American labor. Other estimates are even higher. Of course, these workers who are earning the minimum or near-minimum wages are the very workers who tend to be, or are in danger of being, displaced by wage legislation.

It is an unfortunate fact that many minority youngsters with lower levels of education, training, and experience than white youngsters, are often less productive. In an unhampered labor market they would not be able to earn as high a wage as their more productive competitors, but would find employment at lower rates. When the minimum is raised above their productive ability, they are likely to be dismissed, or not to be hired. This explains why the unemployment rate of black youth in recent years has ranged between 40 and 50 percent, which is double the rate of white teenagers. If we add those individuals who in frustration and desperation have given up their search for employment, the unemployment rate among black youth may, in our estimate, exceed 70 percent.

SUBMARGINAL WORKERS

Other workers with similar limitations find it equally difficult to find employment at the minimum rate. Unskilled women, students seeking summer employment, and especially unskilled service workers in hotels, restaurants, hospitals, laundries, automotive service stations, are living continuously with the dangers of unemployment due to minimum wage increases. It is true, not every minimum wage worker loses his employment when the minimum rate is raised. Employers may seek to offset the boost with economies in other labor expenses or through exaction of greater effort and performance by the covered workers. Wherever such adjustments are impractical the submarginal workers are laid off, that is, all those workers whose costs exceed the anticipated price of the incremental goods produced or services rendered.

Obviously unemployment is more severe in industries employing a great many unskilled workers than in other industries relying mainly on professional and highly skilled labor. And it is more keenly felt in cities with concentrations of unskilled labor than in prosperous suburbs. For the South with its millions of unskilled black workers every minimum wage boost is a calamity. In Puerto Rico it is an unmitigated disaster.

But no matter how tragic the economic effects may be on certain groups of victims, we must not overlook the psychological harm and the moral wrong that are inflicted on them. Condemned to idleness and uselessness in a highly productive society and barred from making their own contributions, many in desperation are turning to vice and crime. The inordinate national crime rate attests to a moral decay that is working evil in the centers of unemployment and public assistance. And let us not forget the productive members of American society who not only must forgo the valuable services which the disemployed workers could render, but also are forced to support them through taxation and other exactions. In return, they are compelled to live in constant fear of crimes against their persons and property.

BENEFITS FOR A FEW

It is true a few minimum-wage earners actually benefit from a mandated increase. The law that raises the minimum renders submarginal all those workers who produce and earn less than the new minimum. It withdraws them from productive employment and deprives economic production of their services, which affects the labor market just like the conscription of millions of young men into military service. Their withdrawal from productive employment raises the marginal productivity of the remaining workers and, therefore, increases their wages. It also lifts some submarginal labor above the threshold of employability. If the minimum is raised from $5 to $5.50, the most productive among the excluded workers will be lifted to the new minimum in a declining order of productivity, that is, first workers who were earning $5.49, then others earning $5.48, $5.47, and so forth. But consumer reluctance to bear the higher labor costs usually sets a narrow limit to the lifting process, which consigns most subminimum workers to the new army of the unemployed.

Political force may disrupt economic activity and forcibly benefit some workers at the expense of others. It cannot stimulate production and promote universal well-being by withdrawing millions of able workers from economic production. If by law or decree a government actually could raise the wages and improve the working conditions of all workers, it would be cowardly and irresponsible to be content with $2, or $3, or $4 minimums. Let us make it $10 per hour, or better yet, $100 an hour.

If a minimum wage law actually could improve the working and living conditions of all people, let us urge the governments of undeveloped countries to imitate our example. Surely, it would alleviate the poverty and suffering of the masses of India, China, and many African and Latin American countries. Actually, it would create horrendous unemployment and jeopardize the very survival of the poor. Neither the U.S. government nor foreign governments can improve general working conditions by law or decree; only rising production can bring it about.

FRINGE BENEFITS

Nor can a government grant social benefits that do not reduce the workers' take-home pay. The incidence of any and all benefits falls on the wage earner. For an employer the worker's take-home wage is just another component of the total price he must pay for the services of a worker. He would not be an employer for long if he were to ignore all other employment costs, such as retirement and pension costs, paid holidays and vacations, healthcare insurance, profit-sharing plans, welfare funds, or any other fringe benefits. And it does not matter to him whether he may deduct the fringe benefit costs from the worker's pay or must make direct payment to third parties. In both cases the burden falls on the employee. The employer is concerned only

with the total price he must pay for the services of a worker.

The minimum wage as set by government must not be confused with the total employment costs of a worker, which in every case greatly exceed the former. Corporations that offer equal benefits to all their employees may grant fringe benefits that amount to 35 percent of executive pay and to 100 percent or more of a minimum-wage-earner's pay. But even without any such contractual privileges, the benefits mandated by government do add considerably to total costs. There are Social Security exactions and heavy levies for unemployment and workmen's compensations. The $3 minimum wage may actually amount to $5 minimum cost, and the $5 minimum wage to $10 minimum cost. It is, therefore, misleading to speak of a "small" boost of the minimum wage rate as if the mandated and contractual benefits would remain unchanged. The small minimum boost may actually amount to a sizable increase in total labor cost.

For an employer it is irrelevant whether he allocates 5 percent of employee wages to fringe benefits or 95 percent. His only concern is the total price he must pay to secure the services of a worker. If government forces him to pay more than the worker is expected to contribute to production he can be expected to dismiss the worker. And again it does not matter whether government mandates an increase of take-home pay or of fringe costs. A $1 boost in the rate of minimum wages has the same ill effect on employment as a $1 rise in the levies for Social Security and workmen's compensation.

Through their labor, workers pay for all of the fringe benefits they are receiving. They also make good for their on-the-job training by receiving low wages that allow for the expenses of their training. When the minimum wage is raised employers may react to the boost in labor cost by reducing their expenditures on benefits. In particular, they may respond by reducing the amounts spent for on-the-job training.

THE OPPORTUNITY TO ACQUIRE SKILLS AND KNOWLEDGE

For young people the most important fringe benefit is the opportunity to acquire new skills and knowledge, which enhances their productivity in the future. Most jobs offer an opportunity to learn through formal training programs or informal learning by experience. On-the-job training not only imparts basic skills, but also stimulates motivation, nurtures a sense of responsibility, and generally prepares young people for rewarding roles in productive society. If they fail to acquire the experience, training, competencies and credentials in their formative years, they will have difficulty holding regular jobs in their adult years. Any barrier to on-the-job training inflicts serious harm on them.

Millions of young workers who are disemployed by the minimum wage may never acquire the general training and specific skills that make them useful members of society. They may never learn the basic discipline and ethos of labor that are so essential in our society. Instead, prolonged unemployment so early in life may prepare them for a precarious and bitter existence on public welfare. More millions may remain employed at or near the minimum, but their on-the-job training may be reduced or eliminated as a result of mandated minimum increases, which may keep them marginally productive throughout life. And their more creative fellowmen not only must forgo their valuable cooperation, but may even be called upon to assist them and their dependents.●

INTRASTATE QUARANTINES OF ANIMALS AND POULTRY UNDER EXTRAORDINARY EMERGENCY CONDITIONS

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. MADIGAN. Mr. Speaker, today I am introducing, by request of the Secretary of Agriculture, legislation that would authorize intrastate quarantines of animals and poultry under extraordinary emergency conditions. This bill is identical in language to the bill H.R. 5455 that passed the House by voice vote under suspension of the rules on September 23, 1982. It was expected that this bill would be passed by the Senate during the lameduck session, but this did not happen.

This bill would expand the powers of the Secretary of Agriculture after he has declared an extraordinary emergency due to the existence of any dangerous, communicable disease of livestock or poultry of the United States. Public Law 87-518, the act of July 2, 1982 (21 U.S.C. 134a(b)) authorizes the Secretary to declare such an extraordinary emergency and take specified actions when he finds that a State or other jurisdiction is not taking adequate measures to control any such disease. USDA presently does not have authority to prevent the intrastate movement of animals, animal carcasses, animal products, or articles in such an emergency situation, unless the Secretary finds that the animals are or have been affected by or exposed to such a disease and that the carcasses, products, and articles were so related to such animals as to be likely to be a means of disseminating such disease. Then he may seize, quarantine, and dispose of the particular animals, carcasses, products, or articles involved.

The Secretary of Agriculture considers that additional authority is needed to quarantine specific localities and control the intrastate movement of animals, their carcasses, and related products and articles which are not necessarily found to be affected with or exposed to any dangerous communicable disease of livestock and poultry. This additional authority would make it possible for USDA to implement the most effective quarantine controls to prevent the inadvertent intrastate spread of such a disease from affected localities. Uncontrolled movements of livestock and poultry into affected areas can hamper control and eradication efforts by increasing the population of exposed animals needing treatment. The outbreak of exotic newcastle disease in southern California in 1971-73 and recent outbreaks in March and April 1980 in California, Virginia, and Pennsylvania clearly demonstrate the need for this additional authority according to the Department of Agriculture.●

E. ROSS ADAIR

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. ADDABBO. Mr. Speaker, I was saddened to learn of the death of my friend and former colleague, Mr. Ross Adair.

Since I began my terms in Congress, I had learned to admire and respect Ross for his great talents, faithful service, and strong conviction to stand by what he believed in. In his 20 years in Congress, Ross had risen to become the ranking Republican member on the House Committee on Foreign Affairs and subsequently was honored by being named the Ambassador to Ethiopia which he served as until 1974.

Ross' contribution to foreign affairs and veteran policies had been valuable to me and my fellow Members in Congress. His devotion and expertise had been of great value to this country.

You can be assured that his good disposition, leadership, and presence has always been missed by the Congress since he retired and now he will be sorely missed by everyone who knew him.

I would like to extend my deepest sympathy to his lovely wife, Marian, and all the members of the Adair family. Ross will not be forgotten in my thought and prayers.●

SMALL BUSINESS WEEK

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. HOYER. Madam Speaker, I would like to take this opportunity to call to the attention of my colleagues the occasion of Small Business Week, which has been designed by Presidential proclamation as May 8 through 13. I am pleased to pay this tribute, not only for the many men and women who own, operate, and are employed at the thousands of small businesses in my own Fifth Congressional District, but to those millions throughout the Nation. At the same time, I feel it is most fitting to honor my friend and fellow Marylander, Congressman PARREN MITCHELL, who so ably chairs the House Committee on Small Business.

Chairman MITCHELL's leadership has insured that the concerns of small business receive the attention they deserve in the Congress. Throughout the difficult past few years, when recession has hit hardest on the small businesses of this Nation, Chairman MITCHELL has, time and time again, stood before this body and championed legislation to bring much needed relief. It has not been an easy task in the crowded agenda of concerns, but it has been necessary, and the chairman's efforts are to be commended.

This year's celebration theme truly expresses the deep-felt commitment our citizens have always had toward small business. "There's No Business Like Small Business" has been the foundation block for all our industry, from the earliest colonial days. Today, small businesses employ nearly 55 percent of our workers, lending their knowledge and expertise to everything from complex computer systems to corner lemonade stands.

While small businesses have absorbed much of the impact of the greatest recession since World War II, with a failure rate unacceptably high, new business ventures are at an all time high, reflecting the "stick-to-itiveness" indigenous to this American industry.

Mr. Speaker, the men and women of the small businesses of this country are truly the cornerstone of our society. I am proud to join my colleagues in this salute to these people, who have accepted the challenge of operating a business. They are the people responsible for keeping Prince Georges County, Md., and the rest of America working.●

NATHAN HALE AWARD RECEIVED BY HON. MATTHEW RINALDO

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. COURTER. Mr. Speaker, I would like to join in congratulating my good friend MATT RINALDO on receipt of the New Jersey Reserve Officer Association's Nathan Hale Award. Having myself been privileged to receive this award, I know what an honor it is and how proud MATT must feel.

As our history books tell us, Nathan Hale was a true patriot, and key figure in our country's struggle for independence. It is especially fitting, then, that those individuals, like my New Jersey colleague, who have demonstrated a concern for the defense and freedom of our country be bestowed with an award named after one of our earliest military heroes. As a member of the House Armed Services Committee, I believe such concern cannot be more clearly illustrated than by vigorous and firm support of our Nation's defenses. National security must always be the first and most important priority for Congress for without such strength all our cherished liberties are in jeopardy.

During his years in the House, I know MATT has shown this concern. His stand on many issues vital to the well-being of the military indicates he is conscious of the fact that a strong defense is everybody's responsibility. All this country's heroes, most particularly, Nathan Hale, have known that a crucial ingredient of the continuation of a free society rests on a nation's ability to defend itself. Those who have shown this recognization are, in today's difficult times, especially deserving of our respect and in this regard, I personally congratulate MATT RINALDO on being distinguished in this way.●

SMALL BUSINESS WEEK

HON. JOHN R. McKERNAN, JR.

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. McKERNAN. Madam Speaker, the President has proclaimed the week of May 8, 1983, as National Small Business Week. It is indeed fitting that a week be set aside to pay tribute to the significant contributions which this vital sector of our Nation's economy has made to our society as a whole.

Small businesses form the foundation on which our free enterprise system is based. Roughly 95 percent of all businesses are firms with fewer than 100 employees, accounting for almost 55 percent of all jobs. More than 86 percent of new jobs are created by small businesses. In addition, they account for more than 50 percent of all scientific and industrial innovation.

The term "small business" takes on a different connotation insofar as the State of Maine is concerned. Maine's business community is characterized by businesses with 10 to 20 employees, not 100. As I have traveled throughout the First District of Maine and spoken with hundreds of employers and employees of Maine's small businesses, I have become increasingly aware that our 10- to 20-employee-size small businesses still have not received the support from Congresss which they both deserve and need if they are going to continue to play a vital role in our economy.

There is no question that small businesses have collectively contributed more to our society than any other sector. But, regrettably, small businesses are the most vulnerable to downturns in the economy, particularly when accompanied by high interest rates. The past few years saw alarming numbers of small businesses fold, as interest rates hit record heights. Fortunately, this trend appears to have been reversed, but we cannot afford to turn our backs on small businesses now after merely voicing support for them on the floor of the House. If our Nation's small businesses are going to continue to provide our citizens with jobs and an improved standard of living through innovative breakthroughs, then we in Congress have got to continue to insure that small businesses have access to needed capital. And we need to insure that they will not again be subjected to the high interest rates of past years.

I am hopeful that, after we have paid this much deserved tribute to our Nation's small businesses this week, I will have an opportunity to participate in a dialog with them to hear how we in Congress can best address the problems that still face our Nation's small businesses.●

DEFUNDING THE LEFT—DEPARTMENT OF EDUCATION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday May 12, 1983

● Mr. McDONALD. Mr. Speaker, I wonder just how many in this body have any idea where the money goes after we appropriate it for respective departments in the executive branch. If the truth were known I do not think that the majority of this body would vote for their money to be spent in such a manner.

Thanks to the April, 1983 issue of Conservative Digest, I can now share with my colleagues, and I hope a good amount of the American public, where our hard earned money is being spent.

For this RECORD entry I single out the Department of Education. Would the majority of this body go on vote record: In favor of financing Marxist-Leninist terrorist movements in El Salvador; in favor of a lesbian rights resolution; in favor of more centralized government or socialism leading to communism; in favor of the youth arm of the American Communist Party. More appropriate, would Members of this House by vote approve the expenditure of $4,323,245.00 for such activity or causes. The answer to all would be an emphatic "no."

It is a continuing wonder to me that the President would allow such nonsense to go on. This is especially so in view of the fact that one organization to receive thousands of dollars is one that hopes that Mr. Reagan's state of the Union message, his last one, will be his "* * * next to last." Where your money is being spent by the Depart-

ment of Education from the April, 1983 issue of Conservative Digest follows:

[From the Conservative Digest, April 1983]

DEPARTMENT OF EDUCATION

(By Secretary Terrel Bell)

When he took office in 1981, Ronald Reagan vowed he would dismantle the Department of Education (DoEd). As recently as the Feb. 18, 1983 Conservative Political Action Conference, he promised "and do not think for a moment I have given up—we need to eliminate the unnecessary and politically engendered Department of Education."

Yet DoEd lives. Under Secretary Terrel Bell, DoEd still funds anti-American groups, and political activities overtly inimical to Reagan himself.

Recent funding includes:

Two grants totaling $538,389 to the National Conference of State Legislatures (NCSL) (February 2, 1981 and March 1, 1982).

Representing NCSL, New Hampshire House Speaker John B. Tucker attacked President Reagan's New Federalism program because "the [budget] cuts far overshadow the process itself."

NCSL president William Passanante, Speaker of the New York Assembly, claimed Reagan administration policies "will compound the human and budget problems facing cities."

$98,000 to the American Federation of Teachers (AFT) (February 1, 1981).

In January, AFT President Albert Shanker attacked President Reagan's tuition tax credit proposal: "It is discouraging to supporters of public education that the president remains on the tuition tax credit bandwagon. The AFT and others will do all in its power to derail this ill-conceived scheme."

$75,000 to the Labor Institute for Human Enrichment, Inc. (July 30, 1981).

Albert Shanker heads the institute's board of directors.

In January Shanker said about Ronald Reagan, "Perhaps the only encouraging aspect of the president's State of the Union message is that, hopefully, it is his next-to-last."

At AFT's July 1982 convention, Shanker told 3,000 delegates they should "work hard politically and hold out for 2 more years" till a Democrat succeeds Reagan.

$72,454 for the third year of a grant to the Campesina Project, which gives migrant farm women classes in "survival skills [including methods of obtaining food stamps and Medi-Cal], leadership training . . . citizen advocacy" (Fiscal Year 1982).

The Campesina Project is run by the Bay Area Bilingual Education League (BABEL), an Oakland-based Hispanic community action group, given at least $2,050,923 in 1981 by several DoEd programs. The Campesina Project is run by Dolores Huerta, first vice-president of the United Farm Workers union.

$156,345 to the National Organization for Women Legal Defense and Education Fund (NOWLDEF) (October 16, 1982).

Nowldef's parent group is the National Organization for Women (NOW). Then-president Eleanor Smeal sent out a fund-raising appeal in early 1982, noting: "[NOW] has two political action committees that were created to truly advance women's rights at the ballot box. This year we're going to use these political action committees in a way that will make the politicians of this country really sit up and take notice.

The 1982 NOW National Conference passed a "Lesbian Rights Resolution."

The Conference said possession of nuclear weapons "is antithetical to the possibilities for creating a feminist society."

$72,317 to the National Urban League's Greenville, S.C. office (June 18, 1982). According to the Washington Post, the League received $110 million from various federal agencies in 1980. It recently joined Ralph Nader, the Gray Panthers and other left-wing groups in endorsing "Reclaim America Week"—a nationwide protest sponsored by National People's Action, a radical group using confrontational organizing to effect social change.

$95,673 to the International Ladies Garment Workers Union (ILGWU) from DoEd's Fund for the Improvement of Post-secondary Education for a "ILGWU learning organization project" (April 26, 1982). According to Information Digest, ILGWU supports Marxist-Leninist terrorist movements in El Salvador and opposes U.S. support of the beleagured, democratically elected Salvadoran government.

$55,919 to the United Federation of Teachers (UFT) (July 21, 1981). American Federation of Teachers (AFT) President Albert Shanker heads the UFT.

Addressing the Rochester Teachers Association, Shanker "blasted President Reagan's fiscal policies," reported UPI. He "pledged local educators would continue to lobby local, state and national representatives in an effort to combat Reagan's budget maneuvering."

$931,775 to the Phelps-Stokes Fund (April 1, 1981). In December 1981, Fund President Franklin H. Williams said, "The Reagan administration's actions and proposed actions, its budget cuts and budget priorities, its nominations and proposed appointments constitute a litany of lost faith in the American dream."

Two grants totaling $205,047 to the National Student Educational Fund (June 25, 1981 and February 27, 1981).

UPI reports "Joe Sweeney, program director of the National Student Education Fund and the U.S. Student Association . . . said student lobbying efforts paid off [in 1981] by keeping cuts in federal student aid from being as drastic as President Reagan first proposed."

In June 1981, the Fund opposed Reagan's nominee for solicitor general, Rex E. Lee—because Lee thought the ERA would freeze women's issues "into constitutional concrete," rather than letting elected officials decide them.

$107,630 to the United States Student Association (USSA) (July 31, 1981). According to Human Events, USSA is a "pro-Marxist student group that recently elected as its vice-chairman one Pedro Rodriquez, the former national student secretary of the Young Workers Liberation League (YWLL), the youth arm of the Communist party."

$23,179 to the National Audubon Society (September 15, 1981). In March, the Society joined 9 environmentalist groups who "said . . . they were stepping up their attacks in the hope that publicity from the EPA crisis would help in bringing additional pressure on Reagan to reverse policies," AP reports.

Two grants totaling $181,400 to the National Women's Law Center (NWLC) from DoEd's Women's Educational Equity Act Program (July 1, 1981 and June 12, 1981).

In December 1981, the Reagan administration proposed redefining federal financial aid: small colleges and technical schools—whose students received only Guaranteed Student Loans, Parent Loans or Pell Grants—no longer would have to meet complex civil rights requirements. Discriminations would still be prosecuted, but red rape cut.

This "met with strong opposition from such groups as . . . the National Women's Law Center," according to the Washington Post. NWLC attorney Margaret A. Kohn called the proposal "outrageous," reports AP. She charged Reagan administration officials with having greater concern for political actions than legality.

In March 1983 the administration dropped the proposal.

$91,000 to the Health Equity Project from the Women's Educational Equity Act Program (August 31, 1981).

In February 1981, the Washington Post reported: "A judge's ruling that federal laws against sex discrimination do not apply to interscholastic and intercollegiate sports programs that do not receive federal aid drew a swift and angry response . . . from the women's athletic establishment," including the Health Equity Project.

Project Director Margaret Dunkel said, "This decision has to be appealed."

$82,202 to Working Women: the National Association of Office Workers (April 27, 1981).

In 1980, at Worker Women's urging, Jimmy Carter's Labor Department charged National City Bank of Cleveland with discrimination.

In February 1982, Ronald Reagan's Labor Department dropped the suit, after the bank pledged to post future job openings and increase counseling and education programs for women and minorities.

Working Women's executive director Karen Nussbaum blasted Reagan: "Working Women will be consulting our attorneys about further legal action."

$115,573 to the Mexican American legal Defense and Education Fund (June 25, 1981).

In January 1983, fund president Vilman Martinez attacked President Reagan at the Leadership Conference on Civil Rights: "Your insensitivity to our concerns and the unfairness of your administration's economic policies have caused untold and unnecessary misery in our committees. These must be challenged."

$136,807 to the Women's Action Alliance, Inc. from the Women's Educational Equity Act Program for a "Nonsexist child development project" (June 30, 1981).

Feminist Gloria Steinem headed the Alliance in the early 1970s. It supports abortion on demand, and federal financing of abortions.

$46,935 to the National Urban Coalition (August 28, 1981).

In May 1982 the Coalition charged the Reagan administration was risking a renewal of urban violence. "People are worried, scared, about this summer. The atmosphere out there is scary," said coalition president M. Carl Holman.

$1,237,600 to the League of United Latin American Citizens (LULAC) National Education Service Center, Inc. for a "talent search" (May 31, 1981).

President Tony Bonilla opened LULAC's 1982 national executive board meeting with a "call for opposition to Reagan's policy of decentralized government," UPI reported.●

NURSING HOME DEREGULATION MORATORIUM AND STUDY COMMISSION

HON. JOHN D. DINGELL
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. DINGELL. Mr. Speaker, last year, my colleagues and I introduced H.R. 6916 in response to the administration's stated purpose to deregulate the nursing home industry. The critical element of the bill, a moratorium on deregulation, was incorporated in the Tax Equity and Fiscal Responsibility Act of 1982. The moratorium will expire this summer. The statement of managers also asked the Secretary of Health and Human Services to consult with the Congress before taking any further action to deregulate nursing homes.

When Mrs. Heckler was nominated to be Secretary of Health and Human Services, we wrote to her, expressing our concern. Here is the text of our letter:

FEBRUARY 23, 1983.

DEAR MADAM SECRETARY-DESIGNATE: We would like to congratulate you on your appointment to the Cabinet. There are many areas where our committees have worked closely with Secretary Schweiker and we look forward to continuing constructive relations with you. There is an important matter that remains under discussion between the Department of our committees. We are writing to call your personal attention to the matter.

When this Administration took office, it prepared a list of "burdensome" regulations. In the Department of Health and Human Services, nursing home health and safety was targeted for deregulation. The Health Care Financing Administration stopped work on proposals developed under the previous administration and set up its own Task Force on Regulatory Relief. The task force worked first on a rewrite of the Conditions of Participation, which govern the standards that a facility must meet to receive Medicare or Medicaid payment. The draft proposal that was circulated informally, but never published by the Department, drew opposition from States, nursing home residents and their advocates, and the nonprofit nursing homes. The Secretary made a public announcement in March 1982 that health and safety standards for nursing homes "will remain untouched" and stopped work on changing the Conditions of Participation (subpart K).

On May 27, HCFA issued a new deregulatory proposal, which would have weakened the enforcement of nursing home standards. This proposal would have allowed less frequent inspections by state survey and certification agencies. It would have allowed states that wished to accept inspections by the Joint Commission on Accreditation of Hospitals, using JCAH standards in place of Federal standards, to deem JCAH accreditation to be equivalent to state survey and certification. We have attached our analysis of these rules.

The May 27 proposal was opposed by the States, by nursing home residents and their advocates, and following a hearing in the Senate, was unanimously opposed by the Senate Special Committee on Aging. Our Committees received hundreds of letters opposing the rules, and tried unsuccessfully to get Secretary Schweiker to testify on the rules. We then introduced H.R. 6916, to establish a two-year moratorium on deregulation and to create a study commission under the Institute of Medicine on the subject of nursing home enforcement. Language similar to H.R. 6916 was added to the Medicaid portion of the Tax Equity and Fiscal Responsibility Act, placing a six-month moratorium on deregulation of nursing homes. The Statement of Managers instructed the Secretary to consult with the Congress before issuing new rules on nursing homes. A further extension of the moratorium was included in the Continuing Resolution.

Many of the groups that wrote to us accused the Department of cutting back on the program because of a desire to spend less money protecting nursing home residents. There are 1.3 million people who live in about 18,000 nursing homes. The survey and certification program used to be paid 100% by the Federal Government. As of FY 1981, Medicaid activities became 25% state funded. Overall, both Medicare and Medicaid survey and certification funds have declined. The States indicate that there has been a reduction of at least 20% in enforcement activities due to the reductions. The 1984 budget proposal from the Department continues to decrease the funding for survey and certification. The new lower level will allow only 64% of Medicare and 78% of Medicaid facilities to be seen during the year. The budget anticipates promulgation of a less stringent inspection schedule.

We remain deeply concerned about the health and safety of nursing home residents. We would be glad to discuss any constructive proposals to ameliorate conditions in nursing homes. We believe that this matter deserves your personal attention.

Sincerely,

JOHN D. DINGELL.
HENRY A. WAXMAN.
CLAUDE PEPPER.

As we wait for a reply from the Secretary, we have received new interest in and support for the Institute of Medicine study which was part of H.R. 6916. The Institute has been working on plans for such a study and both consumer and industry groups have confirmed the need to study the enforcement of health and safety and quality of care in nursing homes. Thus, we are introducing H.R. 2997 to establish a commission and to extend the moratorium. The Health and the Environment Subcommittee of the Committee on Energy and Commerce will hold a hearing on May 23 on this bill and to receive an extensive GAO report on nursing homes.

H.R. 2997

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Nursing Home Standards Act of 1983".

NATIONAL COMMISSION ON THE REGULATION OF NURSING HOMES

SEC. 2. (a) Congress finds the following:

(1) In carrying out its responsibility to serve the national interest, Congress must ensure that the care provided to nursing home residents and the environment in which such care is rendered are of the highest possible quality.

(2) Inasmuch as a substantial portion of the cost of such care is met by the Government of the United States, principally through title XVIII (medicare) and title XIX (medicaid) of the Social Security Act, it is the responsibility of Congress and the executive branch to assure that standards which govern the provision of such care, and the enforcement of such standards, are adequate to protect the health and safety of residents and to promote the effective and efficient use of public moneys.

(3) Existing regulations relating to the provision of such care have brought about a great deal of progress in achieving these goals; however, some of these regulations are duplicative or ineffective and others fail to provide adequate protection for nursing home residents.

(4) Before changes are made in existing regulations, an evaluation of these regulations for their adequacy and necessity is in order.

(b)(1)(A) The Secretary of Health and Human Services shall arrange, in accordance with subsection (d), for the establishment of a National Commission on the Regulation of Nursing Homes (hereinafter in this Act referred to as the "Commission").

(2) The purposes of the Commission are—

(A) to examine existing quality, health, and safety requirements of the medicare and medicaid programs for skilled nursing and intermediate care facilities and the regulations relating to the enforcement of such requirements for their adequacy, necessity, and effectiveness, with special attention to their effectiveness in promoting good patient care;

(B) to examine and make recommendations with respect to the role of the Federal and State governments in assuring the health and safety of residents of skilled nursing and intermediate care facilities, including the appropriateness of providing for certification by national accreditation bodies of compliance of such facilities with some or all of the requirements relating to such facilities; and

(C) to make specific recommendations, including recommendations for legislation if appropriate, to the Congress and to the Secretary of Health and Human Services, not later than September 30, 1984, for improvement of existing regulations, including any recommendations for alternative approaches to the regulation of skilled nursing and intermediate care facilities under the medicare and medicaid programs.

In reviewing regulations concerning such facilities, the Commission shall pay special attention to the enforcement of such regulations (including any regulations it may recommend).

(3) The work of the Commission shall be conducted in a manner which provides for the involvement of Members of Congress or their representatives, officials of the Department of Health and Human Services, and officials of State and local governments who are not members of the Commission. In addition, the Commission may consult with any individual or organization with expertise in issues relating to the work of the Commission.

(c) The Commission shall be composed of thirteen members, of whom—

(1) seven are members of the Institute of Medicine of the National Academy of Sciences with experience in long-term care

(and no more than three of whom are physicians);

(2) two are residents of a skilled nursing or intermediate care facility (or representatives of such individuals or organizations which advocate in their behalf), at least one of whom is a resident of a non-profit skilled nursing or intermediate care facility or is a representative of individuals or organizations which advocate in behalf of residents of such non-profit facilities;

(3) two are operators of skilled nursing or intermediate care facilities (or representatives of organizations which represent their interests), at least one of whom is an operator of a non-profit skilled nursing or intermediate care facility or is a representative of an organization which represents the interests of such non-profit facilities; and

(4) two are officials of State government (whether elected or appointed) with responsibility relating to the health and safety of residents of skilled nursing and intermediate care facilities, or representatives of such officials or of organizations representing such officials.

(d) The Secretary of Health and Human Services shall request the National Academy of Sciences, through the Institute of Medicine, to establish, appoint, and provide administrative support for the Commission under an arrangement under which the actual expenses incurred by the academy in carrying out such functions will be paid by the Secretary. If the National Academy of Sciences is willing to do so, the Secretary shall enter into such an arrangement with the Academy.

(e) Funds appropriated under section 1110 of the Social Security Act after the date of the enactment of this Act shall be used to the extent necessary to carry out this section.

EXTENDING MORATORIUM ON DEREGULATION OF SKILLED NURSING AND INTERMEDIATE CARE FACILITIES

SEC. 3. Notwithstanding any other provision of law, no change in the regulations subject to the moratorium required by section 135 of Public Law 97-248 shall be promulgated in final form until the end of the six month period beginning on the date the commission makes specific recommendations to the Congress under section 2(b)(2)(C) of this Act, during which period the Department of Health and Human Services shall seek public review and comment on any such proposed regulations and consult with the appropriate Committees of Congress.●

NATIONAL NURSING HOME STANDARDS ACT OF 1983

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday May 12, 1983

● Mr. WAXMAN. Mr. Speaker, together with my colleagues, I am introducing the "National Nursing Homes Standards Act of 1983," a revised version of H.R. 6916, introduced in the 97th Congress.

This bill is a result of efforts by a number of Members of the House to arrive at a tool for improving the way nursing homes are regulated.

The Federal Government has a heavy responsibility toward residents of nursing homes, among the most vulnerable members of our society. We pay about half the cost of all nursing home care; over 7.5 billion Federal dollars were expended in 1982 to care for over 1 million elderly and handicapped nursing home residents, and we anticipate that almost $10 billion for such care will be spent in 1984.

Nursing homes are one of the major growth areas in the health sector. According to the HCFA Review of September 1982, spending for nursing home care swelled from $500 million in 1950, to $2 billion in 1965 when medicare and medicaid were enacted, to $24 billion in 1982, an increase of almost 5,000 percent in just two decades.

The number of persons likely to need nursing home care has grown and will continue to grow rapidly over the next 50 years. The biggest users of this care are persons over 65. Their numbers tripled between 1950 and 1980, and that trend will continue right through to the next century.

The Congress has consistently recognized the potential for abuse in such a fast growing industry caring for a comparatively unprotected population, and has pressed for stronger standards and oversight. Currently, both the Federal Government and the States are involved in supervising both the quality of care offered residents of nursing homes and the health and safety of those residents.

Overseeing such institutions is a delicate and difficult process. Staff turnover in long-term care facilties is very high, and patients on the whole remain in residence for only about 2 years. With such shifts in resident population and staff, conditions can change rapidly.

The General Accounting Office tells us that the kind of care which patients need is also changing. New patients entering nursing homes are sicker than they were 10 years ago, more dependent, and require more intensive attention. Thus, we need to be constantly vigilant in overseeing conditions in nursing homes.

During the 97th Congress, the administration suggested replacing some of the standards which are now in place. The Secretary of Health and Human Services proposed regulations which would significantly reduce the frequency and thoroughness of inspections of nursing homes. Annual inspection visits would no longer be mandated; the current 90-day period for correction of deficiencies would be eliminated; and a private accreditation body would be given inspection authority, but not be required to report deficiencies to the responsible public agency.

Both the Senate and the House did not believe that weakening the minimal standards now in place was justified. The House initiated a moratorium on any regulatory change in nursing home standards until March 6, 1983. The Senate not only supported the moratorium, but extended it until August 1983.

Congress asked the administration to work cooperatively to develop a method for improving standards and patient care; to date, that has not occurred. Thus, we are introducing an updated version of last year's bill.

I do not believe that now is the time to weaken the minimal standards now in place. I do believe that there are areas where regulations can be improved to eliminate duplication and ineffective reporting. I do think the current system can be reformed in a way which will better safeguard the health and dignity of residents. But we need to look at the system in its entirety, examine rules now in place, examine alternative systems, and arrive at reforms intelligently, responsibly, and thoughtfully.

H.R. 2997 is a constructive way to arrive at that improved system. I propose a moratorium on all changes in nursing home regulations for a fixed time period. During that period, a Commission headed by members of the Institute of Medicine of the National Academy of Sciences will examine the adequacy and necessity for rules and regulations now in place, and make recommendations to us in the Congress for improvement, including any recommendations for alternative approaches to the regulation of long-term care institutions. Membership on the Commission would include representatives of nursing home residents, and owners and operators of nursing homes, so that their experiences and views are also heard.

The Commission will report back to Congress by September 30, 1984, after having solicited ideas from other relevant individuals or groups, including officials of State governments. The Congress would have 6 months after the report's submission to enact any of the recommendations of the Commission, or other relevant legislation. If the Congress does not act by that date, then the moratorium is lifted.

I believe by imposing this time limit, we are indicating our intention to take the Commission seriously, and to enact changes which will emerge from the deliberations of such a diverse and expert group. In the coming decades, we need to have an effective regulatory system to deal with the increasing numbers of residents anticipated in long-term care facilities.

This bill is an important, constructive and well-conceived attempt to carry out our heavy responsibility to protect the safety and well-being of our valued senior citizens.

I urge each Member's support for this legislation.●

PROTECTING NURSING HOME RESIDENTS

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. PEPPER. Mr. Speaker, I have today joined my distinguished colleagues, Representatives DINGELL, WAXMAN, WYDEN, OAKAR, RATCHFORD, MIKULSKI, and SNOWE in introducing legislation designed to address—in what we believe to be a most affirmative fashion—a problem which has plagued many of us for a number of years: the proper enforcement of meaningful standards related to the care of nursing home patients.

As chairman of the House Select Committee on Aging's Subcommittee on Health and Long-Term Care, I have long been aware and deeply concerned over problems which have been reported in a number of the Nation's nursing homes. While I am aware that all nursing homes do not provide substandard care, problems do persist in some and they must be corrected.

The Congress and the administration are responsible for assuring that strong and effective enforcement standards are in place to assure residents and their loved ones that the quality of care that is provided meets the highest standard. The Federal Government, which provides about one-third of all nursing home care in America, has a direct interest in assuring that these moneys are well spent and not squandered on inappropriate or substandard care.

That is why we are proposing, in the legislation we introduce today, to continue an already imposed moratorium on the issuance of any rules which would have the effect of deregulation of nursing homes. While the moratorium is in effect, a National Commission on the Regulation of Nursing Homes, under the auspices of the Institute of Medicine of the National Academy of Sciences, would consider the current regulations and propose any advisable changes. The Commission would be composed of nursing home residents or their representatives, providers of nursing home care or their representatives, and State officials with responsibility relating to nursing home care, as well as members of the Institute of Medicine. This 13-member Commission would be instructed to report to the Congress and the Department of Health and Human Services no later than September 30, 1984. A moratorium on rule changes relating to regulation of nursing homes would be imposed until 6 months after the Commission reports, giving Congress and the department the opportunity to act on the recommendations of the Commission.

We believe that this bill represents an affirmative approach which should be supported by the administration and all others who share responsibility for the quality of care that is provided in the Nation's nursing homes. I urge nursing home providers, consumer groups, aging organizations, and State officials who have expressed to us their concerns respecting these proposed regulations, to join with us in enacting this legislation so that we can promise all our people who are or will be nursing home residents—and who are most vulnerable—that we will do all that we possibly can to insure they will receive the best care and attention that this Nation can provide in its long-term care facilities.●

REAGAN'S INFERNO AND A DREAM OF 1984

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. McDONALD. Mr. Speaker, once again, Conservative Digest, in its issue of April 1983, has performed more than a valuable service to the people of this Nation and, more important, to the struggling middle-class taxpayer.

This particular issue, as it has done once in the past, is dedicated totally to the exposure with chapter and verse, of funding of leftist causes. The naive of this country had assumed that the Reagan administration would do all in their power to halt expenditures for those forces diametrically opposed to all that Ronald Reagan explicitly has stated he is for.

This first entry is from the publisher of Conservative Digest, Richard A. Viguerie, who sums up the reality of the situation. Mr. Viguerie's comments are immediately followed by a dream of what can happen in 1984 by Mr. Paul Weyrich, a regular Conservative Digest political columnist. Although Mr. Weyrich's column is ostensibly based on fiction, the realistic American knows what will be in store for all if the President does not take direct action and now, to halt all that definitely will destroy Mr. Reagan in 1984. Mr. Viguerie's and Mr. Weyrich's columns follow:

[From Conservative Digest, April 1983]

REAGAN'S INFERNO

(By Richard A. Viguerie)

Of the many disappointments conservatives have experienced from the Reagan administration, none has been more disappointing nor surprising than their lack of enthusiasm for stopping the annual flow of billions of dollars to the liberals.

Day after day, leaders of thousands of civil rights, consumer, environmental, labor, homosexual, anti-defense and other politically active liberal organizations savagely attack President Reagan and his policies in the establishment media. They are united in a single goal: Defeat Reagan and conservatives.

Yet incredibly, the Reagan administration continues to turn the other cheek and finance liberals with our tax dollars.

Many of these liberal organizations would not exist—at least in current form—without the billions of dollars they receive every year from the taxpayers. These liberal groups have howled in protest after the Administration reduced their federal dole by 5 to 10 percent. However, many of these organizations would be rendered totally speechless if there was a 100 percent cutoff of their government funds because they would go out of business.

Ironic, isn't it? If the Reagan administration cut off all the liberals' funding, we would actually hear less criticism than by simply reducing it 5 to 10 percent.

Liberals have received tens of billions of tax dollars during the last 10 years alone. The exact figure, cloaked in a confusing bureaucratic maze, is almost impossible to determine.

No wonder liberals win most elections. No wonder taxes are up over 320 percent since 1970; government growth has swelled; the budget is out of balance, with a deficit of over $200 billion per year; and American foreign policy seems determined to bolster communist economies while leaving our friends twisting in the wind.

Most groups which oppose President Reagan's efforts to strengthen defense, cut taxes, enact reasonable environmental programs and shrink government down to size, are largely or partly funded by the Reagan administration. By refusing to make a serious attempt to halt federal funding of left-wing groups which oppose the President's policies, certain Reagan aides have doomed their boss to failure, condemned conservative appointees to ridicule, and dashed most Americans' hopes for meaningful reform.

Interior Secretary Watt is under constant fire from no-growth environmentalists. Reagan's tax cuts and social programs are torn apart by free-spending, big government elitists; his defense and arms negotiations proposals attacked by disarmament advocates.

From pro-abortion radical feminists to nuclear freeze proponents, the administration and traditional American values get trashed by liberal and left-wing political advocacy groups, which continue to be bankrolled by American taxpayers with the Reagan administration's blessing.

And the liberal attacks work. Most of the groups which hounded former EPA Administrator Anne Burford from office are financed, partly, by the Reagan administration.

Left unchecked, federal funding of liberal and left-wing political advocacy groups will not only spell serious political trouble for Ronald Reagan and conservatives in 1983 and 1984, but could mean the end of a serious conservative movement in 4 to 6 years.

Groups which receive massive amounts of taxpayers money and attack Reagan and conservatives include:

The National Urban League—(received federal grants in excess of $7 million since 1981)

Planned Parenthood—(received more than $35 million each year since Reagan took office)

The National Organization for Women Legal Defense and Education Fund—(received $156,345 from the Department of Education in 1982)

The AFL-CIO and its affiliates—(received more than $12 million from the Department of Labor since Reagan took office)

The Environmental Action Foundation (EAF)—(received $176,644 from the Department of Energy. EAF is a spin-off of Environmental Action (EA). EA says its lobbying is aimed at "helping dedicated grassroots environmentalists fight the pro-pollution policies of President Reagan.")

Jesse Jackson's PUSH for Excellence—(received $656,664 from the Department of Education on September 30, 1981)

And there are hundreds more examples in this issue of Conservative Digest. A more detailed examination of this problem, with thousands of examples, can be found in the upcoming book, Guess Who Finances the Liberals?, written by John Houston of the Fairness Committee Against Tax Funded Politics and myself. It will be available in June.

Back in January of this year the Office of Management and Budget proposed regulations which would have greatly restricted the flow of government funds to politically active groups. Liberal, business and other special interest lobbies which feed at the federal treasury strongly opposed this modest effort; however, conservatives and taxpayers did little to support it. Consequently, the regulations were withdrawn in March.

New regulations are expected shortly. This time it will be crucial for all who oppose giving our tax money to unions, feminists, Jesse Jackson's organization, radical environmentalists, homosexuals and the host of other leftwing organizations to quickly let the Reagan administration know what we think.

On page 8 you will find 3 postcards addressed to Michael Horowitz, the man in charge of issuing the new OMB regulations. Mr. Horowitz and his boss, David Stockman, need to receive thousands of cards and letters now. They've already been swamped with mail from those who want our tax money.

This could be the most critical decision the Reagan administration ever makes. If the liberals and the establishment liberal media scare them off, an historic opportunity could be lost—forever. If the liberals continue to receive billions of tax dollars a year, if will be almost impossible to cut taxes, significantly reduce the size and role of the government and fight communism. And elected conservatives will be destined to forever be the minority, unable to compete against opponents fueled by tens of billions of tax dollars.

The hour is late.

Will President Reagan provide the necessary leadership?

Do conservatives have the will to win?

HOW THE LEFT BEAT REAGAN IN 1984

(By Paul Weyrich)

There I was lying in bed reading this book. I had dozed off and I'm not sure now how much of it was real and how much of it was a dream. It was a Theodore H. White book, "The Making of the President, 1984."

It is a little vague, but one of the chapters dealt with Ronald Reagan's tragic and unexpected defeat. White wrote:

"In an election this historic, no one single factor is ever responsible for victory or defeat. However, in this case I will stake my reputation on this conclusion: Had Ronald Reagan inaugurated a systematic program to take federal funds out of the hands of his enemies when he was elected back in 1980, it seems likely this very close defeat would not have occurred.

"Federally funded grant recipients were mobilized by the hundreds of thousands for the 1984 election. For them it was a do or die situation. President Reagan, in running for re-election and under fire from the right wing, had publicly pledged that in his second administration he would do what his supporters had begged him to do during his first. He pledged that every agency of the government would be commanded to root out funding for leftwing activists.

"Further, he pledged—in an historic meeting with right wing leaders—that one of their number, Howard Phillips (who gained fame when Richard Nixon tapped him to dismantle the Office of Economic Opportunity), would be brought into the White House to supervise the effort. That pledge can only be likened to those promises made by Dwight Eisenhower to the then Senate Republican leader Robert Taft when his campaign was getting nowhere in 1952. The right wing, which had all but decided to sit out the 1984 election because of disappointments over Reagan, was roused once again.

"But it was simply too late.

"The meeting did not take place until September, and although their efforts were remarkable considering the short time before the election, the conservative activists were no match for the legions on the federal dole. They knew Reagan was serious this time since he had fired close aide Mike Deaver and chief-of-staff Jim Baker when his campaign sunk to an all time low in the polls, much the same way he had fired then-manager John Sears right after the New Hampshire primary victory in 1980. The new staffers were at last Reaganites and they lent credibility to the President's pledge.

"Following the historic meeting, every financial resource within reach of the right was turned on. Richard Viguerie hired some 300 additional part-time employees to handle the millions of direct mail pieces he agreed to send out. Various political action committees pulled back all of their fieldmen and organized activists out of Senate and House races to try to save the President. Jerry Falwell, Pat Robertson, James Robison, Jim Bakker and a host of other religious TV preachers, although rivals for viewers and contributions, combined their resources and did a nation-wide live three-day telethon to alert the nation to the dangers of a victory by the liberal left. The ACLU challenge to their right to conduct such a broadcast went all the way to the Supreme Court and thus was delayed until Octobedr 26th.

"Right to Life activist Nellie Gray, long famous for her annual marches on Washington on the anniversary of the Supreme Court's 1973 pro-abortion decision, took out a personal loan and organized a special march to dramatize her renewed confidence in Reagan—with whom she had all but broken off diplomatic relations because of previous White House inaction on right to life issues. Every journalist of a conservative bent from George Will to Hohn Lofton—who had to date written 1,654 columns critical of the Reagan administration—urged his reelection.

"And while these activists, combined with huge expenditures on the part of the Republican Party, made the election even closer than the 1976 Carter-Ford battle, it simply was not enough.

"Working out of the Legal Services Corporation offices, an entity which Mr. Reagan had said he wanted to abolish but didn't, left-wing chieftans organized their cadre of troops. The left-wing leaders knew exactly who their friends were. If they did not succeed, they would be out of work for a good long while. These activists, whom the Urban Institute estimates receive some $40 billion of the federal budget annually, organized the most massive precinct organization ever seen in American politics.

"Every potential voter was contacted at least 3 times. Their leaders say this is why Illinois and Texas both went for the Democratic nominee, and the election even in heavily Republican Nebraska was close enough to not fall into the Republican column until the morning after the election.

"We know," said Mark Green, who co-ordinated the election operation, "that without federal funding of most of our people, we never would have made it. That is why people stayed up for 3 and 4 nights in a row without sleep to make this happen. They knew it was life or death for all of us."

"Using a sophisticated operation of targeting developed by successful Democrats in Texas in 1982, the liberal cadre contacted each ethnic group voter with someone from the same ethnic group with a sophisticated message designed to heighten historic prejudices.

"In a post-election interview, the defeated President acknowledged that "no president again will ever have the opportunity" he had to cut off funds of the left, "which will likely dominate politics well into the next century."

I looked around me, looked at the alarm. It was 15 minutes before I had to get up. It was all a dream. It was still 1983. There was still time. I felt like Scrooge awakening after his nightmare. I must tell this to Ronald Reagan, I thought. But then it came to me. There was no way of getting a message like this to the President. Not with his current staff. I went about my business the rest of the day somehow thinking the dream had been real.●

THE NATIONAL WEATHER SERVICE

HON. LANE EVANS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. EVANS of Illinois. Mr. Speaker, President Reagan's proposal to sell all or part of the National Weather Service to private industry has received a good deal of attention these past few weeks. The administration seems to feel that private industry could turn the National Weather Service into a profitable business enterprise.

In fact, it seems the Reagan administration wants to turn the whole Government apparatus into a profitmaking business. Forget service for those who are disadvantaged or unable to compete for scarce resources. This Government would be run on the same open market system as our economy.

I believe the private sector certainly has its important part to play in our society and has contributed greatly to our success as a nation. But I think that there is also an appropriate role

for Government which places a higher value on its services to all the people—regardless of their ability to pay.

I received a letter from Mrs. Connie Hewitt of Cambridge, Ill., who eloquently describes her own experience in a weather emergency. She recognizes the threat posed by this proposed cutoff of a vital Federal program.

I do not think private industry could top the fine job now being performed by the National Weather Service. Therefore, I commend Mrs. Hewitt's comments to our colleagues as proof of the necessity to keep the National Weather Service within the realm of Government control. I would also like to add my thanks to Mrs. Hewitt for reminding us of the importance of this matter.

It's March 19, 1948, the clouds are rolling, the color is green, the wind is fierce. Then came the terrible roar. We huddle together—what is it? We kissed each other goodbye. Was it the "end of the world"? Watching through my father's legs, our home blows away, glass, plaster, and splinters hit us—it's over—really over. Everything is gone. There was no warning—no warning at all.

Thirty-four years later—the Government is telling me that it has a plan that would virtually close the National Weather Service Office in Moline. Naturally I am frightened.

We own, along with thousands of other people, a weather alert station which sends continuous weather announcements 24 hours a day. When there are tornado warnings, the National Oceanic and Atmosphere Administration (NOAA) sets off an alarm that triggers an alarm in my home, day or night. This is followed by instructions. I can now take the necessary precautions and not have the fears return of years ago when there was no warning.

Unless you've lived through a tornado, you don't know how important it is to have peace of mind and safety of my family.

Please help us keep our Moline station—save lives.●

SACRED HEART CENTENNIAL

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Ms. KAPTUR. Mr. Speaker, Sacred Heart Church in Toledo, Ohio, is celebrating its centennial this year—an occasion that deserves our recognition. Sacred Heart's history is a part of the history of the people of Toledo. The parish came into existence in order to serve the German-speaking immigrant Catholics who had settled in Toledo during the late 19th century. By 1889, aware of the need to provide an education for their children and at great personal sacrifice, Sacred Heart members established the parish school.

In 1900, a tragic fire destroyed the church structure. The mission cross, however, was saved and served as a symbol to the parishioners, not only of their strong faith, but also of their determination to rebuild their church. Six years later, the magnificent stone church was completed and in 1951, the famous Kelgen organ was rebuilt.

Sacred Heart parishioners, committed to Christian service, have been dedicated to caring for their neighbors and the less fortunate in their community. They actively participate in the "feed your neighbor" program and annually sponsor one of the city's more famous cultural events, the Sacred Heart Festival, which accents the German culture in America.

Sacred Heart's 100 years can best be described as years of faith, dedication to God and society, and the preservation of a proud cultural heritage. May Sacred Heart's history of accomplishment carry its people into the next century in the continuation of its good works.●

MEDICARE VISION REFORM ACT OF 1983

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Ms. MIKULSKI. Mr. Speaker, I am pleased to introduce today, along with a number of my colleagues, a very important piece of legislation for the Nation's elderly—the Medicare Vision Reform Act of 1983. This bill is designed to correct a glaring inequity in the medicare law that unfairly discriminates against millions of medicare beneficiaries, and costs these individuals millions of dollars in unnecessary expenditures for eye/vision services. It is also designed to provide basic and badly needed services that are not currently covered.

The medicare program currently covers eye/vison services provided by doctors of medicine or osteopathy, except for routine eye examinations and refractive services. With the exception of services provided to postcataract patients, these same services are not covered when provided by a doctor of optometry, even if the services are within the scope of State licensing laws under which the optomotrist practices. The result of this inconsistency is that medicare beneficiaries who choose a doctor of optometry for their eye/vision care, either because they have always gone to that provider or there are no doctors of medicine or osteopathy readily accessible, are forced to pay out-of-pocket expenses for services that are in essence covered benefits. Such a denial of benefits on the arbitrary basis of accessibility to a covered provider is patently unfair to medicare beneficiaries and clearly inconsistent with the intent of the medicare program, or even its opening section, which states:

Any individual entitled to insurance benefits under this title may obtain health services from any institution, agency, or person qualified to participate under this title if such institution, agency, or person undertakes to provide him such services.

My bill will correct this situation by covering eye/vision services under medicare when provided by any practitioner licensed under State law to provide them.

There is another area of the medicare law that has proven difficult to enforce and is detrimental to recipients—the exclusion of coverage for routine eye examinations and refractive services. These basic services are an integral part of determining the condition of elderly patients and are instrumental in diagnosing a wide range of serious visual and other health disorders. To deny benefits for these preventive services invites the potential for future serious and costly disorders. Further, reality of current medicare reimbursement guidelines and program statistics suggest that many routine examinations and refractions provided by doctors of medicine or osteopathy are being covered despite the statutory provisions. To correct this inequity and provide these important preventive services to all medicare beneficiaries, my bill would include examinations and refractions as covered benefits when provided by any practitioner licensed to provide them under State law.

Equally important as these first two provisions, this legislation would also by definition provide examination and refractive services to an often neglected segment of the elderly population—those with low vision; that is, vision which cannot be adequately corrected by traditional means. Of the estimated 456,800 persons age 20 and over who are classified as legally blind, 53 percent are age 65 or over; 7 out of 10 of these patients with residual vision can be aided by low-vision devices and rehabilitative therapy. Low-vision rehabilitation is a growing multidisciplinary service and the low-vision examination is the central initiating point in the process. Without the exam, none of the optical devices and rehabilitative services designed to help these people lead more productive and full lives can be provided. To highlight this issue and give it proper attention I am also introducing a separate bill that would specifically provide medicare coverage for low-vision examinations and refractive services when provided by a doctor of medicine, osteopathy, or optometry.

Finally, Mr. Speaker, my bill addresses a growing concern of mine and many of my colleagues on the various health committees—the substantial and growing difference between what medicare recognizes as the reasonable charge for eye/vision services and the charge actually billed to the patient. For currently included practitioners it

is estimated that medicare reasonable charges are only 77.5 percent of actural charges; thus medicare patients are paying nearly one-fourth of the actual charge in addition to their 20-percent coinsurance charge. This amounts to millions of dollars out-of-pocket to pay more than what medicare has recognized as the reasonable charge. My bill would correct this problem by requiring that all practitioners who provide ambulatory eye/vision services, as a condition for receiving medicare reimbursement for such services, accept the medicare-determined reasonable charge as the full charge, and not bill the patient for any amount in excess of the reasonable charge except for the 20-percent coinsurance. This so-called assignment approach has been endorsed by groups such as the Gray Panthers, the American Association of Retired Persons, and the National Council of Senior Citizens as a means of lowering overall health costs to the aged.

Mr. Speaker, there is a large body of information on the very real need for eye/vision services for the elderly. Let me just highlight these figures to point out the magnitude of the issue: 92 percent of the population 65 years and over need eyeglasses. Without them the quality of life is in many cases dramatically reduced.

Of all the new cases of blindness in the United States, well over half are among people 65 and older. All the major causes of blindness—senile cataract, chronic simple glaucoma, senile macular degeneration, and diabetic retinopathy—have a very high incidence in this population. A refraction is important in the early detection of many of these conditions.

Statistics indicate that 9 percent of persons aged 65 or over have binocular problems, most of which depend upon the application of refractive procedures for diagnostic purposes.

Major causes of visual impairment short of blindness among the aged are arteriosclerosis, hypertension, senile macular degeneration, and stroke. Routine comprehensive eye examinations can find these problems and are necessary to identify need for treatment.

Many of the visual defects among the aged are correctable. The National Health Survey has found that almost a third of the aged who wear glasses have less than optimal correction. There is probably no single condition in aged people that will so readily yield to treatment as correctable visual problems.

Concern over this issue has grown in recent years as our over 65 population has increased. Among the recommendations in the 1981 White House Conference on Aging was inclusion of eye examinations under medicare and a resolution emphasizing the older patient's right to freedom of choice in health care. In addition, the American Public Health Association has called on Congress to enact the legislation I am introducing today.

What would the cost be to provide these services to our Nation's elderly? According to figures proposed by health care actuary Mr. Gordon R. Trapnell, total spending for eye/vision services for the elderly from all sources, including out-of-pocket costs, will be somewhat less under this proposal. Second, total medicare costs will increase by $85 million in the first year, or less than one-half of 1 percent of the overall medicare budget. Mr. Speaker, that is not much more than what the Pentagon pays for one single Navy salvage ship. I submit that is a modest price to pay to salvage the eye/vision health of the aged, and treat all beneficiaries equitably.

Mr. Speaker, the Nation's elderly have been largely ignored in recent years as debate has swirled around the budget and our military buildup. It is time for Congress to turn our attention to the needs of those over 65, to fulfill the commitment made to these people with the passage of medicare 18 years ago, to help them lead more full, active, and healthy lives. My bill seeks to do just that and I urge my colleagues to lend their support in this endeavor.●

DEPARTMENT OF LABOR, HEALTH AND HUMAN SERVICES, MORE FUNDING OF THE LEFT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. McDONALD. Mr. Speaker, in other entries in this RECORD, I have tried to point out to my colleagues, that what we vote for, and actually where the money is being spent, is two different things.

Here is yet another example of America's hard-working taxpayers paying for items and ideology that they are diametrically opposed to.

I ask my colleagues to glance at some of the organizations and ideals for which money from the Department of Labor and Health and Human Services is being spent. The amount in this instance is $25,378,308 for organizations at best that could be termed alien to the common denominator of ideas that made this country great. Articles follow from the April 1983 issue of the Conservative Digest:

DEPARTMENT OF LABOR

Labor Secretary Ray Donovan cut his department's budget by half, and reduced its work force by 4,500. This hit hard at the special interest groups that controlled Labor under Jimmy Carter—the big unions. They long enjoyed sweetheart deals with Labor, receiving numerous million-dollar OJT (on-the-job training) contracts.

Donovan has continued his attacks on waste at Labor, especially that going to political advocacy groups. But some funds still go to these groups, including:

$1,745,119 to the Labor Institute for Human Enrichment, Inc. (February 1, 1982). The Institute's Board of Directors is headed by American Federation of Teachers (AFT) president Albert Shanker.

The Institute calls itself "a non-profit, educational and research organization founded by the Department for Professional Employees, AFL-CIO in 1978."

$1,347,117 to Campesinos Unidos Inc., a California-based migrant action agency (March 1, 1982; and July 1, 1981). Campesinos closely works with Caesar Chavez's United Farm Workers (UFW) union. After Campesinos laundered $190,000 in Community Services Administration money to the UFW in 1981, funding was suspended.

$50,000 to the Urban Environment Conference, Inc. (UEC) (September 30, 1981).

Founded by the late Senator Philip A. Hart (D-Mich.) in 1971, UEC boasts of its "Legislative and Advocacy Program" in a recent newsletter. Its "alliance of labor, minority and environmental organizations, has been at the forefront of counter-attacking the Reagan initiatives which so threaten the health of Americans."

$100,000 to the American Federation of Government Employees (AFGE) (August 1, 1981). Because all its members work for the government, AFGE has a vested interest in making government bigger, through increasing taxes and government spending programs.

The World—monthly newsletter of one of AFGE's biggest locals, No. 2607 representing federal workers at the Department of Education (DoEd)—recently accused the Reagan administration of "turning to more underhanded methods" in its attempts to dismantle DoEd.

$299,370 to the United Auto Workers (UAW) (Fiscal year 1982).

The 1982 elections were "the first time in as many years as I can remember not coming out for a Republican in any statewide or national race," said UAW northeast region director Ted Barrett.

$3,462,778 to the National Association of Farmworkers Organization (NAFO), including $1,448,748 to the Arkansas Council Farmworkers (January 1, 1982); $668,000 to Kentucky Farmworkers (January 1, 1982); $635,400 to the Montana Farmworkers Council (November 1, 1981); and $710,630 to the Nebraska Association of Farmworkers (March 1, 1982).

NAFO recruits new members by saying, "Your membership will make it possible for NAFO to expand the farmworker presence in Washington, D.C. NAFO has advocated for administrative reform more aggressive labor and civil rights."

Under Jimmy Carter, reports UPI, NAFO got "90 percent of its funds from federal sources."

Grants to the AFL-CIO and its affiliates total at least $12,539,962 since the Reagan administration took office.

The AFL-CIO will announce its presidential endorsement this December. Affiliate unions are pushing Walter Mondale.

For last November's elections, Kirkland urged union members "to register, to turn out and to vote for candidates endorsed by COPE." Almost all COPE's endorsements were Democrats.

Tax money given to AFL-CIO affiliates includes:

$40,000 to the International Association of Machinists and Aerospace Workers (IAM) (October 1, 1981).

IAM president William Winpisinger is vice-president of Democratic Socialists of America. In January he gave a speech blasting the free enterprise system as a "bizarre hypocrisy." He attacked the Reagan administration for its "attempts to manipulate the lives of the people for the private profit of business."

$124,000 to the United Food and Commercial Workers (August 1, 1981) and $24,000 (September 23, 1981).

Last year union president William Wynn endorsed Democrat Tom Bradley over Reaganite Republican Pete Wilson to represent California in the U.S. Senate. "You can be assured that this movement will ensure that you, in fact, will be the next governor," he said. Despite the union's efforts, Bradley lost in November.

$837,833 to the National Ironworkers Training Program (February 1, 1982).

$500,000 to the International Union of Operating Engineers (February 1, 1982).

$100,000 to the Graphic Arts International Union (GAIUS) (September 30, 1981).

$750,000 to the United Brotherhood of Carpenters and Joiners of America (February 1, 1982).

HEALTH AND HUMAN SERVICES

Under former Secretary Richard Schweicker, the Department of Health and Human Services cut off some funds for liberal groups. Still, it continues funding many anti-family projects.

Since 1974, Rep. Henry Hyde's series of amendments to federal expenditures has banned use of tax money for abortions. Yet HHS and state government grants supply more than half the Planned Parenthood Foundation's annual budget—some $70 million in taxpayer money. Planned Parenthood continues to perform abortions on more than 10,000 minors, and passes out contraceptive devices to 150,000 minors each year.

Margaret Heckler, HHS's new secretary, is pro-life. But as a congresswoman, she opposed President Reagan's efforts to notify parents when their children are given taxpayer-supplied contaceptives.

Recent grants to liberal groups include:

$3,490,807 to Planned Parenthood Federation of America, Inc., including:

$738,207 to Planned Parenthood's New Haven, Conn. office (January 1, 1982).

$360,250 for "Planned Parenthood of Tucson Family Planning" (January 1, 1982).

$130,735 to Planned Parenthood's Fresno, Calif. office (January 1, 1982).

$76,081 to Planned Parenthood's Lebanon, N.H. office (January 1, 1982).

$571,957 to Planned Parenthood's Columbus, Ohio office (March 1, 1982).

$1,586,015 to Planned Parenthood's Madison, Wisconsin office (March 1, 1982).

Planned Parenthood was founded by Margaret Sanger, whose great compassion shone through in her statement that "the most merciful thing that a large family does to one of its infant members is to kill it."

In its recent booklet, *Till Victory is Won . . . An Action Agenda for 1982-84*, Planned Parenthood establishes a "Three-Year Plan." Objectives include:

"Eliminate, where necessary and possible, restrictive legislation at the local, state, or national levels which impedes access to abortion.

"Support abortion and other services abroad which cannot be directly financed by the U.S. Government."

$170,432 to the Alan Guttmacher Institute for a "Family planning services delivery research project" (September 1, 1981).

The Agency for International Development (AID) Communications Review Board recently cut off funding for a Guttmacher Institute publication, *International Family Planning Perspectives* (IFPP). The journal was found to be "clearly inconsistent" with AID's policy forbidding the advocacy of abortion as an acceptable means of birth control.

The Review Board also discovered IFPP was being sent to 11 communist countries, violating a federal law.

$370,500 to the Universal Fellowship of Metropolitan Churches (UFMCC), "To provide half-way houses for homosexual Cuban refugees" (April 10, 1981).

$122,645 to the National Association of Social Workers, Inc. (September 30, 1981).

In April 1982, NASW held its 5th annual Social Workers in Politics (SWIP) conference.

The Reagan administration was specifically attacked for the "adverse conditions" caused by cuts to groups like NASW.

At another conference, says Family Protection Report, "Arabella Martinez, former assistant secretary at HEW, admonished her audience to leave the concerns of social work to others and instead to involve themselves in politics, especially as it concerns taxes, defense, and energy." NASW has an official Peace and Social Welfare Committee which works for the reduction of defense spending and conciliatory policy toward the Soviets.

$150,600 to the American Bar Association's National Legal Resource Center for "Child advocacy and protection" (September 30, 1981). While the American Bar Association is not a leftist group, this project takes away parents' rights and puts children at the mercy of government agencies.

At least $908,144 to the Population Council, Inc. (January 1982, July 1, 1981 and April 1, 1981).

The Council actively promotes proabortion, anti-natalist policies.

$620,834 to Development Associates (May 28, 1982, March 31, 1981 and September 30, 1981).

According to the Population Crisis Committee, "Previous projects have included training of U.S. and Latin American family planning workers, [and] contraceptive retail sales in El Salvador . . ."●

MAINE SMALL BUSINESSMAN OF THE YEAR

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Ms. SNOWE. Mr. Speaker, today I would like to pay special tribute to Mr. John T. Amoroso, who has been recognized by the Small Business Administration as the Small Businessman of the Year for the State of Maine. Mr. Amoroso is now serving as the president and owner of Bangor Wholesale Foods, Inc., of Newport, Maine. He bought the 24-year-old company in 1975. At that time it was a relatively small operation, with only eight employees and a sales growth rate that was virtually flat. Since Mr. Amoroso took over in 1975, Bangor Wholesale Foods has grown to become a full-line food distributor with over 50 employees. Sales have increased sevenfold, to an estimated $11 million in 1982. Over the last 7 years, Mr. Amoroso has shown an outstanding commitment to customer service. Since he took over the company, Bangor Wholesale Foods has not missed a single delivery.

Mr. Amoroso has played an active role in the affairs of his community. He has served as the past chairman of the Newport Planning Board and on the finance committee for the town of Newport. He has been actively involved with youth athletic programs in the community, and he has recently been appointed to the Governor's Small Business Advisory Council.

During this National Small Business Week, it is only fitting that we pay tribute to people like John Amoroso. His creativity, hard work, and dedication to community service should serve as an example to us all. His example reminds us that the small businessmen and women of this country have both the desire to contribute and the will to succeed. It is our job to make sure that we let them. By lending the hand that the small businessmen and women of this country need, we can help insure a more prosperous future.●

OMNIBUS MARKETING USER FEE ACT OF 1983

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. MADIGAN. Mr. Speaker, on the request of the Secretary of Agriculture, I have this date introduced the Omnibus Marketing User Fee Act of 1983.

This legislative proposal is part of the President's fiscal year 1984 budget and provides for recovery of costs associated with: administration of Federal marketing agreements and orders for milk, fruits, vegetables, and certain specialty crops; postage, printing, and handling of market information and statistics for two commodities currently exempt from such charges; providing plant variety protection; and administration of the wool and mohair promotion programs, including costs or conduct of referendums.

Estimated revenues to be generated in fiscal year 1984, as a result of enactment of this legislation, approximate $6.5 million.

A title-by-title summary of the provisions of the bill appear below and are generally as set forth in the Secretary's transmittal to the House:

TITLE I: PROPOSED LEGISLATION TO RECOVER COSTS ASSOCIATED WITH THE FEDERAL ADMINISTRATION OF MARKETING AGREEMENTS AND ORDERS

The authority of the Secretary of Agriculture under the Agricultural Adjustment Act of 1933 is currently being used to stabilize marketing conditions for fluid milk, fruits, vegetables, and certain specialty crops. This objective is achieved under Federal milk orders by providing minimum milk prices to farmers and handlers that are reasonable in relation to economic conditions and which will assure consumers at all times of adequate supplies of pure and wholesome milk. In the other commodities mentioned, regulations governing the quality or quantity of shipments are used to achieve similar objectives.

Marketing agreements and orders are administered at the local level by market administrators or committees whose expenses are financed by assessment on regulated handlers. At the national level a portion of the expenses of administration is currently financed by annual appropriations and a major portion by permanent annual appropriation pursuant to Section 32 of the Act of August 24, 1935, (7 U.S.C. 612c).

This title would authorize the Secretary to prescribe, by regulation, assessments to pay all or part of the Department's expenses in administering the Act. The recovery of such costs is consistent with the Administration's economic recovery program to establish fees for the provision of services by the government to identifiable users. Two major principles underlie this principle. One is fairness. It is unfair for the general taxpayer to pay for a service when the benefits are generally restricted to a specific group of users rather than spread among the general public. The other basic concept is the efficient allocation of scarce Federal resources. When users pay for a Federal service, they tend to match its quantity and quality with the cost, as occurs in the free market. When such services are free to the user, he tends to request as high a level as possible, since the general taxpayer bears the costs.

Under the President's budget we estimate that for fiscal year 1984 the cost to be recovered, and the resulting annual savings to the taxpayer, would be not less than $508 million.

Upon enactment of this title, the Department would apportion costs among the various orders as equitably as possible. The assessment would be collected by the market administrators and local governing committees. In light of the collection of assessments by the market administrators and committees to cover their costs, the collection of assessments, as would be established under this program, would impose little administrative cost and burden.

Additionally, Title I authorizes a transfer of up to $3 million from the Section 32 account. Such funds would be used to provide approximately six months operating capital prior to the receipt of assessments and for the payment of administrative expenses which are in excess of receipts. Funds transferred from the Section 32 account would be reimbursed from subsequent assessments, except for costs associated with a proposed order that fails to be approved.

Assessments collected under this authority will have no significant impact on retail price levels. The estimated cost impact for each of the marketing agreement and orders is an increase of about 10 percent. For milk, the assessment would equate to about 1/30 of a cent per gallon or 1 cent per 30 gallons. However, for the fruit, vegetable and specialty crop marketing agreements and orders, it is difficult to assess precisely the cost impact due to variables among the numerous commodities covered. For some programs Federal costs may be relatively large compared to current industry costs.

TITLE II: TO PROVIDE FOR RECOVERY OF COSTS ASSOCIATED WITH THE POSTAGE, PRINTING, AND HANDLING OF MARKET INFORMATION AND STATISTICS FOR CERTAIN COMMODITIES

Title II will enable the Department to recover costs associated with the postage, printing and handling of printed market news reports for two commodities. Pursuant to authority contained in the 1981 Farm Bill, the Department implemented in fiscal years 1982 a system of user fees for printed market news reports for all commodities except for cotton and tobacco. Enactment of this title would, thus, afford the same treatment to all commodities.

The Market News Program administered by the Department's Agricultural Marketing Service (AMS) provides current reports on prices, supplies, movement, demand, and quality for fruits and vegetables, peanuts, ornamentals, livestock, meat, wool, poultry, eggs, dairy products, grain, sugar, cotton, and tobacco. Timely and equal access to the latest market information and statistics is provided to those who want the information; i.e., farmers, shippers, packers, dealers, processors, wholesalers, and retailers, to help them decide the best time and the best place to buy and sell their products.

The 1981 Farm Bill provided general authority to the Department to recover costs associated with the printing and distribution of certain printed reports and publications. To provide uniformity and consistency in the administration of the total Market News Program, this legislation is proposed to provide explicit authority for the Department to charge postage, printing and handling costs for market information and statistics for the two commodities now exempt.

Consistent with the President's budget for fiscal year 1984, we anticipate revenues under this title to approach about $300,000 annually, and outlays to be reduced in the same amount.

The Department urges enactment by the Congress of this title so that the Department will be able to establish subscription rates for printed market news reports for all commodities in an orderly and uniform manner.

TITLE III: TO RECOVER THE COST OF PROVIDING PLANT VARIETY PROTECTION

The Plant Variety Protection Act (PVPA), enacted December 24, 1970, provides patent-like protection for a period of eighteen years to developers of new varieties of plants which are reproduced by seeds. Protection under the PVPA is currently afforded to more than 350 species of plants which include field crops, vegetable crops, and ornamentals. Participation is entirely voluntary.

Plant variety protection certificates are granted on the basis of novelty as documented in the breeder's application. Information provided by the breeder is stored and maintained in a computerized data base, along with descriptive characteristics of all known varieties, protected and non-protected. Such information is utilized by the Plant Variety Protection Office in the search process in order to determine if the variety described in the application is unique.

From the time regulations implementing the PVPA were promulgated in November 1972 until November 1982, a fee of $750 was charged to those granted certificates of protection, or exclusive property rights to sell, advertise, or license others to sell seed of a novel plant variety. The fee was increased to $1,500 in November 1982. Fees collected are deposited to Miscellaneous Receipts in the U.S. Treasury as required by law. However, these fees have never covered the full costs of operating the program, which have risen from less than $2,000 per application nine years ago to as much as $3,600 in recent years.

The sole source of funds for operating the program since its inception has been annual appropriations. In view of the special identifiable benefits which accrue to breeders from this type of protection, we believe it is in the public's interest to place the program on a cost-recovery basis, and that fairness demands that we stop asking the general taxpayer to bear these costs. We are currently taking steps to reduce the costs of this program to $2,000 to $2,500 per application. This reduction in costs wil be achieved by reducing the amount of search time as well as the volume of information currently stored in the computer base. These and similar measures recommended by the PVP Board are expected to result in improved program efficiency and productivity, and offer recipients the same protection they currently enjoyed without placing an unfair burden on the taxpayers.

Under Title III, breeders of novel varieties of sexually-reproduced plants would continue to be charged a fee for protection under the Act. However, fees collected would be deposited to a fund available for expenditure by the program without fiscal year limitation. Such fees would be sufficient to reimburse the Secretary for all or part of the costs incurred in administration of the Act.

At the beginning of fiscal year 1983, we had 232 applications in process. We expect this number to increase in fiscal year 1983, depending on industry reaction to the 1982 increase in fees and efforts currently underway to increase program efficiency and productivity. Therefore, limited appropriations of $214,000 have been requested for fiscal year 1984 to process pending applications during the transition from an appropriated basis to full cost recovery user-fee funding. We anticipate that not less than $350,000 of the program's estimated cost for fiscal year 1984 will be derived from user fees.

TITLE IV: TO RECOVER COSTS INCURRED IN THE ADMINISTRATION OF THE PROMOTION PROGRAMS FOR WOOL AND MOHAIR

Title IV would amend Section 708 of the National Wool Act of 1954 to authorize the Secretary of Agriculture to recover costs incurred in the administration of the promotion programs for wool and mohair.

The Department provides oversight under several statutes over research, education and promotion programs for a number of agricultural commodities. With the exception of wool and mohair, the Department is reimbursed for most of the costs it incurs in the oversight of commodity promotion type programs. This proposed amendment would place wool and mohair on a comparable basis with other commodities that have such programs.

Under this title, the Department proposes to recover all or part of costs incurred in carrying out its responsibilities pursuant to Section 708. Funding for Department costs would be derived from money which producers have set aside for promotion and other

purposes from the payments they receive under the National Wool Act.

The fiscal year 1983 appropriation was reduced by $23,000 in anticipation of enactment of wool user fee legislation. However, the costs associated with research and promotion programs will increase by at least $12,500 as a result of the mohair program's approval in a December 1982 referendum. Therefore, the fiscal year 1984 costs of these programs will be something over $35,500. However, since wool and mohair referenda are conducted every 4 years, outlays will then be further reduced every fourth year by approximately $128,000 for wool and $3,500 for mohair because referenda costs will be charged to producers. These costs represent about 1/10 of 1 percent of the value of wool production and about 1/100 of 1 percent of the value of mohair production for those years when referenda are held.

Upon enactment of this title, it would be too costly to hold referenda to address reimbursing the Department's annual costs. Therefore, as an interim measure and until the next referenda are conducted in 1986, the Department will seek to recoup such costs pursuant to Memoranda of Understanding with the respective organizations carrying out authorized programs.●

WORKING WITH THE UNEMPLOYED

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. CONYERS. Mr. Speaker, in the past year approximately 20 million Americans either have been out of work or else underemployed for significant stretches of time during each of the periods reported by the Bureau of Labor Statistics. The monthly unemployment rate conceals the full extent. In the most recent period, some 6.5 million Americans were working part time involuntary, 2 million left the labor force entirely, the so-called discouraged workers, and nearly 11.5 million reported they were unemployed.

The first hope of the unemployed is to find jobs. In this, they have had very little help from either the Federal Government or the private sector. Their next concern is to cope with unemployment. The stress and strain of the unemployed is enormous. Paying off debts, paying for necessities, keeping families intact, facing career change decisions, and dealing with daily frustrations are considerations constantly on the mind.

The Center for New Directions at Henry Ford Community College in Dearborn, Mich., has launched a series of workshops for the unemployed, which have become the model for similar undertakings nationwide. Thousands of unemployed workers who attended the workshops have gained valuable information on job retraining, career change financial planning, and coping with the strains and stress of their lives. The sponsors of these conferences could not claim to provide the one thing that the unemployed need above all else: an opportunity to work and be productive. Dr. Robert Kopecki, initiator and director of the conferences, and his staff, however, have provided decent and important human services, and for this they deserve our commendation and support. I have included a statement of theirs on the origins and purposes of the workshops for the unemployed.

"WHERE DO WE GO FROM HERE?"—A NATIONAL MODEL FOR MEETING THE NEEDS OF THE UNEMPLOYED

In April 1982 Henry Ford Community College convened an Advisory Board of concerned business leaders, community service agencies, professional people and educators to evaluate what community colleges could do to assist the many thousands of unemployed throughout the Greater Detroit area. The discussions and results of this advisory board meeting, along with a $5,000 grant from Dr. Sonya Friedman, talk show psychologist, WDIV-TV established a model unemployment conference entitled "Where Do We Go From Here?" This one day conference addressed the various problems that the unemployed were experiencing including career change discussions, retraining opportunities plus ways to cope with the psychological pressures of being out-of-work.

The first "Where Do We Go From Here?" conference on June 12, 1982, attracted over 1,100 unemployed workers to the campus of Henry Ford Community College. Its dramatic success set the stage for replicating the conference at community colleges throughout the Greater Detroit area. On July 28 Schoolcraft College hosted 700 unemployed, on August 28, 1982, 750 displaced workers participated at Wayne Community College Western Region Campus, and 1,100 unemployed converged at Oakland Community College on October 10, 1982. Mt. Hood Community College in Gresham, Oregon, on October 16, duplicated our model conference program in the Pacific Northwest and over 1,200 lumber and aero-space unemployed attended that free one-day conference. On November 20 over 1,100 unemployed braved a cold, rainy day to attend Macomb Community College's "Where Do We Go From Here?" conference and on December 11, 700 unemployed rallied in the converted auto service bay area of Wayne Community College Eastern Center. In addition, more than 125 colleges nationwide have requested start-up materials to replicate this conference in their respective service areas.

What began as a joint venture between Henry Ford Community College and Dr. Sonya Friedman has grown into a cooperative program involving the greater Detroit community colleges, Manufacturers Bank, WDIV-TV, WXYZ Radio, community agencies, private businesses, numerous program volunteers, and many concerned citizens. As this program circulates through all the area community colleges, thousands and thousands of unemployed workers will receive valuable information and tips that will change their lives for the better.

The "Where Do We Go From Here?" conference series was established to meet both the long term needs of the unemployed, that of career change and retraining, and the short term needs, that of coping with the many psychological problems of being unemployed. Such coping strategies analyzed included getting out of debt, financial planning, stress reduction, marital problems, good nutrition, and effective time management.

The success of these conferences is based on the providing of information to the unemployed so that the displaced worker can have valid data to make meaningful career change decisions, evaluate what retraining is available, what costs are involved in this career change, and how to deal with the frustrating day-to-day psychological problems that plague the out-of-work. The conference presentation which includes 70 to 100 volunteer professionals is optimistic, motivational, and full of valuable information which will help give participants meaningful direction to their lives.

The conference format has remained the same as the presentation moves from campus to campus. The program begins at 9:00 a.m. with a meeting of all participants. The general assembly lasts until 10:30 a.m. and includes a welcome by the sponsoring community college, a discussion of the U.S.-Michigan economy, a presentation on where the future jobs will be, a motivational message to reinforce the self-esteem of the participant, and a short discussion on retraining available through the community college system. Financial aid, counseling, and admissions representatives from the sponsoring college are identified so that participants interested in obtaining additional information about the college can see them after the general session concludes.

From 10:30 a.m. till 12:30 p.m. the participants break into mini-seminars on career changes and topics related to retraining. In addition, all community colleges in the area plus special interest groups have exhibits and tables set-up for participants to obtain information on topics ranging from dealing with alcoholism, time management, getting into school, career planning, to finding inexpensive recreation in order to relax. A free lunch is provided for participants during the 12:00-12:30 time slot along with a half hour of musical entertainment.

At 12:30 p.m. the participants regroup to begin the afternoon "How Can I" sessions. These sessions allow participants to select 3 areas out of a possible 12 to 15 topics. Groups meet for approximately 1 hour on each topic and then move to the next. Topics to choose from encompass dealing with stress, establishing good mental attitudes, medical and legal problems, résumé writing, repackaging yourself, coping strategies, financial concerns, nutrition, and sessions on women's special problems.

At the conclusion of the day long event evaluations are completed by the attendees and the data tabulated. The evaluation instrument is consistent at each of the campus presentations so that the multiple conferences can be compared and analyzed.

This one day conference is dedicated solely to the unemployed worker. No political topic or speakers are presented. The only politically related aspect of the conference is the declaring of "Moving Ahead Day" by the various cities to coincide with and bring attention to our conference presentation as we move from campus to campus, city to city.

Registration of participants is conveniently done by phone and registration and a preconference brochure is mailed to confirm the reservation.

The success of our large number of registrants is due to our marketing of the program. The marketing of this particular conference series has been unique in comparison to traditional marketing practices of community colleges. The joint cooperative

effort between a community college and a radio/television station talk show host has enabled the program to be mass marketed to the greater Detroit area on a daily basis. In addition, clientele that are reached by radio/television personalities differ from the usual clientele reached by college articles, publications, or news releases. Many individuals are more secure about enrolling in this type of conference if they are persuaded by an individual who is not an educator but a person respected by the community as a solid professional in their media career. The talk show host offers this perspective to the prospective registrants.

Video taped public service announcements and radio spot announcements, because of this cooperative venture, are of no cost to the college. The media station benefits from its community services involvement and publicity and, in turn, the community college acquires a marketing arm that exposes it to a large viewing audience.

Reaching a large audience with good program materials and marketing is only as good as the feed-back received from the out-of-work participants. Evaluations showed that the participants were receiving meaningful information to change their lives for the better and that they received what they expected from the program.

Other data such as age, sex, length of time unemployed, zip codes, and miscellaneous data helped define the parameters of the unemployed.

Finally, no project can be complete without planned follow-up programs. The "Where Do We Go From Here?" conferences represented phase one of our project to meet the needs of the many unemployed. Our phase two of the prorgram developed intensive two hour evening seminars at the local community colleges to cover such topics as resume writing, repackaging yourself, getting out of debt, and legal/medical concerns of the unemployed. Phase three begins the massive funding needed to provide monies for the unemployed to enable them to begin retraining at a local community college. Monies raised would be given to local community colleges and restricted for use only by the unemployed. One fund-raising idea being formulated is the raising of millions of dollars through a concert series at the Pontiac Silverdome, an enclosed stadium with seating of 100,000. By mid-1983 fund-raising events will begin in the Greater Detroit area to meet the financial concerns of the unemployed as they seek retraining through the many community colleges in the area.

In addition, the White House and Public Broadcasting have expressed an interest in developing a prime time television program presenting our optimistic and motivational program to the nation in 1983. At this stage a producer has been appointed and a grant proposal is being prepared.

Individuals requesting additional information on planning unemployment conferences can contact Dr. Robert J. Kopecky at Henry Ford Community College, Center for New Directions, 5101 Evergreen Road, Dearborn, MI 48127—1-313-271-2854.●

NATIONALIZATION OF THE FAMILY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. McDONALD. Mr. Speaker, on April 28, 1983, Prof. Walter E. Williams testified before the House Select Committee on Children, Youth, and Families. Dr. Williams is a distinguished and well-respected economist. He received his doctorate at UCLA, is a professor of economics at George Mason University, and is the author of the bestseller "The State Against Blacks."

Dr. Williams' testimony, which all Americans should ponder, deals with the ongoing efforts to "nationalize" the American family.

I commend the testimony to the attention of my colleagues.

The testimony follows:

Gentlemen. The problem in America is Congressmen get selected to office and retain office, through promising to use the powers of their office to confiscate property of one American and give it to another American to whom it does not belong. Or you promise one American that you will give him a privilege that will be denied to another American. In my opinion, H. L. Mencken was quite right when he described an election as an advanced auction sale of stolen property. The characterization of our problem this way should not be constructed as a personal attack on members of Congress for it is we, the people, who are to blame because we give you the incentive structure in which you operate.

Through this process of legalized plunder there are unanticipated side effects which is the subject of these hearings on Children, Youth and Families. First look at the effects of inflation which is no less than government theft. When I was a child, my mother taught me that when you earn two dollars save one. I'm sure these were the kind of lessons that helped me get out of the ghettos of North Philadelphia. In economic good conscience I can't teach that to my daughter because she'll say, "Daddy, what's the sense? If I save a dollar it's worth 90 cents at the end of a year and on top of that the IRS is going to take some." Inflation constitutes an attack on thrift and as such makes people now-oriented.

Another impact of government programs on the family are its many laws regulating economic activity. One set of these laws, on which I've done a lot of research, are labor laws. The minimum wage law is a prime example. It has destroyed many opportunities for teenage employment, particularly for the most disadvantaged youth. When I was a kid back in the late 40s and early 50s, I shoveled snow from train platforms, washed dishes and bused tables at Horn & Hardart's, delivered mail during Christmas holidays, picked blueberries and packed boxes at Sears. These jobs helped make ends meet, but more importantly they taught responsibility and I gained the pride and self-respect from being financially semi-independent.

Today the kids in my old neighborhood don't have the same chances for upward mobility. Congress has legislated them out of jobs through minimum wage laws, labor laws, and special privileges you've given unions. The sad fact of business is: kids are ideal people to dump on; they have little clout. After all, how many congressmen owe their office to the teenage vote? On the other hand, many do owe it to the union vote.

Other government attacks on the family institution include all the programs which encourage children to abandon their aging parents, the discriminatory tax system which encourages couples to shack up rather than marry and government sponsorship contraceptives to minor children with neither parental knowledge nor permission. What we are witnessing in America is the nationalization of the family.

Education of our youngsters is a national disgrace. The President's National Commission on Educational Excellence reports 13 percent of all 17-year-olds are functionally illerate and 40 percent of black 17-year-olds are illiterate. This decline came in the face of unprecedented federal, state and local expenditures on education. The solution to the problem won't lie in even greater expenditures. The solution lies in stripping the education establishment of its monopoly power and eliminating its government lobby arm, the U.S. Department of Education.

Teachers and administrators get paid whether kids can read and write or not. Sadly enough, many kids get their diplomas whether they can read and write or not. Education needs to be reorganized so that parents can have choice rather than be held captive by the education monopoly. The best way ro provide for this is through educational vouchers; a less effective though, superior to the status quo, is the President's proposed tuition tax credit. Pending elimination of the Education Department, Congress should declare it illegal for the Department of Education to give money to schools which lie about their student certification and grant fraudulent diplomas.

There's a Negro play entitled "Green Pastures." In it God says to the angel Gabriel, "Everytime Ah passes a miracle, Ah has to pass fo' or five times mo' to ketch up wid it." That is an insightful description of the problem of government. You men create a special advantage for one American that causes a special disadvantage for another American. When you try to help the disadvantaged one it causes a disadvantage for some other American. My proposal is that since Congress can't crate a good miracle, it ought to get out of the miracle business.●

A TRIBUTE TO E. ROSS ADAIR

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. FASCELL. Mr. Speaker, it is with sadness that I pay tribute to our former colleague, the late E. Ross Adair. Congress and the people of Indiana have lost a distinguished legislator.

First elected in 1950, Ross ably served his Indiana constituency for two decades. Together, we served on the Foreign Affairs Committee, where he was ranking Republican member. Although we often viewed issues

before the committee from a differing perspective, we shared a vision of a strong yet compassionate foreign policy for our Nation.

Departing the House of Representatives in 1970, Ross demonstrated his foreign policy expertise in a different arena, serving as the U.S. Ambassador to Ethiopia from 1971 to 1974.

Our memories of E. Ross Adair are those of a dedicated public servant. The people of Indiana have much to be proud of in this fine man.●

MR. ROSTENKOWSKI CALLS FOR A REAL TRADE POLICY

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. GAYDOS. Mr. Speaker, when 30 percent of the Nation's manufactured goods are imported;

When responsible economists estimate that trade was to blame for three-quarters of the rise in unemployment that took us to our recent postwar record;

When the current-year merchandise deficit may hit $80 billion and we are close to spending more for imported automobiles and consumer goods than for imported oil;

And when your trading partners have closed their markets but use subsidy, dumping, and cartels to target as theirs the home markets of industries basic to your well-being and your defense;

Then you have a crisis on your hands.

In his famous letters that touched on the conduct of public affairs, Lord Chesterfield advised that when a leader has no clear idea of what to do in a crisis, then that leader can always do nothing.

The United States has been remarkably faithful to Lord Chesterfield in regard to trade policy.

Administration through administration, regardless of party, the policy of the United States has been to do as close to nothing as possible. And the Congress has tended to go along with this, by and large; the confusion of events tended to screen the problem.

This has been true up until Monday, May 9, 1983, when our colleague, Mr. ROSTENKOWSKI, chairman of the Committee on Ways and Means, drew together the broad range of abuses and national needs in a speech that gives trade a proper place on the Nation's agenda.

No one in this body, whether the people they represent are hurt by European wheat subsidies or Asian industrial policies, should go unaware of the chairman's observations about the past and the present and his suggestions for the future.

Therefore, I offer the text of the chairman's to-the-point remarks to the Mid-America Committee in Chicago. His remarks were as follows:

Trade, like energy a decade ago, has become a national issue fraught with ambiguity and a sense of peril. We have suddenly awakened to the stinging reality that the competitive lead we took for granted has all but vanished. Just as we controlled the flow and the price of energy after World War II, so we virtually dominated the world's trade laws and markets. Unlike the dramatic oil embargo, our trade crisis is much less visible—and much less abrupt. Yet the growing hostility in our union halls and boardrooms against mounting competition from Japan and Europe is strikingly reminiscent of our sense of frustration and impotence toward OPEC.

But from those dark days of gas lines we struck back—first with crude quotas and conservation laws, and later with long-range pricing and international contingencies.

We fought back on the energy crisis. And now we've got to fight back on the trade crisis. And it is a crisis.

U.S. trade, which has grown steadily since the end of the war, has now begun to decline. In 1982 our exports dropped by almost 10 percent, and for the first quarter of 1983 they are even below 1982 levels. The $42 billion trade deficit that we posted in 1982 is expected to nearly double this year. Negative trade balances and economic stagnation feed on one another—not just here, but around the world. As barriers go up the world market has shrunk, severely curtailing U.S. exports. Developing nations, whose markets offer the greatest potential, have become the first victims. To survive they must borrow more and more from the developed nations. The third world debt today exceeds $600 billion, which otherwise might fund greater productivity at home. Over the last few years the cycle has become more vicious—further weakening the world's economic condition.

Add to that the breakdown of international trade laws. Our attempts to broaden and enforce the General Agreement on Tariffs and Trade are either ineffectual or ill-timed. Our allies show little interest, or consensus, in using GATT as a forum for settling grievances. Rather, most have decided to pursue their own self-interests—beyond the limits of established law.

The overrated strength of the dollar is playing absolute havoc with our domestic market—particularly against the undervalued Japanese yen. As mounting U.S. deficits ironically support high interest yields to foreign investors, the relation of the dollar to other currencies becomes distorted. The effect has invited a rush of imports into the country and driven up the price of American goods abroad. In both instances, U.S. commerce is being sacrificed at the very time we are so desperately trying to nurture recovery.

The best efforts of some of our major industries to modernize production, curtail excess and improve quality are increasingly negated by the differential in currency rates. Yet the current Administration seems disinclined to intervene.

National debate—particularly in Congress—is sadly limited by the brittle cliches of "free trade" and "protectionism." The first is a myth. The second is a menace.

Free trade is a noble quest. It had its finest hour after World War II when Europe and Japan were pulled from the rubble by historic amounts of American aid. Our generosity was largely tied to the premise that the world's political stability would be determined by the world's economic growth. As revitalized nations reached out for foreign markets, America initiated the GATT which led to the dramatic reduction of trade barriers and the further expansion of world commerce. We expected the rest of the post-war economies to develop after the U.S. model. We never considered that different cultural and geographic factors would set them on individual courses. All this was done under the banner of free trade.

But as national self-interests emerged, the industrial powers began to quilt a patchwork of subsidies, tax expenditures, non-tariff barriers and guaranteed loans to better position themselves against their competitors. And the U.S. was no exception. Those who today beat the drums for free trade often conveniently disregard our own long-standing agricultural barriers and quotas—or the billions of dollars the Federal government commits to the research and development of particular industrial sectors, like aerospace and defense.

We may have the freest and the fairest trading system in the world—but let's not call ourselves pure "free traders."

The latest cry in Congress, of course, is protectionism—the true barometer of hard times. It's the easiest political response to the complex realities of unemployment and economic stagnation.

In America, where the notion of our post-war economic supremacy has lingered well beyond its time, protectionism seems more to reflect our anxiety over losing our once dominant position in world trade than the emerging challenge from abroad. We fear that the legend of Yankee ingenuity and risk-taking has ended. Instead of confronting the realities of our competitive slide and efficiencies, we often raise convenient targets for retribution.

Dozens of protectionist measures have been introduced in Congress since January—all the way from mandating the domestic content of U.S. automobiles to raising the tariff on imported roses. Many are only warning shots fired across the bow of our trading partners—but some are torpedoes aimed squarely amidships. All, however, indicate the frustration and the pressure on politicians to do something.

By far, the most immediate force behind protectionism is the enduring recession. As long as unemployment remains close to 10 percent—as long as record deficits and high interest rates persist—and long-term investment in plant and equipment is held back—protectionist pressures will mount. Amidst all this trouble, many forget that checking imports in an attempt to shore up domestic industry and jobs only weakens world commerce—and ultimately weakens commerce in our own country.

The second—and less direct—cause for protectionism is fear over the lack of a coherent U.S. trade policy. Instead, we have a confusing hodgepodge of non-tariff barriers, subsidies, and tax incentives, as well as complex and ineffective trade laws. Put bluntly, we don't have a trade policy. And without a trade policy (or even the promise of an overall strategy), business, labor and politicians have no sense of purpose—only uncertainty.

Recent proposals to reorganize the Administration's trade functions only increase uncertainty and do not solve the real problem of creating and implementing an effective trade policy.

The blame does not lie only with the Reagan Administration. It stretches back a

decade or so when we failed to recognize that the old post-war formulas were outdated—that the entire world economic structure was changing. We were still guided by a Marshall Plan mentality that reinforced our false sense of preeminence. We saw no reason back then to take a comprehensive look at the viability of our auto, steel and electronics industries—a practice of our partners that we curse today as "industrial policy." With a huge and expanding domestic market for our goods and services, we grew increasingly complacent.

Administrations have consistently played trade as a political, rather than an economic, card in dealing with our foreign friends and opponents. Whatever trade policies emerge are too often shaped by the rewards and punishment employed to meet our immediate political ends—rather than to shift the emphasis of our economic policy. Witness the recent Russian pipeline sanctions—and the more recent renewal of Russian grain sales. By contrast, our trading competitors view trade and foreign policy as one concept.

American trade policy is still shaped by crisis rather than vision. Compared to many of our allies, we instinctively respond to the demands of the vulnerable, rather than guiding the paths of the strong. If inflation does not prop up farm prices; we rush in with subsidies later this year's Payment-in-Kind program. If our steel industry is rusting because of overcapacity and underinvestment, we are there with tax benefits like accelerated depreciation and safe harbor leasing or out-and-out quotas. When Chrysler was on the verge of collapse we guaranteed loans and stepped up the pressure on voluntary Japanese export restraints. But for U.S. enterprise that is pressing its way in the world with technological breakthroughs or sheer managerial agility, the Federal government doesn't do enough to promote or hasten their success.

What's worse is that our own policy paralysis is forcing us to strike out randomly at our trading partners—particularly Europe and Japan—for following their own self interests in time of international stress.

Foreign barriers to our exports, unfair pricing competition and heavy foreign government subsidies have provoked predictable—and very legitimate—cries of "unfair" across the country. We are less vocal, however, when it comes to the foresight, determination and flexibility that are the driving forces of our competitors' trade strategy—and which provide a painful foil to our own complacency.

I'm a politician. I think I understand better than most the cycles of national sentiment. Sometimes the best course is to hunker down and wait for the tide to change. Other times it is right to strike—to take the offensive. In my view, we must take the offensive in reordering American trade policy. And that means setting down clear-cut, pragmatic objectives.

First—we must abandon the rhetoric of "free trade" and "protectionism," and concede that neither holds the answer for the future. No useful purpose is served by continuing to force the debate to one extreme or the other.

Second—we must move trade policy on to the same plateau with foreign policy. We no longer have the luxury of treating trade concessions and sanctions as the handmaidens to security interests or global strategies. Instead we must place American commercial gains in the first rank of priorities.

We must establish the Administration's role as a teammate, rather than a referee, to American business and labor. Government must become an advocate rather than an adversary. As a congressman, I want to be able to promise every American businessman and worker that if they turn out a competitive product our government will fight for a foreign market to sell it in.

We must begin at once to assess our own industrial and technological base to give us a firm reading on our national capacity—our strengths and our weaknesses. Right now we're overwhelmed with our casualties. Our successes too often go unnoticed—along with opportunities for future market penetration.

Likewise, we need a thorough analysis of the broad range of subsidies, tariff and non-tariff barriers, regulations, tax expenditures and research and development incentives to weed out contradictions, duplications and obsolence. The tax code alone is studded with emergency relief against economic conditions that have long since changed.

Third—we have got to begin applying a consistent, fair—but tough—set of rules to the practices now governing world trade. Liberal trade rules are fine if they are respected the world around. But the old rules no longer guide our allies. We need to say to the rest of the world: "We will treat you fairly, but if you go too far in distorting trade we will vigorously protect our national interest." But if we're going to have such rules we have to apply them consistently and be willing to live by them ourselves.

We've finally got to recognize that agriculture and steel and semi-conductors no longer compete head-to-head for foreign market shares. The old rules of competition are now controlled by central banks and government planning boards. Like it or not, we have entered the age of the mercantile state. It's time to begin planning on this basis, both in adapting our own system and checking over-aggressive foreign policies when the national interest dictates.

We already have some very tough trade laws on the books. Before the year is out the Committee on Ways and Means will have reformed them to quickly and effectively redress legitimate grievances.

Fourth—we need to develop rational policies to stimulate adjustment for industries that have lost their competitive edge and to regain our technological and productive capabilities. When import or tax relief is sought, a price should be paid, or a standard met—whether it's retraining or reinvestment. To an extent, crisis has already forced this upon some of our industries. But crisis management merely gets us by, day-to-day. We must do better than that.

In realigning the thrust of American enterprise we cannot simply abandon our traditional industries—many of whom, in the best of times, will never regain their former size. We've got to consider eliminating overcapacity in industries such as steel—perhaps in conjunction with our trading partners—as well as to seek more specialized use of our older mills and plants, and encouraging further joint ventures with foreign investors.

We should also begin to retrain, or otherwise accommodate, workers in older industries—particularly men and women in their forties and fifties. Such changes in many cases, however, cannot be made without personal disruption. Workers must recognize that with new opportunities must come a change in the status quo.

We should begin a thorough review of our anti-trust laws, as well as encourage productive partnership between government and the private sector—particularly in research and development.

Promoting change in overall trade policy will not be easy or inexpensive. We must be prepared to make some difficult choices regarding the survival of certain firms. It means the willingness to commit billions of dollars to expand the capacity of future production—like telecommunications—as well as subsidize U.S. ventures into markets already being undercut by our competition.

Fifth—the world's exchange rate system must be stabilized. For trade to be orderly, our monetary system must operate evenly and effectively. Each is a cogwheel that must turn with the other. The first opportunity presents itself this week in Paris where finance and trade ministers of the free world's major industrial powers gather to address this imbalance.

Sixth—we must not abandon our efforts to keep the multinational trading system viable. While GATT no longer shows the interest or the power to adjudicate our present grievances, we must hope that the emergence of a tough, pragmatic American trade policy will prompt our allies to return to the international negotiating tables.

Finally, the nation's most important short-run objective is to reverse our own economic slide—giving hope to our partners that our recovery will hasten their own recoveries. Unless we can write a tough budget resolution that guarantees the steady decline of Federal deficits, I don't see how we can ever bring that about.

The next quantum leap in world trade is at hand. If America wants to compete with our allies we had better quit complaining and start rebuilding. We are still the freest and the fairest and the largest trader in the world. I for one am ready to roll up my sleeves to keep it that way.

Mr. Speaker, my position as an officer of the Steel Caucus has been that we need not worry about starting a trade war; we already have one, and we are losing.

Chairman ROSTENKOWSKI may not agree with my assessment of the situation, and I do not necessarily agree with everything he said in Chicago.

But in his book, "On War," the general, von Clausewitz, observed that the one quality necessary for a leader is the ability to see through the confusion of events and conflicting reports to determine what is happening on the battlefield and what might be done about it.

By his remarks last Monday, the chairman of the Committee on Ways and Means has once again demonstrated why he is one of our leaders. I join him in saying, let us get started.●

A TRIBUTE TO MR. RANDY SMITH

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. AuCOIN. Mr. Speaker, I would like to take this opportunity to honor a very special Oregonian.

Mr. Randy Smith, of Polk County, Oreg., has been selected to receive the 1983 Gulf Oil Conservation Award. He

is 1 of only 10 citizen conservationists to receive the award this year.

At the age of 76, Mr. Smith is continuing his lifelong dedication to the conservation of Oregon's and the Nation's natural resources. He inspires all of us who harbor a special love for the land and the desire to preserve its bounty for future generations.

I recommend this article from the Polk County Itemizer-Observer (April 4, 1983) to my colleagues:

RANDY SMITH HONORED FOR HIS VOLUNTEER WORK

(By Dick Clark)

Randy Smith, Sr. has two great loves.

First and foremost is his affection for his family.

Running a strong second is his strong commitment to conservation of natural resources, especially soil and water.

His family paid tribute to him and his wife for their love on their fiftieth wedding anniversary and now the national conservation community is preparing to do likewise for Smith's volunteer work.

Smith, chairman of the Polk Soil and Water Conservation District, will be among ten citizen conservationists to receive a 1983 Gulf Oil Conservation Award at a special ceremony in Washington, D.C. next week.

Smith is more pleased about the company recognizing the efforts of conservation districts than about his personal honor.

"The thing that pleases me is that soil and water conservation districts are important enough that a big company said we are going to award some member of that group," Smith said. "I feel that I haven't done anything that a dozen other people couldn't have done," he said of being named to represent the districts.

That may be the case, but conservationists and state officials including Gov. Vic Atiyeh and U.S. Sen. Mark Hatfield thought his tireless service deserved recognition so they helped nominate Smith for the award.

"His tireless and dedicated efforts serve to inspire us all," said James Ross, deputy director of the Land Conservation and Development Commission.

Members of his conservation district board said "Randy claims to be a retired dairy farmer, but at the age of 76, it is a very active retirement."

Even though Smith said he is less active as in the past, receiving the award doesn't signal the end of the conservation trail for him. Smith said there is still more to accomplish.

His newest project is helping spearhead a drive to receive more federal funds to control erosion in a seven county area in the Willamette Valley.

Involvement has been the story of his life.

Some of his earliest work included helping coordinate a community celebration in Eureka, Calif., agricultural fairs and a calf vaccination program in the 1930s and 1940s.

Since moving to his dairy farm on the Little Luckiamute River in 1957, his volunteer participation has included chairman of the conservation district since 1977 and board member since 1973, chairman of the Polk County planning commission, agricultural representative for the Land Conservation and Development Commission and chairman of the Oregon Association of Conservation Districts' Water Resource Committee.

Asked why he has been so involved, Smith quickly responded, "What is the purpose of life? There has to be a reason." Smith said some people are involved in churches, others in charity work. "Everyone needs outlets, I guess I needed to have more outlets than others."

His involvement and voice in decisions that affected others, of course, wasn't void of controversy and second-guessing, but that was and still is all right with Smith.

"I always invite challenge in involvement. The only way to get things done is to challenge people," Smith said.

Smith's wife, Muriel, who he calls "mom," and she knew her husband was involved in all those activities because she was always home milking.

"Without Muriel, I would have never been able to do this," Smith said.

The Smiths turned much of their dairy and farming responsibility over to their only son, Randy, Jr., in 1964, and seven years ago, Smith, more or less retired. "Every year, we do a little less and he does a little more," he explained.

Randy, Jr. has two sons, Kevin and Brian, and Randy, Sr's daughter, Gloria, has one child, Annie.●

AGRICULTURAL AMENDMENTS OF 1983

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. MADIGAN. Mr. Speaker, I have this date introduced, at the request of the Secretary of Agriculture, a bill that may be cited as the "Agricultural Amendments of 1983".

This bill consists of two sections described in the Secretary's letter to the Speaker, enclosing this draft legislation, as follows:

Section 2 of this proposed legislation would amend the Agricultural Act of 1949 by authorizing the Secretary of Agriculture to establish target prices for the 1984 and 1985 crops of wheat, corn, upland cotton and rice at such level as the Secretary determines to be appropriate. However, the level of target prices established could not be less than the level of target prices established for the 1983 crops of these commodities. The Agricultural Act of 1949 currently mandates increases in the target prices for these commodities for the 1984 and 1985 crops. These increases will provide incentives for excessive production at a time when market signals do not call for increases. The increased production will likely result in the Government acquiring large stocks of these commodities under the price support programs. By giving the Secretary the discretionary authority to establish the 1984 and 1985 target prices at not less than the 1983 levels, there would be some assurance that future production would not be stimulated by Government program incentives to build up burdensome surpluses. Moreover, the significant reduction in inflation has eliminated the need for escalating target prices.

Section 3 of the proposed bill would amend Section 416 of the Agricultural Act of 1949 to authorize the donation of agricultural commodities overseas.

Section 416 currently authorizes the Commodity Credit Corporation (CCC) to donate only its stocks of dairy products overseas. However, CCC has surplus stocks of other agricultural commodities which could be used for this purpose. These other commodities, like the dairy products, can be used to help needy people in poor countries. Therefore, we request an amendment to Section 416 to allow the donation overseas of all stocks of agricultural commodities which are held by the Corporation. The expanded authority would be used to alleviate our stock situation and to benefit needy people. Such assistance would be in addition to existing food aid shipments by the United States Government and will be designed so as to assure that there would be no disruption of ongoing commercial trade. We would implement this additional authority in such a way as to meet these requirements. In view of the known magnitude of the malnutrition problem in poor countries, now is the time to take advantage of our excess stocks to remedy this problem.

Further we are requesting an amendment to Section 416 to require such surplus agricultural commodities to be distributed through the procedures established to carry out the provisions of Title II of the Agricultural Trade and Development Act of 1954. This will facilitate the coordination of commodities donated overseas under Section 416 with the existing donations program under Title II.

Section 2 of this proposed legislation is similar to sections 202, 302, 401, and 501 of H.R. 2811 that I cosponsored in April and which is strongly supported by the American Farm Bureau Federation.

Section 3 is similar to H.R. 1407 introduced earlier this session by Congressman ROBERTS of Kansas.

I commend this bill to my colleagues for their consideration.

KGB "ACTIVE MEASURES" NOT WELCOME HERE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. McDONALD. Mr. Speaker, on May 5, 1983, for the benefit of my colleagues, a letter of information was dispatched to all Members of this body, warning of a proposed visit to the State of Minnesota of representatives of the Institute of the U.S.A. and Canada, who are known to have close connections with the dreaded Soviet KGB.

I would like to share the contents of that letter with attached documentation for all Americans via this CONGRESSIONAL RECORD entry. As well, due to the severity of the situation, I am also sharing with this body and the American people, the contents of a letter dispatched this date, May 12, 1983, to the Secretary of State, signed by 80 Members of the House, urging Secretary Shultz to take appropriate action to deny visas to the Soviet delegation intent on using an American city to fulfill Soviet aims.

Dear colleague letter with documentation and letter to Secretary Shultz follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., May 5, 1983.

DEAR COLLEAGUE: At the end of this month, a large Soviet delegation sponsored by the Institute of the U.S.A. and Canada and the Soviet "USSR-USA Friendship Society" is scheduled to hold meetings with American educators, legislators, businessmen, labor officials and others active in the "nuclear freeze" campaign. The U.S. co-sponsor of the May 24-28 Minneapolis conference is the Institute for Policy Studies.

Only months ago, the House Permanent Select Committee on Intelligence released hearings on "Soviet Active Measures" which outlined the pattern of use of these academic and friendship organizations for political influence operations in "active measures" campaigns.

Attached is a current article from The Review of the News which provides details on the planned Minneapolis conference and describing in detail the role of the Moscow Institute of the U.S.A. and Canada in political influence operations carried out under the direction of the KGB and the Soviet Communist Party's Central Committee.

In a period when Switzerland, France and Denmark among others have expelled KGB "active measures" operatives and when allies like Portugal have denied entry to Soviet "active measures" delegations, our country should do no less.

Therefore, I am asking my colleagues to join in urging the State Department to deny entry to the Soviet Delegation for the Minneapolis conference so that American policy debates can take place without the interference of the KGB.

Sincerely,

LARRY P. MCDONALD.

[From the Review of the News, May 4, 1983]

THE LEFT

(By Julia Ferguson)

Minneapolis residents will get a first-hand look at Soviet "active measures" during May 24-28th when 30 Soviet "peace" experts arrive in that city for closed meetings with 50 leaders of the U.S. "nuclear freeze" and disarmament campaigns. Reporters will be allowed to attend daily "press briefings," but they are to be barred from the actual conference. All "outside" contacts of the delegations will also take place under controlled conditions.

SOVIETS MEET FREEZERS

Despite the Soviet rape of Poland and the occupation of Afghanistan, assorted U.S.-Soviet "exchange" meetings take place with some frequency. But the Minneapolis conference has special significance because both Soviet co-sponsors—the Institute of the U.S.A. and Canada and the U.S.S.R.-U.S.A. Frienship Society—have been named in intelligence reports released by the House Intelligence Committee as agencies playing key roles in Soviet "active measures" aimed at the United States.

"Active measures" is the phrase the Soviets use to cover coordinated efforts to influence public opinion and alter policies in the Free World to suit Moscow's interests. As outlined by former K.G.B. "active measures" specialist Stan Levchenko in testimoney to the House Intelligence Committee, "active measures" are designed to persuade public-opinion makers in the Free World that Soviet disarmament, arms control, or other foreign-policy proposals are the best available options. The idea is to get U.S. activists to translate Moscow's objectives into political action and to change government policies.

The former K.G.B. officer described the techniques as customarily including the use of "unofficial" contacts with Westerners to deceive them with "disinformation"; press manipulation; and, the use of local Communist parties, "agents of influence," Soviet-controlled fronts like the World Peace Council, and local Soviet friendship societies. The Soviet-American conference in Minneapolis fits the description of a classic Soviet "active-measures" and political-influence operation.

Representative Larry McDonald (D.-Georgia) points out that K.G.B. defectors like Stan Levchenko have shown how the Soviets spy on peace and disarmament groups to get information that will help the K.G.B. manipulate them. Dr. McDonald says he doubts "that so many American 'peace' leaders would be eager to participate in these allegedly informal meetings with the U.S.A. Institute staff if they realized that they were being set up and evaluated by the K.G.B."

A 1982 "Interagency Intelligence Study On Soviet Active Measures" explains: "Political influence operations are the most important but least understood aspect of Soviet active measures." The study says that such operations aim "to insinuate the official voice of the Soviet Union into foreign governmental, political, journalistic, business, labor, artistic and academic circles in a . . . seemingly unofficial manner." The study, published in December by the House Intelligence Committee, reported that the K.G.B. tasks both its own officers and other Soviets "with developing strong personal relationships with political, economic, and media figures in the West" to try "to secure the active collaboration of these individuals on matters of mutual interest while the individuals retain their integrity on othr issues. In return for collaboration, the K.G.B. offers intangible rewards tailored to meet the specific requirements or vulnerabilities of the individuals involved." The "reward" include promises of access to special channels of communications to Kremlin policy makers, publicity and other recognition for the collaborators' accomplishments in their special fields of expertise or activity, and so forth.

ABOUT THE SPONSORS

The three groups co-sponsoring the Minneapolis Soviet-American conference are the (Soviet) Institute of the U.S.A. and Canada, the (Soviet) U.S.S.R.-U.S.A. Friendship Society, and the (Washington-based) Institute for Policy Studies.

Recent and detailed C.I.A. and F.B.I. studies published by the House Intelligence Committee describe the Institute of the U.S.A. and Canada (I.U.S.A.C.) as a Moscow research center operating under the auspices of the Soviet Academy of Sciences which has several important intelligence and "active-measures" functions carried out in intimate association with the K.G.B. The Moscow-based Insititute was founded in 1967, the same year Soviet Communist Party Central Committee functionary Yuri Andropov became K.G.B. chief. And I.U.S.A.C.'s director, Georgi Arbatov, has been one of Andropov's intimates for three decades. The C.I.A. has identified one of the I.U.S.A.C.'s three deputy directors, Radomir Bogdanov, as the K.G.B. *rezidentura* (chief of K.G.B. operations) in India from 1957-1967. Another leading Institute expert on disarmament is "retired" Soviet military intelligence General Mikhail Milstein.

The I.U.S.A.C. staffers, all of whom are members either of the Young Communists or the Soviet Communist Party, monitor events in America and prepare reports on trends and opportunities in North America for the Central Committee and the K.G.B. Work that the Institute of the U.S.A. and Canada does for the K.G.B. also includes providing evaluations of American contacts, transmitting disinformation, and eliciting collaboration in political influence aspects of "active-measures" campaigns.

Sometimes I.U.S.A.C. provides a "cover" for K.G.B. officers; in other instances, members of the Institute staff are on temporary K.G.B. duty. The most recent cast in point involved the April 20th explusion of Aleksandr N. Mikheyev, a U.S.A. Institute staffer on temporary assignment at the United Nations, who attempted to obtain classified documents from Marc Zimmerman, an aide to Representative Olympia Snowe (R.-Maine), who serves on the House Foreign Affairs Committee. Mr. Zimmerman said that Mikheyev's pitch was that U.S. efforts to "destabilize" the U.S.S.R. were leading to nuclear confrontation which could be averted if Mikheyev could obtain secret policy documents.

The Interagency Active Measures Study notes that Americans tend to accept Soviet academicians, even those with high positions in the C.P.S.U. and the government heirarchy, as their legitimate counterparts. This is why academics are used so frequently in political-influence operations by the three Soviet agencies which direct "active measures." These are the K.G.B., the International Department of the Soviet Communist Party Central Committee and the International Information Department which supervises Soviet news media and official propaganda. This study warned that although I.U.S.A.C. staffers are "well-informed about the United States and apparently more Westernized than most Soviet citizens, . . . they will say what the Soviet Government wants their interlocutors to hear, and they will tell it in a convincing way." As Representative Snowe's aide can attest!

The second Soviet sponsor of the Minneapolis meet, the U.S.S.R.-U.S.A. Friendship Society, is also named by the F.B.I. as playing an important role in directing national Soviet friendship groups such as the National Council of American-Soviet Friendship, and in working with similar groups such as the Committee for U.S.-U.S.S.R. Citizens Dialogue formed in 1979. According to the F.B.I. Intelligence Division, the "Dialogue" group sponsored an October 1981 U.S. tour by a 28-member Soviet delegation which was part of a Soviet "active-measures" operation relating to the U.S. "peace" movement.

The U.S. co-sponsor, the Institute for Policy Studies (I.P.S.), has actively supported virtually every Soviet foreign-policy objective over the past 20 years. These range from the dissolution of the N.A.T.O. alliance and abandonment of America's defense commitments through opposition to moderization of U.S. strategic forces and support for Soviet-supported revolutionary and terrorist movements in Asia, Africa, and Latin America.

The Americans invited to participate in the I.P.S./I.U.S.A.C. conference include some of the Carter Administration's leading "doves." Among them is S.A.L.T. II negotiator and Arms Control and Disarmament

Agency chief Paul C. Warnke (now an I.P.S. trustee); former U.N. Ambassador Donald McHenry; and, former Assistant Secretary of State for Human Rights Patricia Derian. Theodore Sorenson, President Carter's pacifist first choice as C.I.A. Director, is also scheduled to attend.

The tame "media" figures invited include John Oakes of the New York Times; Robert Kaiser of the Washington Post; Hamilton Fish III, publisher of The Nation (virtually an I.P.S. house organ); and, James Chace of Foreign Affairs.

Also at the Minneapolis meeting will be members of the I.P.S. team that concluded the agreement of cooperation with the U.S.A. Institute and U.S.S.R.-U.S.A. Society in Moscow last April. They included I.P.S. members Marcus Raskin, Robert Borosage, William Arkin (who has lectured at the Defense Intelligence School), Roger Wilkins, Howard Frazier (director of Promoting Enduring Peace and a leader of the "Dialogue" group), Episcopal Bishop Paul Moore Jr., Minneapolis Mayor Don Fraser, and lawyer and Dow Jones board member Robert Potter. The I.P.S. co-founder Richard Barnett and I.P.S. Militarism and Disarmament Project chief Michael Klare (who lectures in Havana on U.S. policy) will also be in Minneapolis.

Others selected to attend the secret meetings with the Russians are Randall Frosberg, the queen of the Nuclear Weapons Freeze Campaign; Betty Bumpers, wife of the Senator and head of the Peace Links group which came under fire recently for its collaboration with several disarmament groups with close ties to the Soviet Union; former Wells College president Frances Farenthold; Johns Hopkins University president Steven Muller; the Reverend William Sloan Coffin of Riverside Church; David Brower, president of Friends of the Earth; Robert Schmidt, vice chairman of the board of the Control Data Corporation, which has a substantial interest in exporting high technology to the U.S.S.R.; and, Terry Herndon, executive director of the National Education Association (N.E.A.), the giant teachers' union which has put into the school curricula a program indoctrinating children against American nuclear defense.

Other participants in this strange association with the K.G.B. include Princeton international law professor Richard Falk, active in the Soviet-controlled International Association of Democratic Lawyers; W.H. "Ping" Ferry, whose philanthropies have included the anti-C.I.A. Counter-Spy magazine; Jerome Grossman, Council for a Liveable World; Seymour Melman of SANE; George Rathjens of the Union of Concerned Scientists; and, the Vietcong's old friends Cora and Peter Weiss.

Congressman Larry McDonald has announced that he will seek support from other Members of Congress to ask the State Department to deny visas to the Soviet delegation now preparing to go to Minneapolis. This Moscow operation can and should be aborted.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C.

Hon. GEORGE P. SHULTZ,
Secretary of State, Department of State, Washington, D.C.

DEAR SECRETARY SHULTZ: A large Soviet Delegation is scheduled to come to this country for a conference in Minneapolis, May 24-28. The Minneapolis conference on disarmament is co-sponsored by two Soviet entities, the Institute of the U.S.A. and Canada and the "USSR-USA Friendship Society," and one U.S. group, the Institute for Policy Studies.

As you know, in December 1982, the House Permanent Select Committee on Intelligence released hearings on "Soviet Active Measures" in which an Interagency Intelligence Study outlined the pattern of use of these academic and friendship organizations for political influence operations in "active measures" campaigns. Staff members of the USA Institute are members of the Communist Party or the Komsomol. One of the USA Institute's deputy directors is a career KGB officer; and the USA Institute's activities are carried out at the direction of the KGB, the International Department of the Soviet Communist Party Central Committee, and the Foreign Ministry.

All available evidence indicates that the "exchanges" and "dialogue" advertised for the Minneapolis conference are a fraud. American access to Soviet decision-makers and ordinary citizens is tightly restricted by the Soviets. But the Soviets want their well-briefed "dialogue" delegations which are salted with professional KGB officers to have full access to American decisionmakers and those who influence U.S. public opinion.

There is neither logic nor any benefit for the United States to grant visas for such activities. We ask that you direct the Department officials to enforce statutory provisions and deny visas to the Soviet Minneapolis delegation.

Sincerely,

Bob Stump, Thomas Kindness, Daniel B. Crane, Tommy Hartnett, Charles W. Stenholm, Earl Hutto, Bill McCollum, Richard Ray, David Dreier, Marjorie Holt, Sam B. Hall, Jr., Denny Smith, Richard Shelby, Doug Barnard, Jr.

Larry McDonald, Sam Stratton, Philip M. Crane, Michael Bilirakis, G. V. Montgomery, Bill Dannemeyer, Guy Molinari, Tom Bliley, Jim Sensenbrenner, Marilyn Lloyd, James V. Hansen, Bill Nichols, Kent Hance, Joe Skeen.

Jim Courter, Tom Loeffler, Tim Valentine, Ken Robinson, Robert Badham, Bill Young, Mickey Edwards, Floyd Spence, Andy Ireland, Dan Burton, Beverly Byron, Dave Martin, Hal Daub.

Gene Taylor, Bob Walker, Larry Craig, Larry Winn, Jr., John Hiler, Phil Gramm, Don Young, Solomon Ortiz, Trent Lott, Jim Martin, Norman Shumway, Hank Brown, John McCain.

Gerald Solomon, Delbert Latta, Newt Gingrich, J. Roy Bowland, Dan Daniel, W. Henson Moore, Henry Hyde, G. William Whitehurst, Dan Marriott, Gene Snyder, Jack Kemp.

TENNESSEE CONSERVATIONIST WINS MAJOR AWARD

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. JONES of Tennessee. Mr. Speaker, I was pleased to learn this week that Mr. E. B. Dyer, Assistant State Conservationist for the USDA Soil Conservation Service in Nashville, Tenn., was chosen 1 of 10 professional conservationists in the Nation to receive a Gulf Oil Conservation Award for 1983.

The award will be presented this evening here in Washington, D.C. during ceremonies which E. B. and his lovely wife, Sarah will attend.

I have personally known and respected E. B. for many years. I concur wholeheartedly in Gulf Oil's finding that his positive and aggressive leadership, innovative ideas, and tireless efforts have been instrumental in renewing the State of Tennessee's interest in erosion control and in soil resources, as well as in redirecting the small watershed program in our State to meet current needs.

I was pleased to be among 20 or more people who sent letters of endorsement for E. B. to receive this important award. I know of no one more deserving. He has always been a person I could count on for sound advice and guidance on issues and questions involving the protection and improvement of our Nation's soil and water resources.

E. B. has been an important member of the USDA Soil Conservation Service team in Tennessee for 26 years, serving at nine locations in my State. His career has been marked by many solid achievements.

As just one example, E. B. played an intricate role in the development and execution of the now famous "Operation Save Our Soil," a highly successful soil conservation demonstration project located in west Tennessee. The project received international attention and has been part of the inspiration behind the special areas conservation program which I developed and which was authorized in the Agriculture and Food Act of 1981.

E. B. also was instrumental in the designation and establishment of the Reelfoot Lake rural clean water project, which in my opinion is an essential tool in protecting and improving one of the most unique, beautiful natural resource areas of the country.

He has been especially successful in helping various agencies, organizations, and individual citizens share data and plans with each other—beginning with his own courage in developing and presenting data about resource problems that led to interagen-

cy efforts to solve those problems. He was a charter organizer and is a past president of the Natural Resource Conservation Societies of Tennessee, which draws together local chapters of several important professional groups for joint activities. That group last fall held a field day that drew 500 interested people, including myself. It was an enjoyable and educational experience, and one that will help put more conservation on the land. That, after all, is our most important shared objective.

These successes are illustrative of the spirit and dedication which E. B. Dyer has demonstrated throughout his life. Gulf Oil Corp. is to be commended for its contribution to bringing America's natural resource problems and opportunities to the public's attention by recognizing outstanding people such as E. B.

I am particularly gratified that the accomplishments embodied in this award have been made by a career civil servant. E. B. Dyer exemplifies the best in Government employees.●

EXPLANATION OF PUBLIC UTILITY HOLDING COMPANY ACT AMENDMENTS OF 1983

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. CORCORAN. Mr. Speaker, for the benefit of our colleagues, I would like to insert in the RECORD an explanation of a bill I introduced today, the Public Utility Holding Company Act Amendments of 1983. The explanation follows:

1. PROPOSED MODIFICATION OF PROVISIONS GOVERNING EXEMPTIONS

The bill preserves the Act's distinction between registered and exempt holding companies. Exemptions would continue to be available for a holding company, so long as its structure and operations are confined within geographic and other statutorily prescribed limits designed to ensure effective state regulation of the utility business.

Under the bill, the Act's exemptive provisions would be changed in two respects. First, an additional exemption category would be added. This would permit a company whose utility operations are confined to the state in which it is organized and contiguous states, or a holding company that is predominantly a public utility company whose operations do not extend beyond the state in which it is organized and contiguous states, to form a holding company over its utility operations and still gain exemption from the Act. New Section 3(a)(6).

Second, the bill modifies the regulatory mechanism by which an exemption may be withheld, conditioned or revoked. New Section 3(c)-(e). Under current law, the "unless and except" clause in section 3(a) gives the Securities and Exchange Commission ("SEC") extraordinarily broad authority to condition or revoke retroactively a statutory exemption. Thus, management is often uncertain as to the regulatory treatment that it should expect to receive. The bill does not propose to eliminate SEC authority to withhold or revoke a statutory exemption but would confine the SEC's power to revoke a statutory exemption to those circumstances where it can be shown that consumers' interests are negatively affected. Thus, in place of the present "unless and except" clause, the bill would empower the SEC to withhold or revoke an exemption if it found upon clear and convincing evidence that the exemption materially adversely affects the system's public utility business. A revocation proceeding or a proceeding to deny an exemption could be initiated by the SEC on its own motion or at the request of any state commission having jurisdiction to regulate any utility operations of an exempt system. Such state commission would be given contemporaneous notice of an application for exemption.

2. STATE COMMISSION ACCESS TO BOOKS AND RECORDS; STATE COMMISSION MONITORING OF DIVERSIFIED ACTIVITIES

The bill would create for state commissions a new federally enforceable right to gain access to the books, records and accounts of nonutility activities of both exempt and registered companies. The provision expressly addresses a circumstance in which a state commission, in the course of a proceeding, is not satisfied that it has been granted adequate access to the books, records and accounts of a holding company or a nonutility subsidiary. In such an event the state commission is granted a right of action in United States federal district court to secure access to any records it can show to be necessary to the performance of its regulatory responsibilities. New Section 3A(a)-(b).

In addition to this authority with respect to information necessary to a specific proceeding, the bill creates general authority in the SEC to require bienniel reports on the nonutility activities of both exempt and registered systems to facilitate state commission monitoring of diversified activities. State commissions are expressly provided the opportunity to apply to the SEC to require such reporting. As in the case of the access to specific books, records and accounts, conditions would be imposed to safeguard against the unwarranted public disclosure of any confidential business information. New Section 3A(c).

This proposal would create the mechanisms for state commission information gathering, backed by federal authority, that is necessary for effective state regulation of utility companies organized under a holding company structure. The authority with respect to books, records and accounts, confined to circumstances in which specific regulatory need can be demonstrated, well accommodates state regulatory purposes and the legitimate business objective of effective segregation of utility and nonutility operations.

3. FINANCIAL CONTROLS AND CONTROLS ON CAPITAL STRUCTURE

Among the most troublesome of the Act's regulatory requirements are provisions which require registered companies and their subsidiaries to obtain prior SEC approval of each security issuance. The requirement that the SEC approve the specific terms of a company's financings has no parallel in the securities laws which effectively regulate the capital raising activities of other sectors of the utility industry. SEC approval has produced no demonstrable savings to customers of registered systems as compared to those of the majority of utility companies which do not submit the terms of their proposed issues to SEC review.

Though advantages are not always evident, disadvantages are clear. Delays pending SEC review result in missed market opportunities that other firms, free to respond quickly, may translate into lower capital costs. Moreover, the mechanism for review offers no certainty to lenders and investors until such time as the SEC, in its discretion, determines to act. Customers bear any costs of such delay.

The problems posed by these provisions of the Act may be substantially remedied while maintaining SEC review of new financing plans of interstate systems. The primary objective of amendments to this section is to create an automatic mechanism which places most security issues before the SEC for review, but ensures that regulatory action will occcur within twenty days after submission to the SEC. The SEC could still disapprove an issue, or impose conditions on its approval, if such action is necessary to prevent an unreasonable economic risk to investors or consumers. Otherwise, the issue would be automatically approved at the end of the twenty day waiting period. New Section 7(b).

A second change of considerable significance creates a statutory opportunity to secure advance approval of a two-year financing plan. Once the plan clears SEC review a company could time the issuance of securities under the plan to respond to the dictates of the market. New Section 7(b)(3).

With respect to both individual issues subject to review and proposed financing plans, the bill preserves the existing opportunity of a state to raise before the SEC claims that the issue or plan violates state law. If such an objection is raised, the SEC could not approve the issue or the plan until it is satisfied that compliance with state law has been accomplished or will be effected. New Section 7(c).

In addition to these modifications, the bill exempts certain issues from SEC review. Nonutility subsidiary financing will be exempt, although holding company guaranties or assumptions of liability on behalf of nonutility subsidiaries would be subject to review if such guaranties aggregate more than ten percent of the book value of the holding company's securities. Similarly, an exemption for short-term debt issues by the holding company would be provided until such debt issues aggregate ten percent of the book value of the holding company's outstanding securities. Public utility subsidiary financings would remain fully subject to review unless approved by a jurisdictional state commission. New Section 6.

4. INTERCOMPANY FINANCING

As discussed above, the bill would not continue SEC review of securities issues by nonutility subsidiaries of registered holding companies. Nevertheless, the SEC would be authorized to protect the integrity of utility company assets and financial commitments by regulating intercompany transactions. This authority would include: authority to restrict the declaration of dividends by the holding company or any public utility subsidiary. New Section 12(a); authority to restrict extensions of credit by a public utility company to another company in the same holding company system. New Section 12(b); and authority to establish requirements governing any other transaction between a utility company and any affiliate or any

other company in the same system. New Section 12(c).

The SEC would also be empowered to restrict sales of utility securities and assets by the holding company. New Section 12(d).

5. DIVERSIFICATION

We have proposed revisions in the Act's controls on diversification to provide both management flexibility and regulatory confidence that managers will pursue diversified activities, if at all, at a measured pace and in a prudent manner.

As presently administered, the Act's controls on diversification consist of two basic elements for registered companies: every investment must be specifically approved by the SEC, and only functionally related invesment is tolerated. Our proposal provides for periodic regulatory review of holding company diversification plans.

In response to concerns raised relating to conglomerate mergers, the proposed amendments expand the protections of the current law and provide the SEC with effective power to prevent nonutility enterprises from superimposing themselves on a utility. New Section 9(a)(3).

The proposed amendments would permit registered systems, in addition to any investment already approved by the SEC, to make additional nonutility investment without SEC approval up to ten percent of the system's assets. New Section 9(a), (d).

When the ten percent threshold is reached, no further diversification could occur except with specific SEC permission or consistent with a diversification plan which itself is subject to SEC disapproval. State commissions are expressly afforded the opportunity to seek SEC disapproval of a specific investment or of the diversification plan. New Section.

The bill also grants SEC authority to require divestiture of a nonutility investment if the SEC finds upon clear and convincing evidence that the nonutility activities materially adversely affect the system's public utility business. New Section 11(b)(1)(B).

6. AFFILIATE TRANSACTIONS

The bill would retain the SEC's authority to regulate contracts for sales of goods and services between a public utility company and sister subsidiaries. This would include retention of existing authority to establish accounting rules by which the SEC determines costs to be allocated among companies for such goods and services. Under the amendments, however, the SEC would be prohibited from allocating to any public utility company any losses or earnings fairly and equitably attributable to nonutility subsidiary transactions with third parties. New Section 13(g).

Also, under this amendment, in order for a nonutility subsidiary to charge a public utility company a price for goods or services above cost, it must apply to the SEC for specific approval. New Section 13(h).●

CHANGES IN SOCIAL SECURITY DISABILITY INSURANCE

HON. JAMES M. SHANNON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. SHANNON. Mr. Speaker, last December, due in large part to the able leadership of Chairman J. J. PICKLE of the Subcommittee on Social Security, the Congress adpoted important changes in the social security disability insurance program. The changes included: (one) providing for people who are cutoff the rolls and who are appealing the decision; and (two) making certain improvements in the way the program is administered.

These changes were a necessary first step towards handling what has become an extremely serious problem for thousands of disabled American workers. Many of these people are being improperly removed from the rolls because the current standards and procedures are failing to determine who is able to work and who is not.

When we adopted last year's legislation, we knew that it could only be a stop-gap approach to the problem. The bill provided some much needed relief, but it did not change the way the determinations were being made. It did not address the structural inadequacies of the current system.

Yesterday, I introduced the Social Security Disability Determination Reform Act of 1983. This bill goes after the current system's inadequacies.

While the benefit payments mandated in last year's law have indeed helped, the improper terminations continue, and thousands of people are suffering needlessly. Here are some of the severe problems that are still causing such difficulty for so many worthy disabled recipients:

Some of the standards being used fail to accurately assess a person's ability to work, particularly those standards used to determine claims of disability due to mental impairment;

There is no requirement that the Social Security Administration find evidence of medical improvement before terminating benefits;

There is no face-to-face meeting between the disabled worker and the decisionmaker until the reconsideration stage of the process;

Many determinations are still being made on the basis of inadequate medical and vocational evidence;

Many disabled people are having difficulties understanding and coping with the review and appeals processes;

Many critical medical decisions are made by professionals who are not trained in the appropriate specialty area;

Inconsistent decisionmaking criteria are used at different levels of review—and certain criteria and binding that have not been subject to public notice and comment under the Administrative Procedures Act;

The Social Security Administration has, in certain instances, simply ignored decisions of circuit courts of appeals, rather than implementing those decisions or appealing them.

The Social Security Disability Determination Reform Act of 1983 addresses each of these problems. It will make major improvements in the standards used to determine an individual's ability to work. It will also improve the system's processes and procedures.

This bill will also extend beyond October 1, 1983, the provision currently in the law which continues to pay benefits to people who have been thrown off the rolls and are appealing that decision.

These changes are essential if we are to insure that the continuing disability investigations program is conducted in a fair and equitable manner.

Chairman PICKLE has indicated his interest in holding hearings on this issue in the coming months. I commend the chairman for his continued leadership on this important issue, and I look forward to working with him as these issues are taken up before the Subcommittee on Social Security.

A summary of the bill is included for your reference.

Thank you.

SOCIAL SECURITY DISABILITY DETERMINATION REFORM ACT OF 1983

SUMMARY

Section 101. Standard of Review. An individual will not be terminated from disability unless his condition has improved, except where certain other conditions are met which indicate ability to work or where the original disability determination was based on fraud or was clearly erroneous.

Section 102. Multiple Impairment. In determining whether the impairment or impairments are of such severity that the person is in fact disabled, SSA will consider the combined effects of all the individual's impairments even if none of the conditions considered separately would constitute an eligible disability.

Section 103. Evaluation of Pain. Subjective evidence of pain, including statements of the individual as to intensity and persistence of pain and corroborating evidence by family, neighbors or behavior indications, will be considered in determining whether an individual has a disability.

Section 104. Evaluation of ability to Work. A determinaiton of the individual's ability to work will be based on a realistic evaluation of his capacity to meet the demands of a competitive work environment on a sustained basis. For mentally ill individuals with a severe impairment, a formal work evaluation will be required.

Section 105. Consideration Given Non-Competitive Work. Work in a sheltered workshop or other non-competitive setting alone will not be considered sufficient evidence of availability to work in a competitive environment to result in termination of benefits.

Section 201. Moratorium on Mental Impairment Reviews. There will be a moratorium on continuing disability investigations of mentally impaired individuals until SSA completes revisions in the standards and procedures for evaluating mental impairments. The Secretary shall appoint a panel of outside experts in the field of mental health to make recommendations with respect to these revisions.

Section 202. Payment of Benefits During Appeal. The provisions of Public Law 97-455 relating to the continuation of cash benefits and Medicare eligibility through an administrative law judge hearing, scheduled to expire on October 1, 1983, will be made permanant. In addition, benefits and Medicare eligibility will be continued through the ap-

peals council review where the council has decided to review an ALJ decision favorable to the appellant.

Section 203. Disability determination review procedure; predetermination notice; right to personal appearance. In cases in which the decision by the DDS is in whole or in part adverse to the disabled person, a predetermination notice will be sent to the individual advising him that he has a right to a personal appearance before the DDS at which he can present additional medical evidence or other information. Only after the person's appearance has expired will the DDS issue a decision affirming, modifying or reversing its preliminary decision. Appeal of an unfavorable decision could be taken directly to an unnecessary and duplicative part of the process.

Section 204. Case Development and Medical Evidence. In determining whether a disability exists, SSA wil consider all medical and vocational evidence including evidence which formed the basis for the initial determination of disability and evidence used in all subsequent reviews. Special weight will be given to the medical records of the treating physician and other health professionals.

Section 205. Assistance with Reviews of Continuing Eligibility. SSA will determine through personal contact whether mentally disabled persons require assistance in complying with SSA's instructions. If assistance is required, SSA will provide such assistance or refer the person to a local agency or organization which will provide the assistance.

Section 206. Assessibility and Reimbursement Requirements. SSA must hold disability hearings at a location and in a building reasonably accessible to the disabled applicant. SSA must also reimburse the applicant (in advance if necessary) for the expenses of obtaining and presenting necessary medical evidence, costs of travel, attendants and witnesses if evidence of financial need is presented.

Section 207. Qualifications of DDS Medical Personnel. Decisions on medical eligibility for disability must be made only by appropriately qualified professionals. For mentally impaired persons, a psychiatrist or pyschologist must sign off on the medical determination.

Section 208. Regulatory Standards for Consultative Examinations. SSA is required to establish standards on the use of consultative examinations including appropriate qualifications for those performing consultative examinations and to establish mechanisms for monitoring the CE process.

Section 209. Payment for Consultative Examinations. The reimbursement rate to be paid for consultative examinations will be consistent with Medicare reimbursement for comparable services.

Section 301. Uniform standards. The Administrative Procedures Act requirements of public notice and comment prior to publication of a final rule are made binding on the Social Security disability programs. Only published rules promulgated pursuant to the Administrative Procedures Act will be binding uniformly at all levels of decisionmaking.

Section 302. Compliance with Certain Court Orders. The Social Security Administration is required to apply a ruling of a circuit court of appeal to all beneficiaries in that circuit or request review of the decision by the Supreme Court. If the Supreme Court does not accept review, the rulings of the circuit court will apply in the states within the circuit until the Supreme Court addresses the issue involved and enters a different or contrary ruling.

Section 303. Continued Benefits for Persons in VR Program. SSA is allowed to continue to pay benefits to individuals who have medically recovered from their disability if they are participating in an approved vocational rehabilitation program in accordance with Title I of the Rehabilitation Act of 1973.

Section 304. Continued Assistance for Potential Concurrent Beneficiaries. SSA is required to inform OASDI beneficiaries, who may be eligible, that assistance in applying for Supplemental Security Income benefits is available upon request.

Section 305. Trial Work. The following changes are made to the critieria for determining a trial work period: (1) periods of work by a disabled individual must be considered as trial work only if performed in the 15 months immediately preceding the month in which SSA begins its periodic review of the individual's disability; (2) to be counted as trial work, the individual must must have worked at least three consecutive months to demonstrate ability to sustain work activity; and (3) in order to be found able to engage in substantial gainful activity, the individual must be working at the time of the review and have been working for the previous six consecutive months.

Section 306. Advisory Council. An advisory council will be established to advise the Secretary on the medical aspects of disability. In addition to representatives from professional health and medical organizations, the council will include representatives from consumer organizations.

Section 307. Qualifying Experience for Appointment of Staff Attornies to Administrative Law Judge Positions. The Secretary of Health and Human Services shall establish within six months a sufficient number of positions to enable the Office of Hearings and Appeals staff attornies to advance to successively higher grades to achieve the experience necessary to qualify for ALJ positions.●

EDUCATION OF THE HANDICAPPED AMENDMENTS

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. ERLENBORN. Mr. Speaker, today Mr. Bartlett and I are introducing the Education of the Handicapped Act Amendments of 1983. This legislation was transmitted to Congress by the administration on April 22, 1983. The Education of the Handicapped Act authorizes two programs of assistance to the States: a basic State grant program (part B) and nine discretionary programs (parts C through F), each with its own authorization of appropriations. Part B is a permanent authorization. Eight discretionary programs funded under parts C, D, and E will expire at the end of fiscal year 1983. The authority for part F, instructional media for the handicapped does not expire in 1983.

The purposes of the administration's bill are: to provide a 3-year extension for the eight discretionary programs which expire at the end of fiscal year 1983, and to create a single authorization of appropriations for part C programs and a single authorization of appropriations for part D to provide the Secretary with increased managerial flexibility and the opportunity to set priorities.

In proposing this legislation, the administration has recognized the national goal, established by Congress with the enactment of Public Law 94-142 in 1975, of equal educational opportunity for all handicapped children. The administration believes that the Federal Government may enhance State and local efforts to improve the quality of education for handicapped children by targeting some Federal resources on activities that are appropriate for direct Federal assistance. According to the administration, these include activities in the areas of research, dissemination of information, model development, pre-service-teacher training, and technical assistance. The administration believes that support for these discretionary activities can be both supportive and complementary to State and local provision of direct services to handicapped children. Finally, the administration has reported that they are not proposing any changes in the scope or types of activities which may be conducted under the authorities for parts C, D, and E.

Part C—centers and services to meet special needs of the handicapped includes five discretionary programs aimed at enhancing the capacities of the service delivery systems in the States to serve special populations including preschool children, adults, and deaf-blind and other severely handicapped children. The bill proposes a single authorization of appropriations for these programs of $29,952,000 for fiscal year 1984 and such sums for the succeeding 2 fiscal years. The bill does not make any substantive changes in the five programs: Regional resource centers, early childhood education programs, research and demonstration projects for severely handicapped, deaf-blind programs and regional vocational, adult and postsecondary programs. However, modifications of two of the programs should be expected, although no statutory changes are required. The administration intends to shift attention and resources away from the direct services provided by the deaf-blind centers, which are duplicative of services that States are required to provide under Public Law 94-142, and toward model development and technical assistance activities. In addition, it intends to redirect the focus of the regional vocational, adult and postsecondary programs, which has primarily focused on vocational schools for the deaf to other handicapping conditions.

Part D—training personnel for the education of the handicapped, includes two discretionary programs: Special education personnel development and recruitment and information. The bill proposes a single authorization for these programs of $34,320,000 for fiscal year 1984 and such sums for the succeeding fiscal years. The programs would focus on preservice training of new teachers.

Part E—research in the education of the handicapped, authorizes research and development acitivities aimed at improving educational opportunities for handicapped children. The bill proposes an authorization of $10,800,000 for fiscal year 1984 and such sums for the 2 succeeding years.

In the administration's budget proposal for the act, fiscal year 1984 authorization of appropriations would be set at fiscal year 1983 appropriations level: that is, $1,110,252,000. The proposal decreases the funds for discretionary by $28.2 million and increases basic State grants by that amount.

There are two concerns which may be raised pertaining to these proposed amendments:

First, the impact of decreasing Federal funds for discretionary programs by $28.2 million.

Second, the consequences of seeking one authorization of appropriations for multiple, diverse discretionary programs.

The administration believes that shifting $28.2 million from discretionary programs to the basic State grant program places additional resources at the disposal of State and local education agencies which under the act bear the ultimate responsibility for educating handicapped children. However, the $28.2 million represents slightly less than a 3-percent increase for State grants. Therefore, it seems likely that the additional State grant funds will be used to absorb inflationary costs thereby decreasing the overall funds available for activities provided by discretionary programs.

The second issue which may be raised concerning the administration's proposed amendments pertains to the merits of consolidating discretionary programs in part C and authorizing a single appropriation. The possible effect of this proposal may be to place programs which meet the needs of diverse groups in an unnecessary competitive situation. In order to maintain a sustained commitment to these diverse, effective initiatives, congressional intent may need to be clarified.

Mr. MURPHY, chairman of the Subcommittee on Select Education, has indicated to the chairman of the Appropriations and Budget Committees that he intends to seek an automatic 1-year extension of the act under the General Education Provisions Act. He will introduce a reauthorization bill in July, 1983, which, if passed, will take effect October 1, 1984.

It would seem to be politically prudent to reauthorize the bill for 3 years, as proposed by the administration, rather than to extend it for a single year. Therefore, I strongly support this bill and hope it will be given bipartisan consideration.●

A TRIBUTE TO KATHARINE ST. GEORGE

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. FASCELL. Mr. Speaker, I am honored to join our colleagues in paying tribute to the late Katharine St. George. The passing of this former Congresswoman is indeed a loss to many, on both sides of the aisle. Mrs. St. George worked diligently during her long term as a Member of the U.S. House of Representatives, setting an example for us all. She was a leader on many issues. Her tremendous efforts for women's rights, as a chief sponsor of the original equal rights amendment, were the building blocks of today's bill; as the first Member of Congress to make regular broadcasts over the Voice of America in a foreign language, Mrs. St. George helped set a trend for the strength and expedience of today's broadcasts. And as the first woman member of the House Rules Committee, she once again showed her tenacity and rose to be the second ranking member.

During her tenure here in Congress, Mrs. St. George worked diligently to save the taxpayers' money, as well as to improve social security and civil service benefits. Her efforts to help people did not end when she left Congress in 1964. Remaining active in many political organizations, Mrs. St. George was a Member of Congress who gained the respect and admiration of a great many people who will remember her fondly.●

INDIVIDUAL HOUSING ACCOUNTS TO PRESERVE THE AMERICAN DREAM

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. AUCOIN. Mr. Speaker, I am pleased to join my colleagues, BERYL ANTHONY and BILL FRENZEL, in sponsoring H.R. 2916, the Homeownership Incentive Act of 1983 to help first-time home buyers save for a downpayment on a house.

This bill would establish an individual housing account to which tax deductible contributions could be made toward the purchase of a home—up to $1,000 for single returns and up to $2,000 for joint returns. Interest earned on the account would be tax exempt.

After its worst year since World War II, the housing industry is just now beginning to show signs of life. Homebuilders predict that 1.4 million homes will be built this year, up from the calamitous 1.06 million last year.

This is encouraging news, but only half the story. Many families across the Nation continue to be shut out of the American dream of homeownership by the inability to accumulate enough cash for a downpayment.

For the first-time home buyer, the downpayment for a new house averages more than $6,000. Last year, only 13.5 percent of all home buyers were first-time purchasers. That is below the 18-percent level of 1979 and far below 36 percent of 1977.

The President's Commission on Housing identified the downpayment problem as a major hurdle to homeownership. The individual housing account is the boost needed to overcome that hurdle. It parallels the concept of the successful and popular individual retirement accounts, but is targeted toward those who would not take advantage of an IRA but would want to set aside savings which are deductible and tax exempt to purchase a home. Typically, they are young couples and individuals who do not benefit from current FHA or VA insurance programs and do not qualify for the mortgage interest tax deduction because they lack sufficient savings for a downpayment.

A housing account would help them amass the savings necessary to meet today's high downpayment costs. At the same time, it would create a new and steady supply of mortgage money to fill the void in home mortgage financing being left by the movement of traditional lending institutions into other areas.

A housing account would also provide a savings incentive to finance the housing demands of the 42 million Americans—the crest of the postwar baby boom—who will reach the age of 30 in this decade.

Last year, I spearheaded the fight for a major piece of housing legislation to spur homeownership and economic recovery through a mortgage buy-down program. It passed the House by an overwhelming bipartisan majority only to be buried by the President's veto.

Now, I am renewing my push for housing as a sponsor of the Homeownership Incentive Act. For me, this legislation reaffirms and reestablishes housing and homeownership as a national priority. For the administration, it is the acid test.

The administration has repeatedly denied that it harbors an antihousing bias. The President and his advisers may not have agreed with the concept of a buy-down program, but they are running out of excuses.

If the administration walks away from this latest intiative—recommended by its own Commission on Housing—it will be a clear signal to Congress and the American people that the President is a prisoner of the belief that capital must be funneled out of housing into more so-called productive uses.

I cannot think of anything more productive than housing. For the average American worker, it is one of the few ways to increase personal assets and get ahead. For the national economy, it is a tonic second to none. By increasing homeownership and housing construction, this bill will spawn sales and jobs not only in the timber industry but in numerous businesses directly and indirectly spurred by housing activity.

Mr. Speaker, last year, in their report, "Home Ownership: The American Dream Adrift," the U.S. League of Savings Associations warned that the United States will become a nation of renters unless Government policies are changed to create more capital for new home buyers.

I will not stand idly by while homeowners are reduced to smaller and smaller segments of our society. I am not willing to abandon homeownership as a national priority and I do not believe the American people are either.

I urge my colleagues to cosponsor and lend their support to this bipartisan housing bill.●

FUNDING THE LEFT—OVERSEAS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. McDONALD. Mr. Speaker, it is most despicable that due to the hypocrisy of this body, we are paying literally, through the nose, for the destruction of this Nation.

There is no more evidence of this, then when we see where money that is appropriated by this House eventually winds up. Even "60 Minutes," of CBS, not known for being conservative, honestly portrayed the World Council of Churches (WCC) as funding terrorism to include coldblooded murder around the world. Most in this body are readily aware of over some 2 million souls slaughtered in Cambodia. Why then after such an atrocity does the World Council of Churches receive almost $1 million from the State Department to bolster that Communist regime in Cambodia. Or for that matter, why do we the taxpayers fund this WCC, whose American branch, the National Council of Churches (NCC) advocates and supports, abortion on demand, homosexual rights, and forced busing.

Thanks again are in order to Conservative Digest, issue of April 1983, who are exposing this monstrous abuse of the taxpayer's money. The biggest question that should be asked, however, is why does the President who is supposed to abhor all of this, allow such financing? This is the Trojan horse, with our own money, that will not only destroy Ronald Reagan, but this entire Nation as well.

In any event, I am sure my colleagues will want to know, as I have stated before, where the money goes that we appropriate. Accordingly, funding by the "State Department," "Agency for International Development," and "U.S. Bankrolls Foreign Leftists," as contained in the April 1983 issue of Conservative Digest, follows:

STATE DEPARTMENT

Under Alexander Haig and George Shultz, President's Reagan's State Department has cut some aid to leftist groups. But Jimmy Carter's spirit lives on in State's bureaucracy. Recent grants to liberal groups include:

$830,497 to the World Council of Churches (WCC) Church World Service (CWS) for projects including:

$250,000 in agricultural supplies for communist Cambodia (April 1, 1981).

$125,952 in additional agricultural supplies for communist Cambodia (September 15, 1981).

Founded to "bring churches into lifegiving fellowship and into common witness, study and action to the glory of God and service to all creation," the WCC now works for decidedly anti-Christian ends. Its American branch, the National Council of Churches (NCC), supports abortion on demand, homeosexual rights, and forced busing.

"The NCC denies the charge that it has funded Communist governments," reports Time magazine. "But it has in fact channeled material goods to the Viet Nam regime in order to help peasants."

$2,363,230 to the African-American Institute (AAI) (July 15, 1981 and September 15, 1981).

AAI "receives more than 80 percent of its income from the U.S. government," reports the Heritage Foundation. "This organization . . . has received over $135 million from the American taxpayer in the past 25 years. How this money has been, and is being, spent ought to be a matter of concern to the taxpayer and to Congress."

"AAI's recognized political preferences . . . affect Africans participating in AAI programs. A case in point is Angola, where AAI's preference for the Soviet backed Popular Movement for the Liberation of Angola (MPLA) has been demonstrated by several meetings and dinners in their honor and by AAI's refusal to allow non-MPLA members to attend conferences even when a multi-party coalition was ruling that country."

Heritage points out "other problems concerning AAI's finances that have not been answered—or perhaps even questioned—by U.S. government auditors. For example, according to the AAI 1981 Annual Report, $11,405 was spent on fundraising for the year. Of this sum, $11,056 went toward salaries, $1.29 was spent on telephone and cables and $.98 went for postage. Is it conceivable that over $1 million in private funds was collected by AAI with so little spent on fundraising expenses?"

Forty thousand dollars to the National Association of Social Workers, Inc. (NASW), to "enable approximately three teams of American Social Workers to visit The People's Republic of China, Mexico and Ghana to observe and consult with their counterparts concerning specific social work problems. The Americans would then host similar visits by the foreign national teams" (Fiscal Year 1981).

In April 1982, NASW held its 5th annual Social Workers in Politics (SWIP) conference. NASW instructed 300 attending social workers in the techniques of lobbying, campaigning, and voter registration to bring about increased, federally funded social welfare programs.

The Reagan administration was specifically attacked for the "adverse conditions" caused by cuts to groups like NASW.

AGENCY FOR INTERNATIONAL DEVELOPMENT

When Ronald Reagan appointed M. Peter McPherson to head the Agency for International Development (AID), many eyebrows were raised. "Right-to-life activists vividly recall McPherson's strenuous efforts, at the 1980 Republican National Convention, to block adoption of a strong anti-abortion plank in the party's platform," reports Donald Lambro.

Last year the Office of Management and Budget recommended cutting all AID funds to population-control groups like International Planned Parenthood. Several White House officials even endorsed the plan. But in the end, tax dollars kept flowing to these groups.

Reagan administration budget proposals continue funding them through Fiscal Year 1984.

$519,000 to International Planned Parenthood (IPP) (September 30, 1981)

In April 1981, IPP, the United Nations Fund for Population Studies and the Population Council sponsored an international conference in Jakarta, Indonesia. According to Reuters, the conference supported "safe, modern abortion techniques" as a means of population control.

In November 1981, IPP asked the People's Republic of China to become one of the group's 108 member nations. IPP's March 1983 conference praised the country's family planning policies.

According to National Review, the People's Republic's population control program includes "coerced abortion and even infanticide."

$2,889,248 to the Overseas Education Fund (OEF) (Fiscal Years 1982 and 1983). According to OEF, AID contributes 75 percent of its total income.

OEF is a subsidiary of the League of Women Voters, which endorsed legalized abortion in January 1983.

According to its annual report, OEF involves itself in "Advocacy/policy influencing . . . OEF works to influence the policies and practices of other development agencies, the U.S. Government and international bodies."

"The agency's U.N. representative . . . contributes to the formulation of certain policy positions."

U.S. BANKROLLS FOREIGN LEFTISTS

Republican administrations have long ignored the old Roman maxim "reward your friends and punish your enemies."

Internationally, since the close or World War II, the motto of our State Department and other agencies which deal with global concrerns might well have been "punish your friends and reward your enemies."

Take the United Nations. Since July 28, 1945, American taxpayers have shelled out almost $10 billion to keep this strongly anti-American organization in business. In 1980 alone, the U.S. taxpayers paid over $850 million.

Here's a partial list of U.N. activities U.S. money has helped underwrite:

Issuance of 3 stamps heralding the "inalienable rights of the Palestinian People." (The PLO loosely translates Palestinians' inalienable rights as the destruction of Israel.)

$31,500 to the Southwest African People's Organization (SWAPO), a Marxist-Leninist terrorist organization which launches repeated strikes into Namibia from its Cuban-protected bases in Angola.

Another $151,000 in "general education assistance" to SWAPO.

$125,000 to the Pan African News Agency (PANA) for 5 regional news "pools." Colonel Khadafy's Libya and Marxist Zambia will host 2 of these U.N.-funded news bureaus.

$45,000 to the Organization for African Unity's National Liberation Movement Press. OAU works with SWAPO and other terrorist organizations in Southern Africa.

$8 million from UNESCO, the United Nations Education, Science and Cultural Orgnization, went to the PLO and 3 other terrorists organizations from the 1981-1983 "educational" budget.

The U.S. gives over $250 million a year to UNESCO—one fourth of its budget. According to the Heritage Foundation, $22 million in UNESCO funds go to support the New World Information Order (NWIO), which attempts "to license journalists and censor Western owned international news and information services. These come under the guise of such studies as one on the 'right to communicate,' which translates from UNESCO-speak as the right to control Western news correspondents."

The Soviets support NWIO.

Perhaps the most sinister aspect of the United Nations is the haven it provides for anti-American spies. According to estimates, anywhere between 25 and 60 percent of all Soviet and Eastern Bloc U.N. employees report straight to the KGB.

Arnaud de Borchgrave, co-author of The Spike and Monimbó, claims the Soviets have made similar use of the U.N.'s Geneva, Switzerland offices.

While American taxpayers foot the lion's share of the bill for this Soviet storefront spy operaiton, the USSR is more than $180 million in arrears for their share of payments to the U.N.

Another brainchild to come out of the U.N. was the Law of the Sea Treaty. Wisely rejected by President Reagan, it would have socialized all deep sea mining.

Unfortunately, the U.S. Government's funding of its international enemies does not stop with the U.N. In sad retrospect, America's U.N. funding is a small piece of the pie.

Since 1976, the State Department's Agency for International Development (AID) has given Internaitonal Planned Parenthood (IPP) at least $144 million, including a single grant of $71,333,000 on October 1, 1980—just 3 months before Jimmy Carter's presidency terminated. And two grants totaling $519,000 were snuck in on September 30, 1981—the day before the first fiscal year controlled by Ronald Reagan began.

In April 1981, IPP, the United Nations Fund for Population Studies and the Population Council sponsored an international conference in Jakarta, Indonesia. According to Reuters, the conference supported "safe, modern abortion techniques" as a means of population control.

In November 1981, IPP asked the People's Republic of China to become one of the group's 108 member nations. IPP's March 1983 conference praised the country's family planning policies.

According to National Review, the People's Republic's population-control program includes "coerced abortion and even infanticide."

When Poland, crippled by communist repression and a resultant sputtering economy, failed to meet interest and principle payments on its staggering $23 billion foreign debt, our government stepped in, paying American banks what Poland owed them. How ironic that communist Poland receives better treatment than thousands of small American businesses, forced into bankruptcy by staggering high interest rates.

Mexico, an uneasy ally at best which routinely attacks "Yankee imperialists," owes foreign banks a whopping $80 billion. And when Mexico's economy, hobbled by socialist planning and accompanying layers of corruption, looked like it was about to go belly-up, our government moved swiftly to protect the interests of American banks at the taxpayers' expense.

Currently, Western banks hold more than $500 billion worth of foreign debt. Secretary of State George Shultz and other Cabinet officials are urging President Reagan to contribute another $8.5 billion to the International Monetary Fund which can be used to further bail-out the dying economies of the Third World and Eastern Bloc. (Hungary and Yugoslavia are already members of the IMF. Poland is applying for membership.)

Warsaw Pact nations now owe the West over $80 billion, up from $7.9 billion in 1973. Threats to default on this debt can undermine American foreign policy. American bankers have traditionally supported politicians who reject challenging Soviet imperialism.

David Rockefeller, the former chairman of the Chase Manhattan Bank and the driving force behind the internationalist Trilateral Commission, sums it up this way: "Just because a country is technically called communist doesn't mean that a capitalist institution such as the Chase Bank can't deal with them on a mutually beneficial basis, and indeed, we do deal with most of the so-called communist countries of the world on a basis that has worked out very well, I think, for both of us."

Rockefeller has nothing to worry about, secure in the knowledge that, no matter how bad the loan, the U.S. Government will bail-out the bank.

Awash in foreign money, communist governments are free to commit a disproportionate share of their national products to the greatest military build-up ever witnessed on the European continent. In response, the United States is forced to increase defense spending. As a result, American taxpayers foot the bill for both sides of the arms race.

As important it is to defund the left at home, it is equally crucial to cut it off abroad.●

DO NOT GIVE SYRIA—AND THE SOVIETS—A VETO ON THE F-16 SALE

HON. CONNIE MACK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. MACK. Mr. Speaker, recent events in the Middle East have demonstrated conclusively that the responsibility for the continuing dismemberment of Lebanon lies with the Syrians, and their Soviet backers. If Lebanon is not now reconstituted as one nation, free from foreign occupation troops, it will be the fault entirely of those two parties.

Now that Israel has publicly agreed to a withdrawal of its forces from Lebanon, our State Department should admit the obvious: There can be no further justification, if there ever was one, for delaying the sale of an additional 75 F-16 aircraft to Israel. If the Syrians refuse to leave Lebanon, thereby upsetting the withdrawal of forces agreement to which Israel has agreed, it would be a tortured twist of logic for the State Department to maintain the F-16 embargo on the grounds that "Israel won't pull out of Lebanon."

In fact, that type of reasoning would give the Syrians/Soviets a de facto veto over the F-16 sale. They could refuse to remove their forces from Lebanon, thereby forcing Israel to keep its troops there also, and watch with satisfaction as our State Department maintains the F-16 embargo as a result.

It is increasingly clear to me that our Government should immediately announce that the F-16 transfer is going to occur without further delay, no matter what the Syrians and Soviets decide to do. We must not give them an incentive to sabotage the withdrawal agreement, and we should make it clear to the world that the United States will regard Syria and the Soviet Union as solely responsible if the current opportunity to restore the territorial sovereignty of Lebanon is lost.

At this point, I would like to insert a column from today's New York Times by William Safire that represents a cogent analysis of the situation:

MOSCOW'S MIDEAST BID

(By William Safire)

WASHINGTON, May 11—Mustering the troops of its defeated client, Syria, and the remmants of P.L.O. forces driven from Beirut, the Soviet Union is how making a determined and dangerous bid to force its way into the politics of the Middle East.

The American Secretary of State, driven by an understandable desire to make his Lebanese-Israeli agreement stick, appears to be in danger of acquiescing to the Soviet power play. That would be the worst blunder since our misbegotten policy was announced.

To bring the Russians in now—first by appealing to them as Secretary Shultz did from Paris yesterday, then by acceding to Moscow's desire for a gang-up-on-Israel Geneva conference—would snatch an American defeat from the jaws of Israeli victory.

The decade-long invasion and takeover of Lebanon by its surrogates, Syria and the P.L.O., was successfully stopped by Israel. Now the Israelis, having freed the Lebanese from oppression and themselves from terrorism based in Lebanon, have agreed to withdraw. The world awaits an expression of willingness from the Soviet clients to do the same.

Why should they? What incentive do the Syrians and P.L.O have for ending what is left of their occupation of Lebanon? When those questions were put to George Shultz last Friday by Israel's opposition leaders, the envoy Philip Habib blurted out the American view of the truth: "Because you are 25 kilometers from the outskirts of Damascus." The main peacemaking pressure we are bringing to bear is the threat of further Israeli action.

The Soviet strategy is obvious. First, they will try to scare the Lebanese Parliament out of ratifying the agreement with Israel by threatening a new outbreak of fighting. That explains the steady buildup of Soviet missiles manned by Soviet troops in Syria, the quiet new invasion of Lebanon by thousands of Syrians and returning P.L.O., and the ostentatious removal of women and children from the Soviet Embassy in Beirut for a "summer vacation."

Next, if that war of nerves does not force the Lebanese to acknowledge the partition of their country, the Russians may escalate to provocative incidents, using more Druse forces to harass Americans and Syrian-P.L.O. units to ambush Israelis.

After that, we can expect talk of Syria launching a Yom Kippur-style war: briefly bloodying the Israelis in Lebanon, quickly vindicating Soviet weaponry and restoring Syrian-P.L.O. macho, following that with a hot-line demand by Mr. Andropov to Mr. Reagan to call off the Israeli counterattack lest the loss of Soviet life trigger massive intervention. (In that case, the Israelis—who have been drawing down troops in Lebanon during the recent Syrian buildup—would probably not accept the Lebanese battleground preferred by Syria and would move immediately on Damascus.)

The purpose of this high-risk provocation is plainly to entrap Mr. Shultz into "saving" his negotiation by turning to the Soviet Union. It's his baby; it is all he has to show for nine months' effort; what could be wrong with asking the Russians for a little help?

Everything. For years, State Department and National Security Council Arabists (who were so sure that the Sept. 1 proposal would bring King Hussein to the negotiating table) have been salivating at the prospect of a grand "comprehensive" summit meeting with Israel isolated, at which the superpowers would hand over the West Bank to a P.L.O. front. The stage would be set for terrible U.S.-Israeli strains; if the U.S. did not accede in the total betrayal of its ally, the Soviet Union would be re-ensconced in the Middle East as the champion of the Arab cause. No-win for us, no-lose for Moscow and the most radical Arabs.

How do we counter this Soviet strategy?

1. Drop the note of desperation in our Lebanese negotiation; partition will end when Arabs want it to end. Put the diplomatic focus on the Arab League, under whose auspices Syria took over Lebanon in the first place. Cannot a member, Lebanon, be granted a request to be de-protected? Let Arabs lean on Arabs.

2. Make a display of military and economic support for Israel and Egypt, reminding Mr. Mubarak of his obligation to live up to his peace treaty by returning his Ambassador to Jerusalem, especially after Israel's willingness to sign Secretary Shultz's deal. Make it possible for Israelis to use our aid money to establish their own defense industry.

3. Point out to Moscow now, publicly, that the U.S. would not cut and run if a Syrian attack on Israel led to a threat of a Soviet attack on Israel. Our previous unconcern at the Syrian missile buildup, and our foolish chastisement of Israel on F-16's, could lead to tragic miscalculation. Now is the time to be unambiguous and very tough; a loss of Soviet lives as a result of a Syrian attack on Israel would not be tolerated as an excuse for escalation.●

JOHN J. NORTON—OUTSTANDING PUBLIC SERVANT

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. LANTOS. Mr. Speaker, I would like to take this opportunity to recognize a very fine public servant in my district who is preparing to leave his position as police chief of Foster City, Calif., to take on the prestigious job of the State's top police chief.

John J. Norton came to newly incorporated Foster City 12 years ago to inherit the dual roles of police and fire chief in what was then a public safety department. He immediately set forth to establish himself as one of the most progressive police chiefs in the State by undertaking a major reorganizational development program to professionalize and humanize his departments. The police and fire departments were separated, enabling personnel to keep one identity and to progress rapidly in skill and technical knowledge of their perspective fields.

In the dozen years he has been Foster City's police chief, morale, stability and professional proficiency have been the rule of his department. The rate of burgularies in his city dropped substantially. Some of the department initiated narcotic seizures in California are on record as the largest in the State. And eight of the department's police officers have moved on to take the rank of police chief in other cities.

In addition to the outstanding performance by Chief Norton in Foster City, he has taken on responsibilities outside the department. He is currently president of both the California Police Chiefs' Association and the California Police Officers Association. In 1985 he is scheduled to become president of the International Association of Chiefs of Police. He also has taught in many colleges and universities and has been a member of the San Mateo County Human Relations Commission.

Chief Norton is an excellent role model for law enforcement officers. He has done his duties as police chief tirelessly and well. He will be sorely missed by the people in my district and, particularly, by the people of Foster City, But the State of California could not have done better in acquiring a new top police chief.●

TRIBUTE TO MICHAEL DAVID WILLIAMS

HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. MOORE. Mr. Speaker, the Baton Rouge Sertoma Club, which is a fine civic organization located in my hometown of Baton Rouge, La., conducts an annual Freedom Awards banquet. It was held this year on February 25, 1983.

As part of that celebration, the club sends a topic to all of the local schools in Baton Rouge to get students to write essays. The topic this year was "What Freedom Means To Me." The teachers in the schools make selections and send their choices of the best essays to the Sertoma Club which, in turn, selects a final winner. The winner of the 1983 Freedom Awards essay contest is Mr. Michael David Williams.

Michael is 13 years old. He is a student at the Broadmoor Middle School in Baton Rouge. His hobbies are fishing, and hunting, and some day he would like to be an airline pilot. I have met Mr. Williams and have found him to be a very outstanding young man. His essay is most enlightening and well worth being reprinted at this point in the CONGRESSIONAL RECORD:

WHAT FREEDOM MEANS TO ME

Freedom is intangible—it cannot be touched, seen or given away. Freedom must be earned. It cannot be bought; it cannot be sold. A person who has freedom knows he has it; and he is the luckiest person alive.

People of some nations strive for freedom all their lives, but they never get it. The struggle continues for generations and even centuries. In some enlightened countries there are less restrictions on freedom and these are the lucky ones.

No one is totally free. Because of its nature, freedom must be limited. It must not interfere with the rights of others. Therefore, we must realize there is no such thing as total freedom.

Two major political beliefs dominate the world today. The United States of America stands for individual freedom. Under this system a citizen is free within minor restraints. His horizon is full of opportunity. He is assured of a bill of rights which came from the Magna Carta of England, and this assures him of no persecution for his religious beliefs and protects him from being imprisoned because of religious beliefs. The American citizen must, of course, live within the body of the law which was handed down to him by his forefathers. We call this law the Constitution of the United States.

The communist world guarantees its citizens nothing. They call themselves comrade, yet only the elite and powerful can call themselves free and only as long as they are in power. The ordinary citizen in the communist world never knows when his door will be knocked down and he is dragged to prison. His freedom is a dream which will never be real. Freedom can never come in his lifetime or the lifetime of his children. He merely exists from one day to the next with no hope for change.

The people of the United States and the rest of the western world must never lose their freedom. Once lost it may never be regained. In the United States the dream of freedom is real as "One Nation Under God" we have liberty and justice for all.●

TRIBUTE TO ELIJAH ROGERS

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. FAUNTROY. Mr. Speaker, on May 13, the many friends of Elijah "Baby" Rogers will gather to honor and roast his 4 years of service as city administrator of the District of Columbia. He will be leaving public service on May 27.

Mr. Rogers, a native of Orlando, Fla., attended elementary and secondary schools in Orlando, Fla., Thereafter, he acquired a B.A. degree from South Carolina State College, Orangeburg, S.C. Mr. Rogers has earned a master's degree in social work and a master of arts degree with concentration in urban administration, both from Howard University.

Mr. Rogers was appointed city administrator of the District of Columbia on December 29, 1978. Since July 1976, Mr. Rogers served as city manager for the city of Berkeley, Calif., and was responsible for the supervision of 16 departments and preparation of the city's annual budget.

Mr. Rogers came to Berkeley in July 1974 as assistant city manager. Prior to coming to Berkeley, Mr. Rogers served as assistant city manager for administration and assistant to the city manager for general administration for the city of Richmond, Va. Prior to serving as Richmond's assistant to the city manager in January 1972, Mr. Rogers was chief of staff, city manager's office, Bowie, Md. Mr. Rogers served with the National Urban League as a field representative and assistant director of Federal programs. Mr. Rogers has also served as consultant to several national organizations. He is an author of several articles in the field of public administration.

Since his appointment as city administrator of the District of Columbia, Mr. Rogers has been recognized for his outstanding performance in managing ongoing District finances and for bringing order to the formerly chaotic accounting records and practices on one of our Nation's major cities. In fiscal 1981, for example, his insistence upon stringent financial management made an added $68 million available for reducing an accumulated $377 million deficit to $309 million. This achievement is even more remarkable when one considers the difficult control systems and to constant vigilance in the fiscal arena has produced impressive benefits for District of Columbia citizens and taxpayers alike.

Mr. Rogers is a member of the International City Management Association and recently served as chairperson of the Alameda City-County Management Association. He was the recipient of the 1979 Distinguished Alumnus Award at South Carolina State College, Orangeburg, S.C. He also received the 1981 Community Services Award from Howard University School of Social Work. He served as chairperson of the International City Management Association's Minority Executive Placement Board of 1974-79, and is vice chairman of the Metropolitan Washington Council of Governments. Mr. Rogers also serves on the Board of Public Executive Institutes, Inc., Washington, D.C.

The citizens of the District of Columbia have been served well by Mr. Rogers. He will continue, however, to advise the Mayor. Mr. Speaker, in a period of criticism of public servants, Mr. Rogers is another outstanding example of a committed and competent government employee. He will surely be missed.●

NATIONAL NURSING HOME WEEK

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. GUNDERSON. Mr. Speaker, memories are made to be shared is the theme of National Nursing Home Week, May 8-14, 1983. And each of us has a special memory of a loved one who offered a kind word in time of need. As a nation we rarely take the time to say thank you to our elderly for their wisdom and guidance, or to those who devote their careers to caring for these citizens.

Approximately 1.3 million people live in nursing homes nationwide. In the Third District of Wisconsin alone, there are 86 homes for the aging serving some 7,298 elderly persons. In the past decade the nursing home population has grown disproportionately in Wisconsin, which now ranks second in the Nation for nursing home use.

This growth in nursing home use has caused a substantial increase in spending for long-term care. From 1981 to 1983 total nursing home spending increased at an annual rate of 11.9 percent from $24 billion to $30 billion. By 1985 that number is expected to grow to $39 billion and by 1990 to $67 billion.

Anticipating that expansion, my home State has pioneered a program to supplement current long-term care services. The community options program is designed to target those individuals considering nursing home care who, with a minimum level of reliable assistance, may choose to remain in the community.

This exciting initiative will insure that elderly citizens who need certain limited services can stay in the community and prevent further financial constraints on current nursing homes. Under the program, persons planning to enter a nursing home are first provided with a thorough review of their needs and capabilities to determine whether assistance at home could be more beneficial.

This assessment is performed by a board of professional persons. The needs of the individual are analyzed in terms of the services and living arrangements available in the community. All cost considerations are also taken into account. The elderly person then chooses from the available options, and a comprehensive service plan is developed. The total amount of funding provided to each county is roughly enough to assist 1 out of 10 persons referred for nursing home placement to receive care in their local community.

Wisconsin's experience with the community options program has demonstrated that savings can be achieved by a reduction in the time elderly spend in hospitals as well as nursing homes, and through better maintenance care in the community. In addition, the program has pulled local communities together in exploring alternatives available for caring for their elderly neighbors.

We should take this opportunity to show our appreciation to those who have devoted their lives to caring for the elderly, both in nursing homes and through community-based services. We must also take this week to thank those older persons who have touched our lives and shared with us the gift of their knowledge and experience.●

SCOWCROFT COMMISSION

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. ASPIN. Mr. Speaker, it is getting hard to tell the good guys from the bad guys in arms control these days.

For example, the Catholic bishops have taken a position that moves them to the far right. I am not talking about the bishops' support of the freeze—that is a liberal position and the aspect of the bishops' report that got the most press attention. But the bishops also came out against aiming missiles at civilian populations. Their position is understandable; they felt it immoral deliberately to target innocent civilians. If nuclear weapons are needed for deterrence, they should be targeted against nuclear weapons, the bishops argued.

The trouble is that liberals in the defense business believe that targeting the other side's nuclear weapons makes war more likely because the side that fires first has an advantage, which simply tempts decisionmakers to resort to nuclear weapons in a crisis.

Furthermore, this policy opens the budgetary floodgates and puts the arms race in high gear. If each side targets civilians, each side knows that the use of nuclear weapons will bring total destruction—and only about 400 warheads are required to bring about Armageddon. If we start targeting nuclear weapons, nuclear war can begin to look winnable. But to accomplish this requires many thousands of warheads and vast sums.

In other words, the bishops come at the issue from a different perspective but end up alined with the school that advocates a "warfighting" posture rather than the school that advocates "assured destruction."

Another alliance of strange bedfellows is taking place over the Scowcroft Commission recommendations on deploying the MX missile. Up to now, the MX has been a weapon all liberals could love to hate.

The Soviets already have first strike weapons—the SS18 and SS19—which threaten our ICBM force. The MX is also a first-strike weapon—if we have enough of them, we threaten to wipe out the Soviet Union's entire ICBM force. The result of building the MX is an arms controller's nightmare: two sides with weapons that are simultaneously vulnerable and capable of a first strike. Nothing could be more dangerous in a crisis.

Along comes the Scowcroft Commission, which says we need to move away from these vulnerable first strike weapons. The reason for shifting away from the MX and the Soviet SS18 and SS19 is to reduce the incentive for either side to move first in a crisis. If a crisis is building—for example, something like the 1962 Cuban missile crisis—and both sides have vulnerable first strike weapons, there is a dangerous temptation to go first—the side that shoots first wipes out the other's land-based forces. This is most dangerous if a crisis builds to the point where leaders on both sides believe war is inevitable.

One way to deal with this danger is to make sure no crisis reaches that point. But crises are hard to control. And there are enough differences between the United States and the Soviet Union that we can be sure crises will crop up now and then.

A more practical way to deal with this danger is to arrange weapons so that neither side gets an advantage from firing first. Here is where the Scowcroft Commission comes in. It recommends that both superpowers move toward single warhead missiles and agree to limit the number of warheads on each side.

Why will this work? Because if both sides have single warhead missiles, it will take one missile to get one missile. To be sure of getting the one missile actually requires two warheads because of limitations on accuracy. If both the United States and the Soviet Union have single warhead missiles and both are limited to the same number of warheads, it would make no sense to attack the other's missile force. The attacking force would have to give up two missiles to destroy only one on the other side.

Enducing the Soviets to agree to this is tricky. They already have a first strike force. Unless we can get them to agree to limit their warheads, they would be able to overwhelm our ICBM force. Even if our ICBM's were made mobile, they would not be invulnerable. Given enough warheads, the Soviets could barrage the areas where the small mobile missiles are located and destroy them all.

To gain stability, it is not enough for the United States to go to single warheads, the Soviets must agree to a reasonably low warhead limitation.

Here is where the MX comes in. A limited number of MX's—the Commission recommends 100—could not carry out a first strike on Soviet forces. Ten warheads per missile totals 1,000 warheads on 100 MX's, which threaten 500 targets with two-on-one targeting. The Soviets have about 1,400 land-based missiles, including about 650 multiwarhead SS18's and SS19's. But 100 MX's would threaten a good portion of their forces and force them to consider that someday their land-based missiles could be just as vulnerable as ours.

A core question is whether you can get the Soviets to negotiate without dangling the MX over their heads. Obviously, this question can only be answered definitively in Moscow. But the history of our negotiations with the Soviets through Republican and Democratic administrations shows they really do want to hold onto these giant missiles. Both the Ford and Carter administrations offered very attractive negotiating carrots to get the Soviets to give them up, but with no success. It is those whoppers that distinguish the Soviets from us and give them the self-assurance that they really are a superpower. I, therefore, tend to believe we need the MX—not to give the United States the capability to wipe out the Soviet ICBM force, but to turn on a light bulb in the Kremlin's brain and make it realize that it is in Moscow's interest as well as ours to shift to single-warhead missiles and to agree to a limit on warheads.

The goal of all this is to prevent nuclear weapons from being used in the first place. The best way to achieve that goal is to create a situation in which neither side has an incentive to use nuclear weapons. That is precisely what the Scowcroft approach does.

The MX has come to be something of a symbol of dangerous nuclear military spending. But there is nothing inherently good or evil in the missile itself. If the missile ends up being deployed in a vulnerable way and in sufficient numbers to threaten a first strike on the Soviet Union, it will be evil. But if it ends up being used as a lever to move the Soviets away from giant silo killers, it will go down in history as making a real contribution to the advancement of arms control.

The MX is one part—the most controversial part—of the Scowcroft Commission recommendations. The Commission proposals form a package: The MX; the shift to the small, single-warhead missile; and the new direction in arms control. If the package is not accepted as a whole, the compromise that the Scowcroft Commission fitted together collapses.

There are three core reasons that liberals should support the package.

First, the Commission recommends a new direction in arms control negotiations, emphasizing warhead counts rather than launcher counts, among other things. These may seem like technical changes, but they are important points liberals have been advocating. For President Reagan to agree to them is a major advancement.

Second, the Commission recommends the shift toward the small, single-warhead missile. That is something liberals have also sought. It is part of the Scowcroft package. If we reject the MX, we can expect the other side to reject the small, single warhead concept—and then we have gotten nowhere.

Third, the Scowcroft recommendations form a compromise designed to

move our arms control strategy off dead center. This is an instance when compromise for the sake of compromise is crucial. We are going nowhere in arms control these days because we have become bogged down in excessive partisanship. President Ford negotiated the Vladivostok accords; the incoming Carter administration rejected them. Carter negotiated SALT II; the incoming Republicans junked that. The atmosphere the last 2 years has been so bad that Democrats wrote off START before it started. We are not advancing; we are going backward. We need to break this logjam. The Scowcroft recommendations give us the opportunity to do that by accepting a compromise that has something for everybody but not everything that any one group wants. The alternative is not "something better"; the alternative is sinking deeper in the quicksand in which we have been mired for some years.●

TRUMAN CENTENNIAL YEAR CELEBRATION

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. SKELTON. Mr. Speaker, yesterday afternoon, I had the privilege to participate in the kickoff of the Truman Centennial Year celebration. This event took place in the Capitol and was attended by dignitaries including Hon. Clark Clifford, Hon. Averell Harriman, Hon. John W. Snyder, and Mrs. Margaret Truman Daniel.

Because of the significance of this event, I was compelled to miss two votes on the Emergency Housing Assistance Act. I did, however, vote on other provisions of the bill and on final passage.●

DEFENSE AUTHORIZATION BILL FOR FISCAL YEAR 1984

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. BONIOR of Michigan. Mr. Speaker, we will soon be considering the Defense authorization bill for fiscal year 1984. Given the status of our current budget deficit, we must all face the burden of identifying programs that can responsibly be delayed or abandoned.

One such program is the administration's request of $157 million for the production of binary chemical weapons. On March 23 of this year, a bipartisan coalition from the House announced our continued opposition to funding for this type of weapon.

I would like to insert a report of that press conference in the RECORD now, and urge my colleagues to vote to delete funding for binary chemical weapons.

Binary chemical weapons would be an unnecessary and dangerous addition to the U.S. arsenal, eight Congressmen said Wednesday in introducing a bill to block production of the arms sought by President Reagan.

The Congressmen said the weapons could spur the arms race, create friction with European allies, siphon money from deserving military projects, intrude on arms controls efforts and hurt U.S. standing in the world community.

"It (production) would enhance an already bellicose image that we have," said Rep. David Bonior, D-Mich., one of the measure's sponsors.

The bill would block production of new binary weapons but would allow spending on defensive equipment and on research of chemical weapons.

Binary chemical weapons mix two nonlethal agents to form a deadly combination. Reagan has requested $157 million for production of new chemical weapons this year.

International treaties allow development of chemical weapons but prohibit their use.

"It would be perceived we would be legitimizing all bio-chemical weapons," said Rep. James Leach, R-Iowa. "If we go forward, we would be sanctioning one of the cruelest forms of warfare the world has known."

There has been a 14-year U.S. moratorium on production of the weapons and last Congress defeated a suggestion to produce them.

"I believe we are going to be as successful this year," Bonior said.

"The United States already has tremendous quantities of weapons on hand," said Rep. Bill Green, R-N.Y.

"This (production) is not only unnecessary but an extremely dangerous area for this country to leap into," said Rep. Bob Kastenmeier, D-Wis.

In addition to Bonior, Kastenmeier, Green, and Leach, the other sponsors are: Clement Zablocki, D-Wis., Sam Gejdenson, D-Conn., Less AuCoin, D-Ore., and Frank McCloskey, D-Ind.●

HONORING THE KENTLAND VOLUNTEER FIRE DEPARTMENT

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. HOYER. Mr. Speaker, I would like to take this opportunity to bring to the attention of my colleagues an event which underscores the contributions and degree of importance that volunteerism has attained in this country.

I am referring to the outstanding achievements of the Kentland, Md., Volunteer Fire Department, which is located in my district. Through the efforts of the volunteer firefighters at this station and through the efforts of their families, friends, and neighbors, this organization will dedicate a 1,250-GMP pumper on May 14 at the FOP lodge in Upper Marlboro. This will be the third piece of firefighting equipment purchased by this volunteer company in the past 2 years.

Not only is this a fine example of how men and women, working together for a community effort, can achieve their goals, but it is also illustrative of how the private sector can step in and pick up, at least to some extent, when the public sector cannot. Prince Georges County, in which Kentland is located, is restricted in the amount of revenues it can collect through the property tax. Therefore, when high-cost materiel, such as fire equipment, is needed, it is not always easily purchasable. Certainly the endeavors of the Kentland Volunteer Fire Department has been advantageous to our county, and I want to commend its members here today.

TRIBUTE TO CONCERNED BLACK MEN

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. GRAY. Mr. Speaker, on behalf of my colleagues in the Congressional Black Caucus, I am proud today to recognize the efforts of a distinguished group of men who have dedicated their time and resources to black youth in the city of Philadelphia.

This group, Concerned Black Men, has reached back into their community to provide young people positive male role models and sponsor programs which promote positive self-development and self-esteem. Over the last 9 years their programs have touched thousands of youths. Concerned Black Men has made significant contributions to the academic, cultural, and social enrichment of these young people.

They have provided numerous academic scholarships to deserving inner-city youth. Through contributions, they have enhanced the quality of instruction in the music departments of several high schools. They have made sound financial contributions to the youth programs of various religious and private organizations.

Concerned Black Men sponsored several citywide chess tournaments. Further, they have played a major role in financing the travel of our nationally recognized elementary and junior high school championship chess teams, which have competed in both national and international tournaments.

Additionally, for the last 9 years Concerned Black Men has sponsored successful annual essay contests for Philadelphia's youth on various socio-economic topics. The contests have been endorsed by both the city's public and parochial schools.

Concerned Black Men has been recognized by the Governor, the Pennsylvania State House of Representatives, the mayor, and the Philadelphia City Council. As an organization consistently dedicated to the recognition and motivation of black youth, Concerned Black Men certainly deserves the recognition of this distinguished body.

Concerned Black Men is a significant and positive force in the city of Philadelphia. Mr. Speaker, for the above reasons, please join me in saluting Concerned Black Men, Inc.●

RESOLUTION—POLISH CONSTITUTION DAY

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Ms. OAKAR. Mr. Speaker, as you know the people in Poland have been valiant in their efforts toward ending oppression in Poland. The following is a resolution passed by the American Polish Community:

RESOLUTION—POLISH CONSTITUTION DAY, MAY 8, 1983

1. We pledge to honor and respect the Constitution and flag of the United States.
2. We thank President Ronald Reagan for his strict rebuttal to the Soviet Union during martial law in Poland.
3. We hold the highest esteem for Poland's illustrious son—Pope John Paul II.
4. We acknowledge all the efforts of President Aloysius Mazewski and the Polish American Congress for all their work for Polonia in the U.S. and our brothers and sisters in Poland.
5. We will do everything in our power to help Poland regain its freedom and independence and to restore human rights for the people of that great nation.
6. We demand that the United States Government impose a full embargo on all food, technical assistance, and credit to the Soviet Union.
7. We demand the release of all innocent political prisoners in Poland, and appeal to the United Nations to place this matter on their agenda immediately.
8. We demand the repeal of the Yalta Agreement which in effect put Poland in the Soviet bloc.
9. We will never forget the horrendous crime of the Katyn Forest. Thousands of Polish military personnel and intellectuals were brutally murdered by Russian troops.

Long live the United States.
Long live a free and independent Poland.
Long live Polonia.
Long live Pope John Paul II.
Long live solidarity and Lech Walesa.

RICHARD E. JABLONSKI,
National President, the Union of Poles in America.
GENEVIEVE SANDEIJ,
President, Alliance of Poles in America.
FELIX HUJARSKI,
Director, Polish National Alliance.●

FUNDING FOR SPORT FISHERIES RESEARCH, MANAGEMENT, AND DEVELOPMENT PROGRAMS

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. SAWYER. Mr. Speaker, during recent appearances by technical fisheries experts and constituent groups with coastal fishery interests before the Fisheries, Wildlife Conservation and the Enviroment Subcommittee of the Merchant Marine and Fisheries Committee, of which I am a member, it has become reasonably evident that vitally needed marine sport fisheries research, management, and development programs in the coastal states are inadequately funded.

The intensified demands that have been placed upon our limited coastal fish stocks by harvesters of all types have exceeded the capacity of certain fish stocks to replenish themselves satisfactorily. At the same time, estuarine habitat, critically important as breeding and nursery grounds, are being gradually obliterated and public access to productive fishing waters are being lost to coastal development. These growing problems must be rectified.

It is also apparent that we are entering a new era, when hard political decisions are being made concerning who will harvest coastal species, in what numbers, and by what means. The business of allocating and conserving fish stocks requires sound data on catch and participation as well as on the conditions of fish stocks and supporting habitat. In addition, socioeconomic data on all sectors of the economy affected by resources allocation decisions must be obtained. Recreational anglers must be willing to accept a fair share of the responsibility for funding the research, development, and data acquisition programs necessary to protect the resource. To do nothing will result in the decline of our coastal recreational fisheries.

One time-honored means of acquiring necessary funding for the special needs of recreational anglers is through a user-pay fishing license. Fishing licenses are required in every State, without exception, to participate in freshwater recreational fisheries. Saltwater recreational anglers also participate in funding their State's fishery conservation programs through some form of license fees, dedicated exclusively to the protection of their interests in the marine waters of all west coast States except Hawaii, and in all gulf coast States except Mississippi. While at the same time, marine anglers along our Nation's east coast do not contribute through licensing structures to the care, protection and development of the marine resources upon which they depend for recreational enjoyment.

The legislation I have introduced, H.R. 2965, will provide a source of State funding which will assume even greater importance should this Congress pass legislation to increase the funding available under the Sport Fish Restoration Act (DINGELL-JOHNSON). An important provision of that pending legislation is the mandate to the marine coastal States to divide the new moneys equitably between saltwater and freshwater projects. The marine coastal States that do not currently license the marine angling sector will lack a continung dedicated source of revenue with which to provide the necessary 25 percent matching moneys required by the legislation.

It is time that all marine recreational fishermen assume their fair share of the costs of research, management, and development. The legislation I have introduced will require the coastal States to adopt marine angling license featuring (1) reciprocity between States governing fishing in their contiguous waters, (2) dedication of revenues exclusively to recreational fishery-related expenditures, (3) policy control and independent boards made up of knowledgeable at-large representatives of angling and scientific interests, and (4) uniform annual fees of at least $5, designed to generate on a continuing basis the substantial moneys required, (a) to provide for development of a wide range of useful marine recreational fishing facilities, (b) to permit socioeconomic, biological, ecological, and environmental research and data collection urgently needed for effective management of the recreational fisheries, and (c) to provide for minimum related administration and enforcement activities.●

EARL "FATHA" HINES

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. DELLUMS. Mr. Speaker, with a sense of loss, yet appreciation, I take this opportunity to call to the attention of my colleagues in the U.S. Congress the life and death of a musical giant, Earl "Fatha" Hines.

Fatha Hines resided in Oakland, Calif., for more than 30 years; he was a citizen of the world for over 77 years. As the "father of jazz piano," Fatha Hines shared his genius with people everywhere in the world, including Japan, Europe, the Soviet Union, and Cuba.

Many remember Fatha Hines during the twenties and thirties, performing with his band in jazz clubs, at concerts, in church and on the radio. He inspired musiclovers and musicians. In

1928, Fatha Hines recorded the "Big Event" with Louis Armstrong, a recording considered to be the most important in the history of jazz.

There are many who only know Fatha Hines in his recent years. His creativity and flexibility were evident from his recent performances at the Oakland Symphony, and University of California, as well as at rock and jazz clubs. He was truly "a man for all seasons."

In 1981, the College of Arts and Crafts, an outstanding educational institution in Oakland, Calif., had the wisdom and vision to confer an honorary doctorate degree on Fatha Hines. During that same year he was voted "best jazz keyboardist," the oldest musician to receive such an award.

Not only was Fatha Hines a musical genius, he was a great humanitarian. Many musicians were inspired and assisted in their careers by Fatha Hines. Until his untimely death on April 22, 1982, he performed for the pleasure of his fans and the benefit of his colleagues.

Mr. Speaker, a great composer, a great musician, and a wonderful human being has passed. Yet, Dr. Earl "Fatha" Hines will continue to live through his music, his friends and his deeds. I urge you and my colleagues to listen to his tunes and learn from this life the joy of giving, of pleasing, of beauty and of soul.●

SUFFERING FROM AN ORPHAN DISEASE

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. OTTINGER. Mr. Speaker, last year, during consideration of the orphan drug bill, we all became aware of the fact that millions of Americans are afflicted by so-called orphan diseases—diseases that afflict so few people that the drugs to treat them have not been developed and in some cases research is not even being done to discover the cause or cure.

I would like to share with my colleagues today a letter I received recently from a constituent, Mrs. Ruth Lembeck of Mount Vernon, N.Y. Mrs. Lembeck's personal account of her son Jamie's orphan disease exemplifies the battle against the painful symptoms of Syringomyelia made so much more difficult by the lack of communication, information, and research dealing with this disease.

Last year, we took an important step with the passage of the orphan drug bill to encourage the development of drugs for orphan diseases. Equally important now is the need to appropriate adequate funding for research by the National Institutes of Health and I hope the members of the Appropriations Committee will respond favorably in this regard. Clearly, it is not acceptable for people to suffer and die because they have a disease or condition that afflicts a relatively small number of people.

Mrs. Lembeck's letter follows:

I want to tell you about what surely must be the most neglected of all orphan diseases. It has no voluntary organization to work for its victims. It has no foundation to accrue funds and disperse them for research. It has no communications network to keep those with the disease informed . . . no public information program to tell the world it exists and must be fought for. It boasts no special centers for its diagnosis and treatment. Last, and most deplorable of all, it has no research whatsoever being done to seek its cause and cure, no funds to support such research. Because of these lacks, it cannot even join other groups that might offer the support and focus it requires. In a sense, it is a nondisease, for it simply does not exist . . . except, painfully, for those who have it.

A rare, highly destructive progressive disorder of the spinal cord, it cripples and it shortens life. Its name describes it—syringomyelia—syrinx of the spinal cord.

Syringomyelia falls into no established medical category. It is neither biochemical nor genetic, and it is not an immune, endocrine, or metabolic problem. Ultimately, however, it becomes a major neuromuscular disaster for those who have it. It is termed a disease, but it is actually a condition, one which can become evident as early as age 3 or as late as age 60, but is usually first manifest around the age of 30. It apparently occurs more often in males than in females. No one will hazard a guess as to how many Syringomyeliacs there are in the United States. Their numbers are undocumented.

My son has Syringomyelia. The onset at age 25 was sudden. He became numb in the left foot, and within a few months, his entire left side, including his tongue, was without feeling, and he became impotent; 7½ hours of micro-surgery revealed what scans and other testing had suggested—an obstruction, a massive enlargement of the mid- and upper-spinal cord, proved to be Syringomyelia.

Under normal body conditions, there is a consistent flow of cerebral fluid from head to spinal cord and back again. With Syringomyelia, the syrinx acts as a catchbasin, and some of that fluid cannot escape to flow freely, as it should. Eventually, the cavitation fills and becomes distended, pressing on the lining of the central canal, creating fissures within it. The fluid can then begin to dissect the inside of the cord, interrupting nerve connections, destroying neurons, creating the neurological deficit known as Syringomyelia, (SM).

In general, SM symptoms are similar to those of other, better-known diseases, among these, amniotrophic lateral sclerosis (ALS or Lou Gehrig's disease), multiple sclerosis (MS), tumors of the spinal cord, cervical spondylosis (fusion of vertabrae with one another, platybasia (a developmental anomaly of the skull), and skeletal anomalies of the cervical spine.

Specifically, syringomyelia symptoms include any or many of the following: deep, boring pain . . . weakness/paralysis of voluntary motion . . . spasticity . . . change of gait and loss of motor abilities . . . atrophy of bones (they become calcified and osteoporotic) . . . gangrene . . . total loss of either pain or temperature sense (one eminent neurosurgeon told me of an SM patient who progressed to the point of no sensation anywhere in his entire body!!) . . . ulcerous fingers (from unfelt cuts or burns). All of these, as well as others not cited, are examples of the irreparable damage visited on the body by syringomyelia. Even when discomfort and pain have been temporarily alleviated (and this is all the medical world is able to do now—alleviate!) the disease continues on its insidious course. No way to halt it has been found because, quite simply, no search has been made.

Syringomyelia has many variables. For one thing, there are different types of the disorder. For another, its patterns are erratic and unpredictable—baffling and frustrating both to its victims and to the physicians who treat it. Because each case differs from the other, methods of treatment must be adapted or devised to fit. All treatments currently in use attempt to reestablish normal communication for the fluid between spinal cord and head, and theoretically they should work, but in practice they have many problems. Adhesions can form again, shunts can move out of place or become plugged, small openings applied by the surgeons can seal off as the cord tends to collapse, and other conditions can arise, stymieing efforts to effect any permanent cure. Gaps in knowledge and lags in communication also contribute to the confusion and the inability to help geographically-dispersed syringomyeliacs. It is thought that there are many undiagnosed cases of SM.

Cause of the disorder is still unknown. It is frequently referred to as congenital, based on the belief that when a baby is forming in utero, some glial cells go astray, wander into the spinal canal, and form a tube or cavitation (syrinx), but this is a matter of conjecture. Then, too, there is another form of syringomyelia that results from trauma—spinal cord injury sustained during military action. As stated earlier, no breakthrough research is in progress. The only type of research being done is the long-range, clinical tracking of patients—making note of physical changes as the disease moves on its course. This cannot possibly supply what my son and other syringomyeliacs need so desperately—a way to halt the disease in its tracks for good and aye, and as quickly as possible, for with a progressive disease, every day counts.

Jamie, my son, is now waiting for NMR (nuclear magnetic resonance) and other testing at Dent Neurological Center in Buffalo, where he lives. The microsurgery drained the syrinx, relieved the pressure and kept him sympton-free for a while, but he is numb once again—in the left foot, left hand and arm, and has 24-hour pain in the cervical area which peaks in intensity during sleeping hours. Whatever they learn from the new testing will add only to the clinical knowledge.

There are no definitive answers for Jamie's condition, and there will be none unless qualified researchers acquire monies enough to support all-out focus on syringomyelia. The likelihood of this depends wholly on whether the Senate and Congress Subcommittees appropriate enough funds to spinal cord diseases under Orphan Drug Bill authorizations to allow for breakthrough research on this disease, for as I pointed out, SM has no foundation of its own, no source of funding other than the government. Please . . . for the sake of my son and all other syringomyeliacs . . . con-

sider all the foregoing facts with compassion and generosity when this comes up for final consideration.●

MILWAUKEE GOES TO BAT

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. ZABLOCKI. Mr. Speaker, last weekend I had the privilege and honor to attend tributes to two great sportsmen and civic leaders—two great men who are interested in their community as well as in the activities of our youth in Wisconsin and across the Nation—Mr. Bud Selig, president of the Milwaukee Brewers baseball team, and manager of the Brewers, Mr. Harvey Kuenn.

On Sunday, May 8, Bud Selig was given the Sportsman of the Year Award by the U.S. Olympic Committee. Bud became only the third recipient of the award, the USOC's highest honor. He was recognized by the committee for his many contributions to baseball and to youth activities in Milwaukee.

Mr. Speaker, I can think of no more deserving figure to have been bestowed the honor of Sportsman of the Year by the Olympic Committee than Bud Selig. While his presentation dinner was held on Mother's Day, with all due respect to Bud's mother, Marie, it could just as well have been on Father's Day, since Bud is truly the father of baseball in Milwaukee.

It was Bud who fought for the Milwaukee Brewers, who supported them financially through his continual commitments, and determined enthusiasm.

When Bud started his efforts to bring a professional baseball franchise to Milwaukee, many people argued that Mikwaukeeans would not support another professional team. When Bud started looking at Seattle and obtained commitments from the original partners, many charged that he was wasting his time.

Well, Bud obviously knew he was right. In 1982 the Milwaukee Brewers won the American League pennant and made it to the World Series. Bud knew the spirit of Milwaukee, and he was rightfully commended for it.

Bud is an honest man, a decent man and one who truly deserves the USOC award. His work with Athletes for Youth, and his leadership in the business community makes a citizen who brings his principles to his work.

Among those congratulating and commending him for these many accomplishments at Sunday's event were: Henry Maier, mayor of Milwaukee; Robert O. Fishel, assistant to the president, American League; Willie D. Davis, Pro Football Hall of Fame; John B. Kelly, Jr., first vice president, U.S. Olympic Committee, and Harvey Kuenn, manager, Milwaukee Brewers.

That brings me, Mr. Speaker, to the second outstanding individual who was honored at another event in my district this weekend—Harvey Kuenn. Harvey Kuenn was honored and commended for his many contributions to sportsmanship, to baseball, and to the spirit of Milwaukee in a roast on Saturday, May 7.

While the format was one of joviality, this American League Manager of the Year stands out as one that will go down in history. His undying dedication to the team, his optimism, and his genuine good decency are now known throughout the country. It was typical that Harvey Kuenn would good naturedly agree to be the roastee at the II Eric Heiden Olympic Rink Roast, an excellent function organized by the West Allis Rotary Club to provide assistance to the Wisconsin Olympic Ice Rink Foundation, Inc.

Many thanks went to Harvey not only for his leadership of the Milwaukee Brewers successful 1982 season but also for his participation in the worthwhile community events. A special commendation also goes to the West Allis Rotary Club and its coordinating committee, Don Charlier, Bob Dohnal, Jim Papandrea, Mike Woods, for their outstanding work in organizing the Olympic rink project.

Finally, Mr. Speaker, the Northwest Orient's, May 1983 magazine issue includes an excellent article by Paul Froiland entitled "Milwaukee Goes to Bat" which captures the spirit of these two great sportsmen—one who brought the team to Milwaukee and the other who successfully led it to win the 1982 American League pennant. As indicated in the article, "The Brewers are not just a baseball team: they're a civic cause."

Mr. Speaker, I would like to share the article with my colleagues who may wish to read about the team that is certain to win the 1983 World Series.

The article follows:

[From the Northwest Orient, May 1983]

MILWAUKEE GOES TO BAT

It is late January in Milwaukee, the middle of a winter that has not been particularly kind to the country's economy, and especially to the economy of cities like Milwaukee, which have long been the industrial heart of the nation.

This year, however, Milwaukee has had something that the other cities have not: the Milwaukee Brewers baseball team, a team that has become a cause in its community; a team around which the entire city of Milwaukee has risen up, struck by its vision and thrilled by its success. The story of the Milwaukee Brewers is not an ordinary story.

It picks up on a particular evening in January, as the seventh floor of the Pfister Hotel rapidly fills with a huge number of buoyant Milwaukeeans, all quickly sloughing their overcoats and taking up a bottle of beer with their free hand. It is the Diamond Dinner, a time to reexperience the excitement of the Brewers' winning of the American League pennant in 1982 and their near miss in the World Series against St. Louis. So enthusiastic is the city's support for the team that general manager Harry Dalton would say later in the evening that "you would think that we had won the Series, three games to four."

The elevators keep opening on the seventh floor, disgorging new ranks of revelers, while those already arrived find themselves pressed increasingly closer to the walls. The ones fortunate enough to have tickets to the Celebrity Reception push on toward a ballroom at one end of the floor, where Brewers sitting along two rows of tables obligingly sign autographs, and occasionally stand up to have their picture taken with Susie and Billy, or even sometimes with Mother and Grandma. The proceeds for the Celebrity Reception, as well as the dinner to follow, all go to the charitable organization Athletes for Youth (AFY), one of the reasons the Brewers have become a cause in the community.

At the door, part-owner Ben Barkin warmly greets nearly every person who enters. Barkin, president and principal owner Bud Selig and former Green Bay Packer and Football Hall-of-Famer Willie Davis all founded Athletes for Youth, and it is the idealism represented by a community cause such as this that finds a reflection in the character of the ball club.

Inside the ballroom, right fielder Charlie Moore, recipient of the Unsung Hero Award, sits writing his name and quietly beaming, as perhaps an unsung hero typically would. Third baseman Paul Molitor (Igniter Award, American League [AL] runs-scored leader) signs a profusion of balls and bats tendered him by a crowd of breathless youngsters. Shortstop Robin Yount (AL Most Valuable Player [MVP], major league baseball MVP, Harvey Kuenn Hitting Excellence Award, AL All Star) is mobbed by most of the population under the age of 16 in the greater metropolitan area, and he greets each new face with a smile and a pleasant word.

Across the room, relief ace Rollie Fingers (1981 AL MVP, 1981 Cy Young Award winner and 1981 Fireman of the Year), manager Harvey Kuenn (Manager of the Year), Gorman Thomas (AL homerun champion) and owner Selig perform approximately the same functions.

Off to one side, in a dark alcove, a film of 1982 Brewers highlights draws a continuously changing crowd, which cheers again the sliding catch made by left-fielder Ben Oglivie (AL All Star) to save the East Division title on the last day of the regular season: It is the bottom of the eighth in Baltimore, there are two men on base for the Orioles, two men out, the Brewers leading 5-1, after losing the first three games. The winner of this game wins the division title. The Orioles' Joe Nolan hits a screaming shot into the left-field corner that looks about to drop into fair territory for extra bases. Oglivie charges at it full-speed, sees the ball beginning to drop, reaches out as far as he can toward it and catches it literally between his knees, inches off the ground, as he slides across the foul line on the seat of his pants.

After this the crowd sees the last game of the American League playoffs, the climactic moment of the Brewers' comeback from a two-games-to-none deficit against the California Angels; Cecil Cooper (AL All Star) hits a liner to left field and runs up the first base line, yelling "Down! Down!" to the ball. After it drops for a hit, thousands of fists in County stadium pump the air in jubiliation.

The crowd in the alcove watches in silent admiration or with a few cheers and then disperses back into the main ballroom.

Eventually the Celebrity Reception ends, those in the ballroom enjoin those drinking beer in the hallway, and the entire crowd surges in the opposite direction toward another, bigger ballroom for the dinner.

Brewer Vice President Dick Hackett welcomes the crowd and picks up a tape recorder. "Let's see how many of you remember this event," he says.

"What you hear in the background," says the announcer on the tape, "is 54,568 fans; nobody has left. Ladd ready * * * The one-two pitch—ball lined to Yount at short. He's out! It's over! The fans come streaming onto the field of County Stadium. It's ab-so-lute pandemonium. The Brewers * * * have defeated * * * the California Angels."

The crowd bursts into another cheer, and, for a moment it is October again, and there is a thrill in the air, an elusive spirit, a feeling that there cannot possibly be more happiness, more excitement, more utter delirium anywhere in the world than there is right now in Milwaukee.

When this nostaligic moment has ended, and people have again seated themselves, the first award of the evening is presented. It is the Evan Helfaer Good Guy Award, an award of general commendation given in memory of one of Milwaukee's greatest philanthropists, a man who donated money not just for the commonwealth, but specifically to elevate the moral climate of the city.

The award is given to part-owner Ben Barkin, who accepts it with these words: "Evan Helfaer was a great man. * * * He gave away millions of dollars to many good things, asking but one thing: no organization would be a recipient of his dollars if there was anything that was 'anti,' whether it was antireligion, anticolored or anti anything else. * * * He thought only in terms of good things. Now the wonderful thing about the Milwaukee Brewers is that the ownership is made up of good guys; and the players are good guys; and they make this community sing out. And if ever we needed a time when we had a spirit, we need it today."

Barkin goes on to describe one of the organizations that came to be a vehicle for Helfaer's intentions: Athletes for Youth, a program that today serves 2,500 youths in the inner city of Milwaukee with a variety of sports programs and clinics. He describes the first-ever activity organized by AFY: the sending of 300 inner-city youths to Green Bay to watch a Packers scrimmage, and to eat lunch with the team.

"I don't know how many of these young people were touched by that occassion," he continues, "but I do know that there was inspiration all over the place. That is what this community needs, and that is what the Brewers have given to this town. They have created a spirit, and I hope that that spirit will continue to give this community a lift."

Later, Bud Selig, the president and chief owner of the Brewers, is introduced, and he recalls the season in these words: "There are things that do stand out. That last Sunday in Baltimore, where I said to myself, now I know how the captain of the *Titanic* felt. . . . Don Sutton walking in from the bullpen saying, 'We'll be all right; we'll be all right'; Gorman (Thomas) and Charlie (Moore) nodding each inning after they came in, 'We're going to be all right' . . . and we were. Then, coming back from Anaheim 0-2 . . . that tremendous, tremendous weekend captured by the moment that I don't think I'll ever forget: Peter Ladd pitching to Rod Carew . . . ground ball to Robin (Yount) . . . and the throw, and all of a sudden all those years were well worthwhile.

"I guess the thing that pleases me the most about the whole thing was what it did to Ben Barkin and me, and the fans who were sitting in that stadium. To be a part of that, to watch all that joy and happiness in a world that hasn't had very much joy and happiness lately, was more of a thrill than a hundred people could live through in a lifetime. I've never had that kind of thrill."

The rest of the evening continues with the giving of awards to those members of the organization who have earned them. What is remarkable about this organization is that in nearly every single case the recipient of the award refuses to accept the honor without first acknowledging the other members of the team, the coaching staff, the management and owners, and frequently the city itself. None of this acknowledging is done with the false piety sometimes found in sports organizations, which is characterized by the honored person throwing ritual encom'ums upon anyone tangentially connected with the achievement. At this gathering, it is evident that the speakers truly recognize the help and support of those they are acknowledging.

Pete Vuckovich, the AL Cy Young Award winner, is given the Brewers' most valuable pitcher award, and he thanks Selig and general manager Harry Dalton for bringing him over from the National League, then he thanks the city for its support.

Dalton, given the Sporting News Executive of the Year award, insists it is an organizational award, not an individual award, and accepts it only on behalf of the organization.

Yount, given the Sporting News major league MVP award, says, "It's hard to accept things like this; this isn't just for me," and then thanks his teammates and the city.

Kuenn, given the AP and UPI Manager of the Year award, says that managers don't win pennants; the players do.

And finally Robin Yount again, receiving the AL MVP award says, "I'd like to thank Bud Selig for being such a great man, and a nice man, who doesn't treat his players like merchandise; he treats us like people. It's a good feeling to know that your owner, your boss, really cares about you. I'd like to thank Harry Dalton for putting together such a great group of guys—not just great players, but great people. I'd like to thank the players, the coaches, Harvey Kuenn, and, believe it or not, I'd like to thank (former manager) Buck Rodgers, and most of all I'd like to thank you. Rock on, Milwaukee!"

After this, the townspeople at the dinner, give Robin Yount a 30-second standing ovation, his third of the night, and let him know that his sentiments are heartily reciprocated.

Harry Dalton sums it all up later: "There has to be a willingness on the part of the player to subordinate himself to the best interest of the ball club, and it's often the case in sports that they don't always do that. What made this team a unique group of people was that the leaders on the club were the people who were most willing to do that, and they set a good example for the whole team."

The next day, president Bud Selig tries to describe the spirit in Milwaukee last October. Selig is an extraordinarily intense man of 48 who paces and agonizes at every Brewers game, smoking an endless succession of tipped cigars—Ben Barkin would later describe the eleven cigar butts smashed into the ground around Selig's seat during the last game of the season against Baltimore, an indication of the relative importance of that game to him.

Selig is thoughtful and concentrated, but even he falters at times in trying to describe the charged atmosphere of the previous fall, for the sheer wonder of it.

"There's something about baseball," he begins, "that is really just so unique and so marvelous that it's almost hard to articulate. It brings out the emotions that I described at the dinner last night: love . . . and drama . . . and, for sure, excitement.

"The night of October 10 here, after we won the pennant . . . . It was really—it was marvelous. It was one of life's great moments, no question about that. And you can't really fully comprehend it yourself, you're so deeply involved.

"And then two weeks later at the parade. It wasn't until the end of the parade that I began to realize what that spirit had done. I always knew in my heart, and had said it a thousand times; but, you know, you can say a thing a thousand times, but until you see it for yourself . . . .

"I remember the trip up Wisconsin Avenue," Selig continues. "We had lost the seventh game of the World Series the night before, and I was feeling so low and so down, and I said to my wife, 'I don't understand why we're having a parade today, when we're not the winners.' And she said, 'Well, you're the only one in town who feels that way.' And I said, 'No, I don't think so.'

"And then when the cars pulled out and went down Wisconsin Avenue, I was a little nervous to see what it was going to be like, and I could tell immediately when we pulled out of the First Wisconsin garage that it was going to be big—but then! I saw those people crying and waving, and office buildings—thousands of people hanging out of the windows—a mass of humanity—you couldn't even move. The cars finally had to stop; they had to close the downtown off. It was unbelievable . . . . It was an immense crowd of people crying, and everybody in all our cars in our motorcade were just—you can't describe it.

"And then when we got out here (to County Stadium), another big crowd of people was waiting: we rode in, and Pete Vuckovich got up, feeling very badly about the seventh game of the World Series—he hadn't won, although he wasn't involved in the decision—and he tried to tell the crowd how terrible he felt; he'd let them down; he'd let the state down. And they started chanting, "It just doesn't matter; it just doesn't matter,' and they drowned him out. I just sat there, and I watched it, and I remember looking over to Cecil Cooper, and he looked at me, and we were just overwhelmed . . . we looked down. . . . We just didn't know what to say. We just came in after that and sat down just like this for an hour. It was a very powerful experience, a marvelous, wonderful experience."

Selig looks away and shakes his head, still unable to fathom completely that outpouring of spirit.

"I had friends of mine in baseball who were here," he continues, "other owners who came for the World Series, and they saw—Bob Lurie of the Giants stood in my box and just shook his head, and said, "This is unbelievable. This is just unbelievable."

"And it was! You can't orchestrate that kind of stuff; a lot of sports teams try to market things, and market that kind of cheerleading, and you just can't do that: It's phony. It comes from the heart, and that kind of thing comes from the chemistry between the organization and its fans, and that has to be very nurtured and very natural. If it isn't natural, you're in trouble.

"You know," he goes on, "baseball—and sports, all sports—have a great opportunity to make a very positive contribution to society, so now in these economically hard times, the people of our city—amidst a terrible economic recession, that has created a sociological depression as well—the same people that had no hope, nothing ever to look forward to—all of a sudden this baseball team becomes their team, is their team. They have hope, they have faith, they have something to look forward to; they win, they improve. It just uplifted people. It was amazing. I've got letters—I could read them to you—that are absolutely beautiful, just gorgeous.

"A man stopped me at a drive-in I usually go to for lunch—people have been stopping me all year—and he said he just had to tell me what happened with his son. He had a 15-year-old son. He said, 'I've had a lot of trouble with my son'—which is not unusual in this day and age—'and I'd gotten tickets to the fifth game of the playoffs, and what a game!' And he said, 'When it was over, we didn't want to leave the ballpark, and we drove down Wisconsin Avenue, and we didn't really want to go home, we were so excited. And my son said something to me on the way home that he had never said to me before, and that he may never say to me again. He said, "Dad, I've enjoyed spending the day with you, and I love you very much,"' And the guy said to me, 'Can you imagine how I will always view the Brewers in everything after this? I slept better that night; I can't tell you what all this meant to me.'

"Well, that's what we have the capacity to do, if we will do it," Selig continues, "and one has to try to understand all that. You normally would not expect a baseball team to do that much for people, but that's what this thing is all about. People don't seem to understand that sometimes, especially people in sports, where they should know it: the charm of our game, the magnitude of our game, is its relationship with young people, with middle-aged people, with older people. And so the more you can build it into their lives, in every way, that's the objective of all this."

Selig pauses to unwrap one of his cigars, which sit stacked in boxes on a bookcase behind his desk. Lighting it, he leans back in his chair, searching for the definitive summary of all that he has said.

"I always try to do what I think in my mind is the—quote, unquote—'right thing' to do," he reflects. "And you build a reputation, and the organization builds a reputation, on decency, and on doing the right thing, and certainly on compassion and sensitivity; they are all very, very important. You can win with decency, you know; you don't have to be a bad human being to win. Leo Durocher was wrong; nice guys do not finish last. And I think that's a bromide in sports that's kicked around, and it's absolutely fallacious.

"And so to see here such unbridled joy and happiness, you knew then that what you had done and what you were doing was really very right, and when I said last night that the Brewers team represented a remarkable triumph of decency, that's what it was about."

Selig's idealism has not only inspired the community, it has also earned him recognition nationally. In 1978 he was named Major League Executive of the Year by United Press International and in 1981 he was named International B'nai B'rith Sportsman of the Year. This year he was named Sports Man of the Year by the U.S. Olympic Committee, which specifically cited his contributions to Milwaukee-area youth, contributions that go back to the days before the Brewers came to Milwaukee, when Selig, Barkin and Willie Davis organized Athletes for Youth.

To understand the complete story of Athletes for Youth, to get a sense of what it has done for the teenagers of Milwaukee's inner city, you really need to take a trip into the heart of that area with Barkin, to a modest delicatessen called Jake's Deli, located at North 17th and west North Avenue. Jakes' Deli is co-owned by Barkin and Selig, and, while it is not even known to many of the people in Milwaukee, it has long been the purveyor of corned beef, pastrami and hot dogs to such people as Leonard Bernstein, Mitch Miller and Henry Winkler, the Fonz of television's "Happy Days" who has declared the hot dogs to be the finest in America.

But the most singular fact about Jake's Deli is that it is the only commercial establishment in the area that has not been robbed, because the innercity residents know when someone is on their side. They are the beneficiaries of the Athletes for Youth programs, and some of them work at the deli itself. Barkin's secretary, Roberta Waite, has even said that if she is out running an errand for him in his car, and if that errand involves picking up some food for someone at Jake's Deli, the very appearance of Barkin's car in that neighborhood will evoke smiles and waves from casual passers-by.

As Barkin, a warm and engaging man in his 60s, tells it, "It sounds corny, and it's a cliché, but life is short. My mother once taught me something which is true. She said, "To be decent has to come as natural as breathing; if you're going to be devious you have to plot and plan. So it's much easier just to be decent and live a normal kind of life."

Barkin's training in decency came while growing up as a boy two blocks from Jake's. His parents would always solicit contributions from neighbors for anyone in the neighborhood that was sick, and Ben would be the one who would bring it over to the house of the ailing neighbor. All through grade school, when coming home for lunch, he would stop and get a blind man, and lead him to the Barkins' house, where Mrs. Barkin would feed him lunch. Ben would then return the man to his home on his way back to school.

Currently Barkin is chairman of the board and chief executive officer of the largest public relations firm in Wisconsin, a firm that he founded, and he had been honored in that capacity by the results of a poll of 100 newspaper editors, which selected him as the public relations person they most enjoyed working with, on the basis of integrity.

The convergence of the moral intentions of Barkin, Selig and the Brewers is largely represented by the Athletes for Youth program, which has created ever-widening ripples of good will throughout the area. At the day-to-day level this manifests itself in gestures as simple as the Milwaukee police force carrying Brewers baseball cards with them to give away to inner-city children. The cards bear a likeness of a player on one side and a moral exhortation on the other.

"It's great for the community," Barkin says in describing the baseball card distribution. "But that doesn't mean that that's the only thing that a person has to do to create community relations, but it's good in that you're reaching kids who have enthusiasm about something."

Beyond simple gestures like this one come the efforts of the professional athletes themselves. "It's like if I ask Cecil Cooper and his wife, Octavia, or Larry Hisle and his wife, Sheila, to help me in the Inner City Arts Council," Barkin goes on, "they're happy to do it, and not only do they help, they contribute dollars; and, if there's an event where we have to sell tickets, they'll sell tickets."

The spirit of AFY has also extended itself beyond the efforts of its founders. Selig came to work one day to find a group of young people being given a tour of the stadium by Jim Rice of the Boston Red Sox and Cecil Cooper. It was an effort spontaneously generated by the two ball players.

Willie Davis, one of the AFY cofounders, has extended the principles of the organization to other projects in the black community, and he is now enlisting other professional players in the hope of organizing some kind of program that will provide ongoing careers after sports for athletes currently playing at the professional level.

Barkin sums the spirit up perhaps best of all: "You know, to be part of something where you can express yourself and find joy in what you're doing, or make things a little easier or better for someone else is really selfish, because it makes you feel good."

So the circle grows. The Milwaukee Brewers began as a cause to bring baseball back to the city after the defection of the Braves to Atlanta, and out of that cause came a pennant, and out of that has come an ethic around which the entire city have rallied. The Milwaukee Brewers have proved to be an irresistible force in the community as well as in the major leagues, and, as concert pianist Eugene Istomin said, coming late to his engagement with the Milwaukee Symphony so that he could attend the team's Celebrity Reception, "Who can say no to the Milwaukee Brewers?"●

TRIBUTE TO MARY DOWNING

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. BERMAN. Mr. Speaker, I would like to take this opportunity to congratulate Mary Downing, outgoing president of the Panorama City/Sepulveda Chamber of Commerce, on completing 2 outstanding years of service to our community.

Mary Downing has been an active member of the Panorama City/Sepulveda Chamber of Commerce since its inception, and, prior to that, with the Panorama City Chamber of Commerce. She was one of its founding members, participating in the combining of the two separate chambers. She

has served as a director, treasurer, and, most recently, she has served two terms as president.

She is a leader in the business community as well, having been with the savings and loan industry since 1970. Mary Downing is currently the vice president and manager of the Panorama City Central Federal Savings & Loan.

Mary Downing is also active in other community groups, serving as a member of the Soroptimists of the San Fernando Valley, the San Fernando Valley Fraud Group, and the Mid-Valley Community Police Council.

I am pleased to be able to commend Mary Downing for her efforts, and wish her the best of luck in the future. Her contributions to our community are something to be proud of, and I am sure that she will continue to give us the benefits of her talents and skills in the years to come.●

CROSS FLORIDA BARGE CANAL

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. BENNETT. Mr. Speaker, on May 11, the CONGRESSIONAL RECORD contained a letter from Florida's Attorney General Jim Smith about the Cross Florida Barge Canal. In reply to a similar letter from Mr. Smith I wrote him as follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., May 9, 1983.

Hon. JIM SMITH,
Attorney General, State of Florida, The Capitol, Tallahassee, Fla.

DEAR JIM: Thank you for your May 3 letter. The Chief of Engineers' report to the Secretary of the Army dated February 24, 1977, said of the Canal that the "adverse environmental impacts are not so severe as to demand a decision against completion of the Canal if it were economically justified by an ample margin." The Corps found the economic justification marginal; and the report then stated "when the marginal economic justification is combined with adverse environmental impacts, the combined total effect does not favor completion." Congress has recently approved an update on the economic aspects of the Canal, as you know, I presume.

Your letter indicates that former owners are litigating their claims for a return of their lands in the Canal route on the theory that the taking of their lands was for a purpose now abandoned. Your letter also indicates that some of this land is environmentally sensitive; and that success by the former owners would also thwart recreational uses.

In view of these circumstances it would appear to me that Congress should not now deauthorize the Canal because:

(1) the economic study authorized by Congress shows that the project is not rejected by Congress, and

(2) deauthorization would apparently give the former owners the proof they need that the project has been rejected by Congress and thus endanger the ecological and recreational values you mention.

Although I have not briefed the law on the subject, my guess is that taking land for a specified objective like building a canal cannot be the basis for holding this land for other purposes; so it seems to me that Federal or State legislation on this subject cannot accomplish an assertion to public holding of these lands for an objective not in the original taking: at least that is how it looks to me.

I sincerely hope the deauthorization legislation is therefore not rushed into enactment pending a complete analysis of what this may in fact do.

With kindest regards, I am

Sincerely,

CHARLES E. BENNETT.●

WISDOM OF THE PEOPLE

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Ms. KAPTUR. Mr. Speaker, there have been a great many eloquent words spoken on this floor regarding the issue of U.S. involvement in Central America, but, I believe, few are more meaningful than those that come from the American people themselves. I would like to share with my colleagues excerpts from a few of the many letters which I have received in response to the President's recent speech on Central America. These words from my constituents are representative of the mail I have been receiving on this issue, whether it be from students or laborers, mothers with young children or senior citizens. The wisdom of the people should be considered as we debate the future role of our Government in Central America.

Excerpts from my constituent letters follow:

"It seems to me that Senator Dodd made more sense in his rebuttal than did President Reagan in his speech. We too feel that the equivalent of money asked for arms, sent instead to bolster their economy, could provide jobs, food, shelter and clothing, and could in the long run change the terrible situation. What possible outcome can heightening the slaugher have but increasing the hatred of everyone to everyone else, and especially to us, the USA. We are getting caught again in a no win and cruel situation. Please help keep our country from making that mistake."

—

"I remember several years ago when the American people were told that 'Military advisers' were being sent to Viet Nam. What followed was one of the most tragic times in recent history. I see history repeating itself in Central America and it angers and frightens me.

"Our children deserve a productive future, one of hope and peace, not one that has had the life drained out of it by an inflated military budget that promises only destruction, with no thought for quality of life."

—

"Sometimes I think the United States is throwing buckets of gasoline on brushfires. Please keep pushing for non-war solutions. Ambassadors, anyone with the knowledge to help these factions reunite, are whom we should be sending, not money, not artillery nor our cooperation in any way with their war effort. I would like the world community to see the U.S. as an intelligent country whose goal is world peace. Can we ever act this way? The President's idea that war makes peace is at too terrible an expense."

—

The reason for my letter is Central America and specifically El Salvador. I am an avid reader and it is my belief that much of what is happening in that area can be traced back to the years of American "imperialism." In other words when the Marines were used as a punitive force to back up the giant United Fruit Company, the so called "banana wars." People do not forget injustice and are distrustful of our policy of so called "democracy" enforced by escalating military power.

But the most telling argument against President Reagan's policy is the fact that after four years nothing has been done about the brutal and repulsive gang rape and murder of three nuns and a lay person whose only crime was following the Gospel as they knew it . . . Until such time as these savage and barbarous deeds have been accounted for, I for one will not believe in the sincerity of the President and his program in this area."

—

"I am becoming very disturbed by the situation developing in Nicaragua. Our government is interfering in a fragile situation that can only add to the instability in the area and make enemies for us, perhaps ultimately pushing governments in the very direction we proclaim to be fighting against. The Sandanista government has sponsored programs such as literacy training, health and nutrition . . . They admit to having made mistakes, but need some support and credit for what they have done for the benefit of their people rather than our condemnation . . . Once again, we appear to be on the side of dictators and business interests rather than the side of hungry people. Our involvement in Central America over and over again is destructive and destabilizing."

—

"When you start talking to me about Central America, my feelings come directly from being there when my father was in the banana business. When I hear President Reagan telling us that we are on our way back again, I wonder if he knows where back is. It means back to the 'banana republics'."

—

"Re: Central America I recommend a massive Peace Corps offensive."

—

"You better try to save us rather than save our dictators in El Salvador, Guatemala, and Honduras. Vote this aid down and start helping our people before we have an El Salvador here in this country. Listen to an elderly person. . . . There are no roses growing here and people are not being caught by his safety nets and the Communists are not trying to run up from Central America to get us. These are the people who only want what we once had, Freedom." ●

WILLIAM H. McLAIN, 100TH BIRTHDAY

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. GRAY. Mr. Speaker, I want to take this opportunity to honor and congratulate one of my consitutents, Mr. William H. McLain who on May 24, 1983, will celebrate his 100th birthday.

As is customary at birthday celebrations, Mr. McLain's family, and friends will gather to recognize Mr. McLain for having reached the golden pinnacle of 100 years of age.

Mr. McLain was born on May 24, 1883, in Darlington, Md. It was in Darlington that he was raised and received his education at the Cedars School. Having decided to make Philadelphia his home, he married the late Lucy McLain in 1910. A butler by trade, he worked for various distinguished families, including the Steadmiller family of Philadelphia, Senator and Mrs. Burkes and J. B. McCallom, the former vice president of the Campbell Soup Co. whom he served for 25 years. In 1953, after several years of service with the board of education as a maintenance engineer, Mr. McLain retired. A faithful supporter of the church, he still attends Greater Saint Matthews Methodist Church where the Reverend Edward Nichols is pastor.

Currently a resident of the Saint Ignatius Nursing Home, Mr. McLain still finds the time to engage in something he has always loved; dancing. Mr. Speaker, I understand from a very reliable source that he still does the "tango and can fox-trot with the best of them," as many of the residents and staff at the nursing home will attest to their exhaustion after having danced with him.

Surely, he has been an outstanding citizen of Philadelphia. While he has never boasted an official title, he has earned the respect and admiration of family members and friends. And while one would not consider him a man of great monetary wealth, without a doubt he is rich in the spirit of life and wisdom.

I am sure that thoughout his life he has faced many challenges and setbacks, but because of his wisdom and determination, the true foundation of his life, has remained firmly intact for a century.

Mr. Speaker, please join with me and the many family members and friends of Mr. McLain in wishing him a happy 100th birthday.●

A TRIBUTE TO MR. FRANK J. MATRANGO

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. CONTE. Mr. Speaker, I want to take this opportunity to pay tribute to Frank J. Matrango who has recently completed 14 years as a representative in the Massachusetts State Legislature.

I wish at this time to place into the CONGRESSIONAL RECORD the saga of this outstanding constituent and treasured personal friend who has gained the admiration and respect of all who have had the opportunity to feel the warmth of his sincere personal involvement in helping his fellow man.

In his 14 years in public office, Frank dedicated himself to work for his district and for the entire State. As house chairman of the powerful and prestigious joint legislative committee on education, Frank fought hard for excellence in educational facilities and standards and he would never settle for mediocrity. His insight and commitment were instrumental in achieving progress in educational legislation, in fair and equitable distribution of funds and in setting energetic goals to help keep Massachusetts education in the forefront.

During his years in the State legislature, his years as athletic director of St. Joseph High School, and in all of his endeavors, Frank had more to guide him than intellectual competence. That extra asset has always been conscience—conscience guided by morality and principle, never compromised and never taken lightly. Consequently, the citizens of North Adams, of Berkshire County and of the entire Commonwealth of Massachusetts have received a host of benefits through his career of serving the public.

Frank Matrango has played a critical role in the development of high-quality standards in education—standards which will have important implications on our lives for many years to come. I am sure that my colleagues join with me today in paying tribute to such a distinguished citizen.●

PLIGHT OF YOSEF BEGUN

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. WAXMAN. Mr. Speaker, today I wish to bring to the attention of my distinguished colleagues and my fellow Americans not the plight of 2.5 million Soviet Jews, but the plight of one person—the mathematician and engineer, Yosef Begun.

For 20 years, Dr. Begun was a senior research assistant at the Central Research Institute in Moscow. In 1976 he applied for a visa to emigrate to Israel. Dr. Begun was dismissed from his post and his application was denied. Since then he served two terms in prison and exile for the crime of teaching Hebrew.

Last November 7 he was arrested again and is now held in Vladimir Prison. When he was arrested by Soviet police agents, a substantial quantity of incriminating evidence was confiscated and cataloged. In free countries, the confiscated materials would not even raise an eyebrow. Included in the list of incriminating items taken from Begun's apartment were such well-known publications as "Ninety Minutes in Entebbe" by W. Stevenson; Howard Fast's best selling novel, "My Glorious Brothers," and the widely used philosophical treatise by M. Diamont, "Jews, God and History."

That is the extent of Dr. Begun's criminal career. His offenses against the Soviet state have all been of a kind. He promoted the study of the Hebrew language. He immersed himself in whatever materials he could obtain on the history, beliefs, and traditions of the Jewish people. He shared his knowledge with others. What the Soviets call treason we call education.

It is impossible to exaggerate the wisdom of the Soviet Government and its intelligence agents. They rightly fear ideas and beliefs as a greater threat to their totalitarian system than mere guns or hand grenades. They have, however, one fatal intellectual failing. As materialists, they equate ideas and beliefs with their material manifestations—books, cassettes, magazines, and typewriters. True, they have confiscated these concrete possessions. However, they have not confiscated the intellectual and spiritual aspects of Yosef Begun's inner life. Even the Nazis could not obliterate the eternal Jewish spirit.

As we review the current circumstances of Yosef Begun and the numerous other refusniks in the Soviet Union, we must bear in mind two salient facts. First, not since the wave of Soviet Jewish emigration began in the early 1970's have Soviet Jews been in such dire straits. Internal repression has increased sharply; freedom of emigration has come to a near standstill.

The second point of which we must never lose sight is that the fate of Soviet Jewry is in the hands of those of us who live in freedom. Soviet Jews cannot hope to overcome their tyrannical masters with their own dwindling resources. All depends on the support we provide them and on the very substantial leverage we in the West exert on the Soviet leadership.

We must persist in fulfillment of the ancient Jewish Torah law of "Pidyon-Shivuyim" which holds each individual and each community responsible for the ransoming of captives. We must act swiftly before the Soviet Union is engulfed in a wave of anti-Semitic show trials reminiscent of the Stalin era.

Yosef Begun is 50 years old. He is a mathematician. He has harmed no one. Yet he is branded a criminal. This persecution by Soviet authorities of a man whose activites do not threaten them or their power is bizarre. If the Soviet Government truly believes that Yosef Begun's ideas are a danger to them, they should allow him to leave—let him be exiled to a foreign country—and not keep him in prison.●

HONORING NORWALK-LA MIRADA UNIFIED SCHOOL DISTRICT EMPLOYEES

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. TORRES. Mr. Speaker, today at a special reception, the Norwalk-La Mirada School District will be honoring 13 people who have served the district as loyal employees for 30 and 35 years.

These fine and dedicated people will be honored for their outstanding public service. After serving so many years with much distinction, these admirable people will be honored by their peers, their school district, and their communities.

It is with great honor and pride that I rise to recognize them on the floor of the U.S. House of Representatives.

Education is an extremely important subject to me. The people who educate and tend to the needs of our young are very special. As we commend these individuals, let us also commend all those who serve in our educational system.

I would like to point out that these employees have served in one of the finest school districts in the country. The Norwalk-La Mirada School District has an outstanding record of high educational quality.

Mr. Speaker, I ask my fellow colleagues of the House to extend best wishes and heartiest congratulations to the following honored persons who have added so much to enhance this fine school district and the youth of our country.

Evelyn T. Farquharson, La Pluma Elementary School, teacher; Jean Haygood, Eastwood Elementary School, teacher; Donald R. Downs, Foster Road Elementary School, teacher; Eldon Edwards, La Pluma Elementary School, teacher; Priscilla J. Kadelbach, Nuffer Elementary School, teacher; Lucy E. Kuster, Waite Elementary School, teacher; Ivan Naumann, maintenance, mechanical foreman; Damaris Neel, food services, director; John H. Newman, John Glenn High School, teacher; Wayne M. Petersen, transportation, bus driver; Edward J. Phillips, Foster Road Elementary School, teacher; Melvin Sanford, food services, utility man; Dino R. Tiritilli, Moffitt Elementary School, teacher.●

THE WAR AGAINST CIVIL RIGHTS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. CONYERS. Mr. Speaker, for 20 years through a combination of court-ordered desegregation of public schools, affirmative action policy, civil rights laws, and strong Justice Department enforcement, educational and employment opportunities for black Americans advanced. In the past 2 years alone, however, 20 years of civil rights progress is unraveling. Economic decay, along with the far-reaching reverse redistributive policies of the Reagan administration, have set back the social and economic status of black citizens for years to come.

The Reagan administration's gathering campaign against affirmative action is yet another phase in the administration's longstanding effort to undo the redistributive and civil rights policies that have existed since the sixties.

Two weeks ago, the head of the Civil Rights Division officially confirmed the thrust of administration policy: There no longer will be efforts to promote civil rights laws, policies, and court settlements; instead, the Justice Department's considerable resources will be placed at the service of undoing the very fabric of civil rights. I have waited for a critical analysis of the new policy, and finally have found it. Writing in the Hartford Courant, (May 1, 1983), former Assistant Attorney General for Civil Rights, Drew S. Days III, provides the best analysis of the administration's assault on civil rights laws that I have seen. He served for 4 years as the head of the Carter administration's Civil Rights Division and is professor of law at Yale University. I offer to my colleagues Mr. Days' analysis:

[From the Hartford Courant, May 1, 1983]

THE WAR AGAINST CIVIL RIGHTS

(By Drew Days III)

No matter how you slice it, that's just plain baloney," says President Reagan to critics of his civil rights record. And Larry Speakes, his media spokesman, found the courage recently to declare that the Reagan Administration's "rights record was stronger than any other administration." Nothing could be further from the truth. I am writing to set the record straight: For more than two years, the Reagan Administration has been attempting to wipe out civil rights gains that took two generations to achieve.

I realize I run a risk of not being taken seriously on this topic. I probably have three strikes against me before I start.

First, I am a Carter Democrat. For four years, I was Assistant Attorney General for Civil Rights, the nation's chief enforcer of laws that forbid discrimination. People are accustomed to discounting criticism of those in power by those out of power. It's called "partisan sniping."

Second, I am a black man. I sense that white Americans often view black opposition to the Reagan Administration as a sort of knee-jerk reaction; that we criticize Reagan Administration cuts in programs that treat blacks—some would claim—more favorably than others, regardless of whatever objective reasons might justify them. Blacks, the view goes, are "special pleaders" unwilling to accept equal treatment along with everyone else.

And third, I teach at Yale Law School. It is sometimes charged that professors here have their heads in the clouds and confuse what the law is with what the law ought to be. I don't agree with that assessment. And even though two of my colleagues were recently appointed federal judges by President Reagan, the law school is also considered a hotbed of liberal legal thought. Some readers, consequently, will want to relegate what I have to say to the realm of theory.

But these "handicaps" don't apply, in the end. This is not a partisan matter.

During my last days in office, I was asked frequently by reporters whether I thought Ronald Reagan's campaign rhetoric meant that his administration would attempt to sabotage civil rights. Although I had my fears, I truly thought the new president and his appointees would find, like others before them, that there is a big difference between running a campaign and running the country. Once in office, you simply can't do everything you want to do: You have to obey the rules. Other government officials have found that whatever their original intentions, their oath to obey the law, among other things, limited their plans. In no federal agency has this been truer than at the Department of Justice. New arrivals quickly learned they couldn't wantonly renounce legal positions taken by their predecessors—these positions were spelled out in congressional statutes, or embodied in opinions rendered by judges.

When I got to the Justice Department and settled into an office once used by J. Edgar Hoover—it was in a 1930s, Depression-era building, with high ceilings, wood paneling, a fireplace and a view of the Capitol—it became clear to me, as I hung a picture of Frederick Douglass on the wall, that I had stepped into a tradition, that I had to adhere to some positions taken by prior administrations even though I disagreed with them. Of course, I was committed to making changes that I thought would advance the course of civil rights, but I understood that progress would be slow and painful.

One bit of progress, for instance, protection for minority contractors who wanted to participate in federal projects, took 30 lawsuits, two years, and talk—hours of talk, lawyers sitting around, their suit jackets off, cigarette smoke in the air, trying, simply, to figure out what to do. And I prided myself on keeping meetings short; lawyers, I thought, talk best in court, not in meetings.

People got headaches; I went home at midnight. It was hard, slow work, although we finally got to the Supreme Court and saved the program.

But I now realize, after two years of careful observation, how greatly I underestimated the Reagan Administration's ability to perform the unthinkable, and quickly. It isn't just the day-to-day destruction of civil rights work that we labored over. Unfortunately, the current assault threatens far more than that. What is threatened is a consensus on civil rights that was forged during the last term of Franklin Roosevelt and since has been adhered to by every administration, Democratic or Republican. Even Richard Nixon understood the rules.

But look what the Reagan Administration has done, in the face of law and commonsense.

It has opposed even voluntary desegregation.

The school boards of Seattle, Tacoma, and Pasco, Washington, for instance, came up with their own desegregation schemes in 1978, without any court orders or administrative rulings telling them to do so. They just felt it was the proper thing to do.

Several citizens then challenged this effort and a state law was passed that barred further voluntary desegregation in those cities. When the school districts went to court to overturn the law, the federal government (under the Carter Administration) supported them. But when the case came to the United States Supreme Court last year, the Reagan Administration took the other side—in an unprecedented move, it argued in favor of a law that a restricted a voluntary attempt to desegregate local schools.

The Supreme Court was unimpressed by the Administration's arguments (which claimed that state control superseded local autonomy) and held the law unconstitutional. However, this confrontation taught a painful lesson. While desegregation can theoretically still succeed, the front lines in civil rights battles have been manned in recent years by federal officials working shoulder-to-shoulder with private civil rights organizations. Subsequent efforts are apt to be demoralized when half the team suddenly switches to the other side.

And, in fact, the opposition doesn't stop there. The Reagan Administration has undertaken more sweeping and concrete reforms. For instance:

The Reagan Administration has categorically rejected busing.

In October 1981, William Bradford Reynolds, my successor (although that word bothers me), told the Senate: "Compulsory busing of students to achieve racial balance is not an acceptable remedy." In different words and places, that message has been echoed repeatedly.

But rejecting busing is like categorically rejecting prescription drugs.

The fact is, when properly used in the appropriate circumstances, busing works.

Hillsborough County, Florida, where I attended a segregated school many years ago, was completely desegregated through busing in 1971, and remains comfortably desegregated today. One can point to literally hundreds of other communities where busing has worked. In many places, busing simply means turning left instead of right, since the students, to get to their desegregated schools, travel the same distance (or less) than they formerly traveled to segregated schools.

But most disturbing is that the courts have established careful and elaborate rules on busing which the Reagan approach treats as irrelevant. Under these standards, designed to prevent "abuses," busing is frequently limited depending upon the distances that must be traveled, the ages of the students, the locations of the nearest schools, and the levels of existing segregation. And busing for desegregation is limited in scope in any case: In 1980, over 97 percent of school busing was for purposes having nothing to do with desegregation. Conversely, when the rules are met, the U.S. Supreme Court has said that busing must be used where necessary to integrate a segregated school system. If administration officials refuse to pursue busing under any circumstances, they are in effect, breaking the law—and certainly hurting the opportunities of young, minority Americans.

Since Reagan took office the Justice Department has not sought a busing remedy in a single community in the United States.

The Reagan Administration has pushed the initiative for desegregation back onto the shoulders of the oppressed.

It has been recognized for years—and after painful experience—that school districts, once shown to be segregated, must bear the responsibility for correcting the problem. The Supreme Court has said so. For a while, in the 50's, the courts placed the entire burden for desegregation on the backs of black parents, children, and teachers. All school boards had to do was remove the "barriers" to formerly all-white schools and they had done their job.

Obviously, this approach didn't work. Only the most courageous or foolhardy black children opted to "integrate" on their own. Remember that it finally took a presidential order and federal troops to get nine blacks students safely enrolled in a white high school in Little Rock, Ark., in 1957.

But consider this return to the past: Reynolds, Reagan's assistant attorney general for civil rights, has stated that the federal government's responsibility is only "to insist on the removal of all official impediments to desegregation" by school officials. Lest there be any doubt about his meaning, he added that he doesn't think "the government can compel an integrated education."

"We are not going to compel children who do not want to choose to have an integrated education to have one," Reynolds actually said. What the Reagan officials propose to do, in essence, is to ignore the rulings of the Supreme Court and to force the downtrodden victims of school segregation to fight their own battles, to walk into largely white schools on their own initiative. And if the Justice Department isn't eager to help them, these students, as history has shown, face bleak chances of success.

In fact, Reynolds' comments sound almost like the "separate but equal" doctrine that was discredited by the Court in 1954, in Brown v. Board of Education. Reynolds has said his focus will be upon "remedying substantial disparities in the tangible components of education" between minority schools and schools attended mostly by whites.

The Reagan Administration has sided with school districts that have long histories of segregation.

Recently, the Reagan Justice Department took the unusual step of urging the Supreme Court to hear a challenge filed by the school board of Nashville, Tennessee, to a court desegregation order. Normally, the government doesn't take a position on a case until the Supreme Court agrees to review it. More surprising still was that in this case the Justice Department joined forces with a school board that had not begun any sort of desegregation plan until 1971, and had failed by 1979 to make any substantial progresss with it. The Supreme Court rejected the pleas of the Nashville board and the Reaganites in a terse, two-line order in which not one justice dissented.

The Justice Department also joined the school board of East Baton Rouge Parish, Louisiana, in a challenge to a desegregation plan ordered into effect three years ago. It was the first comprehensive desegregation plan ever instituted there. The Reagan Administration argued in favor of a "voluntary" plan that would have, by its own calculations, increased the number of schools dominated by 80 percent or more of one race from the current 15 to as many as 37. As a result, children in more than a third of the district's schools would be in essentially segregated facilities—hardly civil rights "progress." Ironically, the challenge fell apart when the Reagan plan was rejected by the school board itself, which said it would be more expensive than the plan currently in effect.

In a roundabout way, funds for desegregation under the Reagan Administration have fallen drastically.

Until July of last year, local school districts received desegration money directly from the federal government. Desegregation funds are now part of block grants given to state education agencies for distribution to local schools. The block grant money isn't earmarked for desegregation—it can be used in any of 28 separate programs. The result has been devastating. Consider the impact this approach has had upon the following cities:

In 1981-82, Milwaukee received $6.9 million for desegregation; in 1982-83, it received $1.8 million. In Seattle the figure fell from $3.9 million to $731,000; in St. Louis, it dropped from $4.7 million to $500,000; in New York, from $6.2 million to $9,000; and Buffalo, from $7 million to $1 million.

Undoubtedly, the administration's response to this dire situation is to say that the states, not the federal government, decided on the cuts. But on the other hand, education grants in general fell from $538 million to $484 million under the block grant program—and history has shown, moreover, that desegregation works best when the federal government leads the way.

Reagan officials oppose the use of hiring quotas and timetables as methods for fighting employment discrimination.

What this means is that no matter how obvious, how long-standing, or how widespread job discrimination might be within a company, the Reagan Department of Justice will avoid using the method that works best to eliminate it. Experience has shown that in difficult cases, quotas and timetables are virutally the only effective way to help minorities and women to gain jobs and promotions. Nonetheless, a year and a half ago Reynolds told Congress, "We no longer will insist upon or in any respect support the use of quotas or any other numerical or statistical formula(s)" in fighting employment discrimination.

It's not that the courts apply quotas lightly or carelessly. Normally quotas and timetables are ordered only after other methods have failed and offenders have proved themselves to be particularly stubborn. Take the Mississippi State Police, for example. In the early '70s, this organization was found guilty of racial discrimination in

employment. To put it bluntly, the state police had never hired a black state trooper in the entire history of the department. It was only several years later, however, after the state police had still failed to hire a black trooper, that judges in the Federal Court of Appeals in New Orleans reluctantly ordered that one black be hired for every two whites.

Strong tactics, perhaps, but occasionally they're needed. And it's interesting to note that while the Reagan Administration piously opposes these measures, the idea originated not in some bleeding-heart-liberal caucus but in the Department of Labor during the Nixon Administration. Even that conservative crowd was forced to conclude, after bitter experience, that certain employers would never make changes in their workforces if they were only required to show "best efforts" and "good faith" in hiring minorities and women.

The Reagan Administration has opposed even voluntary plans to remedy job discrimination.

In 1979 the Supreme Court ruled, in *United Steelworkers* v. *Weber*, that labor and management could legally agreed to establish a voluntary employee training program that set aside half its openings for blacks. The court said that "reverse discrimination" was not involved, since the program did not require the discharge of white workers and their replacement by blacks, nor did it create an absolute bar to the advancement of white workers (since there were openings in the program for whites), nor was it a permanent project, but only a temporary effort to correct previous discrimination. It was a triumph that we in Carter's Justice Department worked hard to achieve.

However, Reynolds has vowed to overturn *Weber*. "My own view is that *Weber* is wrongly decided and the court should take another look at it," he has said. "I would be hopeful that it would arrive at a different conclusion."

Recently Reynolds made good on this promise by joining a lawsuit that challenges an agreement reached between the City of New Orleans and black officers in the New Orleans Police Department. The black officers had filed a discrimination suit against the police, and the voluntary settlement required promotion to officer grades of one black for every white until black officers constituted 50 percent of all ranks in the police department. In considering the case, a federal court in New Orleans found that the quota was justified. Only 3 percent of the police department's sergeants and lieutenants were black, and no blacks served as captain or major, all in a city which is 55 percent black, and where 48 percent of black applicants to the police department pass the examination and qualify for appointment.

Onto this stage now comes the Reagan Justice Department, seeking to have the federal court of appeals reverse itself on the one-black-for-one-white quota. Though the appeals court pointed out that a non-discriminatory promotion policy in the police department would have produced a situation in 1980 in which about 50 percent of police officers were black, the Justice Department is arguing, contrary to the voluntary agreement, that this figure is too high in 1983.

The Reagan Administration's position in the New Orleans case is not only dismaying for obvious reasons, but also because it threatens a basic pillar of the 1964 Civil Rights Act. Put bluntly, it ignores the law. The Civil Rights act stresses the importance of voluntary resolutions to employment discrimination suits.

Put simply, if you prohibit employers from trying to resolve discrimination on their own, you place them in a very tough position. If they fail to act on discrimination compliants, they run the risk of being successfully sued by minorities and women for employment discrimination. If that happens, the federal courts, not they, will decide on the remedy to be imposed. But if employers act voluntarily—the Reagan Administration seems to be saying—then they deserve to be sued by white or male workers who charge "reverse discrimination." It is precisely this dilemma that the Civil Rights Act and the standards outlined in Weber are aimed at preventing.

The Reagan Justice Department seems inclined to "chill" inclinations toward affirmative action among employers.

The Wall Street Journal reported last year that the administration's negative stance on affirmative action was wreaking havoc in some of America's major corporations, where efforts to increase the participation of minorities and women had been making great strides.

According to the Journal, some of the Reagan Administration's "actions and rhetoric are taken by middle managers as a signal that they no longer need to be concerned about corporate affirmative action efforts." As a consequence, the article reported, "inceasingly, corporations are convening special meetings to warn managers that equal-employment laws haven't changed, that companies remain liable to lawsuits, and that their corporate equal-employment programs are still in force."

While it is laudable that some leading members of the Fortune 500 are continuing to insist that these laws be respected, one has to wonder how long they can hold out given the current lack of support—and even opposition to voluntary efforts—from the federal government.

And what is particularly disturbing is that affirmative action is so vulnerable to momentum: It has taken years of effort to instill a basic, voluntary spirit of cooperation in corporate America. Once that is lost, it is hard to predict how many years will be required to rebuild what this Administration is destroying.

Reagan officials gave noteworthy nonsupport to the extension of the Voting Rights Act.

Congress passed the extension last year, but it wasn't easy. The general pattern is for the White House to provide leadership on these topics, yet for over a year, despite repeated requests from the House of Representatives administration officials declined to express any opinion on the extension. In October, 1981, the House passed an extension by a vote of 389 to 24. It wasn't until January 5, 1982, after the Senate began to entertain the matter, that the attorney general and other Justice Department officials agreed to speak up.

Basically, they offered two proposals that would have substantially weakened the Voting Rights Act. The first would have made it considerably easier for states with past histories of discrimination in their election practices to avoid federal review of any new election laws they passed. The second would have prevented Congress from giving minorities a fairer chance to challenge at-large local election systems—systems sometimes used to keep minority candidates from achieving office, despite large minority populations.

President Reagan, Attorney General William French Smith, and Assistant Attorney General Reynolds argued that this revision of the Voting Rights Act would result in the elimination of at-large election systems all over the country, whether they were discriminatory or not. That simply wasn't true.

A stalemate developed that lasted six months. Only after a group of Republican senators, led by Robert Dole, abandoned the Reagan position as absolutely unfounded, did the Voting Rights Act extension make it through the Senate. Then, in a curious about face, Reagan signed the bill and claimed his administration had played a strong and positive role in its passage. However, an administration that takes 18 months to decide where it stands on such a basic and positive theme as voting rights can hardly be said to have its heart in the right place.●

DEFUNDING THE LEFT—FIVE MORE AGENCIES GUTTING THE TAXPAYERS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1983

● Mr. McDONALD. Mr. Speaker, thanks to Conservative Digest, their issue of April 1983, we are finding out at least where some of the money goes that is appropriated by this House.

For the benefit of my colleagues and their constituents who foot the bill, here are five more agencies of the executive branch that have expended some $5,554,007 in causes for which the majority of the American taxpayers would not spend their own money contributing to. Maybe, perhaps, this is the irony of the situation. Organizations such as the Council on Foreign Relations [CFR], Sierra Club, League of Women Voters, cannot get money from the average taxpayer, because the average taxpayer does not believe in what these organizations stand for. Accordingly they have to become a leech off the honest taxpayer to realize aims which are repugnant to the thinking and belief of the average American.

But let others be the judge. Here are five more agencies gutting the taxpayers: National Endowment for the Arts; National Endowment for the Humanities; Environmental Protection Agency; Department of Energy; and Housing and Urban Development. Funding of leftist organizations by these executive agencies as contained in the April 1983 issue of Conservative Digest follows:

[From the Conservative Digest, April 1983]

NATIONAL ENDOWMENT FOR THE ARTS

CHAIRMAN FRANK HODSOLL—REAGAN APPOINTEE

The National Endowment for the Arts (NEA) is notorious for sponsoring dehumanizing projects. It would seem anyone able to fill out the agency's forms gets a grant. Writing in a recent *Policy Review*, Dinesh

D' Sousa uncovered the following taxpayer funded "poem":

Poetry must see as its central task building
a Marxist Leninist
Communist Party
in the USA
So that even in our verse
we wage ideological struggle
over political line.

D'Sousa cited other taxpayer-funded projects too obscene or blasphemous to print.

NEA chairman Frank Hodsoll, was appointed on November 30, 1981. NEA gave out most of the following grants under his tenure.

$76,000 to the National Conference of State Legislatures (NCSL) (May 1982).

Representing NCSL, New Hampshire House Speaker John B. Tucker attacked President Reagan's New Federalism program because "the [budget] cuts far overshadow the process itself."

NCSL president William Passanante, Speaker of the New York Assembly, claimed Reagan administration policies "will compound the human and budget problems facing cities."

$40,000 to the National Council on Aging, Inc. (April 23, 1982).

This group actively opposes budget cuts in programs from which it receives funding. It supports deep cuts in defense spending, singling out "the entire military retirement system"—a program which directly benefits several million aging Americans.

Council President Arthur S. Fleming recently urged government employees to pressure both the Republican and Democratic parties to adopt pro-public employee platforms at their 1984 conventions. "Keep the candidates' feet to the fire," he said.

$8,700 to the Pacifica Foundation/KPFK-FM, a group of 5 radio stations long known as a network for leftist propaganda (Fiscal Year 1982). Pacifica's literature brags about its history: "[1950] Pacifica fearlessly includes communists in its programming . . . [1958] first live broadcast on the gay experience by gays themselves . . . [1965] a reporter for WBAI (a Pacifica station in New York City) is the first U.S. reporter to go to North Vietnam . . . [1965] Pacifica holds the first of many anti-war radio teach-ins . . . [1966] leaders of S.D.S. come to Pacifica to discuss the future of civil rights . . . [1973] George Carlin's controversial *Seven Words You Can't Say on TV* is aired . . ."

$10,000 to the Federation of Southern Cooperatives to "support an instruction program in African and jazz dance, drama and conga rhythms for the residents of Sumter and Green counties" (Fiscal Year 1981).

FSC defines itself as "a resource and advocacy organization working in the rural South."

In its "Annual Report 1980-1981," FSC president and chairperson of the board of directors Woodrow Keown called "the regulation and tax policies of the Reagan Administration" a "menace to our community based development work."

$15,000 to the Sierra Club (Fiscal Year 1981).

Joining 8 other environmental activist groups, the Sierra Club last month attacked President Reagan's "uninformed and uncaring" environmental policies.

Interior Secretary James Watt says these groups attack Reagan because they supported Jimmy Carter in the 1980 elections. "They have had this partisan campaign to help the Democrats," Watt said. "Did you hear the Sierra Club or the Audubon Society Complain about the Carter years?"

$35,000 to the Conservation Foundation, Inc. (May 25, 1982).

Till President Reagan picked him to head the Environmental Protection Agency, William Ruckelshaus was "a trustee of the Conservation Foundation, which [has] criticized Reagan's urban and environmental policies," reported the Washington Post.

National Endowment for the Humanities

Chairman William Bennett—Reagan Appointee

National Endowment for the Humanities (NEH) Chairman William Bennett has attacked some of the agency's most blatantly political grants. An NEH-funded television documentary, "From the Ashes . . . Nicaragua Today," he branded as nothing more than "unabashed socialist-realism propaganda."

Bennett has continued his criticism of NEH grants to leftist groups.

NEH grants include:

$201,558 "To support a two-year project co-sponsored by the Institute for Social Justice and the Association of Community Organizations for Reform Now (ACORN) to mount public humanities programs explaining the history of social movements for low to moderate income people" (February 1, 1981).

ACORN is heavily involved in political advocacy. When a Missouri school was decertified in 1980-81, this "led to increased ACORN involvement in local school board elections. ACORN took control of the board with the election of two more ACORN members," reports *Public Interest Profiles.* "ACORN campaigns generally involve demonstrations, confrontations with industry and government officials, and significant media coverage."

ACORN is understandably upset that its federal funds might be cut. It recently started a local-level campaign "designed to protect provisions in other federal programs which are being block granted or deregulated."

The Institute for Social Justice calls itself "a national training and research center in the principles of community organizing, drawing particularly from the ACORN model of neighborhood-based organizing." The institute trains many ACORN activists.

$600,000 to the National Council of La Raza (NCLR) (November 1981).

In May 1981 NCLR joined the Southern Christian Leadership Conference and Operation PUSH in what they called "a national day of mourning." The demonstrators marched passed the White House, protesting Reagan administration cuts in social programs.

According to Council documents, "NCLR's Office of Research, Advocacy, and Legislation carries out research, public policy analysis, and advocacy at the national level to promote administrative and legislative decisions which will benefit Hispanics." At least 78 percent of its funding comes from federal grants, given by such agencies as HHS, HUD, Commerce, Justice, Labor, DoED and Agriculture.

Two grants totaling $300,000 to the Council on Foreign Relations, Inc. (CFR) for its "International Affairs Fellowship Program." According to CFR documents, ". . . academics and other foreign professionals from the private sector are enabled to apply their humanistic skills and perspectives in a policy-oriented environment through experience in public service . . ."

Rep. Larry McDonald (D-Ga.) was amazed that "this elitist [organization] already well funded by David Rockefeller and other multimillionaires, has now become the recipient of another $300,000. This is more than strange when we find that for the most part, this organization does not believe in the national sovereignty of the United States. I find it deplorable that American taxpayers are being squeezed to the bone, and without their consent, see their money going to such organizations as CFR."

$61,200 to the Consumers Union of United States, Inc. (May 1982).

CU joined with 6 other consumer groups in 1982 in publishing a 51-page book *Warning: Reaganomics is Harmful to Consumers,* which included a 12-point attack plan against the Reagan administration.

$202,800 to the United Brotherhood of Carpenters and Joiners of America (February 1, 1981).

$99,008 to the George Meany Center for Labor Studies, Inc., for "Processing the AFL-CIO Archives. To support processing of the records of AFL-CIO, a primary source for labor studies and social and economic history" (February 1982). AFL-CIO president Lane Kirkland is chairman of the Center's Board of Trustees.

According to the Center's newsletter, *Laborite,* it offers courses on "organizing techniques and grievance arbitration . . . the organizational use of computers, how to deal with the news media, effective union actions for civil rights, and union skills for women."

The Center's "Annual Labor Song Exchange" program includes: "How to use songs for meetings, rallies, picket lines, demonstrations and celebrations"; and a much-needed course: "How to improve your lyrics."

All Center courses are tuition-free.

$40,000 to The Labor Theater Inc. "To support writing of two 30-minute scripts for a six part series of dramatizations of American short stories which explore universal themes from the perspective of the aged" (Fiscal Year 1981).One of the Theater's productions was *Bottom Line,* a musical commentary attacking Reaganomics. Reagan himself was the main character, wearing a cowboy hat. He is called a "HoodRobin, who steals from the poor and the lame and gives to the rich." A fundamentalist preacher is mocked as "One of those born-again Christians selling condos from God."

$25,000 to the Phelps-Stokes Fund (May 19, 1981). In December 1981, Fund President Franklin H. Williams said, "The Reagan administration's actions and proposed actions, its budget cuts and budget priorities, its nominations and proposed appointments constitute a litany of lost faith in the American dream." The Department of Education gave the Fund $931,775 on April 1, 1982.

Environmental Protection Agency

Administrator-Designate William Ruckelshaus—Reagan Appointee

When EPA Administrator Anne Burford resigned last month, Americans saw just how powerful environmental activist groups are. EPA was created in 1970, just so they could run it. No Reaganite was going to spoil their plans.

Burford tried to restore some sanity to EPA, implementing President Reagan's New Federalism program: "But if we're successful in delegating our program to state governments," she said, "then our numbers will go down. Also, 90 percent of all our air pollution sources are either in compliance or

have been sued already and are operating under a consent decree. So who's left to sue? What you do is enforce the consent decree, but that number doesn't show up as a new lawsuit."

For activist lawyers and groups receiving federal cash, this was intolerable. If EPA's duties were shifted back to the states, and lawsuits avoided, life could become uneasy. Burford had to go.

Burford cut back funding the leftists groups, but she didn't eliminate it.

Whether new EPA Administrator William Ruckelshaus will allow himself to be the next victim has yet to be seen.

Groups receiving EPA money include:

$99,405 to the Environmental Defense Fund (EDF) in legal fees for time spent on a case in which the EDF sued the EPA—and lost.

Last year EDF and 9 other environmental groups issued a pamphlet, *Indictment: The Case Against the Reagan Environment Record.* EDF regularly lobbies on Capitol Hill.

According to its own documents, EDF successfully campaigned to put a referendum on California's ballot, "to decide whether state legislation authorizing expansion of the huge State Water Project can take effect."

EDF belongs to the Alliance for Justice, a group of 17 left-wing legal groups involved in "public interest law."

Two grants totaling $664,640 to the National Retired Teachers Association (NRTA) (August 1, 1981).

NRTA's "FACT SHEET" says its "Legislative specialists represent the interest of all older Americans, working closely with federal and state legislators in drafting and sponsoring legislation, advocating the views of older citizens at legislative and administrative hearings, and informing the membership of legislative activities.

$40,000 to The League of Women Voters of the U.S. (August 10, 1981).

League President Dorothy Riddings recently criticized President Reagan for his "lack of sensitivity" to women's issues.

The League this year endorsed legalized abortion on demand. Several League members have resigned in protest.

$200,000 to the American Association of Retired Persons (AARP) (Fiscal Year 1983).

In February AARP legislative representative Martin Corry said President Reagan's budget proposal would have a "significant" impact on the elderly, and "is bound to cause hardship for many."

In January, UPI reported Reagan administration proposals on Social Security reform "were running into resistance from the nation's largest retiree group, the American Association of Retired Persons."

In 1982, AARP lobbyist James Hacking called for repealing two Reaganomics cornerstones: the 1983 tax cuts, and tax indexing for inflation.

$283,260 to the National Urban League (NUL) (February 1, 1982).

At NUL's August 1982 convention, one speaker after another attacked the Reagan administration.

"No matter how much they try to say this is a nonpartisan group, it was lopsided with people determined to paint this as a racist administration," charged Armstrong Williams, a White House legislative analyst.

"That's just not true, but the leadership here is afraid of the truth. They don't want to hear what this administration is doing for blacks."

NUL denied permission for Williams and 8 other black Reagan appointees to participate in the convention.

DEPARTMENT OF ENERGY

SECRETARY DONALD HODEL—REAGAN APPOINTEE

Jimmy Carter created the Department of Energy to deal with the energy "crisis." Just after taking office, Ronald Reagan dissolved the crisis simply by dismantling oil price controls.

Reagan has been less resolute in fulfilling his promise to dismantle the Department itself.

Reagan's first Secretary of Energy, James B. Edwards, didn't seriously try to dismantle his agency, nor did he cut off funds to leftist political groups. His successor, Don Hodel, has been a model administrator, cutting waste wherever he could find it. Data are not yet available to determine if some funds to the left slipped through anyway.

Just-released data indicate the following grants were given to leftist groups under Edwards' tenure:

$68,492 to the Conference on Alternate State and Local Policies (CASLP) (February 21, 1981). CASLP's "effort has greatly advanced the possibilities for a Left political program . . ." said Richard Flacks in *Working Papers for a New Society.* CASLP helps radical activists "move more visibly into positions of power," wrote the *San Francisco Bay Guardian.*

The *Coordinated Action* newsletter recently dubbed CASLP "a subsidiary of the New Left think-tank, Institute for Policy Studies . . ." Columnist David Broder summed up CASLP's policies: "Their common bond is anti-corporate rhetoric, ranging from traditional socialism to tracts against the oil companies."

$179,644 to the Environmental Action Foundation (EAF)—a branch of Environmental Action (EA)—for "A utility clearing house" (June 17, 1981).

"Most EA members and staff are 'left' in the broadest sense of the term—left of center" wrote EA's own editorial staff in its newsletter, *Environmental Action.*

EA says its lobbying aims at "helping dedicated grassroots environmentalists fight the pro-pollution policies of President Reagan and Environmental Protection Agency administrator Anne [Burford.]" EA efforts helped force Burford's resignation.

In 1982, EA joined 74 other groups in a "fair budget campaign" attacking the Reagan administration's budget cuts. Naturally, EA was most concerned about proposed Energy Department cuts.

$21,379 to Rural America for "Public participation in developing the national energy plan" (March 17, 1981).

A publicity brochure says "RURAL AMERICA is committed to the empowerment of rural people:

"Through our newspaper, *rural america,* we break down the barriers of isolation faced by all of us in the countryside by reporting on our continuing struggles to organize for economic and social justice, and to empower ourselves politically and economically through the creation of more self-sufficient rural communities.

$787,510 to the Center for Renewable Resources (June 3, 1981).

In March 1982, the Center joined 14 environmentalist groups in "a bitterly-worded broadside . . . at the Reagan administration's proposal to eliminate almost all solar and conservation funding and to sharply increase spending for nuclear power." AP reported.

The groups charged Reagan's proposals were "the height of hypocrisy and cruelty," and would make "virtually inevitable the widespread proliferation of nuclear weapons."

Two grants totaling $22,943 to the League of United Latin American Citizens (LULAC) National Education Service Center, Inc. (September 30, 1981 and February 20, 1982). The Department of Education gave LULAC $1,237,600 on May 31, 1981.

President Tony Bonilla opened LULAC's 1982 national executive board meeting with "a call for opposition to Reagan's policy of decentralized government," UPI reported.

"Bonilla also proposed the board:

"—Condemn the Reagan administration's stand against busing for school desegregation," and

—Create a political action committee."

$19,999 to the Environmental Defense Fund (EDF) (March 17, 1981). In April 1981, the Interior Department gave EDF $17,350.

In October 1982, EDF leaked internal Environmental Protection Agency documents. It claimed the documents indicated the Reagan administration was considering a "repugnant" response to a Missouri environmental problem.

In April 1982, EDF joined 14 other environmentalist groups in releasing *The Reagan Energy Plan: A Major Power Failure,* a report attacking President Reagan's energy policies.

$3,915 to the Mississippi Solar Council (June 30, 1981).

In 1981, Council executive director Michael T. Herring ran for Congress after Republican Jon Hinson resigned.

Herring campaigned on an environmentalist platform. At one demonstration, he released 200 balloons, each containing a piece of paper saying, "Had this been waste from a nuclear dump in Mississippi, you would have been exposed to DEADLY radiation. Michael Herring, a candidate for Congress, opposes a dump in Mississippi.

Herring lost.

HOUSING AND URBAN DEVELOPMENT

SECRETARY SAMUEL PIERCE—REAGAN APPOINTEE

Since its creation during the Johnson administration, the Department of Housing and Urban Development has subsidized one boondoggle after another. Hundreds of city blocks were demolished for "urban renewal." New housing was built using cheap materials; big construction firms reaped large profits. Today, much of this housing is unoccupied or has been demolished.

Major funding includes:

$1,060,667 to The Urban Institute in 15 grants throughout 1981 and 1982. The Institute describes its tax-funded projects in vague terms. For a February 25, 1982 grant of $249,934 it said: "The beneficiaries of this work will be the general public." Other grants went for "Changes in scope"; "Increase in scope"; "Funding of overrun" and "Housing problems of the poor."

William Ruckelshaus headed the Institute until Reagan tapped him to run the Environmental Protection Agency. Under Ruckelshaus, reports the *Washington Post,* The Urban Institute "criticized Reagan's, urban and environmental policies."

Last October the Institute published *The Reagan Experiment,* a study attacking the Reagan administration's economic polices.

$184,469 to the National Conference of State Legislatures (NCSL) (September 1981).

Representing NCSL, New Hampshire House Speaker John B. Tucker attacked

President Reagan's New Federalism program because "the [budget] cuts far overshadow the process itself."

Public affairs director Mary Jane Gallagher said NCSL was disappointed Reagan's program wouldn't take over all Medicaid costs.

NCSL president William Passante, Speaker of the New York Assembly, claimed Reagan administration policies "will compound the human and budget problems facing cities."

$124,360 to the Center for Community Change (CCC) to "Provide technical assistance" (July 9, 1981).

According to *Public Interest Profiles*, "During 1980-81, CCC provided intensive technical assistance to over 400 groups, and less intensive aid to another 700 organizations."

"(CCC) has influenced federal policy on general revenue sharing and block grants."

CCC documents proclaim it "also has increasingly acted as a facilitator for community groups wishing to get involved in these issues at the local, state, regional, and federal levels."

CCC president Pablo Eisenberg boasts: "We take on both Democratic and Republican administrations."

In addition to HUD funds, CCC received grants from the Department of Labor, the Community Services Administration, and the Law Enforcement Assistance Administration.

$100,000 to the National Urban League (NUL) to "Promote fair housing through Community Development Block Grant funds" (September 30, 1982).

NUL recently joined Ralph Nader, the Gray Panthers and other left-wing groups in endorsing "Reclaim America Week"—a protest sponsored by National People's Action, a radical group using confrontational organizing to effect social change.

The protest intended "to put the corporations, big banks, city and state governments on notice that the people's priorities must be Chicago's priorities."

$98,066 to the NAACP National Housing Corporation for "Technical assistance on community development building projects" (November 5, 1981).

The *Boston Globe* reports the NAACP organized "a national network" working through "the organization's 1800 local branches to defeat congressional allies of President Ronald Reagan" in the November 1982 elections.

The NAACP's plan drew "upon well-proven tactics employed by candidates, interest groups and political bosses."●

SENATE—*Monday, May 16, 1983*

The Senate met at 11:30 a.m., and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

I will extol thee, my God, O king; and I will bless thy name for ever and ever. Every day will I bless thee; and I will praise thy name for ever and ever. Great is the Lord, and greatly to be praised; and his greatness is unsearchable.—Psalms 145: 1-3.

Merciful God, we pray for the Budget Committee as it takes up the heavy, seemingly impossible task before it. Give special wisdom, patience, and grace to the chairman and each member. Deepen their respect for each other despite strong disagreement. Keep them from personal enmity and alienation as they struggle with convictions that do not easily yield to modification. Guide them through difficult deliberations to a resolution which will commend itself to the Senate and the President. We ask this in the name of Him for whom nothing is impossible. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

MONDAY'S POEM

Mr. BAKER. Mr. President, this week's poem is by Francis Jammes, and was translated by Gary Wilson. Mr. Wilson's translations have appeared in "The Poetry Miscellany," "The Arkansas Times Magazine," and "The Hollins Critic." Mr. Jammes' poem is entitled "Down That Way" and I ask unanimous consent that the poem be printed in the RECORD. I also ask unanimous consent, Mr. President, that the text of an interview that the Washington Post conducted with Anthony Hecht, the Library of Congress consultant in poetry, also be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DOWN THAT WAY . . .

An old castle is down that way, sad and grey
like my heart. When the rain comes down
in the empty courtyard, the poppies bend under
the heavy water that plucks the leaves and rots them.

Years ago, no doubt, the gate was open
and inside, the old bent-backs warmed themselves
before a fire-screen with green borders
on which the four seasons were painted.

The Percivals and the Demonvilles were announced,
who arrived in their carriages from the city.
The old salon was suddenly full of gaiety
and the old ones showed off their good manners.

The children ran off to play hide-and-seek,
or else they looked for eggs. Then they came back
to the cold rooms to see the big portraits with blank eyes,
or, on the mantlepiece, strange sea shells.
And all the while the old folks talked
of some little boy's portrait that was painted in oil,
saying: He died of typhoid fever
in school. He looked so good in his suit.

The mother, who was still living, remembered
that dear, dead boy at vacation time
when the limbs, thick with leaves, swayed
by the cool streams in the harsh heat.
Poor child! she was saying, He loved his mother so much,
He never tried to cause her trouble,
and she cried, recalling again
that poor, simple, good boy, dead at sixteen.

The mother is dead now too. It's all very sad.
It's sad like my heart on this rain-filled day
and like the gate where the pink poppies bend under
the heavy water that makes them shine and rots them away.

INTERVIEW WITH ANTHONY HECHT

Anthony Hecht, 60, is the Library of Congress consultant in poetry—the closest thing America has to a poet laureate. He's 26th in a line that includes Robert Lowell, Robert Penn Warren, Robert Frost, Elizabeth Bishop, Steven Spender and James Dickey.

In 1968, Hecht won the Pulitzer Prize for poetry for his collection, "The Hard Hours." His most recent collection, "The Venetian Vespers," was published in 1979.

As for light verse, Hecht invented a limerick-like form called the "double dactyl," that always starts with a phrase such as "higgledy piggledy." He edited a book of them, "Jiggery Pokery," with John Hollander in 1967.

Since 1967, Hecht has been a professor of rhetoric and poetry at the University of Rochester, where he plans to return when his term at the library ends in the spring of 1984.

Hecht has two grown sons and lives in Chevy Chase with his wife, Helen, a former book editor who is writing her third cookbook and trying out recipes on Hecht and their 11-year-old son, Evan.

[From the Washington Post, May 8, 1983]

THE PRE-DAWN DAZE FROM WHICH POEMS ARE MADE

Q. Is writing poetry fun for you?

A. It's fun in that terrible, anxious-making way that riding a rollercoaster is fun. It creates enormous kinds of anxiety but at the same time there's something very satisfactory about it. It's a challenge that you set for yourself as opposed to having it set arbitrarily by others.

As a teacher I have to oblige my students, I have to oblige my colleagues, my department, my university. But with a poem I have ultimately to satisfy myself. If it satisfies me the chances are pretty good it will satisfy most of the poets that I know whose judgment I would rely upon.

On the other hand, there are an awful lot of poets, some of them quite well known, who are bored stiff by every word I've ever published. There are an awful lot of people who write free verse not only habitually, but with a kind of virulent determination that this is the only good thing and that everything else is old-fashioned and bad. A lot of those people would dismiss everything I write out of hand, just because of that.

And there are, those kinds of poets who write what I describe as a sort of charcoal or pastel sketch. Things that are little transcripts of some passing mood or evanescent thought that happened to enter their mind. That doesn't seem to me very interesting, but these are people who think that anything they happen to think about is interesting.

Q. Does that make it poetry?

A. They have a following so they say yes. I think that what they offer as poetry is what I would conceive of as the draft for a poem. They think that anything that occurred to them is per se poetry because they are in some blessed way poets. Any have been told so by their publishers.

Q. If you're published I guess that makes you a poet.

A. Yes, it's very strange. There was an organization that sent out a brochure. Anyone could join who was regarded as a writer. There were two criteria. One was if you had published two poems—didn't make any difference where. The other one is if you had published no poems but given three poetry readings. These are an awful lot of people who are much more interested in being "poets" than they are in actually writing poems. To be able to say, I am a poet. Here was a peculiar standard. Having published two poems or given three readings. Then you knew that you were certified. It's very odd.

Q. When did it dawn on you that you were a poet?

A. I started trying to write poems a long time ago, 1946 or 1947. But Allen Tate used to say that he often felt that every poem he finished was the last one he might ever write. He never had any idea where the next was coming from. You're a poet when you're sitting at your desk actually writing the damn thing. But when you're getting up, eating a Hershey bar, you're just eating a Hershey bar and you're not a poet anymore.

Q. What do you do to get yourself into the writing mode?

A. I like to rise around 5 or 5:30. I normally have no more for breakfast than a cup of coffee. And what I do is to allow the sort of dazed state of semiconsciousness to last as long as I can. It happens to be rather fertile. It comes up with all kinds of suggestive material, sometimes words, sometimes images, sometimes something that has been gestat-

ing for a long time. From that state I can very often find my way to beginning a new poem.

Q. A novel begins, in the novelist's mind, as a germ of an idea, and then it develops over time. Is that the way a poem works with you?

A. A novel is likely to begin with some sort of dramatic situation or confrontation. A poem is likely to begin with words as opposed to seeing two people in a room about to knife each other. A poem can also have that as the subject. But because it is so much briefer than a novel, it won't have room for a great deal of action to take place. No time for babies to be born and old people to die and funerals to take place and lunches and so forth. All of whatever happens has got to be contained in a certain number of very carefully chosen words. The chances are that the poems will begin with some metaphorical discovery on the part of the poet. This color green looks like or reminds one of—the mind is already launched on some trajectory. If it's any good it will pan out into some sort of decent thing.

Q. Then there's something magical about it?

A. Well, to people who don't write poems I guess it does seem magical, yes. To people who do it's an experiment with the mind. It's a dredging up of a lot of unconscious life and it's putting it in a certain kind of order. But it is not raw material for the psychoanalyst either. It's been sifted and chosen with particular care. Stuff that comes right out in a sort of raw, uncouth, untutored outpouring may very well serve for analytic commentary. There's a certain amount of which a poet is not aware that he has any control. He thinks he's choosing. He's being governed by forces deeper than he knows. Nevertheless, aside from whatever patterns of the unconscious may appear in a poem, he does his best to try to form it into what he regards as an artistic design.

Q. Do you find that you're composing as you're walking down the street?

A. Every once in a while I get an idea and I rush to make notes, lest I forget.

Q. Little teeny pieces of paper everywhere?

A. Right. Backs of envelopes.

Q. And then do you just throw them in a drawer somewhere?

A. Yes.

Q. And then what?

A. When I finish something and don't know what to start next, I go and look at these little scraps of paper and see if they kindle any sort of fire. Sometimes they don't. And if they don't I just throw them out.

Q. What is it like to be the only employed poet outside of universities and Hallmark?

A. There's nothing I take greater delight in than writing poetry. But I can go on being delighted just so long and then I have to eat. Writing poetry does not make for a sufficient income to live even alone, much less with a family. Teaching earns you a living.

Q. What's it like being both a poet and a teacher?

A. You're teaching the literature which has gone into whatever education you've had as a writer. A writer begins to write because he has read things, not just because he's gone through them. You can go through them and be totally illiterate and be incapable of articulating whatever it is that you've gone through.

So it's a big pleasure. I enjoy teaching. There are only three things wrong with it. One is having to correct papers and grade them, which is absolutely petrifying in its dullness. The second is to attend the committee meetings. And the third and perhaps the worst of all is sitting in judgment on one's younger colleagues and deciding whether they are to be promoted or whether they're to be discarded.

If one could be free of all that stuff and just go into class and talk about the things that one loves and try to answer questions, it probably would be the most perfect profession in the whole world.

Q. What were your interests when you were, say, 12?

A. I was very fond of music. I played the piano by ear and went to concerts as often as I could. I exhibited no particular literary skills, no interest indeed of any strong kind until I got to college. I went right from college into the army. My parents were not interested in my literary efforts. They were a little surprised and bewildered by them when they appeared.

Q. Did you play sports when you were growing up?

A. No, I was a rotten athlete. There was something natively sedentary about me.

Q. Did you always play right field?

A. Not only did I always play right field but I was always the last to be chosen when you chose up sides for a game.

Q. Did you actually fight in World War II?

A. Yes. We went into action on the west side of the Rhine River and then took part in the invasion in Germany and ended up in Czechoslovakia when the war ended in Europe. At that point they still expected to have to invade Japan. Just after my division reassembled in Ft. Bragg, N.C., they dropped the two bombs that ended the war in the Pacific. Otherwise I would have had to go and I know very well that I would not have survived. I was scheduled to be in the first wave and there was no question but what it would have been a very costly invasion.

Q. Like the character said in "Venetian Vespers," "Life is a spectator sport." Is that the way it is for a poet?

A. I think the person who felt this most keenly in his poetry and in his life was William Butler Yeats who was torn constantly between wanting to be a man of action and a poet. And finding that the two roles were not to be reconciled. Especially when the rebellion was going on in Ireland, there were those who were manifest rebels and military heroes. They took their lives in their hands and dreamed of dying a martyr's death. Every once in awhile Yeats seemed to be furious with himself for not doing the same thing himself. At the same time he knew that if he did he'd stop writing poetry.

Q. Did you read [poet] Howard Nemerov saying that poetry in English is coming to an end?

A. Yes. I thought that that was an expression of personal weariness and bile. I don't agree with it for an instant. I don't think Howard does either.

Q. Do you find that people are not as enthusiastic about it as you'd like?

A. Oh, yes, of course. The last poet writing in English who had a really large audience was probably Tennyson. And all of us would like to have Tennyson's kind of audience.

Q. It doesn't seem to be a medium for someone who wants a lot of attention.

A. No, it's not. And I think what Howard may secretly have meant is that even the people capable of reading words is dwindling. They're being seduced by television and other forms of entertainment and there may come a time when the printed word is eclipsed altogether in which case poets are going to have a very tough time. But so will novelists.

Q. Isn't poetry an oral tradition? Might not television actually provide a place for it?

A. It is a possibility, yes. It would be altogether a different kind of art from the one we have now.

Q. Another form of modern poetry—have you written any songs?

A. Yes, and some of my poems have been set to music. There were a group of little lyrics called "A Choir of Starlings." And then I had a group of poems called "Songs for the Air" or "Several Attitudes about Breathing." But this is not a field on which I try to concentrate.

Q. You wouldn't write an advertising jingle to make a quick buck?

A. I don't think I could make a quick buck with an advertising jingle. I suppose people who sell little verses to Hallmark greeting cards can make some money that way. I prefer to earn my living as a teacher.

Q. What do we lose if we lose poetry?

A: I don't think we will lose poetry because it will resurface in other forms. There are a lot of people who think that the pop rock lyrics are poetry. I happen not to think very highly of them, but my son thinks they're terrific.

Q. How old is he?

A: He's 11. If the reading public for poetry were to disappear it would probably come up in ways that might very much enrich the texts of popular songs. They would not be quite as mindless as they incline to be these days. I think the instinct for poetry is richly and usefully and profoundly there. Just the fact that we all do learn Mother Goose when we're kids makes an enormous difference.

Q. What purpose does rhyme serve?

A: Things written in meter and rhyme have a mnemonic value. It's much harder to memorize prose. I used to know parts of "Moby Dick" by heart. But "Moby Dick" is a cheat. There are parts of Moby Dick that scan. This is one of the reasons it is easy to memorize Shakespeare. Not because it's poetry with a capital "P," but because it's metrical, and the metrical pattern makes memorization easier. It's much easier to remember Shakespeare than Shaw.

I use rhyme quite very often. Most modern young writers think that it's just a leftover, old-fashioned preoccupation with what we got rid of. It's a musical feature of poetry. Sometimes it can even have meaning. There's a poem by George Herbert in which each stanza ends with a rhyme that ought to rhyme but doesn't, until the last stanza, when it does rhyme. The poem is a prayer which asks God to chasten and tune the heart of the poet. So that his lines will rhyme.

Q. You turned 60 this year. Popular wisdom has it that that is when a poet goes into his prime. Do you have a feeling about that?

A: Robert Penn Warren is still writing superbly well. He is a man of some more years than I have. William Butler Yeats seemed to have gotten more powerful and stronger as he grew older. Thomas Hardy didn't begin to write poetry until he was over 40. And quit writing novels, really, in order to turn entirely to poetry. And Sophocles wrote "Oedipus Cobonus" when he was 90 years old. These are the people with whom I aspire to keep company.

SENATE SCHEDULE

Mr. BAKER. Mr. President, under the order previously entered and pursuant to the adjournment on last Thursday, I believe the reading of the Journal has been dispensed with, as has the call of the calendar. Provision was made that no resolution would come over under the rule. The order also provided that the morning hour will be deemed to have expired, the practical effect of which is to create a situation in which no nondebatable motion could be made, as the rules might otherwise provide. That has become the form of late, to adjourn at the close of the week and to proceed in the manner I have just described.

VITIATION OF SPECIAL ORDERS FOR SENATORS THURMOND AND WEICKER

Mr. President, after the two leaders are recognized under the standing order, and after the expiration of the additional 10 minutes allocated to the distinguished minority leader for today, making in all a total of 20 minutes available to him this morning, an order was previously entered for the Senator from South Carolina and the Senator from Connecticut to be recognized on special orders of not to exceed 15 minutes each.

I am advised that neither Senator requires his time under the special order, and I ask unanimous consent that they be vitiated.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

Mr. BAKER. Mr. President, routine morning business will commence under this arrangement after the time allocated to the two leaders and will continue until 1 p.m. Provision is made for Senators to speak for not more than 5 minutes each.

Under the order previously entered, at 1 p.m. today the Senate will go into executive session to consider the nomination of William D. Ruckelshaus of the State of Washington to the Administrator of the Environmental Protection Agency. There is a 2-hour time limitation on debate on that nomination.

After the debate on the Ruckelshaus nomination and the disposition of the nomination, if it can be done by voice vote, or if a rollcall vote is ordered it will be stacked until tomorrow, the Senate will resume the consideration of the immigration bill, S. 529, at which time the pending question will be the DeConcini-Wilson amendment numbered 1220, as modified. Under the order previously entered, the Senator from California (Mr. WILSON) is authorized to propose an amendment to that amendment.

No rollcall votes will occur today, Mr. President, under the order previously entered. If they are ordered, they will be stacked to occur on tomorrow.

Mr. President, on tomorrow, the Senate is ordered to proceed to the consideration of the nomination of Alfred S. Regnery, to be Administrator of the Office of Juvenile Justice and Delinquency Prevention at 10 a.m.

ORDER FOR RECESS UNTIL 9:30 A.M. ON TOMORROW

Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9:30 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order that the time remaining be devoted to the transaction of routine morning business, in which Senators may speak for not more than 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF ALFRED S. REGNERY

Mr. BAKER. Mr. President, there is a time limitation of 1 hour on the Regnery nomination, with the proviso that if a rollcall vote is ordered that it will not occur prior to the hour of 2 p.m.

FIRST CONCURRENT BUDGET RESOLUTION

Mr. President, under provisions of the Budget Act, the Budget Committee is mandated to return to the Senate a budget resolution by the close of business on Tuesday or to be discharged, as the act provides. It may be, Mr. President, that I will wish to explore with the minority leader and with those charged with the management of this measure the extension of that time by a few hours into the day Wednesday, perhaps. I will make no such request at this time, but I mention it so that Senators may be aware of it.

The reason for it is not to provide delay but rather because a number of Senators are out of town today and it will be very difficult to assemble a quorum of Senators on the Budget Committee Monday.

Tuesday is going to be a very busy day with voting to occur beginning 2 p.m., and with the recess to occur between 12 noon and 2 p.m. tomorrow in order to accommodate the requirements of caucuses of Senators on both sides of the aisle. So it may be the better part of discretion to extend that time a little. But, as I say, I will discuss that with the chairman and ranking member of the committee after I have discussed it with the minority leader.

Mr. President, I believe I have no further announcements to make, no other arrangements to provide, and I am prepared now to yield my remaining time to the minority leader if he has need for additional time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. Under the previous order, the minority leader is recognized.

Mr. BYRD. How much time am I being given by the distinguished majority leader?

The PRESIDING OFFICER. Three minutes by the majority leader, together with 20 minutes under the previous order.

Mr. BYRD. I thank the Chair.

CONGRESS AND FOREIGN POLICY

Mr. BYRD. Mr. President, we are now well into the third year of President Reagan's administration. Yet, we are further away from achieving a bipartisan consensus in foreign policy than when the President first assumed office in January 1981.

Therefore, I think the time has come to look at the root causes of this dilemma facing our Nation at this particular time in our history. In so doing, I would like to cite three events which are symbolic of the problems impacting upon executive-legislative branch relations in the conduct of U.S. foreign policy. All three events involve this administration's perception that Congress does not have a constitutional role in the conduct of American foreign policy.

The first event occurred in October 1981, when the Senate was called upon to support the Presidential sale of AWACS to Saudi Arabia. At that time, we were told that the President's prestige was on the line since we had made a commitment to Saudi Arabia and it would be damaging to U.S. foreign policy interests if a President could not deliver on such a commitment.

The second event involved the nomination of Mr. Kenneth Adelman to be Director of the Arms Control and Disarmament Agency. The President, early on in the debate, stated that if the Senators did not see the light they would feel the heat—a statement which I strongly resented and which caused me to vote against Mr. Adelman. I determined that I would not submit to any heat.

Incidentally, there was no heat attempted in my case. I say that in fairness to the President.

Once again, we were told that the President should be given carte blanche in obtaining Senate approval of the nominee of his choice, no matter how unqualified that individual might be for that particular position of responsibility in our Government.

The latest event involves the characterization of this administration's conduct of foreign policy in Central America. On April 15, 1983, White House Counselor Edwin Meese III was quoted in the Washington Post as saying:

> It is the responsibility of the President to conduct foreign policy; limitations on that by the Congress are improper as far as I'm concerned.

Mr. Meese was reflecting administration unhappiness with the so-called Boland amendment restricting U.S. support for groups whose purpose it was to overthrow the Government of Nicaragua or to precipitate a war between Nicaragua and Honduras.

Mr. Meese's views were reinforced by the President himself who was quoted in the May 5, 1983, edition of the Washington Post as saying that action by the U.S. Congress to cut off U.S. financial support for the guerrillas in Nicaragua would set a very dangerous precedent because it literally was taking away the ability of the executive branch to carry out its constitutional responsibilities.

Mr. President, I submit to my colleagues that members of this administration should take a course in constitutional history. In so doing, they might understand better that very document they were sworn to uphold, and which we are sworn to uphold.

Having thrown off the yoke of tyranny, our Founding Fathers were determined that our fledgling Nation would never again suffer the abuses of a monarch vested with absolute power. In so doing, they constructed a system of government in which the three branches were delicately balanced, each against the other two.

For the Founding Fathers, Congress had a unique role to play since they viewed it as an institution reflecting the voice of the people and as the bulwark of American democratic ideals. I note the first article of the Constitution deals with the legislative branch and its powers. The Founding Fathers, in light of our colonial experience, were justifiably suspicious of Executive power, and this was reflected in the noble instrument they drafted and which we know as the Constitution of the United States of America. In this context, it is not insignificant that the powers and responsibilities of the Congress are listed first in the Constitution and that they are specified in much greater detail than those of the Chief Executive or the judicial branch.

In the foreign policy area, the Founding Fathers accorded the legislative branch important constitutional prerogatives. The prerogatives are divided into four principal categories. Two belong to the Senate alone—advice and consent to treaties and the confirmation of executive branch appointments. The other two are shared by the Senate and the House of Representatives—the power to appropriate funds and the power to declare war.

Mr. Meese notwithstanding, the so-called power of the purse is a constitutional prerogative delegated to the Congress. Article I, section 9, of the Constitution, stipulates that "no money shall be drawn from the Treasury, but in Consequence of Appropriations made by Law." In simple English, this means that legislative approval is required for all Government expenditures, be they domestic or foreign.

Since all expenditures must be approved by the Congress, at one time or another or in one way or another, we may increase funds for particular programs above White House recommendations; we may also refuse to grant funds for programs and policies in the foreign policy field as is the case with the Boland amendment; we may provide the required funds only when certain conditions have been met abroad as is the case with the certification of aid to El Salvador; or Congress may terminate programs already in existence. The Constitution is quite explicit in whom it entrusts the expenditure of the public's money. That right is vested exclusively with the Congress, not with the President.

In the case of the nomination of Kenneth Adelman, we were told that the President should receive Senate approval of any nominee of his choice, no matter how unqualified that individual might be. At least, we were told that in essence; that is what it amounted to.

Once again, the Constitution is explicit on this issue. Article II, section 2, paragraph 2, of the Constitution, reads as follows:

> [Meaning the President]—shall have power, by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur; and he shall nominate, and by and with the Advice and Consent of the Senate, shall appoint Ambassadors, other public Ministers and Consuls, Judges of the Supreme Court, and all other Officers of the United States, whose appointments are not herein otherwise provided for, and which shall be established by law.

As I pointed out in my remarks following the confirmation of Mr. Adelman on April 14, this provision of the Constitution does not state that the Senate has to rubberstamp every nominee of any President, of any party.

Once again, our Founding Fathers were concerned about extending a President such inordinate authority. They feared that giving a President such unfettered power would allow him to place in office any person of his choice, no matter how unqualified or how incompetent, to conduct the important business of our Government. They were concerned that this would accord to the President the very monarchial powers against which our Founding Fathers rebelled.

In October 1981, the Senate was once again pressured into supporting the President on the issue of the sale of AWACS to Saudi Arabia. We were told that a vote against the President would unnecessarily damage his prestige and credibility in the conduct of foreign policy. This assertion was predicated upon the assumption that the President made a commitment to Saudi Arabia and the United States had to stick by this commitment.

I did not feel that way about it. I voted against the sale.

As I pointed out on October 28, 1981, this line of argument was not consonant with the facts or the law. Under the provisions of 36(b) of the Arms Export Control Act, the President is precluded from making such commitments for the sale of U.S. arms until Congress has acted to disapprove or acquiesce in the letters of offer submitted to it for consideration. The only commitment a President can make under the Arms Export Control Act is in the form of a letter of offer to a foreign government. Yet, that letter of offer cannot be issued, under the law, until the 30 calendar days following formal notification to the Congress has expired and a concurrent resolution of disapproval has not been adopted by the House and the Senate.

Finally, there are four consecutive provisions of Article I, section 8, of the Constitution, which accord to Congress the warmaking powers of our Government. These confer upon Congress the power to declare war; to raise and support armies; to provide and maintain a Navy; and to make rules for the Government and regulation of land and naval forces.

Thus, contrary to the administration's assertion that the Congress cannot place limitation on the Presidential conduct of foreign policy, the Constitution of the United States says otherwise. As noted constitutional scholar Louis Henkins pointed out in his book "Foreign Affairs and the Constitution":

> The vast legislative powers of Congress that relate particularly to foreign affairs do not begin to exhaust its authority to make law affecting foreign relations. Congress has general powers that, taken together, enable it to reach virtually where it will in foreign as in domestic affairs.

The Commission on the Organization of Government for the Conduct of Foreign Policy was established in 1972 by the Congress. The Commission was asked to make recommendations for the improvement of the governmental processes and programs in the formulation and implementation of foreign policy. The report of the Commission was issued on June 28, 1975, and I cite the following from the report:

The Commission believes that while the executive branch should continue to conduct our relations with other countries, both the Constitution and political realities require shared participation and responsibility by the executive and legislative branches of government.

In sum, the Congress has enormous powers which are indispensable to the support of any foreign policy, no matter which party, Republican or Democrat, controls the Presidency.

Congressional laws made in pursuance of these powers, and treaties that have been supported with an adequate number of votes in the Senate, are the supreme law of the land, and the President is bound by the Constitution to execute these laws faithfully.

Unfortunately, it appears we have an administration which does not view the Congress as a partner in the conduct of foreign policy—a partnership envisioned by our Founding Fathers which is manifested in the Constitution as being a requirement for the successful implementation of U.S. foreign policy. It is small wonder that there is a growing bipartisan suspicion surrounding the goals of this administration's foreign policy.

By denying that Congress has a constitutional role in the oversight and implementation of American foreign policy, this administration is denying itself the bipartisan support necessary to carry out its foreign policy. As such, the checks on Executive authority to unilaterally carry out the foreign policy of this Nation are now being implemented by the Congress in the form of the Boland amendment and certification requirements for continued aid to El Salvador. And I predict these tools will continue to be utilized by the Congress as long as this administration continues its attitude that Congress does not have any role in the foreign policy decisionmaking processes of this Government.

SMALL BUSINESS WEEK

Mr. BYRD. Mr. President, last week we commemorated the vital contributions made to our economy by the small businesses of this country. Each day we see the economic headlines filled with the news of large corporations, but the true story of America's vitality goes largely untold. That story goes to the thousands of small businesses, which are the engines of our economic growth.

Of the 11 million businesses in the United States over 98 percent qualify as small businesses. These businesses account for over 40 percent of our gross national product and over half of the Nation's total business employment.

In my own State of West Virginia the small business community plays a vital role in our economy. Recently, Mr. James P. Blair of Blair Motor Supply in Clarksburg, W. Va., has been designated as "small businessman of the year." Mr. Blair stands as a symbol of the strong involvement small business plays in our future economic growth.

Yet, despite the importance of this sector to our economy the economic policies of the Reagan administration have had a devastating effect on the health of small businesses. The small business community has suffered from the severe declines that have hit the housing, agriculture, and retailing sectors of our economy which are particularly dependent on small firms. The slump in auto sales has led to the death of thousands of small firms, particularly franchised dealers, which are dependent on the auto industry. While business failures sharply increased over the past 2 years, other surviving firms have been forced to scale back their operations to remain profitable.

Make no mistake about it, high interest rates are the No. 1 problem for the owner of a small business. The Reagan administration has relied on high interest rates to fight inflation, but it has followed this strategy at a tremendous cost to the small business community. Most small firms are high risk borrowers and are forced to pay several percentage points above the prime rate in order to obtain funds. These high interest rates place the managers of small businesses in a catch-22 situation: They cannot obtain financing from a bank unless they are able to project a record of profitability and expansion, but they cannot expand unless they can get money to finance their expansion.

The answer to the predicament of small firms lies in a new, revamped economic policy. First, we need to return some measure of stability to fiscal and monetary policy by correcting the most serious mistakes of Reaganomics. That means that we must adopt a multiyear budget strategy that provides for a gradual, but steady, decline in the enormous budget deficits that the Reagan economic program has spawned. Second, we must develop a plan for sustained, long-term economic growth. To respond to this need, I recently appointed an industrial policy task force under the chairmanship of Senator KENNEDY to evaluate proposals to improve the competitive performance of our economy. Small business has a critical role to play in our future economic expansion. Yet, in order for us to maximize the contribution of small firms to our economy, we need continually to review and reform our Federal small business programs. We in the Democratic Party have begun a serious effort to do just that.

Mr. President, I yield to Mr. KENNEDY such time as he may need from my time.

The PRESIDING OFFICER. The Senator from Massachusetts.

THE PASTORAL LETTER OF THE U.S. BISHOPS ON WAR AND PEACE

Mr. KENNEDY. Mr. President, on May 3, the Catholic bishops of the United States approved by a vote of 238 to 9 a national pastoral letter on war and peace in the nuclear age.

In this historic pastoral letter, entitled "The Challenge of Peace: God's Promise and Our Response," the bishops state:

The nuclear age is an era of moral as well as physical danger. We are the first generation since Genesis with the power to virtually destroy God's creation. We cannot remain silent in the face of such danger.

The bishops' letter underwent nearly 2 years of preparation, including consideration of hundreds of submissions from church leaders and Government officials and three separate drafts presented to the full conference of bishops. It provides a thoughtful and comprehensive statement of religious perspectives on war and peace, issues of public policy and strategy and pastoral approaches for Christians to "live up to the call of Jesus to be peacemakers in our time and situation."

Judging that it is "morally unjustifiable to initiate nuclear war in any form," the pastoral letter recommends the following concrete steps for nuclear arms control and disarmament:

1. Support for immediate, bilateral, verifiable agreements to halt the testing, production and deployment of new nuclear weapons systems.

2. Support for negotiated deep cuts in the arsenals of both superpowers, particularly those systems which have destabilizing characteristics * * *

3. Support for early and successful conclusion of negotiations for a comprehensive test ban treaty.

4. Removal by all parties of short-range nuclear weapons which multiply dangers disproportionate to their deterrent value.

5. Removal by all parties of nuclear weapons from areas where they are likely to be overrun in the early stages of war, thus forcing rapid and uncontrollable decisions on their use.

6. Strengthening of command and control over nuclear weapons to prevent inadvertent and unauthorized use.

In its conclusion, the pastoral letter makes an eloquent appeal for an end to the nuclear arms race:

The whole world must summon the moral courage and technical means to say no to nuclear conflict; no to weapons of mass destruction; no to an arms race which robs the poor and the vulnerable; and no to the moral danger of a nuclear age which places before humankind indefensible choices of constant terror or surrender. Peacemaking is not an optional commitment. It is a requirement of our faith.

The Nation owes a debt of gratitude to the archbishop of Chicago, Joseph Cardinal Bernardin, and the four other members of the drafting committee which he chaired—Bishops Thomas J. Gumbleton of Detroit,

John O'Connor of New York, George A. Fulcher of Lafayette, Ind., and Daniel P. Reilly of Norwich, Conn.—as well as to all of the American bishops for this extraordinary service to their church and country at this critical point in the nuclear age.

Both Protestant and Jewish leaders have already warmly welcomed the pastoral letter, and have begun a dialog with Catholic leaders on its implications and recommendations. I hope that the Congress, the administration, and the American people will give careful study to this important letter and its compelling message. As Cardinal Bernardin points out, this document sets:

The voice of the Bishops of the United States against the technological dynamic of the nuclear arms race. The letter calls for stopping the race, reversing its direction, eliminating the most dangerous weapons systems and establishing the need for decisive political action to move world politics away from a fascination with means of destruction and toward a world order in which war will be consigned to history as a method of setting disputes.

Because of its extraordinary importance, I ask unanimous consent that the full text of the pastoral letter of the U.S. Bishops be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[The Pastoral Letter on War and Peace]

THE CHALLENGE OF PEACE: GOD'S PROMISE AND OUR RESPONSE

INTRODUCTION

"The whole human race faces a moment of supreme crisis in its advance toward maturity." Thus the Second Vatican Council opened its treatment of modern warfare.[1] Since the council, the dynamic of the nuclear arms race has intensified. Apprehension about nuclear war is almost tangible and visible today. As Pope John Paul II said in his message to the United Nations concerning disarmament: "Currently the fear and preoccupation of so many groups in various parts of the world reveal that people are more frightened about what would happen if irresponsible parties unleash some nuclear war." [2]

As bishops and pastors ministering in one of the major nuclear nations, we have encountered this terror in the minds and hearts of our people—indeed, we share it. We write this letter because we agree that the world is at a moment of crisis, the effects of which are evident in people's lives. It is not our intent to play on fears, however, but to speak words of hope and encouragement in time of fear. Faith does not insulate us from the challenges of life; rather, it intensifies our desire to help solve them precisely in light of the good news which has come to us in the person of Jesus, the Lord of history. From the resources of our faith we wish to provide hope and strength to all who seek a world free of the nuclear threat. Hope sustains one's capacity to live with danger without being over-whelmed by it; hope is the will to struggle against obstacles even when they appear insuperable. Ultimately our hope rests in the God who gave us life, sustains the world by his power and has called us to revere the lives of every person and all peoples.

The crisis of which we speak arises from this fact: Nuclear war threatens the existence of our planet; this is a more menacing threat than any the world has known. It is neither tolerable nor necessary that human beings live under this threat. But removing it will require a major effort of intelligence, courage and faith. As Pope John Paul II said at Hiroshima: "From now on it is only through a conscious choice and through a deliberate policy that humanity can survive."[3]

As Americans, citizens of the nation which was first to produce atomic weapons, which has been the only one to use them and which today is one of the handful of nations capable of decisively influencing the course of the nuclear age, we have grave human, moral and political responsibilities to see that a "conscious choice" is made to save humanity. This letter is therefore both an invitation and a challenge to Catholics in the United States to join with others in shaping the conscious choices and deliberate policies required in this "moment of supreme crisis."

I. PEACE IN THE MODERN WORLD: RELIGIOUS PERSPECTIVES AND PRINCIPLES

The global threat of nuclear war is a central concern of the universal church, as the words and deeds of recent popes and the Second Vatican Council vividly demonstrate. In this pastoral letter we speak as bishops of the universal church, heirs of the religious and moral teaching on modern warfare of the last four decades. We also speak as bishops of the church in the United States, who have both the obligation and the opportunity to share and interpret the moral and religious wisdom of the Catholic tradition by applying it to the problems of war and peace today.

The nuclear threat transcends religious, cultural and national boundaries. To confront its danger requires all the resources reason and faith can muster. This letter is a contribution to a wider common effort meant to call Catholics and all members of our political community to dialogue and specific decisions about this awesome question.

The Catholic tradition on war and peace is a long and complex one, reaching from the Sermon on the Mount to the statements of Pope John Paul II. Its development cannot be sketched in a straight line, and it seldom gives a simple answer to complex questions. It speaks through many voices and has produced multiple forms of religious witness. As we locate ourselves in this tradition, seeking to draw from it and to develop it, the document which provides profound inspriation and guidance for us is the Pastoral Constitution on the Church in the Modern World of Vatican II, for it is based on doctrinal principles and addresses the relationship of the church to the world with respect to the most urgent issues of our day.[4]

A rule of interpretation crucial for the pastoral constitution is equally important for this pastoral letter, although the authority inherent in these two documents is quite distinct. Both documents use principles of Catholic moral teaching and apply them to specific contemporary issues. The bishops at Vatican II opened the pastoral consititution with the following guideline on how to relate principles to concrete issues.

"In the first part, the church develops her teaching on man, on the world which is the enveloping context of man's existence, and on man's relations to his fellow men. In Part II, the church gives closer consideration to various aspects of modern life and human society; special consideration is given to those questions and problems which, in this general area, seem to have a greater urgency in our day. As a result, in Part II the subject matter which is viewed in the light of doctrinal principles is made up of diverse elements. Some elements have a permanent value; others, only a transitory one. Consequently, the constitution must be interpreted according to the general norms of theological interpretation. Interpreters must bear in mind—especially in Part II—the changeable circumstances which the subject matter, by its very nature, involves." [5]

In this pastoral letter too we address many concrete questions concerning the arms race, contemporary warfare, weapons systems and negotiating strategies. We do not intend that our treatment of each of these issues carry the same moral authority as our statement of universal moral principles and formal church teaching. Indeed, we stress here at the beginning that not every statement in this letter has the same moral authority. At times we reassert universally binding moral principles (e.g., non-combatant immunity and proportionality). At still other times we reaffirm statements of recent popes and the teaching of Vatican II. Again, at other times we apply moral principles to specific cases.

When making applications of these principles we realize—and we wish readers to recognize—that prudential judgments are involved based on specific circumstances which can change or which can be be interpreted differently by people of good will (e.g., the treatment of "no first use"). However, the moral judgments that we make in specific cases, while not binding in conscience, are to be given serious attention and consideration by Catholics as they determine whether their moral judgments are consistent with the Gospel.

We shall do our best to indicate, stylistically and substantively, whenever we make such applications. We believe such specific judgments are an important part of this letter, but they should be interpreted in light of another passage from the pastoral constitution:

"Often enough the Christian view of things will itself suggest some specific solution in certain circumstances. Yet it happens rather frequently, and legitimately so, that with equal sincerity some of the faithful will disagree with others on a given matter. Even against the intention of their proponents, however, solutions proposed on one side or another may be easily confused by many people with the gospel message. Hence it is necessary for people to remember that no one is allowed in the aforementioned situations to appropriate the church's authority for his opinion. They should always try to enlighten one another through honest discussion, preserving mutual charity and caring above all for the common good." [6]

This passage acknowledges that on some complex social questions the church expects a certain diversity of views even though all hold the same universal moral principles. The experience of preparing this pastoral letter has shown us the range of strongly held opinion in the Catholic community on questions of war and peace. Obviously, as bishops we believe that such differences should be expressed within the framework

Footnotes at end of article.

of Catholic moral teaching. We urge mutual respect among different groups in the church as they analyze this letter and the issues it addresses. Not only conviction and commitment are needed in the church, but also civility and charity.

The pastoral constitution calls us to bring the light of the Gospel to bear upon "the signs of the times." Three signs of the times have particularly influenced the writing of this letter. The first, to quote Pope John Paul II at the United Nations, is that "the world wants peace, the world needs peace." [7] The second is the judgment of Vatican II about the arms race: "The arms race is one of the greatest curses on the human race and the harm it inflicts upon the poor is more than can be endured." [8] The third is the way in which the unique dangers and dynamics of the nuclear arms race present qualitatively new problems which must be addressed by fresh applications of traditional moral principles. In light of these three characteristics, we wish to examine Catholic teaching on peace and war.

The Catholic social tradition as exemplified in the pastoral constitution and recent papal teachings is a mix of biblical, theological and philosophical elements which are brought to bear upon the concrete problems of the day. The biblical vision of the world, created and sustained by God, scarred by sin, redeemed in Christ and destined for the Kingdom, is at the heart of our religious heritage. This vision requires elaboration, explanation and application in each age; the important task of theology is to penetrate ever more adequately the nature of the biblical vision of peace and relate it to a world not yet at peace. Consequently, the teaching about peace examines both how to construct a more peaceful world and how to assess the phenomenon of war.

At the center of the church's teaching on peace and at the center of all Catholic social teaching, are the transcendence of God and the dignity of the human person. The human person is the clearest reflection of God's presence in the world; all of the church's work in pursuit of both justice and peace is designed to protect and promote the dignity of every person. For each person not only reflects God, but is the expression of God's creative work and the meaning of Christ's redemptive ministry. Christians approach the problem of war and peace with fear and reverence. God is the Lord of life, and so each human life is scared; modern warfare threatens the obliteration of human life on a previously unimaginable scale. The sense of awe and "fear of the Lord" which former generations felt in aproaching these issues weighs upon us with new urgency. In the words of the pastoral constitution: "Men of this generation should realize that they will have to render an account of their warlike behavior; the destiny of generations to come depends largely on the decisions they make today." [9]

Catholic teaching on peace and war has had two purposes: to help Catholics form their consciences and to contribute to the public policy debate about the morality of war. These two purposes have led Catholic teaching to address two distinct but overlapping audiences. The first is the Catholic faithful, formed by the premises of the Gospel and the principles of Catholic moral teaching. The second is the wider civil community, a more pluralistic audience, in which our brothers and sisters with whom we share the name Christian, Jews, Moslems, other religious communities, and all people of good will also make up our polity. Since Catholic teaching has traditionally sought to address both audiences, we intend to speak to both in this letter, recognizing that Catholics are also members of the wider political community.

The conviction, rooted in Catholic ecclesiology, that both the community of the faithful and the civil community should be addressed on peace and war has produced two complementary but distinct styles of teaching. The religious community shares a specific perspective of faith and can be called to live out its implications. The wider civil community, although it does not share the same vision of faith, is equally bound by certain key moral principles. for all men and women find in the depth of their consciences a law written on the human heart by God.[10] From this law reason draws moral norms. These norms do not exhaust the gospel vision, but they speak to critical questions affecting the welfare of the human community, the role of states in international relations and the limits of acceptable action by individuals and nations on issues of war and peace.

Examples of these two styles can be found in recent Catholic teaching. At times the emphasis is upon the problems and requirements for a just public policy (e.g., Pope John Paul II at the U.N. Special Session, 1982); at other times the emphasis is on the specific role Christians should play (e.g., Pope John Paul II at Coventry, England, 1982). The same difference of emphasis and orientation can be found in Pope John XXIII's "Peace on Earth" and Vatican II's pastoral constitution.

As bishops we believe that the nature of Catholic moral teaching, the principles of Catholic ecclesiology and the demands of our pastoral ministry require that this letter speak both to Catholics in a specific way and to the wider political community regarding public policy. Neither audience and neither mode of address can be neglected when the issue has the cosmic dimensions of the nuclear arms race.

We propose, therefore, to discuss both the religious vision of peace among peoples and nations and the problems associated with realizing this vision in a world of sovereign states devoid of any central authority and divided by ideology, geography and competing claims. We believe the religious vision has an objective basis and is capable of progressive realization. Christ is our peace, for he has "made us both one, and has broken down the dividing wall of hostility . . . that he might create in himself one new man in place of the two, so making peace, and might reconcile us both to God" (Eph. 2:14-16). We also know that this peace will be achieved fully only in the kingdom of God. The realization of the kingdom, therefore, is a continuing work progressively accomplished, precariously maintained and needing constant effort to preserve the peace achieved and expand its scope in personal and political like.

Building peace within and among nations is the work of many individuals and institutions; it is the fruit of ideas and decisions taken in the political, cultural, economic, social, military and legal sectors of life. We believe that the church, as a community of faith and social institution, has a proper, necessary and distinctive part to play in the pursuit of peace.

The distinctive contribution of the church flows from her religious nature and ministry. The church is called to be in a unique way the instrument of the kingdom of God in history. Since peace is one of the signs of that kingdom present in the world, the church fulfills part of her essential mission by making the peace of the kingdom more visible in our time.

Because peace, like the kingdom of God itself, is both a divine gift and a human work, the church should continually pray for the gift and share in the work. We are called to be a church at the service of peace, precisely because peace is one manifestation of God's word and work in our midst. Recognition of the church's responsibility to join with others in the work of peace is a major force behind the call today to develop a theology of peace. Much of the history of Catholic theology on war and peace has focused on limiting the resort to force in human affairs; this task is still necessary and is reflected later in this pastoral letter, but it is not a sufficient response to Vatican II's challenge "to undertake a completely fresh reappraisal of war." [11]

A fresh reappraisal which includes a developed theology of peace will require contributions from several sectors of the church's life; biblical studies, systematic and moral theology, ecclesiology, and the experience and insights of members of the church who have struggled in various ways to make and keep the peace in this often violent age. This pastoral letter is more an invitation to continue the new appraisal of war and peace than a final synthesis of the results of such an appraisal. We have some sense of the characteristics of a theology of peace, but not a systematic statement of their relationships.

A theology of peace should ground the task of peacemaking solidly in the biblical vision of the kingdom of God, then place it centrally in the ministry of the church. It should specify the obstacles in the way of peace, as these are understood theologically and in the social and political sciences. It should both identify the specific contributions a community of faith can make to the work of peace and relate these to the wider work of peace pursued by other groups and institutions in society. Finally, a theology of peace must include a message of hope. The vision of hope must be available to all, but one source of its content should be found in a church at the service of peace.

We offer now a first step toward a message of peace and hope. It consists of a sketch of the biblical conception of peace; a theological understanding of how peace can be pursued in a world marked by sin; a moral assessment of key issues facing us in the pursuit of peace today; and an assessment of the political and personal tasks required of all people of good will in this most crucial period of history.

A Peace and the Kingdom

For us as believers, the sacred scriptures provide the foundation for confronting the dilemma of war and peace today. Any use of scripture in this area is conditioned by three factors. *First*, the term "peace" has been understood in different ways at various times and in various contexts. For example, peace can refer to an individual's sense of well-being or security, or it can mean the cessation of armed hostility, producing an atmosphere in which nations can relate to each other and settle conflicts without resorting to the use of arms. For men and women of faith, peace will imply a right relationship with God, which entails forgiveness, reconciliation and union. Finally, the scriptures point to eschatological peace, a final, full realization of God's salvation when all cre-

ation will be made whole. Among these various meanings, the last two predominate in the scriptures and provide direction to the first two.

Second, The scriptures as we have them today were written over a long period of time and reflect many varied historical situations, all different from our own. Our understanding of them is both complicated and enhanced by these differences, but not in any way obscured or diminished by them. *Third,* since the scriptures speak primarily of God's intervention in history, they contain no specific treatise on war and peace. Peace and war must always be seen in light of God's intervention in human affairs and our response to that intervention. Both are elements within the ongoing revelation of God's will for creation.

Acknowledging this complexity, we still recognize in the scriptures a unique source of revelation, a word of God which is addressed to us as surely as it has been to all preceeding generations. We call upon the Spirit of God who speaks in that word and in our hearts to aid us in our listening. The sacred texts have much to say to us about the ways in which God calls us to live in union with and in fidelity to the divine will. They provide us with direction for our lives and hold out to us an object of hope, a final promise, which guides and directs our actions here and now.

1. The Old Testament

War and peace are significant and highly complex elements within the multilayered accounts of the creation and development of God's people in the old Testament.

a. War

Violence and war are very much present in the history of the people of God, particularly from the Exodus period to the monarchy. God is often seen as the one who leads the Hebrews in battle, protects them from their enemies, makes them victorious over other armies (see, for example, Dt. 1:30; 20:4; Jos. 2:24; Jgs. 3:28). The metaphor of warrior carried multifaceted connotations for a people who knew themselves to be smaller and weaker than the nations which surrounded them. It also enabled them to express their conviction about God's involvement in their lives and his desire for their growth and development. This metaphor provided the people with a sense of security; they had a God who would protect them even in the face of overwhelming obstacles. It was also a call to faith and to trust; the mighty God was to be obeyed and followed. No one can deny the presence of such images in the Old Testament nor their powerful influence upon the articulation of this people's understanding of the involvement of God in their history. The warrior God was highly significant during long periods of Israel's understanding of its faith. But this image was not the only image, and it was gradually transformed, particularly after the experience of the exile, when God was no longer identified with military victory and might. Other images and other understandings of God's activity became predominant in expressing the faith of God's people.

b. Peace

Several points must be taken into account in considering the image of peace in the Old Testament. First, all notions of peace must be understood in light of Israel's relation to God. Peace is always seen as gift from God and as fruit of God's saving activity. Second, the individual's personal peace is not greatly stressed. The well-being and freedom from fear which result from God's love are viewed primarily as they pertain to the community and its unity and harmony. Furthermore, this unity and harmony extend to all of creation; true peace implied a restoration of the right order not just among peoples, but within all of creation. Third, while the images of war and the warrior God become less dominant as a more profound and complex understanding of God is presented in the texts, the images of peace and the demands upon the people for covenantal fidelity to true peace grow more urgent and more developed.

c. Peace and Fidelity to the Covenant

If Israel obeyed God's law, God would dwell among them. "I will walk among you and will be your God and you shall be my people" (Lv. 26:12). God would strengthen the people against those who opposed them and would give peace in the land. The description of life in these circumstances witnesses to unity among peoples and creation, to freedom from fear and to security (Lv. 26:3-16). The right relationship between the people and God was grounded in and expressed by a covenantal union. The covenant bound the people to God in fidelity and obedience; God was also committed in the covenant to be present with the people, to save them, to lead them to freedom. Peace is a special characteristic of this covenant; when the prophet Ezekiel looked to the establishment of the new, truer covenant, he declared that God would establish an everlasting covenant of peace with the people (Ez. 37:26).

Living in covenantal fidelity with God had ramifications in the lives of the people. It was part of fidelity to care for the needy and helpless; a society living with fidelity was one marked by justice and integrity. Furthermore, covenantal fidelity demanded that Israel put its trust in God alone and look only to him for its security. When Israel tended to forget the obligations of the covenant, prophets arose to remind the people and call them to return to God. True peace is an image which they stressed.

Ezekiel, who promised a covenant of peace, condemned in no uncertain terms the false prophets who said there was peace in the land while idolatry and injustice continued (Ez. 13:16). Jeremiah followed in this tradition and berated those who "healed the wounds of the people lightly" and proclaimed peace while injustice and infidelity prevailed (Jer. 6:14; 8:10-12). Jeremiah and Isaiah both condemned the leaders when, against true security, they depended upon their own strength or alliances with other nations rather than trusting in God (Is. 7:1-9; 30:1-4; Jer. 37:10). The lament of Isaiah 48:18 makes clear the connection between justice, fidelity to God's law and peace; he cries out: "O that you had hearkened to my commandments! Then your peace would have been like a river, and your righteousness like the waves of the sea."

d. Hope for Eschatological Peace

Experience made it clear to the people of God that the covenant of peace and the fullness of salvation had not been realized in their midst. War and enmity were still present, injustices thrived, sin still manifested itself. These same experiences also convinced the people of God's fidelity to a covenant which they often neglected. Because of this fidelity, God's promise of a final salvation involving all peoples and all creation and of an ultimate reign of peace became an integral part of the hope of the Old Testament. In the midst of their failures and sin, God's people strove for greater fidelity to him and closer relationship with him; they did so because, believing in the future they had been promised, they directed their lives and energies toward an eschatological vision for which they longed. Peace is an integral component of that vision.

The final age, the Messianic time, is described as one in which the "Spirit is poured on us from on high." In this age creation will be made whole, "justice will dwell in the wilderness," the effect of righteousness will be peace, and the people will "abide in a peaceful habitation and in secure dwellings and in quiet resting places" (Is. 32:15-20). There will be no need for instruments of war (Is. 2:4; Mi. 4:3),[12] God will speak directly to the people and "righteousness and peace will embrace each other" (Ps. 85:10-11). A Messiah will appear, a servant of God upon whom God has placed his spirit and who will faithfully bring forth justice to the nations: "He will not cry or lift up his voice, or make it heard in the street; a bruised reed he will not break and a dimly burning wick he will not quench; he will faithfully bring forth justice" (Is. 42:2-3).

The Old Testament provides us with the history of a people who portrayed their God as one who intervened in their lives, who protected them and led them to freedom, often as a mighty leader in battle. They also appear as a people who longed constantly for peace. Such peace was always seen as a result of God's gift which came about in fidelity to the covenantal union. Furthermore, in the midst of their unfulfilled longing, God's people clung tenaciously to hope in the promise of an eschatological time when, in the fullness of salvation, peace and justice would embrace and all creation would be secure from harm. The people looked for a Messiah, one whose coming would signal the beginning of that time. In their waiting, they heard the prophets call them to love according to the covenantal vision, to repent and to be ready for God's reign.

2. New Testament

As Christians we believe that Jesus is the Messiah or Christ so long awaited. God's servant (Mt. 12:18-21) prophet and more than prophet (Jn. 4:19-26), the one in whom the fullness of God was pleased to dwell, through whom all things in heaven and on earth were reconciled to God, Jesus made peace by the blood of the cross (Col. 1:19-20). While the characteristics of the *shalom* of the Old Testament (gift from God, inclusive of all creation, grounded in salvation and covenantal fidelity, inextricably bound up with justice) are present in the New Testament traditions, all discussion of war and peace in the New Testament must be seen within the context of the unique revelation of God that is Jesus Christ and of the reign of God which Jesus proclaimed and inaugurated.

a. War

There is no notion of a warrior God who will lead the people in a historical victory over its enemies in the New Testament. The only war spoken of is found in apocalyptic images of the final moments, especially as they are depicted in the Book of Revelation. Here war stands as image of the eschatological struggle between God and Satan. It is a war in which the Lamb is victorious (Rv. 17:14).

Military images appear in terms of the preparedness which one must have for the coming trials (Lk. 14:31; 22:35-38). Swords appear in the New Testament as an image

of divison (Mt. 12:34; Heb. 4:12); they are present at the arrest of Jesus, and he rejects their use (Lk. 22:51 and parallel texts); weapons are transformed in Ephesians, when the Christians are urged to put on the whole armor of God which includes the breastplate of righteousness, the helmet of salvation, the sword of the Spirit, "having shod your feet in the equipment of the gospel of peace" (Eph. 6:10-17; cf. 1 Thes. 5:8-9). Soldiers too are present in the New Testament. They are at the crucifixion of Jesus, of course, but they are also recipients of the baptism of John, and one centurion receives the healing of his servant (Mt. 8:5-13 and parallel texts; cf. Jn. 4:46-53).

Jesus challenged everyone to recognize in him the presence of the reign of God and to give themselves over to that reign. Such a radical change of allegiance was difficult for many to accept and families found themselves divided, as if by a sword. Hence, the Gospels tell us that Jesus said he came not to bring peace but rather the sword (Mt. 10:34). The peace which Jesus did not bring was the false peace which the prophets had warned against. The sword which he did bring was that of the division caused by the word of God, which like a two-edged sword "pierces to the division of soul and spirit, of joints and marrow, and discerns the thoughts and intentions of the heart" (Heb. 4:12).

All are invited into the reign of God. Faith in Jesus and trust in God's mercy are the criteria. Living in accord with the demands of the kingdom rather than those of one's specific profession is decisive.[13]

b. Jesus and reign of God

Jesus proclaimed the reign of God in his words and made it present in his actions. His words begin with a call to conversion and a proclamation of the arrival of the kingdom. "The time is fulfilled, and the kingdom of God is at hand; repent, and believe in the Gospel" (Mk. 1:15; Mt. 4:17). The call to conversion was at the same time an invitation to enter God's reign. Jesus went beyond the prophets' cries for conversion when he declared that, in him, the reign of God had begun and was in fact among the people (Lk. 17:20-21; 12:32).

His words, especially as they are preserved for us in the Sermon on the Mount, describe a new reality in which God's power is manifested and the longing of the people is fulfilled. In God's reign the poor are given the kingdom, the mourners are comforted, the meek inherit the earth, those hungry for righteousness are satisfied, the merciful know mercy, the pure see God, the persecuted know the kingdom and peacemakers are called the children of God (Mt. 5:3-10).

Jesus' words also depict for us the conduct of one who lives under God's reign. His words call for a new way of life which fulfills and goes beyond the law. One of the most striking characteristics of this new way is forgiveness. All who hear Jesus are repeatedly called to forgive one another and to do so not just once, but many, many times (Mt. 6:14-15; Lk. 6:37; Mt. 18:21-22; Mk. 11:25; Lk. 11:4; 17:3-4). The forgiveness of God, which is the beginning of salvation, is manifested in communal forgiveness and mercy.

Jesus also described God's reign as one in which love is an active, life-giving, inclusive force. He called for a love which went beyond family ties and bonds of friendship to reach even those who were enemies (Mt. 5:44-48; Lk. 6:27-28). Such a love does not seek revenge, but rather is merciful in the face of threat and opposition (Mt. 5:39-42; Lk. 6:29-31). Disciples are to love one another as Jesus has loved them (Jn. 15:12).

The words of Jesus would remain an impossible, abstract ideal were it not for two things: the actions of Jesus and his gift of the Spirit. In his actions Jesus showed the way of living in God's reign; he manifested the forgiveness which he called for when he accepted all who came to him, forgave their sins, healed them, released them from the demons who possessed them. In doing these things he made the tender mercy of God present in a world which knew violence, oppression and injustice. Jesus pointed out the injustices of his time and opposed those who laid burdens upon the people or defiled true worship. He acted aggressively and dramatically at times, as when he cleansed the temple of those who had made God's house into a "den of robbers" (Mt. 21:12-17 and parallel texts; Jn. 3:13-25).

Most characteristic of Jesus' actions are those in which he showed his love. As he had commanded others, his love led him even to the giving of his own life to effect redemption. Jesus' message and his actions were dangerous ones in his time, and they led to his death—a cruel and viciously inflicted death, a criminal's death (Gal. 3:13). In all of his suffering, as in all of his life and ministry, Jesus refused to defend himself with force or with violence. He endured violence and cruelty so that God's love might be fully manifest and the world might be reconciled to the One from whom it had become estranged. Even at his death Jesus cried out for forgiveness for those who were his executioners: "Father, forgive them" (Lk. 23:34).

The resurrection of Jesus is the sign to the world that God indeed does reign, does give life in death and that the love of God is stronger even than death (Rom. 8:36-39).

Only in light of this, the fullest demonstration of the power of God's reign, can Jesus' gift of peace—a peace which the world cannot give (Jn. 14:27)—be understood. Jesus gives that peace to his disciples, to those who had witnessed the helplessness of the crucifixion and the power of the resurrection (Jn. 20:19, 20, 26). The peace which he gives to them as he greets them as their risen Lord is the fullness of salvation. It is the reconciliation of the world and God (Rom. 5:1-2, Col. 1:20); the restoration of the unity and harmony of all creation which the Old Testament spoke of with such longing. Because the walls of hostility between God and humankind were broken down in the life and death of the true, perfect servant, union and well-being between God and the world were finally fully possible (Eph. 2:13-22; Gal. 3:28).

c. Jesus and the community of believers

As his first gift to his followers, the risen Jesus gave his gift of peace. This gift permeated the meetings between the risen Jesus and his followers (Jn. 20:19-29). So intense was that gift and so abiding was its power that the remembrance of that gift and the daily living of it became the hallmark of the community of faith. Simultaneously, Jesus gave his Spirit to those who followed him. These two personal and communal gifts are inseparable. In the Spirit of Jesus the community of believers was enabled to recognized and to proclaim the Savior of the world.

Gifted with Jesus' own Spirit, they cold recognize what God had done and know in their own lives the power of the One who creates from nothing. The early Christian communities knew that this power and the reconciliation and peace which marked it were not yet fully operative in their world. They struggled with external persecution and with interior sun, as so all people. But their experience of the Spirit of God and their memory of the Chirst who was with them nevertheless enabled them to look forward with unshakable confidence to the time when the fullness of God's reign would make itself known in the world. At the same time, they knew that they were called to be ministers of reconciliation (2 Cor. 5:19-20), people who would make the peace which God had established visible through the love and the unity within their own communities.

Jesus Christ, then, is our peace, and in his death-resurrection he gives God's peace to our world. In him God has indeed reconciled the world, made it one, and has manifested definitively that his will is this reconciliation, this unity between God and all peoples, and among the peoples themselves. The way to union has been opened, the covenant of peace established. The risen Lord's gift of peace is inextricably bound to the call to follow Jesus and to continue the proclamation of God's reign. Matthew's Gospel (Mt. 28:16-20; cf. Lk. 24:44-53) tells us that Jesus' last words to his disciples were a sending forth and a promise: "I shall be with you all days." In the continuing presence of Jesus, disciples of all ages find the courage to follow him. To follow Jesus Christ implies continual conversion in one's own life as one seeks to act in ways which are consonant with the justice, forgiveness and love of God's reign. Discipleship reaches out to the ends of the earth and calls for reconciliation among all peoples so that God's purpose, "a plan for the fullness of time, to unite all things in him," (Eph. 1:10) will be fulfilled.

3. Conclusion

Even a brief examination of war and peace in the scriptures makes it clear that they do not provide us with detailed answers to the specifics of the questions which we face today. They do not speak specifically of nuclear war or nuclear weapons, for these were beyond the imagination of the communities in which the scriptures were formed. The sacred texts do, however, provide us with urgent direction when we look at today's concrete realities. The fullness of eschatological peace remains before us in hope, and yet the gift of peace is already ours in the reconciliation effected in Jesus Christ. These two profoundly religious meanings of peace inform and influence all other meanings for Christians. Because we have been gifted with God's peace in the risen Christ, we are called to our own peace and to the making of peace in our world. As disciples and as children of God it is our task to seek for ways in which to make the forgiveness, justice and mercy, and love of God visible in a world where violence and enmity are too often the norm. When we listen to God's word, we hear again and always the call to repentance and to belief: to repentance because, although we are redeemed, we continue to need redemption; to belief because although the reign of God is near, it is still seeking its fullness.

B. Kingdom and history

The Christian understanding of history is hopeful and confident but also sober and realistic. "Christian optimism based on the glorious cross of Christ and the outpouring of the Holy Spirit is no excuse for self-deception. For Christians, peace on earth is always a challenge because of the presence of sin in man's heart."[14] Peace must be

built on the basis of justice in a world where the personal and social consequences of sin are evident.

Christian hope about history is rooted in our belief in God as creator and sustainer of our existence and our conviction that the kingdom of God will come in spite of sin, human weakness and failure. It is precisely because sin is part of history that the realization of the peace of the kingdom is never permanent or total. This is the continuing refrain from the patristic period to Pope John Paul II.

"For it was sin and hatred that were an obstacle to peace with God and with others: He destroyed them by the offering of life on the cross; he reconciled in one body those who were hostile (cf. Eph. 2:16; Rom. 12:5) . . .

"Although Christians put all their best energies into preventing war or stopping it, they do not deceive themselves about their ability to cause peace to triumph nor about the effect of their efforts to this end. They therefore concern themselves with all human initiatives in favor of peace and very often take part in them. But they regard them with realism and humility. One could almost say that they relativize them in two senses: They relate them both to the self-deception of humanity and to God's saving plan." [15]

Christians are called to live the tension between the vision of the reign of God and its concrete realization in history. The tension is often described in terms of "already but not yet": i.e., we already live in the grace of the kingdom, but it is not yet the completed kingdom. Hence, we are a pilgrim people in a world marked by conflict and injustice. Christ's grace is at work in the world; his command of love and his call to reconciliation are not purely future ideals but call us to obedience today.

With Pope Paul VI and Pope John Paul II we are convinced that "peace is possible." [16] At the same time experience convinces us that "in this world a totally and permanently peaceful human society is unfortunately a utopia, and that ideologies that hold up that prospect as easily attainable are based on hopes that cannot be realized, whatever the reason behind them." [17]

This recognition—that peace is possible but never assured and that its possibility must be continually protected and preserved in the face of obstacles and attacks upon it—accounts in large measure for the complexity of Catholic teaching on warfare. In the kingdom of God peace and justice will be fully realized. Justice is always the foundation of peace. In history, efforts to pursue both peace and justice are at times in tension, and the struggle for justice may threaten certain forms of peace.

It is within this tension of kingdom and history that Catholic teaching has addressed the problem of war. Wars mark the fabric of human history, distort the life of nations today and, in the form of nuclear weapons, threaten the destruction of the world as we know it and the civilization which has been patiently constructed over centuries. The causes of war are multiple and not easily identified. Christians will find in any violent situation the consequences of sin: not only sinful patterns of domination, oppression or aggression, but the conflict of values and interests which illustrate the limitations of a sinful world. The threat of nuclear war which affects the world today reflects such sinful patterns and conflicts.

In the "already but not yet" of Christian existence, members of the church choose different paths to move toward the realization of the kingdom in history. As we examine both the positions open to individuals for forming their consciences on war and peace and the Catholic teaching on the obligation of the state to defend society, we draw extensively on the pastoral constitution for two reasons.

First, we find its treatment of the nature of peace and the avoidance of war compelling, for it represents the prayerful thinking of bishops of the entire world and calls vigorously for fresh new attitudes while faithfully reflecting traditional church teaching. Second, the council fathers were familiar with more than the horrors of World Wars I and II. They saw conflicts continuing "to produce their devastating effect day by day somewhere in the world," the increasing ferocity of warfare made possible by modern scientific weapons, guerrilla warfare "drawn out by new methods of deceit and subversion" and terrorism regarded as a new way to wage war.[18] The same phenomena mark our day.

For similar reasons we draw heavily upon the popes of the nuclear age, from Pope Pius XII through Pope John Paul II. The teaching of popes and councils must be incarnated by each local church in a manner understandable to its culture. This allows each local church to bring its unique insights and experience to bear on the issues shaping our world. From 1966 to the present, American bishops, individually and collectively, have issued numerous statements on the issues of peace and war, ranging from the Vietnam War to conscientious objection and the use of nuclear weapons. These statements reflect not only the concerns of the hierarchy, but also the voices of our people, who have increasingly expressed to us their alarm over the threat of war. In this letter we wish to continue and develop the teaching on peace and war which we have previously made and which reflects both the teaching of the universal church and the insights and experience of the Catholic community of the United States.

It is significant that explicits treatment of war and peace is reserved for the final chapter of the pastoral constitution. Only after exploring the nature and destiny of the human person does the council take up the nature of peace, which it sees not as an end in itself, but as an indispensable condition for the task "of constructing for all men everywhere a world more genuinely human." [19] And understanding of this task is crucial to understanding the church's view of the moral choices open to us as Christians.

C. The moral choices for the kingdom

In one of its most frequently quoted passages the pastoral constitution declares that it is necessary "to undertake a completely fresh reappraisal of war." [20] The council's teaching situates this call for a "fresh reappraisal" within the context of a broad analysis of the dignity of the human person and the state of the world today. If we lose sight of this broader discussion we cannot grasp the council's wisdom. For the issue of war and peace confronts everyone with a basic question: What contributes to and what impedes the construction of a more genuinely human world? If we are to evaluate war with an entirely new attitude, we must be serious about approaching the human person with an entirely new attitude. The obligation for all of humanity to work toward universal respect for human rights and human dignity is a fundamental imperative of the social, economic and political order.

It is clear then that to evaluate war with a new attitude, we must go far beyond an examination of weapons systems or military strategies. We must probe the meaning of the moral choices which are ours as Christians. In accord with the vision of Vatican II, we need to be sensitive to both the danger of war and the conditions of true freedom within which moral choices can be made.[21] Peace is the setting in which moral choice can be most effectively exercised. How can we move toward that peace which is indispensable for true human freedom? How do we define such peace?

1. The Nature of Peace

The Catholic tradition has always understood the meaning of peace in positive terms. Peace is both a gift of God and a human work. It must be constructed on the basis of central human values: truth, justice, freedom and love. The pastoral constitution states the traditional conception of peace:

"Peace is not merely the absence of war. Nor can it be reduced solely to the maintenance of a balance of power between enemies. Nor is it brought about by dictatorship. Instead, it is rightly and appropriately called 'an enterprise of justice' (Is. 32:7). Peace results from that harmony built into human society by its divine founder and actualized by men as they thirst after ever greater justice."[22]

Pope John Paul II has enhanced this positive conception of peace by relating it with new philosophical depth to the church's teaching on human dignity and human rights. The relationship was articulated in his 1979 Address to the General Assembly of the United Nations and also in his World Day of Peace Message of 1982:

"Unconditional and effective respect for each one's unprescriptable and unalienable rights is the necessary condition in order that peace may reign in a society. Vis-a-vis these basic rights, all others are in a way derivatory and secondary. In a society in which these rights are not protected, the very idea of universality is dead as soon as a small group of individuals set up for their own exclusive advantage a principle of discrimination whereby the rights and even the lives of others are made dependent on the whim of the stronger."[23]

As we have already noted, however, the protection of human rights and the preservation of peace are tasks to be acomplished in a world marked by sin and conflict of various kinds. The church's teaching on war and peace establishes a strong presumption against war which is binding on all; it then examines when this presumption may be overriden, precisely in the name of preserving the kind of peace which protects human dignity and human rights.

2. The Presumption Against War and the Principle of Legitimate Self-Defense

Under the rubric "curbing the savagery of war," the council contemplates the "melancholy state of humanity." It looks at this world as it is, not simply as we would want it to be. The view is stark: ferocious new means of warfare threatening savagery surpassing that of the past, deceit, subversion, terrorism, genocide. This last crime in particular is vehemently condemned as horrendous, but all activities which deliberately conflict with the all-embracing principles of universal natural law, which is permanently binding, are criminal, as are all orders commanding such action. Supreme commenda-

tion is due the courage of those who openly and fearlessly resist those who issue such commands. All individuals, especially government officials and experts, are bound to honor and improve upon agreements which are "aimed at making military activity and its consequences less inhuman" and which "better and more workably lead to restraining the frightfulness of war." [24]

This remains a realistic appraisal of the world today. Later in this section the council calls for us "to strain every muscle as we work for the time when all war can be completely outlawed by international consent." We are told, however, that this goal requires the establishment of some universally recognized public authority with effective power "to safeguard, on the behalf of all, security, regard for justice and respect for rights." [25] But what of the present? The council is exceedingly clear, as are the popes:

"Certainly war has not been rooted out of human affairs. As long as the danger of war remains and there is no competent and sufficiently powerful authority at the international level, governments cannot be denied the right to legitimate defense once every means of peaceful settlement has been exhausted. Therefore, government authorities and others who share public responsibility have the duty to protect the welfare of the people entrusted to their care and to conduct such grave matters soberly.

"But it is one thing to undertake military action for the just defense of the people, and something else again to seek the subjugation of other nations. Nor does the possession of war potential make every military or political use of it lawful. Neither does the mere fact that war has unhappily begun mean that all is fair between the warring parties." [26]

The Christian has no choice but to defend peace, properly understood, against aggression. This is an inalienable obligation. It is the *how* of defending peace which offers moral options. We stress this principle again because we observe so much misunderstanding about both those who resist bearing arms and those who bear them. Great numbers from both traditions provide examples the world continues to need.

Of the millions of men and women who have served with integrity in the armed forces, many have laid down their lives. Many other serve today throughout the world in the difficult and demanding task of helping to preserve that "peace of a sort" of which the council speaks.

We see many deeply sincere individuals who, far from being indifferent or apathetic to world evils, believe strongly in conscience that they are best defending true peace by refusing to bear arms. In some cases they are motivated by their understanding of the Gospel and the life and death of Jesus as for bidding all violence. In others, their motivation is simply to give personal example of Christian forbearance as a positive, constructive approach toward living reconciliation with enemies. In still other cases, they propose or engage in "active non-violence" as programed resistance to thwart aggression or to render ineffective any oppression attempted by force of arms. No government, and certainly no Christian, may simply assume that such individuals are mere pawns of conspiratorial forces or guilty of cowardice.

Catholic teaching sees these two distinct moral responses as having a complementary relationship in the sense that both seek to serve the common good. They differ in their perception of how the common good is to be defended most effectively, but both responses testify to the Christian conviction that peace must be pursued and rights defended within moral restraints and in the context of defining other basic human values.

In all of this discussion of distinct choices, of course, we are referring to options open to individuals. The council and the popes have stated clearly that governments threatened by armed, unjust aggression *must* defend their people. This includes defense by armed force if necessary as a last resort. We shall discuss below the conditions and limits imposed on such defense. Even when speaking of individuals, however, the council is careful to preserve the fundamental *right* of defense. Some choose not to vindicate their rights by armed force and adopt other methods of defense, but they do not lose the right of defense nor may they renounce their obligations to others. They are praised by the council, as long as the rights and duties of others or of the community itself are not injured.

Pope Pius XII is especially strong in his conviction about the responsibility of the Christian to resist unjust aggression:

"A people threatened with an unjust aggression, or already its victim, may not remain passively indifferent, if it would think and act as befits a Christian. All the more does the solidarity of the family of nations forbid others to behave as mere spectators, in any attitude of apathetic neutrality. Who will ever measure the harm already caused in the past by such indifference to war of aggression, which is quite alien to the Christian instinct? How much more keenly has it brought any advantage in recompense? On the contrary, it has only reassured and encouraged the authors and fomentors of aggression, while it obliges the several peoples, left to themselves, to increase their armaments indefinitely. . . .

"Among (the) goods (of humanity) some are of such importance for society that it is perfectly lawful to defend them against unjust aggression. *Their defense is even an obligation for the nations as a whole, who have a duty not to abandon a nation that is attacked."* [27]

None of the above is to suggest, however, that armed force is the only defense against unjust aggression, regardless of circumstances. Well does the council require that grave matters concerning the protection of peoples be conducted soberly. The council fathers were well aware that in today's world, the "horror and perversity of war are immensely magnified by the multiplication of scientific weapons. For acts of war involving these weapons can inflict massive and indiscriminate destruction far exceeding the bounds of legitimate defense." [28] Hence we are warned: "Men of our time must realize that they will have to give a somber reckoning for their deeds of war. For the course of the future will depend largely on the decisions they make today." [29] There must be serious and continuing study and efforts to develop programmed methods for both individuals and nations to defend against unjust aggression without using violence.

We believe work to develop nonviolent means of fending off aggression and resolving conflict best reflects the call of Jesus both to love and to justice. Indeed, each increase in the potential destructiveness of weapons and therefore of war serves to underline the rightness of the way that Jesus mandated to his followers. But, on the other hand, the fact of aggression, oppression and injustice in our world also serves to legitimate the resort to weapons and armed force in defense of justice. We must recognize the reality of the paradox we face as Christians living in the context of the world as it persently exists; we must continue to articulate our belief that love is possible and the only real hope for all human relations, and yet accept that force, even deadly force, is sometimes justified and that nations must provide for their defense. It is the mandate of Christians in the face of this paradox to strive to resolve it through an even greater commitment to Christ and his message. As Pope John Paul II said:

"Christains are aware that plans based on aggression, domination and the manipulation of others lurk in human hearts, and sometimes even secretly nourish human intentions in spite of certain declarations or manifestations of a pacifist nature. For Christians know that in this world a totally and permanently peaceful human society is unfortunately a utopia and that ideologies that hold up that prospect as easily attainable are based on hopes that cannot be realized, whatever the reason behind them.

"It is a question of a mistaken view of the human condition, a lack of application in considering the question as a whole; or it may be a case of evasion in order to calm fear, or in still other cases a matter of calculated self-interest. Christians are convinced, if only because they have learned from personal experience, that these deceptive hopes lead straight to the false peace of totalitarian regimes. But this realistic view in no way prevents Christians from working for peace; instead, it stirs up their ardor, for they also know that Christ's victory over deception, hate and death gives those in love with peace a more decisive motive for action than what the most generous theories about man have to offer; Christ's victory likewise gives a hope more surely based than any hope held out by the most audacious dreams.

"This is why Christians, even as they strive to resist and prevent every form of warfare, have no hesitation in recalling that, in the name of an elementary requirement of justice, peoples have a right and even a duty to protect their existence and freedom by proportionate means against an unjust aggressor." [30]

In light of the framework of Catholic teaching on the nature of peace, the avoidance of war and the state's right of legitimate defense, we can now spell out certain moral principles within the Catholic tradition which provide guidance for public policy and individual choice.

3. The Just-War Criteria

The moral theory of the "just-war" or "limited-war" doctrine begins with the presumption which binds all Christians: We should do no harm to our neighbors; how we treat our enemy is the key test of whether we love our neighbor; and the possibility of taking even one human life is a prospect we should consider in fear and trembling. How is it possible to move from these presumptions to the idea of a justifiable use of lethal force?

Historically and theologically the clearest answer to the question is found in St. Augustine. Augustine was impressed by the fact and the consequences of sin in history—the "not yet" dimension of the kingdom. In his view war was both the result of sin and a tragic remedy for sin in the life of political societies. War arose from disordered ambitions, but it could also be used in some cases

at least to restrain evil and protect the innocent. The classic case which illustrated his view was the use of lethal force to prevent aggression against innocent victims. Faced with the fact of attack on the innocent, the presumption that we do no harm even to our enemy yielded to the command of love understood as the need to restrain an enemy who would injure the innocent.

The just-war argument has taken several forms in the history of Catholic theology, but this Augustinian insight is its central premise.[31] In the 20th century, papal teaching has used the logic of Augustine and Aquinas[32] to articulate a right of self-defense for states in a decentralized international order and to state the criteria for exercising that right. The essential position was stated by Vatican II: "As long as the danger of war persists and there is no international authority with the necessary competence and power, governments cannot be denied the right of lawful self-defense, once all peace efforts have failed."[33] We have already indicated the centrality of this principle for understanding Catholic teaching about the state and its duties.

Just-war teaching has evolved, however, as an effort to prevent war; only if war cannot be rationally avoided does the teaching then seek to restrict and reduce its horrors. It does this by establishing a set of rigorous conditions which must be met if the decision to go to war is to be morally permissible. Such a decision, especially today, requires extraordinarily strong reasons for overriding the presumption *in favor of peace* and *against* war. This is one significant reason why valid just-war teaching makes provision for conscientious dissent. It is presumed that all sane people prefer peace, never *want* to initiate war and accept even the most justifiable defensive war only as a sad necessity. Only the most powerful reasons may be permitted to override such objection. In the words of Pope Pius XII:

"The Christian will for peace . . . is very careful to avoid recourse to the force of arms in the defense of rights which, however legitimate, do not offset the risk of kindling a blaze with all its spiritual and material consequences."[34]

The determination of *when* conditions exist which allow the resort to force in spite of the strong presumption against it is made in light of *jus ad bellum* criteria. The determination of *how* even a justified resort to force must be conducted is made in light of the *jus in bello* criteria. We shall briefly explore the meaning of both.[35]

Jus ad Bellum: Why and when recourse to war is permissible.

a. Just cause

War is permissible only to confront "a real and certain danger," i.e., to protect innocent life, to preserve conditions necessary for decent human existence and to secure basic human rights. As both Pope Pius XII and Pope John XXIII made clear, if war of retribution was ever justifiable, the risks of modern war negate such a claim today.

b. Competent authority

In the Catholic tradition the right to use force has always been joined to the common good; war must be declared by those with responsibility for public order, not by private groups or individuals.

The requirement that a decision to go to war must be made by competent authority is particularly important in a democratic society. It needs detailed treatment here since it involves a broad spectrum of related issues. Some of the bitterest divisions of society in our own nation's history, for example, have been provoked over the question of whether or not a president of the United States has acted constitutionally and legally in involving our country in a de facto war, even if—indeed, especially if—war was never formally declared. Equally perplexing problems of conscience can be raised for individuals expected or legally required to go to war even though our duly elected representatives in Congress have in fact voted for war.

The criterion of competent authority is of further importance in a day when revolutionary war has become commonplace. Historically, the just-war tradition has been open to a "just revolution" position, recognizing that an oppressive government may lose its claim to legitimacy. Insufficient analytical attention has been given to the moral issues of revolutionary warfare. The mere possession of sufficient weaponry, for example, does not legitimize the initiation of war by "insurgents" against an established government, any more than the government's systematic oppression of its people can be carried out under the doctrine of "national security."

While the legitimacy of revolution in some circumstances cannot be denied, just-war teachings must be applied as rigorously to revolutionary-counterrevolutionary conflicts as to others. The issue of who constitutes competent authority and how such authority is exercised in essential.

When we consider in this letter the issues of conscientious objection and selective conscientious objection, the issue of competent authority will arise again.

c. Comparative justice

Questions concerning the means of waging war today, particularly in view of the destructive potential of weapons, have tended to override questions concerning the comparative justice of the positions of respective adversaries or enemies. In essence: Which side is sufficiently "right" in a dispute, and are the values at stake critical enough to override the presumption against war? The question in its most basic form is this: Do the rights and values involved justify killing? For whatever the means used, war by definition involves violence, destruction, suffering and death.

The category of comparative justice is designed to emphasize the presumption against war which stands at the beginning of just-war teaching. In a world of sovereign states recognizing neither a common moral authority nor a central political authority comparative justice stresses that no state should act on the basis that it has "absolute justice" on its side. Every party to a conflict should acknowledge the limits of its "just cause" and the consequent requirement to use only limited means in pursuit of its objectives. Far from legitimizing a crusade mentality, comparative justice is designed to relativize absolute claims and to restrain the use of force even in a "justified" conflict.[36]

Given techniques of propaganda and the ease with which nations and individuals either assume or delude themselves into believing that God or right is clearly on their side, the test of comparative justice may be extremely difficult to apply. Clearly, however, this is not the case in every instance of war. Blatant aggression from without and subversion from within are often enough readily identifiable by all reasonably fair-minded people.

d. Right intention

Right intention is related to just cause—war can be legitimately intended only for the reasons set forth above as a just cause. During the conflict, right intention means pursuit of peace and reconciliation, including avoiding unnecessarily destructive acts or imposing unreasonable conditions (e.g., unconditional surrender).

e. Last resort

For resort to war to be justified, all peaceful alternatives must have been exhausted. There are formidable problems in this requirement. No international organization currently in existence has exercised sufficient internationally recognized authority to be able either to mediate effectively in most cases or to prevent conflict by the intervention of U.N. or other peacekeeping forces. Furthermore, there is a tendency for nations or peoples which perceive conflict between or among other nations as advantageous to themselves to attempt to prevent a peaceful settlement rather than advance it.

We regret the apparent unwillingness of some to see in the United Nations organization the potential for world order which exists and to encourage its development. Pope Paul VI called the United Nations the last hope for peace. The loss of this hope cannot be allowed to happen. Pope John Paul II is again instructive on this point:

"I wish above all to repeat my confidence in you, the leaders and members of the international organizations, and in you, the international officials! In the course of the last 10 years your organizations have too often been the object of attempts at manipulation on the part of nations wishing to exploit such bodies. However it remains true that the present multiplicity of violent clashes, divisions and blocks on which bilateral relations founder, offer the great international organizations the opportunity to engage upon the qualitative change in their activities, even to reform on certain points their own structures in order to take into account new realities and to enjoy effective power."[37]

f. Probability of success

This is a difficult criterion to apply, but its purpose is to prevent irrational resort to force or hopeless resistance when the outcome of either will clearly be disproportionate or futile. The determination includes a recognition that at times defense of key values, even against great odds, may be a "proportionate" witness.

g. Proportionality

In terms of the *jus ad bellum* criteria, proportionality means that the damage to be inflicted and the costs incurred by war must be proportionate to the good expected by taking up arms. Nor should judgments concerning proportionality be limited to the temporal order without regard to a spiritual dimension in terms of "damage," "cost" and "the good expected." In today's interdependent world even a local conflict can affect people everywhere; this is particularly the case when the nuclear powers are involved. Hence a nation cannot justly go to war today without considering the effect of its action on others and on the international community.

This principle of proportionality applies throughout the conduct of the war as well as to the decision to begin warfare. During the Vietnam War our bishops' conference ultimately concluded that the conflict had reached such a level of devastation to the adversary and damage to our own society that continuing it could not be justified.[38]

Jus in Bello

Even when the stringent conditions which justify resort to war are met, the conduct of war (i.e., strategy, tactics and individual actions) remains subject to continuous scrutiny in light of two principles which have special significance today precisely because of the destructive capability of modern technological warfare. These principles are proportionality and discrimination. In discussing them here we shall apply them to the question of *jus ad bellum* as well as *jus in bello;* for today it becomes increasingly difficult to make a decision to use any kind of armed force, however limited initially in intention and in the destructive power of the weapons employed, without facing at least the possibility of escalation to broader, or even total, war and to the use of weapons of horrendous destructive potential. This is especially the case when adversaries are "superpowers," as the council clearly envisioned:

"Indeed, if the kind of weapons now stocked in the arsenals of the great powers were to be employed to the fullest, the result would be the almost complete reciprocal slaughter of one side by the other, not to speak of the widespread devastation that would follow in the world and the deadly aftereffects resulting from the use of such weapons." [39]

It should not be thought, of course, that massive slaughter and destruction would result only from the extensive use of nuclear weapons. We recall with horror the carpet and incendiary bombings of World War II, the deaths of hundreds of thousands in various regions of the world through "conventional" arms, the unspeakable use of gas and other forms of chemical warfare, the destruction of homes and of crops, the utter suffering war has wrought during the centuries before and the decades since the use of the "atom bomb." Nevertheless, every honest person must recognize that, especially given the proliferation of modern scientific weapons, we now face possibilities which are appalling to contemplate. Today, as never before, we must ask not merely what will happen but what may happen, especially if major powers embark on war. Pope John Paul II has repeatedly pleaded that world leaders confront this reality:

"(I)n view of the difference between classical warfare and nuclear or bacteriological war—a difference so to speak of nature—and in view of the scandal of the arms race seen against the background of the needs of the Third World, this right (of defense), which is very real in principle, only underlines the urgency of world society to equip itself with effective means of negotiation. In this way the nuclear terror that haunts our time can encourage us to enrich our common heritage with a very simple discovery that is within our reach, namely that war is the most barbarous and least effective way of resolving conflicts." [40]

The Pontifical Academy of Sciences reaffirmed the Holy Father's theme in its November 1981 "Statement on the Consequences of Nuclear War." Then, in a meeting convoked by the pontifical academy, representatives of national academies of science from throughout the world issued a "Declaration on the Prevention of Nuclear War" which specified the meaning of Pope John Paul II's statement that modern warfare differs by nature from previous forms of war. The scientists said:

"Throughout its history humanity has been confronted with war, but since 1945 the nature of warfare has changed so profoundly that the future of the human race, of generations yet unborn, is imperiled. . . . For the first time it is possible to cause damage on such a catastrophic scale as to wipe out a large part of civilization and to endanger its very survival. The large-scale use of such weapons could trigger major and irreversible ecological and genetic changes whose limits cannot be predicted." [41]

And earlier, with such thoughts plainly in mind, the council had made its own "the condemnation of total war already pronounced by recent popes." [42] This condemnation is demanded by the principles of proportionality and discrimination. Response to aggression must not exceed the nature of the aggression. To destroy civilization as we know it by waging a "total war" as today it could be waged would be a monstrously disproportionate response to aggression on the part of any nation.

Moreover, the lives of innocent persons may never be taken directly, regardless of the purpose alleged for doing so. To wage truly "total" war is by definition to take huge numbers of innocent lives. Just response to aggression must be discriminate; it must be directed against unjust aggressors, not against innocent people caught up in a war not of their making. The council therefore issued its memorable declaration:

"Any act of war aimed indiscriminately at the destruction of entire cities or of extensive areas along with their population is a crime against God and man himself. It merits unequivocal and unhesitating condemnation." [43]

When confronting choices among specific military options, the question asked by proportionality is: Once we take into account not only the military advantages that will be achieved by using this means, but also all the harms reasonably expected to follow from using it, can its use still be justified? We know, of course, that no end can justify means evil in themselves, such as the executing of hostages or the targeting of noncombatants. Nonetheless, even if the means adopted is not evil in itself, it is necessary to take into account the probable harms that will result from using it and the justice of accepting those harms. It is of utmost importance in assessing harms and the justice of accepting them to think about the poor and the helpless, for they are usually the ones who have the least to gain and the most to lose when war's violence touches their lives.

In terms of the arms race, if the *real* end in view is legitimate defense against unjust aggression and the means to this end are not evil in themselves, we must still examine the question of proportionality concerning attendant evils. Do the exorbitant costs, the general climate of insecurity generated, the possibility of accidental detonation of highly destructive weapons, the danger of error and miscalculation that could provoke retaliation and war—do such evils or others attendant upon and indirectly deriving from the arms race make the arms race itself a disproportionate response to aggression? Pope John Paul II is very clear in his insistence that the exercise of the right and duty of a people to protect their existence and freedom is contingent on the use of proportionate means.[44]

Finally, another set of questions concerns the interpretation of the principle of discrimination. The principle prohibits directly intended attacks on non-combatants and non-military targets. It raises a series of questions about the term "intentional," the category of "non-combatant" and the meaning of "military."

These questions merit the debate occurring with increasing frequency today. We encourage such debate, for concise and definitive answers still appear to be wanting. Mobilization of forces in modern war includes not only the military, but to a significant degree the political economic and social sectors. It is not always easy to determine who is directly involved in a "war effort" or to what degree. Plainly, though, not even by the broadest definition can one rationally consider combatants entire classes of human beings such as schoolchildren, hospital patients, the elderly, the ill, the average industrial worker producing goods not directly related to military purposes, farmers and many others. They may never be directly attacked.

Direct attacks on military targets involve similar complexities. Which targets are "military" ones and which are not? To what degree, for instance, does the use (by either revolutionaries or regular military forces) of a village or housing in a civilian populated area invite attack? What of a munitions factory in the heart of a city? Who is directly responsible for the deaths of non-combatants should the attack be carried out? To revert to the question raised earlier, how many deaths of non-combatants are "tolerable" as a result of indirect attacks—attacks directed against combat forces and military targets which nevertheless kill non-combatants at the same time?

These two principles in all their complexity must be applied to the range of weapons—conventional, nuclear, biological and chemical—with which nations are armed today.

4. The Value of Non-Violence

Moved by the example of Jesus' life and by his teaching, some Christians have from the earliest days of the church committed themselves to a non-violent lifestyle.[45] Some understood the Gospel of Jesus to prohibit all killing. Some affirmed the use of prayer and other spiritual methods as means of responding to enmity and hostility.

In the middle of the second century St. Justin proclaimed to his pagan readers that Isaiah's prophecy about turning swords into ploughshares and spears into sickles had been fulfilled as a consequence of Christ's coming:

"And we who delighted in war, in the slaughter of one another, and in every other kind of inequity have in every part of the world converted our weapons into implements of peace—our swords into ploughshares, our spears into farmers' tools—and we cultivate piety, justice, brotherly charity, faith and hope, which we derive from the Father through the crucified Savior." [46]

Writing in the third century, St. Cyprian of Carthage struck a similar note when he indicated that the Christians of his day did not fight against their enemies. He himself regarded their conduct as proper:

"They do not even fight against those who are attacking since it is not granted to the innocent to kill even the aggressor, but promptly to deliver up their souls and blood that since so much malice and cruelty are rampant in the world they may more quickly withdraw from the malicious and the cruel." [47]

Some of the early Christian opposition to military service was a response to the idolatrous practices which prevailed in the Roman army. Another powerful motive was the fact that army service involved preparation for fighting and killing. We see this in the case of St. Martin of Tours during the

fourth century, who renounced his soldierly profession with the explanation: "Hitherto I have served you as a soldier. Allow me now to become a soldier of God . . . I am a soldier of Christ. It is not lawful for me to fight." [48]

In the centuries between the fourth century and our own day, the theme of Christian non-violence and Christian pacifism has echoed and reechoed, sometimes more strongly, sometimes more faintly. One of the great non-violent figures in those centuries was St. Francis of Assisi. Besides making personal efforts on behalf of reconciliation and peace, Francis stipulated that lay persons who became members of his Third Order were not "to take up lethal weapons, or bear them about, against anybody."

The vision of Christian non-violence is not passive about injustice and the defense of the rights of others; it rather affirms and exemplifies what it means to resist injustice through non-violent methods.

In the 20th century, prescinding from the non-Christian witness of a Mahatma Ghandi and its worldwide impact, the non-violent witness of such figures as Dorothy Day and Martin Luther King has had a profound impact upon the life of the church in the United States. The witness of numerous Christians who had preceded them over the centuries was affirmed in a remarkable way at the Second Vatican Council.

Two of the passages which were included in the final version of the pastoral constitution gave particular encouragement for Catholics in all walks of life to assess their attitudes toward war and military service in the light of Christian pacifism. In Paragraph 79 the council fathers called upon governments to enact laws protecting the rights of those who adopted the position of conscientious objection to all war: "Moreover, it seems right that laws make humane provisions for the case of those who for reasons of conscience refuse to bear arms, provided, however, that they accept some other form of service to the human community." [49] This was the first time a call for legal protection of conscientious objection had appeared in a document of such prominence. In addition to its own profound meaning this statement took on even more significance in light of the praise that the council fathers had given in the preceding section "to those who renounce the use of violence in the vindication of their rights." [50] In "Human Life in Our Day" (1969), we called for legislative provision to recognize selective conscientious objectors as well. [51]

As Catholic bishops it is incumbent upon us to stress to our own community and to the wider society the significance of this support for a pacifist option for individuals in the teaching of Vatican II and the reaffirmation that the popes have given to non-violent witness since the time of the council.

In the development of a theology of peace and the growth of the Christian pacifist position among Catholics, these words of the pastoral constitution have special significance: "All these factors force us to undertake a completely fresh reappraisal of war." [52] The council fathers had reference to "the development of armaments by modern science (which) has immeasurably magnified the horrors and wickedness of war." [53] While the just-war teaching has clearly been in possession for the past 1,500 years of Catholic thought, the "new moment" in which we find ourselves sees the just-war teaching and non-violence as distinct but interdependent methods of evaluating warfare. They diverge on some specific conclusions, but they share a common presumption against the use of force as a means of settling disputes.

Both find their roots in the Christian theological tradition; each contributes to the full moral vision we need in pursuit of a human peace. We believe the two perspectives support and complement one another, each preserving the other from distortion. Finally, in an age of technological warfare, analysis from the viewpoint of nonviolence and analysis from the viewpoint of the just-war teaching often converge and agree in their opposition to methods of warfare which are in fact indistinguishable from total warfare.

II. WAR AND PEACE IN THE MODERN WORLD: PROBLEMS AND PRINCIPLES

Both the just-war teaching and non-violence are confronted with a unique challenge by nuclear warfare. This must be the starting point of any further moral reflection: Nuclear weapons particularly and nuclear warfare as it is planned today raise new moral questions. No previously conceived moral position escapes the fundamental confrontation posed by contemporary nuclear strategy. Many have noted the similarity of the statements made by eminent scientists and Vatican II's observation that we are forced today "to undertake a completely fresh reappraisal of war." The task before us is not simply to repeat what we have said before; it is first to consider anew whether and how our religious-moral tradition can assess, direct, contain and, we hope, help to eliminate the threat posed to the human family by the nuclear arsenals of the world. Pope John Paul II captured the essence of the problem during his pilgrimage to Hiroshima: "In the past it was possible to destroy a village, a town, a region, even a country. Now it is the whole planet that has come under threat." [54]

The Holy Father's observation illustrates why the moral problem is also a religious question of the most profound significance. In the nuclear arsenals of the United States or the Soviet Union alone there exists a capacity to do something no other age could imagine: We can threaten the entire planet. [55] For people of faith this means we read the Book of Genesis with a new awareness; the moral issue at stake in nuclear war involves the meaning of sin in its most graphic dimensions. Every sinful act is a confrontation of the creature and the Creator. Today the destructive potential of the nuclear powers threatens the human person, the civilization we have slowly constructed and even the created order itself.

We live today, therefore, in the midst of a cosmic drama: we possess a power which should never be used, but which might be used if we do not reverse our direction. We live with nuclear weapons knowing we cannot afford to make one serious mistake. This fact dramatizes the precariousness of our position, politically, morally and spiritually.

A prominent "sign of the times" today is a sharply increased awareness of the danger of the nuclear arms race. Such awareness has produced a public discussion about nuclear policy here and in other countries which is unprecedented in its scope and depth. What has been accepted for years with almost no question is now being subjected to the sharpest criticism. What previously had been defined as a safe and stable system of deterrence is today viewed with political and moral skepticism. Many forces are at work in this new evaluation, and we believe one of the crucial elements is the gospel vision of peace which guides our work in this pastoral letter. The nuclear age has been the theater of our existence for almost four decades; today it is being evaluated with a new perspective. For many the leaven of the Gospel and the light of the Holy Spirit create the decisive dimension of this new perspective.

A. The new moment

At the center of the new evaluation of the nuclear arms race is a recognition of two elements: the destructive potential of nuclear weapons and the stringent choices which the nuclear age poses for both politics and morals.

The fateful passage into the nuclear age as a military reality began with the bombing of Nagasaki and Hiroshima, events described by Pope Paul VI as a "butchery of untold magnitude." [56] Since then, in spite of efforts at control and plans for disarmament (e.g., the Baruch Plan of 1946), the nuclear arsenals have escalated, particularly in the two superpowers. The qualitative superiority of these two states, however, should not overshadow the fact that four other countries possess nuclear capacity and a score of states are only steps away from becoming "nuclear nations."

This nuclear escalation has been opposed sporadically and selectively, but never effectively. The race has continued in spite of carefully expressed doubts by analysts and other citizens and in the face of forcefully expressed opposition by public rallies. Today the opposition to the arms race is no longer selective or sporadic, it is widespread and sustained. The danger and destructiveness of nuclear weapons are understood and resisted with new urgency and intensity. There is in the public debate today an endorsement of the position submitted by the Holy See at the United Nations in 1976: The arms race is to be condemned as a danger, an act of aggression against the poor, and a folly which does not provide the security it promises. [57]

Papal teaching has consistently addressed the folly and danger of the arms race; but the new perception of it which is now held by the general public is due in large measure to the work of scientists and physicians who have described for citizens the concrete human consequences of a nuclear war. [58]

In a striking demonstration of his personal and pastoral concern for preventing nuclear war, Pope John Paul II commissioned a study by the Pontifical Academy of Sciences which reinforced the findings of other scientific bodies. The Holy Father had the study transmitted by personal representative to the leaders of the United States, the Soviet Union, the United Kingdom and France, and to the president of the General Assembly of the United Nations. One of its conclusions is especially pertinent to the public debate in the United States:

"Recent talk about winning or even surviving a nuclear war must reflect a failure to appreciate a medical reality: Any nuclear war would inevitably cause death, disease and suffering of pandemonic proportions and without the possibility of effective medical intervention. That reality leads to the same conclusion physicians have reached for life-threatening epidemics throughout history: Prevention is essential for control." [59]

This medical conclusion has a moral corollary. Traditionally the church's moral teaching sought first to prevent war and

then to limit its consequences if it occurred. Today the possibilities for placing political and moral limits on nuclear war are so minimal that the moral task, like the medical, is prevention: As a people, we must refuse to legitimate the idea of nuclear war. Such a refusal will require not only new ideas and new vision, but what the Gospel calls conversion of the heart.

To say no to nuclear war is both a necessary and a complex task. We are moral teachers in a tradition which has always been prepared to relate moral principles to concrete problems. Particularly in this letter we could not be content with simply restating general moral principles or repeating well-known requirements about the ethics of war. We have had to examine, with the assistance of a broad spectrum of advisers of varying persuasions, the nature of existing and proposed weapons systems, the doctrines which govern their use and the consequences of using them. We have consulted people who engage their lives in protest against the existing nuclear strategy or the United States, and we have consulted others who have held or do hold responsibility for this strategy. It has been a sobering and perplexing experience. In light of the evidence which witnesses presented and in light of our study, reflection and consultation, we must reject nuclear war. But we feel obliged to relate our judgement to the specific elements which comprise the nuclear problem.

Though certain that the dangerous and delicate nuclear relationship the superpowers now maintain should not exist, we understand how it came to exist. In a world of sovereign states devoid of central authority and possessing the knowledge to produce nuclear weapons many choices were made, some clearly objectionable, others well-intended with mixed results, which brought the world to its present dangerous situation.

We see with increasing clarity the political folly of a system which threatens mutual suicide, the psychological damage this does to ordinary people, especially the young, the economic distortion of priorities—billions readily spent for destructive instruments while pitched battles are waged daily in our legislatures over much smaller amounts for the homeless, the hungry and the helpless here and abroad. But it is much less clear how we translate a no to nuclear war into the personal and public choices which can move us in a new direction, toward a national policy and an international system which more adequately reflect the values and vision of the Kingdom of God.

These tensions in our assessment of the politics and strategy of the nuclear age reflect the conflicting elements of the nuclear dilemma and the balance of terror which it has produced. We have said earlier in this letter that the fact of war reflects the existence of sin in the world. The nuclear threat and the danger it poses to human life and civilization exemplify in a qualitatively new way the perennial struggle of the political community to contain the use of force, particularly among states.

Precisely because of the destructive nature of nuclear weapons, strategies have been developed which previous generations would have found unintelligible. Today military preparations are undertaken on a vast and sophisticated scale, but the declared purpose is not to use the weapons produced. Threats are made which would be suicidal to implement. The key to security is no longer only military secrets, for in some instances security may best be served by informing one's adversary publicly what weapons one has and what plans exist for their use. The presumption of the nation-state system that sovereignty implies an ability to protect a nation's territory and population is precisely the presumption denied by the nuclear capacities of both superpowers. In a sense each is at the mercy of the other's perception of what strategy is "rational," what kind of damage is "unacceptable," how "convincing" one side's threat is to the other.

The political paradox of deterrence has also strained our moral conception. May a nation threaten what it may never do? May it possess what it may never use? Who is involved in the threat each superpower makes: government officials? Or military personnel? Or the citizenry in whose defense the threat is made?

In brief, the danger of the situation is clear; but how to prevent the use of nuclear weapons, how to assess deterrence and how to delineate moral responsibility in the nuclear age are less clearly seen or stated. Reflecting the complexity of the nuclear problem, our arguments in this pastoral must be detailed and nuanced; but our no to nuclear war must in the end be definitive and decisive.

B. Religious leadership and the public debate

Because prevention of nuclear war appears from several perspectives to be not only the surest but only way to limit its destructive potential, we see our role as moral teachers precisely in terms of helping to form public opinion with a clear determination to resist resort to nuclear war as an instrument of national policy. If "prevention is the only cure," then there are diverse tasks to be performed in preventing what should never occur. As bishops we see a specific task defined for us in Pope John Paul II's 1982 World Day of Peace Message:

"Peace cannot be built by the power of rulers alone. Peace can be firmly constructed only if it corresponds to the resolute determination of all people of good will. Rulers must be supported and enlightened by a public opinion that encourages them or, where necessary, expresses disapproval." [60]

The pope's appeal to form public opinion is not an abstract task. Especially in a democracy, public opinion can passively acquiesce in policies and strategies or it can through a series of measures indicate the limits beyond which a government should not proceed. The "new moment" which exists in the public debate about nuclear weapons provides a creative opportunity and a moral imperative to examine the relationship between public opinion and public policy. We believe it is necessary for the sake of prevention to build a barrier against the concept of nuclear war as a viable strategy for defense. There should be a clear public resistance to the rhetoric of "winnable" nuclear wars, or unrealistic expectations of "surviving" nuclear exchanges and strategies of "protracted nuclear war." We oppose such rhetoric.

We seek to encourage a public attitude which sets stringent limits on the kind of actions our own government and other governments will take on nuclear policy. We believe religious leaders have a task in concert with public officials, analysts, private organizations and the media to set the limits beyond which our military policy should not move in word or action. Charting a moral course in a complex public policy debate involves several steps. We will address four questions, offering our reflections on them as an invitation to a public moral dialogue:

1. The use of nuclear weapons;
2. The policy of deterrence in principle and in practice;
3. Specific steps to reduce the danger of war;
4. Long-term measures of policy and diplomacy.

C. The use of nuclear weapons

Establishing moral guidelines in the nuclear debate means addressing first the question of the use of nuclear weapons. That question has several dimensions.

It is clear that those in the church who interpret the gospel teaching as forbidding all use of violence would oppose any use of nuclear weapons under any conditions. In a sense the existence of these weapons simply confirms and reinforces one of the initial insights of the non-violent position, namely, that Christians should not use lethal force since the hope of using it selectively and restrictively is so often an illusion. Nuclear weapons seem to prove this point in a way heretofore unknown.

For the tradition which acknowledges some legitimate use of force, some important elements of contemporary nuclear strategies move beyond the limits of moral justification. A justifiable use of force must be both discriminatory and proportionate. Certain aspects of both U.S. and Soviet strategies fail both tests as we shall discuss below. The technical literature and the personal testimony of public officials who have been closely associated with U.S. nuclear strategy have both convinced us of the overwhelming probability that major nuclear exchange would have no limits.[61]

On the more complicated issue of "limited" nuclear war, we are aware of the extensive literature and discussion which this topic has generated.[62] As a general statement, it seems to us that public officials would be unable to refute the following conclusion of the study made by the Pontifical Academy of Sciences:

"Even a nuclear attack directed only at military facilities would be devastating to the country as a whole. This is because military facilities are widespread rather than concentrated at only a few points. Thus, many nuclear weapons would be exploded.

"Furthermore, the spread of radiation due to the natural winds and atmospheric mixing would kill vast numbers of people and contaminate large areas. The medical facilities of any nation would be inadequate to care for the survivors. An objective examination of the medical situation that would follow a nuclear war leads to but one conclusion: Prevention is our only recourse." [63]

Moral principles and policy choices

In light of these perspectives we address three questions more explicitly: (1) counterpopulation warfare; (2) initiation of nuclear war; and (3) limited nuclear war.

1. Counterpopulation Warfare

Under no circumstances may nuclear weapons or other instruments of mass slaughter be used for the purpose of destroying population centers or other predominantly civilian targets. Popes have repeatedly condemned "total war," which implies such use. For example, as early as 1954 Pope Pius XII condemned nuclear warfare "when it entirely escapes the control of man" and results in "the pure and simple annihilation of all human life within the radius of action." [64] The condemnation was repeated by the Second Vatican Council:

"Any act of war aimed indiscriminately at the destruction of entire cities or of extensive areas along with their population is a crime against God and man itself. It merits unequivocal and unhesitating condemnation." [65]

Retaliatory action, whether nuclear or conventional, which would indiscriminately take many wholly innocent lives, lives of people who are in no way responsible for reckless actions of their government, must also be condemned. This condemnation, in our judgment, applies even to the retaliatory use of weapons striking enemy cities after our own have already been struck. No Christian can rightfully carry out orders or policies deliberately aimed at killing noncombatants. [66]

We make this judgment at the beginning of our treatment of nuclear strategy precisely because the defense of the principle of non-combatant immunity is so important for an ethic of war and because the nuclear age has posed such extreme problems for the principle. Later in this letter we shall discuss specific aspects of U.S. policy in light of this principle and in light of recent U.S. policy statements stressing the determination not to target directly or strike directly against civilian populations. Our concern about protecting the moral value of non-combatant immunity, however, requires that we make a clear reassertion of the principle our first word on this matter.

2. The Initiation of Nuclear War

We do not perceive any situation in which the deliberate initiation of nuclear warfare on however restricted a scale can be morally justified. Nonnuclear attacks by another state must be resisted by other than nuclear means. Therefore, a serious moral obligation exists to develop non-nuclear defensive strategies as rapidly as possible.

A serious debate is under way on this issue.[67] It is cast in political terms, but it has a significant moral dimension. Some have argued that at the very beginning of a war nuclear weapons might be used, only against military targets, perhaps in limited numbers. Indeed it has long been American and NATO policy that nuclear weapons, especially so-called tactical nuclear weapons, would likely be used if NATO forces in Europe seemed in danger of losing a conflict that until then had been restricted to conventional weapons. Large numbers of tactical nuclear weapons are now deployed in Europe by the NATO forces and about as many by the Soviet Union. Some are substantially smaller than the bomb used on Hiroshima, some are larger. Such weapons, if employed in great numbers, would totally devastate the densely populated countries of Western and Central Europe.

Whether under conditions of war in Europe, parts of Asia or the Middle East, or the exchange of strategic weapons directly between the United States and the Soviet Union, the difficulties of limiting the use of nuclear weapons are immense. A number of expert witnesses advise us that commanders operating under conditions of battle probably would not be able to exercise strict control; the number of weapons used would be expanded beyond the military and the level of civilian casualties would rise enormously.[68] No one can be certain that this escalation would not occur even in the face of political efforts to keep such an exchange "limited." The chances of keeping use limited seem remote, and the consequences of escalation to mass destruction would be appalling. Former public officials have testified that it is improbable that any nuclear war could actually be kept limited. Their testimony and the consequences involved in this problem lead us to conclude that the danger of escalation is so great that it would be morally unjustifiable to initiate nuclear war in any form. The danger is rooted not only in the technology of our weapons systems, but in the weakness and sinfulness of human communities. We find the moral responsibility of beginning nuclear war not justified by rational political objectives.

This judgment affirms that the willingness to initiate nuclear war entails a distinct, weighty moral responsibility; it involves transgressing a fragile barrier—political, psychological and moral—which has been constructed since 1945. We express repeatedly in this letter our extreme skepticism about the prospects for controlling a nuclear exchange, however limited the first use might be. Precisely because of this skepticism, we judge resort to nuclear weapons to counter a conventional attack to be morally unjustifiable.[69] Consequently we seek to reinforce the barrier against any use of nuclear weapons. Our support of a "no first use" policy must be seen in this light.

At the same time we recognize the responsibility the United States has had and continues to have in assisting allied nations in their defense against either a conventional or a nuclear attack. Especially in the European theater, the deterrence of a *nuclear* attack may require nuclear weapons for a time, even though their possession and deployment must be subject to rigid restrictions.

The need to defend against a conventional attack in Europe imposes the political and moral burden of developing adequate, alternative modes of defense to present reliance on nuclear weapons. Even with the best coordinated effort—hardly likely in view of contemporary political division on this question—development of an alternative defense position will still take time.

In the interim, deterrence against a conventional attack relies upon two factors: the not inconsiderable conventional forces at the disposal of NATO and the recognition by a potential attacker that the outbreak of large-scale conventional war could escalate to the nuclear level through accident or miscalculation by either side. We are aware that NATO's refusal to adopt a "no first use" pledge is to some extent linked to the deterrent effect of this inherent ambiguity. Nonetheless, in light of the probable effects of initiating nuclear war, we urge NATO to move rapidly toward the adoption of a "no first use" policy, but doing so in tandem with development of an adequate alternative defense posture.

3. Limited Nuclear War

It would be possible to agree with our first two conclusions and still not be sure about retaliatory use of nuclear weapons in what is called a "limited exchange." The issue at stake is the *real* as opposed to the *theoretical* possiblity of a "limited nuclear exchange."

We recognize that the policy debate on this question is inconclusive and that all participants are left with hypothetical projections about probable reactions in a nuclear exchange. While not trying to adjudicate the technical debate, we are aware of it and wish to raise a series of questions which challenge the actual meaning of "limited" in this discussion.

Would leaders have sufficient information to know what is happening in a nuclear exchange?

Would they be able under the conditions of stress, time pressures and fragmentary information to make the extraordinarily precise decision needed to keep the exchange limited if this were technically possible?

Would military commanders be able in the midst of the destruction and confusion of a nuclear exchange to maintain a policy of "discriminate targeting"? Can this be done in modern warfare waged across great distances by aircraft and missiles?

Given the accidents we know about in peacetime conditions, what assurances are there that computer errors could be avoided in the midst of a nuclear exchange?

Would not the casualties, even in a war defined as limited by strategists, still run in the millions?

How "limited" would be the long-term effects of radiation, famine, social fragmentation and economic dislocation?

Unless these questions can be answered satisfactorily, we will continue to be highly skeptical about the real meaning of "limited." One of the criteria of the just-war tradition is a reasonable hope of success in bringing about justice and peace. We must ask whether such a reasonable hope can exist once nuclear weapons have been exchanged. The burden of proof remains on those who assert that meaningful limitation is possible.

A nuclear response to either conventional or nuclear attack can cause destruction which goes far beyond "legitimate defense." Such use of nuclear weapons would not be justified.

In the face of this frightening and highly speculative debate on a matter involving millions of human lives, we believe the most effective contribution or moral judgment is to introduce perspectives by which we can assess the empirical debate. Moral perspective should be sensitive not only to the quantitative dimensions of a question, but to its psychological, human and religious characteristics as well. The issue of limited war is not simply the size of weapons contemplated or the strategies projected. The debate should include the psychological and political significance of crossing the boundary from the conventional to the nuclear arena in any form. To cross this divide is to enter a world where we have no experience of control, much testimony against its possibility and therefore no moral justification for submitting the human community to this risk.[70] We therefore express our view that the first imperative is to prevent any use of nuclear weapons and our hope that leaders will resist the notion that nuclear conflict can be limited, contained or won in any traditional sense.

D. Deterrence in Principle and Practice

The moral challenge posed by nuclear weapons is not exhausted by an analysis of their possible uses. Much of the political and moral debate of the nuclear age has concerned the strategy of deterrence. Deterrence is at the heart of the U.S.-Soviet relationship, currently the most dangerous dimension of the nuclear arms race.

1. The Concept and Development of Deterrence Policy

The concept of deterrence existed in military strategy long before the nuclear age, but it has taken on a new meaning and significance since 1945. Essentially deterrence means "dissuasion of a potential adversary from initiating an attack or conflict, often by the threat of unacceptable retaliatory damage." [71] In the nuclear age deterrence

has become the centerpiece of both U.S. and Soviet policy. Both superpowers have for many years now been able to promise a retaliatory response which can inflict "unacceptable damage." A situation of stable deterrence depends on the ability of each side to deploy its retaliatory forces in ways that are not vulnerable to an attack (i.e., protected against a "first strike"); preserving stability requires a willingness by both sides to refrain from deploying weapons which appear to have a first strike capability.

This general definition of deterrence does not explain either the elements of a deterrence strategy or the evolution of deterrence policy since 1945. A detailed description of either of these subjects would require an extensive essay using materials which can be found in abundance in the technical literature on the subject of deterrence.[72] Particularly significant is the relationship between "declaratory policy" (the public explanation of our strategic intentions and capabilities) and "action policy" (the actual planning and targeting policies to be followed in a nuclear attack).

The evolution of deterrence strategy has passed through several stages of declaratory policy. Using the U.S. case as an example, there is a significant difference between "massive retaliation" and "flexible response," and between "mutual assured destruction" and "countervailing strategy." It is also possible to distinguish between "counterforce" and "countervalue" targeting policies; and to contrast a posture of "minimum deterrence" with "extended deterrence." These terms are well known in the technical debate on nuclear policy' they are less well known and sometimes loosely used in the wider public debate. It is important to recognize that there has been substantial continuity in U.S. action policy in spite of real changes in declaratory policy.[73]

The recognition of these different elements in the deterrent and the evolution of policy means that moral assessment of deterrence requires a series of distinct judgments. They include: an analysis of the factual character of the deterrent (e.g., what is involved in targeting doctrine); analysis of the historical development of the policy (e.g., whether changes have occurred which are significant for moral analysis of the policy); the relationship of deterrence policy and other aspects of U.S.-Soviet affairs; and determination of the key moral questions involved in deterrence policy.

2. The Moral Assessment of Deterrence

The distinctively new dimensions of nuclear deterrence were recognized by policymakers and strategists only after much reflection. Similarly, the moral challenge posed by nuclear deterrence was grasped only after careful deliberation. The moral and political paradox posed by deterrence was concisely stated by Vatican II:

"Undoubtedly, armaments are not amassed merely for use in wartime. Since the defensive strength of any nation is thought to depend on its capacity for immediate retaliation, the stockpiling of arms which grows from year to year serves, in a way hitherto unthought of, as a deterrent to potential attackers. Many people look upon this as the most effective way known at the present time for maintaining some sort of peace among nations. Whatever one may think of this form of deterrent, people are convinced that the arms race, which quite a few countries have entered, is no infallible way of maintaining real peace and that the resulting so-called balance of power is no sure genuine path to achieving it. Rather than eliminate the causes of war, the arms race serves only to aggravate the position. As long as extravagant sums of money are poured into the development of new weapons, it is impossible to devote adequate aid in tackling the misery which prevails at the present day in the world. Instead of eradicating international conflict once and for all, the contagion is spreading to other parts of the world. New approaches, based on reformed attitudes, will have to be chosen in order to remove this stumbling block, to free the earth from its pressing anxieties, and give back to the world a genuine peace."[74]

Without making a specific moral judgment on deterrence, the council clearly designated the elements of the arms race: the tension between "peace of a sort" preserved by deterrence and "genuine peace" required for a stable international life; the contradiction between what is spent for destructive capacity and what is needed for constructive development.

In the post-conciliar assessment of war and peace and specifically of deterrence, different parties to the political-moral debate within the church and in civil society have focused on one or another aspect of the problem. For some, the fact that nuclear weapons have not been used since 1945 means that deterrence has worked, and this fact satisfies the demands of both the political and the moral order. Others contest this assessment by highlighing the risk of failure involved in continued reliance on deterrence and pointing out how politically and morally catastrophic even a single failure would be. Still others note that the absence of nuclear war is not necessarily proof that the policy of deterrence has prevented it. Indeed, some would find the policy of deterrence the driving force in the superpower arms race. Still other observers, many of them Catholic moralists, have stressed that deterrence may not morally include the intention of deliberately attacking civilian populations or noncombatants.

The statements of the NCCB-USCC over the past several years have both reflected and contributed to the wider moral debate on deterrence. In the NCCB pastoral letter "To Live in Christ Jesus" (1976), we focused on the moral limits of declaratory policy while calling for stronger measures of arms control.[75] In 1979 Cardinal John Krol, speaking for the USCC in support of SALT II ratification, brought into focus the other element of the deterrence problem: The actual use of nuclear weapons may have been prevented (a moral good), but the risk of failure and the physical harm and moral evil resulting from possible nuclear war remained.

"This explains," Cardinal Krol stated, "the Catholic dissatisfaction with nuclear deterrence and the urgency of the Catholic demand that the nuclear arms race be reversed. It is of the utmost importance that negotiations proceed to meaningful and continuing reductions in nuclear stockpiles and eventually to the phasing out altogether of nuclear deterrence and the threat of mutual-assured destruction."[76]

These two texts, along with the conciliar statement, have influenced much of Catholic opinion expressed recently on the nuclear question.

In June 1982, Pope John Paul II provided new impetus and insight to the moral analysis with his statement to the U.N. Second Special Session on Disarmament. The pope first situated the problem of deterrence within the context of world politics. No power, he observes, will admit to wishing to start a war, but each distrusts others and considers it necessary to mount a strong defense against attack. He then discusses the notion of deterrence:

"Many even think that such preparations constitute the way—even the only way—to safeguard peace in some fashion or at least to impede to the utmost in an efficacious way the outbreak of wars, especially major conflicts which might lead to the ultimate holocaust of humanity and the destruction of the civilization that man has constructed so laboriously over the centuries.

"In this approach one can see the 'philosophy of peace' which was proclaimed in the ancient Roman principle: Si vis pacem, para bellum. Put in modern terms, this 'philosophy' has the label of 'deterrence' and one can find it in various guises of the search for a 'balance of forces' which sometimes has been called, and not without reason, the 'balance of terror.' "[77]

Having offered this analysis of the general concept of deterrence, the Holy Father introduces his considerations on disarmament, especially, but not only, nuclear disarmament. Pope John Paul II makes this statement about the morality of deterrence:

"In current conditions 'deterrence' based on balance, certainly not as an end in itself but as a step on the way toward a progressive disarmament, may still be judged morally acceptable. Nonetheless in order to ensure peace, it is indispensable not to be satisfied with this minimum, which is always susceptible to the real danger of explosion."[78]

In Pope John Paul II's assessment we perceive two dimensions of the contemporary dilemma of deterrence. One dimension is the danger of nuclear war with its human and moral costs. The possession of nuclear weapons, the continuing quantitative growth of the arms race and the danger of nuclear proliferation all point to the grave danger of basing "peace of a sort" on deterrence. The other dimension is the independence and freedom of nations and entire peoples, including the need to protect smaller nations from threats to their independence and integrity. Deterrence reflects the radical distrust which marks international politics, a condition identified as a major problem by Pope John XXIII in "Peace on Earth" and reaffirmed by Pope Paul VI and Pope John Paul II. Thus a balance of forces, preventing either side from achieving superiority, can be seen as a means of safeguarding both dimensions.

The moral duty today is to prevent nuclear war from ever occurring *and* to protect and preserve those key values of justice, freedom and independence which are necessary for personal dignity and national integrity. In reference to these issues, Pope John Paul II judges that deterrence may still be judged morally acceptable, "certainly not as an end in itself but as a step on the way toward a progressive disarmament."

On more than one occasion the Holy Father has demonstrated his awareness of the fragility and complexity of the deterrence relations among nations. Speaking to UNESCO in June 1980, he said:

"Up to the present, we are told that nuclear arms are a force of dissuasion which have prevented the eruption of a major war. And that is probably true. Still, we must ask if it will always be this way."[79]

In a more recent and more specific assessment Pope John Paul II told an international meeting of scientists Aug. 23, 1982: "You can more easily ascertain that the logic of

nuclear deterrence cannot be considered a final goal or an appropriate and secure means for safeguarding international peace." [80]

Relating Pope John Paul's general statements to the specific policies of the U.S. deterrent requires both judgments of fact and an application of moral principles. In preparing this letter we have tried through a number of sources to determine as precisely as possible the factual character of U.S. deterrence strategy. Two questions have particularly concerned us: (1) the targeting doctrine and strategic plans for the use of the deterrent, particularly their impact on civilian casualties; and (2) the relationship of deterrence strategy and nuclear war-fighting capability to the likelihood that war will in fact be prevented.

3. Moral Principles and Policy Choices

Targeting doctrine raises significant moral questions because it is a significant determinant of what would occur if nuclear weapons were ever to be used. Although we acknowledge the need for deterrent, not all forms of deterrence are morally acceptable. There are moral limits to deterrence policy as well as to policy regarding use. Specifically, it is not morally acceptable to intend to kill the innocent as part of a strategy of deterring nuclear war. The question of whether U.S. policy involves an intention to strike civilian centers (directly targeting civilian populations) has been one of our factual concerns.

This complex question has always produced a variety of responses, official and unofficial in character. The NCCB committee has received a series of statements of clarification of policy from U.S. government officials.[81] Essentially these statements declare that it is not U.S. strategic policy to target the Soviet civilian population as such or to use nuclear weapons deliberately for the purpose of destroying population centers.

These statements respond, in principle at least, to one moral criterion for assessing deterrence policy: the immunity of noncombatants from direct attack either by conventional or nuclear weapons.

These statements do not address or resolve another very troublesome moral problem, namely, that an attack on military targets or militarily significant industrial targets could involve "indirect" (i.e., unintended) but massive civilian casualties. We are advised, for example, that the U.S. strategic nuclear targeting plan (SIOP—Single Integrated Operational Plan) has identified 60 "military" targets within the city of Moscow alone, and that 40,000 "military" targets for nuclear weapons have been identified in the whole of the Soviet Union.[82] It is important to recognize that Soviet policy is subject to the same moral judgment; attacks on several "industrial targets" or politically significant targets in the United States could produce massive civilian casualties. The number of civilians who would necessarily be killed by such strikes is horrendous.[83] This problem is unavoidable because of the way modern military facilities and production centers are so thoroughly interspersed with civilian living and working areas. It is aggravated if one side deliberately positions military targets in the midst of a civilian population.

In our consultations, administration officials readily admitted that while they hoped any nuclear exchange could be kept limited, they were prepared to retaliate in a massive way if necessary. They also agreed that once any substantial numbers of weapons were used, the civilian casualty levels would quickly become truly catastrophic and that even with attacks limited to "military" targets the number of deaths in a substantial exchange would be almost indistinguishable from what might occur if civilian centers had been deliberately and directly struck. These possibilities pose a different moral question and are to be judged by a different moral criterion: the principle of proportionality.

While any judgment of proportionality is always open to differing evaluations, there are actions which can be decisively judged to be disproportionate. A narrow adherence exclusively to the principle of non-combatant immunity as a criterion for policy is an inadequate moral posture for it ignores some evil and unacceptable consequences. Hence, we cannot be satisfied that the assertion of an intention not to strike civilians directly or even the most honest effort to implement that intention by itself constitutes a "moral policy" for the use of nuclear weapons.

The location of industrial or militarily significant economic targets within heavily populated areas or in those areas affected by radioactive fallout could well involve such massive civilian casualties that in our judgment such a strike would be deemed morally disproportionate, even though not intentionally indiscriminate.

The problem is not simply one of producing highly accurate weapons that might minimize civilian casualties in any single explosion, but one of increasing the likelihood of escalation at a level where many, even "discriminating," weapons would cumulatively kill very large numbers of civilians. Those civilian deaths would occur both immediately and from the long-term effects of social and economic devastation.

A second issue of concern to us is the relationship of deterrence doctrine to war-fighting strategies. We are aware of the argument that war-fighting capabilities enhance the credibility of the deterrent particularly the strategy of extended deterrence. But the development of such capabilities raises other strategic and moral questions. The relationship of war-fighting capabilities and targeting doctrine exemplifies the difficult choices in this area of policy. Targeting civilian populations would violate the principle of discrimination—one of the central moral principles of a Christian ethic of war. But "counterforce targeting," while preferable from the perspective of protecting civilians, is often joined with a declaratory policy which conveys the notion that nuclear war is subject to precise rational and moral limits. We have already expressed our severe doubts about such a concept. Furthermore, a purely counterforce strategy may seem to threaten the viability of other nations' retaliatory forces, making deterrence unstable in a crisis and war more likely.

While we welcome any effort to protect civilian populations, we do not want to legitimize or encourage moves which extend deterrence beyond the specific objective preventing the use of nuclear weapons or other actions which could lead directly to a nuclear exchange.

These considerations of concrete elements of nuclear deterrence policy, made in light of John Paul II's evaluation, but applying it through our own prudential judgments, lead us to a strictly conditioned moral acceptance of nuclear deterrence. We cannot consider it adequate as a long-term basis for peace.

This strictly conditioned judgment yields criteria for morally assessing the elements of deterrence strategy. Clearly, these criteria demonstrate that we cannot approve of every weapons system, strategic doctrine or policy initiative advanced in the name of strengthening deterrence. On the contrary, these criteria require continual public scrutiny of what our government proposes to do with the deterrent.

On the basis of these criteria we wish now to make some specific evaluations:

1. If nuclear deterrence exists only to prevent the use of nuclear weapons by others, then proposals to go beyond this to planning for prolonged periods of repeated nuclear strikes and counterstrikes, or "prevailing" in nuclear war, are not acceptable. They encourage notions that nuclear war can be engaged in with tolerable human and moral consequences. Rather, we must continually say no to the idea of nuclear war.

2. If nuclear deterrence is our goal, "sufficiency" to deter is an adequate strategy; the quest for nuclear superiority must be rejected.

3. Nuclear deterrence should be used as a step on the way toward progressive disarmament. Each proposed addition to our strategic system or change in strategic doctrine must be assessed precisely in light of whether it will render steps toward "progressive disarmament" more or less likely.

Moreover, these criteria provide us with the means to make some judgment and recommendations about the present direction of U.S. strategic policy. Progress toward a world freed of dependence on nuclear deterrence must be carefully carried out. But it must be carefully carried out. But it must not be delayed. There is an urgent moral and political responsibility to use the "peace of a sort" we have as a framework to move toward authentic peace through nuclear arms control, reductions and disarmament. Of primary importance in this process is the need to prevent the development and deployment of destabilizing weapons systems on either side; a second requirement is to ensure that the more sophisticated command and control systems do not become mere hair triggers for automatic launch on warning; a third is the need to prevent the proliferation of nuclear weapons in the international system.

In light of these general judgments we oppose some specific proposals in respect to our present deterrence posture:

1. The addition of weapons which are likely to be vulnerable to attack, yet also possess a "prompt hard-target kill" capability that threatens to make the other side's retaliatory forces vulnerable. Such weapons may seem to be useful primarily in a first strike; [84] we resist such weapons for this reason and we oppose Soviet deployment of such weapons which generate fear of a first strike against U.S. forces.

2. The willingness to foster strategic planning which seeks a nuclear war-fighting capability that goes beyond the limited function of deterrence outlined in this letter.

3. Proposals which have the effect of lowering the nuclear threshold and blurring the difference between nuclear and conventional weapons.

In support of the concept of "sufficiency" as an adequate deterrent and in light of the present size and composition of both the U.S. and Soviet strategic arsenals, we recommend:

1. Support for immediate, bilateral, verifiable agreements to halt the testing, production and deployment of new nuclear weapons systems.[85]

2. Support for negotiated bilateral deep cuts in the arsenals of both superpowers, particularly those weapons systems which have destabilizing characteristics; U.S. proposals like those for START (Strategic Arms Reduction Talks) and INF (Intermediate-Range Nuclear Forces) negotiations in Geneva are said to be designed to achieve deep cuts: [86] our hope is that they will be pursued in a manner which will realize these goals.

3. Support for early and successful conclusion of negotiations of a comprehensive test ban treaty.

4. Removal by all parties of short-range nuclear weapons which multiply dangers disproportionate to their deterrent value.

5. Removal by all parties of nuclear weapons from areas where they are likely to be overrun in the early stages of war, thus forcing rapid and uncontrollable decisions on their use.

6. Strengthening of command and control over nuclear weapons to prevent inadvertent and unauthorized use.

These judgments are meant to exemplify how a lack of unequivocal condemnation of deterrence is meant only to be an attempt to acknowledge the role attributed to deterrence, but not to support its extension beyond the limited purpose discussed above. Some have urged us to condemn all aspects of nuclear deterrence. This urging has been based on a variety of reasons, but has emphasized particularly the high and terrible risks that either deliberate use or accidental detonation of nuclear weapons could quickly escalate to something utterly disproportionate to any acceptable moral purpose. That determination requires highly technical judgments about hypothetical events. Although reasons exist which move some to condemn reliance on nuclear weapons for deterrence, we have not reached this conclusion for the reasons outlined in this letter.

Nevertheless, there must be no misunderstanding of our profound skepticism about the moral acceptability of any use of nuclear weapons. It is obvious that the use of any weapons which violate the principle of discrimination merits unequivocal condemnation. We are told that some weapons are designed for purely "counterforce" use against military forces and targets. The moral issue, however, is not resolved by the design of weapons or the planned intention for use; there are also consequences which must be assessed. It would be a perverted political policy or moral casuistry which tried to justify using a weapon which "indirectly" or "unintentionally" killed a million innocent people because they happened to live near a "militarily significant target."

Even the "indirect effects" of initiating nuclear war are sufficient to make it an unjustifiable moral risk in any form. It is not sufficient, for example, to contend that "our" side has plans for "limited" or "discriminate" use. Modern warfare is not readily contained by good intentions or technological designs. The psychological climate of the world is such that mention of the term "nuclear" generates uneasiness. Many contend that the use of one tactical nuclear weapon could produce panic, with completely unpredictable consequences. It is precisely this mix of political, psychological and technological uncertainty which has moved us in this letter to reinforce with moral prohibitions and prescriptions the prevailing political barrier against resort to nuclear weapons. Our support for enhanced command and control facilities, for major reductions in strategic and tactical nuclear forces, and for a "no first use" policy (as set forth in this letter) is meant to be seen as a complement to our desire to draw a moral line against nuclear war.

Any claim by any government that it is pursuing a morally acceptable policy of deterrence must be scrutinized with the greatest care. We are prepared and eager to participate in our country in the ongoing public debate on moral grounds.

The need to rethink the deterrence policy of our nation, to make the revisions necessary to reduce the possibility of nuclear war and to move toward a more stable system of national and international security will demand a substantial intellectual, political and moral effort. It also will require, we believe, the willingness to open ourselves to the providential care, power and word of God, which call us to recognize our common humanity and the bonds of mutual responsibility which exist in the international community in spite of political differences and nuclear arsenals.

Indeed, we do acknowledge that there are many strong voices within our own episcopal ranks and within the wider Catholic community in the United States which challenge the strategy of deterrence as an adequate response to the arms race today. They highlight the historical evidence that deterrence has not in fact set in motion substantial processes of disarmament.

Moreover, these voices rightly raise the concern that even the conditional acceptance of nuclear deterrence as laid out in a letter such as this might be inappropriately used by some to reinforce the policy of arms buildup. In its stead they call us to raise a prophetic challenge to the community of faith—a challenge which goes beyond nuclear deterrence, toward more resolute steps to actual bilateral disarmament and peacemaking. We recognize the intellectual ground on which the argument is built and the religious sensibility which gives it its strong force.

The dangers of the nuclear age and the enormous difficulties we face in moving toward a more adequate system of global security, stability and justice require steps beyond our present conceptions of security and defense policy. In the following section we propose a series of steps aimed at a more adequate policy for preserving peace in a nuclear world.

III. THE PROMOTION OF PEACE: PROPOSALS AND POLICIES

In a world which is not yet the fulfillment of God's kingdom, a world where both personal actions and social forces manifest the continuing influence of sin and disorder among us, consistent attention must be paid to preventing and limiting the violence of war. But this task, addressed extensively in the previous section of this letter, does not exhaust Catholic teaching on war and peace. A complementary theme, reflected in the scriptures and the theology of the church and significantly developed by papal teaching in this century, is the building of peace as the way to prevent war. This traditional theme was vividly reasserted by Pope John Paul in his homily at Coventry Cathedral:

"Peace is not just the absence of war. It involves mutual respect and confidence between peoples and nations. It involves collaboration and binding agreements. Like a cathedral, peace must be constructed patiently and with unshakable faith." [87]

This positive conception of peacemaking profoundly influences many people in our time. At the beginning of this letter we affirmed the need for a more fully developed theology of peace. The basis of such a theology is found in the papal teaching of this century. In this section of our pastoral we wish to illustrate how the positive vision of peace contained in Catholic teaching provides direction for policy and personal choices.

a. Specific steps to reduce the danger of war

The dangers of modern war are specific and visible; our teaching must be equally specific about the needs of peace. Effective arms control leading to mutual disarmament, ratification of pending treaties,[88] development of nonviolent alternatives, are but some of the recommendations we would place before the Catholic community and all men and women of good will. These should be part of a foreign policy which recognizes and respects the claims of citizens of every nation to the same inalienable rights we treasure and seeks to ensure an international security based on the awareness that the Creator has provided this world and all its resources for the sustenance and benefit of the entire human family. The truth that the globe is inhabited by a single family in which all have the same basic needs and all have a right to the goods of the earth is a fundamental principle of Catholic teaching which we believe to be of increasing importance today. In an interdependent world all need to affirm their common nature and destiny; such a perspective should inform our policy vision and negotiating posture in pursuit of peace today.

1. Accelerated Work for Arms Control, Reduction and Disarmament

Despite serious efforts starting with the Baruch plans and continuing through SALT I and SALT II, the results have been far too limited and partial to be commensurate with the risks of nuclear war. Yet efforts for negotiated control and reduction of arms must continue. In his 1982 address to the United Nations Pope John Paul II left no doubt about the importance of these efforts: "Today once again before you all I reaffirm my confidence in the power of true negotiations to arrive at just and equitable solutions." [89]

In this same spirit we urge negotiations to halt the testing, production and deployment of new nuclear weapons systems. Not only should steps be taken to end development and deployment, but the numbers of existing weapons must be reduced in a manner which lessens the danger of war.

Arms control disarmament must be a process of verifiable agreements especially between two superpowers. While we do not advocate a policy of unilateral disarmament, we believe the urgent need for control of the arms race requires a willingness for each side to take some first steps. The United States has already taken a number of important independent initiatives to reduce some of the gravest dangers and to encourage a constructive Soviet response; additional initiatives are encouraged. By independent initiatives we mean carefully chosen limited steps which the United States could take for a defined period of time, seeking to elicit a comparable step from the Soviet Union. If an appropriate response is not forthcoming, the United States would no longer be bound by steps taken. Our country has previously taken calculated risks in favor of freedom and of human values; these have included independent steps taken to reduce some of the gravest dangers of nuclear war.[90] Certain risks are required today to help free the world from bondage

to nuclear deterrence and the risk of nuclear war. Both sides, for example, have an interest in avoiding deployment of destabilizing weapons systems.

There is some history of successful independent initiatives which have beneficially influenced the arms race without a formal public agreement. In 1963 President Kennedy announced that the United States would unilaterally forgo further nuclear testing; the next month (Soviet Premier Nikita) Khrushchev proposed a limited test ban which eventually became the basis of the U.S.-Soviet partial test ban treaty. Subsequently, both superpowers removed about 10,000 troops from Central Europe and each announced a cut in production of nuclear material for weapons.

a. Negotiation on arms control agreements in isolation, without persistent and parallel efforts to reduce the political tensions which motivate the buildup of armaments, will not suffice. The United States should therefore have a continuing policy of maximum political engagement with governments of potential adversaries, providing for repeated, systematic discussion and negotiation of areas of friction. This policy should be carried out by a system of periodic, carefully prepared meetings at several levels of government, including summit meetings at regular intervals. Such channels of discussion are too important to be regarded by either of the major powers as a concession or an event made dependent on daily shifts in international developments.

b. The Nuclear Non-Proliferation Treaty of 1968 acknowledged that the spread of nuclear weapons to hitherto non-nuclear states (horizontal proliferation) could hardly be prevented in the long run in the absence of serious efforts by the nuclear states to control and reduce their own nuclear arsenals (vertical proliferation). Article VI of the NPT pledged the superpowers to serious efforts to control and to reduce their own nuclear arsenals; unfortunately this promise has not been kept. Moreover, the multinational controls envisaged in the treaty seem to have been gradually relaxed by the states exporting fissionable materials for the production of energy. If these tendencies are not constrained, the treaty may eventually lose its symbolic and practical effectiveness. For this reason the United States should, in concert with other nuclear-exporting states, seriously reexamine its policies and programs and make clear its determination to uphold the spirit as well as the letter of the treaty.

2. Continued Insistence on Efforts To Minimize the Risk of Any War

While it is right and proper that priority be given to reducing and ultimately eliminating the likelihood of nuclear war, this does not of itself remove the threat of other forms of warfare. Indeed, negotiated reduction in nuclear weapons available to the superpowers could conceivably increase the danger of non-nuclear wars.

a. Because of this we strongly support negotiations aimed at reducing and limiting conventional forces and at building confidence between possible adversaries, especially in regions of potential military confrontations. We urge that prohibitions outlawing the production and use of chemical and biological weapons be reaffirmed and observed. Arms control negotiations must take account of the possibility that conventional conflict could trigger the nuclear confrontation the world must avoid.

b. Unfortunately, as is the case with nuclear proliferation, we are witnessing a relaxation of restraints in the international commerce in conventional arms. Sales of increasingly sophisticated military aircraft, missiles, tanks, anti-tank weapons, anti-personnel bombs and other systems by the major supplying countries (especially the Soviet Union, the United States, France and Great Britain) have reached unprecedented levels.

Pope John Paul II took specific note of the problem in his U.N. address:

"The production and sale of conventional weapons throughout the world is a truly alarming and evidently growing phenomenon. . . . Moreover the traffic in these weapons seems to be developing at an increasing rate and seems to be directed most of all toward developing countries." [91]

It is a tragic fact that U.S. arms-sales policies in the last decade have contributed significantly to the trend the Holy Father deplores. We call for a reversal of this course. The United States should renew earlier efforts to develop multilateral controls on arms exports and should in this case also be willing to take carefully chosen independent initiatives to retrain the arms trade. Such steps would be particularly appropriate where the receiving government faces charges of gross and systematic human rights violations.[92]

c. Nations must accept a limited view of those interests justifying military force. True self-defense may include the protection of weaker states, but does not include seizing the possessions of others or the domination of other states or peoples. We should remember the caution of Pope John Paul II: "In alleging the threat of a potential enemy, is it really not rather the intention to keep for itself a means of threat, in order to get the upper hand with the aid of one's own arsenal of destruction?" [93] Central to a moral theory of force is the principle that it must be a last resort taken only when *all* other means of redress have been exhausted. Equally important in the age of modern warfare is the recognition that the justifiable reasons for using force have been restricted to instances of self-defense or defense of others under attack.

3. The Relationship of Nuclear and Conventional Defenses

The strong position we have taken against the use of nuclear weapons and particularly the stand against the initiation of nuclear war in any form calls for further clarification of our view of the requirements for conventional defense.

Nuclear threats have often come to take the place of efforts to deter or defend against non-nuclear attack with weapons that are themselves non-nuclear, particularly in the NATO-Warsaw Pact confrontation. Many analysts conclude that in the absence of nuclear deterrent threats more troops and conventional (non-nuclear) weapons would be required to protect our allies. Rejection of some forms of nuclear deterrence could therefore conceivably require a willingness to pay higher costs to develop conventional forces. Leaders and peoples of other nations might also have to accept higher costs for their own defense, particularly in Western Europe, if the threat to use nuclear weapons first were withdrawn. We cannot judge the strength of these arguments in particular cases. It may well be that some strengthening of conventional defense would be a proportionate price to pay, if this will reduce the possibility of a nuclear war. We acknowledge this reluctantly, aware as we are of the vast amount of scarce resources expended annually on instruments of defense in a world filled with other urgent, unmet human needs.

It is not for us to settle the technical debate about policy and budgets. From the perspective of a developing theology of peace, however, we feel obliged to contribute a moral dimension to the discussion. We hope that significant reduction in numbers of conventional arms and weaponry would go hand in hand with diminishing reliance on nuclear deterrence. The history of recent wars (even so-called "minor" or "limited" wars) has shown that conventional war can also become indiscriminate in conduct and disproportionate to any valid purpose. We do not want in any way to give encouragement to a notion of "making the world safe for conventional war," which introduces its own horrors.

Hence, we believe that any program directed at reducing reliance on nuclear weapons is not likely to succeed unless it includes measures to reduce tensions and to work for the balanced reduction of conventional forces. We believe that important possibilities exist which, if energetically pursued, would ensure against building up conventional forces as a concomitant of reductions in nuclear weapons. Examples are to be found in the ongoing negotiations for mutual, balanced, force reductions, the prospects for which are certainly not dim and would be enhanced by agreements on strategic weapons, and in the confidence-building measures still envisaged under the Helsinki agreement and review conference.

We must re-emphasize with all our being, nonetheless, that it is not only nuclear war that must be prevented, but war itself. Therefore, with Pope John Paul II we declare:

"Today, the scale and the horror of modern warfare—whether nuclear or not—makes it totally unacceptable as a means of settling differences between nations. War should belong to the tragic past, to history; it should find no place on humanity's agenda for the future." [94]

Reason and experience tell us that a continuing upward spiral even in conventional arms, coupled with an unbridled increase in armed forces, instead of securing true peace will almost certainly be provocative of war.

4. Civil Defense

Attention must be given to existing programs for civil defense against nuclear attack, including blast and fallout shelters and relocation plans. It is unclear in the public mind whether these are intended to offer significant protection against at least some forms of nuclear attack or are being put into place to enhance the credibility of the strategic deterrent forces by demonstrating an ability to survive attack. This confusion has led to public skepticism and even ridicule of the program and casts doubt on the credibility of the government. An independent commission of scientists, engineers and weapons experts is needed to examine if these or any other plans offer a realistic prospect of survival for the nation's population or its cherished values, which a nuclear war would presumably be fought to preserve.

5. Efforts To Develop Non-Violent Means of Conflict Resolution

We affirm a nation's right to defend itself, its citizens and its values. Security is the right of all, but that right, like everything else, must be subject to divine law and the limits defined by that law. We must find means of defending peoples that do not depend upon the threat of annihilation. Im-

moral means can never be justified by the end sought; no objective, however worthy of good in itself, can justify sinful acts or policies. Though our primary concern through this statement is war and the nuclear threat, these principles apply as well to all forms of violence, including insurgency, counterinsurgency, "destabilization" and the like.

a. The Second Vatican Council praised "those who renounce the use of violence in the vindication of their rights and who resort to methods of defense which are otherwise available to weaker parties, provided that this can be done without injury to the rights and duties of others or of the community itself." [95] To make such renunciation effective and still defend what must be defended, the arts of diplomacy, negotiation and compromise must be developed and fully exercised. Non-violent means of resistance to evil deserve much more study and consideration than they have thus far received. There have been significant instances in which people have successfully resisted oppression without recourse to arms.[96] Non-violence is not the way of the weak, the cowardly or the impatient. Such movements have seldom gained headlines even though they have left their mark on history. The heroic Danes who would not turn Jews over to the Nazis and the Norwegians who would not teach Nazi propaganda in schools serve as inspiring examples in the history of non-violence.

Non-violent resistance, like war, can take many forms depending upon the demands of a given situation. There is, for instance, organized popular defense instituted by government as part of its contingency planning. Citizens would be trained in the techniques of peaceful non-compliance and non-cooperation as a means of hindering an invading force or non-democratic government from imposing its will. Effective non-violent resistance requires the united will of a people and may demand as much patience and sacrifice from those who practice it as is now demanded by war and preparation for war. It may not always succeed. Nevertheless, before the possibility is dismissed as impractical or unrealistic, we urge that it be measured against the almost certain effects of a major war.

b. Non-violent resistance offers a common ground of agreement for those individuals who choose the option of Christian pacifism even to the point of accepting the need to die rather than to kill and those who choose the option of lethal force allowed by the theology of just war. Non-violent resistance makes clear that both are able to be committed to the same objective: defense of their country.

c. Popular defense would go beyond conflict resolution and compromise to a basic synthesis of beliefs and values. In its practice the objective is not only to avoid causing harm or injury to another creature, but, more positively, to seek the good of the other. Blunting the aggression of an adversary or oppressor would not be enough. The goal is winning the other over, making the adversary a friend.

It is useful to point out that these principles are thoroughly compatible with—and to some extent derived from—Christian teachings and must be part of any Christian theology of peace. Spiritual writers have helped trace the theory of non-violence to its roots in scripture and tradition and have illustrated its practice and success in their studies of the church fathers and the age of martyrs. Christ's own teachings and example provide a model way of life incorporating the truth and a refusal to return evil for evil.

Non-violent popular defense does not ensure that lives would not be lost. Nevertheless, once we recognize that the almost certain consequences of existing policies and strategies of war carry with them a very real threat to the future existence of humankind itself, practical reason as well as spiritual faith demands that it be given serious consideration as an alternative course of action.

d. Once again we declare that the only true defense for the world's population is the rejection of nuclear war and the conventional wars which could escalate into nuclear war. With Pope John Paul II, we call upon educational and research institutes to take a lead in conducting peace studies; "Scientific studies on war, its nature, causes, means, objectives and risks have much to teach us on the conditions for peace." [97] To achieve this end, we urge that funds equivalent to a designated percentage (even one-tenth of 1 percent) of current budgetary allotments for military purposes be set aside to support such peace research.

In 1981 the Commission on Proposals for the National Academy of Peace and Conflict Resolution recommended the establishment of the U.S. Academy of Peace, a recommendation nearly as old as this country's Constitution. The commission found that "peace is a legitimate field of learning that encompasses rigorous, interdisciplinary research, education and training directed toward peacemaking expertise." [98] We endorse the commission's recommendation and urge all citizens to support training in conflict resolution, non-violent resistance, and programs devoted to service to peace and education for peace. Such an academy would not only provide a center for peace studies and activities, but also be a tangible evidence of our nation's sincerity in its often professed commitment to international peace and the abolition of war. We urge universities, particularly Catholic universities, in our country to develop programs for rigorous interdisciplinary research, education and training directed toward peacemaking expertise.

We too must be prepared to do our part to achieve these ends. We encourage churches and educational institutions, from primary schools to colleges and institutes of higher learning, to undertake similar programs at their own initiative. Every effort must be made to understand and evaluate the arms race, to encourage truly transnational perspectives on disarmament and to explore new forms of international cooperation and exchange. No greater challenge or higher priority can be imagined than the development and perfection of a theology of peace suited to a civilization poised on the brink of self-destruction. It is our prayerful hope that this document will provide to be a starting point and inspiration for that endeavor.

6. The Role of Conscience

A dominant characteristic of the Second Vatican Council's evaluation of the modern warfare was the stress it placed on the requirement for proper formation of conscience. Moral principles are effective restraints on power only when policies reflect them and individuals practice them. The relationship of the authority of the state and the conscience of the individual on matters of war and peace takes a new urgency in the face of the destructive nature of modern war.

a. In this connection we reiterate the position we took in 1980. Catholic teaching does not question the right in principle of a government to require military service of its citizens provided the government shows it is necessary. A citizen may not casually disregard his country's conscientious decision to call its citizens to acts of "legitimate defense." Moreover, the role of Christian citizens in the armed forces is a service to the common good and an exercise of the virtue of patriotism, so long as they fulfill this role within defined moral norms.[99]

b. At the same time, no state may demand blind obedience. Our 1980 statement urged the government to present convincing reasons for draft registration and opposed reinstitution of conscription itself except in the case of a national defense emergency. Moreover, it reiterated our support for conscientious objection in general and for selective conscientious objection to participation in a particular war, either because of the ends being pursued or the means being used. We called selective conscientious objection a moral conclusion which can be validly derived from the classical teaching of just-war principles. We continue to insist upon respect for and legislative protection of the rights of both classes of conscientious objectors. We also approve requiring alternative service to the community—not related to military needs—by such persons.

b. Shaping a peaceful world

Preventing nuclear war is a moral imperative; but the avoidance of war, nuclear or conventional, is not a sufficient conception of international relations today. Nor does it exhaust the content of Catholic teaching. Both the political needs and the moral challenge of our time require a positive conception of peace, based on a vision of a first world order. Pope Paul VI summarized classical Catholic teaching in his encyclical "The Development of Peoples":

"Peace cannot be limited to a mere absence of war, the result of an ever precarious balance of forces. No, peace is something built up day after day, in the pursuit of an order intended by God, which implies a more perfect form of justice among men and women." [100]

1. World Order in Catholic Teaching

This positive conception of peace sees it as the fruit of order; order, in turn, is shaped by the values of justice, truth, freedom and love. The basis of this teaching is found in sacred scripture, St. Augustine and St. Thomas. It has found contemporary expression and development in papal teaching of this century. The popes of the nuclear age, from Pius XII through John Paul II have affirmed pursuit of international order as the way to banish the scourage of war from human affairs.[101]

The fundamental premise of world in Catholic teaching is a theological truth: the unity of the human family—rooted in common creation, destined for the kingdom and united by moral bonds of rights and duties. This basic truth about the unity of the human family pervades the entire teaching on war and peace: For the pacifist position it is one of the reasons why life cannot be taken, while for the just-war position, even in a justified conflict bonds of responsibility remain in spite of the conflict.

Catholic teaching recognizes that in modern history, at least since the Peace of Westphalia (1648) the international community has been governed by union-states. Catholic moral theology, as expressed for example in Chapters 2 and 3 of "Peace on

Earth," accords a real but relative moral value to sovereign states. The value is real because of the functions states fulfill as sources of order and authority in the political community; it is relative because boundaries of the sovereign state do not dissolve the deeper relationships of responsibility existing in the human community. Just as within nations the moral fabric of society is described in Catholic teaching in terms of reciprocal rights and duties—between individuals, and then between the individual and the state—so in the international community "Peace on Earth" defines the rights and duties which exist among states.[102]

In the past 20 years Catholic teaching has become increasingly specific about the content of these international rights and duties. In 1963, "Peace on Earth" sketched the political and legal order among states. In 1967, Pope John Paul articulated the human rights basis of international relations in his address to the United Nations.

These documents and others which build upon them outlined a moral order of international relations, i.e., how the international community should be organized. At the same time this teaching has been sensitive to the actual pattern of relations prevailing among states. While not ignoring present geopolitical realities, one of the primary functions of Catholic teaching on world order has been to point the way toward a more integrated international system.

In analyzing this path toward world order, the category increasingly used in Catholic moral teaching (and, more recently, in the social sciences also) is the interdependence of the world today. The theological principle of unity has always affirmed a human interdependence; but today this bond is complemented by the growing political and economic interdependence of the world, manifested in a whole range of international issues.[103]

An important element missing from world order today is a properly constituted political authority with the capacity to shape our material interdependence in the direction of moral interdependence. Pope John XXIII stated the case in the following way:

"Today the universal common good poses problems of worldwide dimensions, which cannot be adequately tackled or solved except by the efforts of public authority endowed with a wideness of powers, structure and means of the same proportions: that is, of public authority which is in a position to operate in an effective manner on a worldwide basis. The moral order itself, therefore, demands that such a form of public authority be established." [104]

Just as the nation-state was a step in the evolution of government at a time when expanding trade and new weapons technologies made the feudal system inadequate to manage conflicts and provide security, so we are now entering an era of new, global interdependencies requiring global systems of goverance to manage the resulting conflicts and ensure our common security. Major global problems such as worldwide inflation, trade and payments deficits, competition over scarce resources, hunger widespread unemployment, global environmental dangers, the growing power of transitional corporations and the treat of international financial collapse, as well as the danger of world war resulting from these growing tensions—cannot be remedied by a single nation-state approach. They shall require the concerted effort of the whole world community. As we shall indicate below, the United Nations should be particularly considered in this effort.

In the nuclear age it is in the regulation of interstate conflicts and ultimately the replacement of military by negotiated solutions that the supreme importance and necessity of a moral as well as a political concept of the international common good can be grasped. The absence of adequate structures for addressing these issues places even greater responsibility on the policies of individual states. By a mix of political vision and moral wisdom, states are called to interpret the national interest in light of the larger global interest.

We are living in a global age with problems and conflicts on a global scale. Either we shall learn to resolve these problems together or we shall destroy one another. Mutual security and survival require a new vision of the world as one interdependent planet. We have rights and duties not only within our diverse national communities, but within the larger world community.

2. The Superpowers in a Disordered World

No relationship more dramatically demonstrates the fragile nature of order in international affairs today than that of the United States and the Soviet Union. These two sovereign states have open war, nuclear or conventional, but they are divided by philosophy, ideology and competing ambitions. Their competition is global in scope and involves everything from comparing nuclear arsenals to printed propaganda. Both have been criticized in international meetings because of their policies in the nuclear arms race.[105]

In our 1980 pastoral letter on Marxism we sought to portray the significant differences between Christian teaching and Marxism; at the same time we addressed the need for states with different political systems to live together in an interdependent world:

"The church recognizes the depth and dimensions of the ideological differences that divide the human race, but the urgent practical need for cooperative efforts in the human interest overrules these differences. Hence Catholic teaching seeks to avoid exacerbating the ideologial opposition and to focus upon the problems requiring common efforts across the ideological divide: keeping the peace and empowering the poor."[106]

We believe this passage reflects the teaching of "Peace on Earth," the continuing call for dialogue of Pope Paul VI and the 1979 address of Pope John Paul II at the United Nations. We continue to stress this theme even while we recognize the difficulty of realizing its objectives.

The difficulties are particularly serere on the issue of the arms race. For most Americans the danger of war is commonly defined primarily in terms of the threat of Soviet military expansionism and the consequent need to deter or defend against a Soviet military threat. Many assume that the existence of this threat is permanent and that nothing can be done about it except to build and maintain overwhelming or at least countervailing military power.[107]

The fact of a Soviet threat, as well as the existence of a Soviet imperial drive for hegemony, at least in regions of major strategic interest, cannot be denied. The history of the Cold War has produced varing interpretations of which side caused which conflict, but whatever the details of history illustrate the plain fact is that the memories of Soviet policies in Eastern Europe and recent events in Afghanistan and Poland have left their mark in the American political debate. Many peoples are forcibly kept under communist domination despite their manifest wishes to be free. Soviet power is very great. Whether the Soviet Union's pursuit of military might is motivated primarily by defensive or aggressive aims might be debated, but the effect is nevertheless to leave profoundly insecure those who must live in the shadow of that might.

Americans need have no illusions about the Soviet system of repression and the lack of respect in that system for human rights or about Soviet covert operations and prorevolutionary activities. To be sure, our own system is not without flaws. Our government has sometimes supported repressive governments in the name of preserving freedom, has carried out repugnant covert operations of its own and remains imperfect in its domestic record of ensuring equal rights for all. At the same time there is a difference. NATO is an alliance of democratic countries which have freely chosen their association; the Warsaw Pact is not.

To pretend that as a nation we have lived up to all our own ideals would be patently dishonest. To pretend that all evils in the world have been or are now being perpetrated by dictatorial regimes would be both dishonest and absurd. But having said this, and admitting our own faults, it is imperative that we confront reality. The facts simply do not support the invidious comparisons made at times even in our own society between our way of life, in which most basic human rights are at least recognized even if they are not always adequately supported, and those totalitarian and tyrannical regimes in which such rights are either denied or systematically suppressed. Insofar as this is true, however, it makes the promotion of human rights in our foreign policy, as well as our domestic policy, all the more important. It is the acid test of our commitment to our democratic values. In this light, any attempts to justify, for reasons of state, support for regimes that continue to violate human rights is all the more morally reprehensible in its hypocrisy.

A glory of the United States is the range of political freedoms its system permits us. We, as bishops, as Catholics, as citizens, exercise those freedoms in writing this letter, with its share of criticisms of our government. We have true freedom of religion, freedom of speech and access to a free press. We could not exercise the same freedoms in contemporary Eastern Europe or in the Soviet Union. Free people must always pay a proportionate price and run some risks—responsibly—to preserve their freedom.

It is one thing to recognize that the people of the world do not want war. It is quite another thing to attribute the same good motives to regimes or political systems that have consistently demonstrated precisely the opposite in their behavior. There are political philosophies with understandings of morality so radically different from ours that even negotiations proceed from different premises, although identical terminology may be used by both sides. This is no reason for not negotiating. It is a very good reason for not negotiating blindly or naively.

In this regard, Pope John Paul II offers some sober reminders concerning dialog and peace:

"(O)ne must mention the tactical and deliberate lie, which misuses language, which has recourse to the most spohisticated techniques of propaganda, which deceives and distorts dialogue and incites to aggression . . .

"While certain parties are fostered by ideologies which, in spite of their declarations, are opposed to the dignity of the

human person . . . ideologies which see in struggle the motive force of history, that see in force the source of rights, that see in the discernment of the enemy the ABC of politics, dialogue is fixed and sterile. Or, if it still exists, it is a superficial and falsified reality. It becomes very difficult, not to say impossible, therefore. There follows almost a compete lack of communication between countries and blocs. Even the international institutions are paralyzed. And the setback to dialogue then runs the risk of serving the arms race.

"However, even in what can be considered as an impasse to the extent that individuals support such ideologies, the attempt to have a lucid dialogue seems still necessary in order to unblock the situation and to work for the possible establishment of peace on particular points. This is to be done by counting upon common sense, on the possibilities of danger for everyone and on the just aspirations to which the peoples themselves largely adhere." [108]

The cold realism of this text, combined with the conviction that political dialogue and negotiations must be pursued in spite of obstacles, provides solid guidance for U.S.-Soviet relations. Acknowledging all the differences between the two philosophies and political systems, the irreducible truth is that objective mutual interests do exist between the superpowers. Proof of this concrete if limited convergence of interest can be found in some vitally important agreements on nuclear weapons which have already been negotiated in the areas of nuclear testing and nuclear explosions in space as well as the SALT I agreements.

The fact that the Soviet Union now possesses a huge arsenal of strategic weapons as threatening to us as ours may appear to them does not exclude the possibility of success in such negotiations. The conviction of many European observers that a *modus vivendi* (often summarized as "detente") is a practical possibility in political, economic and scientific areas should not be lightly dismissed in our country.

Sensible and successful diplomacy, however, will demand that we avoid the trap of a form of anti-Sovietism which fails to grasp the central danger of a superpower rivalry in which both the United States and the Soviet Union are the players, and fails to recognize the common interest both states have in never using nuclear weapons. Some of those dangers and common interests would exist in any world where two great powers, even relatively benign ones, competed for power, influence and security. The diplomatic requirement for addressing the U.S.-Soviet relationship is not romantic idealism about Soviet intentions and capabilities, but solid realism which recognizes that everyone will lose in a nuclear exchange.

As bishops we are concerned with issues which go beyond diplomatic requirements. It is of some value to keep raising in the realm of the political debate truths which ground our involvement in the affairs of nations and peoples. Diplomatic dialogue usually sees the other as a potential or real adversary. Soviet behavior in some cases merits the adjective reprehensible, but the Soviet people and their leaders are human beings created in the image and likeness of God. To believe we are condemned in the future only to what has been the past of U.S.-Soviet relations is to underestimate both our human potential for creative diplomacy and God's action in our midst which can open the way to changes we could barely imagine. We do not itend to foster illusory ideas that the road ahead in superpower relations will be devoid of tension or that peace will be easily achieved. But we do warn against that "hardness of heart" which can close us or others to the changes needed to make the future different from the past.

3. Interdependence: From Fact to Policy

While the nuclear arms race focuses attention on the U.S.-Soviet relationship, it is neither politically wise nor morally justifiable to ignore the broader international context in which that relationship exists. Public attention, riveted on the big powers, often misses the plight of scores of countries and millions of people simply trying to survive. The interdependence of the world means a set of interrelated human questions. Important as keeping the peace in the nuclear age is, it does not solve or dissolve the other major problems of the day. Among these problems the preeminent issue is the continuing chasm in living standards between the industrialized world (East and West) and the developing world. To quote Pope John Paul II:

"So widespread is the phenomenon that it brings into question the financial, monetary, production and commercial mechanisms that, resting on various political pressures, support the world economy. These are proving incapable either of remedying the unjust social situations inherited from the past or of dealing with the urgent challenges and ethical demands of the present." [109]

The East-West competition, central as it is to world order and important as it is in the foreign policy debate, does not address this moral question which rivals the nuclear issue in its human significance. While the problem of the developing nations would itself require a pastoral letter, Catholic teaching has maintained an analysis of the problem which should be identified here. The analysis acknowledges internal causes of poverty, but also concentrates on the way the larger international economic structures affect the poor nations. These particularly involve trade, monetary, investment and aid policies.

Neither of the superpowers is conspicuous in these areas for initiatives designed to address "the absolute poverty" in which millions live today.[110]

From our perspective and experience as bishops, we believe there is a much greater potential for response to these questions in the mind and hearts of Americans than has been reflected in U.S. policy. As pastors who often appeal to our congregations for funds destined for international programs, we find good will and great generosity the prevailing characteristics. The spirit of generosity which shaped the Marshall Plan is still alive in the American public.

We must discover how to translate this personal sense of generosity and compassion into support for policies which would respond to papal teaching in international economic issues. It is precisely the need to expand our conception of international charity and relief to an understanding of the need for social justice in terms of trade, aid and monetary issues which was reflected in Pope John Paul II's call to American Catholics in Yankee Stadium:

"Within the framework of your national institutions and in cooperation with all your compatriots, you will also want to seek out the structural reasons which foster or cause the different forms of poverty in the world and in your own country, so that you can apply the proper remedies. You will not allow yourselves to be intimidated or discouraged by oversimplified explanations which are more ideological than scientific—explanations which try to account for a complex evil by some single cause. But neither will you recoil before the reforms—even profound ones—of attitudes and structures that may prove necessary in order to recreate over and over again the conditions needed by the disadvantaged if they are to have a fresh chance in the hard struggle of life. The poor of the United States and of the world are your brothers and sisters in Christ." [111]

The pope's words highlight an intellectual, moral and political challenge for the United States. Intellectually there is a need to rethink the meaning of national interest in an interdependent world. Morally there is a need to build upon the spirit of generosity present in the U.S. public, directing it toward a more systematic response to the major issues affecting the poor of the world. Politically there is a need for U.S. policies which promote the profound structural reforms called for by recent papal teaching.

Precisely in the name of international order papal teaching has by word and deed sought to promote multilateral forms of cooperation toward the developing world. The U.S. capacity for leadership in multilateral institutions is very great. We urge much more vigorous and creative response to the needs of the developing countries by the United States in these institutions.

The significant role the United States could play is evident in the daily agenda facing these institutions. Proposals addressing the relationship of the industrialized and developing countries on a broad spectrum of issues, all in need of "profound reforms," are regularly discussed in the United Nations and other international organizations. Without U.S. participation, significant reform and substantial change in the direction of addressing the needs of the poor will not occur. Meeting these needs is an essential element for a peaceful world.

Papal teaching of the last four decades has not only supported international institutions in principle, it has supported the United Nations specifically. Pope Paul VI said to the U.N. General Assembly:

"The edifice which you have constructed must never fail; it must be perfected and made equal to the needs which world history will present. You mark a stage in the development of mankind for which retreat must never be admitted, but from which it is necessary that advance be made." [112]

It is entirely necessary to examine the United Nations carefully, to recognize its limitations and propose changes where needed. Nevertheless, in light of the continuing endorsement found in papal teaching, we urge that the United States adopt a stronger supportive leadership role with respect to the United Nations. The growing interdependence of the nations and peoples of the world, coupled with the extragovernmental presence of multinational corporations, requires new structures of cooperation. As one of the founders of and major financial contributors to the United Nations, the United States can and should assume a more positive and creative role in its life today.

It is in the context of the United Nations that the impact of the arms race on the prospects for economic development is highlighted. The numerous U.N. studies on the relationship of development and disarmament support the judgment of Vatican II

cited earlier in this letter: "The arms race is one of the greatest curses on the human race and the harm it inflicts upon the poor is more than can be endured." [113]

We are aware that the precise relationship between disarmament and development is neither easily demonstrated nor easily reoriented. But the fact of a massive distortion of resources in the face of crying human need creates a moral question. In an interdependent world the security of one nation is related to the security of all. When we consider how and what we pay for defense today, we need a broader view than the equation of arms with security.[114] The threats to the security and stability of an interdependent world are not all contained in missiles and bombers.

If the arms race in all its dimensions is not reversed, resources will not be available for the human needs so evident in many parts of the globe and in our own country as well. But we also know that making resources available is a first step; policies of wise use would also have to follow. Part of the process of thinking about the economics of disarmament includes the possibilities of conversion of defense industries to other purposes. Many say the possibilities are great if the political will is present. We say the political will to reorient resources to human needs and redirect industrial, scientific and technological capacity to meet those needs is part of the challenge of the nuclear age. Those whose livelihood is dependent upon industries which can be reoriented should rightfully expect assistance in making the transition to new forms of employment. The economic dimension of the arms race is broader than we can assess here, but these issues we have raised are among the primary questions before the nation.[115]

An interdependent world requires an understanding that key policy questions today involve mutuality of interest. If the monetary and trading systems are not governed by sensitivity to mutual needs, they can be destroyed. If the protection of human rights and the promotion of human needs are left as orphans in the diplomatic arena, the stability we seek in increased armaments will eventually be threatened by rights denied and needs unmet in vast sectors of the globe. If future planning about conservation of and access to resources is relegated to a pure struggle of power, we shall simply guarantee conflict in the future.

The moral challenge of interdependence concerns shaping the relationships and rules of practice which will support our common need for security, welfare and safety. The challenge tests our idea of human community, our policy analysis and our political will. The need to prevent nuclear war is absolutely crucial, but even if this is achieved, there is much more to be done.

IV. THE PASTORAL CHALLENGE AND RESPONSE

A. The church: A community of conscience, prayer and penance

Pope John Paul II, in his first encyclical, recalled with gratitude the teaching of Pius XII on the church. He then went on to say:

"Membership in that body has for its source a particular call, united with the saving action of grace. Therefore, if we wish to keep in mind this community of the people of God, which is so vast and so extremely differentiated, we must see first and foremost Christ saying in a way to each member of the community: 'Follow me.' It is the community of the disciples, each of whom in a different way—at times very consciously and consistently, at other times not very consciously and very consistently—is following Christ. This shows also the deeply 'personal' aspect and dimension of this society." [116]

In the following pages we should like to spell out some of the implications of being a community of Jesus' disciples in a time when our nation is so heavily armed with nuclear weapons and is engaged in a continuing development of new weapons together with strategies for their use.

It is clear today, perhaps more than in previous generations, that convinced Christians are a minority in nearly every country of the world—including nominally Christian and Catholic nations. In our own country we are coming to a fuller awareness that a response to the call of Jesus is both personal and demanding. As believers we can identify rather easily with the early church as a company of witnesses engaged in a difficult mission. To be disciplies of Jesus requires that we continually go beyond where we now are. To obey the call of Jesus means separating ourselves from all attachments and affiliation that could prevent us from hearing and following our authentic vocation. To set out on the road to discipleship is to dispose oneself for a share in the cross (cf. Jn. 16:20). To be a Christian, according to the New Testament, is not simply to believe with one's mind, but also to become a doer of the word, a wayfarer with and a witness to Jesus. This means, of course, that we never expect complete success within history and that we must regard as normal even the path of persecution and the possibility of martyrdom.

We readily recognize that we live in a world that is becoming increasingly estranged from Christian values. In order to remain a Christian, one must take a resolute stand against many commonly accepted axioms of the world. To become true disciples, we must undergo a demanding course of induction into the adult Christian community. We must continually equip ourselves to profess the full faith of the church in an increasingly secularized society. We must develop a sense of solidarity, cemented by relationships with mature and exemplary Christians who represent Christ and his way of life.

All of these comments about the meaning of being a disciple or a follower of Jesus today are especially relevant to the quest for genuine peace in our time.

B. Elements of a pastoral response

We recommend and endorse for the faithful some practical programs to meet the challenge to their faith in this area of grave concern.

1. Educational Programs and Formation of Conscience

Since war, especially the threat of nuclear war, is one of the central problems of our day, how we seek to solve it could determine the mode and even the possibility of life on earth. God made human beings stewards of the earth; we cannot escape this responsibility. Therefore we urge every diocese and parish to implement balanced and objective educational programs to help people at all age levels to understand better the issues of war and peace. Development and implementation of such programs must receive a high priority during the next several years. They must teach the full impact of our Christian faith. To accomplish this, this pastoral letter in its entirety, including its complexity, should be used as a guide and a framework for such programs, as they lead people to make moral decisions about the problems of war and peace, keeping in mind that the applications of principles in this pastoral letter do not carry the same moral authority as our statements of universal moral principles and formal church teaching.

In developing educational programs we must keep in mind that questions of war and peace have a profoundly moral dimension which respsonsible Christians cannot ignore. They are questions of life and death. True, they also have a political dimension because they are embedded in public policy. But the fact that they are also political is not excuse for denying the church's obligation to provide its members with the help they need in forming their consciences. We must learn together how to make correct and responsible moral judgments. We reject, therefore, criticism of the church's concern with these issues on the ground that it "Should not become involved in politics." We are called to move from discussion to witness and action.

At the same time we recognize that the church's teaching authority does not carry the same force when it deals with technical solutions involving particular means as it does when it speaks of principles or ends. People may agree in abhorring an injustice, for instance, yet sincerely disagree as to what practical approach will achieve justice. Religious groups are as entitled as others to their opinion in such cases, but they should not claim that their opinions are the only ones that people of good will may hold.

The church's educational programs must explain clearly those principles or teachings about which there is little question. Those teachings, which seek to make explicit the gospel call to peace and the tradition of the church, should then be applied to concrete situations. They must indicate what the possible legitimate options are and what the consequences of those options may be. While this approach should be self-evident, it needs to be emphasized. Some people who have entered the public debate on nuclear warfare, at all points on the spectrum of opinion, appear not to understand or accept some of the clear teachings of the church as contained in papal or conciliar documents. For example, some would place almost no limits on the use of nuclear weapons if they are needed for "self-defense." Some on the other side of the debate insist on conclusions which may be legitimate options but cannot be made obligatory on the basis of actual church teaching.

2. True Peace Calls for "Reverence for Life"

All of the values we are promoting in this letter rest ultimately in the disarmament of the human heart and the conversion of the human spirit to God, who alone can give authentic peace. Indeed, to have peace in our world we must first have peace within ourselves. As Pope John Paul II reminded us in his 1982 World Day of Peace message, world peace will always elude us until peace becomes a reality for each of us personally. "It springs from the dynamism of free wills guided by reason toward the common good that is to be attained in truth, justice and love." [117] Interior peace becomes possible only when we have a conversion of spirit. We cannot have peace with hate in our hearts.

No society can live in peace with itself or with the world without a full awareness of the worth and dignity of every human person and of the sacredness of all human

life (Jas. 4: 1-2). When we accept violence in any form as commonplace, our sensitivities become dulled. When we accept violence, war itself can be taken for granted. Violence has many faces: oppression of the poor, deprivation of basic human rights, economic exploitation, sexual exploitation and pornography, neglect or abuse of the aged and the helpless and innumerable other acts of inhumanity. Abortion in particular blunts a sense of the sacredness of human life. In a society where, the innocent unborn are killed wantonly, how can we expect people to feel righteous revulsion at the act or threat of killing non-combatants in war?

We are well aware of the differences involved in the taking of human life in warfare and the taking of human life through abortion. As we have discussed throughout this document, even justifiable defense against aggression may result in the indirect or unintended loss of innocent human lives. This is tragic, but may conceivably be proportionate to the values defended. Nothing, however, can justify direct attack on innocent human life in or out of warfare. Abortion is precisely such an attack.

We know that millions of men and women of good will, of all religious persuasions, join us in our commitment to try to reduce the horrors of war and particularly to assure that nuclear weapons will never again be used by any nation, anywhere, for any reason. Millions join us in our no to nuclear war in the certainty that nuclear war would inevitably result in the killing of millions of innocent human beings, directly or indirectly. Yet many part ways with us in our efforts to reduce the horror of abortion and our no to war on innocent human life in the womb, killed not indirectly, but directly.

We must ask how long a nation willing to extend a constitutional guarantee to the "right" to kill defenseless human beings by abortion is likely to refrain from adopting strategic warfare policies deliberately designed to kill millions of defenseless human beings if adopting them should come to seem "expedient." Since 1973, approximately 15 million abortions have been performed in the United States, symptoms of a kind of disease of the human spirit. And we now find ourselves seriously discussing the pros and cons of such questions as infanticide, euthanasia and the involvement of physicians in carrying out the death penalty. Those who would celebrate such a national disaster can only have blinded themselves to its reality.

Pope Paul VI was resolutely clear: If you wish peace, defend life.[118] We plead with all who would work to end the scourge of war to begin by defending life at its most defenseless, the life of the unborn.

3. Prayer

A conversion of our hearts and minds will make it possible for us to enter into a closer communion with our Lord. We nourish that communion by personal and communal prayer, for it is in prayer that we encounter Jesus, who is our peace and learn from him the way to peace.

In prayer we are renewed in faith and confirmed in our hope in God's promise.

The Lord's promise is that he is in our midst when we gather in prayer. Strengthened by this conviction, we beseech the risen Christ to fill the world with his peace. We call upon Mary, the first disciple and the Queen of Peace, to intercede for us and for the people of our time that we may walk in the way of peace. In this context, we encourage devotion to Our Lady of Peace.

As believers, we understand peace as a gift of God. This belief prompts us to pray constantly, personally and communally, particularly through the reading of scripture and devotion to the rosary, especially in the family. Through these means and others we seek the wisdom to begin the search for peace and the courage to sustain us as instruments of Christ's peace in the world.

The practice of contemplative prayer is especially valuable for advancing harmony and peace in the world. For this prayer rises, by divine grace, where there is total disarmament of the heart, and unfolds in an experience of love which is the moving force of peace. Contemplation fosters a vision of the human family as united and interdependent in the mystery of God's love for all people. This silent interior prayer bridges temporarily the "already" and "not yet," this world and God's kingdom of peace.

The Mass in particular is a unique means of seeking God's help to create the conditions essential for true peace in ourselves and in the world. In the eucharist we encounter the risen Lord, who gave us his peace. He shares with us the grace of the redemption, which helps us to preserve and nourish this precious gift. Nowhere is the church's urgent plea for peace more evident in the liturgy than in the Communion Rite. After beginning this rite of the Mass with the Lord's Prayer, praying for reconciliation now and in the kingdom to come, the community asks God to "grant us peace in our day," not just at some time in the distant future. Even before we are exhorted "to offer each other the sign of peace," the priest continues the church's prayer for peace, recalling the Lord Jesus Christ's own legacy of peace:

"Lord Jesus Christ, you said to your apostles: I leave you peace, my peace I give you. Look not on our sins, but on the faith of your church, and grant us the peace and unity of your kingdom."

Therefore we encourage every Catholic to make the sign of peace at Mass an authentic sign of our reconciliation with God and with one another. This sign of peace is also a visable expression of our commitment to work for peace as a Christian community. We approach the table of the Lord only after having dedicated ourselves as a Christian community to peace and reconciliation. As an added sign of commitment, we suggest that there always be a petition for peace in the general intercessions at every eucharistic celebration.

We implore other Christians and everyone of good will to join us in this continuing prayer for peace, as we beseech God for peace within ourselves, in our families and community, in our nation and in the world.

4. Penance

Prayer by itself is incomplete without penance. Penance directs us toward our goal of putting on the attitudes of Jesus himself. Because we are all capable of violence, we are never totally conformed to Christ and are always in need of conversion. The 20th century alone provides adequate evidence of our violence as individuals and as a nation. Thus, there is continual need for acts of penance and conversion. The worship of the church, particularly through the sacrement of reconciliation and communal penance services, offers us multiple ways to make reparation for the violence in our own lives and in our world.

As a tangible sign of our need and desire to do penance we, for the cause of peace, commit ourselves to fast and abstinence on each Friday of the year. We call upon our people voluntarily to do penance on Friday by eating less food and by abstaining from meat. This return to a traditional practice of penance, once well observed in the U.S. church, should be accompanied by works of charity and service toward our neighbors. Every Friday should be a day significantly devoted to prayer, penance and almsgiving for peace.

It is to such forms of penance and conversion that the scriptures summon us. In the words of the prophet Isaiah:

"Is not the sort of fast that pleases me, to break unjust fetters and undo the thongs of the yoke, to let the oppressed go free and break every yoke, to share your bread with the hungry, and shelter the homeless poor, to clothe the person you see to be naked and not turn from your own kin? Then will your light shine like the dawn and your wound be quickly healed over. If you do away with the yoke, the clenched fist, the wicked word, if you give your bread to the hungry and relief to the oppressed, your light will rise in the darkness, and your shadows become like noon" (Is. 58: 6-8; 10).

The present nuclear arms race has distracted us from the words of the prophets, has turned us from peacemaking and has focused our attention on a nuclear buildup leading to annihilation. We are called to turn back from this evil of total destruction and turn instead in prayer and penance toward God, toward our neighbor and toward the building of a peaceful world:

"I set before you life or death, a blessing or a curse. Choose life then, so that you and your descendants may live in the love of Yahweh your God, obeying his voice, clinging to him; for in this your life consists, and on this depends your long stay in the land which Yahweh swore to your fathers Abraham, Isaac and Jacob, he would give them" (Dt. 11:26).

C. Challenge and Hope

The arms race presents questions of conscience we may not evade. As American Catholics we are called to express our loyalty to the deepest values we cherish: peace, justice and security for the entire human family. National goals and policies must be measured against that standard.

We speak here in a specific way to the Catholic community. After the passage of nearly four decades and a concomitant growth in our understanding of the ever growing horror of nuclear war, we must shape the climate of opinion which will make it possible for our country to express profound sorrow over the atomic bombing in 1945. Without that sorrow, there is no possibility of finding a way to repudiate future use of nuclear weapons or of conventional weapons in such military actions as would not fulfill just-war criteria.

To Priests, Deacons, Religious and Pastoral Ministers

We recognize the unique role in the church which belongs to priests and deacons by reason of the sacrament of holy orders and their unique responsibility in the community of believers. We also recognize the valued and indispensable role of men and women religious. To all of them and to all other pastoral ministers we stress that the cultivation of the gospel vision of peace as a way of life for believers and as a leaven in society should be a major objective. As bishops we are aware each day of our dependence upon your efforts. We are aware too that this letter and the new obligations it could present to the faithful may create difficulties for you in dealing with those you

serve. We have confidence in your capacity and ability to convert these difficulties into an opportunity to give a fuller witness to our Lord and his message. This letter will be known by the faithful only as well as you know it, preach and teach it, and use it creatively.

To Educators

We have outlined in this letter Catholic teaching on war and peace, but this framework will become a living message only through your work in the Catholic community. To teach the ways of peace is not "to weaken the nations's will," but to be concerned for the nations's soul. We address theologians in a particular way because we know that we have only begun the journey toward a theology of peace; without your specific contributions this desperately needed dimension of our faith will not be realized. Through your help we may provide new visions and wisdom for church and state.

We are confident that all models of Catholic education, which have served the church in our country so well in so many ways, will creatively rise to the challenge of peace.

To Parents

Your role, in our eyes, is unsurpassed by any other; the foundation of society is the family. We are conscious of the continuing sacrifices you make in the efforts to nurture the full human and spiritual growth of your children. Children hear the gospel message first from your lips. Parents who consciously discuss issues of justice in the home and who strive to help children solve conflicts through non-violent methods enable their children to grow up as peacemakers. We pledge our continuing pastoral support in the common objective we share of building a peaceful world for the future of children everywhere.

To Youth

Pope John Paul II singles you out in every country where he visits as the hope of the future; we agree with him. We call you to choose your future work and professions carefully. How you spend the rest of your lives will determine in large part whether there will any longer be a world as we know it. We ask you to study carefully the teachings of the church and the demands of the Gospel about war and peace. We encourage you to seek careful guidance as you reach conscientious decisions about your civic responsibilities in this age of nuclear military forces.

We speak to you, however, as people of faith. We share with you our deepest conviction that in the midst of the dangers and complexities of our time God is with us working through us and sustaining us all in our effort of building a world of peace with justice for each person.

To Men and Women in Military Service

Millions of you are Catholics serving in the armed forces. We recognize that you carry special responsibilities for the issues we have considered in this letter. Our perspective on your profession is that of Vatican II: "All those who enter the military service in loyalty to their country should look upon themselves as the custodians of the security and freedom of their fellow countrymen; and where they carry out their duty properly, they are contributing to the maintenance of peace." [119]

It is surely not our intention in writing this letter to create problems for Catholics in the armed forces. Every profession, however, has its specific moral questions and it is clear that the teaching on war and peace developed in this letter poses a special challenge and opportunity to those in the military profession. Our pastoral contact with Catholics in military service, either through our direct experience or through our priests, impresses us with the demanding moral standards we already see observed and the commitment to Catholic faith we find. We are convinced that the challenges of this letter will be faced conscientiously. The purpose of defense policy is to defend the peace; military professionals should understand their vocation this way. We believe they do, and we support this view.

We remind all in authority and in the chain of command that their training and field manuals have long prohibited, and still do prohibit, certain actions in the conduct of war, especially those actions which inflict harm on innocent civilians. The question is not whether certain measures are unlawful or forbidden in warfare, but which measures: To refuse to take such actions is not an act of cowardice or treason but one of courage and patriotism.

We address particularly those involved in the exercise of authority over others. We are aware of your responsibilities and impressed by the standard of personal and profesional duty you uphold. We feel, therefore, that we can urge you to do everything you can to assure that every peaceful alternative is exhausted before war is even remotely considered. In developing battle plans and weapons systems, we urge you to try to ensure that these are designed to reduce violence, destruction, suffering and death to a minimum, keeping in mind especially non-combatants and other innocent persons.

Those who train individuals for military duties must remember that the citizen does not lose his or her basic human rights by entrance into military service. No one, for whatever reason, can justly treat a military person with less dignity and respect than that demanded for and deserved by every human person. One of the most difficult problems of war involves defending a free society without destroying the values that give it meaning and validity. Dehumanization of a nation's military personnel by dulling their sensibilities and generating hatred toward adversaries in an effort to increase their fighting effectiveness robs them of basic human rights and freedoms, degrading them as persons.

Attention must be given to the effects on military personnel themselves of the use of even legitimate means of conducting war. While attacking legitimate targets and wounding or killing opposed combat forces may be morally justified, what happens to military persons required to carry out these actions? Are they treated merely as instruments of war, insensitive as the weapons they use? With what moral or emotional experiences do they return from war and attempt to resume normal civilian lives? How does their experience affect society? How are they treated by society?

It is not only basic human rights of adversaries that must be respected, but those of our own forces as well. We re-emphasize, therefore, the obligation of responsible, authorities to ensure appropriate training and education of combat forces and to provide appropriate support for those who have experienced combat. It is unconscionable to deprive those veterans of combat whose lives have been severely disrupted or traumatized by their combat experiences of proper psychological and other appropriate treatment and support.

Finally, we are grateful for the sacrifice so many in military service must make today and for the service offered in the past by veterans. We urge that those sacrifices be mitigated so far as possible by the provision of appropriate living and working conditions and adequate financial recompense. Military persons and their families must be provided continuing opportunity for full spiritual growth, the exercise of their religious faith and a dignified mode of life.

We especially commend and encourage our priests in military service. In addition to the message already addressed to all priests and religious, we stress the special obligations and opportunities you face in direct pastoral service to the men and women of the armed forces. To complement a teaching document of this scope, we shall need the sensitive and wise pastoral guidance only you can provide. We promise our support in facing this challenge.

To Men and Women in Defense Industries

You also face specific questions because the defense industry is directly involved in the development and production of the weapons of mass destruction which have concerned us in this letter. We do not presume or pretend that clear answers exist to many of the personal, professional and financial choices facing you in your varying responsibilities. In this letter we have ruled out certain uses of nuclear weapons, while also expressing conditional moral acceptance for deterrence. All Catholics, at every level of defense industries, can and should use the moral principles of this letter to form their consciences. We realize that different judgments of conscience will face different people, and we recognize the possibility of diverse concrete judgments being made in this complex area. We seek as moral teachers and pastors to be available to all who confront these questions of personal and vocational choice. Those who in conscience decide that they should no longer be associated with defense activities should find support in the Catholic community. Those who remain in these industries or earn a profit from the weapons industry should find in the church guidance and support for the ongoing evaluation of their work.

To Men and Women of Science

At Hiroshima Pope John Paul said:

"Criticism of science and technology is sometimes so severe that it comes close to condemning science itself. On the contrary, science and technology are a wonderful product of a God-given human creativity, since they have provided us with wonderful possibilities and we all gratefully benefit from them. But we know that this potential is not a neutral one: It can be used either for man's progress or for his degradation." [120]

We appreciate the efforts of scientists, some of whom first unlocked the secret of atomic power and others of whom have developed it in diverse ways, to turn the enormous power of science to the cause of peace.

Modern history is not lacking scientists who have looked back with deep remorse on the development of weapons to which they contributed, sometimes with the highest motivation, even believing that they were creating weapons that would render all other weapons obsolete and convince the world of the unthinkableness of war. Such efforts have ever proved illusory. Surely equivalent dedication of scientific minds to

reverse current trends and to pursue concepts as bold and adventuresome in favor of peace as those which in the past have magnified the risks of war could result in dramatic benefits for all of humanity. We particularly note in this regard the extensive efforts of public education undertaken by physicians and scientists on the medical consequences of nuclear war.

We do not, however, wish to limit our remarks to the physical sciences alone. Nor do we limit our remarks to physical scientists. In his address at the United Nations University in Hiroshima, Pope John Paul II warned about misuse of "the social sciences and the human behavioral sciences when they are utilized to manipulate people, to crush their mind, souls, dignity and freedom." [121] The positive role of social science in overcoming the dangers of he nuclear age is evident in this letter. We have been dependent upon the research and analysis of social scientists in our effort to apply the moral priniciples of the Catholic tradition to the concrete problems of our day. We encourage social scientists to continue this work of relating moral wisdom and political reality. We are in continuing need of your insights.

To Men and Women of the Media

We have directly felt our dependence upon you in writing this letter; all the problems we have confronted have been analyzed daily in the media. As we have grappled with these issues, we have experienced some of the responsbility you bear for interpreting them. On the quality of your efforts depends in great measure the opportunity the general public will have for understanding this letter.

To Public Officials

Vatican II spoke forcefully of "the difficult yet noble art of politics." [122] No public issue is more difficult than avoiding war; no public task more noble than building a secure peace. Public officials in a democracy must both lead and listen; they are ultimately dependent upon a popular consensus to sustain policy. We urge you to lead with courage and to listen to the public debate with sensitivity.

Leadership in a nuclear world means examining with great care and objectivity every potential initiative toward world peace, regardless of how unpromising it might at first appear. One specific initiative which might be taken now would be the establishment of a task force including the public sector, industry, labor, economists and scientists with the mandate to consider the problems and challenges posed by nuclear disarmament to our economic well-being and industrial output. Listening includes being particularly attentive to the consciences of those who sincerely believe that they may not morally support warfare in general, a given war or the exercise of a particular role within the armed forces. Public officials might well serve all of our fellow citizens by proposing and supporting legislation designed to give maximum protection to this precious freedom, true freedom of conscience.

In response to public officials who both lead and listen, we urge citizens to respect the vocation of public service. It is a role easily maligned, but not easily fulfilled. Neither justice nor peace can be achieved with stability in the absence of courageous and creative public servants.

To Catholics as Citizens

All papal teaching on peace has stressed the crucial role of public opinion. Pope John Paul II specified the tasks before us: "There is no justification for not raising the question of the responsibility of each nation and each individual in the face of possible wars and of the nuclear threat." [123] In a democracy the responsibility of the nation and that of its citizens coincide. Nuclear weapons pose especially acute questions of conscience for American Catholics. As citizens we wish to affirm our loyalty to our country and its ideals, yet we are also citizens of the world who must be faithful to the universal principles proclaimed by the church. While some other countries also possess nuclear weapons, we may not forget that the United States was the first to build and to use them. Like the Soviet Union, this country now possesses so many weapons as to imperil the continuation of civilization. Americans share responsibility for the current situation and cannot evade responsibility for trying to resolve it.

The virtue of patriotism means that as citizens we respect and honor our country, but our very love and loyalty make us examine carefully and regularly its role in world affairs, asking that it live up to its full potential as an agent of peace with justice for all people.

"Citizens must cultivate a generous and loyal spirit of patriotism, but without being narrow-minded. This means that they will always direct their attention to the good of the whole human family, united by the different ties which bind together races, people and nations." [124]

In a pluralistic democracy like the United States, the church has a unique opportunity, precisely because of the strong constitutional protection of both religious freedom and freedom of speech and the press, to help call attention to the moral dimensions of public issues. In a previous pastoral letter, "Human Life in Our Day," we said:

"In our democratic system, the fundamental right of political dissent cannot be denied nor is rational debate on public policy decisions of government in the light of moral and political principles to be discouraged. It is the duty of the governed to analyze responsibility the concrete issues of public policy." [125]

In fulfilling this role the church helps to create a community of conscience in the wider civil community. It does this in the first instance by teaching clearly within the church the moral principles which bind and shape the Catholic conscience. The church also fulfills a teaching role, however, in striving to share the moral wisdom of the Catholic tradition with the larger society.

In the wider public discussion we look forward in a special way to cooperating with all other Christians with whom we share common traditions. We also treasure cooperative efforts with Jewish and Islamic communities, which possess a long and abiding concern for peace as a religious and human value. Finally, we reaffirm our desire to participate in a common public effort with all men and women of good will who seek to reverse the arms race and secure the peace of the world.

CONCLUSION

As we close this lengthy letter, we try to answer two key questions as directly as we can.

Why do we address these matters fraught with such complexity, controversy and passion? We speak as pastors, not politicians. We are teachers, not technicians. We cannot avoid our responsibility to lift up the moral dimensions of the choices before our world and nation. The nuclear age is an era of moral as well as physicial danger. We are the first generation since Genesis with the power to virtually destroy God's creation. We cannot remain silent in the face of such danger. Why do we address these issues? We are simply trying to live up to the call of Jesus to be peacemakers in our own time and situation.

What are we saying? Fundamentally, we are saying that the decisions about nuclear weapons are among the most pressing moral questions of our age. While these decisions have obvious military and political aspects, they involve fundamental moral choices. In simple terms, we are saying that good ends (defending one's country, protecting freedom, etc.) cannot justify immoral means (the use of weapons which kill indiscriminately and threaten whole societies). We fear that our world and nation are headed in the wrong direction. More weapons with greater destructive potential are produced every day. More and more nations are seeking to become nuclear powers. In our quest for more and more security we fear we are actually becoming less and less secure.

In the words of our Holy Father, we need a "moral about-face." The whole world must summon the moral courage and technical means to say no to nuclear conflict; no to weapons of mass destruction; no to an arms race which robs the poor and the vulnerable; and no to the moral danger of a nuclear age which places before humankind indefensible choices of constant terror or surrender. Peacemaking is not an optional commitment. It is a requirement of our faith. We are called to be peacemakers, not by some movement of the moment, but by our Lord Jesus. The content and context of our peacemaking is set not by some political agenda or ideological program, but by the teaching of his church.

Thus far in this pastoral letter we have made suggestions we hope will be helpful in the present world crisis. Looking ahead to the long and productive future of humanity for which we all hope, we feel that a more all-inclusive and final solution is needed. We speak here of the truly effective international authority for which Pope John XXIII ardently longed in "Peace on Earth" [126] and of which Pope Paul VI spoke to the United Nations on his visit there in 1965.[127] The hope for such a structure is not unrealistic, because the point has been reached where public opinion sees clearly that, with the massive weaponry of the present, war is not longer viable. There *is* a substitute for war. There is negotiation under the supervision of a global body realistically fashioned to do its job. It must be given the equipment to keep constant surveillance on the entire earth. Present technology makes this possible. It must have the authority, freely conferred upon it by all the nations, to investigate what seems to be preparations for war by any one of them. It must be empowered by all the nations to enforce its commands on every nation. It must be so constituted as to pose no threat to any nation's sovereignty. Obviously the creation of such a sophisticated instrumentality is a gigantic task, but is it hoping for too much to believe that the genius of humanity, aided by the grace and guidance of God, is able to accomplish it? To create it may take decades of unrelenting daily toil by the world's best minds and most devoted hearts, but is shall never come into existence unless we make a beginning now.

As we come to the end of our pastoral letter we boldly propose the beginning of this work. The evil of the proliferation of

The Senate should take note of the fact that within the present bill there are provisions which allow a quota of 40,000 persons per year from Canada and Mexico. All other countries are allowed an allotment of 20,000 per year.

Mr. President, I can see no reason for this 40,000 allotment. It is contrary to the principle of equal treatment of all countries which has come to be embodied in our immigration laws. Under this bill, the unused portion of the quota of Canada is to be transferred from Canada to Mexico. This compounds the breach of the principle of equal treatment and futher enshrines Mexico in our legislation as a specially favored nation in terms of immigration.

The Library of Congress has provided me with the following statistics on Canadian immigration to the United States since 1972:

Fiscal year:	
1972	10,776
1973	8,951
1974	7,654
1975	7,308
1976	7,638
TQ1976	2,458
1977	12,688
1978	16,863
1979	13,772
1980	13,609
1981(preliminary)	11,191

As Senators will note, this is an average of about 11,000 immigrants per year. It is patently clear that Mexico, under this bill, will receive almost 30,000 of Canada's 40,000 quota if the average of the last 10 years of Canadian immigration continues. Certainly, Mexico would receive between 20,000 and 25,000 of Canada's annual allotment of visas.

Adding the unused portion of Canada's allotment to Mexico's allotment of 40,000 would bring the annual allotment of Mexico up to the 60,000 to 70,000 range on an annual basis. This is over three times the allotment for all other countries, Canada excepted. Is this an equitable situation? Certainly not.

Mr. President, what the 40,000 allotment with its transfer provision represents is in fact a supplemental amnesty program for Mexican aliens. Lets be frank, it is clear that the framers of the bill recognizing the massive problem of illegal Mexican immigration have attempted to take another easy way out. Rather than deny amnesty to prevent establishing a dangerous precedent and to send a clear signal to the Mexican Government and to individual lawbreakers—potential and actual—they have simply caved in and incorporated an amnesty provision into the bill. Rather than emphasizing increased enforcement capabilities to stem the flood tide of illegals, this inequitable and strange provision which would allow Mexico perhaps 60,000 to 70,000 visas allotments was incorporated into the bill.

My amendment is simple and direct. It merely places Mexico and Canada in the same position as all the other countries of the world under this bill. Mexico and Canada would have an allotment of 20,000 rather than 40,000 and there would be no transfer of unused portions of the allotments.

I urge my distinguished colleagues to reflect carefully on the implications of a massive amnesty program. Is there any real reason for an additional supplementary amnesty program? To this Senator, Mexico needs no more extraordinary treatment under this bill.

Mr. President, I ask unanimous consent that it be in order for me to ask for the yeas and nays on each amendment to be voted on separately.

The PRESIDING OFFICER. Is there objection to the request of the Senator of grouping the three yea and nay votes?

The Chair hears none, and it is so ordered.

Mr. HELMS. I ask for the yeas and nays on all three amendments.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, I thank the Chair and I thank the Senator from Wyoming.

Mr. SIMPSON. I thank the Senator from North Carolina very much. He has assisted greatly in accommodating our request to expedite this matter today. His action just moments ago is evidence certainly of that, and I deeply appreciate it. I thank the Senator very much.

Mr. HELMS. I thank the Senator from Wyoming.

Mr. SIMPSON. Mr. President, the bill recognizes the very special relationship, friendship, and proximity the United States has with our contiguous neighbors in trade, commitment to democratic principles, and mutual strategic interests.

We must remember that until 1976 there were no limitations whatsoever for Canada and Mexico. Nationals of those two countries could enter the United States without restriction as immigrants.

By allowing our two contiguous neighbors an increased quota, we are not increasing overall immigration to the United States. The overall cap will maintain immigration at its present levels.

The strongest illegal immigration pressure and the largest numbers in the backlogs are from Mexico. By providing these extra visas to our southern neighbor, we will relieve the pressure for illegal migration and that is why this provision is an important aspect of an immigration control bill.

I urge you to reject the amendment.

As I have mentioned, this provision will, without increasing total immigration to the United States, allow Mexico, with the largest numbers in the backlogs and the greatest immigration pressure to have those visas not used by our other contiguous neighbor—this will reduce both the backlogs and the pressure to immigrate to this country illegally when visas are not available for legal immigration.

Although at present Mexico would undoubtedly benefit from this provision, at times in our past Canada was the country which sent the most immigrants to the United States, and it is entirely possible at some future time that this provision may be of more benefit to our other contiguous neighbor.

Again, it simply recognizes the special relationship we have with our contiguous neighbors.

I urge my colleagues to reject the amendment.

Mr. President, I definitely want to address very briefly the issue to attempt to eliminate legalization. Legalization, which is a very critical part of this bill, is not a reward for violation of the immigration laws of the United States. It is a practical solution to a very critically serious national problem. The issue is this: there is a large fearful subclass of human beings in this country who, according to the information received by the Select Commission and by this subcommittee and the full committee, for fear of being discovered, fail to report crimes against their property, their person and their family, and often do not seek medical help unless it is to give birth to a U.S. citizen child, and they are those who will not complain about exploitation in the working place, and that cannot be good for this country. Somehow it indeed diminishes us in known and unknown ways.

Furthermore, this Congress, and successive administrations, must bear some of the responsibility for this flourishing of a subsociety of illegal aliens within our country. Beginning with what was known as the Texas proviso and continuing on to the present day, we have tacitly approved their illegal entry into this country by failing to provide adequate funding or manpower for the Immigration Service year after year, after year, and by looking the other way as these aliens came by the hundreds of thousands to take job opportunities in this country.

What a curious situation, where it is legal for an employer to hire an illegal but it is illegal for the illegal to work. Only in America.

Nevertheless, these undocumented workers are here illegally and, most importantly, if we could not find them coming in how do we find them to get them out? I do not want to be part of the hunt that that entails. I do not

mara and G. Smith, "Nuclear Weapons and the Atlantic Alliance," Foreign Affairs 60 (1982) p. 757.

"From my experience in combat there is no way that (nuclear escalation) . . . can be controlled because of the lack of information, the pressure of time and the deadly results that are taking place on both sides of the battle line." Gen. A. S. Collins Jr. (former deputy commander in chief of U.S. Army in Europe), "Theatre Nuclear Warfare: The Battlefield," in J. F. Reichart and S. R. Sturn, eds., *American Defense Policy*, 5th ed., (Baltimore: 1982) p. 359-360.

"None of this potential flexibility changes my view that a full-scale thermonuclear exchange would be an unprecedented disaster for the Soviet Union as well as for the United States. Nor is it at all clear that an initial use of nuclear weapons—however selectively they might be targeted—could be kept from escalating to a full-scale thermonuclear exchange, especially if command-and-control centers were brought under attack. The odds are high, whether weapons were used against tactical or strategic targets, that control would be lost on both sides and the exchange would become unconstrained." Harold Brown, Department of Defense Annual Report FY 1979 (Washington: 1978). Cf. also: "The Effects of Nuclear War" (Washington: 1979; U.S. Government Printing Office).

[68] Testimony given to the NCCB Committee during preparation of this pastoral letter. The testimony is reflected in the quotes found in footnote 61 above.

[69] Our conclusions and judgments in this area although based on careful study and reflection of the application of moral principles do not have, of course, the same force as the principles themselves and therefore allow for different opinions, as the Precis makes clear.

[70] Undoubtedly aware of the long and detailed technical debate on limited war, Pope John Paul II highlighted the unacceptable moral risk of crossing the threshold to nuclear war in his "Angelus Message" Dec. 13, 1981: "I have in fact the deep conviction that, in the light of a nuclear war's effects, which can be scientifically foreseen as certain, the only choice that is morally and humanely valid is represented by the reduction of nuclear armaments, while waiting for their future complete elimination, carried out simultaneously by all the parties, by means of explicit agreements and with the commitment of accepting effective controls." In Documents, p. 240.

[81] Particularly helpful was the letter of Jan. 15, 1983, of William Clark, national security adviser, to Cardinal Bernardin. Clark stated: "For moral, political and military reasons, the United States does not target the Soviet civilian population as such. There is no deliberately opaque meaning conveyed in the last two words. We do not threaten the existence of Soviet civilization by threatening Soviet cities. Rather, we hold at risk the war-making capability of the Soviet Union—its armed forces, and the industrial capacity to sustain war. It would be irresponsible for us to issue policy statements which might suggest to the Soviets that it would be to their advantage to establish privileged sanctuaries within heavily populated areas, thus inducing them to locate much of their war-fighting capability within those urban sanctuaries." A reaffirmation of the administration's policy is also found in Secretary Weinberger's Annual Report to the Congress (Caspar Weinberger, Annual Report to the Congress, Feb. 1, 1983, p. 55): "The Reagan administration's policy is that under no circumstances may such weapons be used deliberately for the purpose of destroying populations." Also the letter of Weinberger to Bishop O'Connor of Feb. 9, 1983, has a similar statement.

[82] Zuckerman, *Nuclear Illusion and Reality*, (N.Y.: 1982); D. Ball, cited, p. 36; T. Powers, "Choosing a Strategy for World War III," The Atlantic Monthly (November 1982) p. 82-110.

[83] Cf. The comments in Pontifical Academy of Sciences, "Statement on the Consequences of the Use of Nuclear Weapons," cited above.

[84] Several experts in strategic theory would place both the MX missile and Pershing II missiles in this category.

[85] In each of the successive drafts of this letter we have tried to state a central moral imperative: that the arms race should be stopped and disarmament begun. The implementation of this imperative is open to a wide variety of approaches. Hence we have chosen our own language in this paragraph, not wanting either to be identified with one specific political initiative or to have our words used against specific political measures.

Mr. KENNEDY. I yield back the remainder of my time to the Senator from West Virginia.

THE BUDGET RESOLUTION

Mr. BYRD. Mr. President, may I use a bit of my time to make an inquiry of the distinguished majority leader?

Mr. BAKER. Yes.

Mr. BYRD. That inquiry being, What estimate can the very able majority leader give to the Senate with respect to Budget Committee action on the budget? Is the Budget Committee meeting today? If not so, when? I am not sure the majority leader has a response to that question.

Mr. BAKER. Mr. President, I thank the minority leader. I wish I could be more specific, but I must say to my friend, the minority leader, that when I tried to find out the answer to his question earlier this morning, I discovered that the chairman of the Budget Committee is on an airplane returning to Washington and perhaps will not be back until after 2 p.m. today. The chairman of the Finance Committee, Senator DOLE, will not be back until early afternoon. Until those two Members are here, it will be impossible for me to discuss the matter fully.

In the meantime, I intend to have a discussion with the distinguished occupant of the chair, the Senator from Washington, who is the author of the modification to the Chafee amendment, which was the last business transacted by the Senate on this budget.

But I guess what I have to say to the minority leader is that until I get all the chickens back in the coop I cannot count them.

Mr. BYRD. Mr. President, I thank the majority leader. I have some of the chickens in my own coop here. I think Mr. EXON, being one of those Members, probably has a question or a statement. I yield to him from my time for that purpose.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. I thank my friend from West Virginia and I thank the Chair.

If the majority leader will yield to answer a question that I am about to ask, along with a suggestion, it might be helpful in straightening out the extreme difficulty that we have.

Mr. BAKER. I would be glad to try. I hope I can give the Senator a better answer than I was able to give to the minority leader.

Mr. EXON. Two of the five Members on the floor of the Senate right now are members of the Budget Committee, and this member of the Budget Committee has not even been advised as to when the Budget Committee would meet. This is Monday. We are supposed to report back, as the majority leader just said, before the close of business tomorrow.

It seems to me that unless an arrangement has already been made, unless there are enough votes in the Budget Committee to report out a budget that has any chance of being accepted by the full Senate, I would think that we are in considerable difficulty by anticipating that we could possibly finish by the close of business on Tuesday.

I was very pleased when I heard the majority leader say a few moments ago that it might be well if we would give some additional time. And I raised my voice on the floor of the Senate before we recommitted this to the Budget Committee, which I thought was the only proper thing to do under the circumstances, that it was going to take some time if we were going to do something other than a perfunctory exercise, possibly, in futility in the Budget Committee. It seems to me we have to work that budget over. We have to reduce spending further. I cannot believe that that can be done in a few hours session.

Therefore, I think it would be entirely proper if we could have an arrangement made to where we would have at least until the close of business on Wednesday to give the committee more time than it has right now. We have wasted, we have eliminated, we have taken no action with regard to the first 2 days of the 3-day rule. Therefore, it would seem to me that if we tried to rush this through on Tuesday or by noon on Wednesday there must be something afoot that this Senator does not know about and I think it would be well to lay it out for the RECORD.

Mr. BAKER. Mr. President, I believe the minority leader has asked this question before the remarks of the very distinguished Senator from Nebraska. Let me say there is nothing afoot. There is certainly no agreement on the shape and form of a budget on this side of the aisle. The administration has not submitted a new proposed budget that I am aware of and I am sure I would be aware of it had they done so.

I say to my friend that I am afraid the Budget Committee is just going to have to meet and start over. That is why I said to the minority leader that I think it is going to take a little while. Thursday counted as 1 of the 3 days because the motion to recommit was made on Thursday, but it was at the end of the day on Thursday. So, as a practical matter, there was no real opportunity for the committee to function on that day. Today is another day.

As I pointed out a moment ago, the chairman and others are not here.

So, I think it is going to be necessary, in order to have a thorough examination of this situation in light of present circumstances, to consider at least extending that time a little. I will not put the request now, in fairness to all Senators, because I have not cleared it on our side, let alone make a proposal to the minority leader in advance, as I try always to do.

But let me assure the Senator that there is no deal cut, there is no package put together, and a meeting of the Budget Committee will be for real.

Mr. EXON. Mr. President, I simply add one further statement. The President has just made a speech this morning to a national group that would indicate possibly that the President is not about to make any change in previous positions that he has stated.

I ask a question of the majority leader: Has the majority leader received any indication whatsoever that the President is responding positively or favorably to the suggestion that was made in the national press yesterday by the distinguished chairman of the Finance Committee having to do with the President becoming involved in the budget process at this critical time?

Mr. BAKER. Mr. President, I saw the distinguished chairman of the Finance Committee on one of the TV shows Sunday. I understand how he feels.

There are two sides to that coin. One says the President ought to be more involved in a budget arrangement that the administration will support and the Congress will pass. The other side of that coin is that the President does not have to sign, or indeed has no chance to sign, a budget resolution. It is uniquely and especially a function of the Congress. It is a congressional budget.

So you can argue both ways, one that the President ought to be intimately involved in the formulation of this budget and the other that he should not. I do not try to resolve that issue at this time, but, rather, would reiterate what I said this morning to the press and have said on this floor previously.

I am determined, to the extent that I may do so, to see that the Senate passes a budget. I have urged the chairman of the committee to report a budget. It may be that that budget will displease the President in some respects; maybe in all respects. It may be that when it is finally reported that I will vote for it or against it. I do not know how I will vote as an individual Senator.

But I do know that, as majority leader, I feel an obligation to say to the Senate that we should go forward and pass the budget, but I cannot say that we need to or must have or, indeed, should have the President's further involvement in this matter. Because, at this point, we are going to have to do whatever it is we are going to do in order to pass a resolution. I

A raid in Florida results in the immediate deportation of the Mexican parents of three small children who were born in the United States—are citizens—have lived here all their lives, and are now left alone in their small trailer with no source of food.

A young worker in the Northeast has a job related accident. His employer provides immediate emergency health care. When he learns of the employee's permanent disability, however, he calls the INS and the worker is deported.

A woman in San Diego is sequestered in the house where she works as a domestic employee. She will not be paid her salary because her employer fears she will then leave. She needs to see her children who are in Mexico. She is told not to use the phone or talk to strangers.

A child in Florida has a severe ear infection that requires hospitalization. The parents are terrified of the raids currently taking place in the State. They are afraid that if they are taken, their son will have to remain behind without their protection. Thus they cannot accept the offer of free medical care made to them.

A family in Texas pays $500 saved under hardship to get a useless letter from a lawyer. They believe this document will protect them from deportability. The letter states that these people are the attorney's clients. But when they are apprehended by the INS the lawyer does not take any action in spite of anxious calls from the immigrants.

There are many other human stories—of undocumented aliens working under harsh conditions without the protections of our laws—working "hard and scared"; of families divided, of children denied medical care.

It would be a crime if Congress failed to enact a legalization program to finally deal with this problem—especially when it is enacting new enforcement programs. The two are linked.

But most important, we should not forget the human face of this problem during our debate today.

Mr. President, the legalization provisions in this bill are strict. They are stricter than I think are warranted or justified, and I have addressed that issue earlier in this debate. But I must say they are at least an attempt to reflect a humane and a compassionate policy toward people and their families, and I will have more to say tomorrow in the limited time that we will have.

Mr. SIMPSON. Mr. President, with regard to the amendment offered by the Senator from North Carolina (Mr. HELMS) relating to illegal alien children, that amendment would impose a serious lifetime hardship on a very discrete class of children who are not accountable for their illegal status. These children have no control over their parents' conduct nor over their own undocumented status and we cannot visit the sins of the parents upon the child.

Public education plays a crucial role in maintaining the very fabric of our society and sustains our political and public cultural values.

Depriving illegal alien children of an education would take an incredible toll on the social and economic and intellectual and psychological well-being of the individuals involved and imposes some overwhelming obstacles to individual achievement. By not allowing illegal alien children to receive a free public education would, in effect, create a permanent group of uneducated persons within our society living here.

Passage of the Immigration Reform and Control Act, with its employer sanction provisions and the development of the worker authorization system, will greatly assist in eliminating the problems which give rise to this amendment and the Supreme Court decision last June.

But until employer sanctions have achieved the desired effect and until the legalization provisions deal with the portions of the illegal subclass, I agree with the Supreme Court that the cost to this Nation of not educating all children living within our country will be far greater than the cost of providing a free public education.

I urge my colleagues to reject this amendment at the time of the vote, which will be tomorrow.

AMENDMENT NO. 1268

(Purpose: To modify provisions relating to waiving the two-year foreign residence requirement with respect to certain foreign students)

Mr. DANFORTH. Mr. President, on behalf of myself and Senator MOYNIHAN, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH), for himself and Senator MOYNIHAN, proposes an amendment numbered 1268.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The amendment is as follows:

On page 176, lines 16 and 17, strike out "inserting before the period at the end thereof" and insert in lieu thereof "striking out the period and inserting in lieu thereof".

Beginning on page 176, with line 21, strike out all through line 9 on page 177 and insert in lieu thereof the following:

"(A) in the case of an alien admitted on or before September 30, 1989, under section 101 (a)(15)(F), (i) who is applying for a visa as an immigrant described in section 202 (b)(1) and who has obtained his degree from a college or university in the United States, and who has been offered a position as a faculty member or academic researcher in the field in which he obtained his degree by a United States college or university, or (ii) who has obtained a degree in a natural science, mathematics, computer science, or an engineering field from a college or university in the United States, who is applying for a visa as an immigrant described in section 202 (b) (1) or (2), and who has been offered a research, business, or technical position by a United States employer in the field in which he obtained such degree, or (iii) who has obtained an advanced degree in business or economics from a colleage or university in the United States, who has exceptional ability in business or economics, who is applying for a visa as an immigrant described in section 202(b) (1) or (2), and who has been offered a research, business or technical position by a United States employer which is in the field in which he obtained such degree and which requires such exceptional ability, or".

On page 177, line 21, strike out the quotation marks.

On page 177, between lines 21 and 22, insert the following: "Thirty days after the end of each fiscal year, the Attorney General shall prepare and transmit to the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate a report setting forth the number of aliens who applied for, and the number of aliens who were granted, waivers of the two-year foreign residence requirement pursuant to subclause (A) of the preceding proviso during the preceding fiscal year. The Attorney General and the Secretary of State jointly shall conduct a study on the impact of the waivers made pursuant to subclause (A) of the preceding proviso on the professional or technical labor requirements of foreign countries and jointly shall prepare and transmit-not-later than the close of the fiscal year 1986 to the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate a report setting forth the findings of such study.".

On page 163, line 13, insert after "workers" the following: "(or equally qualified workers in the case of aliens (i) who are members of the teaching profession or who have exceptional ability in the sciences or arts)".

Mr. DANFORTH. Mr. President, under the bill in its present form, foreign students who come to the United States to study at a college or university are required to return to the country of their origin for at least 2 years before they are permitted to return to the United States.

A provision in this bill in section 212 allows the Attorney General to waive the 2-year requirement in certain limited instances. Those limited instances require that the person for whom the waiver is granted must have received a doctor's degree and that the doctor's degree must be in one of the following areas: Natural science, mathematics, computer science, or engineering.

Further, the waiver, which is only offered to those who have received doctor's degrees and only in these lim-

ited fields, can only be granted 1,500 times per year for university hires and 4,500 times per year for those who are hired by business in the private sector.

This amendment will do several things: First of all, it will remove the numerical cap on the number of people for whom waivers could be granted by the Attorney General.

Second, with respect to people who are hired by colleges and universities after they have received their doctor's degree, it will remove the requirement that the degree must have been in one of certain specified disciplines.

Third, the amendment provides that businesses could hire people in these limited fields who have received not only a doctor's degree but also people who received a bachelor's degree.

Fourth, it provides that businesses could also hire people in other fields, namely in business and economics, who have advanced degrees and exceptional ability in those fields in business and economics.

In short, Mr. President, the point of this amendment is to not only remove numerical caps but also broaden the category for those people who are allowed to stay in the United States after they have received an education.

The bill in its present form is understandable, because I think all of us recognize that one of the points of providing an education in the United States for people from abroad is to enrich the countries from which they came. The United States has felt for some time that it has a responsibility for trying to improve economic and social conditions in other parts of the world, and to the extent that we provide education for people from those parts of the world we not only increase the educational experience and the breadth of our own people but we also enrich those areas of the world from which the students come and to which they return. Therefore, the notion of mandating their return and providing very limited waivers and very limited exceptions for keeping them in this country after their education is certainly understandable.

The problem, Mr. President, is this: There is not enough of a relationship between the numbers that appear in the bill and the purpose desired to be achieved by the bill. The numbers probably are as reasonable as any numbers, and may not be far from those necessary. However, they are really a guess at the need.

Second, it is doubtful, to say the least, that to require an individual to return to his country rather than stay in this country will in fact lead that individual to return. A person who acquires skills, say, in engineering or in science or mathematics in the United States may choose, if he is prohibited from being in the United States, to return not to the country of origin but instead to some other developed country and to share his or her experience, education, and talent with that third country.

Finally, Mr. President, it has been well recognized in the United States that we have our own problems. We say over and over again in connection with all kinds of legislation on the floor of the Senate that we are moving into an era of high technology; that we are going to have to have well-trained people in the United States. We hear criticized very frequently, for example, in connection with the budget debate the quality of our own education, whether or not we are producing enough people in the United States who are going to have the scientific, engineering, and mathematical skills to move the United States in the future.

Therefore, if we build into the law very strict definitional and numerical limitations on those who are permitted to stay, then it could be argued that we are acting contrary to our own interests and to our own future. Mr. President, this bill not only broadens the definitions and removes the numerical caps of those who would be able to stay, but the amendment does a couple of other things which deserve comment.

First, it sunsets the waiver authority given to the Attorney General. Under the bill in its present form, there is no sunset; it is permanent. This sunsets the waiver authority beginning in 1989, so that it builds into the bill a practical necessity that we in Congress analyze the policies that we are trying to pursue by attempting to encourage or require people who are educated in this country to return to their country of origin.

Second, it requires the Attorney General to report each year to the Judiciary Committee how many waivers have been sought and how many have been issued in any given year. Even with this amendment, the Attorney General must find it in the public interest to waive the 2-year requirement, which is a grant of discretion to take seriously.

The amendment also, at the end of 3 years, requires the Attorney General and the Secretary of State to conduct a study of the impact of the waiver authority on foreign countries. So, perhaps, with some data and a requirement of the study, we shall be in a better position, a few years down the road, to make policy in this area than I feel we are in now.

Finally, the amendment would keep the current law on labor certification for members of the teaching profession and those who have exceptional ability in the sciences or arts. Keeping this provision in the current law, rather than dropping it out, as is the case in the bill, will assure our academic community that that community is free to recruit the best minds for teaching and research. Clearly, that is what excellence in education requires.

Mr. MOYNIHAN. Mr. President.

The PRESIDING OFFICER. Who yields time to the Senator from New York?

Mr. KENNEDY. Mr. President, I shall be glad to yield on the bill. Does he wish it on the amendment?

Mr. MOYNIHAN. I believe there are 20 minutes provided on the amendment.

Mr. KENNEDY. Whatever time the Senator desires.

Mr. SIMPSON. Mr. President, I yield time on this side.

Mr. MOYNIHAN. Mr. President, I shall be brief. I thank the Senators for allowing the learned Senator from Missouri and me to offer this amendment which they have been so gracious already to declare to be acceptable to them.

The amendment I offer with Senator DANFORTH improves S. 529, the Immigration and Reform Act of 1983, by expanding the authority of the Attorney General to waive the proposed 2-year home residency requirement for foreign students seeking to adjust their immigration status to that of permanent resident.

It is my impression that the Judiciary Committee inserted the 2-year home residency requirement in order to reduce the number of foreign students who sought employment in the United States strictly as a means of adjusting their immigration status thereby enabling them to remain in this country upon graduation. I also understand the committee's desire to ease immigration pressures on the United States by encouraging political and economic development abroad.

I quite agree with the committee's intent and share its concerns. However, I fear that this provision, as presently written, will have a most serious impact on our Nation's scientific research and technological development. The residency requirement may very well deprive American industries and universities of talented individuals who are very much needed if the United States is to maintain its competitive position in the world market at this critical point in history.

For this reason, I have joined with my distinguished colleague from Missouri in suggesting several modifications of the waiver authority granted to the Attorney General. These include, first, removing the numerical cap on waivers; second, deleting the disciplinary requirement for foreign students offered faculty positions; third, requiring the Attorney General to study the effects of the waivers on the brain drain from developing countries; and, fourth, providing a sunset provision to insure that the waiver program receives adequate review before being renewed after 6 years.

percomputer construction, but the Japanese intend to take over the market. Both Hitachi and Fujitsu have announced that they will unveil machines faster than Cray's this year.

"It's a shot across our bow," says Rollwagen, who doubts that the Japanese machines will be as fast as a Cray. "We'll see how big a splash it makes."

Cray Research occupies part of the old Pillsbury Building in downtown Minneapolis. Its renovated interior space includes "pods"—three working offices around a communal sitting area, with sliding glass doors and soft earth colors. Rollwagen shares his pod with the company's chief financial officer and legal counsel. He works at a stand-up desk. On the walls hang an abacus and photographs of the mountains Rollwagen has skied. The titles on his bookshelf include *Design and Behavior, The Soul of a New Machine* and former CIA director William Colby's *Honorable Men.*

Rollwagen still remembers hearing the bleep emanating from Sputnik broadcast over the radio in 1957. "That sound got me into electrical engineering." He has an easeful authority suited to the sparkly, still-youthful computer industry.

He has codified something he calls "the Cray style." a statement of corporate identity that reflects the individualism of the company's founder. For instance:

At Cray Research, we take what we do very seriously, but don't take ourselves very seriously.

"I want to keep this an open, creative environment where unusual things happen," says Rollwagen. "We don't have a security system—the need-to-know system is terrible. The best stuff is so simple that you can't keep it down, anyway. It's much better to be off-the-wall, where everybody knows everything."

People also have fun at Cray Research. There is laughing in the halls as well as serious discussion.

"If Hitachi wants to know our stuff," Rollwagen says, laughing, "they can come and get it . . . That would put them three years behind us."

Cray people feel that they are on the winning side. They feel successful, and they are.

"There's a lot of responsibility. You have to have guts to work here. There's no support system, no place to hide. We have to forget what we did before and start over again. That's scary for some people."

The Cray approach is informal and nonbureaucratic . . . "Call—don't write" is the watchword.

"We think the best work isn't done with big teams and lots of money, but with small, adventuresome groups and a limited amount of capital," says Rollwagen. "The environment works."

In Chippewa Falls, 100 miles east of Minneapolis, the company built Seymour Cray's research facility, called Riverside. Located across town from the company's main industrial plant, it is the official off-the-wall entity, Seymour Cray's decision to cool his latest creation, the Cray-2, in an inert liquid fluorocarbon was considered radical by his competitors. Equally radical is Cray's decision to develop his own microchip out of something called gallium arsenide, and escaping dependency on Japanese chip suppliers.

Cray Research is the second largest employer in Chippewa Falls (first place goes to an automated shoe factory), a town of 17,000 where ice-fishing and wind-surfing are considered more important than high-speed circuitry. In one of three prefabricated industrial buildings east of town, women in blue coats use microscopes to solder some of the 6 million connections that go into one Cray computer. Each machine made by Cray contains about 70 miles of wiring and takes about 12 weeks to build and 18 weeks to check out. The company sells about one a month.

The company is essentially developing two separate lines of compatible computers. Its engineers stay a few billionths of a second ahead of the competition. Here an engineer from Taiwan named Steve Shyh-Shing Chen designed the Cray X-MP, the first computer developed at Cray Research without the help of Seymour Cray himself. The X-MP is three to five times faster than the Cray-1 and uses many of the same components, including Freon circulated in metal tubes, as in a refrigerator, to keep the machine from burning up during operation.

Chen may eventually replace Cray as the company's preeminent computer designer. "Our next machine," he says, in an office piled with papers, the products of his research, "will be as fast as a Cray-2, but with different architectural features." He hopes it will be faster than a Cray-2, using less radical components. For instance, he will continue to use silicon chips, and Freon, instead of bathing his creations in fluorocarbon.

"The important thing for us as a company," Rollwagen says, "and as a natural resource for the country, is to eventually develop supercomputers without Seymour. We have to show we can do it."

How does a small American corporation stay ahead of its domestic and foreign competition, in the gathering tempest of supercomputer technology?

A colleague of Cray's tells an illustrative story about Cray when he worked for Control Data. The engineers were required to produce book-length reports of their projects, but Cray's report consisted of only one single page. Under the heading, *Marketing Strategy,* he had written, "Proceed with confidence."

ARMS CONTROL HAS NOT WEAKENED OR DISTORTED AMERICA'S DEFENSE EFFORTS

Mr. PROXMIRE. Mr. President, in the past couple of days, in speaking about half-truths about our nuclear weapons, I have pointed out some of the fallacies in common beliefs about arms control. First, that "efforts to constrain technology by means of political instruments, such as arms control agreements, are doomed to failure." I cited arms control agreements that did successfully constrain technology. Second, I dealt with the half-truth about arms control that it requires trusting the Russians, and pointed out again by referring to arms control agreements in effect that arms control actually reduces the necessity that we trust the Russians.

Today, let us discuss a third complaint against arms control as seen by the Harvard Study Group in their book "Living With Nuclear Weapons." It is this: "That arms control weakens and distorts American defense efforts." This contention is based on the notion that arms control wins support from groups in our democracy that oppose nuclear arms, that arms control organizes and focuses their power, and that it enfeebles the public support for defense spending. These critics of arms control argue that the Strategic Arms Limitation Talks in the 1970's prevented this country from responding to the big and rapid Soviet nuclear buildup. As the Harvard Study Group contends, it was not the support for SALT that was responsible for the reactions against the big defense budgets in the 1970's; it was the reaction from Vietnam and domestic social changes that began before the 1970's and was much deeper and more powerful than the reaction to SALT or any arms control agreement.

And I would add that the resistance to the arms buildup in the eighties comes from the widespread public perception that both the Soviet Union and the United States have built such massive nuclear arsenals that each could destroy the other many times over, and that therefore any further buildup would be just plain more than we could ever use. In addition, the public has become critical of the heavy emphasis by this administration on huge military spending increases at the very time it is proposing both sharp cuts in domestic spending and a massive tax reduction. The public sees that this leaves overhanging deficits far bigger then they have ever been in our history. Poll after poll shows heavy majority support in this democracy for reducing the rate of increase in military spending called for by the President. But arms control is not advanced as a means of saving money, although I am convinced it has saved money in the past and will in the future. It is advanced as a means of preventing these hair-trigger mammoth explosive arsenals from exploding in nuclear war.

FINANCIAL HOLDINGS AND INCOME TAX RETURN OF SENATOR WILLIAM PROXMIRE

Mr. PROXMIRE. Mr. President, in 1963, 1965, 1967, and 1970, and yearly since 1972, I have submitted for the RECORD a history of my financial holdings from the time I was first elected to the Senate in 1957 until April 1982. In order to bring the full record up-to-date, I submit herewith the history of my financial holdings since April 1982.

My assets include ownership of a home in Madison, Wis., on which I owe a mortgage to the former owners; ownership of my home and furnishings in Washington, D.C., on which I owe a mortgage to the Perpetual American Federal Savings of Washington, D.C.; ownership of a 1980 automobile; ownership of two checking accounts in Washington, D.C., banks,

one checking account in a Madison, Wis., bank and one savings account in a Madison, Wis., bank. I hold State and municpal bonds totaling $45,000.

I estimate my net worth to be about $519,000.

To the best of my knowledge, this is an accurate record of my financial holdings and obligations.

I herewith submit a balance sheet showing my net worth and how it was arrived at and a copy of my 1982 Federal income tax return.

I paid $32,794 to the Federal Government in taxes on my 1982 income. In addition, I paid $8,631 to the State of Wisconsin on 1982 income.

I ask unanimous consent that the balance sheet and copy of my 1982 Federal tax return be printed in the RECORD.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

Net worth of Senator William Proxmire as of May 13, 1983

Municipal and state bonds.	$45,000.00
Three checking and one savings account:	
Washington NS&T checking	475.42
Washington Riggs checking	2,239,53
Madison, WI checking	1,661.52
Madison, WI savings	80,708.81
Potential capital gains tax liability for sale of property in 1983	−22,000.00
1980 Buick Regal (blue book retail value)	5,975.00
3097 Ordway Street NW., Washington, D.C.:	
Assessed value	357,205.00
Mortgage value	−56,245.00
Furnishings	15,000.00
118 Bradford Lane, Madison, Wis:	
Assessed value	46,100.00
Mortgage value	76,312.85
Total	519,216.43

1040 U.S. INDIVIDUAL INCOME TAX RETURN 1982

William and Ellen H. Proxmire, 118 Bradford Lane, Madison Wis.

My social security number is 117-12-9969; spouse's social security no. 395-26-3362.

My occupation: U.S. Senator; spouse's occupation: Coordinator.

PRESIDENTIAL ELECTION CAMPAIGN

Do you want $1 to go to this fund? Yes.

If joint return, does you spouse want $1 to go to this fund? No.

FILING STATUS

Married filing joint return (even if only one had income).

EXEMPTIONS—4

Myself, 65 or over, spouse.

First names of my dependent children who lived with me: Douglas.

INCOME

7. Wages, salaries, tips, etc., $94,791.

8. Interest income (attach Schedule B if over $400 or you have any All-Savers interest), $8,055.

9A. Dividends (attach Schedule B if over $400), $382.

10. Refunds of State and local income taxes (do not enter an amount unless you deducted those taxes in an earlier year—see page 9 of Instructions), $3,853.

12. Business income (loss) or (attach Schedule C), $22,578.

13. Capital gain or (loss) (attach Schedule D), −$3,000.

17a. Other pensions and annuities. Total received, $1,977.

18. Rents, royalties, partnerships estates, trusts, etc. (attach Schedule E), −$3,089.

22. Total income. Add amounts in column for lines 7 through 21, $123,570.

ADJUSTMENTS TO INCOME

24. Employee business expenses (attach Form 2106), $5,763.

25. Payments to an IRA. You must enter code from page 11 (1), $2,000.

29. Deduction for a married couple when both work (attach Schedule W), $1,343

31. Total adjustments, $9,106.

ADJUSTED GROSS INCOME

32. Adjusted gross income. Subtract line 31 from line 22. If this line is less than $10,000, see "Earned Income Credit" (line 62) on page 15 of Instructions. If your want IRS to figure your tax, see page 3 of Instructions, $114,464.

TAX COMPUTATION

33. Amount from line 32 (adjusted gross income), $114,464.

34a. If you itemize, complete Schedule A (Form 1040) and enter the amount from Schedule A, line 30, $23,797.

35. Subtract line 34a or 34b, whichever applies, from line 33, $90,667.

36. Multiply $1,000 by the total number of exemptions claimed on Form 1040, line 6e, $4,000.

37. Taxable Income. Subtract line 36 from line 35, $86,667.

38. Tax. Enter tax here and check if from Tax Rate Schedule X, Y, or Z, $30,783.

40. Total. Add lines 38 and 39, $30,783.

CREDITS

44. Partial credit for political contributions, $100.

49. Total credits. Add lines 41 through 48, $100.

50. Balance. Subtract line 49 from line 40 and enter difference (but not less than zero), $30,683.

OTHER TAXES

51. Self-employment tax (attach Schedule SE), $2,111.

59. Total tax. Add lines 50 through 58, $32,794.

PAYMENTS

60. Total Federal income tax withheld, $30,556.

61. 1982 estimated tax payments and amount applied from 1981 return, $9,180.

67. Total. Add lines 60 through 66, $39,736.

REFUND OR AMOUNT YOU OWE

68. If line 67 is larger than line 59, enter amount overpaid, $6,942.

69. Amount of line 68 to be refunded to you, $1,642.

70. Amount of line 68 to be applied to your 1983 estimated tax, $5,300.

PAID PREPARER'S USE ONLY

Firm's name (or yours, if self-employed) and address: Naron & Wagner, Chartered, 2120 L. Street N.W., Suite 220, Washington, D.C. 20037. Preparer's social security no.: 213-34-2368; E.I. No.: 52-0898831.

SCHEDULE A—ITEMIZED DEDUCTIONS

Medical and dental expenses

4. Total insurance premiums you paid for medical and dental care, $407.

6. Add lines 3 through 5c, $407.

7. Multiply amount on Form 1040, line 33, by 3% (.03), $3,434.

8. Subtract line 7 from line 6. If line 7 is more than line 6, write zero, 0.

9. Write one-half of amount on line 4, but not more than $150, $150.

10. Compare amounts on line 8 and line 9, and write the larger amount here, $150.

Taxes

11. State and local income, $12,300.

12. Real estate, $4,368.

13a. General sales (see sales tax tables), $568.

15. Add lines 11 through 14. Write your answer here, $17,236.

Interest expense

16a. Home mortgage interest paid to financial institutions, $4,754.

17. Credit cards and charge accounts, $1,506.

19. Add lines 16a through 18. Write your answer here, $6,260.

Contributions

20a. Cash contributions. (If you gave $3,000 or more to any one organization, report those contributions on line 20b.), $1,371.

23. Add lines 20a through 22. Write your answer here, $1,371.

Casualty and theft losses and miscellaneous deductions

25b. Tax return preparation fee, $950.

26. Other: Prof. license $25; bus. publications, $80; see attached, $1,125, $1,230.

27. Add lines 24 through 26. Write your answer here, $2,180.

Summary of itemized deductions

28. Add lines 10, 15, 19, 23, and 27, $27,197.

29. If you checked Form 1040, Filing Status box 2 or 5, write $3,400, $3,400.

30. Subtract line 29 from line 28. Write your answer here and on Form 1040, line 34a. (If line 29 is more than line 28, see the Instructions for line 30 on page 20.), $23,797.

SCHEDULE B—INTEREST AND DIVIDEND INCOME

Part I.—Interest income

Interest income other than interest from All-Savers Certificates

2. Other interest income (list name of payer) Lowy note, $582; O'Brien, $6,326; United Bank & Tr., $523; Chevy Chase S&L, $255; D.C. Natl. Bk., $369.

3. Add lines 1 and 2, $8,055.

Interest from All-Savers Certificates (ASCs) (See page 21)

8. Add lines 3 and 7. Write your answer here and on Form 1040, line 8, $8,055.

Part II.—Dividend income

9. Name of payer: Govt. Investors, $382.

10. Add amounts on line 9, $382.

15. Subtract line 14 from line 10. Write your answer here and on Form 1040, line 9a, $382.

Part III.—Foreign accounts and foreign trusts

16. At any time during the tax year, did you have interest in or a signature or other authority over a bank account, securities account, or other financial account in a foreign country? No.

17. Were you the grantor of, or transferor to, a foreign trust which existed during the current tax year, whether or not you have any beneficial interest in it? If "Yes," you may have to file Forms 3520, 3520-A, or 926: No.

WASHINGTON, D.C., *May 9, 1983.*

Hon. ALAN K. SIMPSON,
U.S. Senate, Senate Dirksen Office Building, Washington, D.C.

DEAR SENATOR SIMPSON: We wish to use this opportunity to express our concern about Sec. 114 of S. 529 which would require the Attorney General to impose fees on aliens entering the U.S.

A recent survey by the "Official Airline Guide" has revealed that of 127 countries throughout the world only Venezuela imposes an "immigration fee." It is true that departure fees are common world-wide and the U.S. as an example also has a departure fee.

In so far as the U.S. receives its 3rd largest share of export earnings from international visitors and the U.S. Congress in passing the National Tourism Policy Act established a policy to . . . "encourage the free and welcome entry of individuals traveling to the U.S. . . ." (Sec. 101(b)(4)) Public Law 97-63, we do not believe it in the national interest to charge a fee for this type of alien visitor who in essence is responsible for creating 289,000 jobs in the U.S.

In reviewing Committee Report (98-62) the Congressional Budget Office estimates that the cost to INS of increasing border patrols (the only reference to costs recoverable under Sec. 114) will be approximately $85 million in 1984 and $70-80 million annually thereafter. The report further goes on to note that "based on information provided INS," CBO estimates (that the cost of processing aliens) will cost INS $40 million a year. CBO further suggests that "the INS would be able to recover this cost by imposing a fee of 20 cents per entry in 1983, with small upward adjustments in subsequent years to reflect inflation. This fee would be classified as a revenue to the government. In reviewing this proposal we infer:

(1) The majority of the increase in costs to INS are attributable to supplemental border patrols and enforcement activities;

(2) These costs are largely unrelated to the processing of short term business and pleasure travelers to the United States;

(3) These costs will thus be recovered, to an undefinable degree, from "users" who neither generate these costs nor benefit from the facilities and "services" provided.

It is our view that a fee imposed on "international visitors" is discriminatory. Presently, the airlines indirectly bear the costs of inspection facilities, and the cost to briefly examine passports and visas, a government cost, is minimal.

We urge that you clarify, on the floor, the intent of Sec. 114 so as not to include "international visitors."

Sincerely,

JAMES E. GAFFIGAN,
Executive Director.

MEMORANDUM

USER FEE PROPOSAL CONTAINED IN S. 529, THE IMMIGRATION, REFORM AND CONTROL ACT OF 1983

Section 114 of S. 529 (see Appendix I) would amend the Immigration and Nationality Act by adding a section entitled "Nonimmigrant Visa Fees and Border Facility Fees." Subsection (b) requires that "The Attorney General, after consultation with the Secretary of State shall impose fees for an alien's use of border facilities in an amount necessary to make the total of such fees substantially equal to the cost of maintaining and operating such facilities and services."

Included in the Committee Report (No. 98-62) is the Congressional Budget Office (CBO) Cost Estimate (Appendix II) which is germane to the fee issue. CBO estimates that the cost to INS of increasing border patrols (the only reference to costs recoverable under this section) will be approximately $85 million in 1984, and $70-80 million annually thereafter. The CBO report further finds that "Based on information provided by INS" CBO estimates (that the cost of processing aliens) will cost INS $40 million a year. CBO further suggests that "INS would be able to recover this cost by imposing a fee of $0.20 per entry in 1983, with small upward adjustments in subsequent years to reflect inflation. This fee would be classified as a revenue to the Government."

From this information the following can be inferred:

(1) The majority of the increase in costs to INS are attributable to supplemental border patrols and enforcement activities;

(2) These costs are largely unrelated to the processing of short-term business and pleasure travelers to the United States;

(3) These costs will thus be recoverd, to an undefinable degree, from "users" who neither generate these costs nor benefit from the facilities and "services" provided.

It is important to recognize that the legislative language expressly makes allowance for the subsidization of particular users by others, i.e. ". . . shall impose fees . . . in an amount necessary to make the total of such fees substantially equal to the cost of maintaining and operating such facilities and services." However, a fee structure which in design allows an arbitrary assignment of cost and benefit has been attempted in the past and subsequently addressed in the Courts.

Congress made its initial declaration of intent in the Independent Offices Appropriation Act of 1952. Title V provides that:

". . . Government activities resulting in special benefits or privileges for individuals or organizations be financially self-sustaining to the maximum possible extent"; and

". . . Regulations prescribing fees be as nearly uniform as practicable"; and

". . . Fees be fair and equitable, taking into consideration direct and indirect costs to the Government, value to the recipient, public policy or interest served and pertinent facts."

In 1959, a Bureau of the Budget Circular was issued, which attempted to interpret the 1954 Act for the agencies, and advise them with respect to its implementation.

"Where a service (or privilege) provides special benefits to an identifiable recipient above and beyond those which accrue to the public at large, a charge should be imposed to recover the full cost to the Federal Government of rendering the service. For example, a special benefit will be considered to accrue and a charge should be imposed when a Government-rendered service:

(a) Enables the beneficiary to obtain more immediate or substantial gains or values (which may or may not be measurable in monetary terms) than those which accrue to the general public (e.g., receiving a patent, crop insurance, or a license to carry on a specific business); or

(b) Provides business stability or assures public confidence in the business activity of the beneficiary (e.g., certificates of necessity and convenience for airline routes, or safety inspections of craft);

(c) Is performed at the request of the recipient and is above and beyond the service regularly received by other members of the same industry or groups, or of the general public (e.g., receiving a passport, visa, airman's certificate, or an inspection after regular duty hours)."

The FCC established a fee schedule in 1964 which imposed a nominal "filing fee." The revenues raised covered approximately 25 percent of the agency's budget. In 1970, in response to the encouragement of both Congress and the Executive Branch, the FCC raised the fees to recover its full costs of operation. A group of cable operators challenged the fee structure and the Supreme Court held in 1975 that the assessment per subscriber was a tax, rather than a fee, since it was not related to a special benefit conferred by the FCC (NCTA v. U.S.). In a related case decided simultaneously (FCC v. New England Power Co.), the Court held that ". . . no charge should be made for services rendered when the identification of the ultimate beneficiary is obscure and the service can be primarily considered as benefiting broadly the general public." These represent the only Supreme Court rulings on these issues.

In 1975, the FCC issued a new fee schedule which it perceived to be consistent with the Court's ruling. Again the structure was challenged, and the Court of Appeals held that the new fee structure did not meet the Supreme Court's criteria. The FCC was ordered to develop a new fee schedule as well as clarify the basis for their assessment. The agency interpreted the Court rulings as requiring an assessment of fees based, to some degree, on the value conferred on the user. The FCC ultimately decided that it could not quantify the benefit or value being conferred upon the user, and suspended the collection of all fees in 1977. Though a committee was appointed to determine the most equitable method of refunding the previously collected fees, none have yet been refunded.

Also in 1977, the GAO issued a report which took exception with the FCC's interpretation of the rulings. "GAO does not believe that the Court of Appeals required the Commission to measure separately the value conferred upon the people paying the fee. Instead, based upon interpretation of the court decisions, the Commission can establish a proper fee schedule based solely upon cost." Nonetheless, neither GAO nor Congress have offered any further assistance in calculating an equitable fee schedule based upon cost.

For purposes of this legislation three basic questions arise:

(1) if fees must reflect "direct and indirect costs to the Government" (according to the 1954 Act), what part of INS' costs are "fairly and equitably" allocable to the international traveler? Which of these costs are not already being paid by transportation modes in the form of "facilities use fees"? Is border patrol and enforcement activity an appropriate cost to be subsidized by the international traveler?

(2) what part or aspect of the operation of such facilities can be considered a "value or benefit" which is conferred upon the traveler? INS inspections are distinct from, for example, Department of Agriculture meat grading and inspection services as INS inspections in no way provide "business stability or assure public confidence in the business activity of the beneficiary." Further, INS inspections are not performed "at the request of the beneficiary" nor do they "enable the beneficiary to obtain more immediate or substantial gains or values." Presumably, the ratio of charges should be set

equal to the ratios of marginal benefits and the absolute level set to recover full cost. In this case, however, it seems clear that all benefit is recouped by citizens of the United States who are expressly exempted from charge by the language of the bill.

(3) what public policy or interest is served by the imposition of such fees on the traveler? The proposed fees are clearly antithetical to public policy concerns.

IMPLEMENTATION PROBLEMS

There is a multitude of negative implications with respect to the implementation of Sec. 114 of the bill. For example, the proposed fee is discriminatory inasmuch as it would be imposed upon aliens only. A recent survey of 127 countries revealed that only Venezuela imposes an "immigration fee." All other head taxes, departure taxes, etc. are paid by both aliens and nationals. The discriminatory aspect of this fee proposal violates a number of international agreements and many airline bilateral agreements would have to be modified or renegotiated. In addition, this legislation would obviously encourage other countries to initiate the same practice with an attendant risk of abuse.

There are a number of practical considerations as well. For example, how would the fee be collected? Collection at inspection is also problematic. Visitors without U.S. currency would have no choice but to interrupt the inspection, locate a currency exchange desk, and return to the inspection. Collection at this point is also inconsistent with the ASIST pre-clearance procedure. An integral aspect of ASIST clearance is the frequent performance of Customs inspections by INS inspectors, as well as the performance of INS inspections by Customs inspectors. As the legislation requires the imposition of INS fees only, some passengers may be charged while others are not. Alternatively, ASIST could be modified, but presumably only in such a way as to defeat the purpose of the procedure. At airports where ASIST has not yet been implemented, collection of the fee at inspection would of course exacerbate existing delays and long lines.

Similar problems would occur with all transportation modes; as well as with border crossings by foot. At Canadian points-of-entry, where visas are not required, inspectors would encounter the additional difficulty of distinguishing between aliens and citizens. An alien who merely claims to be a U.S. citizen would be likely to successfully avoid paying the fee. It is also possible that an alien might simply refuse to pay the fee, presenting the U.S. with the option of either foregoing the fee or instituting deportation proceedings.

Also disturbing is the inequity made apparent by CBO's observation that the additional monies will be primarily used to fund border patrols and enforcement activities.

Finally, as public policy the fee proposal is inconsistent with our national economic interests. Twenty-three million international visitors spent $12.2 billion in the U.S. in 1981 generating $1.1 billion in federal, state and local tax revenue and supporting approximately 300,000 jobs. At a time when our international competitive position is deteriorating and the U.S. is seeking ways to prevent further erosion, travel and tourism is our third largest source of export income. It is clear from our perspective that whatever revenues are raised must be viewed as inconsequential relative to the harassment and inconvenience that will inevitably be imposed upon international travelers.

JONES, JONES, BELL,
CLOSE & BROWN, CHARTERED,
Washington, D.C., May 6, 1983.

Hon. ALAN K. SIMPSON,
Chairman, Subcommittee on Immigration and Refugee Policy, Senate Committee on the Judiciary, Washington, D.C.

DEAR CHAIRMAN SIMPSON: In follow-up to our telephone conversation, I am writing to elaborate on the concerns of the motorcoach tour industry with respect to the entry fees proposed in Section 114 of S. 529, the Immigration Reform and Control Act of 1983.

The imposition of user fees on aliens crossing our Mexican and Canadian borders by tour bus would be a significant burden to the tour bus industry and its clientele. The fees would not be cost-effective. They would adversely affect the United States tourism industry, economy, our balance of payments deficits, and our perception throughout the world as a country that welcomes the exchange of visitors and ideas through international tourism.

I offer this conclusion for the following reasons:

1. Section 114 violates the specific statutory mandate of the National Tourism Policy Act of 1981 (P.L. 97-63). Under Section 101(b)(4), the Act establishes a national tourism policy to "encourage the free and welcome entry of individuals traveling to the United States in order to enhance international understanding and goodwill."

2. The fee contradicts general foreign policy goals of encouraging foreign travel to the United States and certainly contradicts the general goal and objective of attempting to reduce our burgeoning balance of payments deficit. In 1981, over 33.6 million Canadians crossed our borders into the United States. Almost 1.3 million of them came by bus. In 1980, the average visitor spent $1,700 while in the United States. Any federal user fee on aliens that would curtail the flow of foreign visitors to the United States would be counter-productive to our economy. Furthermore, since one new job is generated for every $37,750 spent on travel and tourism, any loss of travel and tourism dollars from Mexican and Canadian tourists would adversely affect jobs in the United States.

3. In the tour bus context, any entry fee initiatives from the American government would invite an almost certain retaliatory "entry fee" burden by the nations of Canada and Mexico. Therefore, it is a real and substantial threat to our domestic tour bus industry. For the most part, the tour bus industry caters to middle, fixed-income travelers who would be discouraged from the tour package plan by any additional, $5 to $25 entry fees. Canada, for example, was the destination of about 39.8 million United States citizens in 1981. Of these visitors to Canada, almost 1.5 million traveled to Canada by bus. The imposition of retaliatory border fees on Americans by foreign governments may mean that many of our own citizens, including a large percentage of senior citizens, may forgo a trip.

4. The fees would be either too onerous and discourage travel, or they would be too small to justify the administrative hassle entailed in collecting them and enforcing the program. The tour bus industry is very distressed at the prospect that once the fee door is opened, the characteristic bureaucratic enthusiasms about funding all agency expenses from this new revenue source will occur. All the statutory language in the world cannot prevent an enterprising administrator from loading a lot of agency costs on the points of entry to offset other general budget expenditures.

5. Implementation of the alien "user fee" poses substantial administrative dilemmas related to the method of collecting the fee. If a percentage of the fee is to be collected in advance as part of a travel package, what is the administrative machine that pursues collection? Individual payment at the time of entry conjures another major irritant for the foreign visitor attempting to cross into the United States. Will a foreign tourist who claims US citizenship be excused from the entry fee? What would happen to an alien who refuses to pay the fee? Would he be deported? We have enough practical barriers already at our border points. Inevitably, the proposed entry fee would aggravate the already long delays in airline passenger entry into our country, as well. Enclosed are the foreign visitor statistics of just one country, Canada. The practical problems associated with collecting the entry fee from 33 million Canadian visitors to the United States is awesome. This problem will only be multiplied when all the foreign visitors from Europe, Japan, and other areas of the world are included.

6. The proposed user fee is blatently discriminatory. It is imposed only on aliens. A recent study of 127 countries disclosed that only Venezuela imposes an "immigration fee." All other departure taxes, head taxes, etc., are paid by both aliens and nationals.

7. There is an inherent inegality in asking a foreign visitor from Canada or Mexico to subsidize United States border administration and enforcement costs that are totally unrelated to processing a Canadian or Mexican business or tourist visitor. The question of why should they pay for border patrols, guard dogs, shotguns, vehicles, and search lights that have nothing to do with their coming and going from the country can legitimately be raised. The processing of aliens crossing our borders is conducted to enforce our immigration laws and protect our national interests. The proposed fee is largely unrelated to the administrative costs of processing short-term leisure or business visitors.

The above comments represent a partial summary of the serious questions and problems engendered by Section 114.

I appreciate your consideration of these concerns. If I can be of any help or assistance with this issue, please let me know.

I remain,

Sincerely,

JAMES D. SANTINI,
Attorney at Law.

Our majority leader, Senator HOWARD BAKER, wrote an article for yesterday's Washington Post on our efforts to pass a budget resolution. While I do not necessarily agree with every aspect of his argument, I join him in the commitment to the budget process and the need to pass a budget resolution for fiscal year 1984. I ask unanimous consent that Senator BAKER's article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WE WILL PASS A BUDGET RESOLUTION

(By Howard H. Baker, Jr.)

Winston Churchill would have felt right at home in the Senate last week. It was Churchill who told the House of Commons: "Democracy is the worst form of government except all those other forms . . ."

There is no better summation of the congressional budget process we've been going through. Months of work and weeks of intensive negotiation have so far failed to produce a budget resolution for the fiscal year beginning Oct. 1

Everyone agrees we have to restrain the growth of federal spending.

Everyone agrees that the budget deficits we're contemplating are too high.

And everybody knows that some new revenue measures may well be necessary to keep those deficits from swamping the private credit market.

Yet all these agreements have failed to yield a congressional budget resolution. As things stood Thursday night, there are enough votes to kill every budget proposal put forward, but not enough to pass any of them.

Still, true to Churchill's maxim, if there had been no budget process, the situation would be worse.

Equating a simple budget resolution with democracy itself may seem a bit dramatic, but the congressional budget process lies at the heart of modern and coherent democracy. What we spend determines how we govern, and nowhere is that fact in sharper focus than when all the problems of government descend on one set of people in one room at one time during budget resolution season.

Everybody wants to decide what the budget will be; but nobody wants to serve on the Budget Committee.

Every senator and congressman wants the most money he can get for his favorite federal programs, but nobody wants a tax increase or a large federal deficit.

Each legislator must serve both the special interests of his constituents and the central interests of the nation, but doing both at the same time is a little like trying to rob your own bank.

The remarkable thing is, until 1984, nobody in Congress bothered to count the money.

In what Budget Committee chairman Pete Domenici calls the "ancient times," congressional budget decisions were made wholly independent of each other. Every authorization, every appropriation was decided on its own merits, without regard for how each decision would affect other spending priorities, revenue requirements or deficit projections. Congress had, in effect, abdicated all fiscal responsibility. It was left to the president to check the excesses of the legislative branch through vetoes and, more controversially, through the impoundment of appropriated funds.

Richard Nixon, who preferred impounding to vetoing, called our old system "hoary." Some members of Congress felt vaguely insulted. But we changed the system nevertheless.

With the Congressional Budget and Impoundment Control Act of 1974, Congress resolved to reconcile government spending with government income in the same way any American family must manage its household budget. We resolved to set specific deadlines for considering legislation to spend public money, and all authorization and appropriation recommendations were to be made before the budget resolution process really began.

We've never really tried it that way, and before we start reforming the budget process we might consider following the rules we established in the first place. But after nine years of missed deadlines and mounting deficits, I doubt that we will.

We may have changed the process too much already. In 1981, a strategy hatched on Capitol Hill and enthusiastically embraced by the Reagan administration used the congressional budget process to move the federal leviathan a few degrees away from the free-spending course of previous years. Some feathers were ruffled, but we simply could not have slowed the growth of federal spending, as we began to do two years ago, if the congressional budget process had not existed. A piecemeal, program-by-program approach would never have succeeded, and federal spending might still be increasing by 17 percent a year—instead of half that rate.

It may be that not enough was attempted while the political mandate for spending reform was at its peak. It may be that, if this popular passion for restraint fades away, we in Congress will be left with a tortuous and monotonous budget process that absorbs virtually all our legislative energy and accomplishes virtually nothing.

But it is more likely, in my view, that in some of the reform measures now being proposed lies the salvation of the budget process. Among the many proposals I have heard are two-year budgets, reconstituted budget committees as "joint ventures" of the Appropriations and Finance committees, some combination of authorization and appropriation functions, binding spending targets, more flexible management of budgeted funds and the return of "off-budget" expenses to the regular federal balance sheet.

Without endorsing any one of these recommendations specifically, I believe their sheer number and scope—and there are many others like them—suggest that the time for significant and constructive reform is at hand.

After nine years of practical experience with the congressional budget process, this kind of performance review is a healthy and necessary thing. As Will Rogers said, "even if you're on the right track, you'll get run over if you just sit there."

But it is just as essential that we preserve the process we have begun, that we make this conscious and painful effort to relate spending to taxing, that we try to measure the impact of our actions on the economy at large, that we never again dare be haphazard with the American people's money.

I have watched Pete Domenici on the floor, and I marvel at his skill and dedication to the process. In one way or the other, the Senate needs to do better by him than we are.

I continue to believe that the most important reform Congress can make is more basic than the procedural and technical. We should stop acting like a collection of elected bureaucrats—scrutinizing every federal activity to the last detail, even writing a thousand-page budget bill as we did two years ago. We should start acting like the national board of directors the Constitution intended us to be.

I will reserve my sermon on the "citizen legislature" for another Sunday, but I will do my best to keep it—and an improved congressional budget process—on the agenda for reforming this awfully good system of government.

In the meantime, rest assured that for my part I am determined to do the best job we can with the tools we have at hand. I predict that some way or the other we will pass a budget resolution this year.

A TRIBUTE TO FRANK JOHNSTONE JERVEY

Mr. THURMOND. Mr. President, I rise today to pay tribute to a great American and a good friend, Mr. Frank Johnstone Jervey, who passed away recently at the age of 89. To his lovely wife, Anne; his daughter, Mary Jervey Kilby; and other members of his family, with whom I attended Frank's funeral last week at Arlington National Cemetery, I extend my deepest sympathies.

Frank Johnstone Jervey, who died May 6, 1983 at the age of 89, was known as Mr. Clemson, but his influence was not limited to his alma mater, Clemson University. From 1914, when he graduated from Clemson with degrees in mechanical and electrical engineering, until his death, he distinguished himself as a soldier, engineer, world renowned munitions expert, benefactor, confidant to all and ambassador of goodwill for Clemson University.

He served in the Army during World War I and was severely wounded near Chateau Thierry in France. He lost a leg below the knee and received the Distinguished Service Cross and the Italian Marito de Guerro for heroism.

He worked briefly at the Charleston Naval Shipyard and for Winchester Repeating Arms Co., then joined the Ordnance Corps of the Department of Defense in 1924 in a civilian capacity after 1 year of graduate work at George Washington University. He retired in 1953 after an illustrious 31-year career, rising from assistant ordnance engineer to chief engineer.

He became one of the world's foremost authorities on incendiary and small arms ammunition. As a result of this, he served on many high level committees established during World War II. He helped establish small arms ammunition centers, reactivated ordnance ammunition plants and aided in the creation of new ammunition plants during the Korean war.

During World War II, Secretary of War Henry Stimson presented Captain

Jervey with the Nation's highest civilian honor, the Exceptional Civilian Award, for his contribution to America's war efforts.

His dedication and technical know-how proved invaluable to ammunition production during World War II and the Korean war. After his retirement, he became a consultant for the Department of Defense, the Air Force Armament Center, the Copperweld Steel Co., and the Federal Cartridge Co. In 1977, he was inducted into the U.S. Army Ordnance Hall of Fame.

He returned to Clemson in 1953 and received an honorary doctor of science degree and later became vice president for development. During the 5 years of his administration as vice president, the Clemson alumni program won national honors for sustained performance on three separate occasions, and the Clemson News Bureau received six national awards for writing excellence, visual interpretation, and special publications.

During this time, he was directly responsible in obtaining for Clemson from the Olin Foundation two grants for constructing and equipping Olin Hall of Ceramics and Earle Hall of Chemical Engineering, representing investments in excess of $2 million.

Captain Jervey served as a life trustee of Clemson, was president pro tempore of the board of trustees, a past national president of the Clemson Alumni Association, as well as a director of the association, and a director of IPTAY, Clemson's athletic scholarship organization.

The Summerville native was an honorary life trustee of the Clemson University Foundation and was inducted into the Clemson Athletic Hall of Fame in 1976. The Frank Johnstone Jervey Athletic Center was named in his honor, the first time a building at Clemson had been named for a person during his lifetime.

In the Clemson community, he was a leader in the development of the Clemson Chamber of Commerce and is a former national councilman and a delegate to the national conference. He has served on numerous local improvement committees, was a vestryman in the Holy Trinity Episcopal Church and a delegate to the Episcopal Diocese of Upper South Carolina. He was also a member of the Board of Trustees at Voorhees College and Porter Gaud School.

He was the first person to receive all three of the highest honors bestowed by Clemson University—an honorary doctor of science degree (1953), the Alumni Association Distinguished Service Award (1960), and the First Clemson Medallion (Founders Day, 1961). In 1969, the Clemson Lions Club bestowed upon him the Distinguished Citizen Award and 4 days before his death, he received the Man-of-the-Year Award from the Fort Hill Clemson Club in Clemson.

In order to share more about this remarkable man with my colleagues, I ask unanimous consent to have printed in the RECORD several newspaper articles and editorials about Frank Jervey.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Greenville News, May 9, 1983]

FRANK J. JERVEY

Frank Johnstone Jervey was known here as "Mr. Clemson," but his influence was not limited to Clemson University. Between his graduation from Clemson in 1914 and his appointment as the university's vice president for development in 1959, he distinguished himself as a soldier, engineer and world-renowned munitions expert.

He served in the Army during World War I, was wounded in France, and received the Distinguished Service Cross for heroism. After the war, he served in the Ordnance Corps from 1924 to 1953, advancing from assistant ordnance engineer to chief engineer.

His dedication and technical know-how proved invaluable to ammunition production during World War II and the Korean War. When he retired from the corps after 31 years, he became a consultant for the Department of Defense, the Air Force Armament Center, the Copperweld Steel Co. and the Federal Cartridge Co. In 1977 he was inducted into the U.S. Army Ordnance Hall of Fame.

But it was for his work on behalf of his alma mater that he was best known here. He had been Clemson University's good will ambassador for many years before his activities were given official status in 1959, when he was named vice president of development. He later became a life trustee and was elected president pro tempore of the board in 1975.

Frank Jervey died Friday at the age of 89, but his contributions to his school, state and country will not be forgotten. "Mr. Clemson" left his mark on them all.

[From the Greenville News, May 8, 1983]

UNIVERSITY MOURNS DEATH OF JERVEY, "MR. CLEMSON"

CLEMSON.—Frank Johnstone Jervey, 89, was a small arms munitions expert, a veteran of World War I and a retired U.S. Army Ordnance Corps chief engineer—but he was best known as "Mr. Clemson" to thousands who went to Clemson University.

The Summerville native, for whom the university's intercollegiate athletic center is named, died at his daughter's home about 8:30 p.m. Friday, a university spokesman said.

"We grieve tonight at the loss of such a great son, great South Carolinian and great American," Clemson President Bill Atchley said. "Capt. Jervey was 'Mr. Clemson.' His wisdom and wit will be sadly missed. His love for higher education and his belief in the young people of this nation will never be forgotten. He was more than 'Mr. Clemson.' He was 'Mr. Citizen.' "

Jervey, a 1914 graduate of Clemson, was a key figure in obtaining nearly $2 million from the Olin Foundation to build and equip engineering buildings at Clemson. Persuaded by an uncle to choose Clemson over the College of Charleston, Jervey later said he "fell in love with the place my first week here, and it's been close to my heart ever since."

Jervey went on to receive degrees in electrical and mechanical engineering before serving in World War I. He earned the rank of captain while serving as an infantry officer in France. He was awarded the Distinguished Service Cross after being wounded during the war.

After the war and graduate school at George Washington University, Jervey joined the U.S. Army Ordnance Corps in a civilian capacity.

He was well known nationally as an expert in small arms ammunitions, and assisted in the development of the M-1 rifle. He held positions as ordnance engineer, principal engineer and chief engineer. He headed engineering for the Ordnance Corps from 1942–1953.

During the Korean war, Jervey's technical advice was instrumental in establishing munitions plants, and reactivating old ordnance plants.

Upon retirement in 1953, Clemson bestowed a honorary doctor of science degree on the "Captain." In 1959, he became Clemson's vice president for development. In 1965, he was named a life trustee of the college. In 1973, Clemson dedicated the $2 million Frank Johnstone Jervey Athletic Center in his honor.

In 1975, an anonymous donor established the Frank J. Jervey Education fund with a $100,000 permanent endowment. Also that year, he was elected president pro tem of the board of trustees. In 1977, he was inducted into the U.S. Army Ordnance Hall of Fame at Aberdeen Proving Ground, Md. He was called the "world's foremost authority" on ordnance and small-arms ammunition.

He is survived by his wife, the former Anne Dornin White, and a daughter Mary Jervey Kilby, both of Clemson; several grandchildren and six great-grandchildren. Duckett Funeral Home in Clemson is in charge of arrangements. Interment is to be in Arlington National Cemetery.

Memorials may be made to the Frank Johnstone Jervey alumni scholarships at Clemson University, or to Holy Trinity Episcopal Church at Clemson. A memorial service is scheduled for 11 a.m. Tuesday at Clemson United Methodist Church.

[From the Columbia State, May 8, 1983]

FRANK J. JERVEY DIES; "MR. CLEMSON," WAS 89

CLEMSON.—Frank J. Jervey, 89, known as "Mr. Clemson" to many at Clemson University, died Friday night in his sleep.

The Summerville native, for whom the university's intercollegiate athletic center is named, died at his daughter's home about 8:30 p.m., a university spokesman said.

"We grieve tonight at the loss of such a great son, great South Carolinian and great American," Clemson President Bill Atchley said. "Capt. Jervey was 'Mr. Clemson.' His wisdom and wit will be sadly missed. His love for higher education and his belief in the young people of this nation will never be forgotten. He was more than 'Mr. Clemson.' He was 'Mr. Citizen.' "

Jervey, a 1914 graduate of Clemson, was a key figure in obtaining nearly $2 million from the Olin Foundation to build and equip engineering buildings at Clemson.

Persuaded by an uncle to choose Clemson over the College of Charleston, Jervey later said he "fell in love with the place my first week here, and it's been close to my heart ever since."

INS-Customs breakdown, this is what they found:

All halls were jammed. Few seats were available. Access to restrooms was restricted. People became ill. Tempers frayed. Eventually police were summoned to control the crowds, lest they riot.

The average international traveler being processed through MIA then had to wait 2½ hours to gain clearance. Some people waited as long as four hours. Who wouldn't be outraged?

The INS was most to blame. Even under normal conditions, INS staffing at MIA is skimpy. This time it was worse. For extended periods during the peak, only 13 INS agents staffed the 34 available inspection booths. INS's best effort was to man 19 booths. Even that level seldom was attained. One reason was the unprecedented amount of sick and funeral leave taken then by INS staff.

Customs provided 32 agents at peak. Because of strict, inefficient procedural rules, however, the Customs staff is prohibited from doing INS work, so the larger Customs staff made little difference.

This kind of outrage causes many serious ripple effects. The bad word travels fast and far. International travelers often are trend setters and opinion leaders back home.

Many of them missed connecting flights. Neither they nor the airlines need that. Airlines either make money or move operations elsewhere. Many are transferring their international business from MIA to Houston, Atlanta, Dallas-Ft. Worth, even Tampa and Orlando. Loss of that market share will affect passenger and cargo traffic at MIA.

It's simply intolerable that Miami should have to bear this unwarranted burden. Bureaucratic bungling of Federal agencies is principally at fault. From Customs and INS must come the obvious solution—and fast. They must assure sufficient staff at MIA to eliminate this recurring debacle.

Bureaucrats can be slow to move unless the political blowtorch of budgetary pressure is set alight beneath their backsides. South Florida's representatives in Washington have plenty of fuel and many matches. They should not hesitate to turn the heat high.

WORKING PAPER: CAB AIRPORT ACCESS TASK FORCE: WORKING GROUP C—AIRPORT ACCESS AND FEDERAL INSPECTION SERVICES, DECEMBER 17, 1982

(Presented by H. Clifton Madison, Vice President, Western Airlines)

Federal Inspection Services (FIS) at U.S. airports are among the major causes of groundside congestion and delay for air passengers and shippers. FIS congestion and delay detrimentally impacts international passenger and cargo facilitation, disrupts the ability of inbound international passengers to make planned domestic flight connections, and can potentially limit the capacity of an airport to accommodate international traffic. The FIS problem is, therefore, an appropriate area to be addressed by the Task Force as part of its examination of groundside issues.

In 1981, over 20 million international passengers were processed through FIS at U.S. gateway and preclearance airports, and this sector of air travel has shown consistent growth over the years. It is the stated policy of the U.S. government, as articulated in the International Air Transportation Competition Act of 1979, that international air travel should be encouraged from a greater number of U.S. gateway cities to a greater number of cities abroad. Unfortunately, U.S. customs and immigration inspector staffing has fallen behind the growth rate of international air travel.

There has been, and continues to be, severe congestion in processing international travelers through customs and immigration formalities at most U.S. airports of entry and preclearance airports. Delays, at times approaching 2 to 3 hours per flight, are not uncommon at the preclearance airports of Montreal and Toronto and at our airports in Alanta, Baltimore, Chicago, Denver, Detroit, Fort Lauderdale, Honolulu, Los Angeles, Miami, Houston, Minneapolis, New York (Kennedy), San Francisco, Seattle and Tampa, among others.

International airline operations are currently constrained at several U.S. airports due to FIS processing limitations. At New York (Kennedy), for example, the Airline Scheduling Committee must coordinate aircraft arrival schedules to accommodate hourly passenger processing limitations and thereby minimize congestion and delay at JFK International Arrivals Building gates and inspection facilities. At other airports, assignment of processing "slots" for arriving aircraft loads constrains operational flexibility and effective capacity. Unless significant increases in FIS staffing levels or streamlining of procedures are made, these problems will continue and worsen in the future.

Either adequate numbers of inspectors must be authorized by the Congress or a high priority program to reduce inspector workload—through modernization, simplification, and consolidation of the functions of the several inspection agencies—must be initiated. Measures to facilitate the entry of international air travelers and shipments have been recommended, including:

1. Consolidate the several inspection functions required for the clearance of travelers and goods entering the country.

2. Reallocate headquarters and regional resources to increase inspection agency manpower complements in the field.

3. Reduce and simplify the inspection process for Customs and Immigration to permit the most efficient use of available resources. Namely:

(a) extend preclearance—inspection of passengers and baggage prior to departure from a foreign country—to other locations,

(b) implement the red/green door inspection procedure—or a modification of it—whereby the traveler determines whether or not he must go through Customs formalities,

(c) extend the one-step inspection procedure now operational at Edmonton, Houston, Kennedy Airport satellite terminals, Los Angeles temporary facility and Philadelphia, to other U.S. airports of entry and preclearance airports,

(d) introduce sampling techniques for processing air passengers and freight,

(e) simplify U.S. Customs processing of U.S. international air freight through the introduction by that agency of an automated control system, and

(f) reduce inspection agency documentation requirements to process international air passengers and air freight, for example, by simplifying the shipper's export declaration and eliminating arrival/departure cards for transit without visa passengers.

4. Amend the Tariff Act of 1930 to simplify U.S. tariff schedule computations for assessing Customs duties covering freight importations into the United States, paralleling those changes already implemented for passengers baggage importations.

These measures will help meet the continued growth of international air travel and mitigate the need for major expansions in inspector staffing. A significant case-in-point is the ASIST procedure recently evaluated at Miami and Los Angeles. The procedure has simplified and significantly accelerated both immigration and customs inspection formalities, and has been an important first step toward the development of a more selective and efficient passenger inspection system which now should be expanded nationwide. Unfortunately, ASIST was terminated by Customs at Miami on November 1, 1982.

Under the ASIST procedure, immigration inspectors are augmented with customs inspectors at primary immigration booths. The inspectors of the two agencies are cross-trained to perform each other's functions as well as that of agriculture quarantine. Deplaning travelers undergo inspection formalities with only their hand-carried baggage in their possession. If an immigration, customs or agricultural problem arises, or if duty payment is required, the traveler is referred to the appropriate inspection agency secondary position. Checked baggage is not claimed by the passenger until primary inspection at the immigration booth is completed. The airport authorities at Miami and Los Angeles, the international airlines serving these locations, and arriving travelers have all acclaimed the ASIST procedure. Airports desiring to begin the procedure should be permitted to implement ASIST and other streamlined procedures at the earliest practicable time.

An immediate, short-term cause of current FIS congestion is the misguided reduction and curtailment of Customs and Immigration Inspectors staffing as a way of curbing federal expenditures. Unfortunately, in the government wide search for ways to curb expenditures, efforts are being made to shift the cost of providing many government services to the "beneficiaries" or "users" of such services.

Airlines and airline passengers are not the "beneficiaries" of Customs and immigration inspection services. They certainly are "users", but only because they are required by federal law to be inspected. They receive no special benefit unique to airlines or airline passengers from the inspection, in fact, the inspection process itself is a distinct disadvantage in terms of loss of time and convenience. What frequently is overlooked is that the federal laws requiring the inspection were enacted to protect the nation and all of its citizens—by preventing the entry of undesirable products and persons, by preventing the entry of animal and plant diseases, by tariff enforcement protecting American labor and business from destructive foreign competition and discrimination, and by collecting duties on imported goods. The cost of carrying out these laws should be borne by all taxpayers.

CONCLUSIONS AND RECOMMENDATIONS

FIS staffing levels today are unable to meet airport inspection demands without long delays and serious public inconvenience. This situation will worsen significantly unless immediate positive action is taken to deal with it. Either adequate numbers of inspectors, or a high priority program to reduce inspector workload—through the steps toward modernization, simplification, and consolidation of the inspection process cited above, are urgently needed. Otherwise, FIS congestion and delay will continue to be a major groundside access constraint

at U.S international airports and preclearance airports abroad.

SUMMARY OF COMMENTS FILED IN CUSTOMS' DOCKET ON USER FEES

1. OCEANAIR LINE

7-28-82: Seeks exemption of carriers operating smaller aircraft "as the additional costs would be quite burdensome."

2. JAPANESE GOVERNMENT

7-30-82: Seeks exemption "since U.S. commercial airlines to and from Japan are not charged any such fees as those proposed by the U.S. Customs Service."

3. NORTH DAKOTA AERONAUTICS COMMISSION

7-24-82: "North Dakota commercial air taxi operators * * * request an Exemption from the coverage of the rule or any part, thereof, for small entities."

Requests Customs to provide in its rule an alternative to the proposed amendments which will "* * * minimize such significant economic impact of the proposed rule to small entities." Such alternative should exclude all small commercial on-demand air taxi air carriers and other air carriers operating 60 passengers or less or 25,000 pounds of cargo, or 20 passengers or less or 12,500 pounds of cargo.

4. POMPANO AIRWAYS

7-26-82: Opposed to proposed rule. Pompano would be adversely affected by regulation.

5. AIR JAMAICA

7-28-82: Opposes proposed rule: 1. Economic burdens; 2. Discriminatory in that Jamaican government doesn't impose similar tax on U.S. carrier; and 3. Would violate provisions of Chicago Convention.

6. EUROPEAN NORTH ATLANTIC CARRIERS

7-27-82: Opposes proposed rule. Violation of Chicago Convention and various bilateral air transport agreements.

7. FAA

7-28-82: Strongly objects. Costs "of activities for which Customs proposes to levy charges on commercial aircraft operators" should be borne by the general public. Violates international agreements.

8. ITALIAN GOVERNMENT

7-26-82: Opposed. Violates current bilaterals. Would create imbalance between Alitalia and U.S.

9. AIR TRANSPORT ASSN. OF CANADA

7-21-82: Opposed. Unwarranted costs on Canadian air carriers serving U.S. points.

10. DEPARTMENT OF STATE

7-23-82: Opposed. ". . . would be inconsistent with international treaties and bilateral aviation agreements to which U.S. is a party."

11. HELLENIC CIVIL AVIATION AUTHORITY

7-26-82: Opposed. Costs should be borne by U.S. government.

12. REPUBLIC OF SOUTH AFRICA

7-26-82: Request for extra time.

13. BELGIAN DIRECTOR GENERAL OF CIVIL AVIATION

7-26-82: Opposed.

14. FRENCH GOVERNMENT

7-26-82: Authorities are presently studying proposal.

15. EMBASSY OF CANADA

7-26-82: Opposed. Would violate international agreements.

16. NATIONAL AIR CARRIER ASSN.

7-26-82: Opposed. 1. Discriminates between commercial and private aircraft, 2. Commercial aircraft pay for overtime Customs services and should not have to pay for normal hours of work, 3. Customs processing does not directly benefit air carriers; 4. Questions of law; and 5. Refrain from imposition till necessary legislation submitted to and approved by Congress.

17. JAPAN AIR LINES

7-26-82: Opposed. 1. Proposal based on erroneous construction of I.O.A.A.; 2. Proposal does not meet criteria for permissible service "fee"; 3. If burden to fall on some international airlines, must be done by Congressional legislation, not Customs regulation; 4. Airlines should not be expected to bear economic burden; and 5. Imposition of fees may provoke retaliation by other countries against U.S. airlines operating abroad.

18. NY-NJ PORT AUTHORITY

7-26-82: Opposed. Airlines should not have to bear burden.

19. PRINAIR

7-26-82: Seeks exemption identical to that being sought by North Dakota Aeronautics Commission.

20. PORTUGUESE EMBASSY

7-26-82: Extension of time.

21. OK AVIATION (BISMARCK, ND)

7-22-82: Opposed. "Utterly unconscionable."

22. RED AIRCRAFT SERVICE, INC. (FT. LAUDERDALE)

7-26-82: Same as Pompano Airways.

23. VIRGIN AIR

7-21-82: Strongly opposed. People will be unable to absorb costs.

24. IATA (FILED BY RODNEY WALLIS, DIR., FACILITATION & SECURITY)

7-19-82: Opposed. Disregard for economic environment.

25. RAA

7-26-82: Seeks exemption for operations with small aircraft. (Attached to RAA's comments is a copy of their comments filed with CAB in Docket 40673, "Regulatory Flexibility Act—Definition of Small Business," 7-27-82).

26. AIR FRANCE

7-23-82: Opposed. Customs Service does no service for the airlines. "User" of Customs Service is U.S. Government itself. International carriers and passengers shouldn't have to pay.

27. FEDERAL REPUBLIC OF GERMANY

7-22-82: Opposed. Carriers and passengers shouldn't pay; not beneficiaries of Customs services. Seeks exemption for German carriers.

28. AIR NIUGINI

7-12-82: Opposed. Airlines would suffer financial burden.

29. VIRGIN ISLANDS LEGISLATURE

7-13-82: Strongly opposed. Fees would hurt small carriers on which Islands rely.

30. SERVAIR ACCESSORIES, INC. (WILLISTON, ND)

7-13-82: SerVair is operator of small aircraft. Opposes Customs' proposed rule. Would suffer economic burden.

31. PILGRIM AIRLINES

7-12-82: Opposed. Will suffer severely and disproportionately.

32. IATA (HAMMARSKJOLD)

6-15-82: Opposed. Disregard for economic environment.

33. ATA

(Not included in set of documents offered for inspection.)

AMERICAN AUTOMOBILE ASSOCIATION,
Falls Church, Va., May 10, 1983.

Hon. ALAN K. SIMPSON,
Chairman, Subcommittee on Immigration and Refugee Policy, Committee on the Judiciary, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The American Automobile Association is concerned over a provision contained in Sec. 114 of S. 519, the "Immigration Reform and Control Act of 1983", which mandates the imposition of fees on aliens with respect to their use of Immigration and Naturalization Service border facilities and services, in order to offset the costs arising from the use of such facilities.

It is our understanding that, as written, this language would include international travelers in the definition of "aliens."

We wish to note our strong opposition to such fees. The fees proposed by Sec. 114 are not user fees; rather, they are a tax on aliens. Those who would be required to pay the tax would receive no benefit from it. In fact, there is really no relationship between border patrols and international travelers. Border facilities are maintained for the protection of U.S. citizens, not aliens. The fee proposed in Sec. 114 is therefore not a true user fee.

AAA has supported the concept of user fees in the past, most notably the federal gasoline tax to fund development of the Interstate system, and airline ticket taxes to help fund airport and airway development. Those who pay such taxes directly benefit from them.

Furthermore, the fee is discriminatory, because it would be imposed only on aliens, not U.S. citizens. No other country in the world, except the Philippines and Venezuela, imposes a tax similar to that proposed in Sec. 114. The Philippine tax is a head tax imposed only on those visitors whose stay in the country exceeds 59 days.

Moreover, a policy such as that contained in Sec. 114 conflicts directly with the policy set forth in Sec. 101(b)(3) of the National Tourism Policy Act which states: "There is established a national tourism policy to encourage the free and welcome entry of individuals traveling to the United States, in order to enhance international understanding and goodwill. . . ."

At a time when the U.S. is trying to encourage travel to this country from abroad, as well as encourage other countries to eliminate barriers to travel by U.S. citizens, a tax such as that proposed in Sec. 114 is unwise.

AAA urges you, as the sponsor of S. 529, to make clear during Senate consideration of this legislation that such fees are not intended to be imposed upon international travelers.

We appreciate any help you may provide on this matter and hope you feel free to call us if you have any questions.

Sincerely,

JOHN ARCHER,
Managing Director, Government Affairs.

Mr. WARNER. Mr. President, at this time I yield to my distinguished colleague from Montana.

Mr. BAUCUS. Mr. President, may I inquire, what is the pending business?

The PRESIDING OFFICER. The amendment offered by the Senator

If the Democratic Party can articulate a vision of a nation and world good for children, it will recapture the best of its historic mission as a party that cares deeply about people, about the future, and about a government role whose first object, Thomas Jefferson said, is "the care of human life and happiness, and not their destruction. . . ."

Being a party for children is not being for a narrow special interest. As a child advocate, I know I must speak out strongly when President Reagan launches the largest arms buildup in peacetime history and makes a sham out of arms control negotiations that could reduce the danger of blowing up our planet. I believe, as President Kennedy did, that "control of arms is a mission we must undertake particularly for our children and grandchildren. . . . They have no lobby in Washington." The National Democratic Party must be that lobby.

Being for children means being for fair economic and fiscal policies that put American fathers and mothers to work. As a child advocate I know I must oppose President Reagan's economic policies that deliberately drive four million people out of work to bring inflation under control. Many of the men and women who have lost their jobs have children who are the silent victims.

Being for children means rejecting the false Reagan choices which tell us we must choose between jobs and peace; between filling potholes in our streets and cavities in our children's teeth; between a clean environment and safe cities; between day care for 5 million latchkey children and home care for millions of senior citizens living out their lives in the loneliness of a nursing home. I know we have better choices which the Democratic Party must articulate clearly for the American people. I'd rather give up 100 military bands and put the $100 million we spend on patriotic music into reading and math help for 200,000 educationally disadvantaged children instead. I'm sure American high school bands will be happy to volunteer to play for patriotic events. I'd rather sell the Department of Defense's luxury hotel on Waikiki beach for its fair market value of $100 million and put that money into educating thousands of handicapped children.

If we build 1 less of the planned 226 MX missiles, we could eliminate poverty in 101,000 female headed households for a year and help some of the 2.5 million women who have fallen into poverty since 1980. If we cancelled the whole MX program, we could eliminate poverty for all 12 million poor children and have enough left over to pay full college costs for 300,000 potential engineers, mathematicians, and scientists who may not be able to afford college and whose skills may be more critical to building a secure future America than any gun or tank.

Exactly 30 years ago, Dwight David Eisenhower warned that:

"Every gun that is made, every warship launched, every rocket fired signifies . . . . a theft from those who hunger and are not fed, those who are cold and are not clothed.

"This world in arms is not spending money alone.

"It is spending the sweat of its laborers, the genius of its scientists, the hopes of its children."

And how blatant the Reagan theft from children has been. $10 billion has been cut from the neediest children and families at the same time that $750 billion in new tax breaks, mostly to nonneedy corporations and individuals, has been provided. And President Reagan is trying to convince the American people to give the Pentagon $2 trillion over a 7 year period in the largest arms buildup in peacetime history.

Do you know how much $2 trillion is? If you had spent $2 million a day every day since Christ was born, you would still have spent less than President Reagan wants the American people to believe the Pentagon can spend efficiently in 7 years.

The misguided and dangerous Reagan economic and moral priorities would be harmful even in good times. They are downright cruel in the face of growing child abuse and hunger, preventable child sickness and mortality, and shameful homelessness which is forcing more and more parents to roam the streets, sleep in cars, and place their children in foster care. Let me share just one sad example: Baby C was born prematurely with lung disease. His parents lived in a car. His mother received no prenatal care. The family lived on handouts from neighbors and hospital staff. By the time Baby C died at 7 months of age in a Michigan hospital, the mother was pregnant again with Baby D. Baby D was delivered stillborn in the car 5 days after Baby C's death. The state of Michigan paid for a double funeral.

These two American children should not have died. Nor should their mother have lacked adequate prenatal and nutrition care which this Administration has cut back without regard to human cost. Family planning might have prevented these two tragedies as might a job and a decent home. The costs of hospital care for 7 months for a premature child certainly cost taxpayers far more than adequate prenatal and nutrition care would have. The shame of these two deaths is compounded by those of other American infants in some Detroit neighborhoods who suffer mortality rates comparable to those in Honduras—the poorest country in Latin America.

Maine state officials in a new study say poor children die three times the rate of non-poor children. They estimate that the ultimate cause of death of 11,000 American children each year, 30 each day, is poverty. 2.5 million children have become poor since 1980 as a result of the program and budget choices of the Reagan Administration which seems bent on turning our national plowshares into swords and bringing good news to the rich at the expense of the poor.

In fiscal year 1984, President Reagan is cutting 8.6 million in federal child nutrition dollars to Massachusetts and $1 million in Community Services Block Grant money to help poor families. But the Army is building new racquet ball courts at Fort Devens and fixing up the nightclub there. The Navy is also making alterations to the auto hobby shop at the naval air station in South Weymouth. On top of this, you are getting an extra $1 million in the Massachusetts Division of Civil Defense so the poor will have a better bomb shelter program to look forward to.

President Reagan has attacked House Democrats as "big spenders" because they have passed the first decent budget we have seen since he took office. I thank Speaker O'Neill and other House leaders and I say to them: if a big spender is someone who wants to put parents back to work and feed hungry children, then Democrats ought to be proud to be "big spenders." President Reagan would rather feed Pentagon brass. Every time Secretary Weinberger and his one hundred elite colleagues sit down in his private Pentagon dining room staffed by 19, they pay $2.87 a meal and we taxpayers pay $12.06. This $12.06 could provide 40 midmorning milk and juice and cracker snacks President Reagan has forced poor children of working mothers in child care centers to give up. I think we should urge Secretary Weinberger to eat in one of the four other Pentagon executive dining rooms and give 1 million food supplements back to poor children instead.

President Reagan is also mad at House Democrats because they voted to increase defense spending by only $3 million an hour when he wanted a $4 million an hour increase in fiscal year 1984.

When President Reagan took office, we were spending $18 million an hour on defense.

This year, we are spending $24 million an hour on defense.

Next year, President Reagan wants to spend $28 million an hour on defense. The House Democratic leadership wants to spend "only" $27 million an hour. Who besides President Reagan, Jerry Falwell, Casper Weinberger, and Jesse Helms could possibly believe that spending $27 million an hour is being soft on defense?

By fiscal year 1988, if the President has his way, we will be spending $44 million an hour and every American will be spending 63 percent more on defense and 22 percent less on poor children and poor families.

Is this the kind of nation we want to become?

Do we really believe that bombs and missiles and nonessential defense expenditures are more important than healthy babies and mothers and educated young people?

Does our sense of fairness allow us to leave untouched $750 billion in new untargeted tax breaks mostly to non-needy corporations and individuals in the face of growing child and family poverty? Each one day delay of the third year tax cut is worth $100 million. One day would generate enough revenue to cover every poor mother under Medicaid.

Can the Democratic Party rescue our nation from the brink of moral and economic bankruptcy and return us to the quest for national decency, fairness, and economic security for every American child, family, and senior citizen? I believe that is the critical task before you.

I hope those of you sitting here today will help select a leader who will tell the American people plainly what our real choices are, the hard steps we need to take to regain economic health, and what sacrifices we must make to achieve true security within and without over the long haul. As a mother of 3 sons, I have as much interest as any General or Admiral in seeking to achieve reasonable and necessary national security goals that protect my children and all American children from unwanted aggression and war which could escalate into nuclear disaster.

I hope you will help the Democratic Party select a leader who can articulate a balanced and humane foreign policy that mirrors humane domestic policies—a leader who would rather lead the world in saving some of the 40,000 babies UNICEF said died each day of last year from preventable malnutrition and infection than lead the world in giving arms to Third World forces who oppress the poor like those in El Salvador and Nicaragua.

I hope you will give us a leader who is not content to simply respond to Ronald Reagan, but who can transmit and implement a vision of a better quality of life for

the millions of children who are growing up sapped of hope—new cogs in the chain of dependency so costly to them and to our national well being and future.

I hope you will choose a democratic leader who will wrest back the pro-family, pro-life, pro-work, pro-peace values which unite us as a people and which have been so perverted by Ronald Reagan. President Reagan believes being pro-family is being pro-rich families. He and his moral majority friends believe right to life stops at birth and that peace can be achieved in a world that is armed but not fed.

I hope you will pick a leader who will speak to the best in our national spirit and understand that the gross national product alone is no measure of what we are really worth.

Speaking of GNP, Robert Kennedy said:

"It does not include the beauty of our poetry or the strength of our marriages, the intelligence of our public debate or the integrity of our public officials. It allows neither for the justice in our courts, nor for the justness of our dealings with each other.

"The Gross National Product measures neither our wit nor our courage, neither our wisdom nor our learning, neither our compassion nor our devotion to country. It measures everything, in short, except that which makes life worthwhile."

A democratic leader who understands this and whose overarching commitment is to justice—for children, for the poor, for minorities, for women, for the elderly, for working people, for individual human beings—will be elected and worthy of election. He will also be able to govern because he will be helping us become the kind of nation we want to be and that Ronald Reagan threatens to take away.

FED TAKES DIM VIEW OF INDEXING

Mr. EAGLETON. Mr. President, the Senate budget process hangs by a thread. The Budget Committee is now making a last-ditch effort to find some basis for agreement on reducing the monstrous deficits that threaten to suffocate the economic recovery.

The central issue is revenues. The administration has set itself in concrete against any tampering with the 3d-year tax cut or indexing, apparently preferring a string of $200 billion dollar deficits to anything that might look like a step back from Reaganomics.

Mr. President, as the clock runs down, it can only be hoped that men of reason will prevail and that the long-term interest of the country will be put ahead of political pride.

One area in which I think there is room for compromise is indexing. Unlike other tax proposals which have been discussed, deferral of indexing will not remove short-term stimulus from the economy, but will have its impact on the outyear deficits that are of such concern today. If it makes this administration feel better, I am willing to concede right now that it has won the battle over indexing. For better or worse, a tax indexing policy has been decided on. My only plea is to put off implementation of that policy until we can afford it—until we have these billowing deficits under some kind of control.

Mr. President, I think the Members of the Senate might be interested in an exchange of letters I have had on this subject with Federal Reserve Chairman Paul Volcker. I ask unanimous consent that this correspondence be printed at this point in my remarks.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

BOARD OF GOVERNORS
OF THE FEDERAL RESERVE SYSTEM,
Washington, D.C., May 9, 1983.

Hon. THOMAS F. EAGLETON,
U.S. Senate, Washington, D.C.

DEAR SENATOR EAGLETON: Thank you for your letter of March 14 requesting an elaboration of my views on the subject of tax indexing. Actually, my view on the matter is part of a broader instinct—that indexing in general tries to evade the consequences of inflation, and we would be better advised to deal with the ailment directly.

In any world approximating that in which we live today, inflation has many undesirable economic effects. In addition to the myriad inequities that it creates, these effects include distortions of the pattern of investment and capital accumulation. Indexation, in general, represents an attempt to neutralize these inequities and inefficiencies. But, even if this were totally successful, in a practical sense it is hard to imagine a world in which indexation made it possible to live with inflation and to escape the costs of the reduced long-run growth and short-term instability that have tended to accompany inflation in the past. Yet, the more we try indexing, the more the temptation to try to live with inflation.

I realize strong arguments can be made for tax indexing along the lines of avoiding a "Government" incentive to inflate to drive people into higher tax brackets or, as you note, to spend more money. Those arguments need consideration, but I suspect that public concern with the effects of inflation in the presence of an unindexed tax system should serve to focus attention on the heart of the matter—discipline in both monetary and fiscal policies.

But I would be concerned with indexing on the spending side as well (or more!). As a second alternative, your proposal to tie the implementation of indexing to achievement of a deficit which is no more than 2 percent of GNP has the advantage that it would help to attenuate the pressing problem of structural imbalance in the budget. For all the inequities and difficulties of an "unindexed" system in a period of inflation, absence of tax indexing does at least work in the direction of closing the present huge budget gap and relieving inflationary and interest rate pressures. If indexing is retained, other means of closing the deficit should be found.

I hope that you find these comments useful.

Sincerely,

PAUL A. VOLCKER,
Chairman.

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., March 14, 1983.

PAUL A. VOLCKER,
Chairman, Board of Governors, Federal Reserve System, Washington, D.C.

DEAR MR. CHAIRMAN: I understand that you and I share the same negative view of tax indexing. Since your thoughts have not been offered in prepared testimony, but only in answer to questions, I would appreciate having a fuller explanation of why you think tax indexing is a bad idea and what consequences you foresee from letting the indexing provision take effect as scheduled in 1985.

The strongest argument for indexing, of course, is that without it taxes will increase without benefit of a change in law and Congress will find ways to spend the revenues. How do you respond to that?

Finally, I would appreciate having your reaction to a possible compromise approach to the indexing problem. Rather than repealing or indefinitely deferring indexing and inviting a political battle with the Administration, why not tie the implementation of indexing to achievement of a deficit which is no more than two percent of GNP? This is the same kind of triggering event proposed by the Administration in connection with its contingency taxes except that I would set the deficit-GNP ratio a bit lower. It seems to me, this approach avoids the provocation of saying indexing is an outright dumb idea, but rather, proposes to wait at least until we can afford it.

Your thoughts on this matter would be much valued and appreciated.

Regards,

THOMAS F. EAGLETON,
U.S. Senator.

Mr. EAGLETON. I also ask unanimous consent that the text of a bill I introduced on April 28 deferring indexing until deficits are brought down to 2 percent or less of gross national product be reprinted at this point in my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1169

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (e) of section 104 of the Economic Recovery Tax Act of 1981 (relating to the effective date for adjustments to prevent inflation-caused tax increase) is amended to read as follows:

"(e) EFFECTIVE DATE.—

"(1) IN GENERAL.—The amendments made by this section shall apply to taxable years beginning after the later of—

"(A) December 31, 1984, or

"(B) the date on which the Secretary of the Treasury certifies that the Federal deficit for the most recently completed fiscal year did not exceed 2 percent of the gross national product for such fiscal year.

"(2) ADJUSTMENTS IN TAX TABLES.—Notwithstanding section 1(f) of the Internal Revenue Code of 1954—

"(A) the Secretary of the Treasury shall not prescribe tables under section 1(f) of such Code prior to the date described in paragraph (1)(B) of this subsection, and

"(B) the tables contained in subsections (a), (b), (c), (d) and (e) of section 1 of such Code shall apply to taxable years beginning on or before the later of—

rior enforcement have been insufficient and ineffective.

I think Commissioner Allen Nelson is turning it around and is doing a very credible job.

I will conclude, and we can ask for the yeas and nays on the substitute tomorrow.

The committee's idea through the use of mandatory user fees was to provide funds to offset the cost of the facilities and services used by aliens crossing our borders.

Many countries do impose departure fees on persons leaving their borders. The provisions in the bill would permit the imposition of either an entry or a departure fee, whichever the administration deems the most appropriate.

The fees contemplated originally were small: Perhaps 25 cents per person at land crossings and around $1 per person at airports or seaports. That was the intent.

The approach is consistent with the present intention in Government, at least at some other levels to impose user fees, having the people who use the systems pay for the system. The income generated from those fees would improve the service which we furnish to people at the points of entry. The lines would be shortened and service improved through use of funds generated through the user fees.

At this juncture, I personally embrace the view of my colleague from Virginia. It matches the language of the House of Representatives making it permissive instead of mandatory, rather than repeal the fee provision. Maybe we could to visit further about the issue of the land crossing fee versus an airport fee or a seaport fee. That is certainly something I would be willing to consider.

Mr. WARNER. Mr. President, will the Senator from Wyoming yield?

Mr. SIMPSON. I yield.

Mr. WARNER. Mr. President, I respect my colleague from Montana. Had he not offered his amendment it is likely the manager of the bill would have accepted my amendment.

Mr. SIMPSON. Mr. President, if the Senator from Montana is accommodating the Senator from Virginia I would accept the amendment in the form of permissive rather than mandatory.

Mr. WARNER. So really the sole issue before the Senate then is to look at a permissive versus mandatory and the managers of the bill are prepared to accept the permissive approach.

Mr. SIMPSON. That is correct for this manager of the bill.

Mr. WARNER. I thank the Senator.

Mr. KENNEDY. Mr. President, I commend the Senator from Montana for bringing this issue to the attention of the Senate.

This particular provision was in the legislation that passed last year.

There were members of the Judiciary Committee, including myself, who were concerned about it, so we inquired about it from the State Department. I must say they were remarkably slow in getting back to us with their own concerns.

Finally, as has been well-stated by the Senator from Montana, when they have reviewed it and reviewed it in very considerable detail, I think the Senator has understated the kind of anxiety they feel and their fear of the implications this provision will have—of the United States being the first country in the world that puts the tin cup out for people when they are coming into this country or coming back into this country. The implications of that I think are profound indeed. Myself, I think they are beneath the dignity of this Nation.

I think we are all familiar with the kinds of fees that have been established to date, the visa fees to pay for consular services, which are quite appropriate. Almost every nation in the world does it. There are the airport fees which we have seen in country after country. Nations do that. There are other kinds of generally accepted exit fees that take place.

If that were what was being intended by this particular provision in the bill, I would certainly hope that it would be sustained. But I think the Senator is quite correct that the language does not say that.

If the language remains as it is in the legislation, I can see not only the possibility of an Attorney General and the Immigration Service establishing an odious kind of process and procedure. I can see other countries establishing similar kinds of restrictions against U.S. citizens when they are traveling abroad. It does seem to me to be highly objectionable for the very sensible reasons the Senator from Montana has stated.

I would hope that over the period of the nighttime—prior to the time that we would vote on this measure—that we could work out a compromise, which would be sufficiently discretionary in terms of the future, but that we agree on what is acceptable and what is responsible and that there be a common understanding by the Members of the Senate exactly what this provision will actually mean.

I, too, am troubled by the discretionary provisions, but as I understand the comments of the Senator from Wyoming in the listing of the kinds of fees he thought would be included, they were the most traditional kinds of fees, and those I think have a general acceptance and understanding in international relations, and were we to come out in that particular way then I think that the Senator's objective would be accomplished. But if we are not able to reach that compromise, I would vote with the Senator from Montana on this amendment and I think he is quite correct.

Mr. BAUCUS. Mr. President, I very much appreciate the remarks of the Senator from Massachusetts. I am not going to take much more of the Senate's time here. We have other matters to attend to.

Let me say, first, that as I understand present law, the kind of matters, the Senator from Wyoming wishes to see covered are already covered. We do not need this provision for airport-type user fees and visa fees.

Second, the fees provision causes a problem because about one-sixth of our border crossings in the North are unmanned. Who is going to collect the fees as Canadians come across or as they go back across? There is no one there to collect them. They are small, remote stations. It is a minor matter, but if we have to have someone collect the fees, that in itself, is going to increase INS costs.

More fundamentally, I do not think imposing border fees is proper or right.

The Senator from Massachusetts says it is demeaning to the United States to start imposing fees on people who come to visit the United States. I agree. If we require these fees, the Statue of Liberty will thereafter be heard to say: "Give Me Your Tired, Your Poor and Your Buck." I do not think that is what we want the Statute of Liberty to represent.

Mr. President, I wish to yield the floor, and I do ask for the yeas and nays on the substitute amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, Senator BAUCUS comes from a State immediately contiguous to me on the north. We, in that part of the world, are familiar with persons who are illegal undocumented workers from Canada. It is odd in these United States we do not always think of them in the same way we think of other illegal undocumented alien persons but, nevertheless, they are the same in every way.

We have vowed never to speak about the Statue of Liberty in this debate, and the Senator from Montana has strayed from the official ground rules and will be severely chastised at some later time.

Fees are now being assessed, as the Senator says, but they are not user fees. We were just trying to frame a user fee.

But I would hope the staffs might work this evening and maybe go on to address what Senator KENNEDY is saying with regard to the possibility of the designation of a user fee. But if not, the yeas and nays have been asked for and we will deal with the

issue tomorrow. I think the case has been stated.

I yield back the remainder of my time.

Mr. BUMPERS. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The question needs to be resolved on the underlying Warner amendment.

Are the yeas and nays to be ordered on the underlying amendment?

Mr. WARNER. Mr. President, I heard the question. Was there a sufficient second?

The PRESIDING OFFICER. That was on the Baucus substitute.

Mr. WARNER. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 1271

(Purpose: To eliminate the investor preference)

Mr. BUMPERS. Mr. President, is my amendment in order?

The PRESIDING OFFICER. Yes.

Mr. BUMPERS. Mr. President, I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS) proposes an amendment numbered 1271. On page 157, beginning with line 19, strike out all through page 158, line 6.

Mr. BUMPERS. Mr. President, there are 20 minutes on this amendment to be equally divided and as far as I am concerned, we can probably dispose of it even in less time than that. It is a very simple amendment.

I wish to explain to my colleagues a category included in this bill about which very little or nothing is being said.

No. 1, in the broad category of independent preference, that is a broad category, and under independent preference are four different classifications.

First, if there happens to be an Einstein somewhere wanting in this country, someone with exceptional ability, he can be admitted and he has high priority under this particular classification.

Second, anyone who has a skill that is needed in this country. It is just a skilled worker preference. He can be admitted.

They are the second priority within that classification.

The third one and the one to which I take exception is called investor preference. Before I tell you what investor preference means, Mr. President, let me make this point: In this broad classification, 75,000 people can be admitted into this country within those categories—exceptional ability, as I say, the kind of mind that Einstein might have, if it happens to be something we need. That is No. 1. Skilled workers are No. 2. Those who have money to invest in this country to start a business are No. 3. Out of the 75,000 people in those categories, only 7,500 can be admitted under the investor preference. That is not likely to happen, because here is the existing law.

It is not existing law; actually, it is just something the Attorney General set up in 1978, that anybody who had $40,000 and wanted to employ one person in this country could get in under the existing rule. it is not legislative, it is not a part of the immigration law, it is just something the Attorney General put in in 1978. Not one person has ever been admitted to the United States under that category, and I am glad.

But here comes this bill. This bill provides that anybody in this category who has $250,000 and wants to hire 10 people gets a preference.

Mr. President, under the existing rule of the Attorney General, you at least have to have all or part of your money up to be considered for admittance under this provision. Under the bill, you simply have to express an intent to put up $250,000 and hire 10 people.

Let me say that the argument that the opponents of this amendment will make is that the Select Commission on Immigration voted 14 to 1 in favor of this provision. The one dissenting vote was the chairman of that Commission, Father Theodore Hesburgh. As Andrew Jackson used to say, one man with courage makes a majority. Two men with courage—that is, Father Hesburgh and me—I hope will make a majority in this case.

Mr. President, this is not what anybody would call a "biggie," but I can tell you that I strongly object to it. I do not think—the Senator from Massachusetts was talking about an amendment a moment ago in an entirely different context, but he said the United States would be the first Nation to ever put out the tin cup. My amendment simply strikes this category.

Nobody has ever been admitted, maybe nobody ever would. But I think it is odious, it is offensive, it flies right in the face of the national character of this country. Nobody ought to be admitted into this country simply because he can produce $250,000 and express an intent to come to this country. I hope my colleagues will vote to strip that provision.

I reserve the remainder of my time, Mr. President.

(Mr. DANFORTH assumed the chair.)

Mr. SIMPSON. Mr. President, vigor is the touchword for my colleague from Arkansas. When he enters the fray, he brings vigor and a lot of spirit with him. I remember this debate in August 1982, I go back to the Select Commission on Immigration and Refugee Policy. Who felt that there must be some provision made for an increase in independent, or "new seed" immigrants. Under our present law, only 54,000 visas are available for independent immigrants while, under this bill, this number will increase somewhat to 75,000. Three hundred fifty thousand of those visas go to family reunification. No qualifications whatsoever, just family reunification, which policy continues, as it should, in our heritage. That family reunification dominates our immigration policy.

Of the 75,000 independent immigrant visas, all of them are allocated first to immigrants of exceptional merit and ability. Those left over are allocated to immigrants with skills needed in the United States and, finally, any of the 75,000 independent immigrant visas remaining are made available to these investors, those who would invest at least $250,000 in a new enterprise in the United States, which would employ at least four U.S. workers not members of the immigrant's family.

The number of visas available then for these independents is limited by this bill specifically to 10 percent—no more than 10 percent—of the 75,000 independent immigrant visas. Thus, no more than 7,500 visas can be issued in this preference category.

I think that is a reasonable figure. Right now, today, current regulations provide that visas may be issued to immigrant investors who will invest $40,000 in an enterprise in the United States which will employ at least one U.S. citizen not a member of the immigrant's family. That is present law. This is not some new thing. Thus, the bill requires three times the investment and four times the number of U.S. workers to be employed than under present law and regulations; thus it makes it stronger.

So, while family reunification continues to be the primary purpose of our immigration policy, we thought it was appropriate to allow a small number of persons to immigrate to the United States who will benefit the economy of the country, and solely and specifically so. That is, if the size of the investment required is appropriate, if the number of U.S. workers to be employed is appropriate, and the preference is appropriately limited to no more than 10 percent of the independent immigrants, which means that less than 1.7 percent of all immigrant visas will be issued to investors—1.7 percent of the entire 100 percent, then we think that is fair and appropriate, Mr. President. So it is the committee's view that the investor prefer-

The time has come for Democrats to begin the season of hard choices—Campaign '84.

There is a syndrome that is particularly prevalent in campaign seasons: the tendency to push everything to absurd extremes; to use empty rhetoric; to deal in parody and hyperbole, on the assumption that voters will not understand or tolerate subtlety even if the truth lends itself to nothing else.

I think 1980 was a good example of that.

The American people, tired, confused by inflation and tormented by a mad ayatollah, were desperate for simple answers and vulnerable to simplistic ones.

At the moment of their weakness they were confronted by the extraordinary charisma of a certified American hero . . . notwithstanding his certification was written on celluloid.

He was, and is, a gifted communicator.

But he wasn't prepared to test his extraordinary capacity to communicate by dealing in subtle truths.

He chose instead the more traditional path of outsiders seeking to replace incumbents burdened with the status quo.

He chose to tell the people what a majority of the people wanted to hear, and gave them explanations that were as clear and simple as they were wrong.

He told them that if we had the biggest tax cut in history, rich people would take the money and invest it in Phoenix and the South Bronx, thereby reigniting the engine of the economy for everybody's benefit.

He said this would happen so surely and swiftly that he could also increase our military spending more drastically than at any point in our peacetime history, and still balance the budget in three years.

He even said that by having the Government order a morality which ministers, rabbis, nuns and well-intentioned parents had failed to teach, he could rid us of sinners.

A weary, confused, perplexed Nation was offered a sweet tasting capsule-sized placebo by an attractive hero, and swallowed it whole.

It was beautiful rhetoric, reassuring and timely.

But today more people know what only some people knew then: It wasn't right. It wasn't the truth. It wouldn't work.

In fact, after two-and-a-half years, it has left much of the Nation aching for something that will work, and the rest of the Nation suspecting perhaps nothing will.

We all know the record.

Despite lines on graphs that can be manipulated to give the illusion of progress, the flesh-and-blood realities tell a different and truer story.

Instead of rewarding incentive, over 50,000 companies were put out of business—thousands of them in New York.

Instead of giving our people new opportunities, the plan denied millions of them the simplest of human dignities, the chance to earn their own bread. In New York, 695,000 people, at the very least, are now out of work.

Instead of balancing the budget, it left us with the largest deficit known to American Government.

According to David Stockman, "200 and 300 billion dollar deficits, as far as the eye can see" are real possibilities. These deficits would make it necessary for the Federal borrowing to absorb more than half of all credit market funds in 1984–85. Today republicans are glibly comfortable with deficits many times higher than those they condemned an election or so ago.

Instead of fairness, it caused a massive redistribution of the Nation's wealth—unevenly and unfairly moving it from social necessities to armaments; from the poor and the middle class to the rich; from vulnerable old cities made weak by carrying the burden of the immigrants to affluent portions of the Nation.

The smooth and sweet refrains of the 1980 campaign were followed by an administration that divides us in the most fundamental way, widening the gulfs and tensions among the haves, the have-lesses, and the have-nots.

Group after group joined the disadvantaged: undernourished children; senior citizens worried over their futures; inner city youth suffocated by an evil drug culture that is allowed to flourish by the failure of the Federal Government to do anything meaningful to stop it; steel workers and auto workers; the people in wheelchairs, in hospitals, in community centers; people who can't speak the language, who are out of work, who need help.

Those were the people who paid for the elegant script that had been sold the majority of Americans in 1980.

Who then could continue to be happy? The richest people in the country and those just beneath them at the top of the economic ladder.

In fifty years we democrats have not had a clearer challenge to our assertion that our way is closer to the truth.

In fifty years we have not had a better opportunity to justify our existence as a party. Nor a more obvious chance to prove that we believe in something beyond the mere amassing of power, in something different from our opponents.

We are the outsiders now. That presents the same temptation the Republicans were seduced by in 1980.

We are now the ones who are tempted to content ourselves with describing the incumbent's litany of failure and disappointment.

Tempted to offer, instead of an intelligent approach and program, a string of swollen promises, each one designed to seduce a different interest group or constituency into a conspiracy of selfishness.

Tempted to use our own empty rhetoric and hyperbole in place of theirs, offering new simplistics to replace theirs, proferring a placebo of a different size and shape.

It seems to me, that unless there is a real difference in what we believe, a real capacity to improve the conditions of peoples lives, putting a Democrat in the White House will be only an exercise in political vanity.

If the only difference between us and them is that they wear an elephant and we wear a donkey, then it's not worth choosing.

If it becomes a simple competition of personalities, I and many others will have little motivation to struggle and even less expectation of victory.

But I believe there are differences, fundamental and crucial ones, if we are not afraid to state them.

The stating and restating of those basic concepts and fundamental principles that give us a different description, a different thrust, a different direction, should be the basis of our case in 1984.

Those fundamentals make up the soul of our party.

They are the same beliefs that have distinguished us since the awful, grim winter of fifty years ago when Franklin D. Roosevelt raised himself up from his wheelchair to lift this Nation from its knees.

They are more than grand rhetorical flourishes and glittering, unreal, unattainable aspirations.

They are operating principles that produce specific policy judgments that touch peoples lives.

What are those principles?

Our opponent said in 1980 that Government was the problem, and to the extent that you withdraw Government from everyday events, you improve the condition of our society.

We believe that of course we should have only the Government we need, but we insist on all the Government we need.

They believe that Government's principal purposes should be to make instruments of war—to make examples of so-called welfare cheats and to clear obstacles from the path of the strong.

They believe that "God helps those whom God has helped and if God has left you out, who are we to presume on God's judgment."

We believe that survival of the fittest may be a good working description of the process of evolution but that a Government of humans should elevate itself to a higher order, one which tries to fill the gaps left by chance or by a wisdom we don't understand.

A society as blessed as ours should be able to find room at the table, shelter for the homeless, work for the idle, care for the elderly and infirmed, and hope for the destitute.

We believe that to demand less of our Government or of ourselves is to evade our proper responsibility.

We believe in Government's capacity to promote human dignity, to create an economy that supports rather than undermines families and communities, to nurture a respect for life and to teach compassion by showing compassion.

We proclaim, as loudly as we can, the utter insanity of nuclear proliferation and the need for a mutual nuclear freeze—if only to reaffirm the simple truth that peace is better than war because life is better than death.

They would crush the unions. We believe that unions are a great institution that has provided justice and decency for millions of working people.

And we see them as part of an even greater world-wide movement for freedom and justice, a movement that is stirring across the globe, from Poland to South Africa.

They believe that Government has no obligation to assure economic opportunity—no role in the struggle for social justice—but should, nonetheless, lead a "moral revolution" to punish those whose private lives don't conform to their ethical standards.

One of them—the same Secretary of the Interior who can't protect our beaches from oil spills—now wants to protect our children from the Beach Boys.

We fight for privacy for people, for freedom from unnecessary restraint, for free choice.

At our best we have been tough enough to tell the truth even when the polls suggested that many had misunderstood the truth.

We have always been strong enough to use words like "conciliation" and "compassion." And smart enough—practical enough—to find ways to make our highest aspirations, and our most beautiful dreams, an everyday reality.

Above all we have believed in a Government characterized by fairness and reasonableness, a reasonableness that goes beyond labels, that's wiser than naked ideology, that doesn't over-simplify or distort.

The argument in 1984 will get a good deal more discrete than we make it here today.

The candidates will see to that.

We will have 100 pages of platform and a proposal to fit every occasion.

But for us to succeed, our case must rest—ultimately and unequivocally—on our basic differences.

The lines formed by the points that make up all the pieces of our platform must conform with the patterns of truth on which we have built our party.

If we lose the right to claim these principles, we lose our rationale and our justification, and then it would not be worth winning an election.

Making the case in terms of specific issues won't be difficult. The candidates obviously will do it better than we can, but even the non-candidates can see clearly the kinds of arguments that need to be made.

Our insistence on a Government that is positive, that seeks to improve the conditions of people's lives and that understands it must be reasonable—all this suggests a whole series of steps that need to be taken.

We are not against increases in defense expenditures, but we do oppose increases based solely on an attempt to make them higher than an opponent's percentage.

They should be the result of specific plans and goals.

They should be discounted for waste the way food stamps and medicaid are discounted for waste.

We can make reasonable modification of social programs.

Tip O'Neill, Pat Moynihan, Lane Kirkland, and Democrats in Congress who worked to modify the social security system in order to save it, showed that.

But we know it's wrong to cut drastically the social programs that educate the young, feed people, comfort them in their old age, and care for them in their infirmity.

Sacrifice? Of course. But those best able to give without being hurt should have been called upon to do more.

It was wrong—and is wrong—to impose so much of the pain on the least able, on the debilitated cities and States of this Nation that, like my own, have carried, disproportionately—but proudly and gladly—the burdens of generations of immigrants.

Instead of the proposed "New Federalism," we should promote a fair federalism that distributes the burdens and benefits according to strengths and weaknesses.

And always . . . always . . . we must reject the absurd extremes.

Of course protectionism that amounts to isolationism is wrong.

In the end, we must welcome competition and be able to use it to goad us into increasing our own productivity and finding new uses for our potential strength.

But that is not to say that we must allow other countries to close their markets to us by making it impossible for us to compete.

Or that we should abandon the right to motivate them to be fair by an occasional act of response, or even retaliation.

Some of our older industries, like our steel-bending industry, have fallen behind international competitors.

But that is no reason to abandon these industries entirely, leaving thousands of middle-aged steel workers and their families without a job and without hope.

Isn't it foolish to suggest, after committing so much of our wealth to a defense establishment that depends on steel and the capacity to bend it, that we will turn our back on our own ability to do that work?

It's simply not necessary to surrender entirely on our old industries in an exhaustive pursuit of new ones.

Reasonableness will find a way to sustain the old while moving into the new.

The alternative is to victimize a whole generation of people born too late to be part of the future.

We don't believe in nationalizing our industries.

But in this world of fierce competition, where other governments have learned how to support economic growth through partnerships of the public and private sectors, through subsidies, through national investments in research and development as well as capital formation, it is right—and wise—for us to do the same.

We argue for a mechanism that will use our national wealth to help our industries refinance and retool, allowing them to obtain the expertise and the resources to compete in the technical revolution that is reshaping the world's economy.

We urge the adoption of a Federal capital budgeting program that will provide us with a coherent plan for balanced investment in the backbone of roads, rails, ports, and bridges that supports our national economy.

A real capital budget would make it possible for us to undertake projects systematically and rationally.

And because we are Democrats, we need to recognize the importance of human resources as a foundation of our economic future.

It doesn't take a Noble-Prize-winning economist to know that the most important investment of all is the investment in our people.

Education, occupational retraining, on-the-job experience must all be given special emphasis.

Talking about people is a good place for a Democrat to finish as, indeed, it is a good place for a Democrat to begin.

If I am allowed a personal note I will tell you that everything I have said to you today has been tested in at least one crucible—the crucible of New York State.

The things I say to you today I said for nine months last year, arm-in-arm with labor unions, with women, with blacks and browns and orientals, with people in wheelchairs, with people who work for a living because they have to, and the people begging for work.

It worked well enough last year to give us two victories against better financed campaigns with more likely candidates.

And more important, it worked after the election.

In the face of the most massive budget in the State's history—a deficit made so extreme by the national economic slump—we were able to balance the budget without abandoning our weak, to cut expenditures without destroying services, to reject increases in the State's broad-based taxes and yet begin a multi-billion infrastructure repair program that will create thousands of jobs.

We had to ask for sacrifice.

We had to ask people to look beyond the political moment, to put aside the pure self-interest of region or faction or class, to consider the debt we owe to the generations to come.

Some were surprised to see that New Yorkers did not fight that idea, or scoff at it, or reject it out of hand as sentimental or silly.

Some were surprised by the way they listened, and then responded.

Their reaction made it apparent to me that some of us in politics had become so sophisticated and so skillful—so sure we can measure public opinion and so certain we can manipulate it—that we'd lost sight of a single fundamental . . . a fundamental of our history, or our party's past, of its success in representing our people's hopes.

The idea of family . . . mutuality . . . the sharing of benefits and burdens fairly for the good of all.

The recognition that at the heart of the matter we are bound inextricably to one another; that the layoff of a steel worker in Buffalo is our problem; the pain and struggle of a handicapped mother in Houston, our struggle; the fight of a retired school teacher in Chicago to live in dignity, our fight.

The acknowledgment that to prosper we must be the family of America, the family of the United States of America.

Feeling one another's pain, sharing one another's blessings, equitably, fairly, without respect to geography or race or political affiliation

I believe that amid all the division and divisiveness that holds us apart—that has been with us so long now it may seem insurmountable—we can rediscover the purpose and belief that brought this Nation into existence, sustained it, made it as good as it was great.

And underlying everything else, I have the unshakeable conviction that for all of our present travail . . . and we know it well . . . the deficits, the hordes of homeless, unemployed and victimized, the loss of spirit and belief, this country is still good enough to do what must be done, and more.

We can, if we do not forget.

An entire nation has profited from 50 years of the progressive Democratic principles I've spoken of today.

They have helped lift a generation up to the middle class . . . and higher.

Given us the chance to work, to go to college, raise a family, own a house.

To reach heights our own parents would not have dared dream of. Parents like mine. Like so many others who came from foreign lands with nothing but hope and the willingness to struggle.

They asked only for a chance to work and to be protected in those moments that they would not be able to protect themselves.

In my own inaugural last year, I talked about that magnificent generation.

I said that we are the sons and daughters of giants, and then I said this:

"That they were able to build a family, and live in dignity and see one of their children go from behind their little grocery store in South Jamacia where he was born, to occupy the highest seat, in the greatest State, in the greatest Nation in the only world we know . . . is an ineffably beautiful tribute to the magnificence of this American democracy."

And I am not the only one.

A whole nation—Democrats and Republicans alike—are better off today because of Government's refusal to believe that only the rich, the already strong, the well born—the fittest—should survive.

Yes, Democrats and Republicans, but only the Democrats appear to remember.

It would be a desecration of history and a sin against our party's soul—if we too should forget—what we were . . . what we are . . . and what we are supposed to believe

Thank you.

gration bill which the Senate considered last year, and his diligent and effective leadership on this issue is appreciated.

Mr. President, this amendment is straightforward, but it represents more than a sense of the Senate resolution to the constituents in our State of West Virginia. It may save the economic livelihood of producers in our State.

Apples are a major crop in West Virginia and the producers must have a reasonable and stable supply of labor to harvest their crops. The harvesting season is very short, but an adequate labor force must be planned months in advance so that at the time of the picking season, the fruit is harvested without delay. If there are delays, the fruit cannot be salvaged and the crop is lost.

Apple producers in our State have attempted over many, many years to hire Americans to harvest their crops, and they have hired and continue to hire Americans. Some of these domestic workers are West Virginians, but not all of them. Some are workers who travel from State to State to harvest various crops.

Let it be understood, Mr. President, that I am not critical of this segment of our labor force; indeed, the record will show that I have worked diligently over the years as a member of the Senate Committee on Labor and Human Resources to create programs designed to improve and care for the needs of migrant and other agricultural workers. I make no apologies for these programs which address the basic human needs for these hard-working peoples.

But, Mr. President, our State does not supply sufficient workers to harvest apples, and growers have been forced into a situation of hiring foreign labor. In order to hire H-2 alien agricultural workers, the producers must work through the local employment service which recruits workers. If there is an insufficient number of domestic workers available, the U.S. Department of Labor must then certify that a certain number of H-2 workers will be required for that season. The Immigration Service will then authorize the admission of those H-2 workers. That is the process. The point of this is to emphasize that producers must make arrangements to hire agricultural labor, whether domestic or foreign, several months in advance of the first day of harvest. In fact, the work orders anticipating a need for alien workers must go to the employment service early in June for this September's harvest.

The other major requirement in the labor certification process that the producers must meet is the payment of an adequate wage to H-2 workers which does not adversely affect the wages of domestic workers in similar work. The adverse effect wage rate (AEWR) is set by the Department of Labor through regulation.

On January 4, 1983, the U.S. Department of Labor issued a final rule amending its regulations for the certification of nonimmigrant aliens for temporary employment establishing the 1982 adverse effect wage rate for West Virginia and three other States. The Department of Labor issued the rule pursuant to a court order of the U.S. District Court for the District of Columbia in NAACP, Jefferson County Branch, et al. versus Raymond J. Donovan, Civil Action No. 82-2315 (D.D.C. September 3, 1982). The case concerns piece rates for apple harvesting in West Virginia.

The January 4, 1983, rulemaking by the Department of Labor will seriously affect the competitive outlook for West Virginia apple producers because of the exorbitant increase in the 1982 and 1983 adverse effect wage rate. Under the rulemaking, West Virginia fruitgrowers will be required to pay a 17.2-percent increase in the adverse effect wage rate. Under the rulemaking and the Department of Labor methodology, a 10-percent increase would be applied retroactively for 1982, and a 7.2-percent increase would be applied in 1983.

The rulemaking procedure by the Department of Labor was initiated November 19, 1982, with the publication of a proposed rule in the Federal Register. The proposed rule identified four options that had been considered by the Department of Labor. The selection of the most complicated and the one with the most serious, detrimental impact on West Virginia fruit growers was strongly opposed by the growers and by the State of West Virginia and by others who submitted comments during the comment period which expired December 20, 1982.

Clearly, a 17.2-percent increase is unfair and unnecessary. It will put West Virginia producers at a decided disadvantage in this year's fruit marketplace. Perhaps more importantly, the methodology used by the Department of Labor has been soundly criticized by all sides. The validity of the data is questionable. The Labor Department uses data gathered by the U.S. Department of Agriculture, but the sample size is small, and our own West Virginia commissioner of agriculture has formally raised questions about the farm wage data reported in West Virginia on which the adverse effect wage rate was based.

This situation is very difficult for West Virginia fruit producers. In March 1983, the growers protested the retroactive application of the 1982 adverse effect wage rate and the 1983 rate of the Department of Labor. They were subsequently informed that they were ineligible to apply for a temporary labor certification in 1983, thereby prohibiting the availability of nonimmigrant alien agricultural workers.

Representatives of the growers, and the able Senator from West Virginia (Mr. BYRD,) and the Representative from the Second Congressional District of West Virginia (Mr. STAGGERS,) joined me in a personal meeting with the Secretary of Labor, Mr. Donovan, on March 24, 1983. The purpose of the session was to bring this situation to the attention of the Secretary and explore the possibility of administrative relief.

That is where we stand today, Mr. President, and the clock is ticking. The apple harvest in West Virginia is just a few months away, and the work orders must be filed within a few short weeks. Unless some relief is forthcoming, the fruitgrowers in West Virginia will suffer serious economic disadvantage in this harvest season. Without the availability of H-2 workers, the crop may be lost. Historically, there has never been an adequate supply of domestic agricultural labor available in West Virginia to harvest the apple crop. Unless there is some relief in the 17.2-percent increase in the adverse effect wage rate, the producers will be unable to market their crop.

I believe the Department of Labor must reexamine the January 4 rulemaking as it affects West Virginia applegrowers. There is still time, and I hope the responsive and responsible action will be taken.

Mr. BYRD. Mr. President, this is an amendment I have discussed with the two managers of the bill and they have indicated they have thought it over and will accept it. I wish to express my appreciation to them for the consideration that they have given to my amendment.

Mr. KENNEDY. Mr. President, I certainly welcome the Senator's amendment. It certainly appears that there was capricious action by the Department of Labor in this case. I think the amendment of the Senator from West Virginia deals with that and I hope the Senate will agree to it.

Mr. BYRD. I thank the distinguished Senator.

Mr. SIMPSON. Mr. President, Senator BYRD, throughout the deliberations on this bill, has had this very serious problem with the agricultural community in West Virginia with regard to apples, especially apple pickers. This adverse effect wage rate is designed to prevent employment of H-2 agricultural workers from depressing wages and working conditions for U.S. workers. Any increase in the adverse effect wage rate would indicate that the Department of Labor has found the prevailing rate in the area to be substantially higher than the rate being paid to foreign temporary workers. It is an important thing for the

protection of American workers. If this increase for West Virginia apple pickers and those in certain areas of agriculture is inexplicably higher than the increase for those agricultural workers in other areas, it would seem appropriate to accept the amendment, and we will do so.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Wyoming. The increase is 17.2 percent as against something like 2 or 3 percent in other areas. We think it is unfair. I thank both Senators.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia (Mr. BYRD).

The amendment (No. 1272) was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

STATUS OF HAITIANS

Mr. KENNEDY. Mr. President, during the course of our debate on this bill I believe it is essential that we take notice of the special plight of many Haitian refugees and entrants whose immigration status remains in limbo under the provisions of this bill.

When we first proceeded to this bill 2 weeks ago, I offered an amendment to move forward the legalization date contained in the bill, to assure that the legalization program will achieve its goals—and that is to legalize as many undocumented aliens as possible in order to remove this exploited subclass from our society. My amendment also would have specifically included those Haitian refugees and entrants whose status remains to be clarified.

Regrettably, Mr. President, my amendment was not accepted, and the provisions contained in the pending bill fails to address the plight of these Haitians. These Haitian "boat people" have already suffered terribly in fleeing their homeland and being subject to illegal detention. It would be tragic if we did not include them in the legalization program authorized by this legislation.

Federal courts have twice found that the Haitian boat people were illegally imprisoned by the Immigration Service in violation of the Constitution. Most recently, they have held that this detention policy was so selective as to be discriminatory. Beginning in May 1981, under orders of the Attorney General, more than 2,000 Haitians were imprisoned without bond in remote Federal facilities for 15 to 18 months. The Court of Appeals for the 11th Circuit, on April 12, 1983, found that this detention policy was in violation of the fifth amendment of the Constitution, and that the U.S. Government had intentionally discriminated against Haitians in implementing the policy.

Haitian refugees otherwise indistinguishable from this class, arriving prior to the illegal detention program, have already benefited from President Carter's decision to grant them "entrant" status. Fundamental justice demands that the boat people who have fled to our shores seeking safety and who have suffered additionally under illegal detention, but who were not eligible for "entrant" status, be granted similar protections. It is unjust and unnecessarily harsh for the Immigration Service to continue to threaten this small group of Haitian people with forcible deportation to Haiti.

The uniqueness of the situation of the Haitian boat people and the discriminatory treatment they have suffered has been well established. Special provision relating to Haitian refugees has been included in versions of the immigration legislation in both Houses of Congress this year and last. However, these provisions fall short of regularizing the status of Haitian boat people who were subject to the administration's detention policy.

I hope that we will rectify this omission and agree to a comprehensive legalization program that will resolve the legal status of all the Haitian boat people. This goal has the broad-based support of church, civil and human rights groups, trade unions, labor, and legal groups, who have clearly spoken out in support of these important issues.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from the executive committee of the Leadership Conference on Civil Rights, an organization representing over 175 national civil rights and human rights organizations, calling on the Senate to enact a comprehensive legalization program and maintain judicial review of asylum determinations, and a related memorandum.

The being no objection, the letter and attachment were ordered to be printed in the RECORD, as follows:

LEADERSHIP CONFERENCE
ON CIVIL RIGHTS,
Washington, D.C., April 28, 1983.

DEAR SENATOR: We, the undersigned organizations, traditionally concerned with civil rights and civil liberties, are writing to you about a matter of the utmost urgency. We are joined together in a common concern that the Simpson immigration legislation, S. 529, now being considered by Congress must include a comprehensive legalization program as an integral part of any meaningful reform of our immigration laws. Second, the heretofore guaranteed right of all persons seeking political asylum in this country to judicial review of administrative agency action must be maintained. The right of access to the courts is essential to insure fair and non-discriminatory enforcement of the law.

We therefore urge that you support when the bill comes to the Senate floor for debate: (1) amendments providing for a comprehensive legalization program and (2) an amendment to restore full judicial review.

In the spirit of the recommendations of the Select Commission on Immigration and Refugee Policy, we believe that all otherwise eligible undocumented persons present in the U.S. as of January 1, 1983, should be granted permanent legal status in this country.

Such a comprehensive legalization program is also the most just and most practical solution to the unique plight of the Haitian refugee "boat people", who are still faced with forcible deportation to Haiti. Federal courts have twice found that these Haitian boat people were illegally imprisoned by the Immigration Service in violation of the U.S. Constitution; most recently they have held that this detention policy was so selective as to be discriminatory. Though they had committed no crime, more than 2,000 Haitians were imprisoned without bond in isolated federal facilities for between 15 and 18 months beginning in May 1981, under orders of the Attorney General. The 11th Circuit Court of Appeals on April 12, 1983, found that this detention policy was in violation of the Fifth Amendment of the Constitution, and that the U.S. Government had intentionally discriminated against Haitians in implementing the policy.

Other Haitian refugees otherwise indistinguishable from this class, arriving prior to the illegal detention program, have already benefitted from President Carter's decision to grant them "entrant" status. Fundamental justice demands that the boat people who have fled to our shores seeking safety and who have suffered additionally under illegal detention, benefit from these same protections. It is simply unjust and cruel for the Immigration Service to continue to threaten this small group of Haitian boat people with forcible deportation back to the Haiti from which they fled almost two years ago.

The undersigned organizations join in endorsing a legalization program granting permanent residency to all eligible undocumented persons arriving in the U.S. as of January 1, 1983. However, should a partial legalization program not include the previously-detained Haitian boat people, elementary justice demands that separate provision be made in the legislation granting legal status to Haitians arriving before January 1, 1982, thereby recognizing their unique plight and suffering.

Thank you for carefully considering our recommendations regarding the necessity of a truly comprehensive legalization program and of maintaining fundamental rights of judicial review of administrative agencies, when the Senate considers this exceedingly important legislation.

Sincerely,

BENJAMIN L. HOOKS,
Chairperson.
RALPH G. NEAS,
Executive Director.

THE PLIGHT OF THE HAITIAN REFUGEES AND THE RESPONSE OF THE NATIONAL EMERGENCY COALITION FOR HAITIAN REFUGEES

Since 1958, approximately one-eighth (⅛) of the population of Haiti has fled from their homeland to escape the cumulative effects of the twenty-five (25) years of Duvalier family rule. A small part of this dias-

all Members could say, was directed toward the extent of the candidate's mandate from the President and the extent of his freedom to direct the operations of EPA.

We were assured and we believed Mr. Ruckelshaus on these points. He indicated that he would be given as much autonomy as any Presidential nominee might expect in his post as EPA Administrator.

Mr. President, I reemphasize that I shall cooperatively and constructively work with Mr. Ruckelshaus and his staff. All Members, I hope, of the Senate and of the House of Representatives will do that.

I believe that under his leadership this Agency can restore to itself the good reputation that it had in the past.

I do not think it is necessary, but I urge my colleagues in the Senate to give Mr. Ruckelshaus a vote of confidence at this time.

I yield the floor.

Mr. STAFFORD. Mr. President, I am pleased now to yield to my most able friend from Rhode Island, Senator JOHN CHAFEE.

Mr. CHAFEE. Mr. President, I want to thank our distinguished leader of the Environment and Public Works Committee and, of course, the distinguished ranking member. I am pleased to join with both of them in urging our colleagues to support the nomination of Bill Ruckelshaus to be Administrator of the Environmental Protection Agency. Rarely, it seems to me, does some person come before us that we can be 100 percent certain that he is the right one for the job and this is one of these times.

The Committee on Environment and Public Works held 3 days of very thorough hearings. We heard not only from the nominee for 2 days but also from outside witnesses who portrayed for us the many issues that will have to be considered by the Environmental Protection Agency during the next 18 months.

Bill Ruckelshaus was the first Administrator of EPA in 1970. He organized the Agency, staffed it and ran it for 2½ years. He was awarded extremely high marks for the job that he did.

We know Mr. Ruckelshaus to be a man of high integrity and a dedicated public servant. He has performed ably at the Justice Department and at the other public service jobs he has held. Since leaving Government, Mr. Ruckelshaus has been vice president of Weyerhauser where he has been involved in the day-to-day operations of one of the Nation's largest timber companies.

The job of Administrator requires managerial skills, understanding of the issues, and a commitment to protecting the environment. Bill Ruckelshaus has these three ingredients. President Reagan has made an excellent choice to restore credibility to the EPA. The Committee on Environment and Public Works recommended unanimously his confirmation. His appointment will reflect favorably on the President, on the Senate, and on our country.

I would just like to conclude by saying that the Committee on Environment and Public Works has unanimously recommended the confirmation of Mr. Ruckelshaus and his appointment, in my judgment, will reflect favorably on the President, it will reflect favorably on the Senate and it will reflect favorably on our country. I wish to thank the Chair.

Mr. STAFFORD. Mr. President, I want to thank the distinguished Senator from Rhode Island for his statement. He is a most valuable member of the committee.

The PRESIDING OFFICER. Who yields time?

Mr. STAFFORD. Mr. President, I yield such time as he may desire to the distinguished Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I wish to thank the able and distinguished chairman of the committee, Senator STAFFORD.

I wish to voice my support for confirmation of William D. Ruckelshaus as Administrator of the Environmental Protection Agency.

Mr. Ruckelshaus is an individual of unquestioned integrity and demonstrated competence. I commend President Reagan on his excellent choice to take over the difficult job of running this important Government agency.

Without doubt, there is overwhelming support in America today for a clean, safe environment. The concern for our environment is not the sole purview of those who commonly bear the label of "environmentalists" or "environmental groups." Rather, it is the concern of a consensus of the public, Congress, the administration, and even the industrial community. We must all be committed to a national policy of environmental protection, and indeed, I believe such a commitment thrives today.

The real question for debate and discussion is not so much whether there is a commitment to protect the environment, but rather what is the most desirable and effective approach in implementing various environmental policies. I wish that we could live and work without affecting the Earth's fragile ecology. Unfortunately, that is not possible. What we can do—what we must do—is protect our environment as best we can under the constraints imposed by the needs of a modern society. This requires the maintenance of a careful balance. While it is clear that errors in this balance must side with the protection of the environment, it should be equally clear that reasonable compromises can and must be made.

Mr. President, it is clear from his record of public service and his career in the private sector that William Ruckelshaus understands the careful balance which must be pursued in environmental policies. As our Nation's first Administrator of the EPA, and also as Assistant Attorney General in Charge of the Civil Division, Deputy Attorney General, and Acting Director of the FBI, Mr. Ruckelshaus has demonstrated that he possesses the capabilities for making tough, responsible decisions on difficult questions, including complex environmental issues. I am confident that he will restore credibility to our national environmental policy and pursue a commonsense, reasoned approach to the protection of our environment.

Mr. President, I hope that Mr. Ruckelshaus will be confirmed by the Senate and that he will enjoy the support of Congress in the future. Clearly, it is necessary that the administration, including the Administrator of the Environmental Protection Agency, and Congress work together if we are to successfully cope with the important environmental issues before our Nation.

Mr. President, I thank the Senator very much.

Mr. STAFFORD. Mr. President, the distinguished Senator has made a very able statement.

Mr. RANDOLPH. Mr. President, will the Senator yield to me if time is now in his control?

Mr. STAFFORD. I yield.

Mr. RANDOLPH. Mr. President, I wish to add to the chairman's commendation of the Senator from South Carolina for being with us and having made this effective statement.

Mr. STAFFORD. Mr. President, I am sure we are most grateful for the Senator's comments, I say to my long time friend and much admired colleague on the committee, Senator RANDOLPH.

I am pleased now to yield such time as he may require to my most able colleague, the distinguished Senator from Washington, Senator GORTON.

Mr. GORTON. I thank my friend, the distinguished colleague from Vermont.

Mr. President, it is with much pleasure and a great deal of pride that I rise in support of the nomination of William Ruckleshaus to be the Administrator of the Environmental Protection Agency. As a Senator from Washington State, I am happy to be able to count Bill among my constituents and my friends.

When the name of William Ruckleshaus first surfaced as a possible nomi-

nee for the difficult position as the Administrator to restore the EPA to an effective agency worthy of the public's confidence, many of us, to quote my distinguished colleague, Senator JACKSON, "did not think that the country could be so lucky." And, we had good reason to think that way. If Bill were to return to Washington for this particular job, he would do so at great expense to himself and his family and with little expectation of reaping the kind of personal reward that I am sure he felt in organizing the EPA initially. But Bill has a deep sense of public duty, and I suspect his appreciation of the importance of the public's confidence in Government, and an understanding of the importance of this agency, in particular, in light of such issues as the growing threat of toxic wastes, were enough to tip the scales for him.

Mr. President, the American people are very fortunate to count among themselves individuals of the talent and integrity of Bill Ruckleshaus. I hope that we can all work together to help Bill in the difficult task that lies ahead of him.

I urge those who have done battle with the EPA in the last 2 years to join in a cooperative effort with Mr. Ruckleshaus, his staff, and the Congress to address the pressing environmental issues for which we must craft answers in this decade. Bill faces an incredibly difficult job, both administratively and substantively. I do not envy him. But it serves none of our interests in a healthful environment to make his job more difficult.

Mr. President, I wish my friend well, and I commend him for, and marvel at, his capacity to serve his country when he is called upon to do so, regardless of the personal sacrifice involved. President Reagan must be congratulated for his choice. I can think of no one better suited to clean up the Environmental Protection Agency than William Ruckleshaus.

Mr. RANDOLPH. Mr. President, will my colleague yield?

Mr. GORTON. I yield.

Mr. RANDOLPH. Will my colleague yield?

Mr. GORTON. I will.

Mr. RANDOLPH. In our Committee on Environment and Public Works, as our able chairman knows, we have worked through the years on a nonpartisan approach to matters of this kind, not only as to personalities involved, but as to legislative matters as well. For the years that you were with us as a member of this committee, we are grateful for your contributions.

Mr. GORTON. I thank my friend from West Virginia.

Mr. STAFFORD. As chairman of the Committee on Environment and Public Works, I always take great pride in the fact the majority leader is a member of that committee and has been throughout my service and I am pleased now to yield to the majority leader whatever time he wishes.

Mr. BAKER. I thank the Senator. Mr. President, I especially thank my chairman, Senator STAFFORD, for the opportunity to speak on behalf of this nominee.

I also thank my former chairman, the present ranking minority member, for the good service that he has given in this field, and I remember with such pleasure my service on this committee under the chairmanship of Senator STAFFORD and, previously, Senator RANDOLPH.

It is with special pleasure that I speak in favor of William Ruckelshaus to be Administrator of the Environmental Protection Agency. I have known Bill Ruckelshaus for a long time. Having worked with him before his first tenure at EPA, while he was the first Administrator of the newly formed EPA, and since that time, I have come to know him even better and I have a high regard for his ability and character, and I have the highest regard for his ability and great respect for his environmental convictions.

As a member of the Committee on Environment and Public Works since I came to the Senate, I am proud to have participated in the creation and evolution of our environmental laws. Those laws are important to all of us. We, who helped craft those laws, want to see them administered faithfully and effectively.

I joined Ed Muskie, Chairman RANDOLPH, and Chairman STAFFORD, and others in debating the merits of forming the Environmental Protection Agency, a landmark organization which pulled environmental components from across the Federal Government to be housed under one roof—at EPA. As we deliberated, we very carefully chose the name and charter, tailoring the functions to meet a real need in this country for protection and enhancement of the environment. Bill Ruckelshaus met a formidable challenge at EPA in those early days—putting together an Agency from disparate parts, creating its own identity, and capitalizing on the strong constituency who supported the goals and objectives of environmental protection. Even at that time, Bill Ruckelshaus was involved in shaping and forming what became a fundamental national commitment to the improvement of the quality of our environment, the birth of that Agency. He became its first Director.

I think all of us can look back on that era and be proud of the accomplishments in the initial charter and the initial implementation of that legislation under the guidance of Bill Ruckelshaus. So it was a matter of particular concern to me, indeed, a great distress, when I saw EPA fall on evil days, at least in terms of the conflict that swirled around it, because the Agency does not need that. EPA does not need controversy and uncertainty added to its burdens, which are significant enough. And after it became clear that there would be and was a vacancy at the top of the Agency, I talked to the President of the United States about the possibility of enlisting Bill Ruckelshaus, who was once before in this job.

One of the first tasks to be undertaken when EPA was formed was to establish the credibility of the Agency. As he did in the early 1970's, Bill Ruckelshaus, if confirmed, must go back to EPA and reestablish that credibility. I am confident that under his leadership and with his strong commitment to the environment, he will be able to meet that challenge and get the Agency moving again.

It gives me a great deal of pleasure to speak for the great contribution Bill Ruckelshaus has already made and to express my unreserved confidence in the contribution he will continue to make.

In testimony before the committee, Bill Ruckelshaus conveyed his strong commitment to the goals and objectives of the various laws he must administer at EPA and his willingness to vigorously enforce those laws.

I, for one, am delighted to offer my full support and assistance to William D. Ruckelshaus as we consider his confirmation as Administrator of EPA. I applaud the President for his choice of William Ruckelshaus to be Administrator of EPA.

Mr. STAFFORD. Mr. President, I am now very pleased to yield such time as he may require to the distinguished Senator from New Hampshire (Mr. HUMPHREY).

Mr. HUMPHREY. I thank my colleague and neighbor from Vermont.

Mr. President, I wish to express my support for the confirmation of William D. Ruckelshaus as Administrator of the Environmental Protection Agency. As a member of the Environment and Public Works Committee, I have carefully reviewed the record of Mr. Ruckelshaus and have questioned him both privately and in confirmation hearings, and I am convinced that he will do an excellent job of running this vital agency.

I am particularly heartened by Mr. Ruckelshaus' statements on the issue of acid rain: He recognizes that acid rain is a real problem, in contrast to his predecessor who viewed acid rain as a nonproblem. Mr. Ruckelshaus has promised me and other members of the committee that he will undertake a thorough review of the administration's position on acid rain as one of his highest priorities. It is my sincere hope that as a result of this review, the administration will change its

the leadership conference, as well as the public statement issued by southern Florida civil organizations, an editorial that appeared in the New York Times, and a recent report from that newspaper about the decision last month of the 11th Circuit Court of Appeals.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LEADERSHIP CONFERENCE
ON CIVIL RIGHTS,
Washington, D.C., April 28, 1983.

DEAR SENATOR: We, the undersigned organizations, traditionally concerned with civil rights and civil liberties, are writing to you about a matter of the utmost urgency. We are joined together in a common concern that the Simpson immigration legislation, S. 529, now being considered by Congress must include a comprehensive legalization program as an integral part of any meaningful reform of our immigration laws. Second, the heretofore guaranteed right of all persons seeking political asylum in this country to judicial review of administrative agency action must be maintained. The right of access to the courts is essential to insure fair and non-discriminatory enforcement of the law.

We therefore urge that you support when the bill comes to the Senate floor for debate: (1) amendments providing for a comprehensive legalization program and (2) an amendment to restore full judicial review.

In the spirit of the recommendations of the Select Commission on Immigration and Refugee Policy, we believe that all otherwise eligible undocumented persons present in the U.S. as of January 1, 1983, should be granted permanent legal status in this country.

Such a comprehensive legalization program is also the most just and most practical solution to the unique plight of the Haitian refugee "boat people", who are still faced with forcible deportation to Haiti. Federal courts have twice found that these Haitian boat people were illegally imprisoned by the Immigration Service in violation of the U.S. Constitution; most recently they have held that this detention policy was so selective as to be discriminatory. Though they had committed no crime, more than 2000 Haitians were imprisoned without bond in isolated federal facilities for between 15 and 18 months beginning in May 1981, under orders of the Attorney General. The 11th Circuit Court of Appeals on April 12, 1983, found that this detention policy was in violation of the Fifth Amendment of the Constitution, and that the U.S. Government had intentionally discriminated against Haitians in implementing the policy.

Thank you for carefully considering our recommendations regarding the necessity of a truly comprehensive legalization program and of maintaining fundamental rights of judicial review of administrative agencies, when the Senate consider this exceedingly important legislation.

Sincerely,

BENJAMIN L. HOOKS,
Chairperson.
RALPH G. NEAS,
Executive Director.

SOUTHERN FLORIDA CIVIC ORGANIZATIONS APPEAL FOR COMPREHENSIVE LEGALIZATION AS ESSENTIAL TO IMMIGRATION REFORM

We, the undersigned, representing communities and organizations in southern Florida, are writing to you about a matter of the utmost urgency. We are joined together in a common concern that the Simpson-Mazzoli immigration legislation now being considered by Congress must include a comprehensive legalization program as an integral part of any meaningful reform of our immigration laws. Second, the heretofore guaranteed right of all persons seeking political asylum in this country to judicial review of administrative agency action must be maintained. The right of access to the courts is essential to insure fair and non-discriminatory enforcement of the law.

In the spirit of the recommendations of the Select Commission on Immigration and Refugee Policy, we believe that all otherwise eligible undocumented persons present in the U.S. as of January 1, 1983, should be granted permanent status in this country.

Such a comprehensive legalization program is also the most just and most practical solution to the unique plight of the Haitian refugee "boat people", who are still faced with forcible deportation to Haiti. Though they had committed no crime, more than 2,000 Haitians were imprisoned without bond in isolated federal facilities for between 15 and 18 months begining in May 1981, under orders of the Attorney General. The 11th Circuit Court of Appeals in Atlanta on April 12, 1983, found that this detention policy was in violation of the Fifth Amendment of the U.S. Constitution, and that the U.S. Government had intentionally discriminated against Haitians in implementing the policy.

Other Haitian refugees otherwise indistinguishable from this class, arriving prior to the illegal detention program, have already benefited from President Carter's decision to grant them "entrant" status. Fundamental justice demends that the boat people who have fled to our shores seeking safety and who have suffered additionally under illegal detention, benefit from these same protections. It is simply unjust for the Immigration Service to continue to threaten this small group of Haitian boat people with forcible deportation back to the Haiti from which they fled almost two years ago.

The undersigned organizations join in endorsing a legalization program granting permanent residency to all eligible undocumented persons arriving in the U.S. as of January 1, 1983. However, should a partial legalization program not include the previously detained Haitian boat people, elementary justice demands that separate provision be made in the legislation granting legal status to Haitians arriving before January 1, 1982, thereby recognizing their unique plight and suffering.

Thank you for carefully considering our recommendations regarding the necessity of a truly comprehensive legalization program and of maintaining fundamental rights of judicial review of administrative agencies, during the mark-up of this exceedingly important legislation.

HAITIANS' LAWYERS HAIL COURT RULING

MIAMI, April 13.—Lawyers who led a long fight to have Haitian refugees released from Government detention centers today hailed an appeals court decision that the Government policy was discriminatory.

"We think this is going to be a landmark case in the immigration field," said Ira Kurzban, who argued for the Haitians last

year before Federal District Court Judge Eugene Spellman.

The United States Court of Appeals for 11th Circuit, in Atlanta, on Tuesday rejected an appeal by the Immigration and Naturalization Service of Judge Spellman's ruling on June 18 that the detention of about 1,800 Haitians was illegal.

The appeals court went further than Judge Spellman, who found no specific discrimination against Haitians as a race. The three-judge appeals panel decided there was "a stark pattern of discrimination."

"DENIED EQUAL PROTECTION"

Judge Phyllis Krayitch wrote, "There was ample unrebutted evidence that plaintiffs were denied equal protection of the laws."

The appeals court also agreed the detained Haitians had not been adequately informed of their rights to petition for political asylum and seek legal counsel.

The decision "establishes the right of the protection of the U.S. Constitution to aliens who have been incarcerated," Judge Kurzban said. "It has substantial implications for Salvadorans, Nicaraguans—anyone else coming into the States."

Dale Schwartz, a lawyer who represents Cubans jailed in the Atlanta Federal penitentiary, said the appeals court ruling "has far reaching effects on future immigration policy, particularly as it applies to persons seeking political asylum."

"It makes it clear that the determination on asylum should not be a political decision on the part of whatever administration happens to be in office at the time," he said.

PROFESSOR PLANNED STRATEGY

Bruce Winick, a law professor at the University of Miami who planned strategy for the Haitians at the hearings before Judge Spellman, said: "This goes considerably further than Judge Spellman did. It really vindicates the position we have taken all along."

The appeals court wrote: "Although we hold that the executive has the power when properly delegated to fashion such policies as are necessary to protect our borders and ensure orderly entry of aliens, those policies must be administered in nondiscriminatory manner."

The court ordered Judge Spellman to take whatever measures were necessary to guarantee "that all aliens, regardless of their nationality or origin, are accorded equal treatment."

The Haitians ordered released by Judge Spellman will remain free awaiting immigration hearings.

Professor Winick said the new ruling could affect about 100 Haitians who have arrived since the others were freed. The new arrivals are being held at Miami's Krome Avenue detention center. The professor said the decision should ensure they are advised of their rights and granted access to lawyers.

About 30 Nicaraguans and 130 Salvadorans are also held at the detention center.

[From the New York Times, May 12, 1983]

REFUGEES AND REFOULEMENT

There's a hard question to be asked about the thousands of undocumented aliens from Afghanistan or Haiti or El Salvador seeking a haven in the United States: Are they legitimate refugees?

If they have a well-founded fear of persecution in their home country, the answer is yes and they are entitled to sanctuary, or asylum as it is formally called. To send them home would risk committing the unforgivable diplomatic sin of refoulement—forcibly subjecting them to peril.

But what if they are not legitimate refugees? Then they are just another form of gate-crasher, ready to confuse refute and subterfuge. To send them home would be only fair, signaling to other would-be illegal entrants that Americans are compassionate but not suckers.

All that raises an even harder question, one that the Senate must answer as it takes up the Simpson-Mazzoli immigration reform bill: How should Government decide who is a refugee? On this potentially life-or-death point, the generally admirable Senate bill is harsh, hasty and in need of amendment.

The who-is-a-refugee decison is now made in case-by-case hearings, the results of which may be appealed to the courts. Until the Refugee Act of 1980, that meant a moderate backlog of 5,800 cases. Since then, however, claims for asylum have shot up. The backlog now exceeds 120,000 cases. How should Washington treat all those aliens while their cases are pending? It's a tormenting problem.

To release them and let them live and work in the community could mock equity; final determinations often take years. Even if their refugee claims were ultimately rejected, the example would encourage specious or dilatory claims. The other possibility is to incarcerate applicants pending adjudication, as the Administration has done with Haitians and now with some Afghans. That's even worse. To treat as criminals people who might well be legitimate refugees is to punish victims.

There is an obvious remedy: Speed up the hearing process, which is just what the Senate is heading toward. But the Senate bill streamlines procedure too harshly.

Decisions verging on refoulement ought to involve some independent judgment. The hearing examiners should stand apart from the executive branch, or their findings should be reviewable by the courts. But the Senate bill, reflecting fear of ever more "refugees," provides no independence and almost no room for appeal. That could have merciless results.

Imagine a Haitian washed up on a Florida beach. A hearing examiner might reject his claim for asylum, in deference to the State Department's finding that Haitians generally are not subject to persecution. But what if this particular Haitian had plenty of reason to fear persecution?

The Senate bill offers him little recourse. But Senator Edward Kennedy would, with sensible amendments to create independent hearing officers and to preserve limited rights of appeal. The Simpson-Mazzoli bill is good; these amendments would make it better.

Mr. RIEGLE. Mr. President, I would like to join my colleagues in expressing my concern for the Haitian refugees who would not be covered by this legalization program.

I believe that these Haitians have unduly suffered from disciminatory treatment, resulting in prolonged imprisonment, separation from their families, and denial of fundamental due process protections, and, therefore, deserve special consideration.

In fact, the 11th Circuit Court found in its recent decision in Louis against Nelson that:

All told, the plaintiffs mustered an impressive array of witnesses and an equally impressive number of documents to demonstrate circumstantially, and to an extent, directly, intentional government discrimination against Haitians.

This evidence, in addition to the statistical evidence, was unrebutted except for the Government's testimonial evidence, which can best be termed "mere protestation."

Specifically, the court found that:

Evidence at trial identified significant restrictions on Haitian access to legal counsel, restrictions on Haitian contact with relatives and friends in the Miami community, and efforts to prevent Haitian refugee center attorneys from approaching Haitians to inform them of their legal rights.

Such actions have already led to the deportation of several Haitians under proceedings which the administration itself has admitted were faulty. The cases of many others may have been prejudiced beyond repair.

Mr. President, many prominent national leaders of church, civil rights, and labor organizations, as well as their corresponding representatives from south Florida, have requested that the Haitians be granted special protection in light of these abuses.

I would like to join them and my other colleagues in requesting that our Senate Members to the Conference Committee on this bill take these concerns into consideration in their work with the House Members. As the Leadership Conference on Civil Rights has stated:

Elementary justice demands that separate provision be made in the legislation granting legal status to Haitians arriving before January 1, 1982, thereby recognizing their unique plight and suffering.

Mr. SIMPSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have been told unofficially by the manager of the bill that no other Senator is prepared to offer amendments today. May I inquire if the manager is ready for us to leave this bill for this day and to continue the work tomorrow?

Mr. SIMPSON. Mr. President, I would say to the majority leader that that is the situation as I see it. We have exhausted efforts to bring further sponsors of amendments to the floor, but we have also thinned out the time agreements between the sponsors and the managers, and we should be able to complete our work tomorrow, as the majority leader has stated.

Mr. BAKER. I thank the manager. He has covered an extraordinary amount today. I commend the chairman of the committee (Mr. SIMPSON)

Mr. BAKER. Very well. I understand we are not quite ready to do that. The principals involved in that legislation are either on their way to the floor or will be here shortly. So those who may hear these remarks should know that it looks like we are coming to swift conclusion of the Ruckelshaus debate and if they want to come to the floor and participate, this is the time to do so because, otherwise, I will, with the concurrence of the chairman and ranking member, ask the Senate to leave the executive session shortly and to go back to the immigration measure. I thank the Senator for yielding.

Mr. STAFFORD. Mr. President, I know of no further current request to speak on this side and shortly I will be willing to yield back the majority side's time if my colleague is ready to do so for the minority.

A rollcall vote having been called for and agreed to, I assume that will be tomorrow at about 2 in the afternoon. I make that as a parliamentary inquiry.

The PRESIDING OFFICER. The Senator is correct.

Mr. STAFFORD. I thank the Chair. I simply want to say—then I will yield to my able friend from West Virginia—that I hope tomorrow the Senate will give Bill Ruckelshaus a rousing endorsement by a unanimous vote confirming him as the next Administrator of the Environmental Protection Agency. I just hope thereafter that he can live up to his advance billing that he has had in our committee and here on the floor of the Senate.

I look forward, as I am sure all of the committee do, to working with him and I heartily concur in the remarks of my most able friend and colleague, the ranking minority member, with respect to the way the committee has been able to operate in a bipartisan or nonpartisan way. I am sure we will continue to do so with Mr. Ruckelshaus as the Administrator of the Environmental Protection Agency.

So, whenever the ranking member is ready to yield his time, I will do likewise for the majority.

Mr. RANDOLPH. Mr. President, as I yield back the time allotted to the minority, I wish the record to indicate that at the time the report came to me that President Reagan was in the process of nominating Bill Ruckelshaus for this position, I was contracted by one of the members of a television network. It would not be my practice to make the comment that I made at that time, generally, but to wait until the nomination process was completed. But on that occasion, I said, in my opinion, if the President nominated him, that I was in fullest support of that action because I felt that he was the right man at the right time for a difficult task.

I restate that today. I am sure that the confidence of our committee members will be shared hopefully by the confidence of all of the Senate. I look back to a few votes, I say to the majority leader, during my years on Capitol Hill when we had matters of importance before us when there was not a dissenting vote on certain matters. I remember on March 9, 1933, when the President called us into a special session to pass the Emergency Banking Act, and I will say that in the House, of which I was a Member, Republicans and Democrats were joined together and not a dissenting vote on that legislation was cast at that time.

Even in the Senate, the vote was 73 to 7 to pass that important piece of legislation to help restore the confidence of the American people in our financial institution. Here, of course, we are thinking about the restoration of the confidence of our people in a very important agency of the Federal Government.

So I allude to this perhaps with no historical interest involved, but to indicate that there are times in this body when we must not have a carping criticism for criticism per se. We must join effectively in moving the Government forward to discharge its responsibility which is always to the American people as a whole.

Mr. STAFFORD. Mr. President, I could not agree more with what my most able friend from West Virginia has just said. I think he would agree with me that, at least in the years that I have been on the committee, we examined Mr. Ruckelshaus more thoroughly, more meticulously, and we had him in front of the committee longer and through more intense questioning than any other nominee I can recall. Does my friend agree with me on that?

Mr. RANDOLPH. Yes, I completely agree.

Mr. STAFFORD. I am glad to yield at this point to the distinguished Senator from Indiana, Senator LUGAR.

Mr. LUGAR. Mr. President, I would add to the recorded words already spoken by my distinguished colleague from Vermont and my distinguished colleague from West Virginia my own comments about the nomination and confirmation of William Ruckelshaus. He is a Hoosier-born man of great distinction who served so well the government of our State and who has served the Nation in many capacities, as has been noted.

I would simply say, from a personal standpoint, that he has been a close friend from boyhood, a person in whom I have great trust and admiration. I believe he will bring new vigor to the search for strong environmental policies, a firmness and fairness in the administration of the EPA, and really considerable new dynamics to the ways in which we discuss the environment, not as a threat to economic progress or to other goals that are important to us, but rather as an important goal which must move along with these national aims and will do so, given his wisdom, his evenhandedness, and his ability to walk around the table and see many sides to the issue while coming down firmly on the side which I believe most of us will concur on most occasions is right.

I simply want to add that I will vote with pride for his confirmation. I look forward to supporting him in the good administration of his office.

I thank the distinguished Senator from Vermont.

Mr. STAFFORD. Mr. President, I thank the distinguished Senator from Indiana for his remarks.

I say to my most able friend from West Virginia that at this time I am ready to yield back the majority's time if he is willing to do the same on his side, especially in the light of the unanimous-consent request that Members be allowed to insert their remarks in the RECORD.

Mr. RANDOLPH. Mr. President, we are delighted to cooperate. I yield back the time allotted to the minority.

Mr. STAFFORD. I yield back the time allotted to the majority.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, since the time has been yielded back, and since the vote ordered today will not occur until tomorrow, I ask now that the Senate return to legislative session.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

IMMIGRATION REFORM AND CONTROL ACT OF 1983

The PRESIDING OFFICER. The Senate will resume consideration of the unfinished business, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 529) to revise and reform the Immigration and Nationality Act, and for other purposes.

The Senate resumed consideration of the bill.

Mr. BAKER. Mr. President, the manager of this measure, the distinguished Senator from Wyoming (Mr. SIMPSON), is on his way to the Chamber and should be here shortly. It is hoped that we can complete all or most of the debate on this measure today, although votes which may be ordered today will not occur until after 2 p.m. tomorrow.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the time consumed during the previous quorum call and the current quorum call not be charged to either side, under the terms of the previous time agreement.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, as to the status of matters at the present moment, we have a situation in which it was thought that the Ruckelshaus nomination debate would last until approximately 3 p.m.

There are between four and seven amendments we might process today. I express to my colleagues who are cloistered in their chambers that the Senator from Massachusetts (Mr. KENNEDY) and the Senator from Wyoming (Mr. SIMPSON) are here waiting for them to come forward.

There is a time agreement, and tomorrow, not later than 10 p.m., we will have a final vote on this issue, and there will be stacking of votes on amendments we will handle today.

I ask unanimous consent that the DeConcini-Wilson amendment—which I believe was called up on Thursday—be set aside as the pending business until tomorrow, when the principal sponsor, Senator WILSON, will be present. I do not believe Senator DECONCINI will be present. That amendment is acceptable.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, the Immigration and Nationality Act allows alien crewmembers to enter the United States for a maximum period of 29 days. It also allows a crewmember to start a new 29-day period whenever he has gone to a foreign country on a normal voyage and returned to the United States. Since the enactment of the relevant sections, U.S.-flag fish processing vessels have begun operations on the high seas using some alien crew. Because the vessels do not call at foreign ports, but spend several weeks on the high seas, the crewmembers are not allowed to start a new 29-day period when they land at a U.S. port. Because these lengthy processing voyages serve the same purpose as a merchant vessel voyage to a foreign port, can we view the act as allowing new 29-day periods?

Mr. SIMPSON. Yes; the Immigration and Naturalization Service is authorized to treat such legitimate fish processing voyages by U.S.-flag vessels as foreign for the purposes of allowing crewmembers to begin another 29-day period. The crewmembers would, of course, continue to be required to meet all other requirements of the law, including being bona fide nonimmigrants.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. To be charged against which side?

Mr. SIMPSON. I ask unanimous consent that under the present circumstances the time consumed during the requested quorum call not be charged to either side under the time agreement of the bill which I believe is 2 hours equally divided.

The PRESIDING OFFICER. The Senator is correct.

Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

(Mr. KASTEN assumed the chair.)

Mrs. HAWKINS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1267

(Purpose: To authorize an immigration emergency revolving fund of $35,000,000 to be used to provide for an increase in border patrol or other enforcement activities of the Service, and for reimbursement of State and localities in providing assistance in meeting an immigration emergency)

Mrs. HAWKINS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mrs. HAWKINS) proposes amendment numbered 1267.

At the appropriate place in the bill add:

SEC. . There are authorized to be appropriated to an immigration emergency revolving fund, to be established in the Treasury, $35,000,000, to be used to provide for an increase in border patrol or other enforcement activities of the Service and for reimbursement of State and localities in providing assistance as requested by the Attorney General in meeting an immigration emergency, except that no amounts may be withdrawn from such funds with respect to an emergency unless the President has determined that the immigration emergency exists and has certified such fact to the Judiciary Committees of the House of Representatives and of the Senate.

Mrs. HAWKINS. Mr. President, the spring of 1980 marked the beginning of the Cuban boatlift. At that time tens of thousands of undocumented Cubans began arriving in the United States weekly. By the end of the boatlift, 6 months later, over 150,000 Cubans had fled Castro's Cuba with his active encouragement, and they inundated south Florida. The cost of this boatlift to Federal taxpayers is estimated conservatively at $1 billion. It continues to cost in excess of $100 million each year—to say nothing of the strain on local resources and the impact of increased crime on local communities. Although I am committed to preserving the United States status as a haven for fleeing persecution, it is clear that this exodus was a disaster, and we in Florida are still reeling from the impact of that disaster 3 years later.

Most observers agree now that the Cuban immigration emergency was poorly handled. Washington sent conflicting signals regarding our views of the emergency toward the Cuban Government, toward those seeking to leave Cuba, and toward those in the United States seeking to pick them up. Federal agencies coping with the problem operated without a clear sense of purpose. There was confusion over what Federal enforcement agencies had what powers to act. And there was reluctance in many agencies to reprogram their funds for this contingency.

While we did it the hard way, we have gained some valuable experience from the Cuban boatlift. Over the last year, the administration has been developing a contingency plan to deal with immigration emergencies. That plan was recently completed. It clearly outlines the options and authorities of those agencies called on in the event of another immigration emergency. Although the plan draws on the experience of the 1980 Cuban boatlift, it has been drafted so that it applies to any kind of immigration emergency. I have had an opportunity to review this plan, and while I believe that the President needs additional authority to handle such emergencies, the current plan will greatly enhance the ability of the Federal Government to deal with such situations in a timely and effective manner.

Having a concrete plan, well thought out in advance, is essential. However, implementing it requires immediate access to funds. During the Cuban boatlift in 1980, the lack of adequate funding at the outset of the emergency compounded the problems created by the boatlift. Local agencies were reluctant to use their funds for an unforeseen contingency fearing they had no right to do so or would not be reimbursed.

My amendment addresses the problem of funding. It sets up a fund of $35 million that can be drawn on in the event that the President declares an immigration emergency. It does not expand President's powers to deal with such an emergency. It provides him with the financial resources to employ his existing authorities effectively and promptly. The lack of funding for the immigration emergency contingency plan is its fundamental deficiency, and until the problem of adequate funding is solved the plan amounts to little more than a hollow, time-consuming exercise.

Mr. President, there is one final point that I would like to emphasize regarding my amendment: It will have no effect on the size of the Federal

H.R. 1983. An act to amend certain housing and community development laws to provide emergency mortgage assistance to homeowners and emergency shelter for the homeless; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 2587. An act to authorize appropriations to the Department of Energy for civilian research and development programs for the fiscal year 1984; to the Committee on Energy and Natural Resources.

H.J Res. 229. Joint Resolution to authorize and request the President to issue a proclamation designating April 22 through April 28, 1984, as "National Organ Donation Awareness Week"; to the Committee on the Judiciary.

H.J Res. 234. Joint Resolution designating the week beginning June 19, 1983, as "National Children's Liver Disease Awareness Week"; to the Committee on the Judiciary.

HOUSE BILL PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 2066. An act authorize appropriations to the National Science Foundation for fiscal year 1984;

MEASURE PLACED ON CALENDAR

The Committee on Environment and Public Works was discharged from the further consideration of the following resolution which was placed on the calendar:

S. Res. 140. Resolution to commemorate the 50th anniversary of the Tennessee Valley Authority, a public enterprise that works.

ENROLLED BILL PRESENTED

The Secretary reported that on today, May 16, 1983, he had presented to the President of the United States the following enrolled bill:

S. 957. An act to provide for an increase in the number of members of the Congressional Award Board, and for other purposes.

REPORT OF THE COMMITTEE ON APPROPRIATIONS

Under the authority of the order of the Senate of January 3, 1983, the following report was submitted on May 12, 1983, during the adjournment of the Senate:

By Mr. HATFIELD, from the Committee on Appropriations, without amendment:

S. Con. Res. 26. Concurrent resolution approving the obligation and expenditure of funds for MX missile procurement and full-scale engineering development of a basing mode (with additional and minority views) (Rept. No. 98-85).

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DURENBERGER, from the Committee on Environment and Public Works, without amendment:

S. 1280. An original bill to extend the Noise Control Act of 1972 (Rept. No. 98-86).

S. 1281. An original bill to extend the Noise Control Act to authorize appropriations for fiscal year 1984 (Rept. No. 98-87).

By Mr. CHAFEE, from the Committee on Environment and Public Works, without amendment:

S. 1282. An original bill to extend titles I and II of the Marine Protection Research and Sanctuaries Act, as amended (Rept. No. 98-88).

S. 1283. An original bill to amend the Solid Waste Disposal Act to authorize funds for fiscal year 1984 (Rept. No. 98-89).

S. 1284. An original bill to extend until October 1, 1985, the authority for advances to the migratory bird conservation fund (Rept. No. 98-90).

By Mr. ABDNOR, from the Committee on Environment and Public Works, without amendment:

S. 684. A bill to authorize an ongoing program of water resources research (Rept. No. 98-91).

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. 778. A bill authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the performing Arts, and for other purposes (Rept. No. 98-92).

By Mr. CHAFEE, from the Committee on Environment and Public Work, without amendment:

H.R. 1723. A bill to authorize appropriations through fiscal year 1986 for the Great Dismal Swamp, Minnesota Valley, Sailors' Snug Harbor, and San Francisco Bay National Wildlife Refuges (Rept. No. 98-93).

By Mr. STAFFORD, from the Committee on Environment and Public Works, with an amendment in the nature of a substitue and an amendment to the title:

S. 724. A bill to authorize the U.S. Army Corps of Engineers to undertake activities to provide new pubic works investment, grants to the several states to encourage and foster the construction of necessary public capital investment projects, to assist in creating new and productive jobs, and for other purposes (Rept. No. 98-94).

By Mr. MATHIAS, from the Committee on Rules and Administration, with an amendment:

S. 840. A bill to amend the Act of October 15, 1966 (80 Stat. 953; 20 U.S.C. 65a), relating to the National Museum of the Smithsonian Institution, so as to authorize additional appropriations to the Smithsonian Institution for carrying out the purposes of said Act (Rept. No. 98-95).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. 929. A bill to amend the act of July 2, 1940, as amended, pertaining to appropriations for the Canal Zone Biological Area (Rept. No. 98-96).

By Mr. MATHIAS, from the Committee on Rules and Administration, with an amendment:

S. 930. A bill to authorize the Smithsonian Institution to purchase land in Santa Cruz County, Arizona (Rept. No. 98-97).

By Mr. MATHIAS, from the Committee on Rules and Administration, with amendments:

S. Con. Res. 7. Concurrent resolution to authorize and provide for a bust of Carl Hayden to be placed in the Capitol (Rept. No. 98-98).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendments:

S. Con. Res. 35. An original concurrent resolution to authorize the printing as a Senate Document of a revised edition of "The Capitol" (Rept. No. 98-99).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendments:

S. Res. 111. An original resolution relative to expenditures by the Select Committee on Indian Affairs (Rept. No. 98-100).

S. Res. 138: A resolution relating to expenses of the Commission on Art and Antiquities of the United States Senate (Rept. No. 98-101).

By Mr. MATHIAS, from the Committee on Rules and Administration, with an amendment:

H.R. 2621: A bill to authorize appropriations for the Federal Election Commission for fiscal year 1984 (Rept. No. 98-102).

By Mr. MATHIAS, from the Committee on Rules and Administration without amendment:

S. Res. 143: An original resolution authorizing expenditures by the Committee on Rules and Administration for the training of professional staff (Rept. No. 98-103).

S. Res. 144: An original resolution relating to the purchase of calendars (Rept. No. 98-104).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 1100: A bill to consolidate and authorize program support and certain ocean and coastal programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce (Rept. No. 98-105).

S. 1101: A bill to authorize appropriations for certain fishery programs (Rept. No. 98-106).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with an amendment:

S. 1098: A bill to consolidate and authorize certain ocean and coastal programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce (Rept. No. 98-107).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with amendments:

S. 1096: A bill to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes (Rept. No. 98-108).

S. 1097: A bill to consolidate and authorize certain atmospheric and satellite programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce (Rept. No. 98-109).

By Mr. HATCH, from the Committee on Labor and Human Resources, with amendments:

S. 773: A bill to revise and extend programs relating to biomedical research, research training, and medical library assistance, to establish a National Institute of Arthritis and Musculoskeletal and Skin Diseases, and for other purposes (Rept. No. 98-110).

By Mr. HEINZ, from the Committee on Banking, Housing, and Urban Affairs, with an amendment in the nature of a substitute:

S. 869: A bill to amend the Export-Import Bank Act of 1945 (Rept. No. 98-111).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transporta-

tion, with an amendment in the nature of a substitute:

S. 800: A bill to establish an Ocean and Coastal Development Impact Assistance Fund and to require the Secretary of Commerce to provide to States national ocean and coastal development and assistance block grants from moneys in the Fund, and for other purposes (Rept. No. 98-112).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation and the Committee on Labor and Human Resources, jointly, with an amendment in the nature of a substitute and an amendment to the title:

S. 655: A bill to authorize appropriations to carry out the National Sea Grant program for fiscal years 1984, 1985, and 1986, and for other purposes (Rept. No. 98-113).

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. 1287: An original bill to authorize appropriations for the Public Buildings Service of the General Services Administration for the fiscal year 1984 (Rept. No. 98-114).

By Mr. CHAFEE, from the Committee on Environment and Public Works, without amendment:

S. 1288: An original bill to extend the Clean Water Act for one year, and for other purposes (Rept. No. 98-115).

By Mr. ABDNOR, from the Committee on Environment and Public Works, without amendment:

S. 1289: An original bill to establish an obligation ceiling for the civil work construction program of the United States Army Corps of Engineers (Rept. No. 98-116).

By Mr. DURENBERGER, from the Committee on Environment and Public Works, without amendment:

S. 1290: An original bill to extend the Safe Drinking Water Act, as amended, for one year (Rept. No. 98-117).

By Mr. SIMPSON, from the Committee on Environment and Public Works, without amendment:

S. 1291: An original bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, and section 305 of the Energy Reorganization Act of 1974 (Rept. No. 98-118).

By Mr. DURENBERGER, from the Committee on Environment and Public Works, without amendment:

S. 1292: An original bill to authorize appropriations for environmental research, development, and demonstrations for fiscal year 1984 (Rept. No. 98-119).

By Mr. HUMPHREY, from the Committee on Environment and Public Works, without amendment:

S. 1293: An original bill to extend authorization for appropriations for the Disaster Relief Act of 1974, and for other purposes (Rept. No. 98-120).

By Mr. HUMPHREY, from the Committee on Environment and Public Works, with an amendment:

S. 379: A bill to cancel certain indebtedness in connection with disaster relief activities (Rept. No. 98-121).

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, with amendments:

S. 695: A bill to amend the Bretton Woods Agreements act to authorize consent to and authorize appropriations for an increase in the United States quota in the International Monetary Fund and to authorize appropriations for increased U.S. participation in the IMF's General Arrangements to Borrow (Rept. No. 98-122).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Res. 145: An original resolution to pay a gratuity to Stephen B. Couch.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, without amendment:

S. Res. 146: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 695.

By Mr. HATCH, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 1003: A bill to extend and revise the provisions of the Child Abuse Prevention and Treatment Act and the Child Abuse Prevention Treatment and Adoption Reform Act of 1978.

S. 1008: A bill to make certain technical amendments to improve implementation of the Education Consolidation and Improvement Act of 1981, and for other purposes.

By Mr. ROTH, from the Committee on Governmental Affairs, without amendment:

S. 1010: A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia.

By Mr. HATCH, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 1087. A bill to authorize appropriations for the National Science Foundation for fiscal year 1984.

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 1192. A bill to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for Fiscal Year 1984 and for other purposes.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, without amendment:

S. 1294. An original bill to authorize appropriations to carry out the Export Administration Act of 1979.

By Mr. HATCH, from the Committee on Labor and Human Resources, without amendment:

S. 1285. An original bill to improve the quality of mathematics and science teaching and instruction in the United States, and for other purposes.

EDUCATION FOR ECONOMIC SECURITY ACT

Mr. HATCH. Mr. President, I am very pleased to report two measures from the Committee on Labor and Human Resources, the National Science Foundation Authorization Act of Fiscal Year 1984 and the Education for Economic Security Act. Both of these bills carry much significance for the future of America's standing in science and technology.

The Education for Economic Security Act is the result of much thoughtful discussion by the members of our committee, and I want to particularly commend Senators PELL and STAFFORD for their efforts. That a measure representing a broad consensus of our committee was reported is a tribute to their willingness to take into account all points of view. The committee has reported an original bill, a vehicle which prevents the listing of cosponsors, so I ask unanimous consent that the names of the cosponsors be printed at this point in the RECORD, and that they be added as cosponsors after the bill has been officially filed.

There being no objection, the list was ordered to be printed in the RECORD, as follows;

COSPONSORS OF THE EDUCATION FOR ECONOMIC SECURITY ACT

Claiborne Pell, Rhode Island.
Robert T. Stafford, Vermont.
Edward M. Kennedy, Massachusetts.
Dan Quayle, Indiana.
Jennings Randolph, West Virginia.
Paula Hawkins, Florida.
Thomas F. Eagleton, Missouri.
Donald W. Riegle, Michigan.
Howard H. Metzenbaum, Ohio.
Spark M. Matsunaga, Hawaii.
Christopher J. Dodd, Connecticut.
Robert Dole, Kansas.
Alan Cranston, California.
Thad Cochran, Mississippi.
Daniel K. Inouye, Hawaii.
Bill Bradley, New Jersey.
Quentin Burdick, North Dakota.
Walter D. Huddleston, Kentucky.
Paul Sarbanes, Maryland.
David Pryor, Arkansas.
Carl Levin, Michigan.
Jim Sasser, Tennessee.
Daniel Patrick Moynihan, New York.
Dale Bumpers, Arkansas.
Wendell Ford, Kentucky.
George Mitchell, Maine.
Dennis DeConcini, Arizona.

Second, Mr. President, this measure has generated tremendous interest in both the education and scientific communities. Therefore, I ask unanimous consent that the text of the bill be printed in the CONGRESSIONAL RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S. 1285

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Education for Economic Security Act".

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act to improve the quality of mathematics and science teaching and instruction in the United States.

DEFINITIONS

SEC. 3. For the purpose of this Act—

(1) The term "area vocational education school" has the same meaning given that term under section 195(2) of the Vocational Education Act of 1965.

(2) The term "Director" means the Director of the National Science Foundation.

(3) The term "elementary school" has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965.

(4) The term "Governor" means the chief executive of a State.

(5) The term "Foundation" means the National Science Foundation.

(6) The term "institution of higher education" has the same meaning given that term by section 1201(a) of the Higher Education Act of 1965.

(7) The term "local educational agency" has the same meaning given that term

will rue the day should Congress grant amnesty to untold millions of illegal aliens and prepare the stage for further amnesties for further untold millions of illegal aliens.

AMNESTY AND U.S. UNEMPLOYMENT

Mr. President, there are today almost 10 million Americans out of work. Congress should be making every effort to remove illegal aliens from our work forces and should avoid voting for legislation which will grant them legal rights and benefits through an amnesty program. It should be understood that illegals are at work in a broad spectrum of fields. Attorney General William French Smith testified that—

Only 15 percent of the illegals are estimated to work in agriculture; 50 percent are employed in service industries; and 30 percent are in blue collar jobs.

The Federation for American Immigration Reform has pointed out that, "half of all new jobs created in the late 1970's went to legal and illegal immigrants." FAIR also has pointed out that "there is not a single labor market that immigrants enter in which the majority of workers are not Americans." Marvin Stone, editor of U.S. News & World Report, has pointed out in this regard that—

If newcomers show skill and initiative as workers and entrepreneurs, they often cut in on the livelihood of local people and arouse hostility; if not, they lean heavily on the public purse.

As the Attorney General has said, only 15 percent of the illegals are in agricultural jobs. It is a myth that illegal aliens seek and obtain only low-paying jobs; indeed, a number of studies and reports have found that illegal aliens obtain well-paying jobs. For example, the Phoenix Gazette of December 9, 1981, in reference to a nuclear reactor plant in Arizona stated that, "Immigration officials said they believe the relatively high-wage scale, which begins at about $10.50 per hour, has attracted a large population of illegal workers." Human Events ran a story on December 12, 1981, which described a case in Elgin, Ill., in which Immigration and Naturalization Service officers "arrested 69 aliens who earned between $4.50 and $13 an hour." "Within hours," the Human Events story reported, "hundreds of local residents had applied for these jobs, all of which were filled within 3 days."

Prof. Donald L. Huddle of the Department of Economics at Rice University has written a report on "Undocumented Workers in Houston Non-Residential and Highway Construction: Local and National Implications of a Field Survey." Professor Huddle has estimated, for example, that one-third, and possibly more, of the workers in the construction industry in the Houston area are illegals. He notes that "residential construction is more heavily infiltrated by illegals than is commercial construction." This is because unions "still act as a partial barrier" in the commercial construction field. The wages earned by illegals ranged from $4 to $9.50 per hour. A study by Frank Bean and Allan King at the University of Texas for Governor Clement's Task Force on Immigration was quoted in the Houston Post of April 7, 1982, and estimated that one in every five Texas Hispanics is illegal.

From his research, Professor Huddle extrapolates that, "For the United States as a whole, the number of illegals working in construction may reach an estimated 1 million or more." He then goes on to state that "the wages collected by the illegals in construction nationally probably exceed $7 billion per year and could well be over $9.5 billion."

Former Secretary of Labor, Ray Marshall, has stated that removing illegal aliens from the work force could cut our unemployment rate in half. According to Professor Huddle's research:

The amnesty provisions of the Simpson-Mazzoli bill are too generous * * * giving amnesty to illegals * * * will be costly in terms of implementation, will cost unemployed American citizens hundreds of thousands if not millions of jobs, and lead to many more millions of relatives of illegals not now in the U.S. becoming legalized in the future.

It is important to consider a report by the Congressional Budget Office which shows that each unemployed American received $7,000 annually in unemployment benefits and other public assistance. Thus, 10 million unemployed Americans cost the taxpayers a minimum of $70 billion annually. This does not include the loss of revenues to the Federal Government from tax payments generated by working Americans.

Where there is a genuine need for seasonal foreign workers, for example, in the agricultural field, the answer is a temporary guest worker program. Amnesty is not the answer. In fact, by giving permanent resident status and access to our generous welfare programs to millions of illegals currently in low-paying agricultural jobs we will encourage them to move away from this type of work and into the welfare system.

AMNESTY WILL INCREASE WELFARE COSTS

Mr. President, amnesty would increase welfare costs dramatically. Many millions of illegal aliens would qualify for various welfare programs—AFDC, SSI, medicaid, food stamps, State and local assistance, and public housing. A number of factors currently are holding the use of welfare programs by illegal aliens down. These include the fear of discovery by authorities and the percentage of illegal aliens who are working males with their families across the border. Amnesty would change the situation significantly.

The National Association of Counties, in their newsletter County News of June 7, 1982, states that:

Such a legalization program would constitute a costly new federal mandate which would require states and localities to provide increased services and assistance to illegal aliens granted residency status. As legal residents, they would become eligible for cash and medical assistance not available to illegal aliens. NACo estimates that the total cost to state and local governments for providing such assistance would exceed one-half billion dollars in the first year of legalization alone.

Mr. President, for a fraction of the increased welfare costs that amnesty would entail, the enforcement capabilities of the Immigration and Naturalization Service could be substantially strengthened. Not only could enforcement be made more effective, but also, jobs could be opened up for hundreds of thousands, if not millions, of Americans as enforcement activities take effect over a period of time.

AMNESTY CAN POLARIZE OUR SOCIETY

Mr. President, I fear that the granting of amnesty to millions of illegal aliens could polarize our society. With 10 million Americans out of work, with our economy suffering from unbalanced budgets, and with increasing crime and lack of respect for our laws, amnesty could engender a tremendous backlash.

This backlash could affect relations between Hispanic and non-Hispanic Americans generally as well as between illegal Hispanic and Hispanic Americans who have either legally settled here themselves or whose parents or ancestors came to our land to settle. It is not just illegal Hispanic aliens that we are talking about, of course; there are illegal aliens here from all parts of the world. We must not allow, through an amnesty program, the polarization of our society.

Referring to illegal Mexican aliens, it is important for this body to consider the opinion of Hispanic-Americans who are legal citizens. The Dallas Times Herald, for example, on June 3, 1982, carried an article entitled, "Illegal alien issue splits Hispanic citizens." The article pointed out that, "in Dallas, most of the complaints to the U.S. Immigration and Naturalization Service about illegal aliens come from Mexican-Americans." The article goes on to state that the regional INS Director, William Chambers, reported that 85 percent of the complaints about illegal aliens are by Mexican-American citizens. He added that—

A lot of people are surprised by this, and it used to be that Mexican-Americans did not get into reporting illegal aliens. But they (Mexican-Americans) are being much more adversely affected than previously. The illegal aliens go into their neighbor-

hoods to live and they are in direct competition with them for jobs.

In an article published by the Washington Post on July 19, 1982, additional information is presented which demonstrates that polarization is already in progress. For example, the distinguished State Senator Hector Uribe who represents the lower Rio Grande Valley in Texas was quoted as warning that—

Those most traumatized (by the Supreme Court's education decision) are Mexican-Americans at the lower rung of the ladder. They see themselves paying for the education of illegal aliens' children. And they see their jobs being taken away by these illegal aliens.

The Post article pointed out a study by the Institute for Constructive Capitalism at the University of Texas which found that among various demographic groups, Mexican-American citizens were those most likely to believe that illegal immigration was the most important problem facing Texas. Another study, a poll taken by the Southwest Polymetrics Co. of Austin, Tex., found that 58 percent of those surveyed in the Lower Rio Grande Valley—State Senator Uribe's district—opposed free education to illegal alien children. Among the Mexican-American respondents to the poll, the percentage of negative respondents was even higher.

Raul Besterio, superintendent of schools in Brownsville, Tex., expressed his sentiments in the Post article and the sentiments of many Mexican-American citizens stating that—

Think how I feel. I'm a Mexican-American. People say why are you against your own people. Well, I'm an American. I was born and raised here. The Federal Government made me a Mexican-American.

Mr. President, the polarization process has begun in our country between illegal aliens and our fellow citizens. This body must face up to this fact and act in a responsible manner to prevent any escalation in this process and to heal the wounds that already exist.

Mr. President, it is wrong to reward lawbreakers. It is wrong to set in motion a program which will encourage further lawbreaking and which will polarize our society. Citizenship in our great Republic is too precious to grant in a vast blanket program to millions of foreign nationals who have flagrantly violated our laws. We expect our fellow citizens to obey the law. We proudly say that this is a nation of laws. Yet, amnesty for millions of illegal aliens—for millions of conscious lawbreakers—would show our own citizens and indeed the world, that our great country cannot muster the will necessary to enforce our own very generous immigration laws.

What will the working man and woman in this country think of this massive surrender? What will the children of the working man and woman of this country think of this surrender? Will it teach them respect for the law? Or, will it engender disrespect for the law and for our institutions? My office has been deluged by phone calls and letters opposing amnesty for illegal aliens. The public outcry against amnesty for millions of illegal aliens may well exceed anything that we in this Congress have experienced in recent years.

Our duty, as representatives of the citizens of these United States of America, is to protect the interests of the American people. We are not here to legislate bailouts for foreign governments whose internal policies have led to severe problems in their own countries. These governments must accept the responsibility to improve the conditions in their own countries in order to achieve progress.

Mr. President, I hope that all of my colleagues will carefully consider the far-reaching consequences of amnesty for illegal aliens before they vote on S. 529. What may appear to be the easy way out of a difficult and grave problem will cost the American taxpayer billions of dollars, and could encourage even more illegal immigration as well as a loss of respect for our legal system and institutions. My amendment would correct this error.

Mr. President, in conclusion, let me say that there is no immediate mass deportation required by this amendment of mine which is pending. The crisis has been building for a decade and it may take a decade to wind it down. But if we set the precedent of amnesty once, we will be encouraging future millions of illegals to take a chance.

Let me say to Senators that if this amendment, or something closely akin to it, is not adopted, Senators will rue the day that they allowed this bill to go through with amnesty for 6 million aliens, or is it 10 million, or 15? We do not even know.

I repeat, there is not a simple solution, there is not an easy solution. Certainly, we need to strengthen our border patrol. We have more people guarding the Capitol of these United States today than we have guarding our entire southern borders. That is a ludicrous situation under the circumstances.

Let me warn the Senate that giving amnesty to illegals will be costly in terms of implementation. It will cost unemployed American citizens hundreds of thousands, if not millions of jobs that they might otherwise get. It will lead to many more millions of relatives of illegal aliens not now in these United States becoming legalized in the future.

Mr. President, the treatment of aliens and the question of citizenship have been issues throughout the ages. The consequences of the decisions made by ancient societies on these matters, by the Romans and others, endured for generations—indeed, for centuries. The decisions that we make on these matters will affect our Nation's destiny and the lives of those who come after us.

I am satisfied in my conscience in offering this amendment, Mr. President, no matter how it comes out. I ask for the yeas and nays.

Mr. President, I ask unanimous consent that I be permitted now to call up two other amendments with the understanding that the distinguished Senator from Wyoming and the Senator from Massachusetts will make their statements, but I am doing this in order to accommodate the distinguished Senator from Missouri.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Carolina.

Mr. KENNEDY. Mr. President, reserving the right to object, I have every intention of commenting on the amendment of the Senator from North Carolina. I am quite willing to follow the lead of the floor manager on the way he wants to proceed in terms of the orderly process of the consideration of amendents.

But I do not want to have this amendment proposed, which is an amendment of such enormous importance and consequences, and have it seem that the Senator from Massachusetts is quietly sitting in his seat as we move on to other business.

So I am glad to follow the leadership of the Senator from Wyoming as to when we can express our views on this particular issue.

I will follow whatever way he feels we should proceed in terms of the orderly disposition of the amendment.

I realize that this amendment will not be voted on until tomorrow, and I expect we will have some time later in the afternoon to make a comment on it.

But I wait to hear from the floor manager as to how he wants to proceed because I will take strong exception to this amendment.

Mr. SIMPSON. Mr. President, let me inquire of my friend from North Carolina whether he intends to lay down the three amendments which he has here, together with statements in connection with those, and that will be the essence of the debate on those issues. They were presented last August. They are the same as were presented then. Then it would be my intention to present my remarks in opposition to those amendments at a later time in this debate this afternoon so that we might now go to the Danforth-Moynihan amendment which is acceptable. At that later time Senator KENNEDY may present his remarks. Then the vote will be sched-

ALLOTMENT TO STATES

SEC. 204. (a)(1) From 90 per centum of the amount appropriated to carry out this title for each fiscal year, the Secretary shall allot to each State an amount which bears the same ratio to such 90 per centum as the number of children aged five to seventeen, inclusive, in the State bears to the number of such children in all States, except that no State shall receive less than one-half of 1 per centum of the amount available under this subsection in any fiscal year.

(2) The Secretary shall reserve the remaining 10 per centum to carry out section 212, relating to discretionary grants of national significance.

(3) For the purpose of this subsection, the term "State" does not include Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, or the Trust Territory of the Pacific Islands.

(4) The number of children aged five to seventeen, inclusive, in the State and in all States shall be determined by the Secretary on the basis of the most recent satisfactory data available to him.

(b) The amount of any State's allotment under subsection (a) for any fiscal year to carry out this title which the Secretary determines will not be required for that fiscal year to carry out this title shall be available for reallotment from time to time, on such dates during that year as the Secretary may fix, to other States in proportion to the original allotments to those States under subsection (a) for that year but with such proportionate amount for any of those other States being reduced to the extent it exceeds the sum the Secretary estimates that State needs and will be able to use for that year; and the total of those reductions shall be similarly reallotted among the States whose proportionate amounts were not so reduced. Any amounts reallotted to a State under this subsection during a year shall be deemed a part of its allotment under subsection (a) for that year.

(c) There are authorized to be appropriated for each fiscal year for the purpose of this subsection amounts equal to not more than 1 per centum of the amount appropriated for such year under this title. The Secretary shall allot the amount appropriated pursuant to this subsection among Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, or the Trust Territory of the Pacific Islands according to their respective needs for assistance under this title. In addition for each fiscal year the Secretary shall allot from not less than one-half of such amount, to such agency as the Secretary deems appropriate, for programs authorized by this title for children in elementary and secondary schools operated for Indian children by the Department of the Interior. The terms upon which payments are made under the previous sentence shall be determined by such criteria as the Secretary determines will best carry out the purpose of this title.

IN-STATE APPORTIONMENT

SEC. 205. (a) For each of the fiscal years 1984 and 1985, 70 per centum of each State's allotment under section 204 of this title shall be used for elementary and secondary education programs in accordance with section 206.

(b) For each of the fiscal years 1984 and 1985, 30 per centum of each State's allotment under section 204 of this title shall be used for higher education programs in accordance with section 207.

ELEMENTARY AND SECONDARY EDUCATION PROGRAMS

SEC. 206. (a) The amount apportioned under section 205(a) from each State's allotment under this title shall be used by the State educational agency to strengthen elementary and secondary education programs in accordance with the provisions of this section.

(b)(1) Not less than 70 per centum of the amount available under this section shall be distributed to local educational agencies within the State. Each local educational agency shall use funds distributed under this paragraph for—

(A) the expansion and improvement of in-service training and retraining of teachers and other appropriate school personnel in the fields of mathematics and science, including vocational education teachers who use mathematics and science in the courses of study the teachers teach; or

(B) if the local educational agency determines that the agency has met its need for such training and retraining and subject to the provisions of section 210(c), computer learning and instruction, foreign language instruction, and instructional materials and equipment related to mathematics and science instruction.

Such training and instruction may be carried out through agreements with public agencies, private industry, institutions of higher education, and nonprofit private organizations, including museums, libraries, educational television stations, professional science, mathematics and engineering associations, and other appropriate institutions. A local educational agency may carry out the activities authorized by this paragraph with one or more other local educational agencies within the State, or with the State educational agency, or both. Each local educational agency shall assure that programs of in-service training and retraining will take into account the need for greater access to and participation in mathematics, science, and computer learning programs and careers of students from historically underrepresented groups, including females, minorities, individuals with limited-English proficiency, the handicapped, and migrants.

(2)(A) The State educational agency shall distribute 50 per centum of the funds available under this subsection to local educational agencies within the State according to the relative number of children enrolled in public and nonpublic schools within the school districts of such agencies.

(B) The State educational agency shall distribute 50 per centum of the funds available under this subsection based on the relative number of children aged 5 to 17 who—

(i) are from families below the poverty level as determined under section 111(c)(2)(A) of the Elementary and Secondary Education Act of 1965; and

(ii) are from families above the poverty level as determined under section 111(c)(2)(B) of the Elementary and Secondary Education Act of 1965;

in the public schools of the local educational agencies within the State.

(3) The State educational agency shall renew payments to local educational agencies under this subsection based upon the criteria set forth in paragraph (2) of this subsection and a determination by the State educational agency that the local educational agency is implementing the program assisted under this title so that a substantial number of teachers in the public and private schools in the school district of such agency are served and several grade levels of instruction in such schools are involved in the program.

(c)(1) If a local educational agency is spending funds under subsection (b)(1)(B), not to exceed 30 per centum of the funds available to the local educational agency under subsection (b) may be used for the purchase of computer and computer-related instructional equipment.

(2) If a local educational agency is spending funds under subsection (b)(1)(B), not to exceed 15 per centum of the funds available to the local educational agency under subsection (b) may be used to strengthen instruction in foreign languages.

(d) Not less than 20 per centum of the amount available under this section shall be used by the State educational agency for demonstration and exemplary programs for—

(1) teacher training and retraining and in-service upgrading of teacher skills in the fields of mathematics and science, foreign language instruction, and computer learning,

(2) instructional equipment and materials in such fields and necessary technical assistance,

(3) special projects for historically underrepresented and underserved populations and for gifted and talented students, and

(4) the dissemination of information to all local educational agencies within the State relating to the exemplary programs in the fields of mathematics, science, foreign languages, and computer learning.

In providing financial assistance for such demonstration and exemplary programs, the State educational agency shall reserve not less than 20 per centum of the amount available under this subsection for special projects in mathematics and science, foreign languages, and computer education to historically underrepresented and underserved populations of students, including females, minorities, handicapped individuals, individuals with limited-English proficiency, and migrant students, and to programs for gifted and talented students. The programs for gifted and talented students may include assistance to magnet schools for such students.

(e) Not less than 5 per centum of the amount available under this section may be used by the State educational agency to provide technical assistance to local educational agencies, institutions of higher education, and nonprofit organizations, including museums, libraries, and educational television stations, in the conduct of programs specified under subsection (b).

(f) Not to exceed 5 per centum of the amount available under this section may be used by the State educational agency for—

(1) the State assessment required by section 208 of this title; and

(2) the costs of administration and evaluation of the program assisted under this title.

HIGHER EDUCATION PROGRAMS

SEC. 207. (a) The amount apportioned under section 205(b) from each State's allotment under this title shall be used by the State agency for higher education programs in accordance with the provisions of this section.

(b)(1)(A) Not less than 75 per centum of the amount available for this section shall be used by the State agency for higher education for grants to institutions of higher education in accordance with the provisions of this subsection.

(B) The State agency for higher education shall make funds available on a competitive

The Senate should take note of the fact that within the present bill there are provisions which allow a quota of 40,000 persons per year from Canada and Mexico. All other countries are allowed an allotment of 20,000 per year.

Mr. President, I can see no reason for this 40,000 allotment. It is contrary to the principle of equal treatment of all countries which has come to be embodied in our immigration laws. Under this bill, the unused portion of the quota of Canada is to be transferred from Canada to Mexico. This compounds the breach of the principle of equal treatment and futher enshrines Mexico in our legislation as a specially favored nation in terms of immigration.

The Library of Congress has provided me with the following statistics on Canadian immigration to the United States since 1972:

Fiscal year:	
1972	10,776
1973	8,951
1974	7,654
1975	7,308
1976	7,638
TQ1976	2,458
1977	12,688
1978	16,863
1979	13,772
1980	13,609
1981(preliminary)	11,191

As Senators will note, this is an average of about 11,000 immigrants per year. It is patently clear that Mexico, under this bill, will receive almost 30,000 of Canada's 40,000 quota if the average of the last 10 years of Canadian immigration continues. Certainly, Mexico would receive between 20,000 and 25,000 of Canada's annual allotment of visas.

Adding the unused portion of Canada's allotment to Mexico's allotment of 40,000 would bring the annual allotment of Mexico up to the 60,000 to 70,000 range on an annual basis. This is over three times the allotment for all other countries, Canada excepted. Is this an equitable situation? Certainly not.

Mr. President, what the 40,000 allotment with its transfer provision represents is in fact a supplemental amnesty program for Mexican aliens. Lets be frank, it is clear that the framers of the bill recognizing the massive problem of illegal Mexican immigration have attempted to take another easy way out. Rather than deny amnesty to prevent establishing a dangerous precedent and to send a clear signal to the Mexican Government and to individual lawbreakers—potential and actual—they have simply caved in and incorporated an amnesty provision into the bill. Rather than emphasizing increased enforcement capabilities to stem the flood tide of illegals, this inequitable and strange provision which would allow Mexico perhaps 60,000 to 70,000 visas allotments was incorporated into the bill.

My amendment is simple and direct. It merely places Mexico and Canada in the same position as all the other countries of the world under this bill. Mexico and Canada would have an allotment of 20,000 rather than 40,000 and there would be no transfer of unused portions of the allotments.

I urge my distinguished colleagues to reflect carefully on the implications of a massive amnesty program. Is there any real reason for an additional supplementary amnesty program? To this Senator, Mexico needs no more extraordinary treatment under this bill.

Mr. President, I ask unanimous consent that it be in order for me to ask for the yeas and nays on each amendment to be voted on separately.

The PRESIDING OFFICER. Is there objection to the request of the Senator of grouping the three yea and nay votes?

The Chair hears none, and it is so ordered.

Mr. HELMS. I ask for the yeas and nays on all three amendments.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, I thank the Chair and I thank the Senator from Wyoming.

Mr. SIMPSON. I thank the Senator from North Carolina very much. He has assisted greatly in accommodating our request to expedite this matter today. His action just moments ago is evidence certainly of that, and I deeply appreciate it. I thank the Senator very much.

Mr. HELMS. I thank the Senator from Wyoming.

Mr. SIMPSON. Mr. President, the bill recognizes the very special relationship, friendship, and proximity the United States has with our contiguous neighbors in trade, commitment to democratic principles, and mutual strategic interests.

We must remember that until 1976 there were no limitations whatsoever for Canada and Mexico. Nationals of those two countries could enter the United States without restriction as immigrants.

By allowing our two contiguous neighbors an increased quota, we are not increasing overall immigration to the United States. The overall cap will maintain immigration at its present levels.

The strongest illegal immigration pressure and the largest numbers in the backlogs are from Mexico. By providing these extra visas to our southern neighbor, we will relieve the pressure for illegal migration and that is why this provision is an important aspect of an immigration control bill.

I urge you to reject the amendment.

As I have mentioned, this provision will, without increasing total immigration to the United States, allow Mexico, with the largest numbers in the backlogs and the greatest immigration pressure to have those visas not used by our other contiguous neighbor—this will reduce both the backlogs and the pressure to immigrate to this country illegally when visas are not available for legal immigration.

Although at present Mexico would undoubtedly benefit from this provision, at times in our past Canada was the country which sent the most immigrants to the United States, and it is entirely possible at some future time that this provision may be of more benefit to our other contiguous neighbor.

Again, it simply recognizes the special relationship we have with our contiguous neighbors.

I urge my colleagues to reject the amendment.

Mr. President, I definitely want to address very briefly the issue to attempt to eliminate legalization. Legalization, which is a very critical part of this bill, is not a reward for violation of the immigration laws of the United States. It is a practical solution to a very critically serious national problem. The issue is this: there is a large fearful subclass of human beings in this country who, according to the information received by the Select Commission and by this subcommittee and the full committee, for fear of being discovered, fail to report crimes against their property, their person and their family, and often do not seek medical help unless it is to give birth to a U.S. citizen child, and they are those who will not complain about exploitation in the working place, and that cannot be good for this country. Somehow it indeed diminishes us in known and unknown ways.

Furthermore, this Congress, and successive administrations, must bear some of the responsibility for this flourishing of a subsociety of illegal aliens within our country. Beginning with what was known as the Texas proviso and continuing on to the present day, we have tacitly approved their illegal entry into this country by failing to provide adequate funding or manpower for the Immigration Service year after year, after year, and by looking the other way as these aliens came by the hundreds of thousands to take job opportunities in this country.

What a curious situation, where it is legal for an employer to hire an illegal but it is illegal for the illegal to work. Only in America.

Nevertheless, these undocumented workers are here illegally and, most importantly, if we could not find them coming in how do we find them to get them out? I do not want to be part of the hunt that that entails. I do not

want to be part of a country that is embarked on that kind of a hunt.

So there are the three major goals of legalization. They are, the first one, to avoid wasteful use of the INS limited enforcement resources. We are unlikely to obtain as much enforcement for our dollar if the INS attempts to locate and deport those who have become well-settled in this country, rather than to prevent new illegal entry or visa abuse.

The second goal is to allow dependent employers to continue lawfully hiring from this pool of labor.

The third is to eliminate that illegal subclass now present in our society because not only does this illegal status and their resulting weaker bargaining position cause these people to depress U.S. wages and working conditions but it also hinders their full assimilation into our public culture. And then they remain a fearful and clearly exploitable group within U.S. society.

So, this is a most extraordinary act of generosity and grace that we do with legalization and typical of our Nation's historical motives.

We also provide here that those who are designated as temporary resident aliens and permanent resident aliens are to receive certain benefits but not fully funded welfare benefits, not the full spectrum of assistance, but they will receive emergency medical care and disability.

In addition we provide for block grant assistance to these persons in this bill. We do not intend the program to become an unfair burden for State and local governments. It is a shared responsibility and the legislation fully recognizes that.

I emphasize again, Mr. President, it is not a program to reward those who violate our laws but rather a most reasonable and gracious and grace-filled approach to a problem of serious national import of people who have been here, have established equities and have raised their children in the United States.

The comments with regard to immigration quotas, that amendment and the education of alien children, I will come back to at a later time. I yield to my colleague from Massachusetts.

Mr. KENNEDY. Mr. President, I welcome the very excellent statement of the Senator from Wyoming in indicating both his serious reservations and strong opposition to the elimination of the legalization program from this legislation.

The fact is, Mr. President, that these proposals on legalization have been recommended to the Congress and to the Senate of the United States and to the American people by Republican and Democratic Presidents alike, by Presidents Ford and Carter and even President Reagan, who had somewhat different approach than has been included in this legislation, but in terms of the concept and in terms of the commitment to the issue of legalization, his support, according to the Attorney General, are really very clear.

I believe that the Presidents of the United States, the Attorneys General of the United States, the Select Commission, which voted unanimously in support of legalization, they have all understood that the legalization provision is essential for two extremely important reasons: First of all, it is essential for humane and compassionate reasons.

If we were to accept the concept behind the amendment from the Senator from North Carolina, what we would really be saying to millions of people in this society is that we are going to round up people all over this Nation in massive sweeps, trying to identify and sweep up undocumented aliens, and we would be getting not only undocumented aliens but thousands of American citizens as well, who would be put in chains and clapped in local jails, separated from their families, children not knowing where their mothers and fathers are, who virtually disappear for 24 or 36 hours until they can find someone to get them out. That even happens today, Mr. President, when we have the limited INS sweeps. If we were to accept the concept of the Senator from North Carolina we would multiply this many times over.

As the Senator from Wyoming has stated, and as others who have studied this situation have said, if you cannot stop them at the border you are not going to get them in the communities of this Nation. That just happens to be the fact of the matter.

Second, Mr. President, this legalization program makes sense from a practical point of view. It is really the most practical way that we can take a subclass, limited certainly, as I have pointed out in earlier debates, but at least a part of the subclass of undocumented aliens, and bring them into the mainstream of American life in ways in which they can themselves involve themselves in both the benefits and responsibilities of citizenship. That is extremely important.

Mr. President, the most compelling and researched proposal in support of the legalization program came from the Select Commission—a bipartisan Commission created by Congress in 1978, which reported its final recommendations to Congress in 1981. Their report's recommendations on the legalization program, in which I and all 15 other commissioners voted unanimously to endorse—including my distinguished colleague from Wyoming, Senator SIMPSON, as well as Senator DECONCINI and Senator MATHIAS—remain the most recent, and the most thoughtful argument against the very amendment being proposed by Senator HELMS to eliminate the legalization program proposed in the pending bill.

Mr. President, for the record I would like to read the very carefully considered, in fact, the restrained recommendations, of the Select Commission on the importance of establishing a legalization program in any package of immigration reforms considered by Congress.

First, the Select Commission voted unanimously to recommend that a program to legalize undocumented/illegal aliens now in the United States be adopted.

The Commission held the view that the existence of a large undocumented population should not be tolerated. They found that:

The costs of society of permitting a large group of persons to live in illegal, second-class status are enormous. Society is harmed every time an undocumented alien is afraid to testify as a witness in a legal proceeding (which occurs even when he/she is the victim), to report an illness that may constitute a public health hazard or disclose a violation of U.S. labor laws.

In seeking a solution to the problem of a large, resident undocumented alien population, the Select Commission has considered a range of programs, including massive deportation efforts, the use of existing enforcement procedures and legalization. Attempts at massive deportation would be destructive of U.S. liberties, very costly, subject to challenge in the courts and, in the end, ineffective. The only time in U.S. history when such a massive deportation effort occurred was in the mid-1950's when the Immigration and Naturalization Service expelled or repatriated more than 1 million aliens. This was done at tremendous cost in terms of both money and personnel, and, more importantly, violated the civil liberties of many Mexican Americans who were forcibly repatriated to Mexico. Such an effort would not be tolerated today. However carefully designed and implemented, any program to remove 3.5 million to 6 million people would almost certainly violate the rights of many legal residents without reaching more than a small proportion of those aliens lacking proper documentation.

Mr. President, the Commission felt that simply continuing existing enforcement techniques would only insure the continuation of current problems, and we concluded that legalization is the only realistic response to the problem of resident undocumented aliens.

Specifically, the Commission found that:

1. Qualified aliens would be able to contribute more to U.S. society once they came into the open. Most undocumented/illegal aliens are hardworking, productive individuals who already pay taxes and contribute their labor to this country.

2. No longer exploitable at the workplace because they are unwilling to avail themselves of the protection of U.S. law, legalized aliens would no longer contribute to the depression of U.S. labor standards and wages.

3. Legalization is an essential component of the Commission's total package of recommendations to stem the flow of undocu-

mented/illegal migrants and will aid in the enforcement of U.S. immigration laws. It will enable INS to target its enforcement resources on new flow of undocumented/illegal aliens.

4. For the first time, the United States would have reliable information about the sources (specific towns, villages and provinces) of undocumented/illegal migration and the characteristics of undocumented/illegal aliens. This information will further facilitate enforcement efforts to curtail future flow. It will also enable the United States to focus bilateral or unilateral aid and investment programs in ways that might deter migration at its source.

In addition, Mr. President, many of us on the Commission felt that a legalization would also acknowledge the fact that the United States has had some responsibility for the presence of undocumented aliens in our country—since our laws have explicitly exempted employers from any penalty for hiring them, namely, the so-called Texas proviso. This officially sanctioned policy has been the pull that has brought them here. Because of this partial responsibility, the alternatives to legalization—such as continuing to ignore their plight or initiating mass deportation efforts—would, in addition to being harmful to the United States, also constitute unfair penalties on aliens and their families—especially those who already have the necessary qualifications to reside here legally, although they do not know it.

In conclusion, Mr. President, let me address two of the specific criticisms voiced against the legalization program contained in the pending bill.

COSTS OF LEGALIZATION

The most frequent criticism of the legalization program has been the projected costs of the program. We have all seen the scare statistics paraded by various groups opposing legalization, suggesting the cost will go over $10 billion in 3 years.

However, all available research—including that undertaken by the Select Commission—suggests these cost estimates are grossly exaggerated. First of all, undocumented aliens are here to work—that is why we are enacting employer sanctions to stem this pull factor. It is contradictory, and counter to sound logic, to suggest that a large number of these undocumented workers will suddenly go on welfare once their immigration status is legalized.

Furthermore, they are, in many respects, undocumented taxpayers. According to the 1980 General Accounting Office report on "illegal aliens: estimating their impact on the United States", they estimate that between 64 to 75 percent of all undocumented aliens are paying Federal income taxes, and as many as 88 percent are paying social security taxes—yet they receive no benefits.

The GAO also estimated that the total—Federal, State, and local—taxes paid by undocumented aliens in 1976 ranged between $4.8 to $5.7 billion—and that figure would be considerably higher today.

In short, even if some of the high-cost projections involved in the legalization program are correct, the fact is that undocumented aliens are already paying commensurate amount in taxes—they are paying their way, yet have received no benefits from those taxes in the past.

And future benefits will be limited for many of them under the terms of the legalization program contained in this bill.

REWARDING ILLEGAL BEHAVIOR

Mr. President, some have argued against a legalization program saying it could be seen as rewarding illegal behavior.

The fact, however, is that undocumented aliens have come here to work precisely because it has not been illegal to hire them. Our immigration policies have, over the years, implicitly sanctioned the hiring of undocumented workers. We have had a tacit national policy of tolerating their presence, of allowing employers to hire them without fear of any sanctions of law.

So, Mr. President, there has been no illegal behavior involved in this issue. Rather, a national problem has developed over the years—the problem of undocumented aliens coming to our country—because we have openly offered them jobs, and because we have not adequately enforced our immigration laws.

The issue before us is: How can we best respond to this problem? The answer—the only answer—is the one proposed in this bill: To undertake a one-time legalization program in concert with new enforcement efforts and controls.

Again, Mr. President, the alternatives—of mass deportations, of allowing millions of undocumented aliens to remain in a subclass in our society, of denying them civil liberties—are simply out of the question.

Mr. President, I believe an editorial in the Boston Herald-American last year put the issue exactly right:

The purpose of granting amnesty to resident illegal aliens is to legitimize persons who have become productive members of American society but have been deprived of the benefits of that society.

I urge my colleagues to reject the amendment offered by Senator HELMS—to accept at a minimum the provisions for legalization contained in this bill, which have been endorsed by every President of the United States in recent years.

I ask unanimous consent that the text of the Boston Herald-American editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From Boston Herald-American, June 9, 1982]

EXTEND AMNESTY TO THEM

The purpose of granting amnesty to resident illegal aliens is to legitimize persons who have become productive members of American society but have been deprived of the benefits of that society.

Sen. Edward M. Kennedy's amendment to the Senate's immigration reform bill serves this purpose by extending amnesty to many more resident aliens than previously proposed by either the Reagan administration or other pending legislation in Congress.

Sen. Alan Simpson, R-Wyo., whose bill embodies many of the Reagan administration's immigration reforms, had proposed amnesty for those here before January 1980. Sen. Kennedy persuaded the Senate Judiciary Committee to move that date forward to include those who arrived before January 1982, a move unopposed by the Reagan administration.

Sen. Simpson opposed the Kenndey amendment because it would allow an estimated 1.5 million more undocumented aliens eligible to become legal residents and set back his effort to put a firm cap on the number of immigrants.

Aliens affected by expansion of the amnesty provisions are already in the country, however, most of those who would take advantage of its provisions to gain a chance for citizenship have permanent jobs. Many are rearing families. Even if the government wished to deport such persons, it would be legally and politically difficult, if not impossible.

It seems in every way better to bring as many of these undocumented aliens as possible under the immigration laws by a broad amnesty that will free them from the fear of deportation and deliver them, as well, from exploitation by unscrupulous employers taking advantage of their illegal status. That is why we favor the Kennedy amendment to move the eligibility cutoff up to Jan. 1 of this year—a date that will seem far less current by the time Congress completes action on an immigration bill.

HUMAN COSTS OF KEEPING A SUBCLASS OF UNDOCUMENTED ALIENS IN OUR SOCIETY

Mr. KENNEDY. Finally, Mr. President, during this debate it is important that we try to put a human face on those faceless undocumented aliens we hear some discuss with such abandon and indifference.

The Senator from Wyoming has pointed out very eloquently about how this subclass even today is subject to extraordinary exploitation and I will just mention a couple examples here, Mr. President, which I think illustrate it.

I would like to read some cases of the plight of the undocumented aliens in our society—who are exploited by employers and vulnerable to the worst kind of abuse. These are some of the cases that the voluntary agencies have found in recent months, especially the American Friends Committee, and their stories tell far better than I can the real reason why we must have a fair and generous legalization program—to finally get this subclass of people out into the open and under protections of our laws:

A raid in Florida results in the immediate deportation of the Mexican parents of three small children who were born in the United States—are citizens—have lived here all their lives, and are now left alone in their small trailer with no source of food.

A young worker in the Northeast has a job related accident. His employer provides immediate emergency health care. When he learns of the employee's permanent disability, however, he calls the INS and the worker is deported.

A woman in San Diego is sequestered in the house where she works as a domestic employee. She will not be paid her salary because her employer fears she will then leave. She needs to see her children who are in Mexico. She is told not to use the phone or talk to strangers.

A child in Florida has a severe ear infection that requires hospitalization. The parents are terrified of the raids currently taking place in the State. They are afraid that if they are taken, their son will have to remain behind without their protection. Thus they cannot accept the offer of free medical care made to them.

A family in Texas pays $500 saved under hardship to get a useless letter from a lawyer. They believe this document will protect them from deportability. The letter states that these people are the attorney's clients. But when they are apprehended by the INS the lawyer does not take any action in spite of anxious calls from the immigrants.

There are many other human stories—of undocumented aliens working under harsh conditions without the protections of our laws—working "hard and scared"; of families divided, of children denied medical care.

It would be a crime if Congress failed to enact a legalization program to finally deal with this problem—especially when it is enacting new enforcement programs. The two are linked.

But most important, we should not forget the human face of this problem during our debate today.

Mr. President, the legalization provisions in this bill are strict. They are stricter than I think are warranted or justified, and I have addressed that issue earlier in this debate. But I must say they are at least an attempt to reflect a humane and a compassionate policy toward people and their families, and I will have more to say tomorrow in the limited time that we will have.

Mr. SIMPSON. Mr. President, with regard to the amendment offered by the Senator from North Carolina (Mr. HELMS) relating to illegal alien children, that amendment would impose a serious lifetime hardship on a very discrete class of children who are not accountable for their illegal status. These children have no control over their parents' conduct nor over their own undocumented status and we cannot visit the sins of the parents upon the child.

Public education plays a crucial role in maintaining the very fabric of our society and sustains our political and public cultural values.

Depriving illegal alien children of an education would take an incredible toll on the social and economic and intellectual and psychological well-being of the individuals involved and imposes some overwhelming obstacles to individual achievement. By not allowing illegal alien children to receive a free public education would, in effect, create a permanent group of uneducated persons within our society living here.

Passage of the Immigration Reform and Control Act, with its employer sanction provisions and the development of the worker authorization system, will greatly assist in eliminating the problems which give rise to this amendment and the Supreme Court decision last June.

But until employer sanctions have achieved the desired effect and until the legalization provisions deal with the portions of the illegal subclass, I agree with the Supreme Court that the cost to this Nation of not educating all children living within our country will be far greater than the cost of providing a free public education.

I urge my colleagues to reject this amendment at the time of the vote, which will be tomorrow.

AMENDMENT NO. 1268

(Purpose: To modify provisions relating to waiving the two-year foreign residence requirement with respect to certain foreign students)

Mr. DANFORTH. Mr. President, on behalf of myself and Senator MOYNIHAN, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH), for himself and Senator MOYNIHAN, proposes an amendment numbered 1268.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The amendment is as follows:

On page 176, lines 16 and 17, strike out "inserting before the period at the end thereof" and insert in lieu thereof "striking out the period and inserting in lieu thereof".

Beginning on page 176, with line 21, strike out all through line 9 on page 177 and insert in lieu thereof the following:

"(A) in the case of an alien admitted on or before September 30, 1989, under section 101 (a)(15)(F), (i) who is applying for a visa as an immigrant described in section 202 (b)(1) and who has obtained his degree from a college or university in the United States, and who has been offered a position as a faculty member or academic researcher in the field in which he obtained his degree by a United States college or university, or (ii) who has obtained a degree in a natural science, mathematics, computer science, or an engineering field from a college or university in the United States, who is applying for a visa as an immigrant described in section 202 (b) (1) or (2), and who has been offered a research, business, or technical position by a United States employer in the field in which he obtained such degree, or (iii) who has obtained an advanced degree in business or economics from a colleage or university in the United States, who has exceptional ability in business or economics, who is applying for a visa as an immigrant described in section 202(b) (1) or (2), and who has been offered a research, business or technical position by a United States employer which is in the field in which he obtained such degree and which requires such exceptional ability, or".

On page 177, line 21, strike out the quotation marks.

On page 177, between lines 21 and 22, insert the following: "Thirty days after the end of each fiscal year, the Attorney General shall prepare and transmit to the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate a report setting forth the number of aliens who applied for, and the number of aliens who were granted, waivers of the two-year foreign residence requirement pursuant to subclause (A) of the preceding proviso during the preceding fiscal year. The Attorney General and the Secretary of State jointly shall conduct a study on the impact of the waivers made pursuant to subclause (A) of the preceding proviso on the professional or technical labor requirements of foreign countries and jointly shall prepare and transmit-not-later than the close of the fiscal year 1986 to the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate a report setting forth the findings of such study.".

On page 163, line 13, insert after "workers" the following: "(or equally qualified workers in the case of aliens (i) who are members of the teaching profession or who have exceptional ability in the sciences or arts)".

Mr. DANFORTH. Mr. President, under the bill in its present form, foreign students who come to the United States to study at a college or university are required to return to the country of their origin for at least 2 years before they are permitted to return to the United States.

A provision in this bill in section 212 allows the Attorney General to waive the 2-year requirement in certain limited instances. Those limited instances require that the person for whom the waiver is granted must have received a doctor's degree and that the doctor's degree must be in one of the following areas: Natural science, mathematics, computer science, or engineering.

Further, the waiver, which is only offered to those who have received doctor's degrees and only in these lim-

ited fields, can only be granted 1,500 times per year for university hires and 4,500 times per year for those who are hired by business in the private sector.

This amendment will do several things: First of all, it will remove the numerical cap on the number of people for whom waivers could be granted by the Attorney General.

Second, with respect to people who are hired by colleges and universities after they have received their doctor's degree, it will remove the requirement that the degree must have been in one of certain specified disciplines.

Third, the amendment provides that businesses could hire people in these limited fields who have received not only a doctor's degree but also people who received a bachelor's degree.

Fourth, it provides that businesses could also hire people in other fields, namely in business and economics, who have advanced degrees and exceptional ability in those fields in business and economics.

In short, Mr. President, the point of this amendment is to not only remove numerical caps but also broaden the category for those people who are allowed to stay in the United States after they have received an education.

The bill in its present form is understandable, because I think all of us recognize that one of the points of providing an education in the United States for people from abroad is to enrich the countries from which they came. The United States has felt for some time that it has a responsibility for trying to improve economic and social conditions in other parts of the world, and to the extent that we provide education for people from those parts of the world we not only increase the educational experience and the breadth of our own people but we also enrich those areas of the world from which the students come and to which they return. Therefore, the notion of mandating their return and providing very limited waivers and very limited exceptions for keeping them in this country after their education is certainly understandable.

The problem, Mr. President, is this: There is not enough of a relationship between the numbers that appear in the bill and the purpose desired to be achieved by the bill. The numbers probably are as reasonable as any numbers, and may not be far from those necessary. However, they are really a guess at the need.

Second, it is doubtful, to say the least, that to require an individual to return to his country rather than stay in this country will in fact lead that individual to return. A person who acquires skills, say, in engineering or in science or mathematics in the United States may choose, if he is prohibited from being in the United States, to return not to the country of origin but instead to some other developed country and to share his or her experience, education, and talent with that third country.

Finally, Mr. President, it has been well recognized in the United States that we have our own problems. We say over and over again in connection with all kinds of legislation on the floor of the Senate that we are moving into an era of high technology; that we are going to have to have well-trained people in the United States. We hear criticized very frequently, for example, in connection with the budget debate the quality of our own education, whether or not we are producing enough people in the United States who are going to have the scientific, engineering, and mathematical skills to move the United States in the future.

Therefore, if we build into the law very strict definitional and numerical limitations on those who are permitted to stay, then it could be argued that we are acting contrary to our own interests and to our own future. Mr. President, this bill not only broadens the definitions and removes the numerical caps of those who would be able to stay, but the amendment does a couple of other things which deserve comment.

First, it sunsets the waiver authority given to the Attorney General. Under the bill in its present form, there is no sunset; it is permanent. This sunsets the waiver authority beginning in 1989, so that it builds into the bill a practical necessity that we in Congress analyze the policies that we are trying to pursue by attempting to encourage or require people who are educated in this country to return to their country of origin.

Second, it requires the Attorney General to report each year to the Judiciary Committee how many waivers have been sought and how many have been issued in any given year. Even with this amendment, the Attorney General must find it in the public interest to waive the 2-year requirement, which is a grant of discretion to take seriously.

The amendment also, at the end of 3 years, requires the Attorney General and the Secretary of State to conduct a study of the impact of the waiver authority on foreign countries. So, perhaps, with some data and a requirement of the study, we shall be in a better position, a few years down the road, to make policy in this area than I feel we are in now.

Finally, the amendment would keep the current law on labor certification for members of the teaching profession and those who have exceptional ability in the sciences or arts. Keeping this provision in the current law, rather than dropping it out, as is the case in the bill, will assure our academic community that that community is free to recruit the best minds for teaching and research. Clearly, that is what excellence in education requires.

Mr. MOYNIHAN. Mr. President.

The PRESIDING OFFICER. Who yields time to the Senator from New York?

Mr. KENNEDY. Mr. President, I shall be glad to yield on the bill. Does he wish it on the amendment?

Mr. MOYNIHAN. I believe there are 20 minutes provided on the amendment.

Mr. KENNEDY. Whatever time the Senator desires.

Mr. SIMPSON. Mr. President, I yield time on this side.

Mr. MOYNIHAN. Mr. President, I shall be brief. I thank the Senators for allowing the learned Senator from Missouri and me to offer this amendment which they have been so gracious already to declare to be acceptable to them.

The amendment I offer with Senator DANFORTH improves S. 529, the Immigration and Reform Act of 1983, by expanding the authority of the Attorney General to waive the proposed 2-year home residency requirement for foreign students seeking to adjust their immigration status to that of permanent resident.

It is my impression that the Judiciary Committee inserted the 2-year home residency requirement in order to reduce the number of foreign students who sought employment in the United States strictly as a means of adjusting their immigration status thereby enabling them to remain in this country upon graduation. I also understand the committee's desire to ease immigration pressures on the United States by encouraging political and economic development abroad.

I quite agree with the committee's intent and share its concerns. However, I fear that this provision, as presently written, will have a most serious impact on our Nation's scientific research and technological development. The residency requirement may very well deprive American industries and universities of talented individuals who are very much needed if the United States is to maintain its competitive position in the world market at this critical point in history.

For this reason, I have joined with my distinguished colleague from Missouri in suggesting several modifications of the waiver authority granted to the Attorney General. These include, first, removing the numerical cap on waivers; second, deleting the disciplinary requirement for foreign students offered faculty positions; third, requiring the Attorney General to study the effects of the waivers on the brain drain from developing countries; and, fourth, providing a sunset provision to insure that the waiver program receives adequate review before being renewed after 6 years.

All of these changes will provide the Attorney General with the flexibility necessary to protect America's economic interests. I urge my colleagues to support this carefully crafted and much-needed amendment.

Mr. President, I make three points which I hope might be heard beyond the confines of this Chamber. The first is that, in endorsing this amendment, the Senate recognizes what I think can fairly be called the principle of the universality of science. Scientists, perhaps more truly than can be said of most other persons, are citizens of the world. As science advances, so in time, does the store of knowledge available to persons everywhere; it cannot be kept from emigrating. Nor should it be.

It is one of the great achievements of western civilization, indeed of the classical tradition, that knowledge is thought properly to be available to any who might use it and that men and women of knowledge should move freely from one society to another.

I once had the occasion to give an address at a convocation of the Hebrew University of Jerusalem, in which honorary degrees were given to myself, to a German publisher, and to Andrei Sakharov. Sakharov was not there. Sakharov could not leave his country to attend. A Nobel Prize laureate was not allowed the freedom of movement that scientists have known since modern science began. Today, by supporting the amendment before us, we assert that freedom of movement, and we celebrate it.

Second, with this amendment I believe we recognize the great complexity of the academic lives of scientists. Indeed we are acknowledging the complexity of the experience of education and learning—more so than is usually reflected in legislation. Excellence in academic work does not always bring a masters or doctoral degree. In the same way, some work goes well past a doctoral level to postdoctoral work, as there are some kinds of scientific endeavor that can only be done over many long years of laboratory work in a direct working relationship with the faculty or professor.

Finally, Mr. President, I submit that the Senate ought to be, and in this case is being, very careful about how we classify knowledge. I once served as a vice president of the American Association for the Advancement of Science, which is our oldest and largest scientific organization. We have 20 divisions in the American Association for the Advancement of Science today. I should think we shall have 30 in 10 years' time and would not be surprised if, 10 years after that, there were 20 once again. There is a constant merger, mutation, migration, and mitosis, whereby disciplines and subject matter expand, diverge, return, combine. It is the nature of the wondrous world of science and it is not for us eagerly or confidently to try to classify it.

Might I say, with respect to the vital fields of computer science and engineering, that the equally to be inaccessible worlds of linguistics and semiotics will have as much to do with the development of computer technology in the next generation as electronics has had in the generation just past?

It was an electrical engineer at MIT who invented the first memory core for the first generation of computers. It was a social scientist at Carnegie-Mellon University, Dr. Herbert A. Simon, who won a Nobel Prize for demonstrating computers doing something alarmingly like thinking. He is a social scientist. Who will be the linguist who finally puts it all together into something unimaginably difficult for the rest of us to deal with I do not know. But not knowing, it is best that we maintain very broad and flexible boundaries in our classifications, even as we maintain quite open doors to men and women of learning throughout the world, especially those whose great moments are ahead of them as indeed is the case with young persons.

So I thank the managers of this important legislation. I might take just another 12 seconds to say that the whole Nation is proud of what Senator SIMPSON and Senator KENNEDY are doing with this legislation, and I for one surely want to be among those who early on attests his intention to vote for whatever in their collective judgment is the final outcome.

Mr. SIMPSON. Mr. President, I thank the Senator from New York for his very gracious remarks, and I very much appreciate them because I have watched him in his many varied interests in this body, paying particular attention to the immigration reform issue. He has been very helpful not only last year but again in this session.

Mr. President, I would have maybe 2 minutes of remarks. This amendment, I think, constitutes a reasonable compromise between the committee's intention to slow the brain drain from developing countries by requiring their students to return home after receiving an education in the United States and, of course, the very real needs of U.S. industry and universities for a limited number of these foreign students in high tech and other critical discipline areas.

The whole theory behind the original measure, this provision of it, when Congressman MAZZOLI and I and other sponsors were reviewing it, was that we tried to see what had happened with the noble concepts from which sprung the Fulbright program and many other programs. They were crafted to allow foreign students to come to this Nation to go to the fine schools in Boston and South Bend or Laramie, Wyo., and learn and then return to their home nations, sharing what they had learned here, that fabric that makes America so unique and such an extraordinary Nation.

But that did not happen. There were many abuses and they did not work as planned. Many of those students adjusted status, others simply did not adjust status. Some of them went into the underground, some of them just disappeared from the rolls. Many married, and there are many, many ways they were accommodating themselves into this country and not returning home.

So that was our reason, and in trying to do that we indeed became very much aware we were heavily impinging upon high tech and faculties and student populations.

So under this amendment submitted by Senator DANFORTH and Senator MOYNIHAN, the Attorney General will be permitted to grant waivers of the 2-year home residency requirement for foreign students in order to allow, or colleges and universities to obtain needed faculty members and to allow, U.S. industry to obtain these high tech employees, which they need to compete in the worldwide market.

I think the annual reports under this amendment which are provided to the Congress will provide us with the information we require for our oversight function and the sunset provisions will provide for the termination of the waivers unless the Congress deems it to be "in the national interest" to continue the program.

So this is an amendment that is acceptable. I want to thank Senator DANFORTH for his usual thoughtfulness and expressiveness in things he believes in. I also want to thank Senator MOYNIHAN for his most extraordinary interest in this situation and this most constructive and thoughtful assistance for many months. It is certainly an acceptable amendment.

Mr. KENNEDY. Mr. President, I yield myself such time as remains on the amendment.

(Mr. DURENBERGER assumed the chair.)

Mr. KENNEDY. Mr. President, I, too, what to commend Senator DANFORTH and Senator MOYNIHAN for this particular amendment and urge its adoption.

Just for the benefit of the Senate, so that we know where we are on this issue—when the bill was reported out from the committee a year ago, a little over a year ago, it had no provision in it to allow students of exceptional ability and merit to adjust their immigration status without leaving the country.

Then on the floor last year when we considered this in the Senate, Senator SIMPSON, and the Senate, accepted an amendment which I offered, which is in the bill currently, and to which this

amendment is directed. It permits the numbers which have been mentioned by the Senator from Missouri, some 1,500 university students, some 4,500 of those who are involved in American industry, to adjust their status each year.

At that time it did not seem to me to be wise to try to list or identify the particular categories, and the language which is included in the current legislation provides for giving those waivers to young people of exceptional merit and ability and it is left in a broader category than the amendment of the Senator from Missouri and the Senator from New York.

Also the legislation had no provisions for sunsetting it after a few years. I would have even preferred if the amendment of the Senator from Missouri and the Senator from New York had left out the sunset provisions, even though I have complete confidence that as long as the Senator from Wyoming is chairman of the Immigration Subcommittee, which I foresee as being for many, many years, that matters affecting immigration will have his attention, and certainly there may very well be need for the subcommittee to consider both the categories and the numbers at some future time.

The reason for the 1,500 and the 4,500 which are included in the legislation is because they are significantly above those which are being adjusted and considered necessary both by the universities and the private sector at the present time.

But I think the Senators are correct in eliminating those particular figures, and I think it is important for us to review those particular categories in the future—although I hoped we could have avoided the sunset provision.

But, for the reasons that have been very well stated here, there has been a balance which I know the Senator from Wyoming and others have felt is needed that we, on the one hand, do not want to be involved in legislation which is basically going to be brain-drain legislation, of taking the most talented and creative and imaginative minds from less developed countries—of giving them the skills and talents—yet not encourage them to return to their nations. I think the Senators have made the case, and I think it is an accurate one, that in these particular categories of individuals with these skills, if they do not remain in the United States they quite likely will go to other industrial nations and will be able to use their skills in ways which may very well be counter to the medium- and long-term interests of the United States, whether it is from a commercial or perhaps even from a military point of view.

This is a limited program. I think it does reflect an appropriate balance and a sensitivity of the Members of this body, and it is an amendment which I would hope we would accept at this time.

As the Senators know, there is some difference in this approach in the House, and I would certainly invite the continued interest of the two Senators as we fashion and shape an adjustment in the conference committee so that we can address what I consider to be, and I know the Senators consider to be, a matter of very significant and important interest not just to the universities and American businesses but I think to our whole country and its economy and the ability of many of the most exceptional and skilled individuals to be able to apply their skills and talents in the interests of our Nation.

I hope the Senate will accept the amendment.

Mr. MOYNIHAN. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. All time has expired on the amendment.

The question is on agreeing to the amendment of the Senator from Missouri (Mr. DANFORTH).

The amendment (No. 1268) was agreed to.

Mr. DANFORTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MOYNIHAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. Mr. President, may I, and I am sure on behalf of my friend from Missouri, once again express our appreciation to the managers of the legislation for their very generous and open attitude in this matter.

Mr. SIMPSON. Mr. President, I again thank the Senator from New York.

I would certainly be remiss in not mentioning that, indeed, it was my good colleague on the subcommittee, Senator KENNEDY, who first recognized this issue for the critical one that it was and began the remedial action in the August debate of 1982. Now we have brought that to full fruition. I think we have something that recognizes what was presented to us as a serious problem and I am very pleased at the result.

Mr. President, in reviewing the status of matters, we have Senator BUMPERS, who is coming to the Chamber shortly with an amendment. Senator BAUCUS and Senator WARNER are diligently working on resolving an issue with regard to user charges as expressed in the legislation.

I see Senator WARNER is here on the floor and he may have something to report.

Mr. WARNER. Mr. President, I inform the managers of the bill that Senator BAUCUS and I are trying to work out a procedure by which one of us lays down an amendment and, in all probability, the other would amend that pending amendment in the second degree and then proceed into debate. I will defer until the Senator from Montana arrives in the Chamber. He will be here momentarily.

AMENDMENT NO. 1269

Mr. WARNER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Virginia (Mr. WARNER) proposes an amendment numbered 1269.

Amend section 102, subsection 114 on page 121, line 14, by deleting the word "shall" and insert the word "may" after the words "Secretary of State".

Mr. WARNER. Mr. President, I extend my congratulations to the Senator from Wyoming and others who have drafted this legislation, especially the visa waiver section of the bill.

With the adoption of this section of the bill, one of the major obstacles to increased travel from abroad by tourists and business people will be eliminated.

This provision goes a long way toward the effective implementation of the National Tourism Policy Act, a measure of which I was a cosponsor and, as cochairman of the Senate Tourism Caucus, I actively support.

Mr. President, there is, however, a section of the bill having to do with the entry fees which causes me some concern. It stands in the face of the Tourism Policy Act, in my judgment, and I am inquiring if the Senator from Wyoming is aware of this problem and also if the Senator is open to modification of this section.

As the Senator from Wyoming is aware, numerous organizations, including the Travel & Tourism Government Affairs Policy Council, the Motor Coach Tour Industry Association, the Air Transport Association of America, and the American Automobile Association have all expressed their concern over the hasty implementation of this section, and the problems, which might ensue.

By making the modification I suggest, the Senate will bring the bill in conformity with the House, thereby effectively resolving the problem associated with the entry fee issue.

Mr. President, I ask unanimous consent at this time to have printed in the RECORD certain documentation to support the views of the enumerated organizations about which I have spoken.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C., *May 9, 1983.*

Hon. ALAN K. SIMPSON,
U.S. Senate, Senate Dirksen Office Building, Washington, D.C.

DEAR SENATOR SIMPSON: We wish to use this opportunity to express our concern about Sec. 114 of S. 529 which would require the Attorney General to impose fees on aliens entering the U.S.

A recent survey by the "Official Airline Guide" has revealed that of 127 countries throughout the world only Venezuela imposes an "immigration fee." It is true that departure fees are common world-wide and the U.S. as an example also has a departure fee.

In so far as the U.S. receives its 3rd largest share of export earnings from international visitors and the U.S. Congress in passing the National Tourism Policy Act established a policy to . . . "encourage the free and welcome entry of individuals traveling to the U.S. . . ." (Sec. 101(b)(4)) Public Law 97-63, we do not believe it in the national interest to charge a fee for this type of alien visitor who in essence is responsible for creating 289,000 jobs in the U.S.

In reviewing Committee Report (98-62) the Congressional Budget Office estimates that the cost to INS of increasing border patrols (the only reference to costs recoverable under Sec. 114) will be approximately $85 million in 1984 and $70-80 million annually thereafter. The report further goes on to note that "based on information provided INS," CBO estimates (that the cost of processing aliens) will cost INS $40 million a year. CBO further suggests that "the INS would be able to recover this cost by imposing a fee of 20 cents per entry in 1983, with small upward adjustments in subsequent years to reflect inflation. This fee would be classified as a revenue to the government. In reviewing this proposal we infer:

(1) The majority of the increase in costs to INS are attributable to supplemental border patrols and enforcement activities;

(2) These costs are largely unrelated to the processing of short term business and pleasure travelers to the United States;

(3) These costs will thus be recovered, to an undefinable degree, from "users" who neither generate these costs nor benefit from the facilities and "services" provided.

It is our view that a fee imposed on "international visitors" is discriminatory. Presently, the airlines indirectly bear the costs of inspection facilities, and the cost to briefly examine passports and visas, a government cost, is minimal.

We urge that you clarify, on the floor, the intent of Sec. 114 so as not to include "international visitors."

Sincerely,

JAMES E. GAFFIGAN,
Executive Director.

MEMORANDUM

USER FEE PROPOSAL CONTAINED IN S. 529, THE IMMIGRATION, REFORM AND CONTROL ACT OF 1983

Section 114 of S. 529 (see Appendix I) would amend the Immigration and Nationality Act by adding a section entitled "Nonimmigrant Visa Fees and Border Facility Fees." Subsection (b) requires that "The Attorney General, after consultation with the Secretary of State shall impose fees for an alien's use of border facilities in an amount necessary to make the total of such fees substantially equal to the cost of maintaining and operating such facilities and services."

Included in the Committee Report (No. 98-62) is the Congressional Budget Office (CBO) Cost Estimate (Appendix II) which is germane to the fee issue. CBO estimates that the cost to INS of increasing border patrols (the only reference to costs recoverable under this section) will be approximately $85 million in 1984, and $70-80 million annually thereafter. The CBO report further finds that "Based on information provided by INS" CBO estimates (that the cost of processing aliens) will cost INS $40 million a year. CBO further suggests that "INS would be able to recover this cost by imposing a fee of $0.20 per entry in 1983, with small upward adjustments in subsequent years to reflect inflation. This fee would be classified as a revenue to the Government."

From this information the following can be inferred:

(1) The majority of the increase in costs to INS are attributable to supplemental border patrols and enforcement activities;

(2) These costs are largely unrelated to the processing of short-term business and pleasure travelers to the United States;

(3) These costs will thus be recoverd, to an undefinable degree, from "users" who neither generate these costs nor benefit from the facilities and "services" provided.

It is important to recognize that the legislative language expressly makes allowance for the subsidization of particular users by others, i.e. ". . . shall impose fees . . . in an amount necessary to make the total of such fees substantially equal to the cost of maintaining and operating such facilities and services." However, a fee structure which in design allows an arbitrary assignment of cost and benefit has been attempted in the past and subsequently addressed in the Courts.

Congress made its initial declaration of intent in the Independent Offices Appropriation Act of 1952. Title V provides that:

". . . Government activities resulting in special benefits or privileges for individuals or organizations be financially self-sustaining to the maximum possible extent"; and

". . . Regulations prescribing fees be as nearly uniform as practicable"; and

". . . Fees be fair and equitable, taking into consideration direct and indirect costs to the Government, value to the recipient, public policy or interest served and pertinent facts."

In 1959, a Bureau of the Budget Circular was issued, which attempted to interpret the 1954 Act for the agencies, and advise them with respect to its implementation.

"Where a service (or privilege) provides special benefits to an identifiable recipient above and beyond those which accrue to the public at large, a charge should be imposed to recover the full cost to the Federal Government of rendering the service. For example, a special benefit will be considered to accrue and a charge should be imposed when a Government-rendered service:

(a) Enables the beneficiary to obtain more immediate or substantial gains or values (which may or may not be measurable in monetary terms) than those which accrue to the general public (e.g., receiving a patent, crop insurance, or a license to carry on a specific business); or

(b) Provides business stability or assures public confidence in the business activity of the beneficiary (e.g., certificates of necessity and convenience for airline routes, or safety inspections of craft);

(c) Is performed at the request of the recipient and is above and beyond the service regularly received by other members of the same industry or groups, or of the general public (e.g., receiving a passport, visa, airman's certificate, or an inspection after regular duty hours)."

The FCC established a fee schedule in 1964 which imposed a nominal "filing fee." The revenues raised covered approximately 25 percent of the agency's budget. In 1970, in response to the encouragement of both Congress and the Executive Branch, the FCC raised the fees to recover its full costs of operation. A group of cable operators challenged the fee structure and the Supreme Court held in 1975 that the assessment per subscriber was a tax, rather than a fee, since it was not related to a special benefit conferred by the FCC (NCTA v. U.S.). In a related case decided simultaneously (FCC v. New England Power Co.), the Court held that ". . . no charge should be made for services rendered when the identification of the ultimate beneficiary is obscure and the service can be primarily considered as benefiting broadly the general public." These represent the only Supreme Court rulings on these issues.

In 1975, the FCC issued a new fee schedule which it perceived to be consistent with the Court's ruling. Again the structure was challenged, and the Court of Appeals held that the new fee structure did not meet the Supreme Court's criteria. The FCC was ordered to develop a new fee schedule as well as clarify the basis for their assessment. The agency interpreted the Court rulings as requiring an assessment of fees based, to some degree, on the value conferred on the user. The FCC ultimately decided that it could not quantify the benefit or value being conferred upon the user, and suspended the collection of all fees in 1977. Though a committee was appointed to determine the most equitable method of refunding the previously collected fees, none have yet been refunded.

Also in 1977, the GAO issued a report which took exception with the FCC's interpretation of the rulings. "GAO does not believe that the Court of Appeals required the Commission to measure separately the value conferred upon the people paying the fee. Instead, based upon interpretation of the court decisions, the Commission can establish a proper fee schedule based solely upon cost." Nonetheless, neither GAO nor Congress have offered any further assistance in calculating an equitable fee schedule based upon cost.

For purposes of this legislation three basic questions arise:

(1) if fees must reflect "direct and indirect costs to the Government" (according to the 1954 Act), what part of INS' costs are "fairly and equitably" allocable to the international traveler? Which of these costs are not already being paid by transportation modes in the form of "facilities use fees"? Is border patrol and enforcement activity an appropriate cost to be subsidized by the international traveler?

(2) what part or aspect of the operation of such facilities can be considered a "value or benefit" which is conferred upon the traveler? INS inspections are distinct from, for example, Department of Agriculture meat grading and inspection services as INS inspections in no way provide "business stability or assure public confidence in the business activity of the beneficiary." Further, INS inspections are not performed "at the request of the beneficiary" nor do they "enable the beneficiary to obtain more immediate or substantial gains or values." Presumably, the ratio of charges should be set

equal to the ratios of marginal benefits and the absolute level set to recover full cost. In this case, however, it seems clear that all benefit is recouped by citizens of the United States who are expressly exempted from charge by the language of the bill.

(3) what public policy or interest is served by the imposition of such fees on the traveler? The proposed fees are clearly antithetical to public policy concerns.

IMPLEMENTATION PROBLEMS

There is a multitude of negative implications with respect to the implementation of Sec. 114 of the bill. For example, the proposed fee is discriminatory inasmuch as it would be imposed upon aliens only. A recent survey of 127 countries revealed that only Venezuela imposes an "immigration fee." All other head taxes, departure taxes, etc. are paid by both aliens and nationals. The discriminatory aspect of this fee proposal violates a number of international agreements and many airline bilateral agreements would have to be modified or renegotiated. In addition, this legislation would obviously encourage other countries to initiate the same practice with an attendant risk of abuse.

There are a number of practical considerations as well. For example, how would the fee be collected? Collection at inspection is also problematic. Visitors without U.S. currency would have no choice but to interrupt the inspection, locate a currency exchange desk, and return to the inspection. Collection at this point is also inconsistent with the ASIST pre-clearance procedure. An integral aspect of ASIST clearance is the frequent performance of Customs inspections by INS inspectors, as well as the performance of INS inspections by Customs inspectors. As the legislation requires the imposition of INS fees only, some passengers may be charged while others are not. Alternatively, ASIST could be modified, but presumably only in such a way as to defeat the purpose of the procedure. At airports where ASIST has not yet been implemented, collection of the fee at inspection would of course exacerbate existing delays and long lines.

Similar problems would occur with all transportation modes; as well as with border crossings by foot. At Canadian points-of-entry, where visas are not required, inspectors would encounter the additional difficulty of distinguishing between aliens and citizens. An alien who merely claims to be a U.S. citizen would be likely to successfully avoid paying the fee. It is also possible that an alien might simply refuse to pay the fee, presenting the U.S. with the option of either foregoing the fee or instituting deportation proceedings.

Also disturbing is the inequity made apparent by CBO's observation that the additional monies will be primarily used to fund border patrols and enforcement activities.

Finally, as public policy the fee proposal is inconsistent with our national economic interests. Twenty-three million international visitors spent $12.2 billion in the U.S. in 1981 generating $1.1 billion in federal, state and local tax revenue and supporting approximately 300,000 jobs. At a time when our international competitive position is deteriorating and the U.S. is seeking ways to prevent further erosion, travel and tourism is our third largest source of export income. It is clear from our perspective that whatever revenues are raised must be viewed as inconsequential relative to the harassment and inconvenience that will inevitably be imposed upon international travelers.

JONES, JONES, BELL,
CLOSE & BROWN, CHARTERED,
Washington, D.C., May 6, 1983.

Hon. ALAN K. SIMPSON,
Chairman, Subcommittee on Immigration and Refugee Policy, Senate Committee on the Judiciary, Washington, D.C.

DEAR CHAIRMAN SIMPSON: In follow-up to our telephone conversation, I am writing to elaborate on the concerns of the motorcoach tour industry with respect to the entry fees proposed in Section 114 of S. 529, the Immigration Reform and Control Act of 1983.

The imposition of user fees on aliens crossing our Mexican and Canadian borders by tour bus would be a significant burden to the tour bus industry and its clientele. The fees would not be cost-effective. They would adversely affect the United States tourism industry, economy, our balance of payments deficits, and our perception throughout the world as a country that welcomes the exchange of visitors and ideas through international tourism.

I offer this conclusion for the following reasons:

1. Section 114 violates the specific statutory mandate of the National Tourism Policy Act of 1981 (P.L. 97-63). Under Section 101(b)(4), the Act establishes a national tourism policy to "encourage the free and welcome entry of individuals traveling to the United States in order to enhance international understanding and goodwill."

2. The fee contradicts general foreign policy goals of encouraging foreign travel to the United States and certainly contradicts the general goal and objective of attempting to reduce our burgeoning balance of payments deficit. In 1981, over 33.6 million Canadians crossed our borders into the United States. Almost 1.3 million of them came by bus. In 1980, the average visitor spent $1,700 while in the United States. Any federal user fee on aliens that would curtail the flow of foreign visitors to the United States would be counter-productive to our economy. Furthermore, since one new job is generated for every $37,750 spent on travel and tourism, any loss of travel and tourism dollars from Mexican and Canadian tourists would adversely affect jobs in the United States.

3. In the tour bus context, any entry fee initiatives from the American government would invite an almost certain retaliatory "entry fee" burden by the nations of Canada and Mexico. Therefore, it is a real and substantial threat to our domestic tour bus industry. For the most part, the tour bus industry caters to middle, fixed-income travelers who would be discouraged from the tour package plan by any additional, $5 to $25 entry fees. Canada, for example, was the destination of about 39.8 million United States citizens in 1981. Of these visitors to Canada, almost 1.5 million traveled to Canada by bus. The imposition of retaliatory border fees on Americans by foreign governments may mean that many of our own citizens, including a large percentage of senior citizens, may forgo a trip.

4. The fees would be either too onerous and discourage travel, or they would be too small to justify the administrative hassle entailed in collecting them and enforcing the program. The tour bus industry is very distressed at the prospect that once the fee door is opened, the characteristic bureaucratic enthusiasms about funding all agency expenses from this new revenue source will occur. All the statutory language in the world cannot prevent an enterprising administrator from loading a lot of agency costs on the points of entry to offset other general budget expenditures.

5. Implementation of the alien "user fee" poses substantial administrative dilemmas related to the method of collecting the fee. If a percentage of the fee is to be collected in advance as part of a travel package, what is the administrative machine that pursues collection? Individual payment at the time of entry conjures another major irritant for the foreign visitor attempting to cross into the United States. Will a foreign tourist who claims US citizenship be excused from the entry fee? What would happen to an alien who refuses to pay the fee? Would he be deported? We have enough practical barriers already at our border points. Inevitably, the proposed entry fee would aggravate the already long delays in airline passenger entry into our country, as well. Enclosed are the foreign visitor statistics of just one country, Canada. The practical problems associated with collecting the entry fee from 33 million Canadian visitors to the United States is awesome. This problem will only be multiplied when all the foreign visitors from Europe, Japan, and other areas of the world are included.

6. The proposed user fee is blatently discriminatory. It is imposed only on aliens. A recent study of 127 countries disclosed that only Venezuela imposes an "immigration fee." All other departure taxes, head taxes, etc., are paid by both aliens and nationals.

7. There is an inherent inegality in asking a foreign visitor from Canada or Mexico to subsidize United States border administration and enforcement costs that are totally unrelated to processing a Canadian or Mexican business or tourist visitor. The question of why should they pay for border patrols, guard dogs, shotguns, vehicles, and search lights that have nothing to do with their coming and going from the country can legitimately be raised. The processing of aliens crossing our borders is conducted to enforce our immigration laws and protect our national interests. The proposed fee is largely unrelated to the administrative costs of processing short-term leisure or business visitors.

The above comments represent a partial summary of the serious questions and problems engendered by Section 114.

I appreciate your consideration of these concerns. If I can be of any help or assistance with this issue, please let me know.

I remain,
Sincerely,

JAMES D. SANTINI,
Attorney at Law.

AIR TRANSPORT ASSOCIATION,
Washington, D.C., May 4, 1983.

Hon. ALAN K. SIMPSON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SIMPSON: The Air Transport Association has followed the Immigration and Reform Act, S. 529, with great interest. We are pleased with, and support, the visa waiver provision contained in the bill, but are concerned about Section 218(b) which would require the Attorney General to impose fees on aliens entering the U.S. for the use of border facilities and services of the Immigration and Naturalization Services.

We oppose the imposition of fees on arriving international travelers because the basic responsibilities of the INS were established by the Congress in the broad national interest and do not uniquely benefit the airlines or airline passengers. The proposed legislation directly conflicts with the goal of the National Tourism Policy Act of 1981 to "encourage the free and welcome entry of individuals traveling to the United States," and will inhibit the Secretary of Commerce in the performance of his duty to "encourage to the maximum extent feasible travel to and from the United States . . ." 22 U.S.C. Sec. 2123(b)(12). It is also inconsistent with the clear policy of the Trade Act of 1974, which called for the reduction and elimination of barriers to international trade. Further, it also would contravene the treaty obligations of the United States under the Chicago Convention.

An INS "user fee" for the use of INS facilities for airline passengers would be discriminatory because the airlines and other tenants already bear the costs of the inspection facilities at airports. Therefore, there is no cost associated with airport inspection facilities for the INS. The only remaining cost would be for the brief examination of passports and visas. Since that inspection is performed for the protection of U.S citizens, it cannot be interpreted as a service for the benefit of the alien. Therefore, it would be a violation of the guidelines for user fees as expressed by the President in his budget message for FY '83.

The United States would be virtually alone in the developed world in assessing INS inspection fees if this measure is adopted. (While some countries levy departure fees they are used generally for tourism promotion.) For this reason, any change in the current law would require protracted consultations with other nations under the terms of existing bi-lateral agreements to determine the reasonableness of the new charge. The imposition of an INS "user fee" would invite retaliation and opposition by other nations as it did last year when the U.S. Customs Service proposed a similar fee for its services. (See the attached list for a complete summary of those countries and groups who opposed the previous proposal.) Substantive changes in law with such widespread international implications require thorough examination in a separate hearing process.

Leaders from the tourism industry and from cities which have U.S. international airports fear that procedures, such as the collection of an alien user fee, would create more delays for arriving visitors and would discourage tourism. Some cities have already experienced the negative economic impact of a downturn in the tourism industry as the direct result of the inefficient federal inspection system. (See attached memorandum re: Miami International Airport.)

The imposition of a fee for INS services on aliens will exacerbate ongoing problems of congestion at U.S. airports of entry. For years the airlines, airports, tourism industry and others have worked to minimize long delays for aliens and returning citizens going through the inspection process. Only recently have efforts been successful in obtaining some relief—but these measures are just the beginning. The entire inspection system, including INS, Customs, and Agriculture must be restructured into a system for the most cost-effective and expeditious inspection of passengers and cargo entering the country. Without significant modification of the current system, stop-gap measures, such as "user fees," serve no purpose.

We respectfully urge that the imposition of an INS "user fee" be deferred and that the concept of a consolidated federal inspection system, as described in the enclosed analysis, be examined as an alternative means of improved manpower and financial resource management.

Sincerely,

WILLIAM J. BURHOP,
Senior Vice President,
Government Affairs.

EXCERPTS FROM THE REPORT OF THE AIRPORT ACCESS TASK FORCE ON GROUNDSIDE CONGESTION

FEDERAL INSPECTION SERVICES

Federal Inspection Services (FIS) at U.S. airports are a significant cause of groundside congestion and delay for international air passengers and shippers. FIS congestion and delay detrimentally impact international passenger and cargo facilitation, disrupt the ability of arriving international air passengers to make planned domestic flight connections, significantly affect the movement of urgent shipments in international commerce and can affect the capacity of an airport to accommodate international traffic.

The Airport Access Task Force recommends that:

1. The Federal Government, through the Secretary of Transportation, ensure that studies funded through Federal planning grants to states, regional agencies, and local entities address airport ground access problems and solutions. Such studies include those efforts which lead to the development of state, regional, and local land use, transportation and airport master plans. Timely and effective review and coordination between the various Federal agencies (FHWA, FAA, UMTA, etc.) that provide planning funds should be accomplished to ensure identification of potential problems involving groundside congestion;

2. Congress encourage and support the concept of coordinated and cooperative or joint funding of projects to develop airport ground access facilities by such agencies as the Federal Aviation Administration, Federal Highway Administration, Urban Mass Transportation Administration, state and local governments—since many access problems are not just airport problems;

3. Congress encourage and authorize the use of Federal funds through existing programs for projects to install ground transportation information systems in airport and off-airport terminals. Such information systems should provide up-to-date information about available ground transportation alternatives for the air traveler;

4. Congress support and encourage the development of off-airport terminal facilities by authorizing the use of Federal funds for the development of such facilities. Further, that the Federal Government support and encourage the development of these facilities by ensuring that, during the planning and project development of such facilities, state and local, as well as Federal authorities, are made aware of available funding and coordinate planning and development activities. Further, that airports and airlines recognize that these facilities can be a cost-effective means of relieving congestion at the terminal, approach roads, and parking lot of an airport. Finally, efforts should be focused on overcoming problems associated with remote baggage handling, ticketing, and other passenger services;

5. Services' procedure be modernized and simplified to maximize the efficient use of resources (e.g., dual channel "red/green door" and "one-step" procedures and automated systems such as the National Cargo Control System) and that cross-training of FIS employees be required;

6. Congress consider the consolidation and streamlining of the Federal Inspection Services so as to expedite passenger and cargo flow through ports as well as reduce operating costs;

7. Priority go to staffing that is commensurate with the activity of the port of entry so as to minimize delay; and

8. FIS costs continue to be recognized as costs to be borne by all taxpayers, since the Federal laws requiring inspection were enacted to protect the nation and all of its citizens.

INTERNATIONAL STANDARDS AND RECOMMENDED PRACTICES, FACILITATION, ANNEX 9 TO THE CONVENTION ON INTERNATIONAL CIVIL AVIATION, JULY 1980

Annex 9—Facilitation

3.8.5. Recommended Practice.—*Visas should in all cases include the following information given in the order shown:*

(a) number of visa;

(b) type of visa;

(c) date of issue, showing day, month and year in that order;

(d) date of expiry, showing day, month and year in that order;

(e) number of entries permitted;

(f) authorized duration of each stay.

3.8.6. Recommended Practice.—*Numerals 1, 2, 3, 4, 5, 6, 7, 8, 9, 0 and the Gregorian calendar (with months being spelled out in full) should be used in furnishing the information listed in 3.8.5.*

3.8.7. Recommended Practice.—*When the text of the visa is in a national language other than English, French or Spanish, one of these three languages should also be used.*

III.—ADDITIONAL DOCUMENTATION

3.9 Recommended Practice.—*Contracting States should not require either from temporary visitors traveling by air, or from operators on their behalf, any information in writing supplementary to or repeating that already presented in their identity documents.*

3.10 A Contracting State which continues to require written supplementary information from temporary visitors traveling by air, shall limit its requirements to the items and shall follow the format set forth in Appendix 3—Embarkation/Disembarkation Card. Contracting States shall accept the Embarkation/Disembarkation Card when completed by temporary visitors and shall not require it to be completed or checked by the operator. Legible hand-written script shall be accepted on the card, except where the form specifies block lettering.

3.10.1 Recommended Practice.—*Contracting States which require the presentation of Embarkation/Disembarkation Cards should provide them to airline operators for distribution to passengers.*

IV.—PUBLIC HEALTH REQUIREMENTS

3.11 In cases where evidence of protection against yellow fever is required from persons travelling by air, Contracting States shall accept the International Certificate of Vaccination or Revaccination in the form set out by the World Health Organization in Appendix 2 of the International Health Regulations (1969).

3.12 Recommended Practice.—*Medical examination of persons arriving by air should normally be limited to those disembarking and coming within the incubation period of the disease concerned, as stated in the International Health Regulations (1969), from an area infected with one of the three quarantinable disease (plague, cholera and yellow fever.)*

V.—CLEARANCE PROCEDURES

3.13 Except in special circumstances, Contracting States shall not require that identity documents be collected from passengers or crew before they arrive at the passport control points.

3.13.1 After individual presentation by passengers and crew of the identity documents, the public officials concerned shall, except in special individual cases, hand back such documents immediately after examination, rather than withholding them for purposes of obtaining additional control.

3.14 In giving effect to paragraph 3.2, Contracting States shall ensure that examination by clearance control officials is performed as expeditiously as possible.

3.15 Each Contracting State shall make arrangements whereby the identity document of a temporary visitor need be inspected by only one official at times of entry and departure.

Note.—This provision is intended to ensure inspection of the identity document of a temporary visitor by only one official on behalf of both the Immigration and Police authorities. It is not intended to discourage Health and Customs officials from examining the identity document whenever this may facilitate health and customs clearance of the temporary visitor.

3.16 Contracting States shall accept an oral declaration of baggage from passengers and crew.

3.17 Contracting States shall normally accompany inbound passenger baggage inspection on a sampling selective basis.

* * * * *

MEMORANDUM

JANUARY 7, 1983.

To: Honorable Mayor and Board of County Commissioners.

From: M. R. Stierheim, County Manager.

Subject: Federal Inspection Process, Miami International Airport.

Miami International Airport has for well over 20 years suffered with regard to the ability to process arriving international passengers at an adequate rate. This is basically the result of far greater growth at MIA than elsewhere and continuation of historical staffing patterns by the federal agencies favoring areas such as New York. The problem is further complicated at Miami by a much higher percentage of alien arrivals as compared to other major gateways, more difficult processing because of points of origin and, more recently, because of narcotics control measures.

In spite of tremendous local investment in facilities, extensive efforts to obtain improved agency staffing levels and to obtain improved processing procedures, the problem is now worse than ever. On the three days following New Years day the situation at MIA was a disaster. Delays of up to four hours were recorded with average clearance times during some periods exceeding 2½ hours. The established goal for Miami is 45 minutes for peak periods; i.e., worst case.

The effects of this situation are many, serious and long lasting:

1. The international arrivals facility is designed to meter the flow of passengers from the aircraft to the federal inspection passenger processing stations in Immigration and Customs. As a consequence, only limited seating is necessary and, therefore, available.

All halls and passageways were jammed. Access to rest rooms was restricted. Seating for the elderly or infirm was non-existent. People became ill. Police were required to control the crowds to prevent a riot. Safety and health were endangered. Passengers, some completing a lengthy and tiring trip of up to 10 hours, were forced to stand for well over two hours. For the first time in the history of Miami International Airport, passengers had to be held on aircraft as there was no space for them in the international arrivals area.

2. Connecting schedules are based on allowing 1½ hours between flights. Many passengers missed connections because of delays in processing. Many faced either added costs or great inconvenience waiting for another flight.

Airlines, already in a highly tenuous financial plight, were forced to leave with empty seats while the passenger holding the ticket stood in a line for processing and, in many cases, pay for overnight accommodations.

3. One of the major strengths of Miami's air traffic system and the economies of our air carriers is the international hubbing and connecting traffic patterns which have been carefully developed during the decade of the 70's. This connecting traffic supports the routes which provide service for terminating passengers visiting South Florida and also the cargo lift crucial to our community.

The current problem has been an inability to meet volume demands with the staffing available and procedures utilized by one of the four federal agencies involved in the federal inspection process at MIA; namely, Immigration, a part of the U.S. Justice Department responsible to the Attorney General. It should be pointed out that the staffing by Immigration during the worst portion of our recent crisis totaled 13 inspectors. This is equal to the number of inspectors available for the same period in 1970, thirteen years ago. Permanent staffing at the Airport by INS is not acceptable even for the off peak traffic periods. Miami absolutely cannot tolerate this situation.

Permanent staffing assigned to the Airport by Immigration must be brought to or maintained at levels commensurate with traffic volume and levels at other major international gateways. This means that actual trained, available inspectors must meet these levels, not "approved positions", "inspectors on temporary assignment elsewhere", "at the training academy", etc.

Regional/District management must recognize the peak traffic periods that repeat like clockwork year in and year out at the Airport and take steps to meet them well in advance. Personnel must be assigned temporarily part time to the Airport from other duties. Vacations must be scheduled taking traffic levels into account, abuses of sick and funeral leave must be dealt with as a disciplinary matter. Unusual conditions must be anticipated and contingency staffing plans and procedures developed.

A pool of part time inspectors must be budgeted, hired and trained. They should be qualified aviation/airport employees so that they are available for any emergency. We have offered that the employees of the Aviation Department be trained for such part time requirements. We have even offered to pay the cost of the part time emergency employees.

The alternate solution and the only one that will be cost effective and provide the framework and management system to prevent continuous recurrence of incredible inspection clearance delays, is to change the system of inspection by creating one federal inspection agency with one management team, one budget and one responsible agency. The four federal inspection agencies have shown little willingness in the past to pursue this idea of a single inspection agency for a major airport even though the concept is used at smaller airports and land border crossings, and Congress has not been willing to legislate the single agency concept despite strong recommendations for such an inspection system from the General Accounting Office, various Congressional Oversight Committees, the Office of Management and Budget, Air Transport Association, fact finding committees, and numerous business leaders of national repute who have only needed to observe the existing four separate agency federal inspection system for a few hours, or be briefed that such a monster exists, to recommend the one agency concept. We understand that one of the inspection agencies (Customs) is now in support of the one agency concept at airports and would strongly support a test of such a system. Why not Miami and why not now? The more complicated question of whether there should be a single agency for the entire country can be dealt with separately.

Miami has the best international facilities in the world. It has the greatest international potential. It, unfortunately, has the worst reputation among international travelers. This makes the first item meaningless and will destroy the second.

[From the Miami Herald, Jan. 8, 1983]

END THE STACKUP

Among international travelers, Miami International Airport (MIA) is fast developing a reputation as a great place to suffer. Inexcusably irresponsible failures by U.S. Immigration and Naturalization Service (INS) and Customs officials are solely to blame. Their callous disregard for efficiency threatens not only the comfort, convenience, and safety of the travelers that they serve so poorly. These officials also endanger the reputation and economic-development potential of Greater Miami.

Few times are more predictable as peak-travel periods than the first several days after Jan. 1. At MIA's international-arrivals center on those days this year, however, the peak load almost became a mob. Credit inadequate INS and Customs staffing for that.

Travelers entering that MIA facility had just escaped up to 10 hours cramped in airliner seats, bear in mind. Because of the

INS-Customs breakdown, this is what they found:

All halls were jammed. Few seats were available. Access to restrooms was restricted. People became ill. Tempers frayed. Eventually police were summoned to control the crowds, lest they riot.

The average international traveler being processed through MIA then had to wait 2½ hours to gain clearance. Some people waited as long as four hours. Who wouldn't be outraged?

The INS was most to blame. Even under normal conditions, INS staffing at MIA is skimpy. This time it was worse. For extended periods during the peak, only 13 INS agents staffed the 34 available inspection booths. INS's best effort was to man 19 booths. Even that level seldom was attained. One reason was the unprecedented amount of sick and funeral leave taken then by INS staff.

Customs provided 32 agents at peak. Because of strict, inefficient procedural rules, however, the Customs staff is prohibited from doing INS work, so the larger Customs staff made little difference.

This kind of outrage causes many serious ripple effects. The bad word travels fast and far. International travelers often are trend setters and opinion leaders back home.

Many of them missed connecting flights. Neither they nor the airlines need that. Airlines either make money or move operations elsewhere. Many are transferring their international business from MIA to Houston, Atlanta, Dallas-Ft. Worth, even Tampa and Orlando. Loss of that market share will affect passenger and cargo traffic at MIA.

It's simply intolerable that Miami should have to bear this unwarranted burden. Bureaucratic bungling of Federal agencies is principally at fault. From Customs and INS must come the obvious solution—and fast. They must assure sufficient staff at MIA to eliminate this recurring debacle.

Bureaucrats can be slow to move unless the political blowtorch of budgetary pressure is set alight beneath their backsides. South Florida's representatives in Washington have plenty of fuel and many matches. They should not hesitate to turn the heat high.

WORKING PAPER: CAB AIRPORT ACCESS TASK FORCE: WORKING GROUP C—AIRPORT ACCESS AND FEDERAL INSPECTION SERVICES, DECEMBER 17, 1982

(Presented by H. Clifton Madison, Vice President, Western Airlines)

Federal Inspection Services (FIS) at U.S. airports are among the major causes of groundside congestion and delay for air passengers and shippers. FIS congestion and delay detrimentally impacts international passenger and cargo facilitation, disrupts the ability of inbound international passengers to make planned domestic flight connections, and can potentially limit the capacity of an airport to accommodate international traffic. The FIS problem is, therefore, an appropriate area to be addressed by the Task Force as part of its examination of groundside issues.

In 1981, over 20 million international passengers were processed through FIS at U.S. gateway and preclearance airports, and this sector of air travel has shown consistent growth over the years. It is the stated policy of the U.S. government, as articulated in the International Air Transportation Competition Act of 1979, that international air travel should be encouraged from a greater number of U.S. gateway cities to a greater number of cities abroad. Unfortunately, U.S. customs and immigration inspector staffing has fallen behind the growth rate of international air travel.

There has been, and continues to be, severe congestion in processing international travelers through customs and immigration formalities at most U.S. airports of entry and preclearance airports. Delays, at times approaching 2 to 3 hours per flight, are not uncommon at the preclearance airports of Montreal and Toronto and at our airports in Alanta, Baltimore, Chicago, Denver, Detroit, Fort Lauderdale, Honolulu, Los Angeles, Miami, Houston, Minneapolis, New York (Kennedy), San Francisco, Seattle and Tampa, among others.

International airline operations are currently constrained at several U.S. airports due to FIS processing limitations. At New York (Kennedy), for example, the Airline Scheduling Committee must coordinate aircraft arrival schedules to accommodate hourly passenger processing limitations and thereby minimize congestion and delay at JFK International Arrivals Building gates and inspection facilities. At other airports, assignment of processing "slots" for arriving aircraft loads constrains operational flexibility and effective capacity. Unless significant increases in FIS staffing levels or streamlining of procedures are made, these problems will continue and worsen in the future.

Either adequate numbers of inspectors must be authorized by the Congress or a high priority program to reduce inspector workload—through modernization, simplification, and consolidation of the functions of the several inspection agencies—must be initiated. Measures to facilitate the entry of international air travelers and shipments have been recommended, including:

1. Consolidate the several inspection functions required for the clearance of travelers and goods entering the country.

2. Reallocate headquarters and regional resources to increase inspection agency manpower complements in the field.

3. Reduce and simplify the inspection process for Customs and Immigration to permit the most efficient use of available resources. Namely:

(a) extend preclearance—inspection of passengers and baggage prior to departure from a foreign country—to other locations,

(b) implement the red/green door inspection procedure—or a modification of it—whereby the traveler determines whether or not he must go through Customs formalities,

(c) extend the one-step inspection procedure now operational at Edmonton, Houston, Kennedy Airport satellite terminals, Los Angeles temporary facility and Philadelphia, to other U.S. airports of entry and preclearance airports,

(d) introduce sampling techniques for processing air passengers and freight,

(e) simplify U.S. Customs processing of U.S. international air freight through the introduction by that agency of an automated control system, and

(f) reduce inspection agency documentation requirements to process international air passengers and air freight, for example, by simplifying the shipper's export declaration and eliminating arrival/departure cards for transit without visa passengers.

4. Amend the Tariff Act of 1930 to simplify U.S. tariff schedule computations for assessing Customs duties covering freight importations into the United States, paralleling those changes already implemented for passengers baggage importations.

These measures will help meet the continued growth of international air travel and mitigate the need for major expansions in inspector staffing. A significant case-in-point is the ASIST procedure recently evaluated at Miami and Los Angeles. The procedure has simplified and significantly accelerated both immigration and customs inspection formalities, and has been an important first step toward the development of a more selective and efficient passenger inspection system which now should be expanded nationwide. Unfortunately, ASIST was terminated by Customs at Miami on November 1, 1982.

Under the ASIST procedure, immigration inspectors are augmented with customs inspectors at primary immigration booths. The inspectors of the two agencies are cross-trained to perform each other's functions as well as that of agriculture quarantine. Deplaning travelers undergo inspection formalities with only their hand-carried baggage in their possession. If an immigration, customs or agricultural problem arises, or if duty payment is required, the traveler is referred to the appropriate inspection agency secondary position. Checked baggage is not claimed by the passenger until primary inspection at the immigration booth is completed. The airport authorities at Miami and Los Angeles, the international airlines serving these locations, and arriving travelers have all acclaimed the ASIST procedure. Airports desiring to begin the procedure should be permitted to implement ASIST and other streamlined procedures at the earliest practicable time.

An immediate, short-term cause of current FIS congestion is the misguided reduction and curtailment of Customs and Immigration Inspectors staffing as a way of curbing federal expenditures. Unfortunately, in the government wide search for ways to curb expenditures, efforts are being made to shift the cost of providing many government services to the "beneficiaries" or "users" of such services.

Airlines and airline passengers are not the "beneficiaries" of Customs and immigration inspection services. They certainly are "users", but only because they are required by federal law to be inspected. They receive no special benefit unique to airlines or airline passengers from the inspection, in fact, the inspection process itself is a distinct disadvantage in terms of loss of time and convenience. What frequently is overlooked is that the federal laws requiring the inspection were enacted to protect the nation and all of its citizens—by preventing the entry of undesirable products and persons, by preventing the entry of animal and plant diseases, by tariff enforcement protecting American labor and business from destructive foreign competition and discrimination, and by collecting duties on imported goods. The cost of carrying out these laws should be borne by all taxpayers.

CONCLUSIONS AND RECOMMENDATIONS

FIS staffing levels today are unable to meet airport inspection demands without long delays and serious public inconvenience. This situation will worsen significantly unless immediate positive action is taken to deal with it. Either adequate numbers of inspectors, or a high priority program to reduce inspector workload—through the steps toward modernization, simplification, and consolidation of the inspection process cited above, are urgently needed. Otherwise, FIS congestion and delay will continue to be a major groundside access constraint

at U.S international airports and preclearance airports abroad.

SUMMARY OF COMMENTS FILED IN CUSTOMS' DOCKET ON USER FEES

1. OCEANAIR LINE

7-28-82: Seeks exemption of carriers operating smaller aircraft "as the additional costs would be quite burdensome."

2. JAPANESE GOVERNMENT

7-30-82: Seeks exemption "since U.S. commercial airlines to and from Japan are not charged any such fees as those proposed by the U.S. Customs Service."

3. NORTH DAKOTA AERONAUTICS COMMISSION

7-24-82: "North Dakota commercial air taxi operators * * * request an Exemption from the coverage of the rule or any part, thereof, for small entities."

Requests Customs to provide in its rule an alternative to the proposed amendments which will "* * * minimize such significant economic impact of the proposed rule to small entities." Such alternative should exclude all small commercial on-demand air taxi air carriers and other air carriers operating 60 passengers or less or 25,000 pounds of cargo, or 20 passengers or less or 12,500 pounds of cargo.

4. POMPANO AIRWAYS

7-26-82: Opposed to proposed rule. Pompano would be adversely affected by regulation.

5. AIR JAMAICA

7-28-82: Opposes proposed rule: 1. Economic burdens; 2. Discriminatory in that Jamaican government doesn't impose similar tax on U.S. carrier; and 3. Would violate provisions of Chicago Convention.

6. EUROPEAN NORTH ATLANTIC CARRIERS

7-27-82: Opposes proposed rule. Violation of Chicago Convention and various bilateral air transport agreements.

7. FAA

7-28-82: Strongly objects. Costs "of activities for which Customs proposes to levy charges on commercial aircraft operators" should be borne by the general public. Violates international agreements.

8. ITALIAN GOVERNMENT

7-26-82: Opposed. Violates current bilaterals. Would create imbalance between Alitalia and U.S.

9. AIR TRANSPORT ASSN. OF CANADA

7-21-82: Opposed. Unwarranted costs on Canadian air carriers serving U.S. points.

10. DEPARTMENT OF STATE

7-23-82: Opposed. ". . . would be inconsistent with international treaties and bilateral aviation agreements to which U.S. is a party."

11. HELLENIC CIVIL AVIATION AUTHORITY

7-26-82: Opposed. Costs should be borne by U.S. government.

12. REPUBLIC OF SOUTH AFRICA

7-26-82: Request for extra time.

13. BELGIAN DIRECTOR GENERAL OF CIVIL AVIATION

7-26-82: Opposed.

14. FRENCH GOVERNMENT

7-26-82: Authorities are presently studying proposal.

15. EMBASSY OF CANADA

7-26-82: Opposed. Would violate international agreements.

16. NATIONAL AIR CARRIER ASSN.

7-26-82: Opposed. 1. Discriminates between commercial and private aircraft, 2. Commercial aircraft pay for overtime Customs services and should not have to pay for normal hours of work, 3. Customs processing does not directly benefit air carriers; 4. Questions of law; and 5. Refrain from imposition till necessary legislation submitted to and approved by Congress.

17. JAPAN AIR LINES

7-26-82: Opposed. 1. Proposal based on erroneous construction of I.O.A.A.; 2. Proposal does not meet criteria for permissible service "fee"; 3. If burden to fall on some international airlines, must be done by Congressional legislation, not Customs regulation; 4. Airlines should not be expected to bear economic burden; and 5. Imposition of fees may provoke retaliation by other countries against U.S. airlines operating abroad.

18. NY-NJ PORT AUTHORITY

7-26-82: Opposed. Airlines should not have to bear burden.

19. PRINAIR

7-26-82: Seeks exemption identical to that being sought by North Dakota Aeronautics Commission.

20. PORTUGUESE EMBASSY

7-26-82: Extension of time.

21. OK AVIATION (BISMARCK, ND)

7-22-82: Opposed. "Utterly unconscionable."

22. RED AIRCRAFT SERVICE, INC. (FT. LAUDERDALE)

7-26-82: Same as Pompano Airways.

23. VIRGIN AIR

7-21-82: Strongly opposed. People will be unable to absorb costs.

24. IATA (FILED BY RODNEY WALLIS, DIR., FACILITATION & SECURITY)

7-19-82: Opposed. Disregard for economic environment.

25. RAA

7-26-82: Seeks exemption for operations with small aircraft. (Attached to RAA's comments is a copy of their comments filed with CAB in Docket 40673, "Regulatory Flexibility Act—Definition of Small Business," 7-27-82).

26. AIR FRANCE

7-23-82: Opposed. Customs Service does no service for the airlines. "User" of Customs Service is U.S. Government itself. International carriers and passengers shouldn't have to pay.

27. FEDERAL REPUBLIC OF GERMANY

7-22-82: Opposed. Carriers and passengers shouldn't pay; not beneficiaries of Customs services. Seeks exemption for German carriers.

28. AIR NIUGINI

7-12-82: Opposed. Airlines would suffer financial burden.

29. VIRGIN ISLANDS LEGISLATURE

7-13-82: Strongly opposed. Fees would hurt small carriers on which Islands rely.

30. SERVAIR ACCESSORIES, INC. (WILLISTON, ND)

7-13-82: SerVair is operator of small aircraft. Opposes Customs' proposed rule. Would suffer economic burden.

31. PILGRIM AIRLINES

7-12-82: Opposed. Will suffer severely and disproportionately.

32. IATA (HAMMARSKJOLD)

6-15-82: Opposed. Disregard for economic environment.

33. ATA

(Not included in set of documents offered for inspection.)

AMERICAN AUTOMOBILE ASSOCIATION,
Falls Church, Va., May 10, 1983.

Hon. ALAN K. SIMPSON,
Chairman, Subcommittee on Immigration and Refugee Policy, Committee on the Judiciary, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The American Automobile Association is concerned over a provision contained in Sec. 114 of S. 519, the "Immigration Reform and Control Act of 1983", which mandates the imposition of fees on aliens with respect to their use of Immigration and Naturalization Service border facilities and services, in order to offset the costs arising from the use of such facilities.

It is our understanding that, as written, this language would include international travelers in the definition of "aliens."

We wish to note our strong opposition to such fees. The fees proposed by Sec. 114 are not user fees; rather, they are a tax on aliens. Those who would be required to pay the tax would receive no benefit from it. In fact, there is really no relationship between border patrols and international travelers. Border facilities are maintained for the protection of U.S. citizens, not aliens. The fee proposed in Sec. 114 is therefore not a true user fee.

AAA has supported the concept of user fees in the past, most notably the federal gasoline tax to fund development of the Interstate system, and airline ticket taxes to help fund airport and airway development. Those who pay such taxes directly benefit from them.

Furthermore, the fee is discriminatory, because it would be imposed only on aliens, not U.S. citizens. No other country in the world, except the Philippines and Venezuela, imposes a tax similar to that proposed in Sec. 114. The Philippine tax is a head tax imposed only on those visitors whose stay in the country exceeds 59 days.

Moreover, a policy such as that contained in Sec. 114 conflicts directly with the policy set forth in Sec. 101(b)(3) of the National Tourism Policy Act which states: "There is established a national tourism policy to encourage the free and welcome entry of individuals traveling to the United States, in order to enhance international understanding and goodwill. . . ."

At a time when the U.S. is trying to encourage travel to this country from abroad, as well as encourage other countries to eliminate barriers to travel by U.S. citizens, a tax such as that proposed in Sec. 114 is unwise.

AAA urges you, as the sponsor of S. 529, to make clear during Senate consideration of this legislation that such fees are not intended to be imposed upon international travelers.

We appreciate any help you may provide on this matter and hope you feel free to call us if you have any questions.

Sincerely,
JOHN ARCHER,
Managing Director, Government Affairs.

Mr. WARNER. Mr. President, at this time I yield to my distinguished colleague from Montana.

Mr. BAUCUS. Mr. President, may I inquire, what is the pending business?

The PRESIDING OFFICER. The amendment offered by the Senator

from Virginia (Mr. WARNER) is the pending business.

AMENDMENT NO. 1270

(Purpose: To eliminate the provisions imposing fees for an alien's use of border facilities)

Mr. BAUCUS. Mr. President, I ask unanimous consent that I may be able to send an amendment to the desk and it be considered as a substitute amendment to the pending amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. BAUCUS) proposes an amendment numbered 1270.

On page 102, strike out "Sec. 114. Fees.".

On page 121, strike out all of section 114, line 4 to line 20.

Mr. BAUCUS. Mr. President, this is a very simple amendment. It would simply delete the fees section of the bill.

I offer this amendment for several reasons. First of all, I think it is fundamentally unsound for our country to begin imposing fees on travelers, who wish to come to America from other countries to enjoy vacations or transact business. We do not charge such fees now, and we should not begin doing it.

I have a particular interest in this issue because we in Montana enjoy a very cordial relationship with our neighboring country, Canada. There are three Canadian Provinces which border the State of Montana. Montanans have always been able to travel freely in Canada, and Canadians have likewise been able to travel freely in the Montana area and other States. I would hate to see Congress interfere with this friendly and cooperative relationship.

I also object to the fees provision on a general level. I do not think we should be sending a signal to the rest of the world that people coming to visit the United States will now have to pay a fee for that privilege. This is neither an acceptable precedent for the future nor an acceptable departure from our traditions of the past.

Second, the language of the bill on the imposition of fees is so open-ended, so broad, and so vague that it gives authority to the executive branch of the Government to levy essentially any fee. The language says:

The Attorney General, after consultation with the Secretary of State, shall impose fees for aliens' use of border facilities or services of the INS in an amount necessary to make the total of such fees substantially equal to the cost of maintaining and operating such facilities and services.

Mr. President, that provision is broad enough to encompass almost anything. Under the proposed language, almost any cost having anything to do with the Immigration Service, could be and, in fact, must be, charged to foreigners who come to visit the United States. The provision of the bill is simply too broadly drawn.

Third, Mr. President, there has been virtually no focus on this provision of the bill. It has been raised in a very passive, tangential way in committee hearings, but I have no recollection in markup of any discussion about this issue. It is a small portion of a large bill, and it has been essentially unnoticed. But now that I have noticed it, I find its implications on our internal economic development and our external foreign relations profoundly disturbing. There are just too many questions that should be answered before we enact a provision that could affect so many areas of our lives.

I understand that the intention of this provision is to collect fees, to take a step toward balancing the budget.

It should be noted however, that the fees to be collected under this provision of the bill are not earmarked. They will not go to the INS but to the general fund of the Treasury. So the INS still have to come before the Congress, before the Appropriations Committee, to get their appropriations. The fees provision of the bill is not in reality going to help defray INS costs.

Finally, I just think the imposition of border fees is a bad idea. I can understand the reason that the provision is in the bill—to raise some money. But think of the precedent it will set. As soon as the United States starts taxing people who come to the United States to visit, on vacation or on business, other countries will start doing the same thing. A series of reciprocal and escalating fees will cause an unnecessary strain between the United States and foreign countries. For that reason, Mr. President, I think we should vote down this provision.

I see our distinguished majority leader standing by me with what I am sure is an urgent request, so I will cease and yield to the majority leader.

Mr. BAKER. Mr. President, I am about to do something which is a first, to speak from the Democratic side of the aisle.

Mr. BAUCUS. We welcome the majority leader on this side of the aisle. I hope that in the next Congress we will be together.

Mr. BYRD. I might say, Mr. President, that the majority leader looks comfortable on this side of the aisle. We welcome him and hope he will stay with us on this side.

Mr. BAKER. I think I hear statements now concerning my future.

Mr. President, I have two requests I would like to make at this time. I thank the Senator for yielding.

All three requests, I believe, have been cleared by the minority leader. I would like to state them now for his consideration and that of all Senators.

Before I do so, let me say that two of them deal with the Budget Act since the Senate recommitted the budget resolution, and that provides for the resolution to be reported back within 3 days, expiring tomorrow evening. Since there seems to be a general consensus that that is not enough time to do what the Budget Committee must do, the first request is to extend that time. I make the following request, Mr. President.

EXTENSION UNTIL MAY 19, 1983 FOR BUDGET COMMITTEE TO REPORT SENATE CONCURRENT RESOLUTION 27

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Budget have until the close of routine morning business on Thursday, May 19, to report back Senate Concurrent Resolution 27, a resolution revising the congressional budget for the U.S. Government for the fiscal year 1983 and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986.

Mr. BYRD. Mr. President, reserving the right to object, and I will not object, does the majority leader have some idea as to circa what time morning business would close? It would depend, I know, on what time the Senate would come in.

Mr. BAKER. I would hope to bring the Senate in at 10 a.m. and I would hope to be back on the resolution at a reasonably early time, say 10:30 or about that time.

Mr. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION UNTIL MAY 23, 1983 FOR COMMITTEES TO FILE REPORTS

Mr. BAKER. Mr. President, the second request, the necessity for which is required from having been granted the first request, is:

I ask unanimous consent that Senate committees have until 5 p.m., May 23, 1983, to file reports for the purposes of section 402(a) of the Congressional Budget Act of 1974 with respect to fiscal year 1984, and that reports filed by that time be considered timely filed under that section.

The PRESIDING OFFICER. Is there objection? Without objection, it has been so ordered.

PROPOSED VOTING PROCEDURE TOMORROW

Mr. BAKER. Mr. President, it has been brought to my attention that with the arrangements which have been made for stacking votes, that on tomorrow at 2 p.m. the vote on the Ruckelshaus nomination will occur, and beginning at 3 p.m., we will have three votes on amendments to this the

immigration bill. Then we would go back to another executive session item, the nomination of Mr. Regnery, and a rollcall vote may be ordered on that nomination. It seems to me more logical that the two executive session actions might be taken back to back. I have discussed this informally with the minority leader and I would now like to propound this unanimous-consent request:

Mr. President, I ask unanimous consent that on Tuesday after the vote on the Ruckelshaus nomination that the Senate then vote without further debate on the Regnery nomination if a rollcall vote is ordered on that nomination and is stacked pursuant to the order already entered, and that after the Regnery nomination is disposed of, the Senate resume the sequence of stacked votes on the amendments to the immigration bill as previously ordered.

The PRESIDING OFFICER. Is there objection?

Mr. BUMPERS. Mr. President, reserving the right to object, I wonder if the leader or floor manager of this bill will tell us which three legislative votes we are planning, or which three amendments to this bill we are going to vote on immediately after the two the majority leader proposes.

Mr. BAKER. What rollcalls have been ordered?

The PRESIDING OFFICER. The rollcalls that have been ordered are on amendments Nos. 1221, 1222, and 1224.

Mr. BUMPERS. Mr. President, I have this minor problem.

I have to go home tomorrow night, and I have to leave here at 4 p.m. I had planned to offer an amendment in a moment, and I would like to vote on that amendment before I have to leave tomorrow afternoon.

I wonder if the majority leader would be willing to grant me a small favor, and that is to vote on my amendment first and then the three amendments of the Senator from North Carolina, in which case I would have no objection to the nominations being voted on first.

Mr. BAKER. Mr. President, I would want to consult with the Senator from North Carolina first, and I do not see him in the Chamber at this time. Let me withdraw that request for the time being, and I will be glad to talk to the Senator from Arkansas and the Senator from North Carolina on that subject.

I withdraw the request, Mr. President.

IMMIGRATION REFORM AND CONTROL ACT OF 1983

The Senate continued with the consideration of S. 529.

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, in response to my distinguished colleague from Montana, I wish to point out that the difference, of course, in our two amendments is that mine parallels identically the language in the House and is permissive in nature.

I share the sentiments of the Senator from Montana that this fee situation could be an impediment to tourism and daily commerce from Mexico and Canada.

It is for that reason that I selected a permissive approach to this issue, enabling the appropriate departments and agencies of the Federal Government to determine if, in fact, there is a means by which certain fees could be collected.

I am wondering if the Senator might consider the permissive aspect as curing the problem, primarily in his geographic area of the United States, and, if he would consider that satisfactory, perhaps joining me in this amendment?

Mr. BAUCUS. Is the Senator asking me a question?

Mr. WARNER. Yes; the question is this: Would the Senator consider a permissive approach, enabling the various departments and agencies of the Federal Government to try to collect some fees under circumstances that would not be injurious to the flow of people across our borders? Yet, it could be imposed on people coming for nontourist or business purposes.

Mr. BAUCUS. I understand the concern of the Senator from Virginia. The Senator from Virginia wishes the Senator from Montana to modify the language in the pending bill so that it is similar to the House bill. At present, the Senate bill has mandatory language, requiring the administration to collect fees in amounts equal to operating services and facilities. The language of the House bill is discretionary.

Mr. President, I must answer the Senator from Virginia by saying I do not think that making the provision discretionary is an appropriate solution.

The State Department is in very strong opposition to any fees. So some agrue that if the State Department is opposed and the fees are made discretionary, no fees will be imposed. My response is that, if we all agree that no fees will be imposed anyway, why not just delete the fees provision from the bill?

Deleting the whole section makes our action absolutely clear to everyone—to the State Department, to Congress, to Americans, and to foreigners traveling to the United States—that this is no longer an issue, that there is no question, that no fees will be imposed.

The other problem is that the prepared discretionery language is just as open ended, just as broad, as the bill's original language. In either ease, we have no way of knowing what we are getting into.

I suggest that, instead of legislating bad language, let us delete it and take it from there.

Mr. WARNER. I will defer to the sponsor of the bill to define the generic issue. Mine is the addition of the word "may."

It seems to me that we are faced with three alternatives: First, it is made mandatory by the pending bill. Second, I am making it discretionary. Third, the Senator from Montana wants to remove it altogether.

Considering those three positions, I think it appropriate at this time if we hear from the manager of the bill. In particular, I should like clarification of the administration's position.

I share the view expressed by the Senator from Montana; namely, that the Department of State is opposed. I am aware of that. I am also of the opinion that some other segments of the Federal Government are anxious to have the discretionary power to levy some fees.

Mr. SIMPSON. Mr. President, it seems to me that a few minutes ago, Senator WARNER and Senator BAUCUS were involved in this; and now I see that the ball is being fired at the plate, and I am behind the plate.

The issue is the amendment offered by the Senator from Virginia which would remove the mandatory "shall" and make it a permissive, "may," and a substitute by the Senator from Montana which would simply repeal the user fee provision. That is where we are.

I will say just a very few things, because I want to get to the amendment by Senator BUMPERS and accommodate him, and I am sure we can accommodate him on the vote tomorrow, also. I do not think the Senator from North Carolina will have an objection to that.

The fees have been described as entry fees. Actually, they could be imposed either on entry or departure. They are user fees. The Senator from Montana is correct: Those funds are not earmarked. OMB vigorously opposed earmarking, although we did earmark application for legalization fees. But the provision was in the original bill in the 97th Congress. It was in the bill when it was introduced in the 98th Congress, and it had not been changed in the course of markup.

The State Department is less than enthusiastic; that is true. But both Congress and the Office of Management and Budget have been notoriously tightfisted with the Immigration and Naturalization Service.

The past inability of the INS to provide prompt and efficient service is notorious. Border enforcement and inte-

rior enforcement have been insufficient and ineffective.

I think Commissioner Allen Nelson is turning it around and is doing a very credible job.

I will conclude, and we can ask for the yeas and nays on the substitute tomorrow.

The committee's idea through the use of mandatory user fees was to provide funds to offset the cost of the facilities and services used by aliens crossing our borders.

Many countries do impose departure fees on persons leaving their borders. The provisions in the bill would permit the imposition of either an entry or a departure fee, whichever the administration deems the most appropriate.

The fees contemplated originally were small: Perhaps 25 cents per person at land crossings and around $1 per person at airports or seaports. That was the intent.

The approach is consistent with the present intention in Government, at least at some other levels to impose user fees, having the people who use the systems pay for the system. The income generated from those fees would improve the service which we furnish to people at the points of entry. The lines would be shortened and service improved through use of funds generated through the user fees.

At this juncture, I personally embrace the view of my colleague from Virginia. It matches the language of the House of Representatives making it permissive instead of mandatory, rather than repeal the fee provision. Maybe we could to visit further about the issue of the land crossing fee versus an airport fee or a seaport fee. That is certainly something I would be willing to consider.

Mr. WARNER. Mr. President, will the Senator from Wyoming yield?

Mr. SIMPSON. I yield.

Mr. WARNER. Mr. President, I respect my colleague from Montana. Had he not offered his amendment it is likely the manager of the bill would have accepted my amendment.

Mr. SIMPSON. Mr. President, if the Senator from Montana is accommodating the Senator from Virginia I would accept the amendment in the form of permissive rather than mandatory.

Mr. WARNER. So really the sole issue before the Senate then is to look at a permissive versus mandatory and the managers of the bill are prepared to accept the permissive approach.

Mr. SIMPSON. That is correct for this manager of the bill.

Mr. WARNER. I thank the Senator.

Mr. KENNEDY. Mr. President, I commend the Senator from Montana for bringing this issue to the attention of the Senate.

This particular provision was in the legislation that passed last year.

There were members of the Judiciary Committee, including myself, who were concerned about it, so we inquired about it from the State Department. I must say they were remarkably slow in getting back to us with their own concerns.

Finally, as has been well-stated by the Senator from Montana, when they have reviewed it and reviewed it in very considerable detail, I think the Senator has understated the kind of anxiety they feel and their fear of the implications this provision will have—of the United States being the first country in the world that puts the tin cup out for people when they are coming into this country or coming back into this country. The implications of that I think are profound indeed. Myself, I think they are beneath the dignity of this Nation.

I think we are all familiar with the kinds of fees that have been established to date, the visa fees to pay for consular services, which are quite appropriate. Almost every nation in the world does it. There are the airport fees which we have seen in country after country. Nations do that. There are other kinds of generally accepted exit fees that take place.

If that were what was being intended by this particular provision in the bill, I would certainly hope that it would be sustained. But I think the Senator is quite correct that the language does not say that.

If the language remains as it is in the legislation, I can see not only the possibility of an Attorney General and the Immigration Service establishing an odious kind of process and procedure. I can see other countries establishing similar kinds of restrictions against U.S. citizens when they are traveling abroad. It does seem to me to be highly objectionable for the very sensible reasons the Senator from Montana has stated.

I would hope that over the period of the nighttime—prior to the time that we would vote on this measure—that we could work out a compromise, which would be sufficiently discretionary in terms of the future, but that we agree on what is acceptable and what is responsible and that there be a common understanding by the Members of the Senate exactly what this provision will actually mean.

I, too, am troubled by the discretionary provisions, but as I understand the comments of the Senator from Wyoming in the listing of the kinds of fees he thought would be included, they were the most traditional kinds of fees, and those I think have a general acceptance and understanding in international relations, and were we to come out in that particular way then I think that the Senator's objective would be accomplished. But if we are not able to reach that compromise, I would vote with the Senator from Montana on this amendment and I think he is quite correct.

Mr. BAUCUS. Mr. President, I very much appreciate the remarks of the Senator from Massachusetts. I am not going to take much more of the Senate's time here. We have other matters to attend to.

Let me say, first, that as I understand present law, the kind of matters, the Senator from Wyoming wishes to see covered are already covered. We do not need this provision for airport-type user fees and visa fees.

Second, the fees provision causes a problem because about one-sixth of our border crossings in the North are unmanned. Who is going to collect the fees as Canadians come across or as they go back across? There is no one there to collect them. They are small, remote stations. It is a minor matter, but if we have to have someone collect the fees, that in itself, is going to increase INS costs.

More fundamentally, I do not think imposing border fees is proper or right.

The Senator from Massachusetts says it is demeaning to the United States to start imposing fees on people who come to visit the United States. I agree. If we require these fees, the Statue of Liberty will thereafter be heard to say: "Give Me Your Tired, Your Poor and Your Buck." I do not think that is what we want the Statute of Liberty to represent.

Mr. President, I wish to yield the floor, and I do ask for the yeas and nays on the substitute amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, Senator BAUCUS comes from a State immediately contiguous to me on the north. We, in that part of the world, are familiar with persons who are illegal undocumented workers from Canada. It is odd in these United States we do not always think of them in the same way we think of other illegal undocumented alien persons but, nevertheless, they are the same in every way.

We have vowed never to speak about the Statue of Liberty in this debate, and the Senator from Montana has strayed from the official ground rules and will be severely chastised at some later time.

Fees are now being assessed, as the Senator says, but they are not user fees. We were just trying to frame a user fee.

But I would hope the staffs might work this evening and maybe go on to address what Senator KENNEDY is saying with regard to the possibility of the designation of a user fee. But if not, the yeas and nays have been asked for and we will deal with the

issue tomorrow. I think the case has been stated.

I yield back the remainder of my time.

Mr. BUMPERS. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The question needs to be resolved on the underlying Warner amendment.

Are the yeas and nays to be ordered on the underlying amendment?

Mr. WARNER. Mr. President, I heard the question. Was there a sufficient second?

The PRESIDING OFFICER. That was on the Baucus substitute.

Mr. WARNER. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 1271

(Purpose: To eliminate the investor preference)

Mr. BUMPERS. Mr. President, is my amendment in order?

The PRESIDING OFFICER. Yes.

Mr. BUMPERS. Mr. President, I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS) proposes an amendment numbered 1271. On page 157, beginning with line 19, strike out all through page 158, line 6.

Mr. BUMPERS. Mr. President, there are 20 minutes on this amendment to be equally divided and as far as I am concerned, we can probably dispose of it even in less time than that. It is a very simple amendment.

I wish to explain to my colleagues a category included in this bill about which very little or nothing is being said.

No. 1, in the broad category of independent preference, that is a broad category, and under independent preference are four different classifications.

First, if there happens to be an Einstein somewhere wanting in this country, someone with exceptional ability, he can be admitted and he has high priority under this particular classification.

Second, anyone who has a skill that is needed in this country. It is just a skilled worker preference. He can be admitted.

They are the second priority within that classification.

The third one and the one to which I take exception is called investor preference. Before I tell you what investor preference means, Mr. President, let me make this point: In this broad classification, 75,000 people can be admitted into this country within those categories—exceptional ability, as I say, the kind of mind that Einstein might have, if it happens to be something we need. That is No. 1. Skilled workers are No. 2. Those who have money to invest in this country to start a business are No. 3. Out of the 75,000 people in those categories, only 7,500 can be admitted under the investor preference. That is not likely to happen, because here is the existing law.

It is not existing law; actually, it is just something the Attorney General set up in 1978, that anybody who had $40,000 and wanted to employ one person in this country could get in under the existing rule. it is not legislative, it is not a part of the immigration law, it is just something the Attorney General put in in 1978. Not one person has ever been admitted to the United States under that category, and I am glad.

But here comes this bill. This bill provides that anybody in this category who has $250,000 and wants to hire 10 people gets a preference.

Mr. President, under the existing rule of the Attorney General, you at least have to have all or part of your money up to be considered for admittance under this provision. Under the bill, you simply have to express an intent to put up $250,000 and hire 10 people.

Let me say that the argument that the opponents of this amendment will make is that the Select Commission on Immigration voted 14 to 1 in favor of this provision. The one dissenting vote was the chairman of that Commission, Father Theodore Hesburgh. As Andrew Jackson used to say, one man with courage makes a majority. Two men with courage—that is, Father Hesburgh and me—I hope will make a majority in this case.

Mr. President, this is not what anybody would call a "biggie," but I can tell you that I strongly object to it. I do not think—the Senator from Massachusetts was talking about an amendment a moment ago in an entirely different context, but he said the United States would be the first Nation to ever put out the tin cup. My amendment simply strikes this category.

Nobody has ever been admitted, maybe nobody ever would. But I think it is odious, it is offensive, it flies right in the face of the national character of this country. Nobody ought to be admitted into this country simply because he can produce $250,000 and express an intent to come to this country. I hope my colleagues will vote to strip that provision.

I reserve the remainder of my time, Mr. President.

(Mr. DANFORTH assumed the chair.)

Mr. SIMPSON. Mr. President, vigor is the touchword for my colleague from Arkansas. When he enters the fray, he brings vigor and a lot of spirit with him. I remember this debate in August 1982, I go back to the Select Commission on Immigration and Refugee Policy. Who felt that there must be some provision made for an increase in independent, or "new seed" immigrants. Under our present law, only 54,000 visas are available for independent immigrants while, under this bill, this number will increase somewhat to 75,000. Three hundred fifty thousand of those visas go to family reunification. No qualifications whatsoever, just family reunification, which policy continues, as it should, in our heritage. That family reunification dominates our immigration policy.

Of the 75,000 independent immigrant visas, all of them are allocated first to immigrants of exceptional merit and ability. Those left over are allocated to immigrants with skills needed in the United States and, finally, any of the 75,000 independent immigrant visas remaining are made available to these investors, those who would invest at least $250,000 in a new enterprise in the United States, which would employ at least four U.S. workers not members of the immigrant's family.

The number of visas available then for these independents is limited by this bill specifically to 10 percent—no more than 10 percent—of the 75,000 independent immigrant visas. Thus, no more than 7,500 visas can be issued in this preference category.

I think that is a reasonable figure. Right now, today, current regulations provide that visas may be issued to immigrant investors who will invest $40,000 in an enterprise in the United States which will employ at least one U.S. citizen not a member of the immigrant's family. That is present law. This is not some new thing. Thus, the bill requires three times the investment and four times the number of U.S. workers to be employed than under present law and regulations; thus it makes it stronger.

So, while family reunification continues to be the primary purpose of our immigration policy, we thought it was appropriate to allow a small number of persons to immigrate to the United States who will benefit the economy of the country, and solely and specifically so. That is, if the size of the investment required is appropriate, if the number of U.S. workers to be employed is appropriate, and the preference is appropriately limited to no more than 10 percent of the independent immigrants, which means that less than 1.7 percent of all immigrant visas will be issued to investors—1.7 percent of the entire 100 percent, then we think that is fair and appropriate, Mr. President. So it is the committee's view that the investor prefer-

ence is in the national interest and that it will not result in immigration to this country being dominated by persons trying to buy their way in.

I know that is the concern, but we do not see this as any case of buying one's way into the United States or an elitist provision for those of wealth. It is an attempt to bring to the United States seed immigrants, which was the very essence of our original flows of immigration, and make only a very small number of those investors. We think it is quite reasonable. I want to share those facts with my colleagues in the debate.

Mr. KENNEDY. Mr. President, I want, just for the benefit of the Senate, to mention what the Select Commission on Immigration and Refugee Policy did on this particular issue. Actually, it agreed to create only a very small investor category, but made it quite clear that it was not in favor of actually earmarking specific numbers. You can say that this, nonetheless, still endorses the principle which the Senator from Arkansas objects to, but it was at least intended at that time to be part of a whole package which, I must say, was a good deal more comprehensive and generous than the package before us. It was also a good deal more responsive to both our immigrant history and the family reunification needs of people who have families outside this country and who have something to contribute to the Nation.

I think the Senator from Arkansas offers this amendment at a time when this bill has rejected a number of the recommendations of the Select Commission which would have, I think, been a good deal more generous than what is in the bill now—such as higher immigration quotas and less restrictions on legal immigration. But it was the judgment of the Committee on the Judiciary that those particular provisions would not be accepted.

I have had an opportunity to talk with the Senator from Arkansas about this amendment just in the final hours of the debate last year. I know that he has long been concerned about this issue.

I would have continued to support the Select Commission's recommendation if it had remained a part of an overall package of expanding visa numbers. But since the bill actually provides new restrictions on immigration numbers and on the preference system—contrary to the Select Commission's recommendations—I cannot support the continued earmarking of visa numbers for investors.

The point the Senator from Arkansas makes is a sensible one. My own feeling is that with the tightening down of other provisions, ignoring the recommendations that have been made by the Select Commission on increasing visa numbers, but having those numbers in the bill reduced, is unacceptable.

Mr. President, I will support the amendment of the Senator from Arkansas.

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. BUMPERS. Mr. President, let me say in conclusion, No. 1, I overstated a moment ago something that might be perceived as a benefit of the amendment. I said that we had $250,000 and would agree to employ 10 persons. Actually, it is only four persons, which makes it, putting it in its best light, even more offensive.

I generally support the bill and applaud the work of the Senator from Wyoming and the Senator from Massachusetts, but I really think this part of the bill is offensive. It violates my sense of priority and ethics. I think it violates our national character.

The House bill last year had this provision on it. They stripped it out. I do not think the House committee will sit still for it if we pass it in the Senate.

Maybe this is not a big thing. There are enough people stacked up in the other preference categories probably to keep this provision from becoming operative maybe at any time but, as they say, it is on the books and I think it ought to be taken off.

I do not think the United States ought to indicate by allowing this to stay on the books that we will sell the United States piece by piece to the wealthiest bidders, to those who may be seeking a safe haven in the United States.

I very strongly believe that the American people would find this provision offensive. I hope my colleagues will support this amendment and that we will strike it.

Mr. President, I am prepared to yield back the remainder of my time. How much time do I have remaining?

The PRESIDING OFFICER. Twenty-four minutes and forty seconds.

Mr. BUMPERS. My understanding was that there was only 20 minutes to be equally divided on the whole amendment.

The PRESIDING OFFICER. There is 1 hour to be equally divided.

Mr. BUMPERS. I am still ready to yield.

Mr. SIMPSON. Mr. President, I think that we did not ask unanimous consent, but it was agreeable that we have 20 minutes.

I have 1 more minute, and I will yield back the remainder of my time.

I hear clearly what the Senator from Arkansas is saying. I respect him greatly. He is a fine friend. I have learned that when he speaks, believe it. I do.

I believe we are placing an unfortunate emphasis on this issue. It seems to have gathered some aspect of threshing out those who should be here for deep humanitarian reasons and these greedy, avaricious souls should not be coming into the picture.

I think that is unfortunate. These numbers are not earmarked. If seed immigrants are needed for exceptional merit and ability or skilled workers, they are in this preference category. What is left over could be for these investors in that category. Investors are in the law now. And so it may not be that there will ever be any of them, as the Senator says, and their numbers will be used up. But if they are not, it cannot exceed 10 percent.

The reason that the matter was stripped from the bill in the House is that the House stripped all reference to changes in legal immigration. That will be one of the things that we will be working on very seriously in the conference.

The intent of the House was very clear. After all, what we are up to in this bill in its essence is control of illegal immigration. But the select commission did deal with some of the legal immigration issues. This was done. It was felt that the whole system is being squeezed out by family reunification and it was time to go back to the things that were part of our original heritage in immigration, seed immigrants, people with capital wanting to invest, but leave it at a very small number and recognize exceptional merit and exceptional ability and skilled labor. This at the tail end of that preference.

I should like to put it back in that balance. At least that is more helpful for me.

Mr. BUMPERS. Mr. President, if I may just take 30 seconds more, this is not in the law now. It was placed on the books by the Attorney General. This body has never enacted legislation of this kind. If we pass this bill and my amendment is defeated, it will be the first time we have ever passed such a thing as this. It was put in arbitrarily by the Attorney General of the United States, not the Congress of the United States.

No. 2, there is a fourth category in this general category that I did not mention because it is under investor preference, but it is called the no preference category. I can conceive of very deserving, desperate people wanting into this Nation and people that we might want to accept but simply because they do not fit any of these other categories are denied because there is somebody in front of them that happens to have $250,000 in his pocket. It would be the shame of this body, it would be the shame of this country, if that happened one time.

Mr. President, I yield back the remainder of my time.

Mr. SIMPSON. Mr. President, I yield back the remainder of my time.

Mr. BUMPERS. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, I believe that may well take care of the remainder of the amendments that we can process or that have been presented with their sponsors in attendance today. Yet, I will certainly remain for that purpose, and I know Senator KENNEDY may be able to remain for a bit of time. At this point we are at least not aware of amendments or sponsors who will be available today, and yet we have certainly pared the list either through accepting amendments or through the stacking of votes.

AMENDMENT NO. 1272

(Purpose: To express the sense of the Senate that the Department of Labor should reexamine its January 4, 1983, rulemaking at 20 CFR Part 655, affecting West Virginia fruitgrowers)

Mr. BYRD. Mr. President, I send an amendment to the desk and ask that it be stated by the clerk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. BYRD), for himself and Mr. RANDOLPH, proposes an amendment numbered 1272.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, add the following:

It is the sense of the Senate that, inasmuch as the Department of Labor promulgated a final rule on January 4, 1983, at 20 CFR 655, described as Labor Certification Process for the Temporary Employment of Aliens in the United States in Agriculture; Adverse Effect Wage Rate; and this rule increased the Adverse Effect Wage Rate for West Virginia by 17.2 percent; and

Inasmuch as the 17.2-percent increase in the Adverse Effect Wage Rate for West Virginia is nearly seven times greater than the increase made for other states affected by the rulemaking; and

Inasmuch as the increase in the Adverse Effect Wage Rate will cause a substantial portion of the West Virginia apple crop to be uncompetitive in the marketplace, and the resulting economic damage to a significant number of apple growers in West Virginia is likely to be severe; and

Inasmuch as the Department of Labor should consider the formal objections of the State of West Virginia, the State of Maryland, and the United States Department of Agriculture to its rulemaking;

The Senate declares that the Department of Labor should re-examine its January 4, 1983 rulemaking at 20 CFR Part 655, affecting the Adverse Effect Wage Rate applied to West Virginia fruitgrowers, with the purpose of seeking a fair and reasonable adjustment to that rate.

DEPARTMENT OF LABOR RULE ON WEST VIRGINIA ADVERSE EFFECT WAGE RATE

Mr. BYRD. Mr. President, the amendment that I have offered, for myself and Senator RANDOLPH, is directed strictly at an unfortunate situation affecting West Virginia.

I refer to a rule promulgated by the Department of Labor on January 4, 1983, at 20 CFR 655, entitled "Labor Certification Process for the Temporary Employment of Aliens in the United States in Agriculture; Adverse Effect Wage Rate." That rule increased the adverse effect wage rate for West Virginia by 17.2 percent.

The adverse effect wage rate is paid to domestic workers any time an employer brings temporary foreign workers—the so-called H-2 workers—into the United States to perform a task being done by domestic labor. The adverse effect wage rate was created to protect domestic workers from the unlimited importation of cheap foreign labor. The adverse effect wage rate is set well above the level of the Federal minimum wage. In 1981, the rate in West Virginia was $3.62.

The purpose of the adverse effect wage rate is to discourage the use of temporary foreign workers. Compliance with the regulations governing the H-2 program is intended to be difficult, so that employers do not have incentives to bring in foreign labor. The experiences of fruitgrowers in West Virginia suggest to me that the adverse effect wage rate and the H-2 program regulations are fully protecting domestic workers.

On January 4, 1983, the Department of Labor promulgated a rule that set an adverse effect wage rate for West Virginia for the 1982 and 1983 harvests. Rates for Vermont and Maine were also set in that rule. West Virginia's rate was increased by 17.2 percent over the 1981 level. The rule provides that 10 percent of the increase be made retroactive to the 1982 harvest, and the remaining 7.2 percent is to be applied to the 1983 harvest. That results in an adverse effect wage rate of $3.98 for 1982, and a rate of $4.24 for 1983.

Maine and Vermont each had their adverse effect wage rate increased by 2.5 percent. The growers in my State fail to understand why they are subjected to a 17.2-percent increase while the two apple-producing States in New England—where agricultural wages have been somewhat higher than in West Virginia in recent years—are only required to increase their adverse effect wage rates by 2.5 percent. Clearly, the data on which the January 4 rule rests needs to be more closely examined.

My amendment declares the sense of the Senate that the Department of Labor should reexamine its January 4 rule as it relates to the adverse effect wage rate applied to West Virginia. The focus of the Department's efforts should be to reevaluate the wage survey data that was used to calculate the 1982 and 1983 adverse effect wage rates for my State.

The validity of the wage survey data and of the methodology used to determine the adverse effect wage rate from that data are the foundation of the January 4 rule. If the data with respect to West Virginia is not valid, or if the methodology used to calculate the rate is flawed, then the rule stands on very shaky grounds.

The U.S. Department of Agriculture expressed formal concerns to the Department of Labor on this matter. The Director of the Economic Development Division of the Economic Research Service of USDA submitted a formal comment in opposition to the Labor Department's use of farm wage survey data. The data is collected by the Department of Agriculture, so USDA's comments on the limitations of the wage survey information cannot be ignored.

Secretary of Agriculture John Block has written to West Virginia's agriculture commissioner, Mr. Gus Douglass, and reaffirmed the criticism expressed by USDA for the Labor Department's use of farm wage survey information. Secretary Block points out that the pending legislation would provide USDA with a consulting role on all H-2 regulations issued by the Department of Labor. That will be beneficial in the future if it will provide USDA with a meaningful role in determining how wage survey data is used by the Labor Department.

While an expanded role for the Agriculture Department in the H-2 program should be helpful in the future, the West Virginia growers need help before the beginning of the 1983 harvest. The growers point out that Virginia and Maryland are not affected by the increase in the adverse effect wage rate. Consequently, a portion of West Virginia's apple crop will not be able to compete in the marketplace if the 17.2-percent increase is forced on growers in my State.

For these reasons, I ask for relief for the West Virginia fruitgrowers, and I hope that the managers will accept my amendment.

Mr. RANDOLPH. Mr. President, I wish to associate myself with the remarks of my able colleague from West Virginia, Mr. (BYRD.) I also take this opportunity to commend the Senator for his sponsorship of amendments to S. 529 which address the urgent needs of the H-2 worker program, and which provide essential improvements. His amendment was included in the immi-

gration bill which the Senate considered last year, and his diligent and effective leadership on this issue is appreciated.

Mr. President, this amendment is straightforward, but it represents more than a sense of the Senate resolution to the constituents in our State of West Virginia. It may save the economic livelihood of producers in our State.

Apples are a major crop in West Virginia and the producers must have a reasonable and stable supply of labor to harvest their crops. The harvesting season is very short, but an adequate labor force must be planned months in advance so that at the time of the picking season, the fruit is harvested without delay. If there are delays, the fruit cannot be salvaged and the crop is lost.

Apple producers in our State have attempted over many, many years to hire Americans to harvest their crops, and they have hired and continue to hire Americans. Some of these domestic workers are West Virginians, but not all of them. Some are workers who travel from State to State to harvest various crops.

Let it be understood, Mr. President, that I am not critical of this segment of our labor force; indeed, the record will show that I have worked diligently over the years as a member of the Senate Committee on Labor and Human Resources to create programs designed to improve and care for the needs of migrant and other agricultural workers. I make no apologies for these programs which address the basic human needs for these hard-working peoples.

But, Mr. President, our State does not supply sufficient workers to harvest apples, and growers have been forced into a situation of hiring foreign labor. In order to hire H-2 alien agricultural workers, the producers must work through the local employment service which recruits workers. If there is an insufficient number of domestic workers available, the U.S. Department of Labor must then certify that a certain number of H-2 workers will be required for that season. The Immigration Service will then authorize the admission of those H-2 workers. That is the process. The point of this is to emphasize that producers must make arrangements to hire agricultural labor, whether domestic or foreign, several months in advance of the first day of harvest. In fact, the work orders anticipating a need for alien workers must go to the employment service early in June for this September's harvest.

The other major requirement in the labor certification process that the producers must meet is the payment of an adequate wage to H-2 workers which does not adversely affect the wages of domestic workers in similar work. The adverse effect wage rate (AEWR) is set by the Department of Labor through regulation.

On January 4, 1983, the U.S. Department of Labor issued a final rule amending its regulations for the certification of nonimmigrant aliens for temporary employment establishing the 1982 adverse effect wage rate for West Virginia and three other States. The Department of Labor issued the rule pursuant to a court order of the U.S. District Court for the District of Columbia in NAACP, Jefferson County Branch, et al. versus Raymond J. Donovan, Civil Action No. 82-2315 (D.D.C. September 3, 1982). The case concerns piece rates for apple harvesting in West Virginia.

The January 4, 1983, rulemaking by the Department of Labor will seriously affect the competitive outlook for West Virginia apple producers because of the exorbitant increase in the 1982 and 1983 adverse effect wage rate. Under the rulemaking, West Virginia fruitgrowers will be required to pay a 17.2-percent increase in the adverse effect wage rate. Under the rulemaking and the Department of Labor methodology, a 10-percent increase would be applied retroactively for 1982, and a 7.2-percent increase would be applied in 1983.

The rulemaking procedure by the Department of Labor was initiated November 19, 1982, with the publication of a proposed rule in the Federal Register. The proposed rule identified four options that had been considered by the Department of Labor. The selection of the most complicated and the one with the most serious, detrimental impact on West Virginia fruit growers was strongly opposed by the growers and by the State of West Virginia and by others who submitted comments during the comment period which expired December 20, 1982.

Clearly, a 17.2-percent increase is unfair and unnecessary. It will put West Virginia producers at a decided disadvantage in this year's fruit marketplace. Perhaps more importantly, the methodology used by the Department of Labor has been soundly criticized by all sides. The validity of the data is questionable. The Labor Department uses data gathered by the U.S. Department of Agriculture, but the sample size is small, and our own West Virginia commissioner of agriculture has formally raised questions about the farm wage data reported in West Virginia on which the adverse effect wage rate was based.

This situation is very difficult for West Virginia fruit producers. In March 1983, the growers protested the retroactive application of the 1982 adverse effect wage rate and the 1983 rate of the Department of Labor. They were subsequently informed that they were ineligible to apply for a temporary labor certification in 1983, thereby prohibiting the availability of nonimmigrant alien agricultural workers.

Representatives of the growers, and the able Senator from West Virginia (Mr. BYRD,) and the Representative from the Second Congressional District of West Virginia (Mr. STAGGERS,) joined me in a personal meeting with the Secretary of Labor, Mr. Donovan, on March 24, 1983. The purpose of the session was to bring this situation to the attention of the Secretary and explore the possibility of administrative relief.

That is where we stand today, Mr. President, and the clock is ticking. The apple harvest in West Virginia is just a few months away, and the work orders must be filed within a few short weeks. Unless some relief is forthcoming, the fruitgrowers in West Virginia will suffer serious economic disadvantage in this harvest season. Without the availability of H-2 workers, the crop may be lost. Historically, there has never been an adequate supply of domestic agricultural labor available in West Virginia to harvest the apple crop. Unless there is some relief in the 17.2-percent increase in the adverse effect wage rate, the producers will be unable to market their crop.

I believe the Department of Labor must reexamine the January 4 rulemaking as it affects West Virginia applegrowers. There is still time, and I hope the responsive and responsible action will be taken.

Mr. BYRD. Mr. President, this is an amendment I have discussed with the two managers of the bill and they have indicated they have thought it over and will accept it. I wish to express my appreciation to them for the consideration that they have given to my amendment.

Mr. KENNEDY. Mr. President, I certainly welcome the Senator's amendment. It certainly appears that there was capricious action by the Department of Labor in this case. I think the amendment of the Senator from West Virginia deals with that and I hope the Senate will agree to it.

Mr. BYRD. I thank the distinguished Senator.

Mr. SIMPSON. Mr. President, Senator BYRD, throughout the deliberations on this bill, has had this very serious problem with the agricultural community in West Virginia with regard to apples, especially apple pickers. This adverse effect wage rate is designed to prevent employment of H-2 agricultural workers from depressing wages and working conditions for U.S. workers. Any increase in the adverse effect wage rate would indicate that the Department of Labor has found the prevailing rate in the area to be substantially higher than the rate being paid to foreign temporary workers. It is an important thing for the

protection of American workers. If this increase for West Virginia apple pickers and those in certain areas of agriculture is inexplicably higher than the increase for those agricultural workers in other areas, it would seem appropriate to accept the amendment, and we will do so.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Wyoming. The increase is 17.2 percent as against something like 2 or 3 percent in other areas. We think it is unfair. I thank both Senators.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia (Mr. BYRD).

The amendment (No. 1272) was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

STATUS OF HAITIANS

Mr. KENNEDY. Mr. President, during the course of our debate on this bill I believe it is essential that we take notice of the special plight of many Haitian refugees and entrants whose immigration status remains in limbo under the provisions of this bill.

When we first proceeded to this bill 2 weeks ago, I offered an amendment to move forward the legalization date contained in the bill, to assure that the legalization program will achieve its goals—and that is to legalize as many undocumented aliens as possible in order to remove this exploited subclass from our society. My amendment also would have specifically included those Haitian refugees and entrants whose status remains to be clarified.

Regrettably, Mr. President, my amendment was not accepted, and the provisions contained in the pending bill fails to address the plight of these Haitians. These Haitian "boat people" have already suffered terribly in fleeing their homeland and being subject to illegal detention. It would be tragic if we did not include them in the legalization program authorized by this legislation.

Federal courts have twice found that the Haitian boat people were illegally imprisoned by the Immigration Service in violation of the Constitution. Most recently, they have held that this detention policy was so selective as to be discriminatory. Beginning in May 1981, under orders of the Attorney General, more than 2,000 Haitians were imprisoned without bond in remote Federal facilities for 15 to 18 months. The Court of Appeals for the 11th Circuit, on April 12, 1983, found that this detention policy was in violation of the fifth amendment of the Constitution, and that the U.S. Government had intentionally discriminated against Haitians in implementing the policy.

Haitian refugees otherwise indistinguishable from this class, arriving prior to the illegal detention program, have already benefited from President Carter's decision to grant them "entrant" status. Fundamental justice demands that the boat people who have fled to our shores seeking safety and who have suffered additionally under illegal detention, but who were not eligible for "entrant" status, be granted similar protections. It is unjust and unnecessarily harsh for the Immigration Service to continue to threaten this small group of Haitian people with forcible deportation to Haiti.

The uniqueness of the situation of the Haitian boat people and the discriminatory treatment they have suffered has been well established. Special provision relating to Haitian refugees has been included in versions of the immigration legislation in both Houses of Congress this year and last. However, these provisions fall short of regularizing the status of Haitian boat people who were subject to the administration's detention policy.

I hope that we will rectify this omission and agree to a comprehensive legalization program that will resolve the legal status of all the Haitian boat people. This goal has the broad-based support of church, civil and human rights groups, trade unions, labor, and legal groups, who have clearly spoken out in support of these important issues.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from the executive committee of the Leadership Conference on Civil Rights, an organization representing over 175 national civil rights and human rights organizations, calling on the Senate to enact a comprehensive legalization program and maintain judicial review of asylum determinations, and a related memorandum.

The being no objection, the letter and attachment were ordered to be printed in the RECORD, as follows:

LEADERSHIP CONFERENCE
ON CIVIL RIGHTS,
Washington, D.C., April 28, 1983.

DEAR SENATOR: We, the undersigned organizations, traditionally concerned with civil rights and civil liberties, are writing to you about a matter of the utmost urgency. We are joined together in a common concern that the Simpson immigration legislation, S. 529, now being considered by Congress must include a comprehensive legalization program as an integral part of any meaningful reform of our immigration laws. Second, the heretofore guaranteed right of all persons seeking political asylum in this country to judicial review of administrative agency action must be maintained. The right of access to the courts is essential to insure fair and non-discriminatory enforcement of the law.

We therefore urge that you support when the bill comes to the Senate floor for debate: (1) amendments providing for a comprehensive legalization program and (2) an amendment to restore full judicial review.

In the spirit of the recommendations of the Select Commission on Immigration and Refugee Policy, we believe that all otherwise eligible undocumented persons present in the U.S. as of January 1, 1983, should be granted permanent legal status in this country.

Such a comprehensive legalization program is also the most just and most practical solution to the unique plight of the Haitian refugee "boat people", who are still faced with forcible deportation to Haiti. Federal courts have twice found that these Haitian boat people were illegally imprisoned by the Immigration Service in violation of the U.S. Constitution; most recently they have held that this detention policy was so selective as to be discriminatory. Though they had committed no crime, more than 2,000 Haitians were imprisoned without bond in isolated federal facilities for between 15 and 18 months beginning in May 1981, under orders of the Attorney General. The 11th Circuit Court of Appeals on April 12, 1983, found that this detention policy was in violation of the Fifth Amendment of the Constitution, and that the U.S. Government had intentionally discriminated against Haitians in implementing the policy.

Other Haitian refugees otherwise indistinguishable from this class, arriving prior to the illegal detention program, have already benefitted from President Carter's decision to grant them "entrant" status. Fundamental justice demands that the boat people who have fled to our shores seeking safety and who have suffered additionally under illegal detention, benefit from these same protections. It is simply unjust and cruel for the Immigration Service to continue to threaten this small group of Haitian boat people with forcible deportation back to the Haiti from which they fled almost two years ago.

The undersigned organizations join in endorsing a legalization program granting permanent residency to all eligible undocumented persons arriving in the U.S. as of January 1, 1983. However, should a partial legalization program not include the previously-detained Haitian boat people, elementary justice demands that separate provision be made in the legislation granting legal status to Haitians arriving before January 1, 1982, thereby recognizing their unique plight and suffering.

Thank you for carefully considering our recommendations regarding the necessity of a truly comprehensive legalization program and of maintaining fundamental rights of judicial review of administrative agencies, when the Senate considers this exceedingly important legislation.

Sincerely,

BENJAMIN L. HOOKS,
Chairperson.
RALPH G. NEAS,
Executive Director.

THE PLIGHT OF THE HAITIAN REFUGEES AND THE RESPONSE OF THE NATIONAL EMERGENCY COALITION FOR HAITIAN REFUGEES

Since 1958, approximately one-eighth (⅛) of the population of Haiti has fled from their homeland to escape the cumulative effects of the twenty-five (25) years of Duvalier family rule. A small part of this dias-

pora has sought haven in the United States. In the last eight years approximately 35,000 refugees have risked their lives across 800 miles of hazardous ocean to seek safety and asylum in the U.S. These are the "boat people" whose total numbers are minuscule when compared to other refugee groups warmly and continuously received by our government. Despite the desperate nature of their plight, confirmed by repeated reports by Amnesty International, the Inter-American Commission on Human Rights of the Organization of American States, and other respected human rights organizations, detailing systematic violations of human rights in Haiti, these refugees have received harsh and discriminatory treatment from our government, unprecedented in the history of the United States.

The National Emergency Coalition for Haitian Refugees was formed in response to this emergency, and in particular to the jailing by order of the Attorney General on July 31, 1981, of more than 2000 boat people who had arrived on our shores and claimed political asylum. On March 2, 1982, a number of prominent religious, civil rights, human rights, Haitian, labor and national voluntary agency organizations formed the Coalition to secure humane treatment, due process of law and the immediate release to sponsors for these refugees who were imprisoned in ten remote locations around the United States.

This emergency continues: pursuant to a Federal Court decision of June 29, 1982, that the imprisonment of the Haitian boat people was unlawful, the refugees were finally released to sponsors in over 20 states by the end of November 1982. However, despite the unprecedented harsh treatment they have suffered in our country during the last two years:

(1) These refugees still face the imminent threat of forced deportation to Haiti by the Immigration and Naturalization Service.

(2) The boat people face many urgent legal problems such as understanding and complying with the intricate and onerous conditions of their temporary release program, securing qualified attorneys, interpretors, and expert witnesses.

(3) The refugees are also confronted with social problems including securing employment and learning English.

WHAT ARE THE IMMEDIATE GOALS OF THE NATIONAL EMERGENCY COALITION FOR HAITIAN REFUGEES?

The National Emergency Coalition for Haitian Refugees includes all the major organizations working to assist the Haitian boat people, and our activities are carefully coordinated to complement existing programs. Because of our broad-based composition and the national stature and expertise of our member groups, the Coalition is in a unique position to provide specific assistance to these refugees while educating the public as to their plight:

1. The Coalition helps assure that the 1800 boat people released from detention under the Haitian Interim Placement Program receive procedural and substantive due process of law and humane treatement in the adjudication of their asylum claims. The Coalition assists volunteer lawyers, presenting information on conditions in Haiti at attorney training sessions, and providing expert testimony at individual asylum hearings where appropriate.

2. The Coalition is coordinating a national campaign to urge the Reagan Administration to immediately halt the suffering of the boat people by a simple executive act of extending the "cut-off" date of the Cuban-Haitian Entrant program established by the Carter Administration. By extending this program from the current date of October 10, 1980, to the date when Judge Spellman finally ordered the Haitians released—June 29, 1982—these refugees will be guaranteed that the cruel threat of forced deportation will no longer hang over their heads, while the exact status of their residence will be determined later by an act of Congress. This campaign includes gaining support for a sense of Congress resolution asking the President to extend the "entrant" date to include the boat people in the program, and sponsoring a national petition to be endorsed by major national organizations and prominent individuals.

This campaign also includes local affiliates of Coalition members as the nucleus of regional efforts in Florida, New York and Massachusetts, to heighten public consideration of the propriety and necessity of this administrative grant of legal status, and to encourage the Congressional delegations in these strategically crucial states to urge the President to act now to end the torment of the Haitian refugees.

3. The Coalition acts as a clearinghouse of information for, and sponsors meetings between, legal groups, national voluntary agencies, Haitian and local community groups and the refugees themselves with regard to the Haitian Interim Placement Program ordered by the Federal District Court in Florida. The Coalition coordinates the communication of concerns and suggestions regarding this program to governmental and civic leaders. The Coalition monitors the Interim Placement Program and the legal proceedings, producing bi-lingual publications for the refugees and sponsors, distributing information to national civic groups and governmental leaders locally and nationally, and reporting to the Court Committee on Haitian Refugees appointed by Judge Spellman in Florida.

4. The Coalition will continue to provide attorneys, legal groups, Coalition members and concerned Congressional and civic leaders with detailed materials concerning important human rights developments in Haiti, for use in the preparation of claims for asylum and possible federal litigation in support of the due process rights of the boat people, and as necessary to heighten public consideration of the necessity of extending "entrant" status to the refugees.

5. The Coalition encourages the formation of coalitions of local affiliates of our national members and other local organizations in certain of the more than 150 communities where Haitians have been placed. These groups enhance our ability to educate local communities as to the merits of extending "entrant" status to the refugees.

6. The Coalition exchanges information with Central American refugee support groups on matters of common concern, and explores ways of cooperating in assuring due process of law and humane treatment of asylum seekers. The Coalition supports the clear mandate of the Refugee Act of 1980, that asylum claims should be adjudicated on their individual merits without regard to whether the U.S. government is or is not allied with the country of the asylum seeker's birth or nationality.

7. The Coalition distributes to its members and other interested organizations information and analysis concerning national legislative and administrative policy developments that directly impact on Haitian refugees. The Coalition will continue to prepare analyses of immigration legislation pending in Congress, with particular emphasis on proposals for a comprehensive legalization program, for maintaining judicial review of asylum claims, and against summary exclusion of potential asylum claimants.

National Member Organizations of the Emergency Coalition for Haitian Refugees: AFL-CIO; A. Philip Randolph Institute; American Civil Liberties Union; American Council for Nationalities Service; American Friends Service Committee; American Jewish Committee; Catholic League for Religious and Civil Rights; Center for the Social Sciences, Columbia University; Church World Service of the National Council of Churches; Comite Interregional Pour Refugies Haitiens, Inc.; Committee for the Defense of Haitian Refugees; International Ladies Garment Workers Union; International Rescue Committee; Lawyers Committee for International Human Rights; Lutheran Immigration and Refugee Service; NAACP; National Catholic Conference for International Justice; National Center for Immigrants Rights, Inc.; National Conference of Catholic Bishops; National Conference of Catholic Charities; National Emergency Civil Liberties Committee; National Urban League, Inc.; Synagogue Council of America; Unitarian Universalist Service Committee; United States Catholic Conference; and YMCA of the USA.

11TH CIRCUIT COURT OF APPEALS FINDS IMMIGRATION SERVICE DETENTION OF HAITIAN "BOAT PEOPLE" ILLEGAL AND DISCRIMINATORY

On April 12, 1983, in the case of *Louis et al.* v. *Alan C. Nelson*, the United States Circuit Court of Appeals for the 11th Circuit in Atlanta assailed the U.S. Government's treatment of the Haitian refugee "boat people" seeking safety in this country, and upheld a District Court opinion that the official policy of detaining the Haitians was illegal. The Appeals Court found that the Government had used immigration policy against the Haitians in a discriminatory fashion, in violation of the Fifth Amendment of the U.S. Constitution and its guarantee of due process and equal protection under the law. The unprecedented court decision further emphasizes the uniqueness of the Haitians' plight and their extraordinary suffering: this is the first time in American legal history that an Appeals Court has found the U.S. Government guilty of discrimination on constitutional law grounds, except in the employment discrimination context.

The Appeals Court further held that the advocacy groups seeking to give the detained Haitians counsel had a constitutional right to do so under the First Amendment and that the detainees had the right to seek counsel. This access had been substantially denied by the Immigration Service.

Representative selections from this landmark decision follow. The numbers in parentheses refer to the appropriate page in the unpublished opinion.

"On September 30, 1981, in a strongly worded opinion, the district court certified the class. The court found the INS was playing 'a human shell game' with the Haitians, moving them around the country to desolate areas without available counsel or communication facilities. The court further found faulty the INS proceedings whereby eleven Haitians were deported; these proceedings included mass hearings, behind

closed doors, without counsel or adequate translators." (5)

"The problem here is the fiction that excludable aliens are not within the 'territorial limits' of the United States. Though that fiction serves its purpose to limit the procedural rights of an excludable alien 'regarding his application' for admission, *Landen* v. *Plascencia, supra,* it strains credulity to maintain that an alien within our territorial limits may claim none of the rights accorded our citizens." (54)

"At trial plaintiffs introduced a wealth of statistical evidence to show the vastly disproportionate impact on the government's detention policy on Haitian, as opposed to non-Haitian, immigrants." (62)

"Dr. Gitlow found in each of the three compilations that the chance of so many more Haitians than non-Haitians being detained, or so many fewer Haitians paroled was 'on the order of less than two in ten billion times.' In some cases it was 'far less than one in ten billion,' or 'a statistical joke.'" (64)

"All told plaintiffs mustered an impressive array of witnesses and an equally impressive number of documents to demonstrate circumstantially, and to an extent, directly, intentional government discrimination against Haitians. This evidence, in addition to the statistical evidence, was unrebutted but for the government's testimonial evidence, which can at best be termed 'mere protestation.'" (76)

In this case we have no confidence that the alleged violations ever will be remedied in subsequent administrative or habeus proceedings . . . eleven Haitians had already been deported pursuant to 'faulty' procedures. Not only was lack of representation a problem, but evidence taken at the preliminary injunction hearings indicated that Creole translators often erred in translations, failed to give proper notice of the right to apply for asylum, or to appeal the decision of the immigration judge." (100)

"The record shows that Haitians arrive in this country unschooled in our language and largely in ignorance of our legal system. The record also indicates that 'even in Miami, where INS Creole translators are presumably proficient, the translations at these (exclusion) proceedings are woefully inadequate.' Given this state of affairs we can hardly expect the Haitians arriving at our shores to be aware of, and prepared to exercise, their right to claim asylum." (107)

"Evidence at trial identified significant restrictions on Haitian access to legal counsel, restrictions on Haitian contact with relatives and friends in the Miami community, and efforts to prevent H.R.C. (Haitian Refugee Center) attorneys from approaching Haitians to inform them of their legal rights." (108)

PLIGHT OF THE HAITIAN BOAT PEOPLE

Mr. MOYNIHAN. Mr. President, I would like to draw the attention of the Senate to the particular circumstances of an especially disadvantaged group of undocumented aliens in the hope that constitutional protections granted to other groups of undocumented aliens may be applied equally to these persons. As S. 529 has come to the floor, it would not permit their legalization, though the companion measure in the House would.

I refer, of course, to the plight of the Haitian boat people, some 2,000 Haitian refugees who have sought sanctuary in this country from oppressive conditions in their native land. Most of the group in question arrived in the course of 1980.

That Haiti is a place from which refugees should be expected—as, say, the Soviet Union or Iran are places from which we should, and do, expect persons to flee—has been established. The current edition of "Freedom in the World," the indisputably sober-minded annual accounting of the status of political rights and civil liberties around the globe, published each year by Freedom House, summarizes life in Haiti in these words:

Haiti is a dictatorship. . . . Attempts at independence in journalism were severely repressed in 1980 . . . A government-sponsored militia has suppressed opposition; political murders, imprisonment without trial, exile, and torture have characterized the system intermittently. An acceptable rule of law has been in abeyance during a prolonged "state of seige"; property has been seized indiscriminantly by security forces. Many people attempt to flee the country illegally every year.

Not surprisingly, given the facts of geographical proximity and the reputation of the United States as a haven for refugees, many of these persons come to this country.

Since May 1981, it has been the policy of the administration to keep, or to try to keep, these refugees imprisoned without bond pending final resolution of their asylum requests by the Immigration and Naturalization Service.

Twice in recent months, Federal courts have determined that these Haitian boat people were incarcerated in violation of constitutional guarantees of due process. Last June, in Miami, Federal District Court Judge Eugene Spellman ordered that 1,800 Haitians then imprisoned be released because the procedures according to which these persons were detained violated U.S. statute. Although those 1,800 were released, the administration appealed that ruling and continued to detain arriving Haitian immigrants in like fashion. Last month, the U.S. Court of Appeals for the 11th Circuit, in Atlanta, not only rejected that appeal by the Government but found, moreover, that the policy of detaining Haitians was discriminatory.

Judge Phyllis Kravitch, writing for the three-judge panel, spoke of "a stark pattern of discrimination . . . There was ample unrebutted evidence that (the Haitians) were denied equal protection of the law, as mandated both by the Constitution and our interpretation of the Congress' enabling legislation."

According to the New York Times of April 14, the court determined also that the detained Haitians had not been adequately informed of their rights to petition for political asylum and to seek legal counsel. We are obliged to consider what remedy should be provided for the uniquely difficult circumstance of the Haitian boat people, exacerbated by the blatantly discriminatory treatment they have suffered during their time in the United States—for what other reason exists for the shameful manner in which they have been abused than that the color of their skin is black?

Provision relating to the situation of these refugees is included as section 301 of S. 529. But this provision falls well short of regularizing the status of the Haitian boat people. Recently, a number of distinguished and respected observers of the American judiciary have pointed to the unfairness of excluding from the legalization provisions of S. 529 this group of immigrants. On behalf of the Leadership Conference on Civil Rights, Benjamin L. Hooks wrote to me on April 28:

Other Haitian refugees otherwise indistinguishable from this class, arriving prior to the illegal detention program, have already benefited from President Carter's decision to grant then "entrant" status. Fundamental justice demands that the boat people who have fled to our shores seeking safety and who have suffered additionally under illegal detention, benefit from these same protections. It is simply unjust and cruel for the Immigration Service to continue to threaten this small group of Haitian boat people with forcible deportation * * *

A similar appeal has been voiced by spokesmen for 35 community, labor, civil rights, and religious groups in southern Florida—the region of the country most directly affected by the Haitian arrivals:

Should a partial legalization program not include the previously detained Haitian boat people, elementary justice demands that separate provision be made in the legislation granting legal status to Haitians arriving before January 1, 1982, thereby recognizing their unique plight and suffering.

I support the goals of a legalization program in the Simpson immigration bill. The Judiciary Committee's report of title III of S. 529 specifies in part that the legalization be a "one-time only" program that eliminates the subclass of undocumented persons who now constitute a clearly exploitable group within U.S. society and sap unnecessarily the resources of law enforcement agencies. To achieve this goal, a legalization program must be as comprehensive and current as possible.

Mr. President, I urge that the Senate-House conference committee carefully consider the merits of a truly comprehensive legalization program. Such provision would be the fairest and most practical solution to the unique plight of the Haitian refugee boat people, who continue to face forcible deportation to Haiti.

I ask that there be printed in the RECORD at this point the text of the letter to which I have referred from Mr. Benjamin L. Hooks, signed also by Mr. Ralph Neas, executive director of

the leadership conference, as well as the public statement issued by southern Florida civil organizations, an editorial that appeared in the New York Times, and a recent report from that newspaper about the decision last month of the 11th Circuit Court of Appeals.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LEADERSHIP CONFERENCE
ON CIVIL RIGHTS,
Washington, D.C., April 28, 1983.

DEAR SENATOR: We, the undersigned organizations, traditionally concerned with civil rights and civil liberties, are writing to you about a matter of the utmost urgency. We are joined together in a common concern that the Simpson immigration legislation, S. 529, now being considered by Congress must include a comprehensive legalization program as an integral part of any meaningful reform of our immigration laws. Second, the heretofore guaranteed right of all persons seeking political asylum in this country to judicial review of administrative agency action must be maintained. The right of access to the courts is essential to insure fair and non-discriminatory enforcement of the law.

We therefore urge that you support when the bill comes to the Senate floor for debate: (1) amendments providing for a comprehensive legalization program and (2) an amendment to restore full judicial review.

In the spirit of the recommendations of the Select Commission on Immigration and Refugee Policy, we believe that all otherwise eligible undocumented persons present in the U.S. as of January 1, 1983, should be granted permanent legal status in this country.

Such a comprehensive legalization program is also the most just and most practical solution to the unique plight of the Haitian refugee "boat people", who are still faced with forcible deportation to Haiti. Federal courts have twice found that these Haitian boat people were illegally imprisoned by the Immigration Service in violation of the U.S. Constitution; most recently they have held that this detention policy was so selective as to be discriminatory. Though they had committed no crime, more than 2000 Haitians were imprisoned without bond in isolated federal facilities for between 15 and 18 months beginning in May 1981, under orders of the Attorney General. The 11th Circuit Court of Appeals on April 12, 1983, found that this detention policy was in violation of the Fifth Amendment of the Constitution, and that the U.S. Government had intentionally discriminated against Haitians in implementing the policy.

Other Haitian refugees otherwise indistinguishable from this class, arriving prior to the illegal detention program, have already benefited from President Carter's decision to grant them "entrant" status. Fundamental justice demands that the boat people who have fled to our shores seeking safety and who have suffered additionally under illegal detention, benefit from these same protections. It is simply unjust and cruel for the Immigration Service to continue to threaten this small group of Haitian boat people with forcible deportation back to the Haiti from which they fled almost two years ago.

The undersigned organizations join in endorsing a legalization program granting permanent residency to all eligible undocumented perons arriving in the U.S. as of January 1, 1983. However, should a partial legalization program not include the previously detained Haitian boat people, elementary justice demands that separate provision be made in the legislation granting legal status to Haitians arriving before January 1, 1982, thereby recognizing their unique plight and suffering.

Thank you for carefully considering our recommendations regarding the necessity of a truly comprehensive legalization program and of maintaining fundamental rights of judicial review of administrative agencies, when the Senate consider this exceedingly important legislation.

Sincerely,

BENJAMIN L. HOOKS,
Chairperson.
RALPH G. NEAS,
Executive Director.

SOUTHERN FLORIDA CIVIC ORGANIZATIONS APPEAL FOR COMPREHENSIVE LEGALIZATION AS ESSENTIAL TO IMMIGRATION REFORM

We, the undersigned, representing communities and organizations in southern Florida, are writing to you about a matter of the utmost urgency. We are joined together in a common concern that the Simpson-Mazzoli immigration legislation now being considered by Congress must include a comprehensive legalization program as an integral part of any meaningful reform of our immigration laws. Second, the heretofore guaranteed right of all persons seeking political asylum in this country to judicial review of administrative agency action must be maintained. The right of access to the courts is essential to insure fair and non-discriminatory enforcement of the law.

In the spirit of the recommendations of the Select Commission on Immigration and Refugee Policy, we believe that all otherwise eligible undocumented persons present in the U.S. as of January 1, 1983, should be granted permanent status in this country.

Such a comprehensive legalization program is also the most just and most practical solution to the unique plight of the Haitian refugee "boat people", who are still faced with forcible deportation to Haiti. Though they had committed no crime, more than 2,000 Haitians were imprisoned without bond in isolated federal facilities for between 15 and 18 months begining in May 1981, under orders of the Attorney General. The 11th Circuit Court of Appeals in Atlanta on April 12, 1983, found that this detention policy was in violation of the Fifth Amendment of the U.S. Constitution, and that the U.S. Government had intentionally discriminated against Haitians in implementing the policy.

Other Haitian refugees otherwise indistinguishable from this class, arriving prior to the illegal detention program, have already benefited from President Carter's decision to grant them "entrant" status. Fundamental justice demends that the boat people who have fled to our shores seeking safety and who have suffered additionally under illegal detention, benefit from these same protections. It is simply unjust for the Immigration Service to continue to threaten this small group of Haitian boat people with forcible deportation back to the Haiti from which they fled almost two years ago.

The undersigned organizations join in endorsing a legalization program granting permanent residency to all eligible undocumented persons arriving in the U.S. as of January 1, 1983. However, should a partial legalization program not include the previously detained Haitian boat people, elementary justice demands that separate provision be made in the legislation granting legal status to Haitians arriving before January 1, 1982, thereby recognizing their unique plight and suffering.

Thank you for carefully considering our recommendations regarding the necessity of a truly comprehensive legalization program and of maintaining fundamental rights of judicial review of administrative agencies, during the mark-up of this exceedingly important legislation.

[From the New York Times, Apr. 14, 1983]

HAITIANS' LAWYERS HAIL COURT RULING

MIAMI, April 13.—Lawyers who led a long fight to have Haitian refugees released from Government detention centers today hailed an appeals court decision that the Government policy was discriminatory.

"We think this is going to be a landmark case in the immigration field," said Ira Kurzban, who argued for the Haitians last

year before Federal District Court Judge Eugene Spellman.

The United States Court of Appeals for 11th Circuit, in Atlanta, on Tuesday rejected an appeal by the Immigration and Naturalization Service of Judge Spellman's ruling on June 18 that the detention of about 1,800 Haitians was illegal.

The appeals court went further than Judge Spellman, who found no specific discrimination against Haitians as a race. The three-judge appeals panel decided there was "a stark pattern of discrimination."

"DENIED EQUAL PROTECTION"

Judge Phyllis Krayitch wrote, "There was ample unrebutted evidence that plaintiffs were denied equal protection of the laws."

The appeals court also agreed the detained Haitians had not been adequately informed of their rights to petition for political asylum and seek legal counsel.

The decision "establishes the right of the protection of the U.S. Constitution to aliens who have been incarcerated," Judge Kurzban said. "It has substantial implications for Salvadorans, Nicaraguans—anyone else coming into the States."

Dale Schwartz, a lawyer who represents Cubans jailed in the Atlanta Federal penitentiary, said the appeals court ruling "has far reaching effects on future immigration policy, particularly as it applies to persons seeking political asylum."

"It makes it clear that the determination on asylum should not be a political decision on the part of whatever administration happens to be in office at the time," he said.

PROFESSOR PLANNED STRATEGY

Bruce Winick, a law professor at the University of Miami who planned strategy for the Haitians at the hearings before Judge Spellman, said: "This goes considerably further than Judge Spellman did. It really vindicates the position we have taken all along."

The appeals court wrote: "Although we hold that the executive has the power when properly delegated to fashion such policies as are necessary to protect our borders and ensure orderly entry of aliens, those policies must be administered in nondiscriminatory manner."

The court ordered Judge Spellman to take whatever measures were necessary to guarantee "that all aliens, regardless of their nationality or origin, are accorded equal treatment."

The Haitians ordered released by Judge Spellman will remain free awaiting immigration hearings.

Professor Winick said the new ruling could affect about 100 Haitians who have arrived since the others were freed. The new arrivals are being held at Miami's Krome Avenue detention center. The professor said the decision should ensure they are advised of their rights and granted access to lawyers.

About 30 Nicaraguans and 130 Salvadorans are also held at the detention center.

[From the New York Times, May 12, 1983]

REFUGEES AND REFOULEMENT

There's a hard question to be asked about the thousands of undocumented aliens from Afghanistan or Haiti or El Salvador seeking a haven in the United States: Are they legitimate refugees?

If they have a well-founded fear of persecution in their home country, the answer is yes and they are entitled to sanctuary, or asylum as it is formally called. To send them home would risk committing the unforgivable diplomatic sin of refoulement—forcibly subjecting them to peril.

But what if they are not legitimate refugees? Then they are just another form of gate-crasher, ready to confuse refute and subterfuge. To send them home would be only fair, signaling to other would-be illegal entrants that Americans are compassionate but not suckers.

All that raises an even harder question, one that the Senate must answer as it takes up the Simpson-Mazzoli immigration reform bill: How should Government decide who is a refugee? On this potentially life-or-death point, the generally admirable Senate bill is harsh, hasty and in need of amendment.

The who-is-a-refugee decison is now made in case-by-case hearings, the results of which may be appealed to the courts. Until the Refugee Act of 1980, that meant a moderate backlog of 5,800 cases. Since then, however, claims for asylum have shot up. The backlog now exceeds 120,000 cases. How should Washington treat all those aliens while their cases are pending? It's a tormenting problem.

To release them and let them live and work in the community could mock equity; final determinations often take years. Even if their refugee claims were ultimately rejected, the example would encourage specious or dilatory claims. The other possibility is to incarcerate applicants pending adjudication, as the Administration has done with Haitians and now with some Afghans. That's even worse. To treat as criminals people who might well be legitimate refugees is to punish victims.

There is an obvious remedy: Speed up the hearing process, which is just what the Senate is heading toward. But the Senate bill streamlines procedure too harshly.

Decisions verging on refoulement ought to involve some independent judgment. The hearing examiners should stand apart from the executive branch, or their findings should be reviewable by the courts. But the Senate bill, reflecting fear of ever more "refugees," provides no independence and almost no room for appeal. That could have merciless results.

Imagine a Haitian washed up on a Florida beach. A hearing examiner might reject his claim for asylum, in deference to the State Department's finding that Haitians generally are not subject to persecution. But what if this particular Haitian had plenty of reason to fear persecution?

The Senate bill offers him little recourse. But Senator Edward Kennedy would, with sensible amendments to create independent hearing officers and to preserve limited rights of appeal. The Simpson-Mazzoli bill is good; these amendments would make it better.

Mr. RIEGLE. Mr. President, I would like to join my colleagues in expressing my concern for the Haitian refugees who would not be covered by this legalization program.

I believe that these Haitians have unduly suffered from disciminatory treatment, resulting in prolonged imprisonment, separation from their families, and denial of fundamental due process protections, and, therefore, deserve special consideration.

In fact, the 11th Circuit Court found in its recent decision in Louis against Nelson that:

All told, the plaintiffs mustered an impressive array of witnesses and an equally impressive number of documents to demonstrate circumstantially, and to an extent, directly, intentional government discrimination against Haitians.

This evidence, in addition to the statistical evidence, was unrebutted except for the Government's testimonial evidence, which can best be termed "mere protestation."

Specifically, the court found that:

Evidence at trial identified significant restrictions on Haitian access to legal counsel, restrictions on Haitian contact with relatives and friends in the Miami community, and efforts to prevent Haitian refugee center attorneys from approaching Haitians to inform them of their legal rights.

Such actions have already led to the deportation of several Haitians under proceedings which the administration itself has admitted were faulty. The cases of many others may have been prejudiced beyond repair.

Mr. President, many prominent national leaders of church, civil rights, and labor organizations, as well as their corresponding representatives from south Florida, have requested that the Haitians be granted special protection in light of these abuses.

I would like to join them and my other colleagues in requesting that our Senate Members to the Conference Committee on this bill take these concerns into consideration in their work with the House Members. As the Leadership Conference on Civil Rights has stated:

Elementary justice demands that separate provision be made in the legislation granting legal status to Haitians arriving before January 1, 1982, thereby recognizing their unique plight and suffering.

Mr. SIMPSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have been told unofficially by the manager of the bill that no other Senator is prepared to offer amendments today. May I inquire if the manager is ready for us to leave this bill for this day and to continue the work tomorrow?

Mr. SIMPSON. Mr. President, I would say to the majority leader that that is the situation as I see it. We have exhausted efforts to bring further sponsors of amendments to the floor, but we have also thinned out the time agreements between the sponsors and the managers, and we should be able to complete our work tomorrow, as the majority leader has stated.

Mr. BAKER. I thank the manager. He has covered an extraordinary amount today. I commend the chairman of the committee (Mr. SIMPSON)

and the ranking minority member (Mr. KENNEDY) for their very excellent work on this complex matter.

According to the accounts I have, there are six amendments on which rollcall votes have been ordered to begin at 2 p.m. tomorrow, after the Ruckelshaus nomination, which, according to the order previously entered, will be the first vote.

That is good progress. I share the Senator's hope that tomorrow we can finish this bill even before the hour appointed in the unanimous-consent agreement.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, in view of these statements just made by the distinguished manager, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 6 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—S. 336

Mr. BAKER. Mr. President, I now have a unanimous-consent request in respect to S. 336, which appears to be cleared for consideration at this time. I will state it for the benefit of the minority leader and other Senators.

Mr. President, I ask unanimous consent that when the Senate turns to the consideration of Calendar Order No. 139, S. 336, a bill to increase the penalties for violations of the Taft-Hartley Act, that it be considered under the following time agreement: 1 hour on the bill to be equally divided between the Senator from Utah (Mr. HATCH) and the Senator from Georgia (Mr. NUNN) or their designees; 10 minutes on any debatable motion, appeal, or point of order if the same is presented to the Senate; further, that no amendment be in order with the exception of the committee reported amendments, and that the agreement be in the usual form.

I may say before the Chair puts the request, Mr. President, that it is my intention, and I now so acknowledge, to consult with the minority leader before this matter is scheduled to be called up. Now I put the request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The text of the agreement follows:

Ordered, That when the Senate proceeds to the consideration of S. 336 (Order No. 139), a bill to increase the penalties for violations of the Taft-Hartley Act, no amendments be in order, except the committee reported amendments, and that debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 10 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided*, That in the event the manager of the bill is in favor of any such motion, the time in opposition thereto shall be controlled by the minority leader or his designee.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 1 hour, to be equally divided and controlled, respectively, by the Senator from Utah (Mr. Hatch) and the Senator from Georgia (Mr. Nunn), or their designees: *Provided*, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any debatable motion, appeal, or point of order.

Mr. BAKER. Mr. President, I have a number of other requests which appear to be cleared for action by unanimous consent.

ORDER DISCHARGING THE ENVIRONMENT AND PUBLIC WORKS COMMITTEE FROM FURTHER CONSIDERATION OF SENATE RESOLUTION 140

Mr. BAKER. Mr. President, next I would say to the minority leader that I would propose to discharge the Environment and Public Works Committee from further consideration of Senate Resolution 140, if there is not objection.

Mr. BYRD. I have no objection.

Mr. BAKER. Mr. President, I ask unanimous consent that the Environment and Public Works Committee be discharged from further consideration of Senate Resolution 140, a resolution to celebrate the 50th anniversary of the Tennessee Valley Authority, a public enterprise that works, and I ask that it be placed on the calendar.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

SEQUENTIAL REFERRAL OF A BILL—S. 1230

Mr. BAKER. Mr. President, I have a proposal for sequential referral. I would say to the minority leader that I would propose sequential referral for S. 1230, a bill to authorize intelligence activities for fiscal year 1983, to the Armed Services Committee for not to exceed 30 days, if there is no objection.

Mr. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I put that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE CALENDAR

Mr. BAKER. Now, Mr. President, could I inquire of the minority leader if he would be in a position to consider items on today's Executive Calendar? I would especially invite the attention of the minority leader to items which have been cleared on this side for action by unanimous consent. They are Calendar Order 157, on page 4, under the heading "United States Claims Court," and all the nominations on page 5.

I am prepared to proceed to the consideration of those items at this time, if the minority leader is similarly inclined.

Mr. BYRD. Mr. President, those items have been cleared on this side of the aisle.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations just identified.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations so identified, being Nos. 157, 158, 159, 160, and 161, be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

U.S. CLAIMS COURT

Moody R. Tidwell III, of Virginia, to be a judge of the U.S. Claims Court for a term of 15 years.

DEPARTMENT OF STATE

Malcolm R. Barnebey, of Texas, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Belize.

UNITED NATIONS-INTERNATIONAL ATOMIC ENERGY AGENCY

Richard Salisbury Williamson, of Virginia, to be the representative of the United States of America to the Vienna office of the United Nations and Deputy Representative of the United States of America to the International Atomic Energy Agency, with the rank of Ambassador.

DEPARTMENT OF STATE

Arthur Winston Lewis, of the District of Columbia, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Sierra Leone.

DEPARTMENT OF AGRICULTURE

Daniel G. Amstutz, of New York, to be Under Secretary of Agriculture for International Affairs and Commodity Programs.

NOMINATION OF RICHARD SALISBURY WILLIAMSON

● Mr. McCLURE. Mr. President, I strongly support Mr. Williamson's nomination and urge the Senate to confirm him as Representative to the Vienna office of the United Nations and Deputy U.S. Representative to the

International Atomic Energy Agency. I invite the attention of my colleagues to my remarks to the Senate which appear on page 11776 of the May 11, 1983, CONGRESSIONAL RECORD. These remarks discuss at length the reasons why Mr. Williamson is an outstanding candidate for the position for which he has been nominated.●

NOMINATION OF DANIEL G. AMSTUTZ

● Mr. HELMS. Mr. President, the agricultural community is fortunate to have an Under Secretary with the degree of experience and expertise that Dan Amstutz will bring to this position.

These are troubled times for the U.S. agricultural export sector. The value of U.S. agricultural exports fell from $43.8 billion in fiscal year 1981 to $39.1 billion in fiscal year 1982, the first year-to-year decline since 1969. Export values are expected to decline to $36 billion this year. Although these declines are a result of several factors, including the strong dollar and generally weak world demand, these declines are also clearly attributable to the export subsidy policies and other unfair and protectionist trading practices of other countries. Now more than ever, the United States needs a strong, capable administrator of agricultural export programs and particularly a tough negotiator able to firmly address the unfair trading practices of other nations. Dan Amstutz' vast experience in trade makes him particularly suited for this role.

For almost 29 years, Mr. Amstutz has been directly involved in domestic and international trade of farm products. For nearly 25 years, he held various positions relating to domestic and export marketing activities at Cargill, Inc. While at Cargill, he broadened his international experience by serving in several overseas posts. Among his various trade activities, he also served as a member of the executive committee and director of the National Grain & Feed Association and director of the U.S. Feed Grain Council. His experience with Cargill has provided him with a great deal of familiarity with programs administered by the Department of Agriculture.

From 1978 until recently, Mr. Amstutz directed commodities activities for Goldman, Sachs & Co., a major investment banking firm.

As I warned him last week at the Agriculture Committee confirmation hearings, Mr. Amstutz will be in the hot seat as Under Secretary in charge of agricultural exports. As Under Secretary, he will be immediately confronted with a host of pressing export issues including the problems we seek to address in legislation currently pending before the Senate. I am referring to S. 822, the Agriculture Export Equity and Market Expansion Act of 1983.

I am confident that we can work together to promote the best interests of the United States in this matter, as well as in other pressing trade areas, such as negotiation of a new long-term agreement with the Soviet Union. Mr. Amstutz has shown a real willingness to work with Congress on resolving these issues. He has indicated his recognition of the important role Congress has in trade matters. At his confirmation hearings, Mr. Amstutz stated that the keen interest of Congress in these matters is helpful because it helps convince the EEC and others of the strong U.S. desire to strengthen agricultural exports.

I commend President Reagan for his selection of Dan Amstutz for the position of Under Secretary of Agriculture. This choice demonstrates the administration's commitment to address the issue of declining agricultural exports and this Nation's resolve to restore fairness and comity to international agricultural trade. The confirmation of Dan Amstutz, renowned for his strong free trading position, serves notice that the United States will continue to press for resolution of trading problems with those nations guilty of predatory trading practices. Witness Mr. Amstutz's remarks at his confirmation hearings. He stated the United States must make it clear that strong farm exports and a healthy domestic farm economy are as important to the U.S. administration as it is to the EEC. "We must export to prosper. We mean to prosper and we will export," he asserted.

As Under Secretary in charge of commodity programs, Mr. Amstutz will also be confronted with a number of pressing issues concerning domestic commodity programs. I believe Mr. Amstutz is mindful of the need for these programs to be operated in a way that benefits both farmers and taxpayers alike.

Mr. Amstutz brings to the position of Under Secretary of Agriculture much needed experience in agriculture. He has extensive knowledge of both international and domestic agricultural programs and operations and is highly qualified for this position.●

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed en bloc.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to the nominations.

The PRESIDING OFFICER. Without objection, it so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed in the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 12:29 p.m., a message from the House of Representatives delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

S. 957. An act to provide for an increase in the number of members of the Congressional Award Board, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 1:26 p.m. a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bills and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 1983. An act to amend certain housing and community development laws to provide emergency mortgage assistance to homeowners and emergency shelter for the homeless;

H.R. 2066. An act to authorize appropriations to the National Science Foundation for fiscal year 1984;

H.R. 2587. An act to authorize appropriations to the Department of Energy for civilian research and development programs for the fiscal year 1984;

H.J. Res. 229. Joint resolution to authorize and request the President to issue a proclamation designating April 22 through April 28, 1984, as "National Organ Donation Awareness Week"; and

H.J. Res. 234. Joint resolution designating the week beginning June 19, 1983, as "National Children's Liver Disease Awareness Week".

HOUSE MEASURES REFERRED

The following bills and joint resolutions were read the first and second times, and referred as indicated:

H.R. 1983. An act to amend certain housing and community development laws to provide emergency mortgage assistance to homeowners and emergency shelter for the homeless; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 2587. An act to authorize appropriations to the Department of Energy for civilian research and development programs for the fiscal year 1984; to the Committee on Energy and Natural Resources.

H.J Res. 229. Joint Resolution to authorize and request the President to issue a proclamation designating April 22 through April 28, 1984, as "National Organ Donation Awareness Week"; to the Committee on the Judiciary.

H.J Res. 234. Joint Resolution designating the week beginning June 19, 1983, as "National Children's Liver Disease Awareness Week"; to the Committee on the Judiciary.

HOUSE BILL PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 2066. An act authorize appropriations to the National Science Foundation for fiscal year 1984;

MEASURE PLACED ON CALENDAR

The Committee on Environment and Public Works was discharged from the further consideration of the following resolution which was placed on the calendar:

S. Res. 140. Resolution to commemorate the 50th anniversary of the Tennessee Valley Authority, a public enterprise that works.

ENROLLED BILL PRESENTED

The Secretary reported that on today, May 16, 1983, he had presented to the President of the United States the following enrolled bill:

S. 957. An act to provide for an increase in the number of members of the Congressional Award Board, and for other purposes.

REPORT OF THE COMMITTEE ON APPROPRIATIONS

Under the authority of the order of the Senate of January 3, 1983, the following report was submitted on May 12, 1983, during the adjournment of the Senate:

By Mr. HATFIELD, from the Committee on Appropriations, without amendment:

S. Con. Res. 26. Concurrent resolution approving the obligation and expenditure of funds for MX missile procurement and full-scale engineering development of a basing mode (with additional and minority views) (Rept. No. 98-85).

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DURENBERGER, from the Committee on Environment and Public Works, without amendment:

S. 1280. An original bill to extend the Noise Control Act of 1972 (Rept. No. 98-86).

S. 1281. An original bill to extend the Noise Control Act to authorize appropriations for fiscal year 1984 (Rept. No. 98-87).

By Mr. CHAFEE, from the Committee on Environment and Public Works, without amendment:

S. 1282. An original bill to extend titles I and II of the Marine Protection Research and Sanctuaries Act, as amended (Rept. No. 98-88).

S. 1283. An original bill to amend the Solid Waste Disposal Act to authorize funds for fiscal year 1984 (Rept. No. 98-89).

S. 1284. An original bill to extend until October 1, 1985, the authority for advances to the migratory bird conservation fund (Rept. No. 98-90).

By Mr. ABDNOR, from the Committee on Environment and Public Works, without amendment:

S. 684. A bill to authorize an ongoing program of water resources research (Rept. No. 98-91).

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. 778. A bill authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the performing Arts, and for other purposes (Rept. No. 98-92).

By Mr. CHAFEE, from the Committee on Environment and Public Work, without amendment:

H.R. 1723. A bill to authorize appropriations through fiscal year 1986 for the Great Dismal Swamp, Minnesota Valley, Sailors' Snug Harbor, and San Francisco Bay National Wildlife Refuges (Rept. No. 98-93).

By Mr. STAFFORD, from the Committee on Environment and Public Works, with an amendment in the nature of a substitue and an amendment to the title:

S. 724. A bill to authorize the U.S. Army Corps of Engineers to undertake activities to provide new pubic works investment, grants to the several states to encourage and foster the construction of necessary public capital investment projects, to assist in creating new and productive jobs, and for other purposes (Rept. No. 98-94).

By Mr. MATHIAS, from the Committee on Rules and Administration, with an amendment:

S. 840. A bill to amend the Act of October 15, 1966 (80 Stat. 953; 20 U.S.C. 65a), relating to the National Museum of the Smithsonian Institution, so as to authorize additional appropriations to the Smithsonian Institution for carrying out the purposes of said Act (Rept. No. 98-95).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. 929. A bill to amend the act of July 2, 1940, as amended, pertaining to appropriations for the Canal Zone Biological Area (Rept. No. 98-96).

By Mr. MATHIAS, from the Committee on Rules and Administration, with an amendment:

S. 930. A bill to authorize the Smithsonian Institution to purchase land in Santa Cruz County, Arizona (Rept. No. 98-97).

By Mr. MATHIAS, from the Committee on Rules and Administration, with amendments:

S. Con. Res. 7. Concurrent resolution to authorize and provide for a bust of Carl Hayden to be placed in the Capitol (Rept. No. 98-98).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendments:

S. Con. Res. 35. An original concurrent resolution to authorize the printing as a Senate Document of a revised edition of "The Capitol" (Rept. No. 98-99).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendments:

S. Res. 111. An original resolution relative to expenditures by the Select Committee on Indian Affairs (Rept. No. 98-100).

S. Res. 138: A resolution relating to expenses of the Commission on Art and Antiquities of the United States Senate (Rept. No. 98-101).

By Mr. MATHIAS, from the Committee on Rules and Administration, with an amendment:

H.R. 2621: A bill to authorize appropriations for the Federal Election Commission for fiscal year 1984 (Rept. No. 98-102).

By Mr. MATHIAS, from the Committee on Rules and Administration without amendment:

S. Res. 143: An original resolution authorizing expenditures by the Committee on Rules and Administration for the training of professional staff (Rept. No. 98-103).

S. Res. 144: An original resolution relating to the purchase of calendars (Rept. No. 98-104).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 1100: A bill to consolidate and authorize program support and certain ocean and coastal programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce (Rept. No. 98-105).

S. 1101: A bill to authorize appropriations for certain fishery programs (Rept. No. 98-106).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with an amendment:

S. 1098: A bill to consolidate and authorize certain ocean and coastal programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce (Rept. No. 98-107).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with amendments:

S. 1096: A bill to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes (Rept. No. 98-108).

S. 1097: A bill to consolidate and authorize certain atmospheric and satellite programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce (Rept. No. 98-109).

By Mr. HATCH, from the Committee on Labor and Human Resources, with amendments:

S. 773: A bill to revise and extend programs relating to biomedical research, research training, and medical library assistance, to establish a National Institute of Arthritis and Musculoskeletal and Skin Diseases, and for other purposes (Rept. No. 98-110).

By Mr. HEINZ, from the Committee on Banking, Housing, and Urban Affairs, with an amendment in the nature of a substitute:

S. 869: A bill to amend the Export-Import Bank Act of 1945 (Rept. No. 98-111).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transporta-

tion, with an amendment in the nature of a substitute:

S. 800: A bill to establish an Ocean and Coastal Development Impact Assistance Fund and to require the Secretary of Commerce to provide to States national ocean and coastal development and assistance block grants from moneys in the Fund, and for other purposes (Rept. No. 98-112).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation and the Committee on Labor and Human Resources, jointly, with an amendment in the nature of a substitute and an amendment to the title:

S. 655: A bill to authorize appropriations to carry out the National Sea Grant program for fiscal years 1984, 1985, and 1986, and for other purposes (Rept. No. 98-113).

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. 1287: An original bill to authorize appropriations for the Public Buildings Service of the General Services Administration for the fiscal year 1984 (Rept. No. 98-114).

By Mr. CHAFEE, from the Committee on Environment and Public Works, without amendment:

S. 1288: An original bill to extend the Clean Water Act for one year, and for other purposes (Rept. No. 98-115).

By Mr. ABDNOR, from the Committee on Environment and Public Works, without amendment:

S. 1289: An original bill to establish an obligation ceiling for the civil work construction program of the United States Army Corps of Engineers (Rept. No. 98-116).

By Mr. DURENBERGER, from the Committee on Environment and Public Works, without amendment:

S. 1290: An original bill to extend the Safe Drinking Water Act, as amended, for one year (Rept. No. 98-117).

By Mr. SIMPSON, from the Committee on Environment and Public Works, without amendment:

S. 1291: An original bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, and section 305 of the Energy Reorganization Act of 1974 (Rept. No. 98-118).

By Mr. DURENBERGER, from the Committee on Environment and Public Works, without amendment:

S. 1292: An original bill to authorize appropriations for environmental research, development, and demonstrations for fiscal year 1984 (Rept. No. 98-119).

By Mr. HUMPHREY, from the Committee on Environment and Public Works, without amendment:

S. 1293: An original bill to extend authorization for appropriations for the Disaster Relief Act of 1974, and for other purposes (Rept. No. 98-120).

By Mr. HUMPHREY, from the Committee on Environment and Public Works, with an amendment:

S. 379: A bill to cancel certain indebtedness in connection with disaster relief activities (Rept. No. 98-121).

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, with amendments:

S. 695: A bill to amend the Bretton Woods Agreements act to authorize consent to and authorize appropriations for an increase in the United States quota in the International Monetary Fund and to authorize appropriations for increased U.S. participation in the IMF's General Arrangements to Borrow (Rept. No. 98-122).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Res. 145: An original resolution to pay a gratuity to Stephen B. Couch.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, without amendment:

S. Res. 146: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 695.

By Mr. HATCH, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 1003: A bill to extend and revise the provisions of the Child Abuse Prevention and Treatment Act and the Child Abuse Prevention Treatment and Adoption Reform Act of 1978.

S. 1008: A bill to make certain technical amendments to improve implementation of the Education Consolidation and Improvement Act of 1981, and for other purposes.

By Mr. ROTH, from the Committee on Governmental Affairs, without amendment:

S. 1010: A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia.

By Mr. HATCH, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 1087. A bill to authorize appropriations for the National Science Foundation for fiscal year 1984.

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 1192. A bill to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for Fiscal Year 1984 and for other purposes.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, without amendment:

S. 1294. An original bill to authorize appropriations to carry out the Export Administration Act of 1979.

By Mr. HATCH, from the Committee on Labor and Human Resources, without amendment:

S. 1285. An original bill to improve the quality of mathematics and science teaching and instruction in the United States, and for other purposes.

EDUCATION FOR ECONOMIC SECURITY ACT

Mr. HATCH. Mr. President, I am very pleased to report two measures from the Committee on Labor and Human Resources, the National Science Foundation Authorization Act of Fiscal Year 1984 and the Education for Economic Security Act. Both of these bills carry much significance for the future of America's standing in science and technology.

The Education for Economic Security Act is the result of much thoughtful discussion by the members of our committee, and I want to particularly commend Senators PELL and STAFFORD for their efforts. That a measure representing a broad consensus of our committee was reported is a tribute to their willingness to take into account all points of view. The committee has reported an original bill, a vehicle which prevents the listing of cosponsors, so I ask unanimous consent that the names of the cosponsors be printed at this point in the RECORD, and that they be added as cosponsors after the bill has been officially filed.

There being no objection, the list was ordered to be printed in the RECORD, as follows;

COSPONSORS OF THE EDUCATION FOR ECONOMIC SECURITY ACT

Claiborne Pell, Rhode Island.
Robert T. Stafford, Vermont.
Edward M. Kennedy, Massachusetts.
Dan Quayle, Indiana.
Jennings Randolph, West Virginia.
Paula Hawkins, Florida.
Thomas F. Eagleton, Missouri.
Donald W. Riegle, Michigan.
Howard H. Metzenbaum, Ohio.
Spark M. Matsunaga, Hawaii.
Christopher J. Dodd, Connecticut.
Robert Dole, Kansas.
Alan Cranston, California.
Thad Cochran, Mississippi.
Daniel K. Inouye, Hawaii.
Bill Bradley, New Jersey.
Quentin Burdick, North Dakota.
Walter D. Huddleston, Kentucky.
Paul Sarbanes, Maryland.
David Pryor, Arkansas.
Carl Levin, Michigan.
Jim Sasser, Tennessee.
Daniel Patrick Moynihan, New York.
Dale Bumpers, Arkansas.
Wendell Ford, Kentucky.
George Mitchell, Maine.
Dennis DeConcini, Arizona.

Second, Mr. President, this measure has generated tremendous interest in both the education and scientific communities. Therefore, I ask unanimous consent that the text of the bill be printed in the CONGRESSIONAL RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S. 1285

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Education for Economic Security Act".

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act to improve the quality of mathematics and science teaching and instruction in the United States.

DEFINITIONS

SEC. 3. For the purpose of this Act—

(1) The term "area vocational education school" has the same meaning given that term under section 195(2) of the Vocational Education Act of 1965.

(2) The term "Director" means the Director of the National Science Foundation.

(3) The term "elementary school" has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965.

(4) The term "Governor" means the chief executive of a State.

(5) The term "Foundation" means the National Science Foundation.

(6) The term "institution of higher education" has the same meaning given that term by section 1201(a) of the Higher Education Act of 1965.

(7) The term "local educational agency" has the same meaning given that term

under section 198(a)(10) of the Elementary and Secondary Education Act of 1965.

(8) The term "secondary school" has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965.

(9) The term "Secretary" means the Secretary of Education.

(10) The term "State" means each of the several States, the District of Columbia, and the Commonwealth of Puerto Rico.

(11) The term "State agency for higher education" means the State board of higher education or other agency or officer primarily responsible for the State supervision of higher education, or, if there is no such officer or agency, an officer or agency designated for the purpose of this title by the Governor or by State law.

(12) The term "State educational agency" has the meaning given that term under section 1001(k) of the Elementary and Secondary Education Act of 1965.

TITLE I—NATIONAL SCIENCE FOUNDATION MATHEMATICS AND SCIENCE PROGRAMS

PART A—TEACHER INSTITUTES

GRANTS FOR TEACHER INSTITUTES AUTHORIZED

SEC. 101. The Foundation is authorized, in accordance with the provisions of this part, to make grants to local educational agencies and institutions of higher education, applying jointly, for the establishment and operation of teacher institutes for the enhancement of the subject matter skills of public and private elementary and secondary school teachers of mathematics and physical and life sciences.

APPLICATIONS

SEC. 102. (a) Each local educational agency and institution of higher education desiring to receive a grant under this part shall submit a joint application at such time, in such manner, and containing or accompanied by such information as the Director may require. One or more local educational agencies may apply jointly with one or more institutions of higher education under the provisions of this section.

(b) Each such application shall—

(1) describe the establishment and operation of a teacher institute for elementary and secondary school teachers of mathematics and physical and life sciences, including—

(A) the designation of the institute as a full-time summer or part-time school year, or both;

(B) a description of the courses of study to be offered at the institute;

(C) estimate the number of teachers, including the number of teachers from private elementary and secondary schools, to attend the institute and describe the selection procedures;

(D) the nature and location of existing facilities to be used in the operation of the institute;

(E) the teaching and administrative staff for the institute;

(F) the academic credits, if any, to be awarded for the completion of the courses of study to be offered at the institute; and

(G) a schedule of stipends to be paid teacher participants in the institute, including (i) allowances for subsistence and other expenses for teachers attending the institute and their dependents and (ii) provisions assuring that there will be no duplication of Federal benefits paid to participants;

(2) provide assurances that the design and operation of the institute will involve the participation of both the subject matter departments or divisions of each institution of higher education making application as well as the teacher education department or division, if any, of each such institution; and

(3) provide for prior and continuing consultation with the State educational agency in the formulation and operation of the institute; and

(4) provide such additional assurances as the Director deems essential to assure compliance with the requirements of this part.

DISTRIBUTION OF ASSISTANCE

SEC. 113. (a) In approving applications under this part, the Director shall assure that there is an equitable distribution of institutes established and operated under approved applications among States and within States. The Director shall award not less than one institute in each State.

(b) No grant to a single applicant may exceed $200,000 in any fiscal year.

COOPERATION WITH BUSINESS CONCERNS

SEC. 114. Institutes assisted under this part may, to the extent possible, involve the cooperation of advanced technology business concerns and other business concerns which are able to supply assistance in the teaching of mathematics and science.

SPECIAL CONSIDERATION OF UNDERREPRESENTED AND UNDERSERVED POPULATIONS

SEC. 115. In providing financial assistance under this part the Foundation shall make every effort to ensure that consideration is given to applications which contain provisions designed to meet the needs of underrepresented and underserved populations.

PART B—MATHEMATICS AND SCIENCE EDUCATION DEVELOPMENT PROGRAMS

PROGRAM AUTHORIZED

SEC. 121. The Foundation is authorized, in accordance with the provisions of this part, to enter into agreements with institutions of higher education or local educational agencies for—

(1) developing and disseminating programs and materials for training, retraining, and in-service training for elementary and secondary school teachers in the fields of mathematics and science, including physical and life sciences; and

(2) the research, development, and dissemination of instructional programs and materials for courses of study in elementary and secondary schools in the fields of mathematics and science, including physical and life sciences.

APPLICATIONS

SEC. 122. No grant may be made under this part unless an application is made by an institution of higher education or by a local educational agency, at such time, in such manner, and containing or accompanied by such information as the Director may reasonably require. Each application shall contain assurances—

(1) that in the case of an institution of higher education, the institution will enter into a cooperative agreement with one or more local educational agencies; or in the case of a local educational agency, the agency will enter into a cooperative agreement with one or more institutions of higher education for the purpose of furnishing the activities authorized by this part;

(2) that the planning and implementation of the cooperative agreement will involve the participation of both the subject matter departments or divisions of each institution of higher education making application as well as the teacher education department or division, if any, of each such institution; and

(3) that the applicant has consulted with, as appropriate, the State agency for higher education or the State educational agency in the development of the program for which assistance is sought, and will assure appropriate participation of such agencies in the program.

SPECIAL CONSIDERATION OF UNDERREPRESENTED AND UNDERSERVED POPULATIONS

SEC. 123. In providing financial assistance under this part, the Foundation shall make every effort to ensure that consideration is given to applications which provide for the development and improvement of instructional programs and materials designed to meet the needs of underrepresented and underserved populations.

PART C—SCIENCE AND MATHEMATICS EXCELLENCE IN TEACHING AWARDS

EXCELLENCE IN TEACHING MATHEMATICS AND SCIENCE AWARDS

SEC. 131. (a) The Foundation is authorized, in accordance with the provisions of this part, to make excellence in teaching mathematics and science awards.

(b)(1) Excellence in teaching awards shall be made under this part to teachers in elementary or secondary schools who have taught mathematics, science, or computer learning and who have demonstrated outstanding qualifications as teachers of mathematics or science.

(2) Each excellence in teaching award made under this part shall not exceed $5,000.

(c) The Foundation shall adopt selection procedures for making awards under this part. The selection procedures shall be designed to assure that the awards will be equitably distributed among the States.

APPLICATIONS

SEC. 132. No excellence in teaching award may be made under this part unless an application is submitted to the Foundation at such time, in such manner or containing or accompanied by such information as the Director may reasonably require.

PART D—CONGRESSIONAL MERIT SCHOLARSHIPS

SHORT TITLE

SEC. 141. This part may be cited as the "Congressional Merit Scholarships in Mathematics, Science, and Engineering Education".

MERIT SCHOLARSHIPS ESTABLISHED

SEC. 142. (a) The Foundation is authorized in accordance with the provisions of this part, to award scholarships to individuals who are enrolled in institutions of higher education and who demonstrate outstanding potential for, and who plan to pursue, a career in teaching in the fields of mathematics, science, and engineering.

(b) Scholarships under this part shall be awarded for such period as the Foundation may prescribe, but for not to exceed four academic years.

(c)(1) A student awarded a scholarship under this part may attend any institution of higher education offering courses of study designed to prepare them for teaching careers. Such awards shall be available for periods of study commencing not sooner than the third undergraduate year.

(2) In order to be eligible for a scholarship under this part, each individual shall—

(A) concentrate, at the undergraduate level, in mathematics or science, and indicate a serious intent to teach at the elementary school level; or

(B) concentrate, at the undergraduate level, in mathematics or science, and indicate a serious intent to teach mathematics or science at the secondary school level; or

(C) concentrate, at the undergraduate level, in engineering and indicate a serious intent to teach at the postsecondary level, in an engineering discipline in which the Foundation has determined a shortage of qualified teachers.

(d) Not to exceed 25 per centum of the scholarships available under this part shall be available for students meeting the criteria of subsection (c)(2)(C).

SELECTION OF MERIT SCHOLARS

SEC. 143. (a) The Foundation shall establish criteria for the selection of merit scholars under this part.

(b) The Foundation shall adopt selection procedures which are designed to assure that—

(1) the number of individuals to be selected will not exceed the product of the number of Members of Congress for each State, multiplied by two, and that the individuals will be selected from among the residents of each State (and in the case of the District of Columbia and the Commonwealth of Puerto Rico, not to exceed ten individuals will be selected); and

(2) each recipient of a merit scholarship will enter into an agreement with the Foundation under which the recipient will agree—

(A) to comply with provisions of paragraph (2) of section 142(c) relating to concentration of study; and

(B) to pursue a career in teaching, as prescribed in section 142(c) for not less than two years for each academic year in which a merit scholarship award is received.

STIPENDS AND SCHOLARSHIP CONDITIONS

SEC. 144. (a) Each student awarded a merit scholarship under this part shall receive an award of $5,000 for each academic year of study.

(b) Each student awarded a merit scholarship under the provisions of this part shall continue to receive payments provided under this part for such scholarship only during such period as the Foundation determines that the student is maintaining satisfactory progress in, and devoting full time to, the course of study for which the scholarship is awarded.

(c) The Foundation is authorized to require reports containing such information in such form and to be filed at such time as the Foundation determines to be necessary from any student awarded a merit scholarship under the provisions of this part. Such reports shall be accompanied by a certificate from any appropriate official of the institution of higher education, approved by the Foundation, stating that such student is making satisfactory progress in, and is devoting essentially full time to, the study described in subsection (b).

PART E—DISCRETIONARY FUNDS OF THE DIRECTOR

AUTHORIZATION

SEC. 151. (a) From funds available for this part, the Director is authorized to make grants to and to enter into contracts with any public agency or any private organization to carry out any activity authorized by this title. In addition, from such funds, the Director is authorized, directly or by way of grant or contract, to conduct—

(1) a faculty exchange program between institutions of higher education (particularly institutions having established and nationally recognized research facilities) and eligible institutions; and

(2) programs of national significance promoting the improvement of instruction in the fields of mathematics, science, and engineering.

(b) For the purpose of this section the term "eligible institution" means an institution of higher education in any State which—

(1)(A) has an enrollment which includes a substantial percentage of students who are members of a minority group or who are economically or educationally disadvantaged; or

(B) is located in a community that is not within commuting distance of a major institution of higher education; and

(2) demonstrates a commitment to meet the special educational needs of students who are members of a minority group or are economically or educationally disadvantaged.

PART F—GENERAL PROVISIONS

ADMINISTRATIVE PROVISIONS

SEC. 161. (a) In order to carry out the provisions of this title, the Foundation is authorized to—

(1) appoint and fix the compensation of such personnel as may be necessary to carry out the provisions of this title, except that in no case shall employees be compensated at a rate to exceed the rate provided for employees in grade GS-18 of the General Schedule set forth in section 5332 of title 5, United States Code;

(2) procure temporary and intermittent services of experts and consultants as are necessary to the extent authorized by section 3109 of title 5, United States Code, but at rates not to exceed the rate specified at the time of such service for grade GS-18 of section 5332 of such title;

(3) prescribe such regulations as it deems necessary governing the manner in which its functions shall be carried out;

(4) receive money and other property donated, bequeathed, or devised, without condition or restriction other than it be used for the purposes of this Act; and to use, sell, or otherwise dispose of such property for the purpose of carrying out the functions of the Foundation under this Act;

(5) accept and utilize the services of voluntary and noncompensated personnel and reimburse them for travel expenses, including per diem, as authorized by section 5703 of title 5, United States Code;

(6) enter into contracts, grants, or other arrangements, or modifications thereof, to carry out the provisions of this title, and such contracts or modifications thereof may, with the concurrence of two-thirds of the members of the National Science Board, be entered into without performance or other bonds, and without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5);

(7) make advances, progress, and other payments which the Board deems necessary under this title without regard to the provisions of section 3324 of title 31, United States Code; and

(8) make other necessary expenditures.

(b) The Foundation shall submit to the President and to the Congress an annual report of its operations under this title.

PARTICIPATION OF CHILDREN ENROLLED IN PRIVATE SCHOOLS

SEC. 162. The provisions of section 211 of this Act shall apply to the payments made under this title.

PROHIBITION AGAINST FEDERAL CONTROL OF EDUCATION

SEC. 163. The provisions of section 432 of the General Education Provisions Act, relating to prohibition against Federal control of education, shall apply to each program authorized by this title.

AUTHORIZATION OF APPROPRIATIONS

SEC. 164. (a) There are authorized to be appropriated $20,000,000 for each of the fiscal years 1984 and 1985 to carry out the provisions of part A of this title.

(b) There are authorized to be appropriated $20,000,000 for the fiscal year 1985 to carry out the provisions of part B of this title.

(c) There are authorized to be appropriated $5,000,000 for the fiscal year 1984 and $15,000,000 for the fiscal year 1985 to carry out the provisions of part D of this title.

(d) There are authorized to be appropriated $4,000,000 for the fiscal year 1985 to carry out the provisions of parts C and E of this title.

(e) There are authorized to be appropriated to the Foundation $20,000,000 for the fiscal year 1984 and $21,000,000 for the fiscal year 1985 to carry out the graduate fellowship program under the National Science Foundation Act of 1950.

TITLE II—EDUCATION FOR ECONOMIC SECURITY

STATEMENT OF PURPOSE

SEC. 201. It is the purpose of this title to make financial assistance available to State and local educational agencies, and to institutions of higher education, to improve the skills of teachers and instruction in mathematics, science, computer learning, and foreign languages, and to increase the access of all students to such instruction, and thereby contribute to strengthening the economic security of the United States.

DEFINITION

SEC. 202. As used in this title, the term "junior or community college" means an institution of higher education—

(1) that admits as regular students individuals who are beyond the age of compulsory school attendance in the State in which the institution is located and who have the ability to benefit from the training offered by the institution;

(2) that does not provide an educational program for which it awards a bachelor's degree (or an equivalent degree); and

(3) that—

(A) provides an educational program of not less than two years that is acceptable for full credit toward such a degree, or

(B) offers a two-year program designed to prepare a student to work as a technician or at the semiprofessional level in engineering, scientific, or other technological fields requiring the understanding and application of basic engineering, scientific, or mathematical principles of knowledge.

PROGRAM AUTHORIZED

SEC. 203. (a) The Secretary is authorized to make grants to States and to make discretionary grants, in accordance with the provisions of this title, for strengthening the skills of teachers and instruction in mathematics, science, computer learning, and foreign languages.

(b) There are authorized to be appropriated $350,000,000 for the fiscal year 1984, and $400,000,000 for the fiscal year 1985 to carry out the provisions of this title.

ALLOTMENT TO STATES

SEC. 204. (a)(1) From 90 per centum of the amount appropriated to carry out this title for each fiscal year, the Secretary shall allot to each State an amount which bears the same ratio to such 90 per centum as the number of children aged five to seventeen, inclusive, in the State bears to the number of such children in all States, except that no State shall receive less than one-half of 1 per centum of the amount available under this subsection in any fiscal year.

(2) The Secretary shall reserve the remaining 10 per centum to carry out section 212, relating to discretionary grants of national significance.

(3) For the purpose of this subsection, the term "State" does not include Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, or the Trust Territory of the Pacific Islands.

(4) The number of children aged five to seventeen, inclusive, in the State and in all States shall be determined by the Secretary on the basis of the most recent satisfactory data available to him.

(b) The amount of any State's allotment under subsection (a) for any fiscal year to carry out this title which the Secretary determines will not be required for that fiscal year to carry out this title shall be available for reallotment from time to time, on such dates during that year as the Secretary may fix, to other States in proportion to the original allotments to those States under subsection (a) for that year but with such proportionate amount for any of those other States being reduced to the extent it exceeds the sum the Secretary estimates that State needs and will be able to use for that year; and the total of those reductions shall be similarly reallotted among the States whose proportionate amounts were not so reduced. Any amounts reallotted to a State under this subsection during a year shall be deemed a part of its allotment under subsection (a) for that year.

(c) There are authorized to be appropriated for each fiscal year for the purpose of this subsection amounts equal to not more than 1 per centum of the amount appropriated for such year under this title. The Secretary shall allot the amount appropriated pursuant to this subsection among Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, or the Trust Territory of the Pacific Islands according to their respective needs for assistance under this title. In addition for each fiscal year the Secretary shall allot from not less than one-half of such amount, to such agency as the Secretary deems appropriate, for programs authorized by this title for children in elementary and secondary schools operated for Indian children by the Department of the Interior. The terms upon which payments are made under the previous sentence shall be determined by such criteria as the Secretary determines will best carry out the purpose of this title.

IN-STATE APPORTIONMENT

SEC. 205. (a) For each of the fiscal years 1984 and 1985, 70 per centum of each State's allotment under section 204 of this title shall be used for elementary and secondary education programs in accordance with section 206.

(b) For each of the fiscal years 1984 and 1985, 30 per centum of each State's allotment under section 204 of this title shall be used for higher education programs in accordance with section 207.

ELEMENTARY AND SECONDARY EDUCATION PROGRAMS

SEC. 206. (a) The amount apportioned under section 205(a) from each State's allotment under this title shall be used by the State educational agency to strengthen elementary and secondary education programs in accordance with the provisions of this section.

(b)(1) Not less than 70 per centum of the amount available under this section shall be distributed to local educational agencies within the State. Each local educational agency shall use funds distributed under this paragraph for—

(A) the expansion and improvement of in-service training and retraining of teachers and other appropriate school personnel in the fields of mathematics and science, including vocational education teachers who use mathematics and science in the courses of study the teachers teach; or

(B) if the local educational agency determines that the agency has met its need for such training and retraining and subject to the provisions of section 210(c), computer learning and instruction, foreign language instruction, and instructional materials and equipment related to mathematics and science instruction.

Such training and instruction may be carried out through agreements with public agencies, private industry, institutions of higher education, and nonprofit private organizations, including museums, libraries, educational television stations, professional science, mathematics and engineering associations, and other appropriate institutions. A local educational agency may carry out the activities authorized by this paragraph with one or more other local educational agencies within the State, or with the State educational agency, or both. Each local educational agency shall assure that programs of in-service training and retraining will take into account the need for greater access to and participation in mathematics, science, and computer learning programs and careers of students from historically underrepresented groups, including females, minorities, individuals with limited-English proficiency, the handicapped, and migrants.

(2)(A) The State educational agency shall distribute 50 per centum of the funds available under this subsection to local educational agencies within the State according to the relative number of children enrolled in public and nonpublic schools within the school districts of such agencies.

(B) The State educational agency shall distribute 50 per centum of the funds available under this subsection based on the relative number of children aged 5 to 17 who—

(i) are from families below the poverty level as determined under section 111(c)(2)(A) of the Elementary and Secondary Education Act of 1965; and

(ii) are from families above the poverty level as determined under section 111(c)(2)(B) of the Elementary and Secondary Education Act of 1965;

in the public schools of the local educational agencies within the State.

(3) The State educational agency shall renew payments to local educational agencies under this subsection based upon the criteria set forth in paragraph (2) of this subsection and a determination by the State educational agency that the local educational agency is implementing the program assisted under this title so that a substantial number of teachers in the public and private schools in the school district of such agency are served and several grade levels of instruction in such schools are involved in the program.

(c)(1) If a local educational agency is spending funds under subsection (b)(1)(B), not to exceed 30 per centum of the funds available to the local educational agency under subsection (b) may be used for the purchase of computer and computer-related instructional equipment.

(2) If a local educational agency is spending funds under subsection (b)(1)(B), not to exceed 15 per centum of the funds available to the local educational agency under subsection (b) may be used to strengthen instruction in foreign languages.

(d) Not less than 20 per centum of the amount available under this section shall be used by the State educational agency for demonstration and exemplary programs for—

(1) teacher training and retraining and in-service upgrading of teacher skills in the fields of mathematics and science, foreign language instruction, and computer learning,

(2) instructional equipment and materials in such fields and necessary technical assistance,

(3) special projects for historically underrepresented and underserved populations and for gifted and talented students, and

(4) the dissemination of information to all local educational agencies within the State relating to the exemplary programs in the fields of mathematics, science, foreign languages, and computer learning.

In providing financial assistance for such demonstration and exemplary programs, the State educational agency shall reserve not less than 20 per centum of the amount available under this subsection for special projects in mathematics and science, foreign languages, and computer education to historically underrepresented and underserved populations of students, including females, minorities, handicapped individuals, individuals with limited-English proficiency, and migrant students, and to programs for gifted and talented students. The programs for gifted and talented students may include assistance to magnet schools for such students.

(e) Not less than 5 per centum of the amount available under this section may be used by the State educational agency to provide technical assistance to local educational agencies, institutions of higher education, and nonprofit organizations, including museums, libraries, and educational television stations, in the conduct of programs specified under subsection (b).

(f) Not to exceed 5 per centum of the amount available under this section may be used by the State educational agency for—

(1) the State assessment required by section 208 of this title; and

(2) the costs of administration and evaluation of the program assisted under this title.

HIGHER EDUCATION PROGRAMS

SEC. 207. (a) The amount apportioned under section 205(b) from each State's allotment under this title shall be used by the State agency for higher education for higher education programs in accordance with the provisions of this section.

(b)(1)(A) Not less than 75 per centum of the amount available for this section shall be used by the State agency for higher education for grants to institutions of higher education in accordance with the provisions of this subsection.

(B) The State agency for higher education shall make funds available on a competitive

basis to institutions of higher education in the State which apply for payments under this section. The State agency for higher education shall make every effort to ensure equitable participation of private and public institutions of higher education.

(2) The amount available under this subsection shall be used for—

(A) establishing traineeship programs for new teachers who will specialize in teaching mathematics and science at the secondary school level;

(B) retraining of secondary school teachers who specialize in disciplines other than the teaching of mathematics and science to specialize in the teaching of mathematics, science, or computer learning, including provision of stipends for participation in institutes authorized under title I; and

(C) in-service training for elementary, secondary, and vocational school teachers and training for other appropriate school personnel to improve their teaching skills in the fields of mathematics and science, and computer learning, including stipends for participation in institutes authorized under title I.

Each institution of higher education receiving a grant under this subsection shall assure that programs of training, retraining, and in-service training will take into account the need for greater access to and participation in mathematics, science, and computer learning and careers of students from historically underrepresented and underserved groups, including females, minorities, individuals with limited-English proficiency, the handicapped, migrants, and the gifted and talented.

(3) No institution of higher education may receive assistance under paragraph (2) (B) and (C) of this subsection unless the institution enters into an agreement with a local educational agency, or consortium of such agencies, to provide in-service training and retraining for the elementary and secondary school teachers in the public and private schools of the school district of each such agency.

(c)(1) Not less than 20 per centum of the amount available under this section shall be used by the State agency for higher education for cooperative programs among institutions of higher education, local educational agencies, State educational agencies, private industry, and private nonprofit organizations, including museums, libraries, educational television stations, and professional mathematics, science, and engineering societies and associations for the development and dissemination of projects designed to improve student understanding and performance in science, mathematics, and critical foreign languages. In carrying out this subsection, the State agency for higher education shall give special consideration to programs involving consortial arrangements which include local educational agencies.

(2) For the purpose of paragraph (1) of this subsection, critical foreign languages include foreign languages designated by the Secretary pursuant to section 211(d).

(d) Not to exceed 5 per centum of the amount available under this section may be used by the State agency for higher education for—

(1) the State assessment required by section 208 of this title; and

(2) the costs of administration and evaluation of the program assisted under this title incurred by the State higher education agency.

STATE ASSESSMENT OF MATHEMATICS, SCIENCE, FOREIGN LANGUAGES, AND COMPUTER LEARNING

SEC. 208. (a) Each State which desires to receive grants under this title shall prepare and submit to the Secretary, not later than the end of the first year for which funds under this title are available, an assessment of the status of mathematics, science, foreign language, and computer learning within the State. Each such assessment shall be prepared after an examination of the local assessments submitted under section 210. Each such assessment shall include a description and a five-year projection of—

(1) the availability of qualified mathematics, science, foreign language, and computer learning teachers at the secondary and postsecondary education levels within the State;

(2) the qualifications of teachers in mathematics, science, foreign languages, and computer learning at the secondary and postsecondary education levels, and the qualifications of teachers at the elementary level to teach mathematics, science, foreign languages, and computer learning;

(3) the State standards for teacher certification, including any special exceptions currently made, for teachers of mathematics, science, foreign languages, and computer learning;

(4) the availability of adequate curricula, instructional materials and equipment, in mathematics, science, foreign languages, and computer learning; and

(5) the degree of access to instruction in mathematics, science, foreign languages, and computer learning of historically underrepresented and underserved individuals and of the gifted and talented.

(b) Each such assessment shall also describe the programs, initiatives, and resources committed or projected to be undertaken within the State to—

(1) improve teacher recruitment and retention;

(2) improve teacher qualifications and skills in the fields of mathematics, science, foreign languages, and computer and computer learning;

(3) improve curricula in mathematics, science, foreign languages, and computer learning including instructional materials and equipment; and

(4) improve access for historically underrepresented and underserved populations, and for the gifted and talented, to instruction in mathematics, science, foreign languages, and computer learning.

(c)(1) Each State assessment shall be developed in consultation with the Governor, the State legislature, State Board of Education, local educational agencies within the State, and representatives of—

(A) vocational secondary schools and area vocational education schools,

(B) public and private institutions of higher education,

(C) teacher organizations,

(D) private industry,

(E) other public organizations, including libraries, museums, and educational television stations, and professional scientific and mathematics associations, and

(F) private elementary and secondary schools, within the State.

(2) Each State assessment shall be submitted jointly by the State educational agency and the State agency for higher education.

STATE APPLICATION

SEC. 209. (a) Each State which desires to receive grants under this title shall file an application with the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary may reasonably require.

(b) Each such application shall—

(1) designate the State educational agency for the purpose of programs described in section 206, and the State agency for higher education for programs described in section 207 as the agency or agencies responsible for the administration and supervision of the programs described in sections 207 and 208, as the case may be;

(2) describe the programs for which assistance is sought under the application;

(3) provide assurances that payments will be distributed by the State in accordance with the provisions of sections 207 and 208, as the case may be;

(4) provide procedures—

(A) for submitting applications by local educational agencies, institutions of higher education, junior or community colleges, and other organizations for programs described in section 206 for distribution of payments under this title within the State, and

(B) for approval of applications by the appropriate State agency, including appropriate procedures to assure that the appropriate State agency will not disapprove an application without notice and opportunity for a hearing;

(5) provide assurances that—

(A) the State will prepare and submit the assessment required under section 208;

(B) in the second year for which funds are available under this title, the State will use funds for purposes consistent with the findings of the State assessment under section 208;

(C) for programs described in section 206, the provisions of sections 211 and 212 will be carried out; and

(D) to the extent feasible, evaluations of the program assisted under this title will be performed;

(6) provide assurances that Federal funds made available under this title for any fiscal year will be so used as to supplement, and to the extent practicable, to increase the level of funds that would, in the absence of such funds, be available for the purposes described in sections 207 and 208, and in no case supplant such funds; and

(7) provide such fiscal control and accounting procedures as may be necessary (A) to ensure proper accounting of Federal funds paid to the applicant under this title, and (B) to ensure the verification of the programs assisted under the application.

(c) The Secretary shall expeditiously approve any State plan that meets the requirements of this section.

LOCAL EDUCATIONAL AGENCY ASSESSMENT

SEC. 210. (a) Each local educational agency which desires to receive a payment from the State educational agency pursuant to section 206 shall provide to the State educational agency an assessment of the local educational agency's need for assistance in—

(1) teacher training, retraining, and in-service training and the training of appropriate school personnel in the areas of mathematics, science, and foreign languages; and

(2) improving instructional materials and equipment related to mathematics and science education.

(b) Such assessment shall also describe the types of services to be provided pursuant to the program assisted under section 206, and a description of how the services assisted will meet the program needs of the local educational agency.

(c) If a local educational agency determines, pursuant to section 206(b)(1), that the agency has met its teacher retraining and in-service training needs in mathematics and science and desires to expend its funds on other activities prescribed in section 206(b)(1)(B), the local educational agency may request the State educational agency to waive such training requirements. If the State educational agency determines that the local educational agency has met such teacher training needs, the State educational agency shall grant the waiver.

PARTICIPATION OF CHILDREN AND TEACHERS FROM PRIVATE SCHOOLS

SEC. 211. (a) To the extent consistent with the number of children in the State or in the school district of each local educational agency who are enrolled in private elementary and secondary schools, such State or agency shall, after consultation with appropriate private school representatives, make provision for including services and arrangements for the benefit of such children as will assure the equitable participation of such children in the purposes and benefits of this title.

(b) To the extent consistent with the number of children in the State or in the school district of a local educational agency who are enrolled in private elementary and secondary schools, such State, State educational agency, or State agency for higher education shall, after consultation with appropriate private school representatives, make provision, for the benefit of such teachers in such schools, for such in-service and teacher training and retraining as will assure equitable participation of such teachers in the purposes and benefits of this title.

(c) If by reason of any provision of law a State or local educational agency is prohibited from providing for the participation of children or teachers from private schools as required by subsections (a) and (b), or if the Secretary determines that a State or local educational agency has substantially failed or is unwilling to provide for such participation on an equitable basis, the Secretary shall waive such requirements and shall arrange for the provision of services to such children or teachers which shall be subject to the requirements of this section. Such waivers shall be subject to consultation, withholding, notice, and judicial review requirements in accordance with sections 557(b) (3) and (4) of the Education Consolidation and Improvement Act of 1981.

SECRETARY'S DISCRETIONARY FUND FOR PROGRAMS OF NATIONAL SIGNIFICANCE

SEC. 212. (a) From 10 per centum of amounts appropriated under section 203(b), the Secretary shall make grants in accordance with this section.

(b)(1) From 75 per centum of the amount available under this section in each fiscal year, the Secretary shall make grants to State and local educational agencies, institutions of higher education, and private nonprofit organizations, including museums, libraries, educational television stations, and professional science, mathematics, and engineering societies and associations for programs of national significance in mathematics and science instruction, computer learning, and foreign language instruction in critical languages. The Secretary shall give special consideration to provide assistance to local educational agencies, or consortia thereof, to establish or improve magnet schools for gifted and talented students. In awarding of grants the Secretary shall give special consideration to local educational agencies and institutions of higher education providing special services to historically underserved and underrepresented populations in the fields of mathematics and science.

(2) The Secretary, from the amount available under paragraph (1) for each fiscal year, shall reserve not to exceed $3,000,000 in each such year for the Director of the National Institute of Education for the purpose of conducting evaluation and research activities. Such evaluation and research activities shall include—

(A) a policy analysis of alternative methods to improve instruction in mathematics and science;

(B) an annual evaluation of the programs assisted under this title; and

(C) research on improving teacher training, retraining, in-service training, and retention, as well as the development of curriculum and materials in the fields of mathematics and science.

One-half of the funds reserved under this paragraph shall be used for the research activities described in clause (C).

(c) From 25 per centum of the amount available in each fiscal year, the Secretary shall make grants to institutions of higher education for the improvement and expansion of instruction in critical foreign languages.

(d) In determining which languages are critical to national security, economic, and scientific needs, the Secretary shall consult with the Secretary of State, the Secretary of Defense, the Secretary of Health and Human Services, and the Director of the National Science Foundation. The Secretary shall publish in the Federal Register a list of critical foreign languages.

PAYMENTS

SEC. 213. (a) From the amounts appropriated under section 203(b), the Secretary shall pay, in accordance with the provisions of this title, the costs of the programs and activities described in the application approved under section 209, and the costs of programs of national significance under section 211.

(b) Payments under this title shall be made as soon after approval of the application as practicable.

TITLE III—NATIONAL SCIENCE FOUNDATION PROGRAM FOR PARTNERSHIPS IN EDUCATION FOR MATHEMATICS, SCIENCE, AND ENGINEERING

SHORT TITLE

SEC. 301. This title may be cited as the "Partnerships in Education for Mathematics, Science, and Engineering Act".

STATEMENT OF PURPOSE

SEC. 302. It is the purpose of this title to supplement State and local resources to—

(1) improve the quality of instruction in the fields of mathematics, science, and engineering in the State;

(2) furnish additional resources and support for research, student scholarships, and faculty exchange programs in the fields of mathematics, science, and engineering; and

(3) encourage partnerships in education between the business community, institutions of higher education, and elementary and secondary schools in the community.

DEFINITIONS

SEC. 303. As used in this title—

(1) the term "Foundation" means the National Science Foundation;

(2) the term "institution of higher education" has the same meaning given that term by section 1201(a) of the Higher Education Act of 1965;

(3) the term "States" includes the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico; and

(4) the term "State agency for higher education" means the State board of higher education or other agency or officer primarily responsible for the State supervision of higher education, or if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

PROGRAM AUTHORIZED

SEC. 304. (a) The Foundation is authorized, in accordance with the provisions of this title, to make grants to States to pay the Federal share of the costs of the activities described in section 305.

(b) There are authorized to be appropriated $30,000,000 for the fiscal year 1984, and $60,000,000 for the fiscal year 1985 to carry out the provisions of this title.

AUTHORIZED ACTIVITIES

SEC. 305. (a)(1) A State may use payments received under this title in any fiscal year for higher education programs and activities described in this subsection.

(2) Grants under this subsection may be used for partnership in education programs—

(A) for the improvement of instruction in mathematics, science, computer science, and engineering education at the postsecondary level;

(B) for awarding scholarships to students at institutions of higher education in the fields of mathematics, science, computer science, and engineering;

(C) for the operation of faculty exchange programs by the institutions of higher education and business concerns within the State;

(D) for research in the fields of mathematics, science, computer science, and engineering;

(E) for the acquisition, rehabilitation, and renovation of equipment and instrumentation for use in instruction in the fields of mathematics, science, computer science, and engineering; and

(F) to promote public understanding of science, mathematics, and computer science.

(3) Education partnerships under this subsection may include institutions of higher education, business concerns, nonprofit private organizations, local educational agencies, professional mathematic and scientific associations, museums, libraries, educational television stations, and if the State so desires, appropriate State agencies.

(b)(1) A State may use payments received under this title in any fiscal year for programs and activities described in this subsection.

(2) A local educational agency may carry out an elementary and secondary school partnership in education program under which—

(A) elementary and secondary school teachers in the schools of local educational agencies who teach mathematics, science, or computer science are made available to local business concerns and business concerns with establi hments located in the community to serve in such concerns or establishments;

(B) personnel of local business concerns and business concerns with establishments located in the community serve as consultants, lecturers, teaching assistants, or teachers of mathematics, science, or computer science in the elementary and secondary schools within the State;

(C) training and retraining is furnished to elementary and secondary school teachers of mathematics, science, and computer science under a cooperative arrangement between the State or local educational agency and appropriate business concerns; and

(D) secondary school students observe, participate, and work in local business concerns and business concerns with establishments located in the community.

(3) Partnerships under this subsection may include local educational agencies, business concerns, nonprofit private organizations, institutions of higher education, professional mathematic and scientific associations, museums, libraries, educational television stations, and, if the State so desires, appropriate State agencies.

STATE APPLICATION

SEC. 306. (a) Any State which desires to receive a grant under this title shall make an application to the Foundation at such time, in such manner, and containing or accompanied by such information as the Foundation may reasonably require. Each such application shall—

(1) designate (A) the State agency for higher education as the State agency responsible for the supervision of programs and activities described in section 305(a) assisted under this title, and (B) the State educational agency as the State agency responsible for the administration and supervision of programs described in section 305(b) assisted under this title;

(2) describe the activities for which assistance under this title is sought;

(3) provide assurances that not more than 5 per centum of the allotment of the State in any fiscal year may be expended on administrative expenses at the State level or at the local level by State and local educational agencies;

(4) with respect to each program for which assistance is sought provide assurances that—

(A) 30 per centum of the funds for each such project will be furnished by business concerns within the community;

(B) 20 per centum of the funds will be supplied by—

(i) the State,

(ii) the institution of higher education or the local educational agency, as the case may be, participating in the program; and

(iii) the other parties participating in the program;

(C) no stipend will be paid directly to employees of a profitmaking business concern; and

(D) teachers participating in the exchange program may not be employed by the participating business concern with which the teacher served within three years after the end of the exchange program unless the teacher repays the full cost of the exchange program to the State and local educational agency, as the case may be; and

(5) provide assurances that whenever the program for which assistance is sought includes scholarships, the scholarships be awarded to undergraduate students at institutions of higher education within the State who wish to pursue a course of study in mathematics or science, engineering or computer science, and that each student awarded a scholarship under this title will receive a stipend which shall not exceed the cost of tuition at the institution of higher education plus a stipend of not to exceed $750 for each academic year of study for which the scholarship is awarded;

(6) provide assurances that consideration is given to programs and activities designed to meet the needs of underrepresented and underserved populations;

(7) provide assurances that in the consideration of applications submitted under section 307(a) that equitable consideration is given to applications submitted by private and public institutions of higher education; and

(8) provide such additional assurances as the Foundation determines essential to ensure compliance with the requirements of this title.

(b) A regional consortium of States or two or more States may file a joint application under the provisions of subsection (a) of this section.

INSTITUTIONAL AND LOCAL APPLICATIONS

SEC. 307. (a) An institution of higher education within a State which desires to receive a grant under this title shall submit an application to the State agency on higher education in accordance with the provisions of this section. Each application shall be submitted jointly by the institution of higher education and each business concern and other party that is to participate in the program for which assistance is sought. Each such application shall—

(1) describe the activities for which assistance is sought; and

(2) contain such other assurances and agreements as the State agency on higher education deems essential to assure compliance with the provisions of this title.

(b) A local educational agency within a State which desires to receive a grant under this title shall submit an application to the State educational agency in accordance with this section. Each application shall be submitted jointly by the local educational agency and each business concern and other party that is to participate in the program for which assistance is sought. Each such applicant shall—

(1) describe the activities for which the local educational agency seeks assistance under this title;

(2) provide assurances, with respect to the partnership in education program, that the applicable provisions of clause (4) of section 306 are met; and

(3) contain such other assurances and agreements as the State educational agency determines essential to assure compliance with the provisions of this title.

APPROVAL OF APPLICATIONS

SEC. 308. (a) The Foundation shall establish criteria for approval of applications under this title.

(b) The Foundation shall adopt approval procedures designed to assure that there is equitable distribution of grants among the States.

PARTICIPATION OF CHILDREN ENROLLED IN PRIVATE SCHOOLS

SEC. 309. The provisions of section 211 of this Act shall apply to the payments made under this title.

PAYMENTS; FEDERAL SHARE; LIMITATION

SEC. 310. (a)(1) The Foundation shall pay to each State having an application approved under section 308, the Federal share of the cost of the program described in the application.

(2) The Federal share for each fiscal year shall be 50 per centum.

(3) The non-Federal share of payments under this title may be in cash or in kind, fairly evaluated, including plant, equipment, or services.

(b) Not more than 15 per centum of the funds appropriated under this title in any fiscal year may be paid to any single State.

TITLE IV—PRESIDENTIAL AWARDS FOR TEACHING EXCELLENCE IN MATHEMATICS AND SCIENCE

PRESIDENTIAL AWARDS

SEC. 401. (a) The President is authorized to make Presidential Awards for Teaching Excellence in Mathematics and Science to secondary school teachers of mathematics or science who have demonstrated outstanding teaching qualifications in the field of teaching mathematics or science.

(b) Each year the President is authorized to make 100 awards under subsection (a) of this section. In selecting secondary school teachers for the award authorized by this section, the President shall select at least one secondary school teacher from each of the several States, the District of Columbia, and the Commonwealth of Puerto Rico.

ADMINISTRATIVE PROVISIONS

SEC. 402. The President shall carry out the provisions of this title, including the establishment of the selection procedures, after consultation with the Secretary of Education, the Director of the National Science Foundation, and other appropriate officials of Federal agencies.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DURENBERGER, from the Committee on Environment and Public Works:

S. 1280. An original bill to extend the Noise Control Act of 1972; placed on the calendar.

S. 1281. An original bill to amend the Toxic Substances Control Act to authorize appropriations for fiscal year 1984; placed on the calendar.

By Mr. CHAFEE, from the Committee on Environment and Public Works:

S. 1282. An original bill to extend titles I and II of the Marine Protection Research and Sanctuaries Act, as amended; placed on the calendar.

S. 1283. An original bill to amend the Solid Waste Disposal Act to authorize funds for fiscal year 1984; placed on the calendar.

S. 1284. An original bill to extend until October 1, 1985, the authority for advances to the migratory bird conservation fund; placed on the calendar.

By Mr. HATCH, from the Committee on Labor and Human Resources:

S. 1285. An original bill to improve the quality of mathematics and science teaching and instruction in the United States, and for other purposes; placed on the calendar.

By Mr. GORTON (for himself, Mr. GOLDWATER, Mr. TRIBLE, Mr. RIEGLE, Mr. HEFLIN, Mr. LAUTENBERG and Mr. TSONGAS):

S. 1286. A bill to establish a program to conduct research and development for improved manufacturing technologies, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. STAFFORD, from the Committee on Environment and Public Works:

S. 1287. An original bill to authorize appropriations for the Public Buildings Service of the General Services Administration for the fiscal year 1984; placed on the calendar.

By Mr. CHAFEE, from the Committee on Environment and Public Works:

S. 1288. An original bill to extend the Clean Water Act for one year, and for other purposes; placed on the calendar.

By Mr. ABDNOR, from the Committee on Environment and Public Works:

S. 1289. An original bill to establish an obligation ceiling for the civil work construction program of the U.S. Army Corps of Engineers; placed on the calendar.

By Mr. DURENBERGER, from the Committee on Environment and Public Works:

S. 1290. An original bill to extend the Safe Drinking Water Act, as amended, for 1 year; placed on the calendar.

By Mr. SIMPSON, from the Committee on Environment and Public Works:

S. 1291. An original bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, and section 305 of the Energy Reorganization Act of 1974; placed on the calendar.

By Mr. DURENBERGER, from the Committee on Environment and Public Works:

S. 1292. An original bill to authorize appropriations for environmental research, development, and demonstrations for fiscal year 1984; placed on the calendar.

By Mr. HUMPHREY, from the Committee on Environment and Public Works:

S. 1293. An original bill to extend authorization for appropriations for the Disaster Relief Act of 1974, and for other purposes; placed on the calendar.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

S. 1294. An original bill to authorize appropriations to carry out the Export Administration Act of 1979; placed on the calendar.

By Mr. MOYNIHAN:

S.J. Res. 100. A joint resolution proposing an amendment to the Constitution of the United States with respect to the appellate jurisdiction of the Supreme Court of the United States; to the Committee on the Judiciary

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MATHIAS, from the Committee on Rules and Administration:

S. Res. 143. An original resolution authorizing expenditures by the Committee on Rules and Administration for the training of professional staff; placed on the calendar.

S. Res. 144. An original resolution relating to the purchase of calendars; from the Committee on Rules and Administration; placed on the calendar.

S. Res. 145. An original resolution to pay a gratuity to Stephen B. Couch; from the Committee on Rules and Administration; placed on the calendar.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

S. Res. 146. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 695; to the Committee on the Budget.

By Mr. MATHIAS, from the Committee on Rules and Administration:

S. Con. Res. 35. An original concurrent resolution to authorize the printing as a Senate Document of a revised edition of "The Capitol"; placed on the calendar.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GORTON (for himself, Mr. GOLDWATER, Mr. TRIBLE, Mr. HEFLIN, Mr. RIEGLE, Mr. LAUTENBERG, and Mr. TSONGAS):

S. 1286. A bill to establish a program to conduct research and development for improved manufacturing technologies, and for other purposes; to the Committee on Commerce, Science, and Transportation.

MANUFACTURING SCIENCES AND TECHNOLOGY RESEARCH AND DEVELOPMENT ACT OF 1983

Mr. GORTON. Mr. President, the health of the U.S. economy and the employment of our work force are heavily dependent on the strength of the manufacturing sectors of U.S. industry.

In 1981 the manufacturing sectors:

Provided 24 percent of our national income; accounted for more than 25 percent of all jobs in 18 States and for 15-25 percent of all jobs in an additional 29 States; and produced $154 billion in goods for export.

Our wealth, our high standard of living and our national security in recent decades have been due in large part to our ability to manufacture a wide range of goods superior to those which foreign industries have been able to produce.

DISTURBING SIGNS

Today there are disturbing signs for our manufacturing sectors. Employment in manufacturing has dropped each year for the past 4 years—from 21 million jobs in 1979 to 18 million jobs in 1983. Industrial production of manufactured goods has fallen 11 percent during the same period.

Foreign imports captured nearly 8 percent of the domestic market for manufactured goods in 1982 and appear likely to capture a higher portion in 1983. The United States had a negative balance of trade in manufactured goods in 1982 exceeding $4 billion. And based on trade data for the first 2 months of this year, the negative balance for manufactured goods projects to $15 billion for 1983.

Recently published data revealed that the negative trade balance in nonresearch-intensive manufactured goods worsened from $15 billion in 1972 to $35 billion in 1979. Only growing sales in high technology manufactured products has kept the deficit in manufactured goods in partial check.

There are signs that the trade balance, especially in low-tech or basic manufactured goods will worsen. Significant improvements have been made in recent years in the equipment, methods and processes available to manufacture goods. Yet U.S. industries have been slow in adopting these more productive means of manufacturing.

More than a third of the manufacturing equipment used by U.S. industries is reported to be 20 or more years old—the highest percentage of old equipment for any major industrialized country. Only 31 percent is less than 10 years old (modern), compared to Japan where 61 percent is less than 10 years old.

Media accounts frequently contrast outmoded U.S. manufacturing methods with more modern, efficient methods employed by such competitors as Japan and West Germany.

THE PROSPECTS FOR ENHANCING COMPETITIVENESS THROUGH SCIENCE AND TECHNOLOGY

An essential element to strengthen and enhance the competitiveness of our manufacturing sectors is to improve the productivity of manufacturing equipment, methods, and processes used by American industry. Such productivity improvements can lead to the manufacturing of goods which are more cost competitive, more reliable, and more advanced technologically than those of foreign industries.

Major breakthroughs are possible in the productivity of manufacturing becasue of potential and existing advances in robots and other programable machine tools, automated materials handling and transfer systems, industrial uses of computers, lasers, and other exotic sensors allowing degrees of precision, of automation, and of production flexibility which are impossible with conventional manufacturing methods. However, substantial efforts in research and in the utilization of research findings are needed to usher in these advances on a significant scale.

MANUFACTURING SCIENCES AND TECHNOLOGY RESEARCH AND DEVELOPMENT ACT OF 1983

Today Senators GOLDWATER, TRIBLE, HEFLIN, TSONGAS, RIEGLE, and LAUTENBERG join with me in introducing a bill directing the Secretary of Commerce to establish the manufacturing sciences and technology research and development program in the Department of Commerce. This science and technology effort can provide the foundation for improving the productivity of our manufacturing methods and processes.

The stronger foundation, in turn, should enhance the competitiveness of U.S. manufacturing industries, strengthen our economy, and restore jobs.

The bill authorizes grants for fundamental research in a variety of fields important to manufacturing methods and processes.

It authorizes matching funds to geographically distributed consortia of industries and research institutions to conduct research of a more applied nature leading to private sector devel-

opment of manufacturing methods for specific industrial sectors.

Another principle provision of the bill directs the Secretary to conduct assessments of the long-term competitiveness of important domestic technology-sensitive industrial sectors.

The bill also provides for some experimental research utilization activities and an advisory committee to assist the Secretary in establishing and then assessing the program and to report to annually to the Congress.

The bill authorizes $20 million for fiscal year 1984, $47 million for fiscal year 1985, and $57 million for each fiscal year from 1986 to and including 1988.

Mr. President, I request that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1286

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Manufacturing Sciences and Technology Research and Development Act of 1983".

FINDINGS

SEC. 2. The Congress finds that—

(1) various sectors of private industry, the Federal Government and the United States research establishment have not devoted sufficient attention to research on developing new processes and methods to improve the Nation's capability to manufacture goods;

(2) while manufacturing industries are essential to the economic well-being of the Nation, many manufacturing processes and methods are no longer capable of producing goods as reliable and cost-competitive as those produced by foreign industries which utilize modern manufacturing methods and processes;

(3) domestic manufacturing is increasingly threatened by external competition and the development by foreign countries of more efficient manufacturing processes and technologies;

(4) outdated manufacturing methods and processes result in higher costs and goods and services of inferior quality, which place great burdens on consumers of such goods and services;

(5) outdated and inefficient manufacturing processes hinder domestic commerce;

(6) transportation and delivery of manufactured goods are vital components of the Nation's interstate commerce, and a decline in consumption of domestic manufactured goods due to inefficient manufacturing processes produces a resultant decline in transportation;

(7) manufacturing contributes large amounts of revenue to the Nation's gross domestic product and employs more than one-fifth of the Nation's work-force;

(8) domestic manufacturers have not sufficiently utilized such recent technological changes in manufacturing as programmable automation, robotics, advanced sensors, and computer-assisted design and manufacturing; and

(9) a program to conduct research which will produce more efficient manufacturing processes and methods and to encourage research utilization would strengthen commerce and be beneficial to the Nation's consumers.

PURPOSE

SEC. 3. It is the purpose of this Act to establish a program for conducting research which will produce more efficient manufacturing technologies and for conducting research utilization activities to encourage widespread adoption of these technologies.

DEFINITIONS

SEC. 4. As used in this Act, the term—

(1) "Advisory Committee" means the Manufacturing Sciences and Technology Enhancement Advisory Committee established under section 8 of this Act;

(2) "consortia" means a group of organizations such as States, individual industries or industry associations, non-profit research institutions, and universities and other academic institutions;

(3) "Center" means a Center for Manufacturing Research and Technology Utilization established under section 5(c) of this Act;

(4) "Office" means the Office of the Assistant Secretary for Productivity, Technology and Innovation within the Department of Commerce; and

(5) "Secretary" means the Secretary of Commerce.

GRANTS AND COOPERATIVE AGREEMENTS

SEC. 5. (a) PURPOSES.—The Secretary, through the Office, may award grants and enter into cooperative agreements in accordance with the provisions of this section to provide for research on methods of producing more efficient manufacturing processes and methods, including—

(1) computer-assisted design;

(2) automated materials handling, processing, and assembly;

(3) automated testing;

(4) machine adaptive learning;

(5) integrated manufacturing systems, including interface of automated machines with automated and non-automated machines, with production and design personnel, and with other systems (including testing devices, design systems, and inventory control systems);

(6) machine and process control strategies;

(7) automated sensing for machine and process control and product testing;

(8) practices and activities to implement improved manufacturing methods; and

(9) such other research as the Secretary determines to be consistent with the purposes of this Act.

(b) GRANTS.—(1) The Secretary, through the Office, may make grants to provide for research to increase the amount of fundamental scientific and technological knowledge in fields relevant to manufacturing methods and processes. Such grants shall be made on a competitive basis to applicants who comply with such criteria as are specified in this Act and as the Secretary shall establish, consistent with the purposes of this Act.

(2) A recipient of such a grant may be affiliated with a non-profit research institution, a private industry or industry association, a university or college, a Center established pursuant to subsection (c) of this section, or any other organization which the Secretary considers appropriate. Any such recipient shall not be required to provide any part of the costs of such research, unless the recipient desires to expand the scope of the research to be conducted. In such a case, the Secretary may enter into an agreement which provides for cost-sharing by the recipient.

(3) There are authorized to be appropriated for the purposes of this subsection not to exceed $10,000,000 for the fiscal year ending September 30, 1984, not to exceed $20,000,000 for the fiscal year ending September 30, 1985, and not to exceed $30,000,000 for each of the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988. Such funds shall remain available until expended.

(c) COOPERATIVE AGREEMENTS.—(1) The Secretary, through the Office, may enter into cooperative agreements for the purpose of establishing and supporting Centers for Manufacturing Research and Technology Utilization. Such Centers shall conduct research of a more applied nature than the research conducted under subsection (b) of this section. Centers shall study methods of increasing the utilization by the Nation's industries of those modern manufacturing methods which may result in lower production costs and improved product quality and reliability. Such research may be directed toward problems or processes and methods appropriate to a specific industrial sector, including aerospace, micro-electronics, mechanical assembly, basic materials, new materials, and transportation.

(2) The Secretary shall enter into any such agreements with consortia of research organizations and manufacturing industries or industry associations. Such agreements shall be made with applicants who comply with such criteria as are specified in this Act and as the Secretary shall establish, consistent with the purposes of this Act.

(3)(A) In addition to funds received under this subsection, a Center may receive funds from Federal agencies and from public and private organizations. Consortia which enter into such an agreement shall provide support and participation in a dollar amount at least equal to the amount of the Federal contribution to be made under this subsection.

(B) For purposes of this paragraph, the term "support and participation" includes cash or equipment contributions in an amount equal to at least 50 per centum of the Federal Government's share, industry personnel to conduct research, and access by persons in the research organizations to modern manufacturing equipment in the participating industry for research and other appropriate purposes. Contributions from non-profit participants may consist of in-kind contributions. Federal contributions made under this subsection may be utilized only to support expenditures by non-profit research organizations participating in the relevant consortia.

(4) In entering into such agreements, the Secretary shall consider—

(A) the quality of the research which is to be undertaken as a result of the particular agreement;

(B) the extent of participation by industry in the research to be undertaken as a result of the agreement;

(C) the size of the industrial sector involved and the potential impacts on the productivity of that industrial sector as a result of successful research undertaken through the agreement, as well as the subsequent development and utilization of the manufacturing methods and processes to be studied as part of such research; and

(D) the extent to which entering into the agreement would be likely to increase the number of scientific and technical personnel capable of utilizing modern manufacturing methods and processes.

In addition, the Secretary shall ensure diversity among the industrial sectors which are the subject of the research conducted under any such agreement, as well as geographic dispersion of the Centers established and supported under this subsection.

(5) There are authorized to be appropriated for the purposes of this subsection not to exceed $5,000,000 for the fiscal year ending September 30, 1984, not to exceed $15,000,000 for the fiscal year ending September 30, 1985, and not to exceed $25,000,000 for each of the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988. Such funds shall remain available until expended.

ADVANCED MANUFACTURING METHODS RESEARCH UTILIZATION PROGRAM

SEC. 6. (a) ACTIVITIES.—The Secretary shall establish a program of experimental activities, and shall evaluate existing activities, to identify the most feasible means of enhancing the utilization of technologically advanced manufacturing methods by retraining workers who have been displaced from declining industries. The Secretary shall provide for the development, conduct and evaluation of such experimental activities. The Secretary may, to the extent provided in advance in appropriation Acts, contract with any appropriate person or organization (including States and Centers established under section 5(c) of this Act) to carry out such experimental activities.

(b) REPORT.—No later than 1 year after the conclusion of the program carried out under this section, the Secretary shall submit to the Congress a report of such program.

(c) AUTHORIZATION.—There are authorized to be appropriated for the purposes of this section not to exceed $4,000,000 for the fiscal year ending September 30, 1984, and not to exceed $10,000,000 for the fiscal year ending September 30, 1985. Such funds shall remain available until expended.

COMPETITIVENESS STUDIES

SEC. 7. (a) STUDY.—The Secretary shall select specific domestic technology-sensitive industrial sectors and shall analyze such sectors' long-term capability for remaining competitive, especially with industries in foreign countries. In making such selection, the Secretary shall consider industrial sectors which are or are likely to be vulnerable to foreign competition, as well as sectors which are likely to experience rapid and significant growth.

(b) SUBJECTS OF STUDY.—As part of such study, the Secretary shall consider—

(1) the adequacy of technologies utilized to produce the goods and services of such sectors;

(2) superior foreign technologies or unique resources which yield a competitive advantage to industries in foreign countries over similar domestic industries;

(3) the anticipated scientific and technical personnel requirements for such sectors;

(4) the adequacy of Federal laws and regulations, and the enforcement of such laws and regulations, in promoting technological innovativeness and commercial competitiveness by such sectors; and

(5) whether changes in such laws and regulations, or the enforcement of such laws and regulations, are desirable to promote technological innovation and competition in such sectors and to safeguard the well-being of the Nation and the public.

(c) AUTHORIZATION.—There are authorized to be appropriated for the purposes of this section not to exceed $1,000,000 for the fiscal year ending September 30, 1984, and not to exceed $2,000,000 for each of the fiscal years ending September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988. Such funds shall remain available until expended.

ADVISORY COMMITTEE

SEC. 8. (a) ESTABLISHMENT.—The Secretary shall establish a Manufacturing Sciences and Technology Enhancement Advisory Committee to advise the Secretary concerning the activities to be conducted under this Act. The Advisory Committee shall have representation from technology-sensitive industrial sectors, from labor, from the manufacturing research community, and from other sectors which the Secretary considers appropriate. Such members shall be appointed by the Secretary for a term of 2 years, and shall receive no compensation. Any such member shall, in accordance with section 5703 of title 5, United States Code, be entitled to reimbursement for travel or transportation expenses incurred in the performance of responsibilities as a member of the Advisory Committee.

(b) FUNCTIONS.—The Advisory Committee shall—

(1) review the policies and selection criteria for grants made and cooperative agreements entered into under this Act;

(2) review the progress of the Secretary of Commerce in meeting all the requirements of this Act;

(3) assess the effectiveness of the activities funded pursuant to this Act; and

(4) submit to the Secretary, at least annually, evaluations and recommendations regarding activities carried out under this Act.

(c) REPORT.—The Advisory Committee shall submit to the Congress an annual report on its activities under this Act.

(d) APPLICABILITY.—The Advisory Committee shall be subject to the Federal Advisory Committee Act (5 U.S.C. Appx. 1 et seq.).

By Mr. MOYNIHAN:

S.J. Res. 100. Joint resolution proposing an amendment to the Constitution of the United States with respect to the appellate jurisdiction of the Supreme Court of the United States; to the Committee on the Judiciary.

PROPOSED CONSTITUTIONAL AMENDMENT RELATIVE TO THE APPELLATE JURISDICTION OF THE SUPREME COURT

Mr. MOYNIHAN. Mr. President, in recent years, it has become increasingly fashionable to attempt to come to grips with problems we in this country face by stripping the U.S. Supreme Court of its jurisdiction to address such issues. I find this trend distressing in the extreme. Therefore, I am today proposing an amendment to the Constitution of the United States. I ask unanimous consent that my joint resolution be printed in full in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 100

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress.

"ARTICLE—

"SECTION 1. The Supreme Court of the United States shall have appellate jurisdiction in all cases arising under the Constitution of the United States, both as to law and fact, with such exceptions and under such regulations as the Supreme Court of the United States shall make."

ADDITIONAL COSPONSORS

S. 41

At the request of Mr. DURENBERGER, the name of the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 41, a bill to extend the revenue sharing program for local governments through fiscal year 1986.

S. 453

At the request of Mr. WARNER, the names of the Senator from Pennsylvania (Mr. HEINZ), and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of S. 453, a bill to amend the Tariff Schedules of the United States to impose a one-tenth of 1 percent duty on apple and pear juice.

S. 578

At the request of Mr. SIMPSON, the name of the Senator from Vermont (Mr. STAFFORD) was added as a cosponsor of S. 578, a bill to amend title 38, United States Code, to provide for adult day health care services for veterans, to authorize the Veterans' Administration to administer a community residential care program, to establish a presumption of service connection for former prisoners of war suffering from dysthymic disorder and revise and clarify eligibility for reimbursement of expenses of travel for Veterans' Administration health care.

S. 606

At the request of Mr. PROXMIRE, the names of the Senator from North Dakota (Mr. BURDICK), the Senator from Florida (Mr. CHILES), the Senator from Iowa (Mr. JEPSEN), the Senator from Michigan (Mr. LEVIN), the Senator from Arkansas (Mr. PRYOR), the Senator from Michigan (Mr. RIEGLE), the Senator from Vermont (Mr. STAFFORD), and the Senator from Kentucky (Mr. FORD) were added as cosponsors of S. 606, a bill to prohibit the owners and operators of federally assisted rental housing for the elderly or handicapped from restricting the ownership of pets by the tenants of such housing.

S. 800

At the request of Mr. STEVENS, the names of the Senator from South Carolina (Mr. HOLLINGS), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Hawaii (Mr. INOUYE), the Senator from Florida (Mr. CHILES), the Senator from Maine (Mr. COHEN), the Senator from Maine (Mr. MITCHELL), and the Senator from

Michigan (Mr. RIEGLE) were added as cosponsors of S. 800, a bill to establish an ocean and coastal development impact assistance fund and to require the Secretary of Commerce to provide to States national ocean and coastal development and assistance block grants from moneys in the fund, and for other purposes.

S. 878

At the request of Mr. HEFLIN, the name of the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 878, a bill to authorize and direct the Secretary of the Army to correct certain erosion problems along the banks of the Warrior River near Moundville, Ala.

S. 986

At the request of Mr. PRESSLER, the name of the Senator from Tennessee (Mr. SASSER) was added as a cosponsor of S. 986, a bill to repeal employer reporting requirements with respect to tips.

S. 1051

At the request of Mr. TOWER, the names of the Senator from Michigan (Mr. RIEGLE), and the Senator from Alaska (Mr. MURKOWSKI) were added as cosponsors of S. 1051, a bill to amend the Internal Revenue Code of 1954 to allow certain prepayments of principal and interest to be treated as contributions to an individual retirement account, to allow amounts to be withdrawn from such account to purchase a principal residence, and for other purposes.

S. 1090

At the request of Mr. KASTEN, his name was added as a cosponsor of S. 1090, a bill to establish a National Outdoor Recreation Resources Review Commission to study and recommend appropriate policies and activities for government agencies at the Federal, State, and local levels and for the private sector, to assure the continued availability of quality outdoor recreation experiences in America to the year 2000, and for other purposes.

S. 1096

At the request of Mr. GORTON, the name of the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 1096, a bill to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes.

S. 1113

At the request of Mr. D'AMATO, the name of the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of S. 1113, a bill to amend the Internal Revenue Code of 1954 to provide that tax-exempt interest shall not be taken into account in determining the amount of social security benefits to be taxed.

S. 1120

At the request of Mr. GARN, the name of the Senator from Colorado (Mr. ARMSTRONG) was added as a cosponsor of S. 1120, a bill to authorize printing of the back side of U.S. paper money of the denomination of $1 by a method other than the intaglio process.

S. 1161

At the request of Mr. DURENBERGER, the name of the Senator from Maine (Mr. MITCHELL) was added as a cosponsor of S. 1161, a bill to amend the Internal Revenue Code of 1954 to make it clear that certain motor vehicle operating leases are leases.

S. 1172

At the request of Mr. NICKLES, the names of the Senator from North Carolina (Mr. HELMS) and the Senator from Virginia (Mr. TRIBLE) were added as cosponsors of S. 1172, a bill to amend the Davis-Bacon Act.

S. 1197

At the request of Mr. RIEGLE, his name was added as a cosponsor of S. 1197, a bill to admit certain passenger vessels to the coastwise trade.

SENATE JOINT RESOLUTION 3

At the request of Mr. HATCH, the name of the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of Senate Joint Resolution 3, a joint resolution to amend the Constitution to establish legislative authority in Congress and the States with respect to abortion.

SENATE JOINT RESOLUTION 54

At the request of Mr. NICKLES, the names of the Senator from Florida (Mr. CHILES), the Senator from Nevada (Mr. LAXALT), the Senator from Virginia (Mr. TRIBLE), and the Senator from Georgia (Mr. NUNN) were added as cosponsors of Senate Joint Resolution 54, a joint resolution to authorize and request the President to designate the month of January 1984 as "National Eye Health Care Month."

SENATE JOINT RESOLUTION 61

At the request of Mr. ANDREWS, the names of the Senator from New Jersey (Mr. LAUTENBERG), the Senator from Maryland (Mr. SARBANES), the Senator from New Jersey (Mr. BRADLEY), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Alabama (Mr. DENTON), and the Senator from Maryland (Mr. MATHIAS) were added as cosponsors of Senate Joint Resolution 61, a joint resolution to designate the week of May 22, 1983, through May 28, 1983, as "National Digestive Diseases Awareness Week."

SENATE JOINT RESOLUTION 92

At the request of Mrs. HAWKINS, the names of the Senator from Minnesota (Mr. DURENBERGER), the Senator from Kansas (Mr. DOLE), the Senator from Georgia (Mr. NUNN), the Senator from Rhode Island (Mr. PELL), the Senator from Michigan (Mr. RIEGLE), the Senator from Arkansas (Mr. PRYOR), the Senator from South Carolina (Mr. THURMOND), the Senator from Arizona (Mr. GOLDWATER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from New Jersey (Mr. BRADLEY), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Iowa (Mr. GRASSLEY), the Senator from Michigan (Mr. LEVIN), the Senator from Georgia (Mr. MATTINGLY), the Senator from Ohio (Mr. GLENN), and the Senator from New Jersey (Mr. LAUTENBERG) were added as cosponsors of Senate Joint Resolution 92, a joint resolution designating the week beginning May 8, 1983, as "Municipal Clerk's Week."

SENATE RESOLUTION 72

At the request of Mr. KENNEDY, the name of the Senator from Connecticut (Mr. DODD) was added as a cosponsor of Senate Resolution 72, a resolution to assure Israel's security, to oppose advance arms sales to Jordan, and to further peace in the Middle East.

SENATE RESOLUTION 95

At the request of Mr. HUDDLESTON, his name, and the names of the Senator from Ohio (Mr. GLENN), the Senator from Vermont (Mr. LEAHY), the Senator from Colorado (Mr. HART), and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of Senate Resolution 95, a resolution to express the sense of the Senate that the President should initiate negotiations on a new long-term agreement on agricultural trade with the Soviet Union.

SENATE RESOLUTION 125

At the request of Mr. LEVIN, the names of the Senator from Nebraska (Mr. EXON), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Indiana (Mr. QUAYLE), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of Senate Resolution 125, a resolution expressing the sense of the Senate that the Government of the Soviet Union should allow Ida Nudel to emigrate to Israel, and for other purposes.

SENATE RESOLUTION 130

At the request of Mr. GORTON, the names of the Senator from Hawaii (Mr. MATSUNAGA), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kansas (Mr. DOLE), the Senator from Wisconsin (Mr. KASTEN), the Senator from Utah (Mr. GARN), the Senator from North Carolina (Mr. HELMS), the Senator from Idaho (Mr. MCCLURE), the Senator from South Carolina (Mr. THURMOND), the Senator from Colorado (Mr. ARMSTRONG), and the Senator from Wisconsin (Mr. PROXMIRE) were added as cosponsors of Senate Resolution 130, a resolution expressing the sense of the Senate that the President should award the Presidential Medal of Freedom to Barney Clark, to be presented to his family in his memory.

SENATE RESOLUTION 137

At the request of Mr. KASTEN, the names of the Senator from South Carolina (Mr. HOLLINGS), the Senator from Indiana (Mr. QUAYLE), and the Senator from North Carolina (Mr. HELMS) were added as cosponsors of Senate Resolution 137, a resolution expressing the sense of the Senate that Taiwan should retain full membership in the Asian Development Bank, and that it should not be expelled as a precondition for membership in that body by the People's Republic of China.

SENATE CONCURRENT RESOLUTION 35—AUTHORIZING THE PRINTING OF A SENATE DOCUMENT

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original concurrent resolution, which was placed on the calendar:

S. CON. RES. 35

Resolved by the Senate (the House of Representatives concurring), That there shall be printed as a Senate document a revised edition of "The Capitol", to be published under the direction of the Joint Committee on Printing with the editorial assistance of the Committee on Rules and Administration.

SEC. 2. In addition to the usual number of copies, there shall be printed five hundred and sixty-six thousand additional copies, of which four hundred and forty-three thousand copies shall be for the use of the House of Representatives, one hundred and three thousand copies shall be for the use of the Senate, and twenty thousand copies shall be for the use of the Joint Committee on Printing.

SEC. 3. A sum not to exceed $15,000 for travel expenses and photographic expenses incurred in carrying out this concurrent resolution shall be paid from the contingent fund of the Senate on vouchers approved by the Chairman of the Joint Committee on Printing.

SENATE RESOLUTION 143—AUTHORIZING EXPENDITURES BY THE COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution, which was placed on the calendar:

S. RES. 143

Resolved, That section 16(b) of S. Res. 76, Ninety-Eighth Congress, agreed to March 2, 1983, is amended (1) by inserting "(1)" after "amount"; and (2) by inserting before the period at the end thereof the following: ", and (2) not to exceed $2,000 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act)".

SENATE RESOLUTION 14—RELATING TO THE PURCHASE OF CALENDARS

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution, which was placed on the calendar:

S. RES. 144

Resolved, That the Committee on Rules and Administration is authorized to expend from the contingent fund of the Senate, upon vouchers approved by the chairman of that committee, not to exceed $60,320 for the purchase of one hundred and four thousand calendars. The calendars shall be distributed as prescribed by the committee.

SENATE RESOLUTION 145—PAYING A GRATUITY

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution, which was placed on the calendar:

S. RES. 145

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Stephen B. Couch, widower of Pamela S. Couch, an employee of the Senate at the time of her death, a sum equal to seven and one-half months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 146—WAIVING CONGRESSIONAL BUDGET ACT

Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 146

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 695, a bill to increase the U.S. quota in the International Monetary Fund. Such waiver is necessary because S. 695 authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations. Prolonged severity of the economic conditions, requiring such actions had not been anticipated prior to the aforementioned reporting date.

S. 695 provides an authorization for fiscal year 1983 of $8,500,000,000 ($7,560,800,000 Special Drawing Rights).

For the foregoing reasons, pursuant to section 402(e) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to S. 695 as reported by the Committee on Banking, Housing, and Urban Affairs.

AMENDMENTS SUBMITTED

IMMIGRATION AND NATIONALITY ACT REFORM

HAWKINS AMENDMENT NO. 1267

Mrs. HAWKINS proposed an amendment to the bill (S. 529) to revise and reform the Immigration and Nationality Act, and for other purposes; as follows:

At the appropriate place in the bill add:

SEC. . There are authorized to be appropriated to an immigration emergency revolving fund, to be established in the Treasury, $35,000,000, to be used to provide for an increase in border patrol or other enforcement activities of the Service and for reimbursement of State and localities in providing assistance as requested by the Attorney General in meeting an immigration emergency, except that no amounts may be withdrawn from such funds with respect to an emergency unless the President has determined that the immigration emergency exists and has certified such fact to the Judiciary Committees of the House of Representatives and of the Senate.

DANFORTH (AND MOYNIHAN) AMENDMENT NO. 1268

Mr. DANFORTH (for himself and Mr. MOYNIHAN) proposed an amendment to the bill S. 529, supra; as follows:

On page 176, lines 16 and 17, strike out "inserting before the period at the end thereof" and insert in lieu thereof "striking out the period and inserting in lieu thereof".

Beginning on page 176, with line 21, strike out all through line 9 on page 177 and insert in lieu thereof the following:

"(A) in the case of an alien admitted on or before September 30, 1989, under section 101(a)(15)(F), (i) who is applying for a visa as an immigrant described in section 202(b)(1) and who has obtained his degree from a college or university in the United States, and who has been offered a position as a faculty member or academic researcher in the field in which he obtained his degree by a United States college or university, or (ii) who has obtained a degree in a natural science, mathematics, computer science, or an engineering field from a college or university in the United States, who is applying for a visa as an immigrant described in section 202(b) (1) or (2), and who has been offered a research, business, or technical position by a United States employer in the field in which he obtained such degree, or (iii) who has obtained an advanced degree in business or economics from a college or university in the United States, who has exceptional ability in business or economics, who is applying for a visa as an immigrant described in section 202(b) (1) or (2), and who has been offered a research, business or technical position by a United States employer which is in the field in which he obtained such degree and which requires such exceptional ability, or".

On page 177, line 21, strike out the quotation marks.

On page 177, between lines 21 and 22, insert the following: "Thirty days after the end of each fiscal year, the Attorney General shall prepare and transmit to the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate a report setting forth the number of aliens who applied for, and the number of aliens who were granted, waivers of the two-year foreign residence requirement pursuant to subclause (A) of the preceding proviso during the preceding fiscal year. The Attorney General and the Secretary of State jointly shall conduct a study on the impact of the waivers made pursuant to subclause (A) of the preceding

proviso on the professional or technical labor requirements of foreign countries and jointly shall prepare and transmit not later than the close of the fiscal year 1986 to the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate a report setting forth the findings of such study.".

On page 163, line 13, insert after "workers" the following: "(or equally qualified workers in the case of aliens (i) who are members of the teaching profession or who have exceptional ability in the sciences or arts)".

WARNER AMENDMENT NO. 1269

Mr. WARNER proposed an amendment to the bill S. 529, supra; as follows:

Amend section 102, subsection 114 on page 121 line 14 delete the word "shall" and insert the word "may" after the words "Secretary of State."

BAUCUS AMENDMENT NO. 1270

Mr. BAUCUS proposed an amendment to amendment No. 1269 proposed by Mr. Warner to the bill S. 529, supra; as follows:

On page 102, strike out "SEC. 114. FEES.".

On page 121, strike out all of section 114, line 4 to line 20.

BUMPERS AMENDMENT NO. 1271

Mr. BUMPERS proposed an amendment to the bill S. 529, supra; as follows:

On page 157, beginning with line 19, strike out all through page 158, line 6.

BYRD (AND RANDOLPH) AMENDMENT NO. 1272

Mr. BYRD (for himself and Mr. RANDOLPH) proposed an amendment to the bill S. 529, supra; as follows:

At the appropriate place in the bill, add the following:

"It is the sense of the Senate that, inasmuch as the Department of Labor promulgated a final rule on January 4, 1983, at 20 CFR Part 655, described as Labor Certification Process for the Temporary Employment of Aliens in the United States in Agriculture; Adverse Effect Wage Rate; and this rule increased the Adverse Effect Wage Rate for West Virginia by 17.2 percent; and

"Inasmuch as the 17.2 percent increase in the Adverse Effect Wage Rate for West Virginia is nearly seven times greater than the increase made for other states affected by the rulemaking; and

"Inasmuch as the increase in the Adverse Effect Wage Rate will cause a substantial portion of the West Virginia apple crop to be uncompetitive in the marketplace, and the resulting economic damage to a significant number of apple growers in West Virginia is likely to be severe; and

"Inasmuch as the Department of Labor should consider the formal objections of the State of West Virginia, the State of Maryland, and the United States Department of Agriculture to its rulemaking;

"The Senate declares that the Department of Labor should re-examine its January 4, 1983 rulemaking at 20 CFR Part 655, affecting the Adverse Effect Wage Rate applied to West Virginia fruitgrowers, with the purpose of seeking a fair and reasonable adjustment to that rate."

NOTICES OF HEARINGS

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the Senate Committee on the Budget will resume deliberation of the First Concurrent Budget Resolution for fiscal year 1984 on Tuesday, May 17, at 9 a.m. in 608 Dirksen Senate Office Building.

For further information, contact Nancy Moore of the Senate Budget Committee at 224-4129.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. STAFFORD. Mr. President, the Committee on Environment and Public Works will conduct a hearing at 10 a.m. on Tuesday, May 17, 1983. The hearing, in room SD-406, the committee's hearing room, will discuss the committee's jurisdictional interest in S. 267, the coal slurry bill reported by the Committee on Energy and Natural Resources. Our focus will be the impact of recent court decisions, such as Sporhase against Nebraska, on section 5 of S. 267.

Witnesses have been asked to provide their thoughts on:

The trend in recent court decisions on State water laws; whether section 5 of S. 267 achieves its stated goal of primacy for State water law and, if not, how the language might be modified to achieve that goal; whether that goal of primacy for State water law is sound public policy; and the possible impact of section 5 on other water uses.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. GARN. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, May 17, at 2 p.m., to hold a hearing on the nomination of Stephen Eilperin to be an Associate Judge of the District of Columbia.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON WATER RESOURCES

Mr. GARN. Mr. President, I ask unanimous consent that the Subcommittee on Water Resources of the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Tuesday, May 17, at 2:30 p.m., to hold a hearing on water resources policy.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. GARN. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, May 17, at 10 a.m., to meet in closed session to receive a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. GARN. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, May 17, at 2 p.m., to consider the nomination of David F. Emery to be Deputy Director of the Arms Control and Disarmament Agency.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, May 18, in order to receive testimony concerning the following nominations:

Judge H. Ted Mulburn, of Tennessee, to be U.S. district judge for the Eastern District of Tennessee;

Judge Julia Smith Gibbons, of Tennessee, to be U.S. district judge for the Western District of Tennessee; and

Mr. Bobby Ray Baldock, of New Mexico, to be U.S. district judge for the District of New Mexico.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Friday, May 20, in order to receive testimony concerning organized crime.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CONSUMER AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Consumer Affairs of the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Wednesday, May 18, at 10 a.m., to hold a hearing on credit card fraud.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

CENTRAL AMERICA

● Mr. TOWER. Mr. President, on April 15, I had the pleasure of hearing Secretary of State George Shultz deliver an eloquent and thoughtful address to the Dallas World Affairs Council and Chamber of Commerce in my home State of Texas.

The Secretary's speech provides a valuable analysis of the situation in Central America as well as the administration's policy for that troubled region. In my opinion, Secretary Shultz convincingly argues that, as

Americans, we can no longer ignore or fail to counter the overt and covert Communist expansionism which the Soviet Union and its surrogates seek to impose on our Central American neighbors.

With congressional attention once again focused on Central America by President Reagan's splendid address to a joint session of Congress on April 27, I submit for the RECORD copies of Secretary Shultz' address in Dallas as well as an earlier speech by President Reagan to the National Association of Manufacturers. Both provide necessary insight into the nature of the threat the United States faces in Central America. I urge my colleagues to study these speeches as they consider the administration's aid proposals for Central America.

The material follows:

ADDRESS BY THE HONORABLE GEORGE P. SHULTZ, SECRETARY OF STATE, TO DALLAS WORLD AFFAIRS COUNCIL, AND CHAMBER OF COMMERCE, DALLAS, TEX., APRIL 15, 1983

You make me feel real welcome, and I appreciate it. Of course, it's a pleasure to speak here in an international capital with all of the members of the diplomatic corps here and to arrive and find my colleague, Secretary Heckler, on hand. It seems all roads lead to Dallas. I might say, leading from Dallas and Texas to Washington you have sent us the Chairman of the Armed Services Committee in the Senate, Senator John Tower, so I'm here to say thanks because John Tower we all look to. (Applause)

We all look to John for a unique combination that he has. He has wisdom, he has intelligence, he has experience, and he has guts. You put that together and you've really got something. John, I really do appreciate the sustained, high quality of your public service, and the President looks to him and we all look to him for help, and he gives it unstintingly.

I thought about what I might discuss here, and there's always a temptation for a Secretary of State to go around the world and make a few comments about this place and that place. But it seemed to me right now and right here that the subject to talk about should be Central America because it's very much on our minds in Washington, and I'm sure it's very much on your minds right here close as in the sense you are.

I think that any discussion of Central America must address three questions.

First of all, why should we care about Central America? Second, what's going on there now? And, third, what should we do about it?

The questions are important, and I'll try to answer them plainly and clearly. I think, first of all, that Central America's importance to the United States cannot be denied. Central America is so close that its troubles automatically spill over onto us, so close that the strategic posture of its countries affect ours, so close that its people's suffering brings pain to us as well.

I need not remind Texans that only the stability of our neighbors will prevent unprecedented flows of refugees northward to this country. Especially now, when a troubled world economy invites unrest, we must safeguard democracy and stability in our immediate neighborhood.

I did not use the word "strategic" lightly. Despite the 1962 Cuban missile crisis, and despite last year's war between Argentina and the United Kingdom, most Americans think of Latin America as not involved in the global strategic balance. People are aware, of course, that Cuba has intervened militarily in Africa, but they may not realize that Cuba's army is today three times larger than it was in 1962, or that 40,000 Cuban troops are now stationed in Africa, or that 2,000 Cuban military and security advisers are in Nicaragua.

Some of you may also not have noticed that Nicaragua's Minister of Defense said on April 9 that Nicaragua would consider accepting Soviet missiles if asked.

In the great debate about how best to protect our interests in the Panama Canal, the only thing all sides agreed on was that the Canal is critical, and must be kept open and defended. Yet the security of the Panama Canal is directly affected by the stability and security of Central America.

The Canal itself is but a 50-mile span in thousands of miles of sea lanes across the Caribbean. In peacetime, 44 percent of all foreign trade tonnage and 45 percent of the crude oil to the U.S. pass through the Caribbean. In a European war, 65 percent of our mobilization requirements would go by sea from Gulf ports through the Florida straits onward to Europe.

During World War II—just to remind you again—our defenses were so weak, our lifeline so exposed, that in the first months of 1942 a handful of enemy subs sank hundreds of ships in the Caribbean and the Gulf of Mexico, and did it more easily and faster than did Hitler's whole fleet in the North Atlantic. The Caribbean was a better target for them. Almost exactly 41 years ago a Mexican tanker—running with full lights, as was the custom for neutrals—was sunk off Miami. That June, a single submarine,U-159, sank eight American ships in four days, two of them just off the entrance to the Panama Canal.

Remember, Hitler's Germany had no bases in the Caribbean, not even access to ports for fuel and supplies.

Most Americans have assumed that, because the Soviet Union knows that we will not accept the emplacement of strategic weapons in Cuba, we had nothing more to fear. It's true that there are no nuclear weapons in Cuba, and it is true that Cuba's Communist utopia has proved such an economic disaster that it is entirely dependent on massive Soviet aid to the tune of some $4 billion annually. Yet this has not kept Cuba from portraying itself as the vanguard of a better future and mounting a campaign to establish new Communist dictatorships in Central America.

There are some people I know who think we in the Administration are exaggerating the danger. Let me, however, read you this quote:

"The revolutionary process of Central America is a single process. The triumphs of one are the triumphs of the other . . . Guatemala will have its hour. Honduras its. Costa Rica, too, will have its hour of glory. The first note was heard in Nicaragua."

In case you're wondering, the speaker was not an Administration spokesman. The confident prediction comes from Cayetano Carpio, principal leader of the Salvadoran guerrillas in the August 25, 1980, edition of the Mexican magazine Proceso. Look it up.

Our analysis, our strategy, our predictions for the future of Central America are rooted in two perceptions. One is that democracy cannot flourish in the presence of extreme inequalities in access to land, opportunity, or justice. The second perception is that Mr. Carpio and his allies are exploiting such inequities for anti-democratic ends.

I quoted a terrorist leader because it is beliefs like his, backed by armed violence, that so concern our friends in Central America. In Costa Rica, where democracy and respect for human rights is an ancient tradition; in Honduras, where democratic institutions are catching hold; in El Salvador, where democracy is beginning to work; even in Nicaragua, where disillusionment is the order of the day.

Ask the people who live there. They will tell you, as they have told us—through their governments, in their public opinion polls, and in their newspaper and radio editorials—that the revolution about which Carpio boasts is a frightening phenomenon: a direct threat to their democracy and well-being. They will tell you that we North Americans should also be concerned. Not because Mr. Carpio will tomorrow lead a battalion across the Rio Grande, but because the cause of democracy and human rights is our cause too.

Frankly, I agree. We cannot in good conscience look the other way when democracy and human rights are challenged in countries very near to us, countries that look to us for help. President Reagan put it well last month: "Human rights," he said, "means working at problems, not walking away from them."

So the key question is: What should we do?

A primary element of our strategy must be to support democracy, reform, and the protection of human rights. Democracies are far less likely to threaten their neighbors or abuse their citizens than dictatorships.

The forces of democracy are many and varied. Some are deeply rooted, as in Costa Rica, which has known nothing but democracy for 35 years. Others are more fragile, but have grown steadily as economic development has strengthened the middle class and as trade unions and peasant organizations are making pluralism a reality. The Catholic Church has also made important contributions to democracy and social progress. So also has the United States through culture, example, and more recently through diplomacy as well.

The forces of dictatorship are two kinds. One is old, the other new. The old variety is that of economic oligarchy, political despotism, and military repression. Except for Costa Rica, this has been the traditional method of social organization for most of Central America's history. The new form of dictatorship is that of a command economy, a self-appointed elitist vanguard, and guerrilla war. Nicaragua has become its base, all of Central America its target.

Before the Sandinistas came to power in Nicaragua in 1979, they promised free elections, political pluralism, and nonalignment. Today every one of these promises is being betrayed. First the Sandinistas moved to squeeze the democrats out of the governing junta, then to restrict all political opposition, all press freedom and the independence of the Church, then to build what is now the largest armed force in the history of Central America; then to align themselves with the Soviet Union and Cuba in subverting their neighbors.

El Salvador became the first target. In 1980, at Cuban direction, several Salvadoran extremist groups were unified in Managua, where their operational headquarters remains to this day. Cuba and its Soviet-bloc

allies then provided training and supplies which began to flow clandestinely through Nicaragua to El Salvador to fuel and armed assault. The Communist intervention has not brought guerrillas to power, but it has cost thousands of lives and widened an already bitter conflict. Today, El Salvador hangs in the balance, with reforming democrats pitted against the forces of old and new dictatorship alike.

The struggle for democracy is made ever more difficult by the heavy legacy of decades of social and economic inequities. And in El Salvador, as elsewhere, the world recession has hit with devastating effects.

We must also, therefore, support economic development. Underdevelopment, recession, and the guerrillas' prolonged war against El Salvador's economy cause human hardship and misery that are being cynically exploited by the enemies of democracy. Three-quarters of the funds that we are spending in support of our Central American policy go to economic assistance. And our economic program goes beyond traditional aid: The President's Caribbean Basin Initiative is meant to provide powerful trade and investment incentives to help these countries achieve self-sustaining economic growth.

But just as no amount of reform can bring peace so long as guerrillas believe they can win a military victory, no amount of economic help will suffice if guerrilla units can destroy roads, bridges, power stations, and crops again and again with impunity.

So we must also support the security of El Salvador and the other threatened nations of the region.

Finally, faced with a grave regional-wide crisis, we must seek regional, peaceful solutions. We are trying to persuade the Sandinistas that they should come to the bargaining table, ready to come to terms with their neighbors and with their own increasingly troubled society.

Let's now look at how this strategy works in practice, and let me turn first to El Salvador.

The basic fact about El Salvador today is that its people want peace. Because they do, they have laid the essential groundwork for national reconciliation and renewal.

Let me give you some details.

First, even in the midst of guerrilla war, respect for human rights has grown. Violence against non-combatants is still high, but it has diminished markedly since our assistance began three years ago. The criminal justice system does remain a major concern, and I'll come back to that in a moment.

Second, in three short years and despite determined guerrilla opposition, El Salvador's Government has redistributed more than 20 percent of all arable land. Some 450,000 people—about one Salvadoran in every ten—have benefited directly and have acquired a personal stake in a secure future.

Third, the general economic situation is poor. Just to stay even this year El Salvador will need substantial economic assistance to import seed, fertilizer and pesticides for its farms and raw materials for its factories.

The economic crisis stems in part from the international recession which has depressed prices of agricultural exports—coffee, cotton, sugar—on which El Salvador depends for foreign exchange. But the more serious problem is the guerrilla war against the economy. Some of the most fertile land cannot be cultivated because of guerrilla attacks. They have destroyed 55 of the country's 260 bridges and damaged many more.

The national water authority must rebuild 112 water facilities damaged by guerrilla action. 249 attacks on the telephone system have caused millions of dollars in damage. The guerrillas caused over 5,000 interruptions in electrical power in a 22-month period ending last November—an average of almost eight a day

The entire eastern region of the country was blacked out for over a third of the year in both 1981 and 1982. The guerrillas destroyed over 200 buses in 1982 alone. Less than half the rolling stock of the railways remains operational.

In short, unable to win the free loyalty of El Salvador's people, the guerrillas are deliberately and systematically depriving them of food, water, transportation, light, sanitation and work. These are the people who are claiming that their objective is to help the common people.

This brings me to a fourth point. The three government battalions we have trained conduct themselves professionally, both on the battlefield and in their relations with civilians. But only one Salvadoran soldier in ten has received our training—fewer than the many guerrillas trained by Nicaragua and Cuba.

And, finally, what is at issue in El Salvador is the cause of democracy. I cannot stress this point enough, and here the progress has been substantial. The Constituent Assembly, elected a year ago, has drafted a new constitution, sustained a moderate government of national unity, and extended land reform.

I remind you of that election just over a year ago, with over 80 percent of the people voting—not a bad percentage—in the face of armed, violent efforts to prevent people from coming to the polls.

Most important, perhaps, the politicians and parties who participated in the March 1982 elections are now represented in the Assembly and have begun to fix common goals in the pursuit of a political solution to their country's problems.

The most concrete indication of the self-confidence and growing strength of El Salvador's new democratic leaders took place last month in the presence of His Holiness, Pope John Paul II. On March 6, the President of El Salvador, Alvaro Magana, announced that national elections will be held in El Salvador this year, and that they will be open to all political parties and groups. You have to have some confidence in the democratic process to move up the election and say, "All right, let's decide by the electoral process who should be the President."

On March 17, El Salvador's Peace Commission, made up of a Catholic Bishop and two civilians, proposed legislation for a general amnesty that is now before the Constituent Assembly. And the President of the Constituent Assembly has explicitly called for the main political unit of the guerrillas, the FDR, to take part in the elections.

As President Reagan has made clear, we support negotiations aimed at "expanding participation in democratic institutions, at getting all parties to participate in free, non-violent elections." We will not support negotiations that short-circuit the very democratic process El Salvador is trying to establish. We will not carve up power behind people's backs as happened in Nicaragua. I'm shocked at the suggestions I sometimes hear when I'm testifying that what we ought to do, having observed these people try by violence to prevent an election from happening, should by violence and with our agreement shoot their way into the government. No dice. We will not support that kind of activity. (Applause)

We will help El Salvador to guarantee the personal security of candidates and their supporters, discourage coercion or intimidation, and help ensure access to media, an honest tally, and ultimately respect for the people's verdict.

Let me turn a moment to the deeply troubling problem of El Salvador's ineffective system of criminal justice. They must do much better. The courts must bring cases to a timely and impartial conclusion, and we have to make that point to them unequivocally and very clearly. I might say, Attorney General Bill Smith is in El Salvador today, and a legal team has been down there and we're doing our best to be helpful in that regard.

Let me turn now to Nicaragua. Nicaraguans in growing numbers have concluded that their struggle for democracy has been betrayed. The preeminent hero of the anti-Somoza revolution, Eden Pastora, who as Commander Zero led the takeover of the Somoza National Assembly in 1978, is now in exile. So is Alfonso Robelo, a key member of the governing junta that replaced. Somoza. So is Miskito Indian leader, Brooklyn Rivera. And so now is Adolfo Calero, the anti-Somoza businessman who for three years tried to play the role of "loyal opposition" inside Nicaragua. They and thousands of others in and out of Nicaragua bear witness that what began as an extraordinary national coalition against Somoza has cracked and shriveled under the manipulation of a handful of ideologues, fortified by their Cuban and Soviet-bloc military advisers.

But there is an answer to Nicaragua's problems. As in El Salvador, it is a political one. Last October, eight democratic countries of the region, meeting in San Jose, Costa Rica, called on Nicaragua to join them in allowing freedom of action for peaceful democratic groups, ending cross-border guerrilla violence and freezing the growth of military arsenals. We support such negotiations. President Reagan has said, "To strengthen democracy, to halt subversion, to stop the flow of arms, to respect borders, and to remove all the foreign military advisers—the Soviets, Cubans, East Germans, PLO, as well as our own—from the region."

If accepted, the San Jose proposals would reduce East-West tensions in Central America and lead to a regional, political solution. Yet Nicaragua has so far refused even to discuss these principles, just as it earlier spurned our own efforts to reach a bilateral understanding to deal with mutual concerns.

Our commitment to peace and democracy in Central America is not, of course, limited to El Salvador and Nicaragua. Like us, Costa Rica and Honduras have not given up hope that Nicaragua will return to the tenets of democracy and peace for which its people fought in 1979. But as Nicaragua's immediate neighbors, they feel directly the spillover of Nicaragua's militarization and growing internal troubles.

6,000 Nicaraguans are now living in exile in Costa Rica. In Honduras the flow of refugees from Nicaragua continues to rise. Last year alone, some 15,000 Miskito Indians fled to Honduras rather than accept forced relocation by the Nicaraguan Government.

Until a peaceful solution is found, we must continue to bolster Honduras and Costa Rica. Both are democratic. Both have been hit hard economically by the regional turmoil and the world recession. And both have been victimized by terrorism directed

from Nicaragua. We want to strengthen these democracies and help them provide their people stability and hope, even in the midst of regional crisis.

Democracy in Central America will not be achieved overnight, and it will not be achieved without sustained U.S. support.

To support our objectives in Central America—democracy, development, justice, and the security to make them possible—Congress has authorized substantial economic assistance. Controversy continues, however, over military aid to El Salvador—the country literally under the gun.

The security assistance we have asked for is to build disciplined, skilled armed forces to serve as a shield for democratization and development—a shield. We are not planning to Americanize the fighting or to send El Salvador advanced, heavy weapons, like Nicaragua's Soviet tanks. We will help El Salvador's armed forces to increase their mobility, and to acquire necessary munitions, spare parts, engineering equipment and medical supplies. But our primary emphasis is on greatly expanded training for Salvadoran soldiers.

As I mentioned earlier, only a tenth of the soldiers have received our training, and those who have, have a superior performance, so if we can increase that level of training, we can expect performance to improve.

Time is important. To quote Senator Henry Jackson, "If you're going to have the ballot box free and open, there must be a shield behind which the people can participate."

Whether we will be able to help provide this shield in time depends on the Congress. In the middle of a war, the Congress has cut security assistance to a level two-thirds below the previous fiscal year. So here you are—you're an army, you're fighting—and all of a sudden the flow of what you need to fight with is cut by two-thirds. Then people ask, "How come that army isn't doing better?" It's a terrific blow.

The Administration is seeking to restore these funds. The people of El Salvador must have confidence that we will see their struggle through, or else hope for democracy may not survive.

In summation, let me say again that there are many reasons for us to care about what happens in Central America.

One is strategic, and we better remember it. What is happening in Central America could endanger our own security and that of our friends throughout the Caribbean Basin, from Mexico to the Panama Canal.

But an equal reason is moral. How can we, in the name of human rights, abandon our neighbors to a brutal, military takeover by a totalitarian minority? If our concern is freedom, will a Communist victory provide it? If our concern is judicial fairness, will a Communist regime provide it? If our concern is poverty, will a Communist economic system provide prosperity?

The American people and their elected representatives have difficult choices to make. It is easy to play the demagogue, and it is tempting to avoid hard decisions. But if we walk away from this challenge, we will have let down not only all those in Central America who yearn for democracy, but we will have let ourselves down. We cannot be for freedom and human rights only in the abstract. If our ideals are to have meaning, we must defend them when they are threatened.

Let us meet our responsibility. (Standing applause)

REMARKS OF THE PRESIDENT TO THE NATIONAL ASSOCIATION OF MANUFACTURERS, MARCH 10, 1983

Thank you. (Applause.) Thank you, Bernie, for your kind introduction and all of you for your warm welcome. And Madam Secretary and distinguished guests here at the head table and you ladies and gentlemen, I'm delighted to be here. I know that you and your President, Sandy Trowbridge, and the entire NAM organization have been an enormous help during the last two years, not only with advice and counsel but with a roll-up-your-sleeves effort to help pass the economic recovery programs that are ending this recession. And with your assistance we also were able to negotiate a bipartisan compromise solution to save our Social Security System. (Applause.)

You know, we didn't come to Washington at an ideal time, and we've—(laughter)—certainly had our share of problems. But the signs of recovery are springing up all around us. And there's no mistaking the fact that, at long last, America is on the mend—and the courage and the vision of the people and institutions that are represented here today deserve a big share of the credit for this hard-earned but inflation-free recovery. So, on behalf of all your fellow citizens who have been freed from the ravages of runaway inflation and can look again to a future of better times and then new opportunity, I thank you. (Applause.)

America is meeting her challenge here at home. But there are other challenges, equally important, that we must face. And today I'd like to talk to you about one of them.

Late last year I visited Central America. Just a few weeks ago, our Ambassador, Jeane Kirkpatrick, also toured the area. And in the last few days, I have met with leaders of the Congress to discuss recent events in Central America and our policies in that troubled part of the world. So, today I'd like to report to you on these consultations, and why they're important to all of us.

The nations of Central America are among our nearest neighbors. El Salvador, for example, is nearer to Texas than Texas is to Massachusetts. Central America is simply too close, and the strategic stakes are too high, for us to ignore the danger of governments seizing power there with ideological and military ties to the Soviet Union.

Now, let me just show you how important Central America is. Here—and you can't see it from over there because I'm in the way—but here at the base of Central America is the Panama Canal. Half of all the foreign trade of the United States passes through either the Canal—(laughter)—I've been dying to give you all an economic lesson, and you show up for geography. (Laughter and applause.) But as I say, half of that trade passes either through the Canal or the other Caribbean sea lanes on its way to or from our ports.

And, of course, to the north, as you can see, is Mexico, a country of enormous human and material importance, with which we share 1,800 miles of peaceful frontier.

And between Mexico and the Canal lies Central America. As I speak to you today, its countries are in the midst of the gravest crisis in their history. Accumulated grievances, social and economic change are challenging traditional ways. New leaders with new aspirations have emerged who want a new and better deal for their peoples. And that is good.

The problem is that an aggressive minority has thrown in its lot with the Communists, looking to the Soviets and their own Cuban henchmen to help them pursue political change through violence. Nicaragua, right here, has become their base. And these extremists make no secret of their goal. They preach the doctrine of a quote "revolution without frontiers" unquote. Their first target is El Salvador.

Important? Well, to begin with, there's the sheer human tragedy. Thousands of people thave already died, and unless the conflict is ended democratically, millions more could be affected throughout the hemisphere. The people of El Salvador have proved they want democracy. But if guerrilla violence succeeds, they won't get it. El Salvador will join Cuba and Nicaragua as a base for spreading violence to Guatemala, Honduras, Costa Rica—probably the most democratic country in the world today. The killing will increase and so will the threat to Panama, the Canal, and ultimately Mexico. In the process, vast numbers of men, women and children will lose their homes, their countries and their lives.

Make no mistake. We want the same thing the people of Central America want—an end to the killing. We want to see freedom preserved where it now exists and its rebirth where it does not. The Communist agenda, on the other hand, is to exploit human suffering in Central America to strike at the heart of the Western Hemisphere. By preventing reform and instilling their own brand of totalitarianism, they can threaten freedom and peace and weaken our national security.

I know a good many people wonder why we should care about whether Communist governments come into power in Nicaragua, El Salvador, or other such countries as Costa Rica and Honduras, Guatemala, and the islands of the Caribbean. One columnist argued last week that we shouldn't care because their products are not that vital to our economy.

That's like the argument of another so-called expert that we shouldn't worry about Castro's control over the island of Grenada—their only important product is nutmeg.

Well, let me just interject right here. Grenada, that tiny little island with Cuba at the west end of the Caribbean, Grenada at the east end, that tiny little island is building now, or having built for it, on its soil and shores, a naval base, a superior air base, storage bases and facilities for the storage of munitions, barracks and training grounds for the military. I'm sure all of that is simply to encourage the export of nutmeg.

People who make these arguments haven't taken a good look at a map lately or followed the extraordinary buildup of Soviet and Cuban military power in the region or read the Soviets discussions about why the region is important to them and how they intend to use it.

It isn't nutmeg that's at stake in the Caribbean and Central America. It is the United States' national security.

Soviet military theorists want to destroy our capacity to resupply Western Europe in case of an emergency. They want to tie down our attention and forces on our own southern border and so limit our capacity to act in more distant places, such as Europe, the Persian Gulf, the Indian Ocean, the Sea of Japan.

Those Soviet theorists noticed what we failed to notice, that the Caribbean Sea and Central America constitute this nation's fourth border. If we must defend ourselves

against large, hostile military presence on our border, our freedom to act elsewhere to help others and to protect strategically vital sea lanes and resources has been drastically diminished.

They know this. They've written about this.

We've been slow to understand that the defense of the Caribbean and Central America against Marxist-Leninist takeover is vital to out national security in ways we're not accustomed to thinking about.

For the past three years, under two Presidents, the United States has been engaged in an effort to stop the advance of communism in Central America by doing what we do best, by supporting democracy. For three years, our goal has been to support fundamental change in this region, to replace poverty with development and dictatorship with democracy.

These objectives are not easy to obtain. We're on the right track. Costa Rica continues to set a democratic example, even in the midst of economic crises and Nicaraguan intimidation. Honduras has gone from military rule to a freely-elected civilian government. Despite incredible obstacles, the democratic center is holding in El Salvador, implementing land reform and working to replace the politics of death with a life of democracy.

So the good news is that our new policies have begun to work. Democracy, with free elections, free labor unions, freedom of religion and respect for the integrity of the individual, is the clear choice of the overwhelming majority of Central Americans.

In fact, except for Cuba and its followers, no government and no significant sector of the public anywhere in this hemisphere wants to see the guerrillas seize power in El Salvador.

The bad news is that the struggle for democracy is still far from over. Despite their success in largely eliminating guerrilla political influence in populated areas and despite some improvements in military armaments and mobility, El Salvador's people remain under strong pressure from armed guerrillas controlled by extremists with Cuban-Soviet support.

The military capability of these guerrillas—and I would like to stress "military" capability—for these are not peasant irregulars. They are trained, military forces. This has kept political and economic progress from being turned into the peace the Salvadoran people so obviously want.

Part of the trouble is internal to El Salvador. But an important part is external: the availability of training, tactical guidance, and military supplies coming into El Salvador from Marxist Nicaragua. I am sure you have read about the guerrillas capturing rifles from government, national guard units. And recently, this has happened. But much more critical to guerrilla operations are the supplies and munitions that are infiltrated into El Salvador by land, sea, and air—by pack mules, by small boats, and by small aircraft.

These pipelines fuel the guerrilla offensives and keep alive the conviction of their extremist leaders that power will ultimately come from the barrels of their guns. Now, all this is happening in El Salvador just as a constitution is being written, as open presidential elections are being prepared, and as a peace commission—named last week—has begun to work on amnesty and national reconciliation to bring all social and political groups into the democratic process.

It is the guerrilla militants who have, so far, refused to use democratic means, have ignored the voice of the people of El Salvador, and have resorted to terror, sabotage, and bullets instead of the ballot box. During the past week, we have discussed all of these issues and more with leaders and Members of the Congress. Their views have helped shape our own thinking. And I believe that we have developed a common course to follow:

Here are some of the questions that are raised most often. First, how bad is the military situation? It is not good. Salvadoran soldiers have proved that, when they are well trained, led, and supplied, they can protect the people from guerrilla attacks. But so far, U.S. trainers have been able to train only one soldier in ten. There is a shortage of experienced officers. Supplies are unsure. The guerrillas have taken advantage of these shortcomings. For the moment at least, they have taken the tactical initiative just when the sharply limited funding Congress has so far approved is running out.

A second vital question is: Are we going to send American soldiers into combat? And the answer to that is a flat no.

A third question: are we going to Americanize the war with a lot of U.S. combat advisors? And again, the answer is, no.

Only Salvadorans can fight this war, just as only Salvadorans can decide El Salvador's future. What we can do is help to give them the skills and supplies they need to do the job for themselves.

That mostly means training. Without playing a combat role themselves and without accompanying Salvadoran units into combat, American specialists can help the Salvadoran army improve its operations.

Over the last year, despite manifest needs for more training, we have scrupulously kept our training activities well below our self-imposed numerical limit on numbers of trainers. We are currently reviewing what we can do to provide the most effective training possible to determine the minimum level of trainers needed, and where the training should best take place. We think the best way is to provide training outside of El Salvador, in the United States or elsewhere, but that costs a lot more. So the number of U.S. trainers in El Salvador will depend upon the resources available.

Question four: are we seeking a political or a military solution? Despite all I and others have said, some people still seem to think that our concern for security assistance means that all we care about is a military solution. That's nonsense. Bullets are no answer to economic inequities, social tensions, or political disagreements. Democracy is what we want, and what we want is to enable Salvadorans to stop the killing and sabotage so that economic and political reforms can take root. The real solution can only be a political one. This reality leads directly to a fifth question.

Why not stop the killings and start talking? Why not negotiate? Well, negotiations are already a key part of our policy. We support negotiations among all the nations of the region to strengthen democracy, to halt subversion, to stop the flow of arms, to respect borders, and to remove all the foreign military advisors, the Soviets, the Cubans, the East Germans, the PLO, as well as our own from the region.

A regional peace initiative is now emerging. We have been in close touch with its sponsors and wish it well, and we support negotiations within nations aimed at expanding participation in democratic insititutions, at getting all parties to participate in free, non-violent elections.

What we oppose are negotiations that would be used as a cynical device for dividing up power behind the people's back. We cannot support negotiations which instead of expanding democracy try to destroy it, negotiations which would simply distribute power among armed groups without the consent of the people of El Salvador.

We made that mistake some years ago in Laos when we pressed and pressured the Laotian government to form a government, a co-op with the Pathet Lao, the armed guerrillas who had been doing what the guerrillas are doing in El Salvador. And once they had that tripartite government they didn't rest until those guerrillas, the Pathet Lao had seized total control of the government of Laos. The thousands of Salvadorans who risked their lives to vote last year should not have their ballots thrown into the trash heap this year by letting a tiny minority on the fringe of a wide and diverse politicial spectrum shoot its way into power.

No, the only legitimate road to power, the only road we can support, is through the voting booth so that the people can choose for themselves; choose, as His Holiness the Pope said Sunday, "far from terror and in climate of democratic conviviality." This is fundamental, and it is a moral as well as a practical belief that all free people of the Americas share.

Having consulted with the Congress, let me tell you where we are now and what we'll be doing in the days ahead. We welcome all the help we can get. We will be submitting a comprehensive, integrated economic and military assistance plan for Central America.

First, we will bridge the existing gap in military assistance. Our projections of the amount of military assistance needed for El Salvador have remained relatively stable over the past two years. However, the Continuing Resolution budget procedure in the Congress last December led to a level of U.S. security assistance for El Salvador in 1983 below what we'd requested, below that provided in 1982, and below that requested for 1984. I'm proposing that $60 million of the monies already appropriated for our worldwide military assistance programs be immediately reallocated to El Salvador. Further, to build the kind of disciplined, skilled army that can take and hold the initiative while respecting the rights of its people, I will be amending my supplemental that is currently before the Congress to reallocate $50 million to El Salvador. And these funds will be sought without increasing the overall amount of the supplemental that we have already presented to the Congress. And, as I've said, the focus of this assistance will remain the same: to train Salvadorans so that they can defend themselves. Because El Salvador's problems are not unique in this region, I will also be asking for an additional $20 million for regional security assistance. These funds will be used to help neighboring states to maintain their national security, and will, of course, be subject to full Congressional review.

Secondly, we will work hard to support reform, human rights, and democracy in El Salvador. Last Thursday, the Salvadoran government extended the land reform program which has already distributed 20 percent of all the arable land in the country and transformed more than 65,000 farm workers into farm owners. What they ask is our continued economic support while the reform is completed. And we will provide it. With our support, we expect that the steady progress toward more equitable distribution

of wealth and power in El Salvador will continue.

And, third, we will, I repeat, continue to work for human rights. Progress in this area has been slow, but sometimes—sometimes disappointing. But human rights means working at probems, not walking away from them. To make more progress, we must continue our support, advice, and help to El Salvador's people and democratic leaders.

Lawbreakers must be brought to justice, and the rule of law must supplant violence in settling disputes. The key to ending violations to human rights is to build a stable, working democracy. Democracies are accountable to their citizens. And when abuses occur in a democracy, they cannot be covered up. With our support, we expect the government of El Salvador to be able to move ahead in prosecuting the accused and in building a criminal justice system applicable to all and ultimately accountable to the elected representatives of the people.

And I hope you've noticed that I was speaking in millions, not billions. And that after two years in federal office is hard to do. (Laughter.) In fact, there are some areas of government where I think they spill as much as I've talking about here over a weekend.

But, fourth, the El Salvador government proposes to solve its problems the only way they can be solved fairly—by having the people decide. President Magana has just announced nationwide elections moved up to this year, calling on all to participate, adversaries as well as friends. To help political adversaries participate in the elections, he has appointed a Peace Commission, including a Roman Catholic bishop and two independents. And he has called on the Organization of American States and the international community to help. We were proud to participate, along with representatives of other democratic nations, as observers in last March's Constituent Assembly elections. We would be equally pleased to contribute again to an international effort, perhaps in conjunction with the Organization of American States, to help the government ensure the broadest possible participation in the upcoming elections, with guarantees that all, including critics and adversaries, can be protected as they participate.

Let me just say a word about those elections last March. A great worldwide propaganda campaign had, for more than a year, portrayed the guerrillas as somehow representative of the people of El Salvador. We were told over and over again that the government was the oppressor of the people.

Came the elections, and suddenly it was the guerrilla force threatening death to any who would attempt to vote. More than 200 buses and trucks were attacked and burned and bombed in an effort to keep the people from going to the polls. But they went to the polls; they walked miles to do so. They stood in long lines for hours and hours. Our own Congressional observers came back and reported in one instance that they saw themselves—of a woman who had been shot by the guerrillas for trying to get to the polls, standing in the line, refusing medical attention until she had had her opportunity to go in and vote.

More than 80 percent of the electorate voted. I don't believe here in our land, where voting is so easy, that we've had a turnout that great in the last half century. They elected the present government and they voted for order, peace and democratic rule.

Finally, we must continue to help the people of El Salvador and the rest of Central America and the Caribbean to make economic progress. More than three-quarters of our assistance to this region has been economic.

Because of the importance of economic development to that region, I will ask the Congress for $65 million in new moneys and the reprograming of $103 million from already appropriated worldwide funds for a total of $168 million in increased economic assistance for Central America. And to make sure that this assistance is as productive as possible, I'll continue to work with the Congress for the urgent enactment of the long-term opportunities for trade and free initiative that are contained in the Caribbean Basin Initiative.

In El Salvador and in the rest of Central America, there are today thousands of small businessmen, farmers and workers who have kept up their productivity as well as their spirits in the face of personal danger, guerrilla sabotage and adverse economic conditions. With them stand countless national and local officials, military and civic leaders and priests who have refused to give up on democracy. Their struggle for a better future deserves our help. We should be proud to offer it. For in the last analysis, they're fighting for us, too.

By acting responsibly and avoiding illusory shortcuts, we can be both loyal to our friends and true to our peaceful democratic principles. A nation's character is measured by the relations it has with its neighbors. We need strong, stable neighbors with whom we can cooperate. And we will not let them down.

Our neighbors are risking life and limb to better their lives, to improve their lands and to build democracy. All they ask is our help and understanding as they face dangerous armed enemies of liberty and that our help be as sustained as their own commitment.

Now, none of this will work if we tire or falter in our support. I don't think that's what the American people want or what our traditions and faith require. Our neighbors' struggle for a better future and that struggle deserves our help and we should be proud to offer it.

We would in truth be opening a two-way street. We have never, I believe, fully realized the great potential of this Western Hemisphere. Oh, yes, I know in the past we've talked of plans. We've gone down there every once in a while with a great plan somehow for our neighbors to the South. But it was always a plan in which we, the big colossus of the North would impose on them. It was our idea.

Well, on my trip to Central and South America, I asked for their ideas. I pointed out that we had a common heritage. We'd all come as pioneers to these two great continents. We worship the same God. And we'd lived at peace with each other longer than most people in other parts of the world.

There are more than 600 million of us calling ourselves Americans, North, Central and South. We haven't really begun to tap the vast resources of these two great continents.

Without sacrificing our national sovereignties, our own indivdual cultures or national pride, we could as neighbors make this Western Hemisphere, our hemisphere, a force for good such as the old world has never seen. But it starts with the word neighbor. And that is what I talked about down there and sought their partnership, their equal partnership in we, of the Western Hemisphere, coming together to truly develop fully the potential this hemisphere has.

Last Sunday, His Holiness Pope John Paul II prayed that the measures announced by President Magana would "contribute to orderly and peaceful progress" in El Salvador, progress "founded on the respect," he said, "for the rights of all, and that all have the possibility to cooperate in a climate of true democracy for the promotion of the common good."

My fellow Americans, we in the United States join in that prayer for democracy and peace in El Salvador, and we pledge our moral and material support to help the Salvadoran people achieve a more just and peaceful future. And in doing so, we stand true to both the highest values of our free society and our own vital interests.

Thank you and God bless you. (Applause.)●

THE ISLAND OF ATTU

● Mr. MURKOWSKI. Mr. President, Wednesday, May 11, was the anniversary of an important event in this Nation's history; 40 years ago American forces regained the only U.S. territory lost to the Japanese in World War II. The small—but strategic—island of Attu is located at the tip of the Aleutian chain, 1,500 miles from Anchorage and 2,000 miles from Tokyo. The Japanese took Attu on June 7, 1942, 7 months after Pearl Harbor. They took the neighboring island of Kiska the same day.

Their control of American territory lasted nearly a year. On May 11, 1943, the U.S. Army's 7th Division attacked Attu, where 2,400 Japanese soldiers had established themselves on excellent defensive terrain. By May 31, our forces had complete control of Attu. Kiska was evacuated in early August.

The battle was vicious. Both sides suffered heavy casualties. Most of the 2,400 Japanese on Attu were killed. More than 600 Americans gave their lives and over 1,100 were wounded. To make matters worse, the American forces encountered extremely harsh weather and suffered from severe exposure and logistical problems. These soldiers were forced to fight in an Arctic environment unlike any previously encountered in combat.

It is unclear what plans, if any, the Japanese had for the captured Aleutian Islands. At any rate, it is certain that the valiant efforts of our soldiers prevented what could have become a serious threat to the security of both U.S. citizens and to our strategic interests in Alaska. By this time the Japanese had clearly overreached themselves, and the recapture of Attu and Kiska contributed to the defeat of the Japanese Navy in the Pacific. Every Alaskan and, indeed, every American is indebted to the 7th Division for their successful campaign to regain this northern outpost in the far Pacific.

Today, Attu has recaptured its solitary Arctic existence. It is inhabited by

25 Coast Guard personnel who operate a loran transmitting station. The loran station provides information to crab fishermen who would otherwise become lost in this merciless environment. The transmitter enables civilian and military aircraft and vessels to determine their position in the Bering Sea. It is important to remember that without the sacrifice of the 7th Division, this station could not have been built, and the security of all who cross the Bering Sea might have been jeopardized.

Mr. President, I am pleased to have this opportunity to honor the men who died in the battle for Attu and saved the only piece of American territory to be captured in World War II.●

SOLIDARITY SUNDAY

● Mr. MOYNIHAN. Mr. President, I rise today with a dual purpose. In the first instance, I speak as a participant in the "1983 Congressional Call to Conscience Vigil for Soviet Jews" which has been organized by my very able colleague and friend, the distinguished senior Senator from Oklahoma (Mr. BOREN). Each week during the course of this spring, a different Senator will speak in this Chamber about the current plight of Jewry in the Soviet Union. I am proud to join in this vigil.

Lest it be thought that American concern for Soviet Jews does not extend beyond the walls of the Capitol, I would also like to announce that later this month there will take place in New York City "Solidarity Sunday," an annual event in which tens of thousands of Americans of all faiths march in demonstration of their solidarity with the Soviet Union's 3 million oppressed Jews.

In this spirit, I am today calling upon my colleagues in the Senate to lend their support to Senate Resolution 133, expressing this body's support for "Solidarity Sunday."

May 22, is sadly more imperative than ever. I need not remind my colleagues of the Soviet Union's record of regular and gross violations of commitments undertaken, in the Helsinki Final Act and the Universal Declaration of Human Rights, to treat its own citizens decently. In furtherance of a tradition begun long before Yuri Andropov arrived at the helm of the U.S.S.R. the Soviet state continues to persecute Jews for being Jews.

Today, Jews in the Soviet Union face the threat of arrest and imprisonment simply for gathering informally to study their own culture, history, and language—or to celebrate religious holidays. Community leaders, persons distinguished for their cultural or religious accomplishments, are regularly imprisoned, as in the recent cases of Iosif Begun, Feliks Kochubievsky, and Yuri Tarnopolsky.

Recently, a new dimension has been added to the officially sanctioned campaign of harassment of Jews in the Soviet Union. As the New York Times reported the following day, on April 1, 1983—

> Eight Soviet Jews—writers, scholars, a military man and a cinematographer—published a statement in Pravda * * * that criticized "international Zionism" for purporting to speak on behalf of Soviet Jews.

This represented a revival of the formal Soviet effort to discredit those persons around the world who have sought to draw attention to Soviet repression of minorities and in particular of Jews.

More, the Soviets have sought to identify Zionism with repression and reaction of the sort such as they themselves are most clearly guilty. Accordingly the Soviet characterization of Zionism on April 1—shortly after the conclusion of a World Conference on Soviet Jewry in Jerusalem—was unusually harsh. The statement issued by this most recent of state-sponsored anti-Semitic groups, read:

> In its essence Zionism concentrates in itself extreme nationalism, chauvinism and racial intolerance, justification for territorial seizures and annexations, armed adventurism, the cult of political permissiveness and impunity, demagoguery and ideological diversions, filthy maneuvers and perfidy.

This sort of lie is what provides the Soviet authorities with a rationale for persecution of their Jewish citizens. Among the freedoms denied to this community in the U.S.S.R., the most easily measured from our perspective abroad is the denial of the right to emigrate. From an already low 9,447 Soviet Jews who were permitted to emigrate to the free world in 1981, the number declined in 1982 to 2,688. With only about 100 Soviet Jews receiving permission to leave each month in 1983, we are witnessing a virtual halt in emigration.

The denial of emigration, alas, is not the whole of the problem. Within the Soviet Union itself, the officially sanctioned campaign of anti-Semitism continues unabated. Publications of all kinds, including children's magazines, attribute the failings of the Soviet System to imagined Jewish, Zionist machinations that have not been fabricated in such elaborate and repugnant detail since the fall of the Third Reich. Hebrew and Jewish culture classes have been disrupted and suspended, Jewish students find it increasingly difficult to gain admission to universities. Jews expressing any interest in moving to Israel are automatically fired from any position of responsibility and encounter almost insuperable obstacles in securing any employment at all.

The Soviets have also inspired Eastern European countries to do so as well. In an ugly search for the excuses for the failure of Communist rule in Poland in 1981, Soviet and Polish authorities tried to portray Solidarity as a nest of Zionists hoping to provoke anti-Semitic feelings. I could go on.

Events such as these, and the worsening trend that is now clearer than ever, are ominous. We dare not allow them to go unnoticed, lest they become routine. We care, and we must demonstrate to the Soviets that we do. We must continue to press for the release of the thousands of Jewish prisoners of conscience in the Soviet bloc, and to offer a haven for those who would preserve the traditions of the Jewish faith that has contributed immeasurably to the Western world, and especially the United States.

Members of the Senate can demonstrate their concern and commitment by supporting this resolution in support of Solidarity Sunday. I ask that the full text of the resolution be printed at this point in the RECORD, along with a list of cosponsors, and also a table showing Jewish emigration from the U.S.S.R.

The material follows:

S. RES. 133

Whereas on May 22, 1983, the eighty-five constituent agencies of the Greater New York Conference on Soviet Jewry will sponsor the twelfth annual "Solidarity Sunday for Soviet Jewry" to reaffirm their resolve to secure freedom for Soviet Jews and beleagured people everywhere; and

Whereas Americans of all faiths will join with the Conference in myriad activities on that day in expression of their solidarity with the almost three million Jews in the Soviet Union; and

Whereas the right to emigrate freely and to be reunited with their families abroad is being denied Jews and others in the Soviet Union; and

Whereas the Universal Declaration of Human Rights adopted by the General Assembly of the United Nations and the Helsinki Final Act clearly recognize those rights; and

Whereas the Government of the Soviet Union has implemented restrictive measures sharply reducing the number of people permitted to emigrate, bringing Jewish emigration from the Soviet Union to a virtual halt; and

Whereas the Government of the Soviet Union is persecuting its Jewish citizens and denying them even those rights and privileges accorded other recognized religions in the Soviet Union; and

Whereas the Government of the Soviet Union discriminates against Jewish cultural activities by banning and suspending Hebrew and Jewish cultural classes, by threatening Hebrew teachers, and by intimidating all Soviet Jews who seek only to practice their religion; and

Whereas leading Soviet Jewish activist and cultural figure, Mr. Anatoly Shcharansky, who was arrested in March of 1977 and falsely charged with espionage and "anti-Soviet agitation", continues to suffer exceptionally harsh tratement in Chistopol Prison; and

Whereas a virulent anti-Semitic campaign continues unabated in the Soviet press and Soviet Jews are increasingly deprived of occupational and educational opportunities; and

Whereas thousands of innocent Jews and other persons, after applying to leave the Soviet Union, have been subjected to illegal induction into the armed forces, incarceration in mental institutions, expulsion from school and constant surveillance and harassment; and

Whereas the Government of the Soviet Union will not succeed in isolating Soviet Jews from their friends in the free world so long as those who cherish liberty continue to speak on behalf of beleaguered people everywhere; and

Whereas "Solidarity Sunday for Soviet Jewry" will serve as a vigorous expression of American determination to secure freedom for Soviet Jewish Prisoners of Conscience incarcerated solely because of their desire to emigrate, and veteran refuseniks who have awaited exit visas for as many as fourteen years; and

Whereas the Government of the Soviet Union refuses to permit the free exercise of religious beliefs and cultural expression and also refuses to remove all obstacles to the free emigration of its Jewish citizens and others who wish to leave and live in other countries: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Congress supports "Solidarity Sunday for Soviet Jewry" in an effort to achieve these goals and encourages Americans to participate.

[1] Figures represent the percentage of those who proceeded to Israel.

Note.—From October 1968 to October 1982, 261,994 persons left the Soviet Union with Israeli visas. Approximately 162,000 of them went to Israel. Since January, 1983, Jewish emigration from the Soviet Union has been approximately 100 persons a month. (figures compiled by the Greater New York Conference on Soviet Jewry.)●

THE 75TH ANNIVERSARY OF MIRIAM OSBORN MEMORIAL HOME

● Mr. D'AMATO. Mr. President, the Miriam Osborn Memorial Home in Rye, N.Y., is celebrating the 75th anniversary of its opening. This outstanding institution for the elderly was created by the bequest of Mrs. Miriam A. Osborn. The home was incorporated by special act of the New York State Legislature in 1892 "to provide a home and support for aged women in needy circumstances." The first residents were admitted in 1980.

Through 75 years of successful operation, care has been provided for approximately 1,100 women. These ladies have included physicians, nurses, authors, musicians, teachers, and actresses. There are now over 140 residents, most of whom came from the New York metropolitan area. The original bequest of Miriam A. Osborn was activated by her attorney, John W. Sterling, who stated:

Every effort has been made to make this institution the finest of its kind in the world—not only a fine institution, but a real home.

The ladies who reside at Osborn have a median age of over 86 years, with one who is over 100 years old. These residents actively participate in a variety of activities: crafts, painting, ceramics, Bible study, French and Spanish conversation, Audubon programs, and even swimming at Rye Beach. They regularly contribute their services to the community through the retired seniors volunteer program, the Needlework Guild, and make bandages for a leper colony in Africa.

Medical research studies on geriatric nutrition, sponsored by the home, have received national and international attention in medical circles.

Licensed by the State of New York as a skilled nursing and health related facility, the Osborn Home contains modern, well-equipped facilities and provides a dynamic geriatric program. Over the decades of service, many changes have taken place in both structure and program. Some 75 years after its beginning, all who are associated with the home are proud of its tradition and service.

This landmark structure, located in a park-like setting, does indeed provide not only a fine institution but a real home.●

SENATOR HELMS' WARNING ON THE SPREAD OF COMMUNISM

● Mr. EAST. Mr. President, my friend and senior colleague, Senator HELMS, is chairman of the Subcommittee on Western Hemisphere Affairs of the Committee on Foreign Relations. For years he has studied events in Latin America and the Caribbean.

If this Nation allows communism to spread from nation to nation throughout Central America we will pay a heavy price. Not only will hundreds of thousands, perhaps millions, of people die at the hands of brutal and fanatic Marxists, but our own Nation will directly suffer as millions of refugees flee northward. Senator HELMS is warning the American people of this danger to our neighbors and to our own Nation.

TV8-WGHP, which serves the High Point, Greensboro, and Winston-Salem areas of my State, has taken heed of the warning of Senator HELMS. In two incisive editorials, Mr. Eugene H. Bohi, president and general manager of TV8-WGHP, has commented on the cautionary statements of Senator HELMS. I ask that these challenging comments be printed in the RECORD.

The material follows:

Editorial No. 224.
Title: El Salvador.
Air Date: April 12, 1983.

Let's face it—we're concerned that El Salvador could become another Vietnam. However, when the President calls for more military and economic aid for El Salvador and other Central American countries because our "National Security" is imperiled, we can't ignore his comments.

We have a major security stake in Central America. We would have huge defense problems if our border countries were Communistic. If there is a reasonable chance of stopping that from happening, the effort must be made. The big problem we face is that it may be too late. We can't escape the fact that we've had misguided policies in the past. We've supported oppressive rulers and regimes that have contributed to today's revolutions. The question we need answered is—"Is it too late?"

We have learned that we can't buy peace. We believe that Pope John Paul II, has the answer. He urged for peace negotiations during his recent visit. Money should be tied to a congressional insistence on peace talks. Our national security is at stake in this hemisphere. As Senator Helms stated recently in a speech in High Point, we have potential "Boat people" in Central America that can walk to our borders. More about that next time.

Editorial No. 225.
Title: Walk People.
Air Date: April 24, 1983.

We mentioned in our last editorial that Senator Helms warned of potential immigration problems should Central America fall to communism. Instead of boat people, those seeking escape could walk to our borders.

What would happen if the stream of illegal aliens now crossing our borders become a flood? We couldn't stop them. Our Mexican border is 1,954 miles long. There are only about 350 U.S. border patrolmen on the job at any one time to defend this border. That's less people than we have assigned to guard our Government buildings each day in Washington. Today, only about one of every three crossing are stopped by the thin line of border patrol officers. Immigration Commissioner Leonard Chapman es-

timates there are now about 12 million illegals in the U.S. At the same time there are approximately 12 million American workers who can't find jobs.

The big question is—do we have the will to stop all those who want to gain access? Our military budget is $245 billion to defend our country's borders, but we spend only $77 million for our border patrol. That's not even 1 percent of what we spend on defense.

A country will double its population every 20 years if its annual rate of increase is 2.5 percent. Mexico's is and so is most of Central America and the Caribbean. Even if we stop communism in this hemisphere we can expect these countries to empty out much of their population on our shores. Now is the time to prepare for it—not wait until it happens.●

SYNTHETIC FUELS INDUSTRY IN THE SOVIET UNION

● Mr. WARNER. Mr. President, I wish to share with my colleagues an article in the March 1983 American Bar Association's Law and National Security Intelligence Report focusing on the synthetic fuels industry in the Soviet Union.

I know a number of colleagues will join me this year in a close scrutiny of the American synthetic fuels industry, and it is helpful to be aware of the Soviet perspective.

I ask that the article be printed in the RECORD.

The article follows:

SYNTHETIC FUELS: VITAL DESPITE CURRENT GLUT

(EDITOR'S NOTE.—This article is particularly appropriate for this Report because it combines intelligence from various sources, including that of Soviet defectors with special scientific knowledge and it also concerns national security. Synthetic fuels will never be produced in any country until such production is regarded as a national security necessity. Nazi Germany so recognized it, followed by South Africa and now the Soviet Union. When will the United States so look upon production of synthetic fuels from our over 90 percent in the ground fuel reserves of coal, oil shale and peat? Before the next oil crisis is upon us, it is to be hoped!)

Words of praise for Brezhnev come hard to a former chairman of the American Bar Association's Committee on Education About Communism, and even harder to the present editor of its Intelligence Report. I can't recall when we've said anything nice about him or the CPSU Central Committee, which set the Five-Year Plan tasks for General Secretary Brezhnev and now carried over to his successor, Yuri Andropov. I'm about to do so, nevertheless.

I have nothing but admiration for the Soviet Union's farsightedness in the development of synthetic fuel and, I regret to say, shock at our own wavering approach and shortsightedness.

A few facts first. The U.S.S.R. is the largest producer of petroleum in the world and is likely to remain so through the 1980s. Ditto for natural gas; if not now, certainly when the Urengoi and Sredne-Vilyui fields (in northwestern Siberia) come on full stream for the pipeline. At the moment, they are number two in gas production (narrowly behind the U.S.), but they have over one-third of the world's proven reserves.

Why, then, with all these riches should the U.S.S.R. be concerned about the production of synthetic fuels from gas and its large deposits of coal? Simply, because its leaders are not, as we are, possessed of what Daniel Yergin of Harvard calls "glut psychology." Our "oscillations in government polices and the public attitudes it engenders," says, Yergin, "leads us from panic and hysteria to the complacency of the glut psychology." [Yergin and Hillebrand, Editors, "Global Insecurity—A Strategy for Energy and Economic Renewal," Houghton Mifflin, New York, 1982, p. 15.] The Soviets, meanwhile, recognize that production of synthetic fuels is a national security issue, have set the course and are pursuing it without midstream corrections.

The course was charted when, at a plenary meeting of the CPSU Central Committee meeting in Moscow on Friday, February 29, 1981, "Guidelines for the Economic and Social Development of the U.S.S.R. for 1981-1985" and for the period to 1990 were approved for presentation to the Twenty-sixth Congress of the Communist Party.

The course for development of synthetic fuels in the U.S.S.R. was set and put on automatic pilot when General Secretary Brezhnev plotted the coordinates to five thousand delegates on Monday, February 23, 1982. After stressing that "the task of improving the structure of the fuel and power balance is becoming more and more pressing" and that "the share of oil as a fuel must be reduced and it must be replaced with gas and coal," he went on to state the directive (ustanovka) of the Party Central Committee with respect to synthetic fuels:

"Looking to the long term, there should be a through study of the question of production of synthetic fuel on the basis of the coal of the Kansk-Achinsk basin."

With the course thus prescribed, GOSPLAN (the chief planning agency in the U.S.S.R.), the State Committee for Science and Technology, the Academy of Sciences and other research institues drafted a program for the production of fuels from Kansk-Achinsk coal in the 1981-85 period. Academician A. Sheindlin (well known to our scientists) was made chairman of the Coordinating Council on Synthetic Fuel. Since his appointment he has written extensively on both plans and progress. Thus in Izvestiya (April 24, 1981), after quoting Brezhnev's directive, he went on to say:

"The importance of the work in the program outline is obvious. Even though today our country is self-sufficient in oil and natural gas, the extraction of which will be even increased during the Eleventh Five-Year Plan, we are obliged, nevertheless, in the foreseeable future, to prepare technology for the period when the decreasing oil output must be supplemented by producing synfuels."

Since this first report by Academician Sheindlin, research and pilot experimentation have proceeded apace. Thus, Moscow radio reported on February 2, 1982:

"The technology has been developed for producing liquid fuel from the Kansk-Achinsk basin in Krasnoyarsk territory [in Siberia along the Enisey River]. The liquid fuel's quality is as good as conventional fuel oil and petrol. At the same time, valuable feedstock is obtained for many chemicals."

There has been no deviation from the course set by Brezhnev at the Twenty-sixth Party Congress. Scientific research organizations, design and planning institutes, and concerns and building trusts of twenty ministries and agencies are all working on the problem with a single-minded goal. As late as October 19, 1982, in a long article in Izvestiya entitled "Petrol from Gas and Coal," Academician G. Boreskov, director of the Institute of Catalysis in Novosibirsk (near the coal basin) reports:

The engine fuel requirements of our country will grow in the coming years by tens of millions of tons . . . There are only limited possibilities to meet these requirements by way of producing more oil . . . Therefore, the radical solution to the problem of additional engine fuel supply must be based upon using non-oil raw materials; first in the coming decade, it must be natural gas, and afterwards coal . . . the production of liquid fuel from, say, cheap lignities of the Kansk-Achinsk colliery complex could compete with petrol refining from oil. Bearing in mind that the U.S.S.R. coal deposits are enormous, we can see the obvious viability of such a solution . . . the present task is to design and construct the high-volume equipment which allows production of synthesis gas at lower cost.

While a Soviet writer would never be permitted to refer to South Africa as a success story in the production of synthetic fuel (or anything else), that country has designed and constructed three such plants (built by an American contractor, the Fluor Corporation), and by the end of 1985 will be providing near 50 percent of its liquid fuel needs directly at the coal mine site. I have visited all three SASOL plants, and they represent a fantastic technological achievement. The Soviets cannot profit from this (except through industrial espionage), because they are personna non grata in South Africa. And, unfortunately, the U.S. has failed to profit to the extent we might because of the internal problems of that troubled country. (Perhaps this will be alleviated by the Reagan policy of "constructive engagement" with that country.)

Three presidents—Nixon, Ford and Carter—have announced ambitious plans for the development of energy independence, in part through production of synthetic fuels. Nixon in 1973 announced a goal of energy independence by 1980. "Let us set our national goal," he said, "in the spirit of Apollo, with the determination of the Manhattan project, that by the end of this decade we will have developed the potential to meet our energy needs without dependence on any foreign energy sources." Watergate intervened, and the spirit of Apollo faltered until 1975, when Ford called for the building of 20 major synthetic fuel plants. We lurched from crisis to off-the-shelf complacency until the gas lines of the second oil shock of June 1979.

With the advent of the gas lines there was clamor by the public and the Congress for action. Carter offered a quick technological fix to appease the frustration and anger of the American people: a very large-scale fuels plan. Congress in its wisdom proceeded to scale back the Carter plan and in 1980 passed the Energy Security Act, which created the Synthetic Fuels Corporation. The Act authorizes the corporation to award financial assistance to synthetic fuels projects and set national synthetic production goals of 500,000 barrels of oil equivalent per day by 1987, increasing to two million barrels per day by 1992.

Authorization and implementation, however, are different animals. So far, through no fault of the dedicated personnel at the Synthetic Fuels Corporation (many of whom gave up high-paying jobs to try to carry out the Act's express goals), there

have been few private industry takers. Now the directors and officers of the corporation are being verbally beaten and bedeviled by some members of the same Congress that passed the legislation in 1980. They are calling the corporation and the whole synthetic fuels effort a "boondoggle," and some of them have even written letters to President Reagan calling for the corporation's abolishment.

If one were to plot on a chart the course of our own synthetic fuels effort from 1973 to date, one would immediately suspect a drunken navigator and call for his court martial or assignment to other duties, such as damage control. The synthetic fuels ship has sailed from shoal to shoal and is now leaking so badly some of its crew have taken to the lifeboats, and the oarsmen seem to be pulling in opposite directions.

The fact that there is at the moment a glut on the world oil market in no way diminishes the urgency of the situation. There could be another oil crisis tomorrow. All it would take would be a well-placed assassin's bullet or an advance by Khomeini (or the U.S.S.R.) into the Gulf States to take over the Middle East oil supplies. If we were ever thus deprived of access to our major sources of foreign oil, we might find ourselves in dire straits. We have a breathing spell now. Let's take advantage of it to prepare to meet any such contingency.

Development of the synthetic fuels option is a matter that vitally affects our national security. We can only hope, for the sake of that national security, that the present captain of the ship (President Reagan) will get everyone back aboard and set as steady a course for the future as the Soviets have—and stick to it!●

100 YEARS OF SERVICE

● Mr. RIEGLE. Mr. President, I rise today to recognize the efforts of the Salvation Army in Michigan. On May 23, 1983, the Salvation Army of Bay City, Mich. will celebrate its 100th year of providing the needy of that area with clothing, food, and other necessities of life.

The Bay City Salvation Army made its appearance with a street meeting conducted by Capt. Jennie Hall. Their home since 1958 has been the Bay City Citadel which they built after an extensive fundraising drive.

Due to the large level of unemployment in the area, many more people are coming to the Salvation Army for emergency help. But, because of the generosity of the people of Bay City and the dedication of the Bay City Citadel Corps, the Salvation Army has been able to provide aid to many more people than anyone had expected.

At this time, I congratulate the Salvation Army Citadel of Bay City, Mich. for all the fine work that they have done over the past 100 years, and for their extra efforts during the current economic crisis in my home State.●

PRESIDENTIAL MEDAL OF FREEDOM TO DR. BARNEY CLARK

● Mr. D'AMATO. Mr. President, it is with great pride and admiration that I join in cosponsoring this resolution which asks the President to award the Presidential Medal of Freedom to Dr. Barney Clark.

Dr. Clark was a rare man; he was a selfless person who played a pioneering role in the development of the artificial heart. He furthered the development of modern medical science and expanded our knowledge of innovative scientific techniques. In addition, his very humane approach to his ordeal established an incredible example for all of us to follow.

During his brave fight of 112 days, I recall the daily briefings by the medical staff and how they highlighted to the Nation of the partnership that had evolved between the Federal Government and the scientific community in the area of medical research. This period certainly reconfirmed the need for us to continue our full support of fundamental and basic research and for us to find the activities of organizations such as the National Institutes of Health which play an integral role in research, education and training. While I was personally saddened by Dr. Clark's death, his noble efforts dictate that we continue our research with such innovative techniques in the future.

I join in saluting this remarkable man, his courage and his approach to life. Barney Clark fully deserves to be recognized by the American people. He deserves the Presidential Medal of Freedom.●

IMPERIALISTS NO MORE

● Mr. HELMS. Mr. President, I think it was Will Rogers who said something to the effect, "Everybody's ignorant, except along different lines." Well, there's a great deal of ignorance, or worse, pouring from the liberal media and politicians concerning the remaining options with respect to El Salvador and Central America.

So many seem so determined to miss the point. However, on April 13 there appeared in the Washington Post an "op-ed" article written by Dr. Luis Aguilar, professor of history at Georgetown University, and a Cuban dissident who knows all too well the intentions of the present Cuban regime.

Mr. President, Dr. Aguilar responds to the specious rhetoric comparing our Central American policy of today to our policy in the 1920's, by reminding us that the U.S. position in this region has radically changed since then. He cites Cuba as an example.

In 1933, the United States was capable of toppling the revolutionary Machado government in that country by simply withholding diplomatic recognition from them. Five decades later, the United States has proven incapable of overthrowing a Communist regime in Cuba, as well as failing to prevent Castro from expanding his operations throughout the hemisphere.

Mr. President, Dr. Aguilar goes on to tell why it is American covert operations are not at fault for the current political problems in Nicaragua—rather, the Sandinistas themselves. Dr. Aguilar understands Central America well from a historical point of view, and his comments are worth our colleagues' attention.

Mr. President, I ask that Dr. Aguilar's editorial be printed in the RECORD.

The editorial follows:

[From the Washington Post, Apr. 13, 1983]

IMPERIALISTS NO MORE

(By Luis E. Aguilar)

In a recent television program, Rep. Michael Barnes vehemently expressed his opposition to the alleged U.S. covert operations in Nicaragua, which he compared with the American imperialist landing of the Marines in that region in the 1920s. That comparison, a favorite of the Latin American left, is totally misleading.

The Marine landings of the 1920s, in Nicaragua and other Caribbean areas, were obvious acts of imperialism: At a time when the United States faced no challenge in the Western Hemisphere, military force was used, or abused, to preserve American economic and political supremacy.

But the U.S. position in the Caribbean and Central America has drastically changed since the 1920s. In 1933, for example, by simply withholding diplomatic recognition, the United States was capable of toppling a revolutionary government in Cuba. Five decades later, the United States has not only been incapable of overthrowing a communist regime in Cuba, but has also failed to prevent Castro from sending troops to Africa, from expanding his influence in Central America, and from building a formidable military machine, dangerously close to vital American military and trade routes.

Of the many factors that help explain this dramatic turn of events, one stands as the most relevant and, at least for the United States, the most ominous: the increasing presence of the Soviet Union in the Caribbean. This Soviet menace, which has forced the United States to alter its global strategy, should be measured not only by the military equipment sent to Cuba, or Nicaragua, but also by the ideological orientation of the regimes that the Soviet Union promotes and supports: expansionist communist governments that are not really anti-imperialist but anti-American—an essential distinction too often ignored by the United States.

In Latin America, traditional anti-imperialism, usually a nationalistic resistance to American economic penetration, nonetheless harbors a desire to emulate the United States and a dream of reaching American economic standards. Quite different, the essence of anti-Americanism is total rejection of everything the United States represents, from democratic elections and free enterprise to the Peace Corps and rock music.

Consequently, while any improvement in the economic relations between the United States and Latin America usually ameliorates anti-imperialist feelings, there is almost nothing the United States can do to reduce anti-Americanism. The United States was still giving economic aid to Nicaragua when already the Sandinistas were teaching

Nicaraguan children songs about the United States' being "the enemy of humanity," and proclaiming their intention to aid any group fighting the American "monster" in Central America. As in Cuba, the proclamation was backed by a continuous increase of the Nicaraguan armed forces, closer ties with the Soviet Union, and some kind of intervention in neighboring countries. To compare this type of aggressive, militaristic, pro-Soviet regime with the weak and harmless Central American governments of the 1920s is a dangerous historical simplification.

This failure to recognize the true nature of today's struggle in Latin America, plus the liberals' traditional reluctance to admit that a "revolutionary" government can be brutal or repressive, are perhaps the reasons for the double standard that many liberals apply to Central America. In the case of El Salvador, those liberals dismiss as irrelevant any Soviet, Cuban or Nicaraguan covert intervention, and attribute the political turmoil in that country to deep internal problems. In the case of Nicaragua, however, they reverse their logic, dismissing internal problems as non-existent and attributing political violence to American covert operations. Thus, the same group that pressures the U.S. government to recognize the Salvadoran guerrillas as a legitimate political force demands that the United States stop any aid to the guerrillas in Nicaragua.

But the truth is that the Sandinistas, who have replaced Somoza's personal dictatorship with their own ideological dictatorship, are responsible for most of the political problems they are now confronting. By squandering national and foreign economic aid, repressing all forms of dissents, insulting the pope, curtailing religious activities and brutally mistreating the Miskito Indians, the Sandinistas have alienated vast sectors of the Nicaraguan population and provoked an intense popular anti-government reaction. The expanding commitment to stand against Nicaragua's government, which has even affected democratic Costa Rica, is basically the result of the Sandinistas' actions, not of any American covert operations.

Whatever U.S. involvement in the growing Central American crisis might be, it is utterly naive to ignore the Soviets' role in the area and to present the Sandinistas as innocent victims of American imperialism. A Costa Rican diplomat focused more accurately on present Sandinista problems when he acidly commented: "Nadie puede jugar con fuego sin quemarse"—Nobody can play with fire without getting burned.●

UCLA MARDI GRAS

● Mr. WILSON. Mr. President, May 20 marks the opening of the 42d annual UCLA Mardi Gras. Each year, nearly 5,000 UCLA students come together to create this special mardi gras which includes a variety of swirling carnival rides; brightly colored food, game, and entertainment booths; roaming clowns and jugglers; and helium balloons. Over the years, this carnival has evolved into the largest student-run collegiate activity in the country.

Last year, more than 82,000 people attended Mardi Gras which grossed more than $535,000. The proceeds from the event go to UniCamp, UCLA's official charity. UniCamp is a summer camp for underprivileged children from the Los Angeles area, located in the San Bernardino Mountains. This student-run camp receives more than 50 percent of its operating revenue from mardi gras. Last year's donation to UniCamp exceeded $128,000.

Mr. President, the students of UCLA have set a fine precedent. They provide a fun-filled weekend in May for the residents of Los Angeles, and their efforts enable several hundred needy children to escape to UniCamp. Mardi gras is an excellent example of how individuals can join together and make a difference. I congratulate the UCLA Mardi Gras 1983 Committee on its efforts. These students are an inspiration to us all.●

PROGRAM

Mr. BAKER. Mr. President, is there an order for the Senate to convene tomorrow?

The PRESIDING OFFICER. There is an order for 9:30 a.m.

Mr. BAKER. Mr President, on tomorrow, the Senate will convene at 9:30 a.m., according to the order previously entered.

After the recognition of the two leaders under the standing order, there will be a period for the transaction of routine morning business until 10 a.m., in which Senators may speak for not more than 2 minutes each.

At 10 a.m. tomorrow, the Senate will go into executive session for the purpose of considering the nomination of Alfred S. Regnery, of Virginia, to be Administrator of the Office of Juvenile Justice and Delinquency Prevention, on a time agreement of 1 hour, to be equally divided. The vote on the Regnery nomination, if a rollcall vote is ordered, will be stacked to occur after 2 p.m. I shall put a unanimous-consent request in just a moment with respect to the scheduling of votes.

After the time for the debate on the Regnery nomination has expired, the Senate will return to the consideration of the immigration bill and to continue the debate and deal with that measure until the hour of 12 noon.

ORDER FOR RECESS FROM 12 NOON UNTIL 2 P.M. TOMORROW

Mr. President, since tomorrow is Tuesday and Senators will be engaged in caucuses on both sides of the aisle and away from the Senate Chamber, I ask unanimous consent that at 12 noon tomorrow the Senate stand in recess until the hour of 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, at 2 p.m. the Senate will go into executive session for the purpose of further considering the nomination of William D. Ruckleshaus, of Washington, to be Director of the Environmental Protection Agency. Five minutes of debate will precede that vote.

ORDER FOR TIME TO VOTE ON REGNERY NOMINATION

Mr. President, after the Ruckleshaus vote, I propose that the Senate remain in executive session for the purpose then of voting on the Regnery nomination, to be preceded by not more than 5 minutes of debate. I now make that unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOTE SEQUENCE ON S. 529

Mr. BAKER. Mr. President, following after the Regnery nomination, I ask unanimous consent that the votes on amendments to this bill S. 529 occur in the following sequence:

A vote on the Bumpers amendment No. 1271, to be preceded by 5 minutes of debate equally divided; a Helms amendment No. 1221, which will be preceded by 5 minutes of debate equally divided; a Helms amendment No. 1222, which will be preceded by 5 minutes of debate equally divided; a Helms amendment No. 1224 under the same terms and conditions; a Baucus amendment No. 1270 under the same terms and conditions; a Warner amendment No. 1269 under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I will point out that, under the arrangements that have been made for the stacking of votes, there will be rollcall votes beginning at 2 p.m. interspersed by 5 minutes of debate on each measure prior to the occurrence of that vote.

So the time from 2 p.m. until approximately 5 p.m. will be a very busy period in the Senate on tomorrow, and I urge Senators to take account of that in making their plans and indeed plan to be in the Chamber so that we can conduct those votes as fast as possible and dispatch the business of the Senate.

After those rollcalls are completed, the Senate will return to the consideration of the immigration bill and continue on that measure as long as is necessary to complete final passage no later than 10 p.m. on tomorrow evening as previously ordered.

Mr. President, the Budget Committee has been given until the close of morning business on Thursday next in which to report the budget resolution pursuant to the order of recommital.

Senators should note, then, that the latter part of this week, Thursday and Friday, perhaps Saturday, will be given over to the consideration of the budget resolution.

It is hoped that that matter can be negotiated as promptly as possible. However, Senators should be reminded that notwithstanding that there is only limited time remaining to debate on this measure, it is the intention of the leadership to ask the Senate to

expand that time if it seems necessary and desirable to accommodate the views of Senators on both sides of the aisle.

COMMUNICATIONS ACT AMENDMENTS

Mr. President, there is one other matter that appears to be cleared for action this week, and it may be possible to turn to that measure sometime during the day on Wednesday. That is Calendar Order No. 106, S. 66, a bill to amend the Communications Act of 1934.

It is the understanding of the leadership on this side that the matters in conflict on that measure have been reconciled and that it is available for action and it is the intention of the leadership to try to dispose of it during the course of this week.

Mr. President, I think that describes the schedule for this week as best we can at this moment.

To repeat, we are going to have a very busy voting pattern between 2 p.m and approximately 5 p.m. tomorrow.

Tuesday will perhaps be a late day. It will be, if necessary, in order to get final passage of the immigration bill.

Wednesday we will try to do the communications bill if possible, and on Thursday it is anticipated we will be back on the budget resolution.

We may be able to finish the budget resolution on Thursday and, if we do not finish it on Thursday, we will have to continue to debate that measure on Friday.

Further arrangements will be made for additional time, assuming the Senate will consent to that as circumstances indicate.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I believe I have nothing further to announce at this time. I inquire of the minority leader if he has any matter he wishes to address to the Senate at this time. Otherwise, it is my intention to ask the Senate to recess.

Mr. BYRD. Mr. President, I thank the majority leader. Nothing has been omitted by the very able distinguished majority leader. Nothing would please me more than to be able to walk out that door to my office and head homeward.

Mr. BAKER. I think both of us will be gratified by that result, which is now about to occur.

Mr. President, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 9:30 a.m. tomorrow.

The motion was agreed to and, at 6 p.m., the Senate recessed until tomorrow, Tuesday, May 17, 1983, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate May 16, 1983:

OFFICE OF THE U.S. TRADE REPRESENTATIVE

Peter Otto Murphy, of the District of Columbia, to be a Deputy U.S. Trade Representative, with the rank of Ambassador, vice David R. MacDonald, resigned.

COMMODITY CREDIT CORPORATION

Daniel G. Amstutz, of New York, to be a member of the Board of Directors of the Commodity Credit Corporation, vice Seeley Lodwick, resigned.

DEPARTMENT OF LABOR

Janet L. Norwood, of Maryland, to be Commissioner of Labor Statistics, U.S. Department of Labor, for a term of 4 years (reappointment).

FOREIGN SERVICE

The following-named persons of the agencies indicated for appointment or promotion as career members of the Senior Foreign Service of the classes stated, and also for any other appointments indicated:

For reappointment in the Foreign Service as a career member of the Senior Foreign Service, class of Minister-Counselor, a Consular Officer, and a Secretary in the Diplomatic Service of the United States of America:

AGENCY FOR INTERNATIONAL DEVELOPMENT

Philip Birnbaum, of Maryland.

For promotion in the Senior Foreign Service as a career member of the Senior Foreign Service of the United States of America, class of Minister-Counselor:

AGENCY FOR INTERNATIONAL DEVELOPMENT

Allison Butler Herrick, of the District of Columbia.

For appointment as a career member of the Senior Foreign Service, class of Minister-Counselor, a Consular Officer, and a Secretary in the Diplomatic Service of the United States of America:

DEPARTMENT OF AGRICULTURE

Norvan L. Meyer, of Virginia.

For promotion into the Senior Foreign Service as career members of the Senior Foreign Service of the United States of America, class of Counselor:

DEPARTMENT OF COMMERCE

John W. Bligh, Jr., of Florida.
Harrison B. Sherwood, of Minnesota.

For promotion into the Senior Foreign Service as a career member of the Senior Foreign Service, class of Counselor, a Consular Officer, and a Secretary in the Diplomatic Service of the United States of America:

U.S. INFORMATION AGENCY

Gregory J. Moffitt, of Florida.

For appointment as a career member of the Senior Foreign Service of the United States of America, class of Counselor:

DEPARTMENT OF STATE

Richard L. Wilson, Of Iowa.

For appointment as career members of the Senior Foreign Service, class of Counselor, Consular Officers, and Secretaries in the Diplomatic Service of the United States of America:

DEPARTMENT OF STATE

Samuel Karson, of Maryland.

DEPARTMENT OF STATE

Robert E. Reichard, of Texas.

The following-named persons of the Department of State for appointment as Foreign Service Officers of the classes stated, and also for the other appointments indicated herewith:

For reappointment in the Foreign Service as a Foreign Service Officer of class 2, a Consular Officer, and a Secretary in the Diplomatic Service of the United States of America:

Thomas Raymond Hutson, of Maryland.

For appointment as Foreign Service Officers of class 2, Consular Officers, and a Secretaries in the Diplomatic Service of the United States of America:

Edward S. Browne, of California.
H. Marshall Carter, of Texas.
Sharon Stanley Durkee, of New York.
Jennifer Claudette Ward, of the District of Columbia.

For appointment as Foreign Service Officers of class 4, Consular Officers, and Secretaries in the Diplomatic Service of the United States of America:

J. Mikel Alderman, of Georgia.
James Beach Allen, of Florida.
Eduardo J. Baez, of Florida.
William Michael Bartlett, of Florida.
Mark M. Boulware, of Texas.
Patricia A. Butenis, of New Jersey.
Joseph Frank Cuadrado III, of Louisiana.
Scott Danaher, of Florida.
Jeannette P. Dubrow, of Florida.
Laura Patricia Faux-Gable, of Pennsylvania.
Gretchen Anne Gerwe, of California.
Robert D. Goldberg, of Florida.
Charles Daniel Herrington, of Idaho.
Janice Lee Jacobs, of Illinois.
Clyde Lester Jones, of Indiana.
Robert Paul Konrath, of California.
Ronald James Kramer, of Illinois.
Joseph Evan LeBaron, of Oregon.
Eric H. Madison, of the District of Columbia.
John P. Markey, Jr., of Massachusetts.
S. Jean Melvin, of Pennsylvania.
Alice Cook Moore, of Georgia.
Horace Wood Pitkin, of the District of Columbia
Gregory V. Powell, of Illinois.
Jo Ellen Powell, of the District of Columbia.
Patricia Diane Ratcliff, of the District of Columbia.
Alberta I. Rorick, of Indiana.
Angus Taylor Simmons, of California.
Howard Joseph Thomas Steers, of Texas.
Zachary Zalman Teich, of Florida.
Lisa Maria Tender of Massachusetts.
Stephen John Tomchik, of Pennsylvania.
David Randall Van Valkenburg, of Virginia.
Philip R. Wall, of Washington.
Kevin Michael Whitaker, of Virginia.
Mary Jo Wills, of Virginia.
Mark S. Woerner, of Illinois.
Brian Cha Kyung Woo, of Hawaii.

The following-named members of the Foreign Service of the Departments of State and Commerce, and the U.S. Information Agency, to be Consular Officers and/or Secretaries in the Diplomatic Service of the United States of America, as indicated:

Consular Officers and Secretaries in the Diplomatic Service of the United States of America:

Frederick Aalto, of Virginia.
Thomas W. Adams, of the District of Columbia.
Richard R. Ades, of the District of Columbia.
Arthur A. Alexander, Jr., of New York.
Jonathan Mark Aloisi, of Michigan.
Stephen C. Arlinghaus, of Kentucky.
E. Charles Ash, of Minnesota.
Robert William Bethune, of Washington.

Randall Virgil Biggers, of New Mexico.
George W. Biolsi, of Virginia.
Keith R. Bovetti, of California.
Russell F. Brant, of Virginia.
Charles W. Buck, of Michigan.
David Buentello, of Texas.
Helen Bridget Burkart, of Virginia.
Alicia J. Campi, of Virginia.
Margo A. Carlock, of Illinois.
Steven J. Cash, of Oregon.
Clare M. Cavoli, of the District of Columbia.
Judith Beth Cefkin, of Texas.
John R. Chamberlin, of New Hampshire.
Cynthia W. Chard, of Florida.
Timothy Vincent Collins, of the District of Columbia.
Robert J. Coontz, of Virginia.
William A Costanza, of Virginia.
Zahra E. Cox, of Virginia.
William G. Crowell, of Washington.
Raymond Stanley Dalland, Jr., of Maryland.
Louis DeLair, Jr., of Virginia.
D. Purnell Delly, of Virginia.
F. Miguel Pardo de Zela, of the Virgin Islands.
Larry Miles Dinger, of Iowa.
E. Michael Dixon, of Virginia.
Richard S. Dixon, of Virginia.
Marilyn A. Dorn, of Virginia.
Patrick D. Duddy, of Maine.
Jack Kevin Dulberger, of Florida.
Jeffrey L. Dunford, of Virginia.
Scott Edelman, of Virginia.
Dennis M. Fairbanks, of Virginia.
Nancy Connolly Fibish, of Maryland.
Anthony O. Fisher, of Florida.
Linda C. Flohr, of Virginia.
Caron L. Garcia, of California.
Bruce R. Goslin, of Virginia.
Thomas D. Gradisher, of Ohio.
Jocelyn A. Green, of Virginia.
Nikki Hansen, of the District of Columbia.
Ann Hayes, of Massachusetts.
Ellen Hemmendinger, of Virginia.
Angela C. Henrikson, of Virginia.
Kerry Hofferth, of Virginia.
Richard Huff, of Maryland.
Russell C. Huffman, of Virginia.
Arthur W. Huptich, of Maryland.
Bruce G. Hyman, of Virginia.
Laura M. Jackson, of Virginia.
Kevin M. Johnson, of New York.
Lena M. Joseff, of Virginia.
Benjamin R. Justesen II, of North Carolina.
Clare A. Kahn, of Virginia.
Oleg Keikuatov, of Virginia.
Janet L. Koss, of Virginia.
Jan Krc, of Connecticut.
James V. Kulis, of California.
Merrillyn Kulis, of California.
Morgan L. Kulla, of California.
Dennis D. Lamb, of Virginia.
Stanley Langston, of Virginia.
Anne Lauer, of Virginia.
Rober L. Laws, of Virginia.
Paul R. Leach, of Virginia.
Jessica LeCroy, of Texas.
Lawrence T. Leightley, of Virginia.
Kevin A. Lindsey, of Virginia.
Glenn F. Little, of Maryland.
Andrew David Miller, of Michigan.
Daniel Mital, of Minnesota.
Thomas Martin Murphy, of Maryland.
David Dana Nelson, of Maryland.
Thomas M. Newcomb, of Virginia.
Kristen A. Norden, of the District of Columbia.
Brian J. O'Connor, of Connecticut.
Francis M. O'Keefe, of Virginia.
Charles M. Parish, Jr., of California.
Amy Pitts, of North Carolina.
John R. Pugh, Jr., of North Carolina.
Brian Quigley, of Virginia.
Ned Quistorff, of Washington.
Jennifer A. Rachko, of the District of Columbia.
William V. Rapp, of California.
Michael Bernard Regan, of New Jersey.
Beth L. Ritchie, of California.
Alina Romanowksi, of Virginia.
Leslie V. Rowe, of Massachusetts.
Luis Rueda, of Virginia.
Josef Karl Ruth, of the District of Columbia.
Nick Samijlenko, of Virginia.
Parker F. Scofield, of Virginia.
Peter F. Secor, of New York.
Isaiah W. Shaird, of Virginia.
Steven J. Sharp, of Utah.
Gregory H. W. Shaw, of Maryland.
Alan P. Simon, of Virginia.
Donald L. Smith, of Virginia.
Frank Socolow, Jr., of Virginia.
Sheri Kathleen Sprigg, of Montana.
Debra J. Steele, of Virginia.
Russell Thompson, of North Carolina.
Sharon Kathleen Trammell, of South Carolina.
Thomas Wayne Tyler, of Illinois.
Graham T. Undercoffer, of Virginia.
Marc G. Vanden Broeck, of Illinois.
Jeffrey S. Vrabel, of Virginia.
Reuben B. Walkley, of California.
James K. Whelan, of New York.
Sharon Nancy White, of Connecticut.
James P. Wojtasiewicz, of New York.
William M. Yarmy, of New York.

Consular Officers of the United States of America:
Madeleine M. Brown, of South Carolina.
Genevieve C. Dean, of California.
Ying Yeh Price, of Maryland.
James L. Ward, of Virginia.

Secretary in the Diplomatic Service of the United States of America:
Hendrik N. Smit, of Illinois.

The following-named person of the Department of State for appointment as a Foreign Service Officer of class 3, a Consular Officer and a Secretary in the Diplomatic Service of the United States of America, effective March 16, 1982:
Marcie Berman Ries, of Texas.

IN THE COAST GUARD

The following reserve officers of the U.S. Coast Guard to be permanent commissioned officers in the grades indicated:

To be lieutenant commander

James W. Boteler
Robert B. Hurwitt
Michael L. Kudalis
Craig M. Nicholson

To be lieutenant

James M. Collin
Joseph E. Donovan
Deborah M. Dupree
Kenneth D. Elmer
Tom L. Gibson, Jr.
Robert A. Grant
Judith M. Hammond
Dale L. Harrington
James E. Hatfield
Robert A. Hughes
David R. Innis
Daniel E. Kah
Donald J. Klingenberg
John H. Leopold
Robert R. Meeks
Patrick A. Neuman
Jon W. Peterson
John A. Strange
Marc B. Wilson

To be lieutenant (junior grade)

Michael D. Augusta
Robert M. Austin, Jr.
Alan H. Bark
Matthew P. Bernard
Joseph A. Bigley, Jr.
Richard W. Billingsley
Thomas H. A. Blisard
John A. Budde
William T. Burke
Thomas R. Cahill
Bruce D. Chinery
Brian R. Conaway
Stanley V. Cook
James K. Dabney
Philip K. Dagnese
Kevin E. Dale
Garry L. Daniel
Patricia B. Darcy
Frederick T. Darvill
Egbert Dejong
William D. Eley
James M. Farley
Clinton R. Fitts
Jeffrey A. Gabrielson
Edward J. Gleason
Glen E. Hensley
Robert L. Hurst
Michael M. Jefferies
Michael Kopito
Kent F. Krause
Christopher W. Lillie
John D. Lockett
Edward L. Love
Timothy M. Mallon
Joseph P. Marcotte
Lawrence J. Musarra
Michael E. Nelson
Eric A. Nicolaus
Gregory S. Novotny
James M. Overnesser
Waldron J. O'Brien
Robert V. Palombo
Charles L. Prudhomme
James W. Rasmus, Jr.
Henry D. Reed
Thomas C. Riggs
Michael L. Schafersman
Douglas E. Smith
Gary L. Tabony
Robert C. Thompson
Michael D. Valerio
Robert S. Wagenaar

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force under the provisions of section 531, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform duties indicated with grade and date of rank to be determined by the Secretary of the Air Force provided that in no case shall any of the following officers be appointed in a grade higher than that indicated.

MEDICAL CORPS

To be colonel

Anderson, John A., [redacted]
Studwell, Alfred W., [redacted]

To be lieutenant colonel

Kang, Dae O., [redacted]
Orille, Oscar P., [redacted]

To be captain

Heap, Alan F., [redacted]

DENTAL CORPS

To be lieutenant colonel

Jennings, Robert G., [redacted]

To be major

Mansueto, Michael A., [redacted]
Sallustio, Frank W., [redacted]
Sprague, Donald M., [redacted]

To be captain

Bober-Moken, Irene G., [redacted]
Cornelius, Clifford W., [redacted]
Kwan, John, [redacted]
McLendon, William J., [redacted]
Mesaros, Andrews J., Jr., [redacted]
Richardson, Bruce W, [redacted]
Sabatini, Robert, [redacted]
Williams, Gregory P., [redacted]

The following Air Force officer for promotion in the Regular Air Force, under the provisions of sections 1552 and 8299, title 10, United States Code, as amended.

LINE OF THE AIR FORCE

To be major

Washington, Donald L., [redacted]

The following Air Force officers for permanent promotion in the U.S. Air Force, in accordance with section 601, title VI, transition provisions, Defense Officer Personnel Management Act of 1980, with date of rank to be determined by the Secretary of the Air Force.

To be lieutenant colonel

Toenjes, Donald M., [redacted]

To be major

King, Douglas L., [redacted]
Matthews, Roy A., [redacted]
Stackhouse, Asa M., III, [redacted]

The following Air Force officer for promotion in the U.S. Air Force, under the provi-

sions of sections 1552, 8442, and 8447(b), title 10, United States Code, as amended.

To be lieutenant colonel

Toenjes, Donald M., xxx-xx-xxxx

The following-named officer for reappointment to the Active Duty List of the Regular Air Force in the grade indicated under the provisions of sections 1210 and 1211, title 10, United States Code.

CHAPLAIN

To be lieutenant colonel

Guikema, Henry, xxx-xx-xxxx

The following persons for appointment as Reserve of the Air Force, in the grade indicated, under the provisions of sections 593, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated.

MEDICAL CORPS

To be colonel

Blossman, Robert C., xxx-xx-xxxx

To be lieutenant colonel

Blair, Charles E., xxx-xx-xxxx
Hales, Bradley T., xxx-xx-xxxx
Hickman, Thomas J., III, xxx-xx-xxxx
Jenkins, Douglas W., Jr., xxx-xx-xxxx
Manelis, Joseph, xxx-xx-xxxx
Romf, Richar F., xxx-xx-xxxx
Ruda, Richard J., xxx-xx-xxxx

The following persons for appointment as Reserve of the Air Force (ANGUS) in the grade indicated, under the provisions of sections 593 and 8351, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code.

MEDICAL CORPS

To be lieutenant colonel

Harpster, Gene O., xxx-xx-xxxx
Ignatius, Richard, xxx-xx-xxxx

The following officer for promotion in the Air Force Reserve, under the provisions of sections 1552 and 8371, title 10, United States Code (EAD).

JUDGE ADVOCATE

To be colonel

Kerr, Nelson R., Jr., xxx-xx-xxxx

The following Air Force officer for appointment as Registrar, U.S. Air Force Academy, under the provisions of section 9333(c), title 10, United States Code.

Wilkinson, Thomas C., xxx-xx-xxxx

IN THE AIR FORCE

The following-named officers for permanent promotion in the U.S. Air Force, under the appropriate provisions of chapter 36, title 10, United States Code, as amended, with dates of rank to be determined by the Secretary of the Air Force.

LINE OF THE AIR FORCE

To be lieutenant colonel

Carnaghie, John A., xxx-xx-xxxx
Eichenseer, John C., Jr., xxx-xx-xxxx
Haberbusch, Alan E., xxx-xx-xxxx
Hilger, David C., xxx-xx-xxxx
Millard, John C., xxx-xx-xxxx
Mitchell, Lyndon B., II, xxx-xx-xxxx
Paddock, Dennis G., xxx-xx-xxxx
Rabata, Francis D., xxx-xx-xxxx
Reddig, Gary A., xxx-xx-xxxx
Russo, Anthony J., xxx-xx-xxxx
Stine, Terrence P., xxx-xx-xxxx
Tepfer, Daniel, xxx-xx-xxxx
Trout, Gary G., xxx-xx-xxxx

BIOMEDICAL SCIENCE CORPS

Dennis, Richard J., xxx-xx-xxxx
Little, Herbert E., xxx-xx-xxxx

LINE OF THE AIR FORCE

To be major

Black, Temple H., xxx-xx-xxxx
Carter, Ted J., xxx-xx-xxxx
Elder, Eric C., xxx-xx-xxxx
Sokolowski, Eugene J. A., xxx-xx-xxxx

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force under the provisions of section 531, title 10, United States Code, with grade and date of rank to be determined by the Secretary of the Air Force provided that in no case shall the officer be appointed in a grade higher than that indicated.

LINE OF THE AIR FORCE

To be lieutenant colonel

Paddock, Dennis G., xxx-xx-xxxx
Reddig, Gary A., xxx-xx-xxxx
Russo, Anthony J., xxx-xx-xxxx

To be major

Black, Temple H., xxx-xx-xxxx

CONFIRMATIONS

Executive nominations confirmed by the Senate, May 16, 1983:

DEPARTMENT OF STATE

Malcolm R. Barnebey, of Texas, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Belize.

UNITED NATIONS-INTERNATIONAL ATOMIC ENERGY AGENCY

Richard Salisbury Williamson, of Virginia, to be the Representative of the United States of America to the Vienna Office of the United Nations and Deputy Representative of the United States of America to the International Atomic Energy Agency, with the rank of Ambassador.

DEPARTMENT OF STATE

Arthur Winston Lewis, of the District of Columbia, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Sierra Leone.

DEPARTMENT OF AGRICULTURE

Daniel G. Amstutz, of New York, to be Under Secretary of Agriculture for International Affairs and Commodity Programs.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

U.S. CLAIMS COURT

Moody R. Tidwell III, of Virginia, to be a judge of the U.S. Claims Court for a term of 15 years.

HOUSE OF REPRESENTATIVES—*Monday, May 16, 1983*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Unto You, O God, we open our hearts to the abundance of Your mercies. In this moment of prayer we place before You our concerns whatever they may be. Bless our families and those we love, that we may be to each other a strength in need in all the circumstances of life. Teach us how to forgive each other and know the harmony of spirit that Your grace can give this day and everyday. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendments of the House to bills of the Senate of the following titles:

S. 653. An act to amend title 10, United States Code, to establish a Foundation for the Advancement of Military Medicine, and for other purposes; and

S. 957. An act to provide for an increase in the number of members of the Congressional Award Board, and for other purposes.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 884. An act to provide for the use and distribution of funds awarded the Red Lake Band of Chippewa Indians in docket numbered 15-72 of the U.S. Court of Claims.

PERMISSION FOR VARIOUS COMMITTEES TO HAVE UNTIL 5 P.M., TUESDAY, MAY 17, 1983, TO FILE SUNDRY REPORTS

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the following committees have until 5 p.m., Tuesday, May 17, to file reports on the following bills, and that reports filed by that time be considered as being in compliance with section 402(a) of the Budget Act:

The Committee on Energy and Commerce:

H.R. 1707, Independent Safety Board authorization for fiscal years 1984, 1985, and 1986;

H.R. 2713, Public Health Service authorization;

H.R. 2867, Hazardous Waste Control and Enforcement Act 1983; and

H.R. 2970, Federal Trade Commission authorization.

The Committee on Foreign Affairs:

H.R. 2922, authorizing appropriations for fiscal years 1984 and 1985 for international security and development assistance programs.

The Committee on the Judiciary:

H.R. 2230, authorizing appropriations for the Civil Rights Commission; and

H.R. 2909, authorizing appropriations for the Legal Services Corporation.

The Committee on Public Works and Transportation:

H.R. 1707, Independent Safety Board authorization for fiscal years 1984, 1985, and 1986;

H.R. 1244, Federal Capital Investment Program Information Act of 1983;

H.R. 2544, Emergency Public Works Employment Act of 1983; and

H.R. 2605, Kennedy Center authorization for fiscal year 1984.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

REAGAN POLICY JEOPARDIZING FUTURE AGRICULTURAL EXPORTS

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, I want to focus the attention of this House on a position taken by the Reagan administration which is costing our farmers hundreds of millions of dollars in lost export sales opportunities, and jeopardizing the future of an export market worth almost $2 billion to American agriculture. This regrettable situation has been brought about by a dispute between the Reagan administration and the Chinese Government over $34 million of Chinese textile imports. Consistent with a personal commitment the President made to negotiate import agreements which protect the domestic textile industry's market share, and to continue textile negotiations with China "independent from other considerations," in the President's written words, the administration imposed quotas on textile imports from China in January, precipitating the current dispute.

As a result, the Chinese are buying only the minimum amount of agricultural commodities required under our present agreement, and instead have been filling their needs at the ports and terminals of our competitors. Substantial sales have and will be lost to Argentina and the European Economic Community while this textile dispute continues. One major U.S. exporter estimates that this bickering has cost our farmers at least $400 million in lost sales of wheat alone. That loss is easily more than 10 times the value of the textiles in dispute. The cost of this protectionist action is coming out of the hide of the agricultural community, where it is imposing a financial burden that is far out of proportion to the scope of the original dispute.

I urge the President in the strongest possible terms to recognize the gross inequity his textile import policies have created, and to move swiftly and decisively to resolve this controversy in order to let us begin to reverse the damage that has already occurred and to prevent this valuable market from going down the drain completely.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO FILE REPORT ON H.R. 2350, HEALTH RESEARCH EXTENSION ACT

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce have until midnight on Monday, May 16, 1983, to file its report on H.R. 2350, the Health Research Extension Act, and that the report filed by that time be considered to have been filed within the time permitted by section 402(a) of the Congressional Budget Act of 1974 with respect to fiscal year 1984.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

NO GOOD GUYS IN EL SALVADOR

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, over the weekend there were reports of killings in El Salvador of a group of guerrillas going into a small village and decimating 11 people.

There also were reports over the weekend that the archbishop of El Salvador estimated that over 300 were killed in El Salvador in the month of April.

Mr. Speaker, many times, and I have been one of those included, many have railed claims against the human rights policies of the rightwing Government of El Salvador. I am a critic of the President's policy because I think it is leading us into a quagmire.

Nonetheless, I think what we have to see by virtue of these atrocities is that there are no good guys. Atrocities should be condemned whether the right or the left does it.

The guerrillas, by doing this, show that their interest in peace and negotiations is just as minimal and as bad as the other side.

I just would like to acknowledge this in the quest of nonetheless trying to achieve a policy that brings negotiations by both parties.

CONTEMPT PROSECUTION OF RITA M. LAVELLE

(Mr. DINGELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DINGELL. Mr. Speaker, the first business before the House on Wednesday next will be a resolution calling for the Speaker to certify the report of the Committee on Energy and Commerce regarding the former EPA official Rita M. Lavelle's contempt of Congress to the U.S. attorney for criminal prosecution. This matter was reported to the House by unanimous vote of the committee with Members on both sides in support.

I can inform the House that a report will be filed today strongly supporting supplemental views being filed by members of the committee on both sides. It will, however, take until later today to obtain all of the signatures.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO FILE REPORT CALLING FOR CERTIFICATION OF RESOLUTION REGARDING RITA M. LAVELLE

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce may have until midnight tonight, Monday, May 16, 1983, to file the report calling for the Speaker to certify the resolution regarding the contempt of Congress of Rita M. Lavelle to the U.S. attorney for criminal prosecution so that it can be printed in tomorrow's RECORD and be available to the Members in adequate time for consideration in connection with this matter on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

PROCEEDINGS AGAINST RITA M. LAVELLE (H. REPT. NO. 98-190) REFERRED TO THE HOUSE CALENDAR

Mr. DINGELL, from the Committee of Energy and Commerce, submitted the following report together with supplemental views

I. INTRODUCTION

On April 26, 1983, the Committee on Energy and Commerce unanimously adopted a resolution finding Ms. Rita M. Lavelle, former Assistant Administrator of the Environmental Protection Agency (EPA), in contempt of Congress for failing to appear and testify as called for by a subpoena authorized by the Subcommittee on Oversight and Investigations and personally served on her on February 23, 1983. As the senior official who was, until recently, in charge of EPA's hazardous waste programs, Ms. Lavelle stands in a unique position to respond to the serious concerns of the Subcommittee—and of the Congress and the American people—about the agency's discharge of its duty to protect the public from hazardous wastes, to clean them up promptly, using the $1.6 billion Superfund, and to secure reimbursement from those responsible.

Ms. Lavelle stood at the center of an apparent maelstrom of conflicting directives and priorities during her tenure at the EPA. Serious allegations have been raised that she subordinated the public trust to the pressures of industry and to the vicissitudes of politics. Serious questions have been raised about the adequacy of the Superfund Act to address the problems of disposal of hazardous waste. No one had a better vantage point from which to observe defects in the Act than Ms. Rita Lavelle. And, no one had a more important responsibility and stewardship for the administration and implementation of the Act.

Given her failure to appear and testify on March 21, 1983, as directed by the Subcommittee's subpoena, the Subcommittee on Oversight and Investigations on that day resolved unanimously, by voice vote, that Ms. Lavelle be found in contempt and directed its Chairman to report that finding to the Committee on Energy and Commerce for appropriate action. On April 26, 1983 the Committee, a quorum being present, duly considered the referral from the Subcommittee on Oversight and Investigations and adopted by unanimous voice vote the following resolution offered by Representative Sikorski:

"*Resolved*, That the Committee on Energy and Commerce report and refer the failure of Rita M. Lavelle to appear and testify before the Subcommittee on Oversight and Investigations as called for by a subpoena *ad testificandum* authorized by the Subcommittee on February 10, 1983, issued on February 16, 1983, and duly served on February 23, 1983, together with all facts in connection therewith, to the House of Representatives with the recommendation that Rita M. Lavelle be cited for contempt of the House of Representatives to the end that she may be proceeded against in a manner and form provided by law."

The Committee herewith transmits its report and recommended resolution that the Speaker of the House certify this report to the U.S. Attorney to prosecute Ms. Lavelle for contempt of Congress, pursuant to the provisions of Title 2, United States Code, Sections 192 and 194.

II. FACTS, BACKGROUND, AND CHRONOLOGY

As discussed more fully, *infra*, the Subcommittee on Oversight and Investigations has been committed to a virtually continuous investigation of the Nation's hazardous waste problem since 1978. In early 1982, the focus of this investigation was directed at the administration and implementation by EPA of the Comprehensive Environmental Response, Compensation, and Liability Act—commonly known as the Superfund Act. As the Subcommittee's fact finding proceeded, and as the full dimension of poor management and improper influence on decisions affecting public health and safety began to materialize, a serious effort was made to impede the course of the Subcommittee's investigation. The two most egregious examples were the refusal by the executive branch (relying upon a disingenuous claim of Executive Privilege) to turn over certain EPA documents subpoenaed by the Subcommittee and refusal by EPA to permit Subcommittee staff to engage in unfettered interviews with EPA employees.

To maintain the progress of its investigation and to obtain the necessary information from EPA employees, the Subcommittee met on February 10, 1983 and by majority vote, a majority being present, authorized the issuance of thirty-nine subpoenas *ad testificandum* and *duces tecum* to various current and past EPA officials and employees.[1]

Three of these subpoenas are pertinent to the issue at hand. Two of them were subpoenas *duces tecum* calling for the appearance of the named party at a Subcommittee hearing on February 17, 1983 and calling for the production of all appointment books, diaries, calendars and telephone logs of Rita Lavelle maintained by her or her staff between November 6, 1981 and February 5, 1983.[2] One of the two subpoenas *duces tecum* was directed to then EPA Administrator Anne M. Gorsuch,[3] the other was directed to Ms. Lavelle. The third subpoena, and the one directly involved here, called for Ms. Lavelle's testimony before the Oversight and Investigations Subcommittee on March 21, 1983.

THE SUBPOENAS DUCES TECUM

The Burford subpoena *duces tecum* was served on February 10, 1983.[4] Service of the Lavelle subpoena *duces tecum* was more difficult.[5] After press accounts over the weekend of February 12 and 13 quoting Ms. Lavelle as indicating her willingness to cooperate with Congressional Committees, the Subcommittee staff contacted her counsel, James J. Bierbower, on February 14 to advise him of the subpoena's requirements for documents and testimony and to arrange

[1] The Minutes of the Subcommittee meeting reflect that a quorum (a majority of the Subcommittee Members) was present for the vote on the authorization of these subpoenas and that the vote was unanimous.

[2] At the time these subpoenas were authorized, Ms. Lavelle was no longer at EPA. She had been fired by Ms. Gorsuch on February 4, 1983 and again by the President on February 7, 1983.

[3] During the pendency of the Subcommittee's investigation, Mrs. Gorsuch was married and changed her surname to Burford. For consistency, this Report refers to her as Mrs. Burford.

[4] Service was accepted on behalf of the EPA Administrator, pursuant to her authority, by Richard H. Mays.

[5] A chronology of all events pertinent to the subpena *duces tecum* and to the subpoena *ad testificandum* is annexed as Appendix I.

for service. Efforts on February 14 and 15 to reach an agreement with Mr. Bierbower for Ms. Lavelle to accept service were unavailing. Staff's independent efforts to locate Ms. Lavelle and serve her personally on February 14 and 15 were likewise unsuccessful. On the afternoon of February 16, therefore, staff served Mr. Bierbower with the subpoena *duces tecum* (return on which was due the following day). Mr. Bierbower acknowledged service in writing and also told staff that in the meantime he had voluntarily provided to the Senate Committee on Environment and Public Works, earlier that day, Ms. Lavelle's 1982 appointment book-calendar. He did this with full knowledge that the Subcommittee's subpoena *duces tecum* called for its production. The staff of the Senate Committee has informed Subcommittee staff that it did not request, and had no reason to expect, the delivery of this document.

On the evening of February 16, Mrs. Burford provided documents within her possession responsive to the subpoena directed to her for the appointment books and calendars of Ms. Lavelle. In light of that delivery, her personal appearance was not required. However, Ms. Lavelle did not respond to the subpoena *duces tecum* served on her Counsel the previous day. She did not appear at the February 17, 1983 hearing and no documents were supplied. In response to Chairman Dingell's February 18 letter advising Mr. Bierbower that the Subcommittee viewed his client's failure to appear as "direct defiance of a duly authorized subpoena of the House of Representative," Mr. Bierbower stated in a February 25 letter that because Ms. Lavelle was not personally served with the subpoena *duces tecum* "she was not obliged to appear." [6]

In view of the fact that (1) the Subcommittee received from Mrs. Burford the materials called for in the subpoena directed to her (which duplicated the specifications of the subpoena *duces tecum* directed to Ms. Lavelle), (2) the Subcommittee staff obtained a copy of the 1982 Lavelle calendar voluntarily supplied to the Senate Environment and Public Works Committee, and (3) Mr. Bierbower assured the Subcommittee staff orally and in writing that Ms. Lavelle took only "her purse and handkerchief" when she left her office at EPA and the 1982 calendar was the only document under her control which was covered by the subpoena, the Subcommittee and the Committee have not, at this time, pursued Ms. Lavelle's failure to comply with the subpoena *duces tecum* as a separate element of contumacious conduct. However, Chairman Dingell's February 18 letter advised Mr. Bierbower that when Ms. Lavelle appears before the Subcommittee in response to its process, it will inquire into the "full facts and circumstances" surrounding her failure to appear and produce documents on February 17, 1983 in response to the subpoena *duces tecum*.

The Subpoena Ad Testificandum

While the Subcommittee staff was attempting to obtain agreement from Mr. Bierbower on February 15 for Ms. Lavelle to accept service of the subpoena *duces tecum*, he was advised by the staff that the Subcommittee had also authorized a subpoena *ad testificandum* calling for Ms. Lavelle's broad testimony at a later date.[7] When Ms. Lavelle failed to comply with the subpoena *duces tecum* on February 17, Chairman Dingell wrote Ms. Bierbower on February 18 and advised him that he had directed the staff to serve the subpoena *ad testificandum* forthwith.

The Subcommittee engaged a professional process server on February 18 who attempted without success to serve Ms. Lavelle over the next two days. When it was learned on February 20 that Ms. Lavelle had agreed to appear voluntarily before the Senate Environment and Public Works Committee on February 23, the process server was told to halt his efforts, since the staff intended to serve Ms. Lavelle in the Senate office building before her Senate appearance. On February 22, the Subcommittee staff arranged with the Senate Committee staff to serve Ms. Lavelle in the Senate Committee offices immediately prior to her appearance.

At 9:47 a.m. on February 23, 1983, two members of the Subcommittee staff personally served the subpoena *ad testificandum* on Ms. Lavelle. She was waiting to appear, sitting in an inside office of the Senate Committee offices, when a Senate staff member entered first and advised her that the staff from the Oversight and Investigations Subcommittee had arrived to deliver a subpoena. The Senate staff member emerged and told Subcommittee staff that Ms. Lavelle "preferred to be served in front of the television cameras." The Subcommittee staff stepped into the office and handed a copy of the subpoena to Ms. Lavelle together with the Rules of the House applicable to the Committee and Subcommittee. She read the subpoena, said "okay", and asked if she would have the opportunity to review the Subcommittee's materials prior to her appearance on March 21. She was advised to contact the Subcommittee's Chief Counsel and Staff Director, Michael Barrett, to address that matter. When Mr. Bierbower arrived a few moments later, staff advised him that they had just served Ms. Lavelle with a subpoena calling for her testimony on March 21, 1983. When Ms. Lavelle asked Mr. Bierbower if she should sign the subpoena to acknowledge its receipt, he advised her not to do so.

In her voluntary testimony later that morning before the Senate Committee, Ms. Lavelle stated that:

Also for the record I will say that I was not served a subpoena until this morning. I will be appearing tomorrow and have been working with the House so as to appear when they deem it appropriate to appear and will stand by that commitment.

The next day, February 24, she appeared voluntarily before the House Committee on Public Works and Transportation.

On March 4, 1983 the Subcommittee received a letter from Mr. Bierbower, dated February 25, acknowledging Chairman Dingell's February 18 letter. Mr. Bierbower explained (as noted earlier) that Ms. Lavelle did not comply with the Subcommittee's subpoena *duces tecum* because she had not been personally served. He also stated:

As you probably know, Ms. Lavelle was served personally, on February 23, with a subpoena calling for her appearance on March 21, 1983.

On Friday, March 18, 1983, at 4:00 p.m., the Subcommittee received a letter from Mr. Bierbower dated March 17, 1983 bearing the notation: "BY HAND". The letter stated:

Please be advised that our client, Ms. Rita Lavelle, will not be present at 10:00 a.m. on March 21, 1983. We are filing a lawsuit which will set forth our position with respect to the subpoena.[8]

Ms. Lavelle is willing to appear before your Committee at some future date. However, as Ms. Lavelle has stated, she left EPA with her purse and handkerchief. It seems only fair to permit her to review the files now in your Committee's possession, prior to her testimony.

May we arrange some time, in advance of the new hearing date, for Ms. Lavelle to review the documents?

The Subcommittee Chief Counsel immediately telephoned Mr. Bierbower and advised him that the Subcommittee expected Ms. Lavelle to appear the following Monday (March 21) and that, should she not appear, the Chairman would seek a motion to adopt a resolution finding Ms. Lavelle in contempt. Mr. Bierbower said he understood.

Ms. Lavelle did not appear before the Subcommittee on March 21, 1983 as directed by the subpoena *ad testificandum*. Consequently, the Subcommittee, a quorum being present for the purposes of transacting business,[9] unanimously by voice vote adopted the following resolution offered by Representative Gore:

"Resolved, That the Subcommittee on Oversight and Investigations, conducting an investigation under authority of Rules X and XI of the House of Representatives, finds Rita M. Lavelle in contempt of Congress for contumacious failure to appear and testify as called for by a subpoena *ad testificandum* authorized by the Subcommittee on February 10, 1983, issued on February 16, 1983, and duly served on February 23, 1983, and the Subcommittee directs its Chairman to report such finding to the Committee on Energy and Commerce for such action as the Committee deems appropriate."

The Subcommittee's Chief Counsel wrote Mr. Bierbower on March 23 to advise him of the adoption of the resolution and to supply a copy of the resolution. Mr. Barrett urged Mr. Bierbower to communicate expeditiously with the Subcommittee on any matter of concern to him, because it was the Subcommittee's intention to forward the resolution to the full Energy and Commerce Committee as early as the week of April 11, 1983.

On March 24, 1983 Chairman Dingell received a letter from Mr. Bierbower, dated March 22, 1983, again bearing the notation: "BY HAND", expressing disappointment with the Subcommittee's vote, stating Ms. Lavelle's willingness "to appear at some future date," and contending that Ms. Lavelle should be permitted to review the files in the Committee's possession prior to her testimony.

No further communication occurred until April 12 when Subcommittee Chief Counsel Mr. Barrett telephoned Mr. Bierbower. Mr. Barrett informed him that the Subcommittee still expected to receive his client's testimony, and that the Committee intended to consider the contempt resolution expeditiously if Ms. Lavelle did not appear before

[6] Copies of all correspondence referred to in this Report are included in chronological order as Appendix II.

[7] A copy of the subpoena is attached as Appendix III.

[8] A complaint raising specious allegations was filed but has, to this day, never been served on any named defendant. See Appendices IV and V.

[9] The record of the Subcommittee's March 21, 1983 hearing reflects that eight Members were present and voted on the resolution finding Ms. Lavelle in contempt.

the Subcommittee. Mr. Barrett also advised him that documents delivered to the Subcommittee by Mrs. Burford pursuant to the subpoena *duces tecum*—documents taken from Ms. Lavelle's office which constituted her appointment books, calendars, etc.—would be made available to Ms. Lavelle for her review in advance of her testimony. Mr. Bierbower told Mr. Barrett that he would speak with his client and call Mr. Barrett the next day. No phone call was received.

On April 18, 1983, the Committee on Energy and Commerce scheduled a meeting for April 26 to consider the contempt resolution against Rita M. Lavelle. Mr. Barrett wrote to Mr. Bierbower on April 20 to advise him of the scheduled meeting and to remind him of his unfulfilled promise to contact Mr. Barrett concerning Ms. Lavelle's availability to testify and the offer previously made to allow Ms. Lavelle to review documents in the Subcommittee's possession.

On April 25, 1983, Mr. Bierbower responded to Mr. Barrett's April 20 letter. He stated that Ms. Lavelle remained "ready to testify" before the Subcommittee. He requested additional time to allow her to review all of the Subcommittee materials which pertained to her testimony, explaining that Ms. Lavelle has been job hunting in California and that he has had other engagements of long standing. Mr. Bierbower also suggested that the Subcommittee obtain copies of all of Ms. Lavelle's prior testimony before the House of Representatives and provide it to him for review.

On April 26, 1983, the Committee on Energy and Commerce met to consider the resolution forwarded by the Oversight and Investigations Subcommittee to hold Rita Lavelle in contempt. A quorum was present for the transaction of business,[10] and by voice vote the Committee unanimously adopted the contempt resolution offered by Representative Sikorski and quoted above.

III. Authority and Legislative Purpose

The authority of the Congress to obtain information is clear from Article I of the Constitution and from interpretation of that power by the Supreme Court. The investigatory power is so essential to the legislative function that it is implied from the general vesting of legislative power in Congress. Moreover, the power to investigate extends beyond inquiries relating to the administration of existing laws, or the need for new laws. Congress must be able to inquire into, and to pursue, evidence of corruption, inefficiency, or waste to ensure that the nation's laws are fully and fairly implemented. *McGrain* v. *Daugherty*, 275 U.S. 135, 174-75, (1927); *Watkins* v. *United States*, 354 U.S. 178, 187 (1957); *Barenblatt* v. *United States*, 360 U.S. 109, 111 (1959). On four recent occasions, the House of Representatives has vindicated the fundamental Congressional interest in obtaining testimony in furtherance of an investigation by resolving that individuals be cited for contempt for failure to appear or to testify in response to compulsory process. Proceedings Against G. Gordon Liddy, H.R.Rep. No. 93-453, 93rd Cong., 1st Sess. (1973); Proceedings Against Claude Powell, H.R.Rep. 95-1080, 95th Cong., 2nd Sess. (1978); Proceedings Against Hancho Kim, H.R.Rep. 95-1214, 95th Cong., 2nd Sess. (1978); Proceedings Against O. Robert Fordiani, H.R.Rep. 96-1078, 96th Cong., 2nd Sess. (1980).

[10] The Minutes of the Committee's April 26, 1983 meeting reflect that a quorum (a majority of the Committee Members) was present for the vote on the contempt resolution.

Rule X of the Rules of the House of Representatives charges the Committee on Energy and Commerce with jurisdiction over "interstate and foreign commerce generally" and "public health."[11] Under this authority, the Subcommittee on Commerce, Transportation, and Tourism, and the Committee on Energy and Commerce (then designated as the Committee on Interstate and Foreign Commerce), authored Title I of the Comprehensive Environmental Response, Compensation, and Liability Act—commonly known as the Superfund Act. As the oversight arm of the Committee on Energy and Commerce, the jurisdiction of the Subcommittee on Oversight and Investigations is concurrent with that of the parent Committee. Under Rule X, the Subcommittee on Oversight and Investigations is charged with the responsibility to "review . . . the application, administration, execution, and effectiveness of those laws . . ." within the jurisdiction of the Committee on Energy and Commerce and to oversee the "operation of the Federal agencies . . . having responsibilities . . . for the administration and execution" of the laws within our jurisdiction. In addition, the Oversight Subcommittee is required to "study any conditions or circumstances which may indicate the necessity or desirability of enacting new or additional legislation" within the jurisdiction of the Committee.

The Oversight Subcommittee's involvement in finding solutions to the problems presented by hazardous waste has been significant and longstanding. The Subcommittee has held approximately 30 hearings and issued three reports on the subject of hazardous waste disposal since October 1978. The Subcommittee's comprehensive report on hazardous waste disposal issued in September 1979 played a major role in spurring enactment of the Superfund legislation in 1980. The Subcommittee issued a report in October of 1979 on its own survey of waste disposal sites. The survey, which constituted the first national survey of its kind, identified 3,383 disposal sites used since 1950 by the 53 largest domestic chemical companies. Approximately 2,000 of those sites were previously unknown to EPA, and the Agency thereafter began its own survey of waste sites.

The current investigation by the Subcommittee has raised serious questions about both the adequacy of the Superfund Act and the administration of that Act by the EPA. Further concerns have been raised that certain policies and procedures were instituted by senior management officials which delayed the effective implementation of the Superfund program. The Subcommittee long ago arrived at the point in its investigation where the testimony of Rita Lavelle was critical to the effective pursuit of its inquires. As the EPA official who was in charge of implementation of the laws addressing the problem of hazardous wastes, her testimony is essential to the Subcommittee's review of the effectiveness and administration of these laws, and of the effectiveness of Federal enforcement actions to require cleanup of hazardous waste sites by responsible parties and to recover Federal cleanup costs from responsible parties.

In short, based upon clearly articulated jurisdiction and upon continuing substantial legislative and investigative activity, the authority and legislative purpose of the Committee on Energy and Commerce and its Oversight Subcommittee to inquire into the EPA's administration of Superfund—and to compel the attendance of the former official directly responsible for its implementation—is simply not open to question.

[11] Pertinent portions of the Rules are set forth in Appendix VI.

IV. Findings

1. The Subcommittee on Oversight and Investigations of the Committee on Energy and Commerce has the jurisdiction and authority to conduct an investigation into the adequacy and administration of the Comprehensive Environmental Response, Compensation, and Liability Act.

2. In furtherance of that investigation, a subpoena *ad testificandum* was directed to Ms. Rita M. Lavelle. The subpoena was lawfully authorized on February 10, 1983 and was personally served on February 23, 1983.

3. Ms. Lavelle's failure to appear as directed by the subpoena constitutes a contumacious refusal to comply with the lawful process of the Subcommittee on Oversight and Investigations, the Committee on Energy and Commerce, and the House of Representatives of the United States.

V. Conclusions

The position of the Committee is that all substantive and procedural legal prerequisites have been satisfied to date and that the House of Representatives should adopt the following resolution to refer the matter to the appropriate U.S. Attorney. Title United States Code, Sections 192 and 194 provide the necessary vehicles for taking this action. Section 192 provides the basis for indictment should a witness fail to appear in response to a subpoena. Section 194 provides the vehicle for certifying such a result to the appropriate U.S. Attorney.

It is the position of the Committee that the proceedings to date are in order, and we recommend that the House adopt the following resolution to report the fact of the refusal of Rita M. Lavelle to appear and testify at a meeting of the Subcommittee on Oversight and Investigations on March 21, 1983, together with all the facts in connection therewith to the end that she may be proceeded against as provided by law.

VI. Recommendation

The Committee recommends that the House respond to Ms. Lavelle's defiance of its lawful process by initiating the statutory procedures for having her prosecuted for contempt of Congress. Accordingly, the Committee submits the following resolution for adoption by the House of Representatives:

RESOLUTION OF HOUSE THAT THE SPEAKER CERTIFY THE REPORT OF RITA M. LAVELLE'S CONTEMPT OF CONGRESS TO THE U.S. ATTORNEY FOR CRIMINAL PROSECUTION

Resolved, that pursuant to 2 U.S.C. 192 and 194, the Speaker of the House certify the report of the Committee on Energy and Commerce, detailing the refusal of Rita M. Lavelle to obey a lawful subpoena of the House of Representatives and to testify before the Subcommittee on Oversight and Investigations of the House Committee on Energy and Commerce, to the U.S. Attorney for the District of Columbia to prosecute the said Ms. Lavelle for contempt of Congress.

Appendix I

CHRONOLOGY OF SUBCOMMITTEE ON OVERSIGHT AND INVESTIGATIONS SUBPOENAS DIRECTED TO RITA M. LAVELLE

FEBRUARY 10, 1983

Subcommittee on Oversight and Investigations authorizes the issuance of 39 subpoe-

nas including one directed to then EPA Administrator Anne M. Gorsuch for the production of all appointment books, diaries, calendars and telephone logs of former EPA official, Rita M. Lavelle, maintained by her or her staff. Another subpoena is directed to Ms. Lavelle calling for the production of records described in the subpoena to Administrator Gorsuch, and also calling for her personal appearance before the Subcommittee on February 17, 1983. A third subpoena *ad testificandum* is also authorized for Ms. Lavelle's testimony at a later date.

FEBRUARY 12-13, 1983

Press accounts over this weekend quote Ms. Lavelle as indicating that she will cooperate with Congressional Committees seeking to hear from her.

FEBRUARY 14, 1983

A.M.—Subcommittee counsel telephones Ms. Lavelle's counsel, James Bierbower in an effort to arrange a mutually convenient service of process. Mr. Bierbower is advised of the subpoena's requirements. Bierbower says he will discuss the matter with his client and call back later in the day.

5:30 P.M.—Not having heard from Mr. Bierbower, Subcommittee counsel places call to Mr. Bierbower. Counsel is informed that Mr. Bierbower is away from his desk but he will be given a message to return the call.

6:35 P.M.—Not having heard from Mr. Bierbower, Subcommittee counsel again calls Mr. Bierbower. Mr. Bierbower answers the phone and informs counsel that he will work on the matter that evening and requests that counsel telephone him at 9:00 A.M. on February 15, 1983. Additionally, Mr. Bierbower mentions the existence of Ms. Lavelle's combination appointment book-calendar for 1982. Mr. Bierbower is reminded that all items of that nature are covered by the subpoena.

FEBRUARY 15, 1983

9:10 A.M.—Mr. Bierbower is telephoned by Subcommittee counsel. Bierbower confirms the existence of the 1982 appointment book-calendar, and indicates that he is considering turning them over to the FBI. Once again, Mr. Bierbower is advised that the subpoena called for the production of these documents. Mr. Bierbower is further advised that a second subpoena calling for Ms. Lavelle's broad testimony at a later date providing him ample time to prepare his client, has also been authorized. Mr. Bierbower says he is meeting with his client shortly and will respond that morning.

12:25 P.M.—Not having heard from Mr. Bierbower, staff visits his law office with the intent to serve Ms. Lavelle. Mr. Bierbower advises she is not present; he refuses to discuss the matter further; and, only after insistence by the staff, does he agree to call the staff later that afternoon.

Midafternoon—Subcommittee Staff Director attempts unsuccessfully to talk to Mr. Bierbower, who does not return the call.

1:30 P.M.—Subcommittee staff attempts unsuccessfully to serve Ms. Lavelle at her Arlington, Virginia apartment.

7:35 P.M.—Subcommittee staff again attempts unsuccessfully to serve Ms. Lavelle at her Arlington, Virginia apartment. Female answers telephone call from staff, and identifies herself as a girlfriend of Ms. Lavelle's, but declines to give her name. She is given the staff's home and work phone numbers and is asked to have Ms. Lavelle return the call. Ms. Lavelle does not call.

FEBRUARY 16, 1983

4:00 P.M.—Mr. Bierbower is served by staff with the first subpoena and is informed that it calls for the production of documents and testimony of his client before the Subcommittee the following morning. Mr. Bierbower acknowledges by signature, his receipt of the subpoena. He further indicates that certain documents called for in the subpoena—specifically Ms. Lavelle's 1982 calendar—have been supplied to the Senate Committee on Environment and Public Works earlier that day. In response to the staff's inquiry, Mr. Bierbower tells staff that those books have been supplied voluntarily at his initiative.

6:00 P.M.—Mrs. Gorsuch delivers material called for in the subpoena directed at her calling for documents of Ms. Lavelle.

FEBRUARY 17, 1983

11:05 A.M.—Subcommittee convenes hearing to receive documents and testimony in response to first subpoena. Ms. Lavelle does not appear. Subcommittee staff testifies to facts surrounding service and attempts of service of subpoena.

FEBRUARY 18, 1983

Chairman Dingell sends certified letter to Mr. Bierbower informing him that "The Subcommittee views Ms. Lavelle's failure to appear last Thursday morning to be in direct defiance of a duly authorized subpoena of the House of Representatives". The letter further states "When Ms. Lavelle appears before the Subcommittee in response to the subpoena *ad testificandum*, the Subcommittee will also inquire into the full facts and circumstances surrounding Ms. Lavelle's failure to appear and produce documents in response to a subpoena served upon you on February 16th."

Subcommittee hires professional process server to serve subpoena *ad testificandum* on Ms. Lavelle. Attempts to serve subpoena throughout the day are unsuccessful.

FEBRUARY 19, 1983

Professional process server makes several unsuccessful attempts to serve Ms. Lavelle thoughout the day.

FEBRUARY 20, 1983

Senator Chafee announces that Ms. Lavelle will appear and testify before the Senate Committee on Environment and Public Works on Wednesday, February 23, 1983, at 10:00 A.M.

Professional process server is notified to halt further attempts at service; as it is the Subcommittee's intent to serve Ms. Lavelle before her Senate appearance.

FEBRUARY 22, 1983

Staff arranges with the staff of the Senate Committee on Environment and Public Works to serve Ms. Lavelle in their offices prior to her 10:00 A.M. appearance.

FEBRUARY 23, 1983

9:47 A.M.—Ms. Lavelle is personally served with subpoena *ad testificandum* by Subcommittee staff in the offices of the Senate Committee on Environment and Public Works. Ms. Lavelle reads the subpoena and says "Okay". Ms. Lavelle asks if she will be given the opportunity to review the Subcommittee's material before she testifies on March 21. Ms. Lavelle is advised to contact the Subcommittee Staff Director in that regard. Mr. Bierbower directs Ms. Lavelle not to sign the subpoena acknowledging receipt.

10:00 A.M.—Ms. Lavelle testifies voluntarily before the Senate Committee on Environment and Public Works. She testifies that:

Also for the record I will say I was not served a subpoena until this morning, I will be appearing tomorrow and have been working with the House so as to appear when they deem it appropriate to appear and will stand by that commitment.

FEBRUARY 24, 1983

10:00 A.M.—Ms. Lavelle appears voluntarily before the House Committee on Public Works and Transportation.

MARCH 4, 1983

9:40 A.M.—Subcommittee receives letter from Mr. Bierbower to Chairman Dingell dated February 25, 1983 acknowledging receipt of Chairman Dingell's letter of February 18, 1983. Mr. Bierbower's letter reads:

Ms. Lavelle was not served personally with a subpoena which called for her appearance on February 17, 1983. Therefore, it is my position that she was not obliged to appear.

As you probably know, Ms. Lavelle was served personally, on February 23, with a subpoena calling for her appearance on March 21, 1983.

MARCH 18, 1983

4:00 P.M.—Subcommittee receives letter from Mr. Bierbower to Chairman Dingell dated March 17, 1983 and noted "BY HAND". Mr. Bierbower's letter states

Please be advised that our client, Ms. Rita Lavelle, will not be present at 10:00 a.m. on March 21, 1983. We are filing a lawsuit which will set forth our position with respect to the subpoena.

Ms. Lavelle is willing to appear before your Committee at some future date. However, as Ms. Lavelle has stated, she left EPA "with her purse and handkerchief." It seems only fair to permit her to review the files now in your Committee's possession, prior to her testimony.

May we arrange some time, in advance of the new hearing date, for Ms. Lavelle to review the documents?

Subcommittee Staff Director telephones Mr. Bierbower to ask if he understands that the Subcommittee fully expects Ms. Lavelle's testimony on Monday, and that should she not appear, the Chairman will seek a motion of contempt against Ms. Lavelle. Mr. Bierbower indicates that he understands these facts.

MARCH 21, 1983

10:00 A.M.—Subcommittee convenes hearing to receive the testimony of Rita Lavelle in response to subpoena *ad testificandum*. As a result of Ms. Lavelle's failure to appear, the Subcommittee approves the following resolution without objection:

Resolved, that the Subcommittee on Oversight and Investigations, conducting an investigation under authority of Rules X and XI of the House of Representatives, finds Rita M. Lavelle in contempt of Congress for contumacious failure to appear and testify as called for by a subpoena *ad testificandum* authorized by the Subcommittee on February 10, 1983, issued on February 16, 1983, and duly served on February 23, 1983, and the Subcommittee directs its Chairman to report such finding to the Committee on Energy and Commerce for such action as the Committee deems appropriate.

MARCH 23, 1983

Subcommittee Staff Director, Michael Barrett, writes to Mr. Bierbower to advise him of the Subcommittee's action and the intent of the Subcommittee to forward the

resolution to the full Committee during the week commencing April 11, 1983.

MARCH 24, 1983

Committee receives letter from Mr. Bierbower to Chairman Dingell dated March 22, 1983, and noted "BY HAND". Mr. Bierbower writes:

Your Subcommittee's contempt vote was a disappointment. However, Ms. Lavelle remains willing to appear at some future date. I still contend you should permit her to review the files now in your Committee's possession, prior to her testimony.

May I again suggest that we arrange some time, in advance of a new hearing date, for Ms. Lavelle to review the documents?

APRIL 12, 1983

10:15 A.M.—Having received no further communication from Mr. Bierbower, Mr. Barrett places telephone call to him. Mr. Barrett was told that Mr. Bierbower was in a meeting.

4:45 P.M.—Mr. Bierbower returns Mr. Barrett's call. Mr. Barrett reminds Mr. Bierbower that the Subcommittee expects to receive Ms. Lavelle's testimony, that certain documents will be made available for Ms. Lavelle's review, and that the Committee intends to consider the contempt resolution expeditiously in the absence of her appearance. Mr. Bierbower told Mr. Barrett he would talk to his client and call Mr. Barrett the next day, April 13.

APRIL 18, 1983

Committee on Energy and Commerce schedules meeting for April 26, 1983, to consider contempt resolution against Rita M. Lavelle.

APRIL 20, 1983

Mr. Barrett writes Mr. Bierbower to inform him of the Committee schedule and remind him of his unfulfilled promise to call back concerning Ms. Lavelle's availability and the offer to allow Ms. Lavelle to review certain documents in the possession of the Subcommittee.

APPENDIX II

SUBCOMMITTEE ON OVERSIGHT AND INVESTIGATIONS,
Washington, D.C., February 18, 1983.

Certified Mail—Return Receipt Requested

JAMES J. BIERBOWER, Esquire,
Bierbower & Bierbower, Eye Street, NW., Washington, D.C.

DEAR MR. BIERBOWER: As you know, on Wednesday afternoon, February 16th, the staff of the Subcommittee on Oversight and Investigations, served you with a subpoena directed to your client, Ms. Rita M. Lavelle. That subpoena called for Ms. Lavelle's appearance before the Subcommittee on Thursday, February 17th, and the production of certain documents called for in the attachment to that subpoena. The Subcommittee views Ms. Lavelle's failure to appear last Thursday morning to be in direct defiance of a duly authorized subpoena of the House of Representatives. I hope that you and Ms. Lavelle appreciate the gravity of this situation. I am enclosing a transcript of the Subcommittee's hearing which was conducted on February 17th in Ms. Lavelle's absence.

When staff of the Subcommittee discussed this matter with you on Tuesday, February 15th, you were informed that the Subcommittee had also authorized the issuance of a subpoena *ad testificandum* calling for Ms. Lavelle's testimony at a subsequent date. I have directed that this subpoena be served forthwith. The Subcommittee's original intent in desiring Ms. Lavelle's testimony before the Subcommittee was to inquire into her actions in discharging her responsibilities as Assistant Administrator of the Environmental Protection Agency. Now, however, when Ms. Lavelle appears before the Subcommittee in response to the subpoena *ad testificandum*, the Subcommittee will also inquire into the full facts and circumstances surrounding Ms. Lavelle's failure to appear and produce documents in response to a subpoena served upon you on February 16th.

Please be advised that the Subcommittee's subpoena for documents in the possession of Ms. Lavelle remains in full force and effect. Continued refusal to frustrate the efforts of this Subcommittee's discharge of its responsibilities will be dealt with appropriately. I am sure you must be aware of the potential liability of Ms. Lavelle in this matter.

Sincerely,

JOHN D. DINGELL,
Chairman, Subcommittee on Oversight and Investigations.

Enclosure.

INTERNATIONAL SQUARE SUITE 1275,
Washington, D.C., February 25, 1983.

In re Ms. Rita M. Lavelle.

Hon. JOHN D. DINGELL,
Chairman, Subcommittee on Oversight and Investigations, U.S. House of Representatives, Committee on Energy and Commerce, Rayburn House Office Building, Washington, D.C.

DEAR SIR: This will acknowledge receipt of your letter of February 18, 1983.

Ms. Lavelle was not served personally with a subpoena which called for her appearance on February 17, 1983. Therefore, it is my position that she was not obliged to appear.

As you probably know, Ms. Lavelle was served personally, on February 23rd, with a subpoena calling for her appearance on March 21, 1983.

Respectfully,

JAMES J. BIERBOWER.

INTERNATIONAL SQUARE SUITE 1275,
Washington, D.C., March 17, 1983.

In re Ms. Rita M. Lavelle.

By hand

Hon. JOHN D. DINGELL,
Chairman, U.S. House of Representatives, Committee on Energy and Commerce, Rayburn House Office Building, Washington, D.C.

DEAR SIR: Please be advised that our client, Ms. Rita Lavelle, will not be present at 10:00 a.m. on March 21, 1983. We are filing a lawsuit which will set forth our position with respect to the subpoena.

Ms. Lavelle is willing to appear before your Committee at some future date. However, as Ms. Lavelle has stated, she left EPA "with her purse and handkerchief." It seems only fair to permit her to review the files now in your Committee's possession, prior to her testimony.

May we arrange some time, in advance of the new hearing date, for Ms. Lavelle to review the documents?

Thanking you for your consideration, I am

Respectfully,

JAMES J. BIERBOWER.

COMMITTEE ON ENERGY AND COMMERCE
Washington, D.C., March 23, 1983.

JAMES J. BIERBOWER, Esquire,
Bierbower and Bierbower, 1875 Eye Street, NW., Suite 1275, Washington, D.C.

DEAR MR. BIERBOWER: On Monday, March 21, 1983, the Subcommittee on Oversight and Investigations of the Committee on Energy and Commerce met in public session to receive the testimony of Rita M. Lavelle, a client of yours. Late on the preceding Friday afternoon you had advised the Subcommittee that Ms. Lavelle would not appear and testify. At the hearing, the Chairman called for the appearance of Ms. Lavelle. Upon her failure to appear, the Subcommittee then voted her to be cited for contempt. A copy of the resolution is attached. The Subcommittee anticipates that the resolution will be forwarded to the full Committee sometime during the week commencing April 11, 1983.

At this point, the Subcommittee has made it clear that it believes the service of the subpoena was valid; that Ms. Lavelle did not have a valid basis for her failure to appear. During the period between February 23rd when she was subpoenaed and March 21st when she was due to appear, the Subcommittee heard no complaints concerning the effectiveness of service and received no request for witness fees nor did it receive any other indications of potential problems from the witness. Indeed, the Subcommittee noted Ms. Lavelle's public statements at the time of her appearance before the Senate and also noted your letter to us, dated February 25, 1983. At this point, while we have been able to examine copies of the pleadings that you have filed in your case in Federal District Court, we note no service has been made upon the potential defendants.

If you wish to communicate with the Subcommittee on any matter, I urge you to do so expeditiously.

Sincerely,

MICHAEL F. BARRETT, Jr.,
Chief Counsel and Staff Director.

Enclosure.

BIERBOWER & BIERBOWER,
Washington, D.C., March 22, 1983.

In re Ms. Rita M. Lavelle.

Hon. JOHN D. DINGELL,
Chairman, U.S. House of Representatives, Committee on Energy and Commerce, Rayburn House Office Building, Washington, D.C.

DEAR SIR: Your Subcommittee's contempt vote was a disappointment. However, Ms. Lavelle remains willing to appear at some future date. I still contend you should permit her to review the files now in your Committee's possession, prior to her testimony.

May I again suggest that we arrange some time, in advance of a new hearing date, for Ms. Lavelle to review the documents?

Thanking you for your consideration, I am

Respectfully,

SUBCOMMITTEE ON OVERSIGHT AND INVESTIGATIONS, COMMITTEE ON ENERGY AND COMMERCE,
Washington, D.C., April 20, 1983.

JAMES J. BIERBOWER, Esquire,
Bierbower & Bierbower, International Square, Suite 1275, 1875 Eye Street, NW., Washington, D.C.

DEAR MR. BIERBOWER: On Tuesday, April 26, 1983 at 10:00 a.m. in Room 2123 Rayburn House Office Building, the Committee on Energy and Commerce will consider the adoption of a resolution citing your client, Ms. Rita M. Lavelle, for contempt of Congress. This action follows the action taken by the Subcommittee on Oversight and Investigations of the Committee on Energy and Commerce on March 21, 1983 as a result

of Ms. Lavelle's failure to comply with a Subcommittee subpoena. In my letter of March 23, 1983, I furnished you with a copy of the resolution of contempt adopted by the Subcommittee.

When you had not contacted the Subcommittee on April 12th, I called you. When we spoke I advised you the Subcommittee still requires the testimony of Ms. Lavelle. Although you assured me you would call me back concerning Ms. Lavelle's availability, you have not done so. Neither have you availed yourself of my earlier suggestion that you contact the Subcommittee. When we last spoke, I did indicate the Subcommittee will permit Ms. Lavelle to review certain materials in its files.

Sincerely,

MICHAEL F. BARRETT, Jr.,
Chief Counsel and Staff Director.

BIERBOWER & BIERBOWER,
Washington, D.C., April 25, 1983.

By hand delivery to room 2323, Rayburn Building

In re Rita M. Lavelle.

MICHAEL F. BARRETT, Jr., Esquire,
Chief Counsel and Staff Director, U.S. House of Representatives, Subcommittee on Oversight and Investigations, of the Committee on Energy and Commerce, Washington, D.C.

DEAR SIR: Thank you for your letter of April 20, 1983.

Ms. Lavelle remains ready to testify before the Subcommittee. However, I respectfully request that you give her sufficient time to review all of the materials which pertain to the subjects upon which you desire her testimony. I appreciate your position that my client has had the opportunity, but in all candor she has been looking for a job in her home state of California. Furthermore, I have had other engagements of long standing.

I have not been able to obtain a transcript of Ms. Lavelle's most recent testimony before the House of Representatives. That testimony is important because of Chairman Dingell's letter to the Department of Justice.

I should also mention that Ms. Lavelle has testified approximately a dozen times earlier before the House of Representatives. While I do not request the opportunity to review such testimony now, it may save time for everyone if you can obtain that earlier testimony.

I also noted, in Friday's *Wall Street Journal*, that the Teamsters Union Central State Pension Fund has filed suit against my client in Mobile, Alabama. Pg. 14.

I trust you will reconsider, and that you will let me know the time and place so that we may coordinate our schedules with yours.

Thanking you for your cooperation, I am

Respectfully,

JAMES J. BIERBOWER.

APPENDIX III

ORIGINAL

BY AUTHORITY OF THE HOUSE OF REPRESENTATIVES OF THE CONGRESS OF THE UNITED STATES OF AMERICA

To Mark J. Raabe and/or Richard A. Frandsen and/or Benjamin M. Smethurst and/or Kenneth J. Vigue and/or Phyllis Freeman.

You are hereby commanded to summon Rita M. Lavelle, 1201 South Eads Street, Arlington, Va., to be and appear before the Subcommittee on Oversight and Investigations/Energy and Commerce Committee of the House of Representatives of the United States, of which Hon. John D. Dingell is chairman, in their chamber in the city of Washington, on Monday, March 21, 1983, in Room 2123 Rayburn House Office Building at the hour 10 a.m., then and there to testify touching matters of inquiry committed to said Committee; and she is not to depart without leave of said Committee.

Herein fail not, and make return of this summons.

Witness my hand and the seal of the House of Representatives of the United States, at the city of Washington, this 16th day of February, 1983.

JOHN D. DINGELL, *Chairman.*

Attest:

BENJAMIN J. GUTHRIE, *Clerk.*

ORIGINAL

Subpena for Rita M. Lavelle, 1201 South Eads Street, Arlington, Va., before the Committee on the Energy and Commerce/Subcommittee on Oversight and Investigations.

Served by Ben Smethurst, at 9:47 a.m., Feb. 23, 1983.

PHYLLIS K. FREEMAN,
House of Representatives.

APPENDIX IV

[Memorandum]

To: The Honorable John D. Dingell, Chairman

From: Subcommittee staff

Re: Ms. Lavelle's "Lawsuit"

On Friday, March 18, 1983 (the last business day before her scheduled testimony on March 21, 1983), James Bierbower, Esquire, filed a lawsuit on Ms. Lavelle's behalf seeking injunctive and declaratory relief from the United States District Court for the District of Columbia. The complaint names as defendants the House of Representatives, the Energy and Commerce Committee and its Oversight and Investigations Subcommittee, Chairman Dingell, and the Clerk of the House, Edmund Henshaw, Jr. It asks the court to quash the subpoena *ad testificandum*, to enjoin any action to enforce it, and to declare that the subpoena is invalid and that its enforcement would be unconstitutional.

The staff considers this lawsuit to be frivolous. It lacks a legal basis. It lacks a factual basis. Each of the essential allegations made by Mr. Bierbower on Ms. Lavelle's behalf is spurious. The complaint alleges that the subpoena was not authorized by a majority of the Subcommittee Members voting, a majority being present. This is false. It alleges that service was defective because Ms. Lavelle's presence at that time was the result of her appearance as a witness before the Senate. In fact, service was not defective. Moreover, it should be noted that Ms. Lavelle chose to appear voluntarily before the Senate Committee. It alleges the subpoena was ineffective because fees for per diem and travel were not tendered to Ms. Lavelle. In fact, the Rules of the House do not require the tendering of fees or per diem. It challenges the failure to make the Subcommittee's files available to Ms. Lavelle in advance of her testimony so that she may review them and refresh herself as to the areas of the Subcommittee's inquiry. In fact, no witness has the right to such access. Even so, in the spirit of fairness the Chief Counsel to the Subcommittee on two occasions offered to make Ms. Lavelle's personal papers obtained by the Subcommittee available to her for review in advance of her testimony. Finally, the "suit" alleges that there is no legitimate legislative purpose supporting issuance of the subpoena. This is transparently false. The Subcommittee has a significant, continuing, and unquestionable legislative purpose underlying this investigation.

Perhaps the most eloquent evidence of the thoroughly specious quality of this "lawsuit" is that the complaint has, to this day, never been served on any named defendant.

APPENDIX V

OFFICE OF THE CLERK,
U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., March 21, 1983.

[Memorandum]

Re: Civil suits commenced by witnesses to block congressional subpoenas.

Hon. JOHN D. DINGELL,
Chairman, Subcommittee on Oversight and Investigations, Committee on Energy and Commerce.

You have inquired concerning the effect, if any, of a civil suit filed on behalf of a witness subpoenaed to appear before the Subcommittee seeking to enjoin implementation of the subpoena or declare it illegal or unconstitutional.[1]

It is settled beyond peradventure of doubt that the courts will not interfere in the legislative process by way of enjoining implementation of a subpoena or declaring that it is an illegal or unconstitutional exercise of legislative authority. *Eastland* v. *United States Servicemen's Fund*, 421 U.S. 491 (1975).

. . . The issuance of a subpoena pursuant to an authorized investigation is similarly an indispensable ingredient of lawmaking; without it our recognition that the act "of authorizing" is protected would be meaningless. To hold that Members of Congress are protected for authorizing an investigation, but not for issuing a subpoena in exercise of that authorization, would be a contradiction denigrating the power granted to Congress in Art. I and would indirectly impair the deliberations of Congress. 421 U.S. at 505.

Even before the Supreme Court's pronouncement in *Eastland*, the law of this circuit clearly established that a witness could not obtain injunctive or declaratory relief against a congressional subpoena, and attempts to do so have been universally rejected on several grounds.[2] *Pauling* v. *Eastland*, 288 F.2d 126 (1960) (action for declaration that Senate subpoena was unconstitutional); *Cole* v. *McClellan*, 439 F.2d 534 (D.C. Cir. 1970) (same); *Sanders* v. *McClellan*, 463 F.2d 894 (D.C. Cir. 1972) (same); *Ansara* v. *Eastland*, 442 F.2d 751 (D.C. Cir. 1971) (same); *See also, Hearst* v. *Black*, 87 F.2d 68 (1936) (action to enjoin Senate from copying and using telegraphic messages allegedly obtained from illegal search and seizure); *Methodist Federation for Social Action* v. *Eastland*, 141 F. Supp. 729 (D.D.C. 1956) (three-judge court) (action to declare unconstitutional resolution authorizing printing

[1] I understand that the lawyer representing Rita M. Lavelle has filed such a suit, although as of today service of the complaint has not been achieved.

[2] This memorandum will address *only* the threshold issue whether a witness can obtain injunctive or declaratory relief against a congressional subpoena and nothing herein should be construed to concede or recognize the validity of any claims the witness has respecting alleged infirmities in the subpoena. To the extent the witness has such claims, the exclusive avenue for judicial review is through the criminal contempt statute. 2 U.S.C. §§ 192-194.

and distribution of a report charging plaintiffs were a communist front organization); *Doe* v. *McMillan*, 412 U.S. 306 (1973) (action seeking to declare unconstitutional and illegal authorization by committee to print and distribute report).

If there remained a scintilla of doubt concerning the fatal defects in suits against the implementation of congressional subpoenas, those doubts should have been laid to rest last month when Judge John Lewis Smith decided the case of *United States* v. *House of Representatives* Civil Action No. 82-3583 (D.D.C issued Feb. 1, 1983), an action for injunctive and declaratory relief filed against the House and certain of its members by the Department of Justice following the citation of Anne (Gorsuch) Burford for contempt of Congress.

In granting the House of Representatives motion to dismiss the suit, Judge Smith recognized that a witness is confined to challenging a congressional subpoena through the "orderly and often approved means" of the criminal contempt statute.[3]

The statutory provisions concerning penalties for contempt of Congress, 2 U.S.C. § 192 and § 194, constitute "an orderly and often approved means of vindicating constitutional claims arising from a legislative investigation." *Sanders* v. *McClellan*, 463 F.2d 894, 899 (D.C. Cir. 1972). Under these provisions, constitutional claims and other objections to congressional investigatory procedures may be raised as defenses in a criminal prosecution. *United States* v. *House of Representatives*, Civil Action No. 82-3583, *supra*, Slip Op. at 5.

Accordingly, the suit is wholly without basis or validity and the committee may proceed without reference to any such suit.

STANLEY M. BRAND,
General Council to the Clerk.

APPENDIX VI

RULE X. ESTABLISHMENT AND JURISDICTION OF STANDING COMMITTEES

THE COMMITTEES AND THEIR JURISDICTION

1. There shall be in the House the following standing committees, each of which shall have the jurisdiction and related functions assigned to it by this clause and clauses 2, 3, 4; and all bills, resolutions, and other matters relating to subjects within the jurisdiction of any standing committee as listed in this clause shall (in accordance with the subject to clause 5) be referred to such committees; as follows:

* * * * *

(h) Committee on Energy and Commerce.

(1) Interstate and foreign commerce, generally.

* * * * *

(16) Public health and quarantine.

(17) Health and health facilities, except health care supported by payroll deductions.

* * * * *

GENERAL OVERSIGHT RESPONSIBILITIES

2. (a) In order to assist the House in—

(1) its analysis, appraisal, and evaluation of (A) the application, administration, execution, and effectiveness of the laws enacted by the Congress, or (B) conditions and circumstances which may indicate the necessity or desirability of enacting new or additional legislation, and

(2) its formulation, consideration, and enactment of such modifications of or changes in those laws, and of such additional legislation, as may be necessary or appropriate.

the various standing committees shall have oversight responsiblities as provided in paragraph (b).

(b)(1) Each standing committee (other than the Committee on Appropriations and the Committee on the Budget) shall review and study, on a continuing basis, the application, administration, execution, and effectiveness of those laws, or parts of laws, the subject matter of which is within the jurisdiction of that committee, and the organization and operation of the Federal agencies and entities having responsibilities in or for the administration and execution thereof, in order to determine whether such laws and the programs thereunder are being implemented and carried out in accordance with the intent of the Congress and whether such programs should be continued, curtailed, or eliminated. In addition, each such committee shall review and study any conditions or circumstances which may indicate the necessity or desirability of enacting new or additional legislation within the jurisdiction of that committee (whether or not any bill or resolution has been introduced with respect thereto), and shall on a continuing basis undertake future research and forecasting on matters within the jurisdiction of that committee. Each such committee having more than twenty members shall establish an oversight subcommittee, or require its subcommittees, if any, to conduct oversight in the areas of their respective jurisdiction, to assist in carrying out its responsibilities under this subparagraph. The establishment of oversight subcommittees shall in no way limit the responsibility of the subcommittee with legislative jurisdiction from carrying out their oversight responsibilities.

* * * * *

SUPPLEMENTAL VIEWS ON RESOLUTION CONTEMPT AGAINST RITA M. LAVELLE

We take this opportunity to concur in the findings, conclusions, and recommendations of the Committee. The Resolution recommends that the House of Representatives find Rita M. Lavelle, the former Assistant Administrator of the Environmental Protection Agency, in contempt of the House for failure to appear and testify before the Subcommitte on Oversight and Investigations as required pursuant to a subpoena authorized by the Subcommittee on February 10, 1983, issued on February 16, 1983, and served personally on Ms. Lavelle on February 23, 1983.

It serves no purpose to speculate on the testimony that Ms. Lavelle might offer upon her appearance. However, the testimony of Ms. Lavelle is essential to the conduct of the full investigation which the Subcommittee has been pursuing into the administration of the Superfund hazardous waste law. The Subcommittee has conducted 12 days of hearings and interviewed a substantial number of current and former EPA employees in either open or Executive Session in the course of its investigation. Each of these individuals, plus two additional witnesses from the Department of Justice, has appeared before the Subcommittee under subpoena. Each has complied with the Subcommittee's legal process, even though virtually all of the witnesses who have appeared have possessed no prior experience in testifying before Committees of Congress. Further, many of the witnesses may have harbored apprehensions concerning whether the Subcommittee's compulsory process for both their testimony and production of records and documents might have implied Subcommittee examination of their own personal conduct and activity in regard to the Superfund program. Notwithstanding, each of the subpoenaed individuals appeared. Rita Lavelle did not.

We are of the firm view that Ms. Lavelle should be treated no differently than any other witness. She should also be held responsibile for her own conduct. Her position at EPA as Assistant Administrator of the Office of Solid Waste and Emergency Response vested in her the primary responsibility for the administration of the Superfund hazardous waste program and the development of fundamental Agency policy regarding such decisions as the treatment of mining waste, State financial contributions, factors affecting the prioritization of sites, and other issues. Consequently, the current inquiries of the Subcommittee into the Superfund program cannot be concluded without her testimony.

Ms. Lavelle has indicated in past testimony before other Committees of Congress that her actions as Assistant Administrator were always proper. If Ms. Lavelle maintains this view, then we are puzzled as to why she would not welcome the opportunity to come before the Subcommittee on Oversight and Investigations to tell her story. The perception of the public, as well as the Congress, concerning Ms. Lavelle's performance at EPA will certainly not be enhanced by her failure to cooperate and participate in legitimate oversight hearings into this program.

The House cannot fail to act in response to such a flagrant failure of an individual to comply with the duly-authorized, duly-served, and jurisdictionally-appropriate subpoena of one of its Committees or Subcommittees.

The decision on February 10, 1983, by the Oversight and Investigations Subcommittee to authorize the subpoena for Rita Lavelle was made unanimously by voice vote. Following Ms. Lavelle's failure to appear before the Subcommittee on March 21, 1983, the Subcommittee again voted unanimously by voice vote to recommend that she be found in contempt. On April 26, the Full Committee unanimously, by voice vote, adopted the Resolution of Contempt and ordered it reported to the House of Representatives.

We urge our colleagues to send a strong message to those who would flaunt, ignore or repudiate the legitimate legal process of this body and its duly-constituted Committees and Subcommittees.

JAMES T. BROYHILL.
NORMAN F. LENT.
EDWARD R. MADIGAN.
MATTHEW J. RINALDO.
TOM CORCORAN.
WILLIAM E. DANNEMEYER.
BOB WHITTAKER.
DON RITTER.
DAN COATS.
JACK FIELDS.
MICHAEL G. OXLEY.
HOWARD C. NIELSON.

[3] One measure of how well settled the foregoing proposition has become is the relative speed with which the case was dismissed. The complaint was originally filed on December 16, 1982 and the House's motion to dismiss was filed on December 29, 1982. The Department of Justice responded on January 10, 1983 and the case was heard on February 1, 1983 and dismissed two (2) days later.

BUSINESS-HIGHER EDUCATION FORUM RELEASES STUDY ON SCOPE OF AMERICAN COMPETITIVE PROBLEMS

(Mr. LAFALCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAFALCE. Mr. Speaker, in my view the most important long-term economic challenge facing America is to restore its industrial competitiveness in the world marketplace.

Over the past weekend, the Business-Higher Education Forum released a study endorsed by the heads of several major corporations and American universities which outlines the scope of our competitive problems and the need to take immediate action to reverse current trends.

I recommend the report to all Members of the House, and will be providing them with copies of the report later in the week.

Representatives of the Business-Higher Education Forum will be meeting with the President and certain Cabinet officials on May 26, and the Subcommittee on Economic Stabilization will be hosting a breakfast for the group earlier that day.

I hope that both the administration and Members of Congress pay very careful attention to the analysis and recommendations provided in this report. Over the course of the coming year, the House Subcommittee on Economic Stabilization, which I chair, will hold a series of exhaustive hearings into every facet of our country's industrial policy, with the intent of bringing legislation to the House floor during this Congress.

The subcommittee intends to work closely with the Business-Higher Education Forum during this period to help effect some of the changes in Government policy and organization which this group recognizes is needed, if America is to regain its economic strength and stability.

□ 1210

HEALTH INSURANCE FOR THE UNEMPLOYED

(Mr. WAXMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WAXMAN. Mr. Speaker, if time permits before we adjourn I plan today to introduce a bill that will provide health insurance coverage for the unemployed people in our Nation. As many of us have become aware we find ourselves locked into a situation in this country where so much of our health coverage is based on an employee-employer relationship. When we find unemployment expanding as we now see the case with up to around 12 million Americans, they lose their health insurance benefits when they lose their jobs.

We are proposing in this legislation to provide an opportunity for those people to get some kind of health insurance coverage until they get back on their feet and back on a payroll. Unless these people have some special intervention by Government to cover them, they will not have available to them health care services unless they become poor enough to go on welfare and then to be eligible for medicaid.

This is a situation that we ought not to tolerate. People will go without health coverage and their children will go without the basic health services that may be needed to keep them functioning.

Mr. Speaker, I would hope our colleagues would join with us in this legislation. It would provide an opportunity, as we have tied to welfare a medicaid component and to social security the medicare system, to unemployment compensation we would attach a special ability for those who are receiving compensation because they have lost their jobs or who have received unemployment compensation in the past 2 years to be eligible for a very minimum package of benefits.

Our package would provide at the present time 9 hospital stays and 10 outpatient visits, a very modest package of benefits but all that we can afford with the amount of money that has been provided for this purpose in the House-passed budget.

Mr. Speaker, I hope to have the opportunity to present this bill to the House and that the Congress will pass the bill onto the President of the United States to take care of maybe as much as 21 million Americans over the course of a year who would not have available to them health insurance benefits.

WASHINGTON CENTER FOR THE STUDY OF SERVICES: LOOKING OUT FOR CONSUMERS' CHECKBOOKS

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, it is a common complaint that the only news that we hear any more is the bad news; that these days the good people and the good things they do often go unmentioned, if not unnoticed. I would like to reverse that trend by today mentioning an organization whose work has not gone unnoticed—the Washington Center for the Study of Services, publisher of the Washington Consumers' Checkbook.

Founded 7 years ago, the Washington Center for the Study of Services is a nonprofit organization whose purpose is to help consumers get the best quality services at the best possible prices. Employees of the center canvass the area with an eye open to both bargains and rip-offs. Hundreds of consumers are asked to complete surveys in which they rate various firms and the quality of the services the consumer received from them. All of this data is compiled in the Washington Consumers' Checkbook—one of the most accurate and helpful consumer guides available today.

Each Checkbook is devoted to subjects of particular interest to consumers. This spring the center provided consumers with a full issue on individual retirement accounts (IRA's). The report includes a section on commonly asked questions about IRA's and a complete discussion on the various investment options and who offers them—banks, savings and loans, and money market and mutual funds. It also contains a wealth of information on what factors a consumer needs to consider in planning for retirement. The report is filled with wrap-up sections and charts that really bring the information together so that consumers can compare the alternatives. For example, one charts shows what a $2,000 investment would be worth after taxes under the various options. Specific data on more than 100 local institutions and the IRA's they offer is also provided.

Another recent issue includes information on the Washington area's best hospital emergency departments and auto repair shops. Each article contains invaluable pointers on the kinds of factors consumers need to consider in selecting services. For example, the report on hospital emergency departments includes information about the cost and response time of ambulance services, capabilities of emergency room staff, hospital backup facilities and followup care. It gives clear and concise instructions on what a consumer should do and where he or she should go depending on whether the situation is life-threatening, urgent or nonurgent. The article contains a very helpful chart with the ratings various hospitals received on a variety of factors.

The report on auto repair shops is equally impressive. More than 300 Washington area firms are rated on several points including competence, promptness, and cost. The report contains tips on how to choose a shop and how to evaluate a mechanic. Of particular use are charts that lists the shops according to what types of automobiles they repair.

I would like to compliment the center on these articles and on all of its fine work. The publishers of Checkbook are providing consumers with the vital information they need to make informed decisions in the marketplace. My only hope is that the center will eventually be able to expand its activi-

ties to offer similar services to consumers across America.●

PERSONAL EXPLANATION

The SPEAKER. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, on May 12 of last week, I was honored to accept the coveted American Liberties Medallion of the American Jewish Committee at its annual meeting in New York. The medallion is the highest honor that can be bestowed by that distinguished organization.

Due to this significant occasion I was forced to be absent during a portion of the afternoon and regret missing the following votes, on which I could not be paired, or express a preference: Rollcall No. 110, Gregg amendment to H.R. 2066, the National Science Foundation Authorization Act for fiscal year 1984; rollcall No. 112, the Science and Technology Committee amendment—providing for later authorization of fiscal year 1984 Clinch River breeder funding—to H.R. 2587, the Department of Energy Civilian Research and Development Authorization Act for fiscal year 1984; rollcall No. 113, Mineta amendment to the same bill; rollcall No. 114, Winn amendment in the nature of a substitute to the same bill; rollcall No. 115, Rangel amendment to the same bill; and rollcall No. 116, on passage of the bill.

Had I been present I would have voted "no" on rollcall No. 110, the Gregg amendment; "aye" on rollcall No. 112, the committee amendment; "aye" on rollcall No. 113, the Mineta amendment; "no" rollcall No. 114, the Winn amendment; "aye" on rollcall No. 115, the Rangel amendment; and "aye" on rollcall No. 116, on passage of H.R. 2587.●

BAIL REFORM LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 5 minutes.

● Mr. KASTENMEIER. Mr. Speaker, today, I am pleased to introduce a bill to modify the provisions of the Bail Reform Act of 1968. The text of the bill is derived from the position adopted by the Judicial Conference of the United States in its March 1983 meeting. In addition, the basic approach taken in the bill comports with the position of the American Bar Association and other leading legal organizations.[1]

Crime and fear of crime pervades much of the discussion in legislative bodies across the country. Frequently, these discussions have been critical of the practices of various courts with respect to the question of when and whether to release a person before trial. Much of the rhetoric on this subject focuses on the cases of crimes committed by persons while on pretrial release. Such concerns are legitimate, but in my view, an exclusive focus on such events may produce misleading public policy results.

Any assessment of pretrial practices must weigh the competing values and interests at stake at the pretrial stage of the criminal process. Persons charged with crimes are presumed innocent and have certain constitutional rights that must be protected. Among the rights protected are the right to a fair trial, the right to due process, to be free from excessive bail, and to be free from cruel and unusual punishment. As with all constitutional rights, these individual liberties inure to the benefit of all citizens.

Among the values that coexist with the aforementioned constitutional protections are the right of the public to domestic tranquility, the need to preserve scarce public resources, and the desire for a speedy adjudication of criminal cases.

In order to effectuate this balance, policymakers must be extremely cautious about assessing the nature of the systemic problems before attempting to legislate. For this reason, the Subcommittee on Courts, Civil Liberties, and the Administration of Justice, which I chair, will hold a series of oversight hearings in June concerning current bail practices. The witnesses for these hearings will include representatives of the Judicial Conference of the United States, the U.S. Department of Justice, leading researchers and academicians in the field. Through these hearings, it is my hope that the subcommittee will be able to answer the following questions:

First. How frequently is money bail used? Which types of money bail practices prevail? To what extent do prosecutors and the courts inquire into the sources of pretrial security?

Second. To what extent is crime committed by persons while on release pending trial? What types of crimes are involved? What is the conviction rate for such offenses? What are the current penalties for pretrial crime? Are concurrent or consecutive sentences used? Are the penalties for nonappearance proportionate to the severity of the offenses where nonappearance is most frequent? How frequently is excessive money bail used as a sub rosa method of achieving pretrial detention of an allegedly dangerous offender?

Third. How do the Federal pretrial and State pretrial systems differ? With respect to the issues listed above? Does each system have different types of offenders?

Fourth. What is the efficacy of pretrial services and pretrial diversion on increasing appearance rates, and on reducing pretrial criminality?

Fifth. How many States permit pretrial detention based on prediction or assessment of dangerousness? Has the constitutionality of such provisions been upheld in the courts? What have been the results of these provisions with respect to jail overcrowding and reduction in pretrial crime?

Sixth. What is the current state of the art with respect to predictions of dangerousness? How accurate are such predictions; that is, false positives and false negatives?

Seventh. Are the various proposed Federal pretrial detention statutes constitutional?

CONCLUSION

The bill I am introducing today represents a valid attempt to resolve some of the legal and policy questions presented in the pretrial area. I know other Members have different points of view on this subject. I hope that in the months ahead we can work together to fashion a legislative response that is based on the realities of the current Federal pretrial system. Through the hearing process, we will begin the winnowing process that is central to a tempered, measured, and proportionate legislative initiative in this area.●

[1] The bill contains the following provisions relating to the Federal criminal justice system:

(a) Courts are permitted to assess dangerousness in deciding which conditions to impose on a released defendant;

(b) The use of financial conditions to assure community safety is prohibited;

(c) The authority of the courts to detain a person who is a flight risk is clarified;

(d) A mandatory condition of not committing a new crime is imposed on all releasees;

(e) Persons who are released and who, after a hearing, are found to have committed a new offense may be detained pending trial;

(f) The authority of the courts and prosecutors to inquire into the sources of money bail is clarified;

(g) The Government is granted the right to appeal from release decisions;

(h) The standard of review for release decisions after conviction is clarified to place the burden on the defendant; and

(i) The entire Bail Reform Act is sunsetted after 5 years so as to guarantee a prompt congressional review of these changes.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. MICHEL (at the request of Mr. LOTT), for today and the balance of the week, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore, entered, was granted to:

(The following Members (at the request of Mr. RICHARDSON) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 30 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. KASTENMEIER, for 5 minutes, today.
Mr. LAFALCE, for 5 minutes, today.
Mr. RODINO, for 60 minutes, May 19.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. PASHAYAN) and to include extraneous matter:)

Mr. GREEN.
Mr. PORTER.

(The following Members (at the request of Mr. RICHARDSON) and to include extraneous matter:)

Mr. MILLER of California.
Mr. AUCOIN.
Mr. HARRISON.
Mr. RODINO.
Mr. MINISH.
Mr. SISISKY.
Mr. CLAY.
Mr. RATCHFORD.
Mr. RANGEL.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 884. An act to provide for the use and distribution of funds awarded the Red Lake Band of Chippewa Indians in docket numbered 15-72 of the U.S. Court of Claims; to the Committee on Interior and Insular Affairs.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 957. An act to provide for an increase in the number of members of the Congressional Award Board, and for other purposes.

ADJOURNMENT

Mr. RICHARDSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 15 minutes p.m.) the House adjourned until tomorrow, Tuesday, May 17, 1983, at 12 o'clock noon.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports of various House committees concerning the foreign currencies and U.S. dollars utilized by them during the first quarter of calendar year 1983 in connection with foreign travel pursuant to Public Law 95-384 are as follows:

[1] Per diem constitutes lodging and meals.
[2] If foreign currency is used, enter U.S. dollar equivalent; if U.S. currency is used, enter amount expended.
[3] Military aircraft was used. This is the actual cost of flights on a pro rata basis. Costs were incurred for ground transportation by the Department of State.
[4] These figures reflect per diem as well as additional subsistence provided to cover unanticipated additional expenses while in official travel status.

DAN ROSTENKOWSKI, Chairman, Apr. 28, 1983.

EXECUTIVE COMMUNICATIONS ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1136. A letter from the Secretary of Housing and Urban Development, transmitting a report on the adequacy, effectiveness, and equity of the formula used for allocation of funds under title 1 of the Housing and Community Development Act of 1974, pursuant to section 113 of Public Law 96-399; to the Committee on Banking, Finance and Urban Affairs.

1137. A letter from the Secretary of the Department of Education, transmitting a draft of proposed legislation to increase the authorization of appropriations levels for certain education programs, and for other purposes; to the Committee on Education and Labor.

1138. A letter from the Secretary of Education, transmitting proposed final priorities for the training program for special programs staff and leadership personnel, pursuant to section 431(d) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

1139. A letter from the Secretary of Education, transmitting proposed final regulations establishing the 1984-85 Pell grant family contribution schedule, pursuant to section 124 of Public Law 97-92, section 482(a)(2) of the Higher Education Act of 1965, as amended, and section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

1140. A letter from the executive director, American Chemical Society, transmitting the annual report and audit of the organization for calendar year 1982, pursuant to section 3 of Public Law 88-504; to the Committee on the Judiciary.

1141. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the National Climate Program Act to authorize appropriations for the carrying out of the provisions of such act, and for other purposes; to the Committee on Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[Pursuant to the order of the House on May 12, 1983, the following reports were filed on May 13, 1983]

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 2355. A bill to establish an emergency program of job training assistance for disabled veterans and veterans of the Vietnam era; with an amendment (Rept. No. 98-116). Referred to the Committee of the Whole House on the State of the Union.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 2920. A bill to amend title 38, United States Code, to revise and extend certain health-care programs of the Veterans' Administration, and for other purposes. (Rept. No. 98-117). Referred to the Committee of the Whole House on the State of the Union.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 2948. A bill to amend title 38, United States Code, to authorize the Administrator of Veterans' Affairs to provide mortgage assistance to veterans with loans guaranteed by the Veterans' Administration in order to avoid foreclosure of such loans, and for other purposes; with an amendment (Rept. No. 98-118). Referred to the Committee of the Whole House on the State of the Union.

No. 98-133, Pt. I). Ordered to be printed.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries: H.R. 2809. A bill to establish a U.S. Fish and Wildlife Foundation; with an amendment; referred to the Committee on Ways and Means for a period ending not later than July 15, 1983, for consideration of such provisions of the bill and amendments as fall within the jurisdiction of that committee pursuant to clause 1(v), rule X (Rept. No. 98-134, Pt. I). Ordered to be printed.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 2676. A bill to authorize appropriations through fiscal year 1984 for the National Aquaculture Act; with an amendment; referred to the Committee on Agriculture for a period ending not later than June 1, 1983, for consideration of such portions of the bill and amendment as fall within its jurisdiction pursuant to claude 1(a), rule X (Rept. No. 98-155, Pt. I). Ordered to be printed.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 2970. A bill to amend the Federal Trade Commission Act to extend the authorization of appropriations contained in such act, and for other purposes; with amendments; referred to the Committee on the Judiciary for a period ending not later than June 15, 1983, for a period ending not later than June 15, 1983, for consideration of such provisions of the bill as fall within its jurisdiction pursuant to clause 1(m), rule X (Rept. No. 98-156, Pt. 2). Ordered to be printed.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 2062. A bill to amend title III of the Marine Protection, Research, and Sanctuaries Act of 1972; with an amendment; referred to the Committee on the Judiciary for a period ending not later than June 15, 1983, for consideration of such provisions of the bill and amendment as fall within that committee's jurisdiction pursuant to clause 1(m), rule X (Rept. No. 98-187, Pt. I). Ordered to be printed.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 2498. A bill to establish a Congressional Advisory Commission on Boxing; referred to the Committee on Education and Labor for a period ending not later than June 1, 1983, for consideration of such provisions of the bill as fall within the jurisdiction of that committee pursuant to clause 1(g), rule X, (Rept. No. 98-188, Pt. I). Ordered to be printed.

Mr. BOLAND: Permanent Select Committee on Intelligence. H.R. 2968. A bill to authorize appropriations for fiscal year 1984 for intelligence and intelligence-related activities of the U.S. Government, for the intelligence community staff, for the Central Intelligence Agency retirement and disability system, and for other purposes; referred to the Committee on Armed Services for a period ending not later than May 30, 1983, for consideration of such portions of the bill as fall within its jurisdiction pursuant to clause 1(c), rule X (Rept. No. 98-189, Pt. I). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MITCHELL:

H.R. 3020. A bill to amend the Small Business Act, and for other purposes; to the Committee on Small Business.

By Mr. WAXMAN (for himself, Mr. MADIGAN, Mr. DINGELL, Mr. SCHEUER, Ms. MIKULSKI, Mr. WYDEN, Mr. ECKART, Mr. SIKORSKI, Mr. OTTINGER, Mr. FLORIO, Mr. SHARP, Mr. DOWDY of Mississippi, Mr. FORD of Tennessee, Mr. JACOBS, Mr. GEPHARDT, Mr. LENT, Mr. RINALDO, Mr. TAUKE, Mr. NIELSON of Utah, Mr. WIRTH, Mr. RICHARDSON, Mrs. COLLINS, Mr. CORCORAN, Mr. WALGEN, Mr. LUKEN, Mr. LELAND, Mr. O'BRIEN, and Mrs. MARTIN of Illinois):

H.R. 3021. A bill to amend the Social Security Act to provide for a program of grants to States to provide health care benefits for the unemployed, and for other purposes; to the Committee on Energy and Commerce.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

130. The SPEAKER presented a memorial of the Legislature of the Territory of Guam, relative to the Clean Air Act; to the Committee on Energy and Commerce.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 5: Mr. PRITCHARD, Mr. STUDDS, Mr. FORSYTHE, Mr. HUGHES, Mr. BIAGGI, Mr. WHITEHURST, Mr. NATCHER, Mr. WYDEN, Mr. OBERSTAR, Mr. FORD of Tennessee, Mr. GUARINI, Mr. DE LA GARZA, Mr. BENNETT, Mr. SUNIA, Mr. LAFALCE, Mr. DWYER of New Jersey, Mr. EDGAR, Mr. TALLON, Mr. BOSCO, Mr. LOWRY of Washington, Mr. HERTEL of Michigan, Mr. BEVILL, Mr. FRANK, Mr. FOGLIETTA, Mr. BONKER, Mr. MRAZEK, Mr. SWIFT, Mr. ROSE, Mr. ECKART, Mr. HUTTO, Mr. GEJDENSON, Mr. MATSUI, Mr. DAVIS, Mr. PANETTA, Mr. FUQUA, Mr. MITCHELL, Mr. DYSON, Mr. LELAND, Mr. MORRISON of Washington, Mr. BONIOR of Michigan, Mr. RATCHFORD, Mrs. KENNELLY, Mr. LONG of Louisiana, Mr. LEHMAN of Florida, Mr. BARNARD, Mrs. JOHNSON, Mr. SPRATT, Mr. FEIGHAN, Mr. LIPINSKI, Mr. SCHEUER, Mr. LEVINE of California, Mr. ANDREWS of North Carolina, Mr. THOMAS of Georgia, Mr. OTTINGER, Mr. MCKERNAN, Mr. TOWNS, Mr. WON PAT, Mr. DOWNEY of New York, Mr. MOAKLEY, Mr. FAZIO, Mr. CHAPPELL, Mr. MARKEY, Mr. EDWARDS of California, Mrs. BOXER, Mr. BEILENSON, Mr. DYMALLY, Mr. PATTERSON, Mr. BARNES, Mr. OWENS, Mr. BERMAN, Mr. LEVIN of Michigan, Mrs. BOGGS, Mrs. HOLT, Mr. STOKES, Mr. MAVROULES, Mr. DONNELLY, Mr. CARPER, Mr. MINISH, Mr. DERRICK, Mr. CORRADA, Mr. MCKINNEY, Mr. HEFTEL of Hawaii, Mr. MILLER of California, Mr. VALENTINE, Mr. HARTNETT, Mr. MORRISON of Connecticut, Mr. WEAVER, Mr. CHANDLER, Mr. DE LUGO, Mr. LUNDINE, Mr. BRITT, Mr. TAUZIN, Ms. MIKULSKI, Mrs. SCHNEIDER, Mr. BREAUX, Mr. ORTIZ, Mr. DICKS, Mr. ANDERSON, Mr. FASCELL, Mr. MINETA, Mr. MCDADE, Mr. HOYER, Mr. BATEMAN, Mr. LENT, Mr. RODINO,

Mr. ST GERMAIN, Mr. LANTOS, Mr. WAXMAN, Mr. HUBBARD, Mr. BORSKI, Mr. NEAL, Mr. WHITLEY, Mr. HEFNER, Ms. OAKAR, Ms. SNOWE, and Mr. NELSON of Florida.

H.R. 216: Mr. BILIRAKIS.

H.R. 679: Mr. MARTIN of New York and Mr. MURPHY.

H.R. 1036: Mr. BERMAN.

H.R. 1254: Mrs. MARTIN of Illinois.

H.R. 1441: Mr. SENSENBRENNER and Mr. WILSON.

H.R. 1596: Mr. DOWNEY of New York, Mr. FRANK, Mr. FLORIO, Mr. WOLPE, Mr. HORTON, Mr. STUDDS, Ms. MIKULSKI, Mr. D'AMOURS, Mr. RATCHFORD, Mr. FAZIO, Mr. JEFFORDS, Mr. KILDEE, Mr. WILLIAMS of Montana, Mr. HUGHES, Mr. LEVINE of California, Mr. PANETTA, Mr. MRAZEK, and Mr. ACKERMAN.

H.R. 1643: Mr. LANTOS.

H.R. 1652: Mr. BROWN of Colorado.

H.R. 1700: Mr. TALLON.

H.R. 1701: Mr. BROYHILL, Mr. DAUB, Mr. MORRISON of Washington, and Mrs. SCHROEDER.

H.R. 1797: Mr. FASCELL, Mr. MARTINEZ, and Mr. SMITH of New Jersey.

H.R. 1920: Mr. LENT, Mr. LEWIS of Florida, Mr. WORTLEY, Mr. KASICH, Mr. SMITH of New Jersey, Mr. GEKAS, Mr. STOKES, Mr. ROE, Mr. HUTTO, and Mr. OLIN.

H.R. 1937: Mr. TALLON.

H.R. 2054: Mr. EDGAR, Mr. VENTO, and Mr. MORRISON of Connecticut.

H.R. 2076: Mr. MARTIN of New York, Mr. PORTER, Mr. WYLIE, Mr. GUARINI, Mr. FAZIO, and Mr. CLINGER.

H.R. 2131: Mr. MITCHELL and Mr. SWIFT.

H.R. 2163: Mr. CORRADA, Mr. WEAVER, Mr. JEFFORDS, Mr. SWIFT, Mr. VANDER JAGT, Mr. JONES of North Carolina, Mr. BREAUX, Mr. FORSYTHE, and Mr. HUTTO.

H.R. 2676: Mr. HUGHES.

H.R. 2722: Mr. HUGHES.

H.R. 2809: Mr. WOLF, Mr. OLIN, Mr. REGULA, Mr. CONTE, Mr. YOUNG of Alaska, Mrs. SCHROEDER, Mr. MICA, Mr. BOLAND, Mr. MURTHA, Mr. JONES of North Carolina, Mr. COELHO, Mr. LUJAN, Mr. THOMAS of Georgia, and Mr. FOLEY.

H.R. 2852: Mr. SENSENBRENNER and Mr. SAWYER.

H.R. 2992: Mr. FASCELL.

H.R. 3002: Mr. HUCKABY and Mrs. BOGGS.

H.J. Res. 103: Mr. FASCELL.

H.J. Res. 139: Mr. LIVINGSTON, Mr. NICHOLS, Mr. PORTER, Mr. SHELBY, Mr. HEFNER, Mr. BARTLETT, Mr. RICHARDSON, Mr. SMITH of New Jersey, Mr. SCHUMER, Mr. BROYHILL, Mr. FISH, Mr. PARRIS, Mr. DANIEL, Mr. FAZIO, Mr. LANTOS, Mr. FLIPPO, and Mr. ROBINSON.

H. Con. Res. 95: Mr. ANNUNZIO, Mr. WHITEHURST, Mr. FROST, Mr. KILDEE, Mr. ROE, Mr. MOLLOHAN, Mr. MAVROULES, Mr. D'AMOURS, Mr. WALGREN, Ms. MIKULSKI, Mrs. BOXER, Mr. WOLPE, Mr. SMITH of Florida, Mr. HOWARD, Mr. DYSON, Mr. MCNULTY, Mr. FORSYTHE, Mr. EDGAR, Mr. LEHMAN of California, Mr. MCGRATH, Mr. LELAND, Mr. HALL of Ohio, Mr. MCKINNEY, Mr. MATSUI, Mr. LOEFFLER, Mr. HERTEL of Michigan, and Mr. HARKIN.

H. Con. Res. 112: Mr. BERMAN, Mr. HOYER, Ms. KAPTUR, and Mr. LEHMAN of Florida.

H. Res. 17: Mr. ANTHONY, Mr. CAMPBELL, Mr. CONABLE, Mr. DORGAN, Mr. EDWARDS of Alabama, Mr. FLIPPO, Mr. GRADISON, Mr. JONES of North Carolina, Mr. OLIN, and Mr. ROSTENKOWSKI.

H. Res. 155: Mr. CARPER, Mr. DEWINE, Mr. STRATTON, Mr. TRAXLER, and Mr. UDALL.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

93. By the SPEAKER: Petition of the Council of the County of Maui, Hawaii, relative to native Hawaiians; to the Committee on Interior and Insular Affairs.

94. Also, petition of the Tinian Land Owner's Association, Tinian, Northern Marina Islands, relative to compensation for private property; to the Committee on Interior and Insular Affairs.

95. Also, petition of the Commission to Study Professional Boxing and Wrestling in Rhode Island, Providence, R.I., relative to professional boxing and wrestling in Rhode Island; jointly, to the Committees on Energy and Commerce and Education and Labor.

EXTENSIONS OF REMARKS

ROLE OF FEDERAL GOVERNMENT IN EDUCATION EXCELLENCE

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. AuCOIN. Mr. Speaker, the United States is poised on the brink of a technological revolution, a revolution that will change the face of literally every workplace across the country. The coming age will be one of knowledge intensity, and there can be no other conclusion than that our Nation is more dependent than ever on a highly educated work force.

It is frightening, therefore, to contemplate the implications of the report of the Commission on Excellence in Education. The Commission documented that graduates of high schools and colleges do not have the necessary math, science, and foreign language skills to get by. I believe that if the United States cannot prepare trained minds for the change that is underway, then the economic, social, and military security of this country will be at risk.

If we do not teach the basics now, we will pay for it later. We will pay for it in higher costs to American business which last year spent over $30 billion to retrain employees, too many of them high school and college graduates with inadequate skills. We will pay for it in higher unemployment rates for college and high school graduates. And we will pay for it in a diminished ability to compete with other nations that understand what investing in education means to their economic future, and are making those investments now.

On April 27, I, along with GEORGE MILLER, PAUL SIMON, and TONY COELHO, introduced House Concurrent Resolution 118, a concurrent resolution recommitting the Federal Government to our Nation's future by affirming that it is the national policy that the Federal Government contribute to the support of public education from elementary through the secondary levels.

House Concurrent Resolution 118, which has over 40 cosponsors, is in no way intended to usurp local efforts or local control of education. The resolution is an effort to provide guidelines so that Congress and the executive branch can structure policy and funding in a way that will strengthen State and local efforts now, and in the years to come.

The following statement, adopted by the National Association of State Boards of Education, serves as a useful reminder of the vital role the Federal Government has played in encouraging educational excellence. The statement traces the history of Federal involvement and calls for the cooperative and coordinated functioning of all levels of government to insure the vitality of our schools in the years ahead.

NASBE'S POSITION ON THE FEDERAL ROLE IN EDUCATION AS ADOPTED BY THE BOARD OF DIRECTORS

Does the federal government have a role in education? What is that role? What are the responsibilities of the federal government regarding the education of the children and youth of our nation? Responses to questions such as these are of paramount importance.

The debate over the "New Federalism" and the search for program reductions to narrow the ever-increasing federal budget deficit have made it imperative to consider carefully the federal role in education. Furthermore, increased fiscal constraints at the local, state and national levels have caused a reexamination of priorities for education expenditures.

Our nation's commitment to education is not new. Since the ruling class in this country is its citizens, a major concern of our founding fathers was how to educate these citizens to ensure that they might effectively govern themselves. Because "knowledge is in every country the surest basis of public happiness," George Washington in the first annual presidential address to the Congress, stated that nothing better deserved congressional patronage than the promotion of science and literature. A lodestar of his political philosophy was his belief that education is an essential attribute of a democratic society and contributes to the security of a free people. In his Farewell Address he again urged Congress to promote "as an object of primary importance, institutions for the general diffusion of knowledge," because "it is essential that public opinion should be enlightened."

Washington's concern with education has been shared by our national leaders ever since, resulting in extensive federal involvement in education, beginning with the Land Ordinance of 1785 which provided that certain lands in each new state be set aside for public education. The Morrill Act of 1862—the land grant college act—promoted education in agriculture and the mechanical arts. The Smith-Hughes Act of 1917, the forerunner of the Vocational Education Act, fostered schooling for a variety of occupations. In the 1940s, federal concern for the education of our returning veterans resulted in the Full Employment and Training Act of 1946—the GI Bill. The National Defense Education Act of 1959 was designed to promote math, science and language instruction. In 1965, the federal commitment to equal educational opportunity led to the enactment of the Elementary and Secondary Education Act. These examples suggest some of the critical national purposes underlying the federal role in education, ranging from economic development to national security to ensuring an equitably educated citizenry.

Much of the current debate over the federal role in education is based on a misunderstanding of the provision of the Tenth Amendment to the Constitution, which reserves to the state those powers not specifically granted to the federal government. That amendment does not prohibit federal government financing of education, any more than the Constitutional provision for a state militia prohibits federal financing of the National Guard. Indeed, widespread national agreement exists that the federal government should play an important role in education. It is necessary, then, to define that role in terms of national needs and aspirations and to coordinate federal, state and local government responsibilities.

In a country with a rich and diverse educational system that offers a mosaic of opportunities to students rather than assigning them to a predetermined role, and which is committed to citizen leadership at the state and local level, widespread agreement exists as to the overall goals of our educational system, kindergarten through post-doctoral. In abroad outline this consensus holds that:

1. All students should have access to a free public education regardless of sex, handicapping condition, race, national origin, or economic background.

2. Students should leave secondary school with an education that includes mastery of:

(a) the basic skills of reading, writing, mathematics;

(b) an understanding of United States history, and an overview of the history, geography, and culture of other countries;

(c) an understanding of science and technology;

(d) the ability to reason and solve problems;

(e) an understanding of our government;

(f) an appreciation of the arts and humanities.

3. Students should have the opportunity in the first twelve grades to prepare adequately for work, further training, or additional education in institutions of higher education.

4. The educational system should be one which:

(a) provides a reasonably appropriate number of doctors, carpenters, math teachers, computer experts—a diversity of workers;

(b) is accessible to those who have left formal schooling and who wish to return to the educational system at a later date;

(c) encourages students of all abilities to reach for higher levels of achievement.

5. The educational system should set standards, as well as encourage and recognize achievement.

How do the various governmental entities work together to achieve these ends, and how can they achieve them at a time of dra-

matic change in the world? We are living in a nation which is on the brink of an explosion of new knowledge. We are also experiencing an increasingly transient population, a dramatic shift in demographics, far greater pupil awareness of possibilities and impossibilities for their world, and a growing disparity in the distribution of world resources. Our national survival depends on the capacity of our citizens and government to respond to these conditions.

If we look at our objectives for education against this backdrop, it is clear that all levels of government must function cooperatively and in a coordinated fashion.

The federal role should be one of national leadership and coordination based on an awareness of national needs. As in the past, it should include concerns for access and equity, support for special populations, human capital development, research, innovation and development activities. The federal government has the widest financial base, broadest perspective on national needs, the ability to distribute resources equitably, and the responsibility to protect national concerns.

Federal financial assistance should supplement the efforts of states and local school districts, and federal education legislation would contain provisions which conform to the following guidelines:

1. Flexibility should be allowed both SEAs and LEAs under both federal statutes and regulations;

2. Programs with similar purposes and reaching a common population should be consolidated;

3. Forward-funding should be maintained with no rescissions or deferrals, in order to meet the planning needs of states and local districts;

4. Fiscal accountability and audit responsibilities should be clearly defined;

5. Whenever possible, federal funds should flow through SEAs so that state and local programs may be coordinated;

6. Federal mandates should provide adequate funding to SEAs and LEAs to implement the mandates.

The federal role in education should be coordinated with the states' efforts. The states should set educational standards and evaluate their educational progams. They should provide demonstration and dissemination projects, collect data, increase educational quality, provide funds to equalize educational opportunity within each state, allocate federal funds within the state, and coordinate reporting or accounting for these funds to the federal government.

The role of the local school board or government should be to set educational standards for its district; operate school programs; respond to parental, student and community concerns; provide local financial management and accountability, and provide financial support for district programs.

To meet our country's educational goals, each level of government must contribute to the whole. The local school district, with its knowledge of district needs, has the responsibility to operate the schools. The state, based on an awareness of local needs must provide leadership, set standards, and provide financial support. The federal government should be supportive of both states and local districts, and should address national needs, provide for research and assessment, ensure access to the educational system, and provide a broad base of financial support.

Such a coordinated and mutually supportive system would strengthen the total educational enterprise and do much to develop our most valued resource—the citizens of the nation.

If education is Will and Ariel Durant's "transmission of civilization," and if education contributes to the security of a free constitution, then it is also educator George Peabody's "debt due from present to future generations." Our job as a nation, indeed as a federal government, is to ensure that this debt is paid in sound currency.●

BAN ARMOR-PIERCING BULLETS

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. MINISH. Mr. Speaker, National Police Week, May 15 to 20, is an appropriate time to discuss an issue of keen importance to law enforcement officers all over the country: bullets designed for the purpose of penetrating bulletproof vests of the type usually worn by police.

I think that it is a scandal that these devices, which have no legitimate sporting purpose and in fact are designed specifically to kill human beings, are allowed to circulate on the open market with no restriction other than the manufacturers's assertions that only law enforcement agencies ought to buy them. These lethal products should not exist at all, but if they must, they certainly should be available only to law enforcement people. If we cannot prevent their falling into the hands of criminals in any other way, we should prevent their manufacture or sale.

Mr. Speaker, events over the last year or so in my home State of New Jersey help bring home the vital importance of these bullets. We have seen instances of officers who were not wearing bulletproof vests killed, and at least one instance in which body armor saved the life of an officer who was wearing it. Towns in my own district and elsewhere have conducted successful fundraising drives to equip their police with protective body armor, just as the people here in the District of Columbia are doing now. It is a scandal, then, that we still permit the indiscriminate distribution of bullets which render this lifesaving equipment useless.

Since our distinguished colleague, Mr. BIAGGI, brought national attention to the threat these special bullets pose not only to police but to the public in general, a number of States have passed legislation against them. I am proud to be one of the sponsors of his H.R. 953 as well as sponsor of a bill of my own, H.R. 641; I also gave testimony in favor of such legislation during the last Congress. I sincerely hope that we will deal with this legislation, sponsored by over 100 of our colleagues, before any more police deaths bring home to us the need for it. Law enforcement agents put their lives on the line for us every day, and surely we owe them—and ourselves—a modicum of protection.

I hope that even more of our colleagues will join in sponsoring this life-or-death legislation and in working to bring it to the floor. Let us underscore the words of support which we speak during National Police Week with action on their behalf.●

MR. LARRY A. WREYFORD

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. MATSUI. Mr. Speaker, to a great degree, we in the Congress must function as the people's watchdog on the Federal bureaucracy, the eyes and ears—and the voice—of our constituents on this Government. Thanks to our work in this capacity, countless instances of wrongdoing or simple mismanagement have been exposed over the years.

Mr. Speaker, there is natural tendency on the part of all of us to focus on what went wrong. Today I am very happy to draw to the House's attention an instance where things have gone right—and much to the benefit of the American taxpayer.

An employee at McClellan Air Force Base in Sacramento, Calif., has been credited with an idea that will save the Air Force nearly $110 million over a 2-year period. This is a story of a conscientious Government employee who turned his years of experience, considerable skill and good sense to ways to make things work better, and in this we all benefit.

Mr. Larry A. Wreyford of Sacramento is a program manager for aircraft ground support generators and other equipment at McClellan Air Force Base. His dedication will save taxpayers money and facilitate the operations at Air Force bases across the country for years to come.

Mr. Wreyford, a native of Texas, entered military service in 1942. He was a B-17 pilot in the 305th bomb group of the 8th Air Force during World War II. He was shot down over Germany on September 3, 1944 and was a prisoner of war at Stalag Luft-1 until liberated by the Russians in May 1945.

Returning to the United States, he began a logistics career with the Air Force that has continued to this day. Following his retirement from uniform service in May 1963, he began his civil service career at McClellan Air Force Base in 1964.

Mr. Speaker, I wish to use this opportunity today to express respect for Mr. Wreyford, who has given years of outstanding public service to the Air Force and to this Nation. He is ad-

mired by his coworkers and held in very high esteem by the entire McClellan Air Force Base community. Today, on the occasion of the visit by the Sacramento Chamber of Commerce to Washington, his effort are being acknowledged by his fellow Sacramentans.

On behalf of taxpayers and the Congress, I wish to extend warm congratulations to Mr. Wreyford on his outstanding achievement.●

NATIONAL SMALL BUSINESS WEEK

HON. DAN SCHAEFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. SCHAEFER. Madam Speaker, our Nation was founded on the principles of free thought, free speech, and free enterprise. From this base, America has become preeminent in the world because we are free to work as we wish and achieve what our talents will allow.

Small business exemplifies this tradition of hard work and achievement and has become the wellspring of creativity in product development and innovative business practices.

Small businessmen start with an idea. They struggle against the odds, take on the risks, and may never see their hopes come to fruition. But for those that are successful, the rewards can be substantial. In the meantime, their successes create jobs and their innovations improve the quality of our lives.

The energy and aptitude of America's small businessmen have made our Nation the leader in the business world. Their spirit and strength of purpose are vital to the Nation's continued growth and economic well-being. I am delighted that I have a special opportunity as a member of the Small Business Committee to insure that the Nation's innovators, creators, and entrepreneurs have conditions that will allow them to prosper and that they have proper incentives and opportunities for new ventures.

This week is national Small Business Week. This is a time to celebrate for all those who believe in our system of free enterprise and in the fundamental importance of the freedom to work and achieve.●

FRANCIS A. MULHERN OF THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. RODINO. Mr. Speaker, it is an honor to give recognition to a man who, for over three decades, has served the public with great distinction and unfailing dedication. This man is Francis A. Mulhern, an outstanding member of the legal profession who has accomplished much for which his native State of New Jersey can be proud. Art Mulhern will retire this month after 34 years in public service. His career encompasses those qualities which foster an efficient and effective government while, at the same time, protect the public interest. These are indeed the highest ideals of government service. It is therefore fitting that we recognize Art Mulhern for his accomplishments and contributions to the public good.

Graduating cum laude, Mr. Mulhern received his A.B. degree from the University of Notre Dame in 1938. Continuing his record of academic excellence, he went on to receive his juris doctorate from the Law School of Harvard University in 1941. After completing his studies at Harvard, he worked as a law clerk for a private attorney and counselor-at-law until going on active duty in the U.S. Naval Reserve. Mr. Mulhern is a veteran of World War II, having served on active duty from 1942 until 1946; in 1953 he transferred to the Retired Reserve.

After his service in the Naval Reserve, Mr. Mulhern returned to New Jersey where he was admitted to the New Jersey bar. Beginning his career with the Port Authority of New York and New Jersey in 1949, Mr. Mulhern established himself as an outstanding spokesman for the organization and unrivaled practioner of general law. Throghout his career with the port authority, Mr. Mulhern has repeatedly demonstrated his legal expertise while maintaining the very highest standards of personal and professional integrity. His steadfast devotion and diligence have greatly contributed to the extraordinary reputation that the port authority enjoys in all its legal representations.

Mr. Mulhern started his port authority career as an attorney in what was then the general division of the law department. In 1972, he was promoted to his current position as deputy general counsel. He has continued to hold this post with great distinction and honor.

It is no exaggeration to state that Mr. Mulhern's exceptional legal expertise has been evident in every State and Federal court case in which the port authority has been a party, as well as in every Federal administrative proceeding which he has conducted on its behalf. Mr. Mulhern has demonstrated, throughout his career, that he is far more than just a successful litigator. In an age of legal specialization, he is still an unequaled generalist. Art Mulhern's dedication and outstanding ability represent the highest ideals of his profession.

His outstanding record of achievement and his long and distinguished career of service have made Art Mulhern an exceptional public servant who will be deeply missed when he retires this month.●

DISCLOSURE OF NET WORTH

HON. WILLIAM R. RATCHFORD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. RATCHFORD. Mr. Speaker, as I have done every year since 1971, when I was a member of the Connecticut Legislature, I am today disclosing a statement of my net worth and an accounting of income and taxes paid for calendar year 1982. While I realize this disclosure goes beyond what is required by law, I feel that such an accounting is a responsibility of public office.

The following is a statement of assets, liabilities, and capital as of December 31, 1982, and a statement of income and taxes paid for tax year 1982. This statement covers myself and my wife Barbara J. Ratchford:

WILLIAM R. RATCHFORD FINANCIAL STATEMENT

The following is a statement of assets, liabilities and capital as of December 31, 1982, and covers both William R. Ratchford and his wife, Barbara J. Ratchford.

1982 income:

William R. Ratchford, salary, U.S. House of Representatives	$60,662.50
Barbara J. Ratchford, salary, Arlington Board of Education, Arlington, Va	15,799.82
William and Barbara Ratchford, rental income, summer home, Nantucket, Mass	4,425.00
William and Barbara Ratchford, rental income, residence, 2 Johnson Drive, Danbury, Conn	6,150.00
William, Barbara, and sons, interest income, savings accounts	112.50
Total income	87,149.42
1982 Federal income taxes, joint return	17,470.69

1982 Virginia State income taxes, Barbara Ratchford (nonresident tax)	451.88
Assets:

●

LOU CARNESECCA

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. RANGEL. Mr. Speaker, today, the Washington, D.C., Alumni of St. John's University is holding its annual luncheon in the Rayburn House Office Building. At the luncheon Lou Carnesecca will be our guest speaker. As a proud alumni of this fine university, I would like to pay tribute to this outstanding American.

Lou Carnesecca has been named as the 1983 college basketball coach of the year by the U.S. Basketball Writers, the U.S. Collegiate Basketball Coaches, and many other groups.

His exceptional coaching ability has always been obvious to those who follow college basketball. This was demonstrated during the past season by the accomplishments of his team. They faced one of the toughest schedules in the country and completed a 28–5 record. They won the ECAC Holiday Festival for a record sixth time, the Joe Lapchuck Memorial Tournament for a record eighth time, and the Big East Conference Championship. The team set a school record for the most victories—28—in a season.

Beyond Mr. Carnesecca's achievements in the record books are his qualities as a humanitarian, leader, molder of character, teacher, and friend to his players and others who come into contact with him. He demonstrates a deep concern for everyone as individuals and sees to it that the glory of big time college basketball is enjoyed, but kept in perspective.

He stresses the academic side of university life and strives to prepare his players for the real world challenges they will be facing throughout their lives.

He is also a goodwill ambassador for the United States. He is currently chairman of the International Basketball Committee of the National Association of Basketball Coaches. He has taken teams of college players on tours of Spain, Yugoslavia, Angola, and Italy. He has also conducted clinics and schools in Spain, Portugal, Italy, Yugoslavia, Canada, Brazil, and Argentina.

It is an honor to have this successful, dedicated, respected American as a fellow alumnus.●

REVEREND MONSIGNOR FRANCIS J. BEEDA, S.T.L., ELEVATION TO PRELATE OF HONOR

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. HARRISON. Mr. Speaker, on Sunday, May 15, the parishioners of Sacred Heart Church in Wilkes-Barre honored their pastor, the Reverend Monsignor Francis J. Beeda, S.T.L., on the occasion of his elevation to the rank of Prelate of Honor.

Monsignor Beeda has been pastor of Sacred Heart Church since 1974. Prior to that, he was an assistant pastor there for 9 years. On March 14 of this year, he was named a Prelate of Honor by His Holiness, Pope John Paul II.

Monsignor Beeda, who is the youngest Slovak Prelate in the United States, was born in Scranton, the son of Roman and Anna Duchak Beeda. He graduated from Central High School, Scranton, studied at the University of Scranton, and entered Christ the King Seminary in 1956. In 1958, the late Bishop of Scranton, the Most Reverend Jerome D. Hannon, sent him to the North American College in Rome to complete his priestly studies. He received his licentiate in Sacred Theology from the Pontificial Gregorian University. He was ordained a priest in St. Peter's Basilica, Rome, on December 20, 1961, by Archbishop Martin J. O'Connor, a former pastor of St. Mary's Church in Wilkes-Barre and then rector of the North American College.

Monsignor Beeda celebrated his first solemn mass at St. Clement's Basilica, where St. Cyril, one of the patrons of Slovakia, is buried.

He celebrated his first mass in his home parish of Holy Family, Scranton, on July 22, 1962. His first priestly assignment, in the summer of 1962 was at St. Patrick's Church in Wilkes-Barre. From September 1962 through September 1965, he served as assistant pastor at St. Joseph's Slovak Parish in Nanticoke. In September 1965, he was assigned to Sacred Heart Church in Wilkes-Barre, where he continues to minister to the people of God.

Monsignor Beeda is a former professor at College Misericordia, Dallas, Pa., and St. Pius X Seminary in Dalton. He has also taught at Bishop Hoban High School, Wilkes-Barre, where he now serves as secretary to the board of pastors.

Monsignor Beeda is a member of all the Slovak fraternal organizations in the United States and Canada. He serves as National Chaplain of the Ladies' Pennsylvania Slovak Catholic Union and is a member of the Fourth Degree Knights of Columbus and

Chaplain of Caravan 4 of the International Order of Alhambra.●

NATIONAL NURSING HOME WEEK

HON. NORMAN SISISKY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. SISISKY. Mr. Speaker, in the spirit of National Nursing Home Week, I want to commend nursing homes in the United States for providing invaluable health services for an estimated 1.4 million nursing home residents.

About 30 years ago a small group of nursing homes set out to increase public awareness of nursing homes and the nursing home residents. This efforts resulted in the first National Nursing Home Week. This year over 19,000 nursing homes across the Nation are observing National Nursing Home Week.

The purpose of this observation remains the same: To recognize the residents of the nursing homes; to remind the public that these residents are still vital members of our communities; to encourage visitation to these homes; and finally to bring attention to the quality health care which these homes provide these special citizens.

Over the past year, I have had the great privilege of meeting many nursing home residents in my district. Their views have helped me personally in my work here. I take this opportunity to thank each of them. I also want to applaud nursing home staffs for their dedication to insuring that these homes are as much like home as possible. For citizens in need of long term care, nursing homes meet that need. They do it well and often under difficult circumstances. National Nursing Home Week is a fitting reminder of the contribution nursing homes provide.●

A TRIBUTE TO MISS MARY YORK: AN OUTSTANDING EDUCATOR RETIRES

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. CLAY. Mr. Speaker, Miss Mary York will retire on June 10, 1983 from the St. Louis public schools, after 47 years of service. Her career has been multidimensional as she has contributed her expertise in a variety of roles within the St. Louis public schools and in the national educational community. In this connection, she has served as a teacher, consultant, principal, director, supervisor, acting executive director, instructional facilitator, manager, university instructor, and author.

She began her career as a substitute teacher in the St. Louis public schools. Subsequently, she was assigned as a permanent teacher and taught at Grant School in South St. Louis; Ashland School in North St. Louis, and at the South Grand Reading Clinic where she later returned as its director. Miss York has provided leadership in the St. Louis public schools in a number of supervisory positions. She has served as a social studies consultant; principal, Lowell School; general consultant, South Grand District; curriculum supervisor; acting executive director, division of curriculum services; instructional facilitator, area II; and as manager of performance standards, division of instructional planning and program development.

In the course of her duties as a curriculum supervisor in the division of curriculum services and as a member of the instructional planning portion of the Committee for Desegregation of the St. Louis Public Schools, Miss York was actively involved in the development of the proposals and curriculum designs for several of the magnet schools which have been implemented in St. Louis. As a member of the Committee on Comprehensive Competency Based Education and as a facilitator on special assignment, Miss York guided and facilitated the development of the performance standards program. In her present position with instructional planning and program development, she is currently managing and supervising the first year of implementation of the comprehensive competency based education program at benchmark levels—primary III, grades 5, 8, and 10—throughout the St. Louis public schools.

Her involvement in the field of education is not limited to the St. Louis school system and geographical area. Teachers from many States and countries have learned about children and the instructional process from Mary York in university courses and summer workshops at St. Louis University, University of Virginia in Charlottesville, and the Johns Hopkins University. She has also served as a consultant in reading/language arts in the States of Texas, Maryland, Ohio, Illinois, Virginia, Pennsylvania, Michigan, New Jersey, Colorado, and Indiana as well as in many other school districts throughout the St. Louis metropolitan area and outstate Missouri.

Miss York's expertise in her field is well recognized in the textbook publishing industry. She authored the textbook, "Using Good English" Series 2-8, "Laidlaw English Program" 2-9. and "Revision of Simplified Missouri Constitution." She has also provided consultant services for the Ginn language program, K-8 and the McGraw-Hill phonics program. With an educational background that includes a bachelor of arts degree from Harris Teachers College and a master of arts degree from St. Louis University, Miss York's commitment to professional development is evidenced by her active participation and leadership in numerous professional organizations.

As part of her commitment to community service, she serves as secretary of the board of trustees of the Brookes Bible Institute. In addition, she has received many honors for her many contributions to the field of education. She has traveled extensively throughout the United States—including Hawaii and Alaska—Canada, and Europe. Her continuing enthusiasm for visting interesting places and her interest in writing instructional materials will undoubtedly keep Mary York actively involved in the field of education for many years to come.

Mr. Speaker, we have in Miss York a superior educator who has given fully and creatively to help Missouri's most precious resource: Her children and youth. I am extremely pleased to call attention to a remarkable educator who gave her best for the sake of a more humane and richer society through education.

I invite my colleagues in the U.S. Congress to join with me in wishing Miss York Godspeed and great success in a retirement filled with tranquility, challenge, and personal fulfillment.●

KATHARINE ST. GEORGE

HON. JAMIE L. WHITTEN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. WHITTEN. Mr. Speaker, I am glad to join with my colleagues in paying tribute to the splendid record of our late friend, Katharine St. George, long a Member of Congress. It was my pleasure to serve with her during her years here. Brilliant, possessed of a fine personality, one who attended to her work, she was respected by all.

It was my privilege to work very closely with her on several major legislative matters. As has been pointed out by my colleagues, her record here is one of real value to the country and a monument to her life in public service. We join with her many friends in our regrets at her passing.●

UNITED STATES REPRESENTED IN INTERNATIONAL DRAGON BOAT RACES

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. MILLER of California. Mr. Speaker, on June 5 and 12, 1983, the Oakland firefighters will be representing the United States in the international dragon boat races in Penang, Malaysia, and Singapore.

The Oakland Dragon Boat Association team, under the leadership of their President, Lee Tannehill, has been training in their authentic dragon boat, the only one in North America. They will be making their third appearance in the international racing circuit for dragon boats.

Oakland's entry into this 2,000-year-old race began in 1980, when Oakland firefighters went to Hong Kong, after training on a dragon boat given to the city the previous year by the Hong Kong Taoist Association.

The popular Chinese dragon boat race traces its roots to the fourth century B.C., when a legendary poet and patriot, Chu Yuan, was said to have thrown himself into a river to protest government corruption.

Local fishermen jumped into their boats and, paddling frantically, tried vainly to keep the river's man-eating fish from devouring the poet.

The paddles now beat furiously in competition and the tradition has lured international teams from Australia, Brunei, Hong Kong, Indonesia, Japan, Macau, Malaysia, West Germany, Singapore, and the United States.

In Penang, a beautiful island state off the northwest corner of Malaysia, the Oakland team will compete in the traditional heavy teakwood canoe-style boats, weighing up to 2,600 pounds paddled by crews of 24 members for a distance of 1,500 meters on an offshore course. The following Sunday in Singapore, the Oakland team will again face most of the same opponents who will be following the Asian circuit. There is one remarkable difference in this competition—the use of 20th century technology. The competition dragon boats will be made of fiberglass, but will retain the traditional style of the teakwood boats used in the Penang races.

Blessed with the advantage of having an authentic boat in which to practice three times a week on the Oakland estuary and with eight members of previous teams still involved, the Oakland team, supported by the Bay Area cities, intends to have the Stars and Stripes flying on the winners' pole two Sundays in a row.

Mr. Speaker, I invite all my colleagues to join me in wishing these competitors good luck. International in spirit, local in talent, the Oakland dragon boat team promises to be our country's ambassadors of good will to Asia.●

A TRIBUTE TO FATHER PAUL CULL

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. PORTER. Mr. Speaker, it gives me great pleasure to congratulate and honor the Reverend Paul Cull, recipient of the Waukegan Exchange Club's 1983 Golden Deeds Award for outstanding contributions to community activities.

Father Cull's distinguished career has been characterized by untiring energy and genuinely selfless initiative on behalf of the Waukegan-North Chicago community in the last 30 years. Beyond his pioneering parish work as associate pastor at Holy Family Church in North Chicago from 1950 to 1955, the reverend's innumerable activities and accomplishments at both Immaculate Conception and St. Dismas in Waukegan bear witness to his strong social conscience and commitment to progress. In addition to helping with the Waukegan Head Start program, Father Cull chaired the Lake County Community Action Program Board of Directors and the Waukegan Area Conference on Religion and Race. He also served as coordinator of Ecumenism and Human Relations for Vicariate I of the Archdiocese of Chicago.

His activities on behalf of the elderly and infirm include serving on the formation committee of the Lake County Council on Senior Citizens and as chairman of the Chaplaincy Service Nursing Home Committee at Winchester House in Libertyville. For his work with patients at Downey Veterans Hospital—now North Chicago VA Medical Center—in North Chicago he received the Lake County Mental Health Society's Mental Health Award.

As pastor of St. Dismas, Father Cull reduced the church's debt from $100,000 to $9,500 at present. Under his leadership, church property has been used for a variety of important community services. The parish hall has housed Republican and Democratic gatherings, RTA referendum meetings and Governors' public accountability sessions as well as fundraising performances by nonparish groups such as the Waukegan Symphony Orchestra and the Waukegan Community Players.

What this very abbreviated mention of Father Cull's activities and accomplishments may not totally communicate, however, is his warm and caring personal nature, his approachability and sincere friendliness, and the high regard in which he is held by everyone he has worked with. He has earned the admiration and respect of the people in his community by getting involved with them at a personal level time after time, while still remaining active and effective on behalf of the community as a whole. In closing, may I say that there could not be a more deserving recipient of the 1983 Golden Deeds Award than the Reverend Father Paul Cull, and I join the Waukegan Exchange Club in saluting this fine citizen for his many years of distinguished service to the community.●

THE KAISER-PERMANENTE MEDICAL CARE PROGRAM 25TH ANNIVERSARY

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mrs. BOXER. Mr. Speaker, Friday, June 10, 1983, marks the 25th anniversary of the Kaiser-Permanente medical care program. It is the largest nongovernmental provider of health care in the world. The program has provided quality medical care to Marin County residents and has grown to its present 120 bed, acute care hospital with a staff of over 800 professionals providing medical care to one out of every four Martin County residents. The Kaiser-Permanente medical care program remains committed to the high ideals of its first founders—Henry J. Kaiser and Sydney R. Garfield, M.D., to continually provide high quality medical care at reasonable costs for Marin County residents. Congratulations and happy birthday.●

GREEN CONGRATULATES THE YUNG WING PUBLIC SCHOOL

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 16, 1983

● Mr. GREEN. Mr. Speaker, I rise to call to my colleagues' attention a significant achievement for one of New York City's most outstanding public schools. The Yung Wing Public School, P.S. 124, attained a remarkable 95.75 percent record of attendance, the highest in the city and State of New York. Under the leadership of Principal Samuel A. Cooper, P.S. 124 has provided students with a stimulating learning environment of high academic quality enhanced by seriously dedicated faculty members and concerned parents. This school has set a fine example for other city schools,

and indeed for all schools in New York State.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, May 17, 1983, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 18

9:00 a.m.
Appropriations
Foreign Operations Subcommittee
To continue hearings on the administration's request for a quota increase to the International Monetary Fund.
SD-192

9:30 a.m.
Governmental Affairs
